How will the great American public feel when they realize that Herbert Hoover was trying to restore in Russia a system in which a few grand dukes and vast landed estate owners were ruling the peasants and grinding the faces of the poor?

It now appears that England, France, and the United States entered into a secret agreement at the peace conference in Paris to support a revolution in Russia by equipping Kolchak, Youdenitch, and others with the necessary arms, equipment, and supplies. It appears that Mr. Herbert Hoover, as head of the American Relief Administration, was an active member in these intrigues and that the child's fund, contributed by Americans for the relief of the starving children of Europe, was at least in part converted to this purpose.

It also appears that after the captain of this vessel had carried out his orders and had been decorated by General Youdenitch for his timely arrival officials of the American Relief Administration feared that it would be unsafe for him to return to London to give evidence, and thereupon, using the official cablegrams of the United States, proceeded to frame him up to discredit him.

On false charges, the captain was relieved of the command of his ship and sent back to the United States officially disgraced. After his return to the United States he demanded an investigation and was completely exonerated. Because of the false charges filed against him, he was also discharged from the United States Naval Reserve Force, and, although the Shipping Board has officially declared that the charges against him were unfounded, he is still unable to have removed the stigma of his discharge from the United States Naval Reserve Force, brought about by the unfounded charges of the American Relief Administration.

There follow what appear to be correct copies of these official cablegrams directed from London to Bordeaux, France, changing the assignment of this vessel and the cargo which it had on board.

There also appear photostatic copies of the bill of lading, showing that the vessel did change its course and went to the relief of Youdenitch. There appears a photostatic copy of a letter or dispatch from General Youdenitch to the commander, dated September 4, 1919, from Reval, as follows:

SIR: I have the honor of decorating you herewith by the ensigns of the order of St. Stanislaus, 3d class, as a sign of deep appreciation of the work you have rendered to the Russian Northwestern Army.

N. YOUDENITCH,
General and Commander in Chief of the Russian Forces of the Northwestern Front.

There appears on this copy the Russian insignia. Apparently the whole thing is genuine. There are others of the same character, bearing out the general statement I have made, that this officer was examined, that a thorough investigation was had, and that he was completely exonerated from the charges which had been made against him by Hoover's board in London. Those papers are at the service of any of the reporters, or of any of my colleagues on the floor.

Last week a young man who had been in the habit of coming to Washington two or three days every week for the last year or so, and whose wife, he said, is related to the chief of police of Washington City, was arrested within 15 minutes after he left my office. He had been shadowed, and the belief was that he was the man who told me about corrupt doings of Felder and Daugherty. The charges against him are from 6 to 18 months old. They involve small amounts of money. One of them was regarding a check for $30. It was a check drawn on a bank in Ohio, of which his own brother is vice president. I have no doubt in the world that he thought that his brother would protect him in a small matter like $30, as you would protect yours, and I would protect mine.

Another case was pending here in the District, and had been pending here over six months, and the amount was trivial. The young man said he had made satisfactory arrangements with the proprietors of the hotel. I do not vouch for that. But this I know, that they had never arrested him until after I had repeated here on the floor of the Senate, in very carefully chosen words, what he said definitely about the doings of Felder and Daugherty. Then they nabbed him, and the strange thing about it is that nobody in Ohio seemed to know that there were any extradition proceedings pending until after the newspapers of this city and of Pennsylvania carried the news. The whole thing was a frame-up, and the father of the boy, who holds a very high, responsible position in Ohio, telegraphed to his lawyer, so the papers say, to go to the limit in defending him. In other words, he came to the relief of his son when he saw he was being persecuted in Washington City.

I will not repeat the various charges he laid at the door of the Attorney General, which the Attorney General ignores. They relate to the dismissal of proceedings against men who have been run down by dry agents, found violating the law of the land. In one case a British ship—the *J. M. Young*—comes into New York Harbor laden with liquor, is seized, and the cargo discharged and the men liberated on a telegram from Attorney General Daugherty, after he has had an interview with Mr. Felder. How can that be explained? How can it be ignored? It has to be met, and the longer it is put off the harder it will be to meet it.

Another case was one involving $200,000 worth of wine, which was liberated under like circumstances. Another case was that of 2,000,000 gallons of whisky liberated under like

circumstances. What are the relations between Felder and Daugherty? The country is entitled to know.

The other case I will now state with some particularity, and do so in words as delicate as the case admits of. It is the case of a very rich Ohio business man, 50 years old, with a wife and daughter, but who is a sexual pervert. The story is that he approached two girls coming out of a department store in Ohio. He spoke to the younger in a way that made the elder know what he meant, and she said, "Is it not enough that you have ruined me? Do you want to ruin my little sister also?" The child was only 15 years old, and her braided hair was hanging between her shoulders and down her back.

But that appeal to this man made by the elder sister, a previous victim of his, made no impression upon his heart, and he laid his plans, and finally the occasion offered, when he extended a box of candy to the child and asked her where she was going. She told him, in her artlessness, and he said, "I know a shorter way and will go with you." He took her by a side street, and when he reached a certain house, with whose occupant he had evidently made previous arrangements, he knocked upon the door. It was opened by a negro woman, and she said to him in a tone of indignation, "I thought you were going to bring a woman. I didn't know you were going to bring a child." He pushed on by her. He spent the night in the house, as did the girl also.

In due time a criminal operation was performed on the girl, and after an interval another, and he wanted a third performed, but he made the mistake of sending her to a firm of doctors, father and son, both of whom were honest. They said to her, "Let nature take its course or you will lose your life." She was young and did not want to die. A child came into the world, and it is now being supported and educated in a Catholic institution in Ohio. The girl herself took up shorthand, wanting to reform herself, and is employed as stenographer in the office of a lawyer of good character and practice in Ohio.

Not content to let her earn an honest living in an honest way, and still intent upon dragging her down, the man went to her with a splendid ring in his hand, showing it to her and making her a proposal which I can not repeat on the floor of the Senate. She spurned him. He said, "If you give me any trouble about this case I will hire the best lawyer in Ohio, and he will break you down on the witness stand."

She nevertheless brought the case, and he did employ the lawyer who enjoys just that reputation in Ohio. On the stand he went at her in the old-fashioned hammer-and-tongs way which we no longer permit in Georgia, and which ought not to be permitted in any State. After fierce volleys of questions, coming one after another with all the terrors of the third degree, she said, "Mr. So-and-So," calling his name, "the man who ruined me and my sister, said he would hire the best lawyer in Ohio to break me down on the witness stand, and that is what you are trying to do." The evident earnestness and innocence of the girl sent a wave of sympathy over the courtroom, as can well be imagined it would. The jury convicted the man. The judge sentenced him to several years in the penitentiary, and he was sent to Atlanta to serve out his term.

Attorney General Daugherty prevailed upon the President of the United States to grant that man a pardon—upon what grounds? The crime was one of premeditation and of the deepest moral turpitude.

Upon what grounds did Attorney General Daugherty act? I am asking him the question in the interest of pure womanhood throughout the Union, and in the interest of the proper administration of our laws.

THE TARIFF.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 7456) to provide revenue, to regulate commerce with foreign countries, to encourage the industries of the United States, and for other purposes.

Mr. McCUMBER. Mr. President, recognizing the eloquence and strength and force of the argument of the Senator from Georgia upon the subject which he was discussing and of which I have no knowledge in the world, I know that the Senator will forgive me if I call his attention and the attention of the Senate to the fact that the only point and the real point is this tax, and I wish we could return to it and vote on it.

The PRESIDING OFFICER (Mr. LADD in the chair). The question is on agreeing to the committee amendment as modified.

Mr. JONES of New Mexico. On the committee amendment as modified I ask for the yeas and nays.

The yeas and nays were ordered and the reading clerk proceeded to call the roll.

Mr. ASHURST responded to his name.

Mr. JONES of New Mexico. Mr. President, may we have the amendment stated?

The PRESIDING OFFICER. Without objection, the pending amendment will be stated.

The READING CLERK. The amendment now being voted upon is on page 68, line 16, where the committee proposes to strike out "30" as inserted by the committee and insert "15," so as to read:

Lithographic plates of stone or other material engraved, drawn, or prepared, 15 per cent ad valorem.

Mr. JONES of New Mexico. The committee amendment, of course, accepts the rate proposed by the House and I will withdraw the request for the yeas and nays.

Mr. WALSH of Montana. Mr. President, before that is done——

The PRESIDING OFFICER. There has been a response and the roll is being called.

Mr. SWANSON. I ask unanimous consent that the roll call be dispensed with.

Mr. McCUMBER. I think we had better go on with the roll call. We have not had a quorum call this afternoon and we might as well have it now.

The PRESIDING OFFICER. The Secretary will proceed with the roll call.

The reading clerk resumed the calling of the roll.

Mr. HARRISON (when his name was called). I have a general pair with the junior Senator from West Virginia [Mr. ELKINS]. I transfer that pair to the senior Senator from Texas [Mr. CULBERSON] and vote "yea."

Mr. POMERENE (when his name was called). I arranged a temporary pair with my colleague [Mr. WILLIS] for to-day and to-morrow, but I am advised that if he were present he would vote as I intend to vote on this question. Under the circumstances, therefore, I vote "yea."

Mr. UNDERWOOD (when his name was called). I transfer my general pair with the senior Senator from Massachusetts [Mr. LODGE] to the junior Senator from Rhode Island [Mr. GERRY] and vote "yea."

Mr. CURTIS. I wish to announce that the senior Senator from Massachusetts [Mr. LODGE], if present, would vote "yea."

The roll call was concluded.

Mr. McCUMBER (after having voted in the affirmative). I transfer my general pair with the junior Senator from Utah [Mr. KING] to the junior Senator from Oregon [Mr. STANFIELD] and allow my vote to stand.

Mr. SUTHERLAND. I transfer my general pair with the senior Senator from Arkansas [Mr. ROBINSON] to the junior Senator from Pennsylvania [Mr. PEPPER] and vote "yea."

Mr. COLT. I transfer my general pair with the junior Senator from Florida [Mr. TRAMMELL] to the junior Senator from Oklahoma [Mr. HARRELD] and vote "yea."

Mr. JONES of New Mexico (after having voted in the affirmative). I have a general pair with the Senator from Maine [Mr. FERNALD], who, I believe, has not voted. I understand, however, that on this question he would vote as I have voted, and therefore I permit my vote to stand.

Mr. CURTIS. I wish to announce the following general pairs of Senators who are necessarily detained:

The Senator from Delaware [Mr. BALL] with the Senator from Florida [Mr. FLETCHER];

The junior Senator from Kentucky [Mr. ERNST] with the senior Senator from Kentucky [Mr. STANLEY];

The Senator from Maine [Mr. HALE] with the Senator from Tennessee [Mr. SHIELDS]; and

The Senator from Indiana [Mr. NEW] with the Senator from Tennessee [Mr. McKELLAR].

The result was announced—yeas 55, nays 1, as follows:

YEAS—55.

Ashurst	Glass	McNary	Smoot
Borah	Harris	Nelson	Spencer
Brandegee	Harrison	Nicholson	Sterling
Broussard	Heflin	Norris	Sutherland
Calder	Jones, N. Mex.	Oddie	Swanson
Cameron	Jones, Wash.	Overman	Townsend
Capper	Kendrick	Page	Underwood
Caraway	Ladd	Phipps	Walsh, Mass.
Colt	La Follette	Pomerene	Walsh, Mont.
Curtis	Lenroot	Rawson	Warren
Dial	McCormick	Sheppard	Watson, Ga.
Dillingham	McCumber	Shortridge	Watson, Ind.
France	McKinley	Simmons	Williams
Frelinghuysen	McLean	Smith	

NAYS—1.

Wadsworth

NOT VOTING—40.

Ball	Elkins	Harreld	McKellar
Bursum	Ernst	Hitchcock	Moses
Crow	Fernald	Johnson	Myers
Culberson	Fletcher	Kellogg	New
Cummins	Gerry	Keyes	Newberry
du Pont	Gooding	King	Norbeck
Edge	Hale	Lodge	Owen

Pepper	Ransdell	Shields	Trammell
Pittman	Reed	Stanfield	Weller
Poindexter	Robinson	Stanley	Willis

So the committee amendment as modified was agreed to.

The amendment of the committee as amended was agreed to.

The PRESIDING OFFICER. The next amendment will be reported.

The READING CLERK. On page 65, line 18, the committee proposes to strike out "2" and insert "2½," so as to read:

Horseshoe nails, and other iron or steel nails, not specially provided for, 2½ cents per pound.

Mr. McCUMBER. On line 18 I move, on behalf of the committee, to strike out the figures "2½" and insert in lieu thereof the figures "1½."

Mr. JONES of New Mexico. Mr. President——

Mr. McCUMBER. The subject has already been discussed.

Mr. JONES of New Mexico. Yes; the subject has been discussed, but I just want to say a few words further.

This item covers horseshoe nails. Horseshoe nails at the present time are on the free list. I merely want to say a word regarding the production and the competitive conditions. We have been producing a very large quantity of horseshoe nails, and it will be observed that the clause reads:

Horseshoe nails, and other iron or steel nails, not specially provided for—

And under that item the Tariff Commission says:

Quantity: Prior to 1914 there was a continuous import of "horseshoe, hob, and all other wrought-iron and steel nails not specially provided for" of approximately $3,000 per year.

It is stated here that there are six concerns making horseshoe nails. One of them has imported some Swedish iron. From the manner in which the circumstance is referred to it is a merely isolated case, but of the six concerns manufacturing horseshoe nails one of them has imported Swedish iron. Of course, the other concerns are making nails altogether out of soft steel, and I presume this one concern is making them out of soft steel as well. These nails are made out of both kinds of steel.

Now, in regard to competitive conditions the Tariff Commission states:

During the war there was a very large demand for horseshoe nails both for the Army and home consumption here and for shipment abroad. Under war conditions, markets in Mexico, the West Indies, and South and Central America, formerly to a large extent in foreign hands, were opened to the American product. Prior to the war one great difficulty to be met here was that the import business in these countries was largely in German hands.

The American manufacturers were able to satisfy only a small part of this demand, because of the needs of our Army and the allied Governments, and the shortage of raw material. Enough was sent, however, so that the importers are familiar with the American product, and it is felt that there are large opportunities for the American manufacturer in these markets.

The raw material for horseshoe nails is either Swedish iron or soft steel. The former is imported to some extent, and is used for high quality nails.

The import of foreign nails has increased since they were put upon the free list, but still it does not represent a large amount in relation to the total production. In 1916 the imports seem to have been abnormal, and a manufacturer has called attention to this import as a case of the dumping of a foreign product on the American market.

After the war the American manufacturers may expect severe foreign competition in the new export markets they have found. In this country the manufacture of horseshoe nails is an independent industry, and manufacturers feel that this may prove a disadvantage if their competitors are large firms manufacturing horseshoe nails only as a by-product. This is generally not the case, but one German firm is known to operate in this manner.

The last appearance of the horseshoe-nail manufacturers before the Ways and Means Committee was in 1893. No protest was made in 1913 against placing horseshoe nails on the free list.

Since 1893 there has been nobody interested in the manufacture of horseshoe nails who has cared enough about the matter to appear before the Ways and Means Committee in the preparation of tariff bills which have been framed since that time. I understand, of course, that the Senator from Connecticut [Mr. McLEAN] has a communication from a manufacturer of such nails who wants a duty of 4 cents a pound. The price of these nails before the war was about one-half that amount, at one time being less than 3 cents a pound.

Mr. McLEAN. Not of horseshoe nails.

Mr. JONES of New Mexico. That was the price of horseshoe nails.

Mr. McLEAN. It is not the price now.

Mr. JONES of New Mexico. In 1914 the price was 2.8 cents a pound.

Mr. McLEAN. What is the price now?

Mr. JONES of New Mexico. The present price is 5.3 cents a pound. The manufacturer wants a duty of 4 cents a pound; he says that he has got to have it or he can not get along in his business. The Senator from Connecticut did not believe that; the committee does not believe it, as is evidenced by their reporting in favor of a duty of 1½ cents per pound. If you are not going to believe a man as to a matter of that kind, why take any cognizance of what he says? Unless you are going to give him what he says he must have, why give him anything, unless there is some other evidence which can justify this duty?

Mr. President, horseshoe nails are now on the free list, and, except the one person who has written a letter to the Senator from Connecticut, so far as I know, there is nobody complaining about horseshoe nails remaining on the free list.

Mr. POMERENE. Mr. President——

Mr. JONES of New Mexico. I yield to the Senator from Ohio.

Mr. POMERENE. I desire to ask the Senator a question. During the last six months what have been the importations of these nails?

Mr. JONES of New Mexico. The importations have not amounted to much. Horseshoe nails are not separated, I may say, from the other items, but the figures show that prior to 1914 of horseshoe nails, hobnails, and other nails not specially provided for the importations amounted to about $3,000 a year.

Mr. POMERENE. What are the particular circumstances which seem to justify the manufacturer making this demand?

Mr. JONES of New Mexico. The only circumstance of which I know is a letter which the Senator from Connecticut has from somebody who says he must have a duty of 4 cents a pound on these nails or he can not do business.

Mr. SMITH. Did not the nails referred to formerly sell for less than 4 cents a pound?

Mr. JONES of New Mexico. The unit value of the nails in 1914 was 2.4 cents a pound; in 1916, 5.7 cents a pound; in 1918, 12.7 cents. They have been coming down ever since, in 1921 the value being 5.3 cents a pound. That is all they sell for; but the committee now proposes to impose a duty of a cent and a half a pound on horseshoe nails, which in 1914 were selling at 2.4 cents a pound.

The PRESIDING OFFICER. The question is on the amendment proposed by the Committee on Finance.

Mr. POMERENE. I ask that the amendment be stated.

The ASSISTANT SECRETARY. The Senator from North Dakota proposes to modify the committee amendment on page 65, line 18. The first proposal of the committee was to strike out "2 cents," the House rate, and insert "2½ cents." The Senator from North Dakota now proposes to strike out "2½ cents" and insert "1½ cents," so that, if amended, it will read:

Horseshoe nails, and other iron or steel nails, not specially provided for, 1½ cents per pound.

Mr. KING. Mr. President, may I inquire of the Senator from New Mexico whether the 30 per cent ad valorem found in line 16, page 65, on nails, spikes, and so forth, has been accepted by the Senate?

Mr. JONES of New Mexico. That rate was reduced by the committee to 15 per cent, and that has been accepted.

Mr. KING. I was called from the Chamber. Is there any reason for a rate upon these products which we make in such great abundance here and the importations of which are negligible?

Mr. JONES of New Mexico. I gave notice at the time that under the parliamentary situation we could not do more than to accept the lower rate proposed by the committee, but when we come back to review the bill and pass finally upon the paragraphs as amended I propose to offer a motion putting all the commodities embraced in the paragraph on the free list.

Mr. KING. I should like to inquire of the Senator while I have the floor if there could not logically be some distinction between horseshoe nails and other iron or steel nails not specially provided for. I imagine that horseshoe nails perhaps require a little more work than the other kinds of nails referred to in the same line and on which the same tax is levied.

Mr. JONES of New Mexico. Horseshoe nails are all made by machinery. They are cut out by machinery. The soft steel is fed in at one end of the machine and the horseshoe nails come out at the other; that is all there is to the process.

Mr. KING. Are they made by the Steel Trust or other big steel corporations or their allied concerns?

Mr. JONES of New Mexico. No; I do not think so; I think they are made by concerns which do nothing else but manufacture horseshoe nails. There are six of them, as I understand.

Mr. KING. And there is no competition?

Mr. JONES of New Mexico. Well, there are six concerns.

Mr. KING. I mean no foreign competition?

Mr. JONES of New Mexico. There is no foreign competition of any consequence.

Mr. KING. Does the Senator think that we ought by this legislation to give an opportunity for the six concerns to form a combination, if they have not formed one already, so that they will have a domestic market to themselves without any fear of competition from abroad?

Mr. JONES of New Mexico. I certainly do not; and I have expressed my dissent from putting any duty upon these nails.

Mr. KING. Has the Senator from Connecticut or any other Senator indicated the cost of producing horseshoe nails in Great Britain or Germany or Canada or other countries?

Mr. JONES of New Mexico. Not at all; there has been no testimony on the subject. The Senator from Connecticut had a letter from some man who said that he would have to have 4 cents a pound duty on these nails in order to remain in business.

Mr. KING. Is there anything to indicate that the iron-ore deposits in other countries are larger and more easily worked than the Mesabi Range deposits and other deposits in the United States?

Mr. JONES of New Mexico. To the contrary, every indication is that as to commodities of this kind we can manufacture them cheaper than any country on earth.

Mr. KING. Then, I should like to ask the Senator what excuse is given for a duty on these commodities?

Mr. JONES of New Mexico. None, except the letter which the Senator from Connecticut has received.

Mr. KING. Did we have a chance to cross-examine the man who wrote the letter to find out what the facts were?

Mr. JONES of New Mexico. The letter was not put in the hearings; there was nothing in the hearings so far as I know about it. The letter has come in since the hearings were concluded, and, I presume, is a private letter to the Senator from Connecticut.

Mr. KING. A sort of nebulous demand from some man who did not have the courage to come before the committee and subject himself to cross-examination?

Mr. JONES of New Mexico. I imagine he has considerable courage. Any man who could say that it would take a duty of 4 cents to enable him to manufacture horseshoe nails in this country must have a good deal of courage of some sort.

Mr. KING. It might be denominated audacity, perhaps, instead of courage. Is there any other argument adduced than the mere fact that the Senator from Connecticut says he has a letter from some man who wants 4 cents a pound duty?

Mr. JONES of New Mexico. That is all that has been offered here.

Mr. McLEAN. If the Senator from Utah will read the RECORD to-morrow he will ascertain the reasons which I gave for this duty. I do not care to repeat them now.

Mr. KING. I presume, Mr. President, the reason is that some person engaged in the production of this commodity wants an opportunity further to exploit the people; he wants an opportunity to charge higher prices, and he does not want to have any possible foreign competition. That is the reason back of the demand for most of the rates to be found in this bill.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the committee as modified.

The amendment as modified was agreed to.

The PRESIDING OFFICER. The Secretary will state the next amendment of the committee.

The ASSISTANT SECRETARY. The amendment in the next paragraph has been agreed to after having been modified.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. Overhue, its enrolling clerk, announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on certain amendments of the Senate to the bill (H. R. 9981) making appropriations for the Executive and for sundry independent executive bureaus, boards, commissions, and offices for the fiscal year ending June 30, 1923, and for other purposes.

The message also announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on certain amendments of the Senate to the bill (H. R. 9859) making appropriations for the Post Office Department for the fiscal year ending June 30, 1923, and for other purposes.

The message further announced that pursuant to the provisions of the sundry civil appropriation act approved March 4, 1921, the Speaker had appointed Mr. MUDD, Mr. BLAKENEY, Mr. HILL, Mr. LINTHICUM, and Mr. GOLDSBOROUGH members of the committee on the part of the House to attend the dedication of the monument to Francis Scott Key at Fort McHenry, Baltimore, Md., on the afternoon of Wednesday, June 14, 1922.

ENROLLED BILL SIGNED.

The message also announced that the Speaker of the House had signed the enrolled bill (S. 2775) to extend for one year the powers of the War Finance Corporation to make advances under the provisions of the act entitled "An act to amend the War Finance Corporation act, approved April 5, 1918, as amended, to provide relief for producers of and dealers in agricultural products, and for other purposes," approved August 24, 1921, and it was subsequently signed by the President pro tempore.

INDEPENDENT OFFICES APPROPRIATIONS—CONFERENCE REPORT.

Mr. WARREN. Mr. President, I have here a conference report which disposes of a matter that has been at issue a long time—the independent offices appropriation bill.

The PRESIDING OFFICER. The Secretary will read the conference report.

The Assistant Secretary read as follows:

The committee of conference on the disagreeing votes of the two Houses on certain amendments of the Senate to the bill (H. R. 9981) making appropriations for the Executive and for sundry independent executive bureaus, boards, commissions, and offices for the fiscal year ending June 30, 1923, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendment numbered 31.

Amendment numbered 21: That the House recede from its disagreement to the amendment of the Senate numbered 21, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following:

"Salaries: Comptroller General, $10,000; Assistant Comptroller General, $7,500; assistants to Comptroller General—4 at $6,000 each; chief clerk, $3,000; chiefs of divisions—7 at $3,000 each; chief of appointment division, $2,500; assistants to chiefs of divisions—3 at $2,750 each, 4 at $2,500 each; chiefs of sections—10 at $2,500 each, 13 at $2,250 each, 2 at $2,000 each; assistant chiefs of sections—11 at $2,000 each, 1 at $1,900; chiefs of subsections—3 at $2,000 each; disbursing officer, $3,000; deputy disbursing officer, $1,800; private secretary, $1,800; attorneys—1 $5,000, 4 at $4,000 each, 4 at $3,600 each, 1 $3,100; 5 at $3,000 each, 1 $2,750; law clerks—1 $2,500; 4 at $2,400 each, 4 at $2,250 each, 2 at $2,200 each, 9 at $2,000 each, 4 at $1,800 each, 1 $1,600; accountants—1 $2,500, 2 at $2,400 each, 3 at $2,100 each, 3 at $2,000 each; investigators—1 $4,000, 1 $3,000, 20 at $2,000 each; reviewers—8 at $2,100 each; principal clerks—17 at $2,000 each; clerks—164 of class 4, 218 of class 3, 255 of class 2, 267 of class 1, 56 at $1,000 each, 70 at $900 each; check assorters—4 at $1,000 each; duplicating machine operator, $900; carpenter, $1,400; foreman of messengers and laborers, $1,400; chief messenger, $1,000; messengers—1 $1,000, 15 at $840 each; assistant messengers—29 at $720 each; laborers—1 $720, 21 at $660 each; messenger boys—14 at $480 each, 1 $420; forewoman of charwomen, $660; charwomen—22 at $240 each; and temporary clerks, stenographers, typists, and other assistants, to be paid at a rate not exceeding $1,800 per annum, $375,000; in all, $2,293,190.

"Contingent expenses: For traveling expenses, rent, telephone service, purchase and exchange of books, office supplies (including stationery) and equipment, repairs and maintenance, and miscellaneous items, $175,261."

And the Senate agree to the same.

Amendment numbered 35: That the House recede from its disagreement to the amendment of the Senate numbered 35, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following: "No officer or employee of the United States Shipping Board or the United States Shipping Board Emergency Fleet Corporation shall be paid a salary or compensation at a rate per annum in excess of $11,000 except the following: Six at not to exceed $25,000 each, and two at not to exceed $20,000 each"; and the Senate agree to the same.

F. E. WARREN,
REED SMOOT,
W. L. JONES,
LEE S. OVERMAN,
Managers on the part of the Senate.

WILL R. WOOD,
EDWARD H. WASON,
T. W. HARRISON,
Managers on the part of the House.

Mr. WARREN. I move the adoption of the report.

The PRESIDING OFFICER. The question is on agreeing to the conference report.

The report was agreed to.

POST OFFICE DEPARTMENT APPROPRIATIONS—CONFERENCE REPORT.

Mr. TOWNSEND. Mr. President, I present the conference report on the Post Office appropriation bill.

The PRESIDING OFFICER. The report will be read.

The Assistant Secretary read as follows:

The committee of conference on the disagreeing votes of the two Houses on certain amendments of the Senate to the bill (H. R. 9859) making appropriations for the Post Office Department for the fiscal year ending June 30, 1923, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, and 52.

Amendment numbered 17: That the House recede from its disagreement to the amendment of the Senate numbered 17, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$1,903,380"; and the Senate agree to the same.

Amendment No. 58: That the Senate recede from its disagreement to the amendment of the House to the amendment of the Senate numbered 58, and agree to the same with an amendment as follows: In lieu of the matter inserted by the amendment of the House, insert the following:

"SEC. 4. That for the purpose of carrying out the provisions of the act entitled 'An act to provide that the United States shall aid the States in the construction of rural post roads, and for other purposes,' approved June 11, 1916, and all acts amendatory thereof and supplementary thereto, there is hereby authorized to be appropriated, out of any money in the Treasury not otherwise appropriated, the following additional sums, all such sums to be expended in accordance with the provisions of such act:

"The sum of $50,000,000 for the fiscal year ending June 30, 1923.

"The sum of $65,000,000 for the fiscal year ending June 30, 1924.

"The sum of $75,000,000 for the fiscal year ending June 30, 1925.

"The Secretary of Agriculture is hereby authorized, immediately upon the passage of this act, to apportion the $50,000,000 herein authorized to be appropriated for the fiscal year ending June 30, 1923, among the several States, as provided in section 21 of the Federal highway act approved November 9, 1921: *Provided*, That the Secretary of Agriculture shall act upon projects submitted to him under his apportionment of this authorization and his approval of any such project shall be deemed a contractual obligation of the Federal Government for the payment of its proportional contribution thereto.

"PAR. 2. For the purpose of carrying out the provisions of section 23 of the Federal highway act, approved November 9, 1921, there is hereby authorized to be appropriated for forest roads and trails, out of any money in the Treasury not otherwise appropriated, the following additional sums, to be available until expended, in accordance with the provisions of said section 23:

"The sum of $6,500,000 for the fiscal year ending June 30, 1924.

"The sum of $6,500,000 for the fiscal year ending June 30, 1925.

"PAR. 3. For the purposes of this section and of the acts heretofore making appropriations to aid the States in the construction of rural post roads the term 'bridges' includes railroad grade separations, whether by means of overhead or underpass crossings.

"PAR. 4. The provision of section 5 of the act entitled 'An act making appropriations for the service of the Post Office Department for the fiscal year ending June 30, 1920, and for other purposes,' approved February 28, 1919, fixing the limitation of $20,000 per mile which the Secretary of Agriculture may make, is hereby amended to read as follows:

"'That the payments which the Secretary of Agriculture may make from sums appropriated under this act or any act amendatory thereof or supplementary thereto for the fiscal year ending June 30, 1923, shall not exceed $16,250 per mile exclusive of the cost of bridges of more than 20 feet of clear span; and that the payments which the Secretary of Agriculture may make from any sum appropriated under the provisions of this act or any act amendatory thereof or supplementary thereto, after the fiscal year ending June 30, 1923, shall not exceed $15,000 per mile exclusive of the cost of bridges of more than 20 feet of clear span: *Provided*, That the limitation of payments herein provided shall apply to the public-land States, except that the same is hereby increased in proportion to the increased percentage of Federal aid authorized by section 11 of the act entitled "An act to amend the act entitled 'An act to provide that the United States shall aid the States in the construction of rural post roads, and for other purposes,'" approved November 9, 1921.'"

PAR. 5. Section 24 of the act entitled "An act to amend the act entitled 'An act to provide that the United States shall aid the States in the construction of rural post roads, and for other purposes,'" approved November 9, 1921, is amended to read as follows: "That in any State where the existing constitution or laws will not permit the State to provide revenues for the construction, reconstruction, or maintenance of highways, the Secretary of Agriculture shall continue to approve projects for said State until five years after November 9, 1921, if he shall find that said State has complied with the provisions of this act in so far as its existing constitution and laws will permit."

PAR. 6. If any officer, agent, or employee of the United States, or any officer, agent, or employee of any State or Territory, or any person, association, firm, or corporation, or any officer or agent of any person, association, firm, or corporation shall knowingly make any false statement, false representation, or false report as to the character, quality, quantity, or cost of the material used or to be used, or the quantity or quality of the work performed or to be performed, or the costs thereof in connection with the submission of plans, maps, specifications, contracts, or costs of construction of any project submitted for approval to the Secretary of Agriculture under the provisions of the Federal highway act, or shall knowingly make any false statement, false representation, or false report or claim for work or materials for the construction of any project approved by the Secretary of Agriculture under said Federal highway act and all amendments thereto, or shall knowingly make any false statement or false representation in any report required to be made under said Federal highway act or acts supplementary thereto with the intent to defraud the United States shall, upon conviction thereof, be punished by imprisonment not to exceed five years or by a fine not to exceed $10,000, or by both fine and imprisonment within said limits.

PAR. 7. If any provision of this section, or the application thereof to any person or circumstances, shall be held invalid, the validity of the remainder of the section and the application of such provision to other persons or circumstances shall not be affected thereby.

PAR. 8. All acts or parts of acts in any way inconsistent with the provisions of this section are hereby repealed.

And the House agree to the same.

CHAS. E. TOWNSEND,
THOMAS STERLING,
GEO. H. MOSES,
E. S. BROUSSARD,
Managers on the part of the Senate.

C. B. SLEMP,
MARTIN B. MADDEN,
THOMAS U. SISSON,
Managers on the part of the House.

Mr. TOWNSEND. I move the adoption of the report.

Mr. KING. Mr. President, the report just read, as I understand, contains some very important legislation. To what extent it modifies existing law I am unable to state without some little time for comparison. I ask the Senator from Michigan if he will not let the matter go over until to-morrow, have it printed, and give us an opportunity to examine it?

Mr. TOWNSEND. I have no objection, although it has been before the Senate since the House passed its bill, and it was referred to our committee as it came to the Senate, and we adopted some amendments which I am very certain the Senator will approve, and there is no objection from any source that I have heard as to the changes we made in that law. It carries out our three-year program as adopted by the Senate in its bill and exactly the same amount that was carried in it, except the amount per mile, which we reduced. Our bill carried $20,000 per mile. The House bill provided for $12,500 and $10,000. We compromised on $16,250 and $15,000. There is no change in the law to which the Senator will object, I am certain.

Mr. KING. I have no doubt the Senator states the situation accurately; but the matter is very important, and I have a number of letters, one from the road commission of my State, which I have not had time to examine, and I am not sure whether any of the other communications which I have received relate to this bill or not.

Mr. TOWNSEND. All the communications the Senator has received, I am sure, are the same as I have received and all

other Senators have received, protesting against the House provision reducing the amount per mile.

We had to reduce it as a compromise. The House, however, provided for $12,500, available next year, and $10,000 thereafter. We compromised on $16,250 and $15,000, which was the best we could get. I am very certain that the Senator would not object to the House provision reducing it to $12,500, but practically all of the highway commissions of the country, I think, thought that it was a mistake to reduce it below the $20,000. We had to do it if we were to get an agreement on the bill.

Mr. KING. I appreciate the courtesy of the Senator in permitting it to go over until to-morrow.

Mr. McCUMBER. Mr. President, I should like to ask the Senator from Michigan if he will just give me in round numbers what the appropriation for these roads is for the year ending June 30, 1923.

Mr. TOWNSEND. There is no appropriation made in this bill for 1923.

Mr. McCUMBER. What is the amount that is to be used?

Mr. TOWNSEND. $125,000,000 to the 30th of June, 1923.

Mr. McCUMBER. And how much the next year?

Mr. TOWNSEND. It is calculated that there will be a continuing program of about $125,000,000 a year.

Mr. McCUMBER. Am I right in assuming that no provision is carried for levying an extra tax to meet this $125,000,000 a year?

Mr. TOWNSEND. There is no special provision made for such a tax.

Mr. McCUMBER. I am glad to know it.

PUBLICITY FUND OF FEDERAL RESERVE BOARD.

Mr. HEFLIN. Mr. President, I ask unanimous consent for the present consideration of a resolution which I send to the desk and ask to have read.

The PRESIDING OFFICER. The resolution will be read.

The resolution (S. Res. 302) was read, as follows:

Whereas it has been charged on the floor of the Senate that the Federal Reserve Board has a publicity fund of several thousand dollars which it uses, from time to time, to carry on a newspaper propaganda in support of the acts and policies of the Federal Reserve Board; and

Whereas it has been charged that a portion of said publicity fund has been used to induce certain newspapers to praise and defend the acts and policies of said Federal Reserve Board, and to attack and condemn Senators who have criticized the deflation policy of said board: Therefore, be it

Resolved, That the Federal Reserve Board be, and it is hereby, requested to furnish to the Senate, at its earliest convenience, in writing, all the information in its possession touching the matters specifically set out in the following questions:

(1) Has the Federal Reserve Board a publicity fund; if so, how much or what amount is provided per annum, and from what source is such a fund derived?

(2) For what purpose is said fund now used, and for what purpose has it been used since May 15, 1920, to June 1, 1922?

(3) To what person, or persons, and in what amounts and for what service performed, has money been paid from said publicity fund since May 15, 1920, to June 1, 1922?

(4) How is such fund disbursed—upon whose order is it paid out?

The PRESIDING OFFICER. Is there objection to the immediate consideration of the resolution?

Mr. McLEAN. My attention was diverted while the resolution was being read, and I would like to ask the Senator from Alabama to explain what it is.

Mr. HEFLIN. This is a resolution calling upon the Federal Reserve Board to give to the Senate such information as it may have touching the charges that have been made here from time to time that it had a publicity fund for the purpose of carrying on newspaper propaganda, to defend and praise its policies and its acts, and to condemn Senators who disagreed with them. This calls on them to state whether they have such a fund or not; and if so, from what sources it is derived, how it is raised, and so forth.

Mr. McLEAN. Does the Senator object to its going over until to-morrow? I would like to read it.

Mr. HEFLIN. I do not see any reason why it should go over. It is a very simple resolution. I had a resolution put through here some time ago calling on them to send information about the new $26,000,000 bank building in New York, the bids, and so forth. They sent certain information with regard to that.

Mr. McLEAN. There have been a good many resolutions passed, and considerable information has been received from the Federal Reserve Board, and I shall probably not object to the passage of the resolution.

Mr. HEFLIN. I will say to the Senator that this information has never been received, and it has not been asked for directly by the Senate, but this resolution calls upon the board to give to the Senate such information as it has touching the charges that they have a publicity fund, and calls on them to tell the Senate, if they have such a fund, where they get such a fund and how they disburse it.

Mr. McLEAN. I shall object to its consideration to-day. I do not want the Senator to infer that I shall object to-morrow if upon looking at the resolution it seems to me to be proper.

Mr. HEFLIN. Very well; if the Senator objects, it will have to go over.

Mr. SMOOT. May I ask the Senator if he has written a letter to the board asking for this information?

Mr. HEFLIN. I have not.

Mr. SMOOT. I do not think there would be any question but that the Senator would get it by writing a letter to the board.

Mr. HEFLIN. I would rather write to them through a Senate resolution. We have a right to ask for this information.

Mr. SMOOT. I know that; that is why it is offered. The Senator can get that information by writing, I am quite sure.

Mr. HEFLIN. The Senator from Connecticut, I understand, objects to consideration of the resolution to-day, and I will call it up to-morrow.

The PRESIDING OFFICER. There being objection, the resolution will go over.

PRIMARY ELECTION EXPENSES OF HON. ALBERT J. BEVERIDGE.

Mr. HARRISON. Mr. President, some days ago in speaking to the Senate of the primary expenses of Gifford Pinchot in Pennsylvania, which showed up very large, I made the statement that in Indiana, where Mr. Beveridge won, he did not file any expense account showing the expenditures by him in that senatorial primary. Of course, I was alluding to the fact that he filed no report with the Secretary of the Senate.

I want to do no one an injustice, so I desire to read a letter which I have just received from Mr. Beveridge, touching the matter. The letter is as follows:

INDIANAPOLIS, *June 3, 1922.*

Hon. PAT HARRISON,
United States Senator, Washington, D. C.

DEAR SENATOR: My attention has just been called to your statement in the Senate May 30, as reported in the public press as follows:

"Out in Indiana, where Mr. Beveridge won, he did not file any account at all. Nobody knows how much Beveridge, the so-called Progressive, spent in Indiana."

This is entirely untrue. My statement, under oath, as to my total expenditures, was published as required by law. The sworn statement of Charles N. Williams, president of the Farmers Trust Co. and treasurer of my committee, as to all other expenditures made in my behalf, was also filed according to law. Both of these statements were published in the newspapers. I inclose them.

As you will observe, they show that the entire expenditure, both of the committee and of myself, for the entire State, and the whole campaign, was slightly in excess of $10,000.

Moreover, each week during the campaign Mr. Williams and myself published separately our affidavits of the total itemized expenditures made by myself and by the committee during the preceding seven days. Mr. Williams and myself did this voluntarily, and without legal requirement. The statements inclosed are summaries of these previously published affidavits.

Evidently you were misinformed; since, of course, you would not knowingly make an inaccurate statement, or willfully do any man an injustice, I am therefore placing the data in your hands.

Yours truly,

ALBERT J. BEVERIDGE.

I also desire to incorporate as a part of my remarks an item which appeared in the Indianapolis Star showing the itemized statement of Mr. Beveridge's expenses in that primary. There was no statement filed with the Secretary of the Senate by either Senator NEW or Mr. Beveridge, due to the decision, however, in the Newberry case, but this shows that Mr. Beveridge did file a statement of expenditures with the officials of the State of Indiana.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

[From the Indianapolis Star, Saturday, May 13, 1922.]

PRIMARY EXPENSES TOTALING $8,747.99 FILED BY BEVERIDGE—ITEMIZED STATEMENT IS EXCLUSIVE OF NOMINEE'S PERSONAL ACCOUNT.

Primary campaign expenditures of Albert J. Beveridge, Republican nominee for United States Senator, exclusive of his personal expense account, a schedule of which will soon be filed, amounted to $8,747.99, according to an itemized statement filed yesterday in the office of County Clerk George V. Coffin.

Charles N. Williams, treasurer of the Marion County Beveridge-for-Senator Club who filed the account, received contributions totaling $9,115.87, according to the statement. Included in the contributions were $1,000 from Mr. Beveridge, $5,000 from Mrs. Katherine Beveridge, Mr. Beveridge's wife, $1,000 from Charles W. Miller, $200 from Larz A. Whitcomb, $200 from E. R. Lilly, $200 from Mr. Williams, and $100 from Charles Kirkpatrick, of New Richmond, Ind.

$367.88 IS RETURNED.

According to the record, $367.88 was returned to Mrs. Beveridge. Expenditures were distributed as follows: Clerical, $2,169; postage, $716; organization, $3,588.75; headquarters, $927.48; and Beveridge buttons, $622.99.

Other Republican candidates who filed expense accounts were: Judge James A. Collins of criminal court, candidate for renomination on the Republican ticket, $71.25; State representative—Walter Lieber, $26; Herman L. Traub, $27; Ferdinand J. Montani, $96.55; William Gruner,

$46.75; Charles Mendenhall, $20.25; John H. Murray, $16.25; Robert H. Henry, jr., $26.50; Elizabeth Rainey, $33.55. Harry Dunn, county auditor, $272.50; Ralph E. Jones, county clerk, $152.25; justice of the peace for Center Township—Isidor Wulfson, $245.50; Willa J. McCoy, $9; Rutherford B. H. Smith, $149.78; and Edward L. Dietz, $51.

PUBLIC HIGHWAY IN SKAGIT COUNTY, WASH.

Mr. JONES of Washington. Mr. President, from the Committee on Commerce I report back favorably without amendment the bill (H. R. 6313) authorizing the Secretary of Commerce to grant a right of way for a public highway to the county of Skagit, Wash., and I submit a report (No. 752) thereon. It is purely a local matter, and I ask unanimous consent for the present consideration of the bill.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the bill?

Mr. SMOOT. Let it be read first.

The PRESIDING OFFICER. The Secretary will read the bill.

The Assistant Secretary read the bill, as follows:

Be it enacted, etc., That the Secretary of Commerce is authorized to convey to the county of Skagit, Wash., a right of way for a public highway, not more than 50 feet wide, through the property of the United States in Skagit County, Wash., used as a fish-cultural station and hatchery, such right of way being more particularly described as follows: All that portion of the northeast quarter of the southeast quarter of section 15, township 35 north, range 7 east of the Willamette meridian, lying and being within lines 25 feet on each side of the following-described center line, to wit: Beginning at a point on the east and west center line of said section 15, south 88° 59′ west 730 feet, more or less, west of the east quarter corner of the above said section 15, township 35 north, range 7 east, Willamette meridian; thence south 88° 59′ west along the east and west center line of the above said section 15, 75 feet; thence south 57° 49′ west 340 feet; thence south 88° .07′ west 250 feet, more or less, to the west line of the northwest quarter of the northeast quarter of the southeast quarter of said section 15, township 35 north, range 7 east, Willamette meridian, containing seventy-one one-hundredths acres, more or less: *Provided*, That such conveyance of right of way shall not be construed as affecting the right or title of the United States in said property or as in violation of any stipulation or condition in the conveyance of the same to the United States, and on the further condition that the land or right of way authorized to be conveyed hereunder shall be constructed and maintained as a highway free of any expense to the United States, and all work thereon shall be such as not to interfere with the operations and efficiency of said fish-cultural station, and in a manner satisfactory to the Secretary of Commerce: *Provided further*, That the right is hereby reserved to alter, amend, or repeal the provisions of this act.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the bill?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

RESTRICTION OF ORIENTAL IMMIGRATION.

Mr. SHORTRIDGE. Mr. President, I have been furnished with a certified copy of resolutions adopted by the Grand Parlor, Native Sons of the Golden West, a patriotic association or order made up of native sons of California. The resolutions express the enlightened opinion and the mature judgment of this American order concerning oriental immigration. To the end that the Congress and the American people may know the deliberate views of California, voiced by these resolutions, I ask unanimous consent that they be printed in the RECORD in the regular RECORD type and referred to the Committee on Immigration.

There being no objection, the resolutions were referred to the Committee on Immigration and ordered to be printed in the RECORD in 8-point type, as follows:

GRAND PARLOR,
NATIVE SONS OF THE GOLDEN WEST.

Whereas the Order of the Native Sons of the Golden West has at all times opposed immigration and colonization by Japanese and other Asiatics, and has viewed with alarm the rapid increase of Japanese in California; and

Whereas we regard such penetration a serious menace not only to California but to our country as well: Be it

Resolved, That the Grand Parlor of the Native Sons of the Golden West, represented by delegates from all parts of California, in forty-fifth session assembled, again places itself on record as in favor of and indorses the following declaration of principles:

First. Absolute exclusion for the future of all Japanese immigration, not only male but female, and not only laborers, skilled and unskilled, but "farmers" and men of small trades and professions, as recommended by Theodore Roosevelt.

Permission for temporary residence only for tourists, students, artists, and commercial men, teachers, etc.

Second. Such exclusion to be enforced by United States officials, under United States laws and regulations, as done with immigration, admitted or excluded, from all other countries, and not, as at present, under an agreement whereby control and regulation is surrendered by us to Japan.

Third. Compliance on the part of all departments of the Federal Government with the Constitution, and the abandonment of the threat or attempt to take advantage of certain phrasing of that document as to treaties, which it is claimed gives the treaty-making power authority to violate plain provisions of the Constitution in the following matters:

(a) To nullify State rights and State laws for control of lands and other matters plainly within the State's jurisdiction.

(b) To grant American citizenship to races of yellow color, which are made ineligible for such citizenship.

Fourth. For the Japanese legally entitled to residence in California fair treatment, protection in property rights legally acquired, and the privilege of engaging in any business desired, except such as may be now or hereafter denied by law to all aliens or to aliens ineligible to citizenship, and provided, particularly, they may not hereafter buy or lease agricultural lands: Now therefore be it

Resolved, That the Native Sons of the Golden West, in Grand Parlor assembled, hereby indorse said declaration of principles and urge that the President, Department of State, and the Congress of the United States adopt and observe the policy therein stated; and be it further

Resolved, That the secretary of this body be, and he is hereby, directed to transmit copies of these resolutions to the President and Secretary of State of the United States and to each of California's Senators and Representatives in Congress.

FLETCHER A. CUTLER, *Grand Trustee.*
H. C. LICHTENBERGER, *Past Grand President.*
EDWIN A. MESERVE, *Board of Appeals.*

I hereby certify that the foregoing resolution was duly adopted at the forty-fifth session of the Grand Parlor of the Native Sons of the Golden West, held in Oakland April 17 to 21, 1922.

[SEAL.] JOHN T. REGAN,
Grand Secretary N. S. G. W.

THE TARIFF.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 7456) to provide revenue, to regulate commerce with foreign countries, to encourage the industries of the United States, and for other purposes.

Mr. McCUMBER. In paragraph 333, on page 66, line 6, on behalf of the committee I propose to strike out "six-tenths" and insert in lieu thereof "one-fifth"; and in line 10 to strike out "2 cents" and to insert in lieu thereof "1 cent."

The PRESIDING OFFICER. There is an amendment in line 5 in that paragraph which has not been acted on.

Mr. McCUMBER. Let that be acted on first.

The PRESIDING OFFICER. The Secretary will state the amendment.

The ASSISTANT SECRETARY. On page 66, line 5, the committee proposes to strike out "Horse" and to insert in lieu thereof "Common horse," so as to read "Common horse, mule, or ox shoes."

The amendment was agreed to.

The PRESIDING OFFICER. The Secretary will state the amendment proposed by the Senator from North Dakota to the committee amendment.

The ASSISTANT SECRETARY. In the House text, in line 6, page 66, strike out "six-tenths" and insert in lieu thereof "one-fifth," so that if amended it will read:

Common horse, mule, or ox shoes, of wrought iron or steel, one-fifth of 1 cent per pound.

The amendment was agreed to.

The PRESIDING OFFICER. The Secretary will state the next amendment offered by the Senator from North Dakota.

The ASSISTANT SECRETARY. On page 66, line 10, in the committee amendment, strike out "2 cents" and insert in lieu thereof "1 cent," so as to make the paragraph read:

PAR. 333. Common horse, mule, or ox shoes, of wrought iron or steel, one-fifth of 1 cent per pound; horse, mule, or ox shoes, punched, drilled, or tapped, of wrought iron or steel, for use with adjustable wrought-iron or steel skid calks, and solid drop-forged calked shoes of wrought iron or steel, 1 cent per pound.

Mr. JONES of New Mexico. Of course, I am glad that the committee has proposed to lower a rate they previously offered, but I expect later to move to put all the articles in this paragraph on the free list, and I presume there is no question but that that can be done. I do not care to delay action upon the paragraph, but when the bill gets into the Senate I shall move to put the articles in the paragraph on the free list.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from North Dakota to the committee amendment.

The amendment to the amendment was agreed to.

The PRESIDING OFFICER. The question now is on the amendment as amended.

The amendment as amended was agreed to.

Mr. SMOOT. Mr. President, on page 66, lines 24 and 25, I move to strike out "tempered or untempered round iron or steel wire" and insert in lieu thereof the following:

Round iron or untempered round steel wire, 20 per cent ad valorem, when manufactured with tempered round steel wire.

The PRESIDENT pro tempore. The Secretary will state the amendment.

The ASSISTANT SECRETARY. On page 66, lines 24 and 25, strike out the words "tempered or untempered round iron or steel wire" and in lieu thereof insert:

Round iron or untempered round steel wire, 20 per cent ad valorem, when manufactured with tempered round steel wire.

The PRESIDENT pro tempore. The question is on agreeing to the amendment offered by the Senator from Utah.

Mr. WALSH of Montana rose.

Mr. SMOOT. Perhaps I had better explain just what the amendment is, because, I think, perhaps the Senator has not the wording.

Mr. WALSH of Montana. I would be glad if the Senator would do that.

Mr. SMOOT. The amendment classifies card clothing, just as it is classified in the existing law. It provides, however, on round iron or untempered round steel wire, 20 per cent ad valorem. As the House sent the paragraph to the Senate, there was only one rate upon the untempered and the tempered steel. There ought to be different rates on the two classes of card clothing, and the amendment I have offered makes the same classification which was made in the act of 1909, and which is also found in the existing law, and reduces the rate from 45 per cent to 20 per cent on the untempered round steel wire.

Mr. WALSH of Montana. I think I understand. Instead of a rate of 45 per cent on all classes, the rate is 20 per cent on the untempered round steel wire.

Mr. SMOOT. And 45 per cent on the tempered, as well as the plated wire, or other than round iron or steel wire, or with felt face, wool face, or rubber-face cloth containing wool. That will take the higher rate. But all the untempered steel that is made into card clothing on leather—and all the ordinary clothing is made on leather—will bear a rate of 20 per cent. With felt face, wool face, or rubber-face cloth containing wool, the duty is 45 per cent ad valorem.

Mr. WALSH of Montana. I will come to that directly. The very able, adroit, and shrewd Senator from Connecticut, who I notice is on the floor, has on a number of occasions, when some particularly indefensible rate was under consideration, attempted to divert attention from it by precipitating a discussion, or attempting to precipitate a discussion, concerning the record or the attitude of the Democratic Party with reference to tariff measures, and the relative value of the policies of free trade and protection. It has been responded usually, when these efforts are made, that we must as a matter of course, in a general discussion, canvass the rate upon the basis of the protective principle. We admit that for the purpose of discussion. Accordingly, a discussion of the records of the parties in the past is only remotely applicable.

It has been charged, and charged again and again, with reference to these matters, that these rates are not protective at all, that there is no occasion for them, so far as the protective principle is concerned. As I understand it, that principle means, if it has been correctly announced in the platforms and on the floor, that the rate should be one which would equalize the cost of production here and abroad, thus putting the domestic producer upon an equal footing with the foreign producer. That contemplates, as a matter of course, that there would be some importations, and competition existing between the domestic producer and the foreign producer. Accordingly, when we come to articles which are not imported at all, or are imported in inconsequential quantities, a proposition to raise the rate can not be defended under the principle of protection, or at least as I understand it. That is the condition with reference to the rates prescribed in the paragraph before us and in succeeding paragraphs, to which I have devoted some little attention.

Take the product that is before us—card clothing. Under the existing law, when manufactured from untempered iron or steel it bears a rate of 10 per cent. When made of tempered steel it bears a rate of 35 per cent. It is proposed to raise that 10 per cent rate to 20 per cent and the 35 per cent rate to 45 per cent.

There are no importations whatever of any consequence at all of the commodity the rate upon which it is proposed to raise from 10 to 20 per cent; and with reference to the other, the importations are just such an amount as produces a healthy state of competition. It is proposed to raise the rate on that so that a monopoly will be granted and the foreign product entirely excluded from this market.

What are the facts? Of card clothing, manufactured with untempered round iron or steel, in 1918 there was imported $448 worth; and I ask Senators to bear in mind that that was under a 10 per cent duty; in 1919, $3,495 worth; in 1920, $11,000 worth; and in the nine months of 1921, $4,299 worth.

We had no information whatever upon production in this country, but obviously from the meager reports the production must be very considerable. The imports of the other class are not inconsiderable, but they amounted in 1918 only to $344,520; in 1919, $356,546; in 1920, $490,405; and in 1921, $394,189.

I have not discovered from an examination of the record that anyone has even asked for an increase in these rates. The Tariff Commission, in its report upon the particular commodity, tells us that there are no competitive conditions that require the raising of these rates by one penny.

Mr. President, I content myself with what has been said upon the matter. The fact is that the Tariff Commission reports that there is nothing in the competitive conditions that requires any change in the rates at all.

Accordingly, I move to amend the amendment by substituting "10" for "20" as the rate applicable to card clothing manufactured from untempered round iron or steel.

The PRESIDENT pro tempore. The amendment to the amendment will be stated.

The ASSISTANT SECRETARY. The Senator from Montana [Mr. WALSH] moves to strike out "20" in the amendment submitted by the Senator from Utah [Mr. SMOOT] and to insert in lieu thereof "10."

Mr. SMOOT. Mr. President, just a word for the record. As to the manufacture of tempered wire, I want to call attention to the fact that in 1921 for nine months the value was $394,189, as the Senator stated, but during the remaining three months the large part of it came into the country. It increased from 208,153 square feet to 263,599 square feet under a 35 per cent rate, and that we propose to raise to 45 per cent. Steel, both tempered and untempered, used in the manufacture of card clothing, has a duty now imposed upon it which would require some compensatory duty, and it was for that reason the we raised it from 35 to 45 per cent. The House gave 35 per cent on the American valuation, and the Senate committee made it 45 per cent on the foreign valuation.

Going back to the year 1909 the equivalent ad valorem, when its price was 20 cents per square foot, was 20.75 per cent upon untempered steel clothing. If the price were exactly the same now as at that time, the ad valorem duty proposed would be the same as in the year 1908.

I do not know that there is anything more to say on this subject with the exception that as to card clothing, when manufactured with plated wire, in 1921 in nine months there were 43,689 square feet, valued at $84,943, imported, but for the remaining three months of the year there was imported an amount that would be equal to 52,204 square feet. Of course the importations have increased during the first three months of this year, and necessarily would. The committee thought, under conditions existing, that 20 per cent instead of 45 per cent on the untempered and 45 per cent on the tempered necessary in order to protect the industry of the United States.

Mr. WALSH of Montana. I have before me the figures with respect to the card clothing manufactured of untempered wire. There were imported during the first nine months of 1921 only 984 square feet.

Mr. SMOOT. And the remaining three months of that year brought it up to 2,120 square feet.

Mr. WALSH of Montana. Assuming that it did, that is only one-half of what it was the year before.

Mr. SMOOT. That may be true.

Mr. WALSH of Montana. That is, there was only one-half as much imported in 1921 as there was in 1920.

Mr. SMOOT. That is true.

Mr. WALSH of Montana. I want to submit a further word with respect to this matter. There was, as I said, no request, so far as I can learn, from any source for an increase of this duty. On the other hand, there was a protest against it made naturally by the people who want to buy card clothing for use in the manufacture of textiles.

Mr. Joseph F. Lockett, of Boston, testified before the committee, and very naturally he was in favor of a protective tariff. He said:

We desire to go on record in favor of a protective tariff which will represent accurately, as far as can be estimated, the actual difference between the cost of production here and abroad.

He states that the imposition of this additional duty will place an unjustifiable burden upon the manufacture of textiles which, of course, will be reflected in the price of dress goods and other articles of clothing. He quotes a Mr. Harris, president of the Exposition Cotton Mills, at Atlanta, Ga., who said:

Should a prohibitive tariff eliminate English-made clothing the American mills unquestionably would suffer and our progress be seriously retarded. The quality of American-made card clothing has been held up by reason of the high quality of imported clothing. Without the very best card clothing American mills can not compete in the world's markets, especially in the finer grades of cotton goods. To remove this competition in the manufacture of card clothing would result in the lowering of the quality of the immense product of American cotton mills and would work a serious hardship on this industry for the benefit of a very few comparatively small manufacturers of card clothing and the revenue obtained from such a tariff would be infinitesimal.

I do not know by whom the committee was moved to change this rate even as it was prescribed by the House from 35 to 45 per cent but a brief submitted by Mr. Lockett, who seems to have been the only witness upon this particular item before the Finance Committee, after reciting the conditions of the trade, states that—

It is at once apparent that the rate of 35 per cent under the Underwood law did not result in the importation of large quantities of card clothing, to the detriment of the American manufacturer, prior to 1917 and has not since that time.

It is difficult to understand the reason which actuated the Ways and Means Committee in providing a rate of 35 per cent in said paragraph 337 of this bill.

This rate was not apparently worked out on any mathematical formula. We hope the Finance Committee will carefully consider the fact that the rate now in the Fordney bill is an increase of nearly 100 per cent over the Payne-Aldrich rate.

I hope that will be perfectly understood.

Mr. SMOOT. But that is not the amendment the Senator from Utah has offered and that statement would not cover the situation as presented by the amendment I have just offered.

Mr. WALSH of Montana. He concludes:

We believe even to-day the Underwood bill, providing as it does a rate of 35 per cent on card clothing based upon the foreign value, gives to the American manufacturer of card clothing to-day much more protection than he is reasonably and justly entitled to.

This is a good protective man who tells us that.

Mr. SMOOT. Yes; but the rate to-day is 35 per cent instead of 25 per cent, and the statement he made was untrue about the 100 per cent. It is not true, and it can not be sustained. If the Senator wanted the other side of the question he could turn to page 823, where George L. Hamilton, card-clothing manufacturer of North Hanover, Mass., testified before the House Committee on Ways and Means.

Mr. WALSH of Montana. I was speaking about the Senate Finance Committee.

Mr. SMOOT. I know the Senator said the Senate Finance Committee; but I am calling his attention to the testimony which was before the committee, as all the House hearings were before the committee. The Senator will remember that the then chairman of the Finance Committee gave notice that where a person had testified before the House Committee on Ways and Means the time of the Finance Committee should not be taken up by hearing him again. It was stated that it would be an expense and a waste of time, and that notice was given by the then chairman of the Finance Committee.

Mr. Hamilton said he requested 60 per cent. I do not believe it is necessary nor did the committee believe it was necessary. I will say to the Senator also that when the Payne-Aldrich law was first enacted the woolen manufacturers of this country and the cotton manufacturers did not use the untempered steel. There was very little of tempered-steel clothing known, not only in this country but in the world. The tempered-steel clothing was exceedingly high at that time, but now the tempered-steel clothing is being used because of the fact that it is cheaper than the untempered. Not only that, but I agree with the man who stated that to use the tempered steel on the very finest work sometimes does not give the desired results. My experience before I left the woolen business induced me to begin to purchase tempered-steel instead of untempered-steel clothing.

Another thing, tempered steel is a steel of sufficient strength to last years. They put it upon a rubber base, sometimes a wool base—that is, an article made partially out of wool—and the grease which goes through the cards falls out of the wool and passes through, falling upon the face of the clothing itself. If it is rubber it lasts four or five times longer than if it were leather. Therefore the manufacturers of the country now have learned by experience in the past that tempered steel clothing, no matter if it does cost twice as much as the untempered, is cheaper in the end. That is the reason why the importations are so much greater than of the untempered steel.

Mr. WALSH of Montana. I merely wish to submit the conclusion of the Tariff Commission upon this matter and then I am perfectly willing that the Senate shall vote on it. This is what the Tariff Commission say concerning the necessity of an increased rate upon this article:

COMPETITIVE CONDITIONS.

Raw materials, cloth foundation and wire, used in the manufacture of card clothing are produced in the United States in sufficient quantities to meet the needs of domestic card clothing manufacturers, the foreign manufacturer having no particular advantage in this respect.

The most important foreign manufacturing countries of card clothing are England and Germany. These countries import cotton and wool for use in the manufacture of cloth foundation, whereas the United States produces its own cotton and much of its wool. Linen yarn, used in cloth foundation, is produced from domestic flax in both Great Britain and Germany, whereas the United States receives this material from foreign countries.

The lack of increase in amounts annually imported by the United States apparently indicates that the import duty of 35 per cent ad valorem has offset, at least in large measure, the difference in costs between foreign and domestic production of card clothing. Production costs abroad, however, are proportionately lowered by the depreciation of British and especially German currency and their greater purchasing power of the money within the borders of those countries as compared with the international exchange value.

That is the situation of affairs upon which the proposed increase of duty is based.

Mr. SMOOT. Mr. President, I am not going to take the time to go into all the reasons given by Mr. Hamilton, but I am going to quote an extract from his statement because of the fact that he is engaged in the industry himself, and I know personally that at least the part of his statement which I shall now read is absolutely correct:

First. The cost of labor in this country at the present time is over 100 per cent higher than it is in England. Card machine operators in England are paid 52 cents per hour. Card machine operators in United States are paid 106 cents per hour.

I recognize the fact that the wage of $1.06 per hour has got to be decreased; there is no doubt about it. If the conditions as stated as existing to-day should continue in the future, then I doubt very much whether the rates here proposed would be sufficient to protect the industry in this country; but I look for these wages to fall from $1.06 per hour, and so did the committee. Mr. Hamilton further stated:

Second. The principal materials used are hardened and tempered steel wire, cotton cloth, woolen cloth, linen cloth, rubber face cloth, felt and wool faced cloths, and leather, all of which are subject to different rates of duty. We request the privilege of filing an amended brief when we ascertain what the proposed rates of duty are to be on these materials.

The Senator from Montana knows what rates of duty are proposed in the bill. The fact was referred to by Mr. Hamilton that the rates had not been definitely arranged when the bill was before the other House.

I will say to the Senator that 45 per cent on the foreign valuation is a less rate than the House rate of 35 per cent on all kinds of tempered and untempered iron or steel wire.

The PRESIDENT pro tempore. The question is on agreeing to the amendment proposed by the Senator from Montana [Mr. WALSH] to the amendment of the Senator from Utah [Mr. SMOOT]. [Putting the question.] The Chair is in doubt.

Mr. SMOOT. We had better have the yeas and nays, Mr. President.

Mr. HEFLIN. Let us have the yeas and nays.

The yeas and nays were ordered, and the reading clerk proceeded to call the roll.

Mr. HALE (when his name was called). Transferring my pair with the senior Senator from Tennessee [Mr. SHIELDS] to the junior Senator from Maryland [Mr. WELLER], I vote "nay."

Mr. SUTHERLAND (when his name was called). Making the same announcement as before with reference to my pair and its transfer, I vote "nay."

Mr. UNDERWOOD (when his name was called). I transfer my general pair with the Senator from Massachusetts [Mr. LODGE] to the Senator from Rhode Island [Mr. GERRY] and vote "yea."

The roll call was concluded.

Mr. BALL. Transferring my pair with the senior Senator from Florida [Mr. FLETCHER] to my colleague the junior Senator from Delaware [Mr. DU PONT], I vote "nay."

Mr. EDGE. I transfer my pair with the senior Senator from Oklahoma [Mr. OWEN] to the senior Senator from Pennsylvania [Mr. CROW] and vote "nay."

Mr. COLT. Making the same statement as heretofore with reference to my pair and its transfer, I vote "nay."

Mr. GLASS. I transfer my general pair with the senior Senator from Vermont [Mr. DILLINGHAM] to the senior Senator from Nevada [Mr. PITTMAN] and vote "yea."

Mr. DIAL. I desire to announce that the Senator from New Mexico [Mr. JONES] is detained from the Senate on official business. He is paired with the Senator from Maine [Mr. FERNALD].

Mr. HARRISON. Making the same announcement as heretofore with reference to my pair and its transfer, I vote "yea."

Mr. JONES of Washington. The senior Senator from Virginia [Mr. SWANSON] is necessarily absent. I promised to pair with him for the day. I find, however, that I can transfer that pair to the junior Senator from Oregon [Mr. STANFIELD]. I do so, and vote "nay."

Mr. CURTIS. I desire to announce the following pairs:

The junior Senator from Kentucky [Mr. ERNST] with the senior Senator from Kentucky [Mr. STANLEY];

The Senator from Indiana [Mr. NEW] with the Senator from Tennessee [Mr. MCKELLAR]; and

The junior Senator from Ohio [Mr. WILLIS] with the senior Senator from Ohio [Mr. POMERENE].

The result was announced—yeas 19, nays 38, as follows:

YEAS—19.

Borah	Harrison	Overman	Underwood
Caraway	Heflin	Ransdell	Walsh, Mass.
Dial	Kendrick	Sheppard	Walsh, Mont.
Glass	King	Simmons	Williams
Harris	La Follette	Smith	

NAYS—38.

Ball	France	McLean	Smoot
Brandegee	Hale	McNary	Spencer
Bursum	Johnson	Nelson	Sterling
Calder	Jones, Wash.	Newberry	Sutherland
Cameron	Kellogg	Oddie	Townsend
Capper	Ladd	Page	Wadsworth
Colt	Lenroot	Phipps	Warren
Cummins	McCormick	Poindexter	Watson, Ind.
Curtis	McCumber	Rawson	
Edge	McKinley	Shortridge	

NOT VOTING—39.

Ashurst	Frelinghuysen	Myers	Robinson
Broussard	Gerry	New	Shields
Crow	Gooding	Nicholson	Stanfield
Culberson	Harreld	Norbeck	Stanley
Dillingham	Hitchcock	Norris	Swanson
du Pont	Jones, N. Mex.	Owen	Trammell
Elkins	Keyes	Pepper	Watson, Ga.
Ernst	Lodge	Pittman	Weller
Fernald	McKellar	Pomerene	Willis
Fletcher	Moses	Reed	

So the amendment of Mr. WALSH of Montana to the amendment proposed by Mr. SMOOT was rejected.

The PRESIDENT pro tempore. The question now is upon agreeing to the amendment proposed by the Senator from Utah.

The amendment was agreed to.

Mr. SMOOT. There is one other amendment to this paragraph.

The READING CLERK. On page 67, line 2, the committee proposes to strike out "35" and insert "45."

Mr. WALSH of Montana. Mr. President, I ask that the amendment be rejected. Thirty-five per cent is the rate of the present law, and, as shown, there is no occasion whatever for any change. Competitive conditions, as reported by the Tariff Commission, are exceedingly healthy. The importations, my recollection is, amount to about one-third of the entire consumption; so that there is a healthy competition under the existing rate between the domestic producer and the foreigner.

The PRESIDENT pro tempore. The question is upon agreeing to the amendment of the committee.

The amendment was agreed to.

Mr. MCCUMBER. Mr. President, in paragraph 338, page 67, line 5, on behalf of the committee I move to strike out after the word "steel," on said line, down to and including the word "marked," on line 15, and to insert in lieu thereof "25 per cent ad valorem," so that it will read:

Screws, commonly called wood screws, of iron or steel, 25 per cent ad valorem.

I will say that this is reinstating the present law.

The PRESIDENT pro tempore. The Chair understands that this is a committee amendment.

Mr. MCCUMBER. Yes.

The PRESIDENT pro tempore. The committee withdraws the amendment as printed in the bill. The question is upon agreeing to the amendment proposed by the committee.

Mr. WALSH of Montana. Mr. President, I congratulate the Senator from North Dakota on this wise change. I can not refrain, however, from expressing my astonishment that the House should have proposed the high rate which it did, or the Senate Finance Committee the amendment which it tendered.

Wood screws are manufactured in this country in enormous quantities. We export wood screws in enormous quantities, while the imports under the existing law, imposing a duty of 25 per cent, are negligible.

I do not desire, however, to offer any amendment. I am very glad to commend the amendment proposed now by the committee.

Mr. MCCUMBER. I am equally surprised, Mr. President, that the Democratic tariff bill gave a duty of 25 per cent upon these articles.

Mr. WALSH of Montana. Mr. President, I retort by saying that I should be very glad if it would be agreeable to the Senator to put these articles on the free list.

Mr. MCCUMBER. No; I think the Underwoad law was not far from right and sufficiently protective of screws.

Mr. WALSH of Montana. It seems to have excluded all imports, so that the present rate is a prohibitive rate. The distinguished Senator from Ohio [Mr. WILLIS] this morning told us with much vigor that although he was profoundly attached to the principle of protection, he never would vote for a prohibitive rate. That is what this is that is now being proposed by the Senator.

The PRESIDENT pro tempore. The question is upon agreeing to the amendment proposed by the committee.

The amendment was agreed to.

Mr. MCCUMBER. Mr. President, I ask to turn now to page 68, paragraph 340.

Mr. WALSH of Montana. What disposition does the Senator desire to make of paragraph 339?

Mr. MCCUMBER. I am asking that paragraph 339 may be passed over.

Mr. WALSH of Montana. Very well.

The PRESIDENT pro tempore. The amendment of the committee will be stated.

The READING CLERK. On page 68, line 6, it is proposed to strike out "15" and insert "30," so as to make the paragraph read:

PAR. 340. Crosscut saws, mill saws, pit and drag saws, circular saws, steel band saws, finished or further advanced than tempered and polished, hand, back, and all other saws, not specially provided for, 30 per cent ad valorem; jewelers' or piercing saws, 40 cents per gross.

The PRESIDENT pro tempore. The question is on agreeing to the amendment proposed by the committee.

Mr. WALSH of Montana. Mr. President, this is another paragraph in connection with which the Senator from Ohio [Mr. WILLIS], following the principle he announced this morning, would be obliged to dissent from the proposed rate. This paragraph deals with crosscut saws, mill saws, pit and drag saws, circular saws, steel band saws, finished or further advanced than tempered and polished, hand, back, and all other saws not specially provided for. The House proposed a duty of 15 per cent ad valorem; the Senate proposes a duty of 30 per cent ad valorem, and on jewelers' or piercing saws, a duty of 40 cents per gross.

I am not particularly interested in the jewelers' or piercing saws, but the imposition of a duty of 30 per cent on handsaws and crosscut saws and mill saws and this product generally is as unjustifiable as one can imagine. The present law carries a duty of 12 per cent upon these articles. The production in this country is tremendous. The exports are very large and the imports negligible under a 12 per cent rate.

Let me give you the figures. I read from the report submitted by the Tariff Commission:

Crosscut saws of the hand-manufactured type vary greatly in character. They are used in logging and in sawing wood for fuel.

Of course, every farm in the country has to have a crosscut saw, a handsaw, and, quite frequently, a wood saw.

Drag-saws are similar to crosscut saws, but are operated by machinery, and are usually used in mills for cutting defective logs or for cutting logs into shorter lengths. Pit saws are handsaws used for sawing boards directly from the log. Mill saws are upright saws operated by machinery and used for rift sawing. The circular saw of disk shape is commonly used in sawmills and for sawing wood for fuel. Band saws are continuous bands run over pulleys and used in sawmills; they require the highest grade of steel and the greatest care in manufacture of any of the saws mentioned. A backsaw is a small variety of handsaw. It is used for very fine cutting requiring a straight or even saw cut. The blade is so thin that a strip of metal, usually steel or brass, is necessary along the back to prevent its buckling. Handsaws, broadly speaking, include such saws as buck, hack, keyhole, plumbers', back, pruning saws, and many others for special purposes. The most common is the familiar handsaw used by carpenters and other woodworkers. A jeweler's saw has a very thin blade, tempered hard throughout, for cutting metal, and is used in a frame. Metal-splitting saws, whether of carbon or high-speed tool steel, are classed as saws, although they more closely resemble thin milling cutters.

Production: In 1914 there were 100 establishments manufacturing saws in the United States. Wage earners numbered 4,560; capital was $15,860,000; wages paid, $3,019,000; cost of materials, $4,714,000; and value of product, $12,517,000. In 1919 there were 112 establishments, and the value of the product was $31,473,000. The States leading in production in 1914 were Illinois, New York, Ohio, and Pennsylvania.

Imports of saws embraced in this paragraph were valued at $63,570 in 1914.

Bear in mind, in 1914 we produced in this country $15,860,000 worth, and the imports were only $63,570.

In later years the imports were as follows:

1918	$18,473
1919	51,645
1920	126,906
1921 (nine months)	78,075

Against a domestic production of $15,860,000.

But, Mr. President, we are exporting these saws in enormous quantities, as I stated.

Exports in 1914 were valued at $1,474,077, more than half of which went to Canada, Australia, England, and Germany—

We actually exported saws to Germany!—

the rest being widely distributed. Later exports by calendar year have been valued as follows: 1918, $3,790,416; 1919, $4,851,791; 1920, $4,455,639; 1921 (nine months), $2,020,723.

Let us make a comparison. The imports in 1920 were $126,906, and the exports $4,455,639.

Mr. President, what earthly excuse can there be for increasing this duty? The only one I can conceive is that the duty was asked for by Disston & Sons, the manufacturers of this kind of ware; and the firm was represented by Mr. Atkins, who appeared before the Senate Finance Committee, and practically told nothing whatever concerning the industry except that he wanted this increased duty.

I read as follows:

Mr. ATKINS. Mr. Chairman, following the suggestion made by the chairman of this committee this morning to be brief and concise, I have conferred with the representatives of Henry Disston & Sons, of Philadelphia, and the Simonds Manufacturing Co., of Fitchburg, Mass., who are both here, and speaking for my own company I hurriedly prepared a statement for your committee.

Senator WATSON. Representing all of you?

Mr. ATKINS. Yes; representing all three of us.

Senator SMOOT. Give me the names, please.

Mr. ATKINS. Henry Disston & Sons, of Philadelphia.

Senator SMOOT. And the names of the other companies?

Mr. ATKINS. I do not think their names are down on to-day's list.

Senator WALSH. Who is representing the Simonds Manufacturing Co.?

Mr. ATKINS. Mr. Fox.

Senator SMOOT. Proceed, Mr. Atkins.

Mr. ATKINS. We ask that all saws carry an ad valorem rate based on the American valuation of 25 per cent, except band saws, which should carry at least 35 per cent ad valorem, and steel strips, tempered only or tempered and polished, a specific duty of 10 cents per pound and 20 per cent ad valorem.

He tells something about the difference in wages in Germany, and that is practically the substance of the testimony upon which this raise has been made. I move to amend the committee amendment by substituting "12" for "30" in line 6 on page 68.

The PRESIDENT pro tempore. The Secretary will state the amendment.

The READING CLERK. On page 68, line 6, in lieu of the rate proposed by the committee, strike out "30" and insert in lieu thereof "12."

Mr. McCUMBER. Mr. President, with 112 manufacturers of saws in the United States, I assume there will be reasonable competition, and I do not think the duty, whatever it may be, will raise the price in the United States, unless there would be serious competition from importations, and I am not looking for serious importations. Considering the prices of the importations which have come in, even though they may be small in number at the present time, I believe that we are justified in imposing this duty of 30 per cent.

I call attention to the items mentioned in the Reynolds report. Let us take band saws just discussed by the Senator from Montana. There were six different invoices of those examined. The saws were imported from France.

Without going through the figures, the rate required to equalize, allowing a profit of 25 per cent, would have been 71 per cent; even allowing that profit to the importer it would require 71 per cent in order to equalize the two prices. We gave them 30 per cent. I will take the next one, two invoices of butcher saw blades. The amount necessary to equalize the landed cost, after allowing 25 per cent profit, would have been 254 per cent. The importer made 259 per cent upon his selling price of that article, and we ask him when he makes 259 per cent to pay 30 per cent of it in duty.

I think that is not an unreasonable request with such an enormous profit, and I do not believe it will affect in any way the price of the American article.

The next is metal slitting saws. We have two invoices of those. I find that it would take 150 per cent to equalize the foreign with the domestic cost. We have allowed 30 per cent. The importer makes 88 per cent, and if, after allowing them the 25 per cent profit, he makes an additional 88 per cent, I think he can stand the imposition of the 30 per cent.

I do not know whether there is danger of any great amount coming in, but these are the prices at which they have been imported, and getting those prices the importer at least can well afford to pay 30 per cent ad valorem duty to the Government.

Mr. WALSH of Montana. Mr. President, I have not the slightest doubt in the world that the importers can pay anything, of course, but there is not enough profit in it to have any imports at all. What is the use talking about the difference in price? If there was a difference in price of any substance, imports would come in; but they do not come in; they have not come in; and there is no prospect of their coming in, so far as anybody can conceive.

Mr. McCUMBER. These items came in. There is no question about that. The figures are taken from the records. There is no use saying they will not come in. They did come in, and these are what came in, and if these could come in I assume they can continue to come in at somewhere about the same price.

Mr. WALSH of Montana. How much came in?

Mr. McCUMBER. Only a little came in. I think the Senator read the figures, and he is correct. I am not challenging the figures. I am admitting that the importations are very light, but the importations now coming in, or those which were coming in at the time this report was made, give us the prices, the profits they are making, and show that 30 per cent is anything but excessive.

The PRESIDENT pro tempore. The question is on agreeing to the amendment offered by the Senator from Montana to the amendment of the committee.

Mr. WALSH of Montana. I ask for the yeas and nays.

The yeas and nays were ordered.

The PRESIDENT pro tempore. The Secretary will call the roll.

The reading clerk proceeded to call the roll.

Mr. COLT (when his name was called). Making the same announcement as before, I vote "nay."

Mr. HALE (when his name was called). Making the same announcement as before, I vote "nay."

Mr. JONES of Washington (when his name was called). Making the same announcement as before with reference to my pair and transfer, I vote "nay."

Mr. McKINLEY (when his name was called). I transfer my pair with the junior Senator from Arkansas [Mr. CARAWAY] to the junior Senator from South Dakota [Mr. NORBECK] and vote "nay."

Mr. SUTHERLAND (when his name was called). Making the same announcement as on the previous vote with reference to my pair and transfer, I vote "nay."

Mr. UNDERWOOD (when his name was called). I transfer my general pair with the senior Senator from Massachusetts [Mr. LODGE] to the junior Senator from Rhode Island [Mr. GERRY] and vote "yea."

The roll call was concluded.

Mr. FERNALD (after having voted in the negative). I have a general pair with the senior Senator from New Mexico [Mr. JONES]. I find he is absent, and I transfer that pair to the senior Senator from New York [Mr. WADSWORTH] and allow my vote to stand.

Mr. DIAL. The Senator from New Mexico [Mr. JONES] is detained on official business. He is paired on this vote with the senior Senator from New York [Mr. WADSWORTH]. If present, the Senator from New Mexico would vote "yea."

Mr. HARRISON. Making the same announcement as before, I vote "yea."

Mr. POMERENE. As I announced before, I have a pair with my colleague the junior Senator from Ohio [Mr. WILLIS]. I transfer that pair to the senior Senator from Nebraska [Mr. HITCHCOCK] and vote "yea."

Mr. KELLOGG. I transfer my pair with the senior Senator from North Carolina [Mr. SIMMONS] to the senior Senator from Minnesota [Mr. NELSON] and vote "nay."

Mr. WALSH of Montana (after having voted in the affirmative). I transfer my pair with the Senator from New Jersey [Mr. FRELINGHUYSEN] to the junior Senator from Georgia [Mr. WATSON] and let my vote stand.

Mr. CURTIS. I wish to announce the following pairs:

The Senator from Delaware [Mr. BALL] with the Senator from Florida [Mr. FLETCHER];

The Senator from New Jersey [Mr. EDGE] with the Senator from Oklahoma [Mr. OWEN];

The junior Senator from Kentucky [Mr. ERNST] with the senior Senator from Kentucky [Mr. STANLEY]; and

The Senator from Indiana [Mr. NEW] with the Senator from Tennessee [Mr. MCKELLAR].

The result was announced—yeas 16, nays 34, as follows:

YEAS—16.

Borah	Harrison	Myers	Smith
Cummins	Heflin	Overman	Underwood
Dial	King	Pomerene	Walsh, Mont.
Harris	La Follette	Sheppard	Williams

NAYS—34.

Brandegee	France	McCumber	Smoot
Bursum	Gooding	McKinley	Spencer
Calder	Hale	McLean	Sterling
Cameron	Jones, Wash.	McNary	Sutherland
Capper	Kellogg	Newberry	Townsend
Colt	Kendrick	Oddie	Warren
Curtis	Ladd	Page	Watson, Ind.
du Pont	Lenroot	Phipps	
Fernald	McCormick	Shortridge	

NOT VOTING—46.

Ashurst	Gerry	Nicholson	Simmons
Ball	Glass	Norbeck	Stanfield
Broussard	Harreld	Norris	Stanley
Caraway	Hitchcock	Owen	Swanson
Crow	Johnson	Pepper	Trammell
Culberson	Jones, N. Mex.	Pittman	Wadsworth
Dillingham	Keyes	Poindexter	Walsh, Mass.
Edge	Lodge	Ransdell	Watson, Ga.
Elkins	McKellar	Rawson	Weller
Ernst	Moses	Reed	Willis
Fletcher	Nelson	Robinson	
Frelinghuysen	New	Shields	

So the amendment of Mr. WALSH of Montana to the amendment of the committee was rejected.

The PRESIDENT pro tempore. The question is upon agreeing to the amendment of the committee.

Mr. LENROOT. I move to amend the committee amendment by striking out "30" and in lieu thereof inserting "20."

The PRESIDENT pro tempore. The question is on the amendment offered by the Senator from Wisconsin to the amendment of the committee.

Mr. LENROOT. Mr. President, I wish to say just a word in reference to the amendment. I voted against the amendment offered by the Senator from Montana [Mr. WALSH], but I think the amendment proposed by the committee is higher than the facts warrant. It is double the rate fixed by the House, and the amendment offered by the Senator from Montana was 12 per cent, which is the present rate.

There are no imports to speak of and, as the Senator from Montana has said, the exports are very, very large. I appreciate the fact that as Germany and France are getting upon their feet more and more, we may look for greater imports than we ever had. But when we consider that during nine months of 1921 there were imported only $78,000 in value of saws and during 1921 there were exported $4,555,000 in value of saws, it does not seem to me that a rate of 30 per cent ad valorem can possibly be justified. It is for that reason that I have offered the amendment reducing the rate to 20 per cent, but that would be an increase of 8 per cent over the present law and an increase of 5 per cent over the House bill.

I have read all the testimony which was produced before the committee. The chief testimony was that of Mr. Atkins, of the E. C. Atkins Co., and it consists of general statements that are not very convincing as to the need for any additional duty. It is to be remembered that the market for saws in this country is based very largely upon the reputation of the maker. There is competition, but there are well-recognized makes, and they have a very great advantage in the market because of the reputation of the makers.

Mr. WALSH of Montana. Mr. President, I believe that it will be quite generally admitted that neither France nor Germany will be able to recover, within at least a few years, the position they occupied industrially in 1914. It is scarcely to be expected that they will be able to invade our market within the next few years any more successfully than they were able to encroach upon the trade of our domestic producers in the year 1914, when they were able to get only $63,570 worth of their product into this country.

Mr. WATSON of Indiana. Mr. President, I am well aware of the fact that so far as imports and exports are concerned, the figures do not warrant a higher rate than that advocated by my distinguished friend from Wisconsin. But we are making a tariff bill under peculiar conditions. We do not know what the future holds. The Senator from Wisconsin does not know that 20 per cent will be adequately protective of American wages two years from now, nor do I. We did not know definitely in the committee just what rates were necessary adequately to measure the difference in the cost of production at home and abroad. In making the tariff bill we have been very much like a man who was trying to build a dam in a flood, not always sure of the foundation. We have been compelled to shift from time to time, but it has been the thought all the while that we should give the benefit of every doubt to the American producer and not to his foreign competitor.

I have not believed that this is any time to get out apothecary's scales and weigh nicely the extreme differences in the cost of production here and abroad, to "divide a hair twixt nor' and nor'west side." In adjusting rates to production costs we do not know what the future holds. I want to be sure that whatever it holds, American industry will be protected and that American labor will be saved from ruthless competition. If the figures are true—and they are, as my friend from Wisconsin has given them, and there is no doubt about the truth—would the other 10 per cent make any difference in the cost of a saw in the United States? My theory is that it would not.

There are 112 producers of saws in the United States. There is keen competition all along the line. Nobody has ever dreamed that there would be a saw monopoly. Nobody has ever thought of organizing any saw trust in the United States. I do not think, under existing conditions, if there is 30 per cent put on, that any tariff wall so-called would be so high as to foster monopoly or produce a trust. Therefore, from my viewpoint as a protectionist, 30 per cent is not a rate too high to be placed on this product.

Mr. JONES of New Mexico. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Indiana yield to the Senator from New Mexico?

Mr. WATSON of Indiana. Certainly.

Mr. JONES of New Mexico. It is a general rule of law that in the construction of a tariff law we should first inquire as to the conditions which prevail prior to the passage of the statute. Presumably every law is passed for the purpose of meeting an unsatisfactory condition. Does not the Senator believe that, before we impose taxes upon the American people or increase the taxes, we should at first be certain that it is necessary to do it, and not increase taxes simply because of some theoretical or visionary idea that it may be necessary to increase the tax for the future. In other words——

Mr. WATSON of Indiana. I have the question; the Senator need not tell it "in other words."

Mr. JONES of New Mexico. In a case of this kind, is it not better to give the consumer the benefit of the doubt than the producer?

Mr. WATSON of Indiana. That involves one question that I shall not answer, because I have not the time to do it, and that is that the tariff is a tax. The Senator refers to it as a "tax." The tariff is not a tax. I am not going into that proposition at all. If men would study history instead of studying theories, if they would study facts instead of fancies, they would know that the tariff is not a tax unless it is a revenue tariff, which is a tax added to the cost, and which the consumer does pay. I am not going into that. My friend from New Mexico refers to it as a tax. I only mention it because I do not want to be understood as acquiescing and agreeing to the proposition that a tariff is a tax.

As to the other part of the question, which is legitimate to the purposes of the inquiry, I do know that wages in Germany are one-tenth to one-fifth what they are in the United States. I do know that wages in Germany are lower now than they ever have been. I do know that wages in the United States are higher than they have ever been before.

I do know that we can not adequately measure the difference in the cost of production here and in Germany by the old rate, and I am not willing to wait until the flood comes before I undertake to build the dam. So far as I am concerned, I want in fixing any of these rates to resolve all doubt in favor of the American producer as against his foreign competitor and his foreign rival. My view is that this is no time to quarrel amongst ourselves and haggle here as to whether the tariff shall be one rate or another rate when we are intending to be absolutely sure that American labor is protected and that American industry is enabled to operate free from excessive competition.

I will say to my good friend from Wisconsin [Mr. LENROOT] that if I could put my finger on the exact difference in the cost of production here and abroad, I should be willing to fix the tariff rate accordingly. I do not know what that difference is, and the committee in many respects could not definitely ascertain it. So far as I was concerned, in advocating this tariff on saws I was willing to make it high enough to be sure to protect the American industry.

Mr. KELLOGG. Will the Senator from Indiana yield to me?

Mr. WATSON of Indiana. Yes.

Mr. KELLOGG. I have been informed—and I should like to have the Senator's opinion, because he is on the Committee on Finance——

Mr. WATSON of Indiana. That does not mean anything, I will say to my friend from Minnesota.

Mr. KELLOGG. That so far as the manufacture of saws is concerned, the manufacturers in the United States make the best saws, and really very few countries compete with us in the making of saws, and that while it is true that there is no possibility of American labor competing with German labor or Aus-

trian labor or Polish labor or the labor of some other countries, yet the manufacturers in foreign countries do not particularly compete with us in the manufacture of saws, and that 20 per cent is a perfectly safe rate. That is the information which comes to me. Whether it is more reliable than the information which the committee has I do not know, but it would seem to me that under the circumstances 20 per cent is a fair rate.

Mr. WATSON of Indiana. If my friend from Minnesota thinks that, of course he ought to vote accordingly. My own judgment, however, is that, to make absolutely sure the protection of the industry in this country, 30 per cent is sufficient. I know that; I do not know whether 20 per cent would be adequate; but I know that 30 per cent is, if I know anything about the matter.

Mr. WALSH of Montana. Mr. President——

Mr. WATSON of Indiana. I yield to the Senator from Montana.

Mr. WALSH of Montana. I suppose there are a great many people in this country who do not know that a duty of 60 per cent would be sufficient.

Mr. WATSON of Indiana. But they are not here to vote. They are out somewhere.

Mr. WALSH of Montana. But the fact that the Senator from Indiana says he does not know that a 20 per cent duty would be sufficient really is not a very persuasive argument——

Mr. WATSON of Indiana. It is persuasive to me.

Mr. WALSH of Montana. Because I think a great many other people do not know that a rate of 100 per cent would be sufficient.

Mr. WATSON of Indiana. Does my friend from Montana know that 20 per cent will measure the difference in the cost of production here and abroad?

Mr. WALSH of Montana. I know that under the 12 per cent rate there are no imports.

Mr. WATSON of Indiana. Will my friend then be kind enough to state the wages paid by saw establishments in Germany and in the United States so as to prove to me that a duty of 20 per cent would be sufficient?

Mr. WALSH of Montana. It would be a matter of no consequence whatever what wages are paid in Germany——

Mr. WATSON of Indiana. Oh, no; that is a matter of no consequence, of course!

Mr. WALSH of Montana. That is to say, it would be but one element entering into the cost. Fortunately this country does not have to pay in war indemnities alone $32,000,000,000, such as is placed upon the industry of Germany, entering into the cost of everything that is produced there, in addition to the wages. The Senator from Indiana, of course, will recognize that there are other considerations besides difference in wages. There was a difference in the wages in 1914; the wages were lower in Germany in 1914 than they were here, and yet the Germans were able and the whole world was able to get into this country only $67,000 worth of saws.

Mr. WATSON of Indiana. Of course, Mr. President, when the Senator from Montana says that it does not make any difference whether the wages paid in Germany are very low or very high, that the difference in wages which are paid in the competing countries is not to be considered, he and I can not even start to discuss the tariff quesion.

Mr. WALSH of Montana. The Senator from Indiana did not understand me. Of course wages are one element in the cost of production, but the Senator from North Carolina [Mr. SIMMONS] showed here the other day that as to a multitude of articles which bear rates from 25 to 50 per cent the total labor cost does not exceed 10 per cent.

Mr. WATSON of Indiana. I disagree entirely with the figures stated by the Senator from North Carolina, and I undertook yesterday to prove that many of them were fallacious and erroneous. I have not any doubt in the world about that.

Mr. WALSH of Montana. The Senator from North Carolina obtained his figures from official sources.

Mr. POMERENE. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Indiana yield to the Senator from Ohio?

Mr. WATSON of Indiana. I yield.

Mr. POMERENE. I think my good friend from Indiana has not been quite as frank in this discussion as he ordinarily is. Everybody wants the present standard of wages to be maintained here, but let us see if we can analyze these facts very briefly for a minute.

The Senator from Indiana has stated that the wages in Germany are perhaps one-fifth or one-tenth of what they are in this country. For the sake of the argument, I am going to accept that statement as correct. It was demonstrated here on the floor the other day, however, that during the months of January and February last there was an advance in the wages in Germany in one month of 20 per cent plus, and in the other month of 24 per cent plus, as I now recall. Notwithstanding the very low wages in Germany, the Senator from Wisconsin has shown that the imports into this country are negligible, while the exports out of this country were very substantial. If that were true under these very low wages, and the wages are increasing over there, as indicated by the statements which have been made on the floor of the Senate within the last week, pray tell me, under the circumstances, what is the need for the additional tariff duty?

Mr. WATSON of Indiana. Does the Senator believe in any protective tariff on any article?

Mr. POMERENE. Mr President, I do believe in a tariff

Mr. WATSON of Indiana. Does the Senator believe in a protective tariff?

Mr. POMERENE. If the Senator will distinguish between a protective tariff and a revenue tariff, then, perhaps, I can answer him. I am somewhat moderate in my view. I am willing to take into consideration present conditions abroad in determining what the rate shall be.

Mr. WATSON of Indiana. Then, does the Senator want purely a revenue rate or a protective rate, as he understands protection just as well as I do?

Mr. POMERENE. I would meet the Senator from Indiana upon a fair basis. I think in a matter of this kind I would be willing somewhat to increase the rates under the circumstances, but that is discussing a theoretical question.

Mr. WATSON of Indiana. No; it is a practical question.

Mr. POMERENE. It is a very theoretical question, while the question in which I am now interested is a practical one. Is there such a situation in view of the imports and exports as would justify the increase in the duty on the particular article?

Mr. WATSON of Indiana. That is the point exactly. For what purpose? If the Senator believes wholly in a revenue tariff and I believe in a protective tariff, we can not talk about rates because we approach the subject from an entirely different and antagonistic standpoint. I believe in a protective tariff; I believe that a protective tariff means covering the difference in the cost of production here and abroad, which is practically a matter of wages. That is the principal difference, for capital does not need to be protected; capital is never weak; capital needs to be protected only in order that it may pay American wages. It is the wage earner that needs to be protected, and it is that difference in wages which I seek to cover.

Can the Senator say to me on his honor as a Senator, as I know he will tell me on his honor, if he tells me at all, for he is always an honorable gentleman, what the wages paid in the saw establishments of Germany are and what the wages paid here are, and why 20 per cent measures the difference?

Mr. POMERENE. If I knew exactly what the wage was in Europe and exactly what the wage was here, I would certainly tell the Senator; but before I could determine the question of a tariff to measure the difference in wage costs I would want to know what the cost of the unit of production was. There ought not to be any question about that. If the Senator would limit the protective theory to the difference in the wage cost, then I think that he and I could get more nearly together than we can on this bill; but under this bill he is not content with that; he wants to cover the difference not only in wage costs but the difference in overhead expenses and the difference in the profit to capital itself, as is evidenced by the use of the term "competitive prices."

Mr. JONES of New Mexico. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Indiana yield to the Senator from New Mexico?

Mr. WATSON of Indiana. I yield.

Mr. JONES of New Mexico. May I ask the Senator if he is in favor of an embargo tariff?

Mr. WATSON of Indiana. No.

Mr. JONES of New Mexico. Then, may I ask what is the purpose of increasing this rate if it is not to create an embargo?

Mr. WATSON of Indiana. Simply because, as I have stated, I do not know that 20 per cent proposed by my good friend from Wisconsin is sufficient. I am inclined to think that it will not protect the American manufacturer.

The rise in German wages which my friend from Ohio speaks of is not a rise in the gold value of the wage, but on a mark basis; and wages in Germany have not substantially increased, and it will be a long time before they do substantially increase. However, as my friend from Wisconsin intimated, when Germany begins to be resuscitated, when the laboring men begin to work full time, when her factories are all open, they are bound to sell at a lower price and a less profit

in order to help resuscitate themselves than they ever have before. They must conquer markets; they must find a place for the sale of their surplus products; they will come into this, the greatest and the richest market in the world. We are bound to be confronted with those conditions in the future, and I want, so far as I am concerned, to know that our people are going to be protected. If I am not sure that 20 per cent is enough, I am willing to vote for 25 or 30 per cent, even though it may be a matter of doubt. I speak only for myself as a protectionist, and that is all I have to say about it. I am sure that 30 per cent is high enough.

Mr. JONES of New Mexico. Is the Senator sure that the rate proposed by the committee will not amount to an embargo?

Mr. WATSON of Indiana. I am just as sure of that as I am of anything.

Mr. JONES of New Mexico. Will the Senator give us some reason for so believing?

Mr. LENROOT. Mr. President, will the Senator from Indiana yield at that point?

Mr. WATSON of Indiana. Certainly.

Mr. LENROOT. Does the Senator think that Mr. Atkins asked for a higher duty than was necessary?

Mr. WATSON of Indiana. I do not know what he asked for.

Mr. LENROOT. He asked for 25 per cent on one class and 35 per cent upon another, based on American valuation.

Mr. WATSON of Indiana. That would be a very much higher rate than is here proposed, of course.

Mr. LENROOT. So that he was asking for much more than 30 per cent?

Mr. WATSON of Indiana. He was asking for much more than 30 per cent. I remember that.

Mr. LENROOT. Where does the Senator from Indiana get his knowledge, then, that 30 per cent is enough, and he knows it is enough?

Mr. WATSON of Indiana. I get that from figures that have been adduced here and from my own knowledge of the general situation relating to the condition of these industries in this country and Germany. We went over the saw question very thoroughly; I do not at present have the facts in mind, I will say to my friend from Wisconsin, but——

Mr. WALSH of Montana. Mr. President, the Senator inquired of me if I knew the difference in the wages of labor in the saw industry in this country and in Germany. Does the Senator know what the percentage of the cost of producing saws is labor?

Mr. WATSON of Indiana. I quote from the information furnished by the Tariff Commission:

> As the result of the cessation of imports of jewelers' saws from Germany, the manufacture of these small saws is established in the United States.
>
> * * * * * * *
>
> According to a cost analysis * * * (Tariff Hearings, 1913) cost of material constituted 29.80 per cent of selling price of saws and factory supplies 5.74 per cent, as against 32.88 per cent for shop labor.

Mr. WALSH of Montana. So that the labor is only 32 per cent of the total cost; yet the Senator believes it will take 30 per cent to cover the difference in the cost of labor.

Mr. WATSON of Indiana. I will say to the Senator that it would cost a great deal more than that under these figures. The cost of material constituted 29.80 per cent of the selling price of saws——

Mr. LENROOT. In Germany?

Mr. WATSON of Indiana. Here; and factory supplies 5.74 per cent as against 32.88 per cent for shop labor.

Mr. WALSH of Montana. Let me inquire of the Senator now, having apprised himself concerning the total labor cost, whether he still thinks that the total labor cost being 32 per cent of the price, it takes a tariff of 30 per cent to cover the difference between the cost of labor in this country and Germany?

Mr. WATSON of Indiana. In the tariff hearings of 1913—this goes back to 1913—E. C. Atkins & Co. presented figures to show that English and Swedish saw manufacturers could sell their product at the regular prices, pay the duty, and still compete with United States manufacturers on a price basis. It should be noted, however, that imports were small, despite these alleged differences.

Atkins & Co. at present assert that wages in Europe are at the rate of 33⅓ cents per hour for sawsmiths, as against our rate of 60 to 80 cents, and that other trades are in proportion, and that foreign-made saws are offered at 20 per cent less than prices in the United States. This statement then gives the value of saws, the production, and so forth.

I will say to my friend from Montana that I can not accurately recall these figures in my own mind, but I have the general impression that when we were discussing this matter in the committee some Senator made a motion that the duty be reduced to 20 per cent, and I came to the conclusion that that was not enough, and insisted on the 30 per cent, and then had the figures, and we put in the 30 per cent. I do not know whether the Senator from Utah or the Senator from North Dakota has all these figures in mind or not; but I remember that I was absolutely sure that 30 per cent was enough to protect, and that I was not sure that 20 per cent was enough to protect.

Mr. WALSH of Montana. The Senator did not answer the last question I addressed to him. I shall be very glad to get his views in regard to it. I ask the Senator, being now advised that the total labor cost which goes into the manufacture of saws is about 32 per cent of the price, does the Senator still contend that it will take 30 per cent to cover the difference in the labor cost in this country and Germany?

Mr. WATSON of Indiana. I have not any doubt about it.

Mr. WALSH of Montana. That is to say, that the labor cost would be 2 per cent in Germany as against 32 per cent in this country?

Mr. SMOOT. Oh, well, that is not the way it works. That is the wrong way to put it, if the Senator wants to get the facts in the case.

Mr. SHORTRIDGE. Mr. President, I should like to ask a question of the Senator from Indiana. I understood him to say that there were some hundred and odd independent manufacturers of saws in the United States.

Mr. WATSON of Indiana. One hundred and twelve.

Mr. SHORTRIDGE. Is there competition among them?

Mr. WATSON of Indiana. There is.

Mr. SHORTRIDGE. They do not form a trust or combination in violation of the Sherman law?

Mr. WATSON of Indiana. They do not.

Mr. SHORTRIDGE. Is it, in the Senator's opinion, a fact that the higher rate would or might tend to keep out the foreign product; and, if so—that is to say, if it would keep out the foreign product—would not that to that extent increase the market for the home producer, and thereby give added employment to American workmen?

Mr. WATSON of Indiana. Of course, that is a part of the general theory of protection, always.

Mr. SHORTRIDGE. It is correct, is it not?

Mr. WATSON of Indiana. I think it is, beyond any doubt in the world.

Mr. SHORTRIDGE. I do, too. I say, with deference to Senators who hear me, that where there is legitimate, active, bona fide competition in America amongst manufacturers they are entitled, and those engaged in those industries are entitled, to the market of America; and just to the extent that the foreigner invades this market that market is taken away from the American producer, which includes the workmen in every shop, in every field, and I venture to say, agreeing with the Senator from Indiana, that if there is any doubt as to the adequacy of a 20 per cent rate we ought to give the benefit of the doubt to the American producer.

While I am on my feet for a moment, I beg leave to observe that I am astonished at the language used and the views entertained by Senators on the Democratic side of the Chamber. They hold forth in a tone which indicates that they think our people are made up into hostile classes; that the producers are the enemies of America; that the manufacturers are hostile to the best interests of America; that the producers of America, whether they be in the factory or on the farm, are enemies in fact, in purpose, to the consumers of the products of the factory or the farm.

Mr. JONES of New Mexico. Mr. President——

Mr. SHORTRIDGE. Pardon me a moment. We are all producers in America, except a few dudes and worthless tramps, and we are all consumers in America; and I therefore am astonished at the philosophy, at the language of Democratic speakers here in this Chamber and elsewhere, who seem to think—their language expresses the thought—that the producers of America are necessarily or in fact hostile to the consumers.

What does my learned friend from New Mexico [Mr. JONES] say when the products of his State are directly affected by this tariff question, or my learned friend from Alabama [Mr. HEFLIN], or my good and scholarly friend from Montana [Mr. WALSH]? There may be other Senators here who are interested in the producers—the farmers, the miners, the woodmen, the craftsmen. What do they say then? What happens then? Why, they vote wisely—they vote in favor of protecting that industry, not for the producer alone, though it were enough if that were the extent of their purpose. They know——

Mr. HEFLIN. Mr. President, will the Senator yield?

Mr. SHORTRIDGE. Let me finish that thought. They know, for they are intelligent gentlemen, that to develop any

one great industry in any State develops and assists many other industries. No industry stands alone. They are interdependent. Let a great mine flourish in a given town in Montana or Nevada or Colorado or Wyoming, or in any great mining State, and that one great mine will support a whole village, a whole county, and contribute to the prosperity of the State.

So I wish to be understood as dissenting radically from the philosophy of my Democratic friends here, who seem to look upon the producers as in some way necessarily or in fact hostile to the consumers of this country; and as to this immediate question, why should we hesitate? If we are Republicans, if we are protective-tariff Republicans, if we have the true faith of our principles, why not stand up with the committee now and give adequate protection? I do not say high protection, though everything is relative. But what is "high" protection?

Mr. JONES of New Mexico. Mr. President——

Mr. SHORTRIDGE. Pardon me and I will yield in a moment.

I have read recently, in a journal whose editor I know and for whom I entertain great intellectual respect, that the Republican Party has never favored "high" protection—that it has always stood for "adequate" protection. That is a mere play upon words. Those who wish to play upon words can find abundant cause for quarrel. "Adequate" protection may be, in one sense, by comparison, "high" protection. If it is necessary to protect, I am not concerned with the percentage or the rate. The question is, Can the American producer—whether he be in the factory—the owner along with his employees—or whether he be a farmer—the owner of the farm and his employees—or whether he be the lumberman—the individual, the company, or the corporation and his or its employees—or whether he be the miner—the owner and his employees—the question is whether they or any of them can compete with the cheap products of the cheaper labor of other lands. Call it "high," call it "low," what I want and what the American people want is "adequate" protection for each and every and all American industries.

My own State is deeply interested in this problem. It is not a theory with us. It is a fact that stares us in the face like a white monument. No argument, no eloquence, no flights of fancy, no declamation, no vociferation, no accusation, can remove that white monument of fact before us. We know—Democratic fathers and mothers as well as Republican fathers and mothers—we know that we can not compete with the cheap, the servile labor of the Orient. We know this. The Pacific Ocean was once regarded as a barrier of protection. It is now an avenue of easy approach. It now invites invasion, and we know we can not compete with many, many of the products of the Orient, and that unless we are guarded by the Government, not by battleships but by tariff laws, the products of the Orient will come across that peaceful ocean and, taking the place of our products, destroy industries which, when protected, give work and wages and prosperity and happiness to Californians. Inadequately protected, these industries will utterly perish. This we know. This invasion and consequent and inevitable ruin we would avert, and hence we are protectionists.

We are producers in California of many things of the forest, of the mine, of the workshop, of the field.

We have a fertile soil and a salubrious climate. God has been very good to us, and the Government has been very good to us, but those industries, I say to you, can not compete with the Orient. Well, you may say, "Let them perish." But do you want them to perish? Do I want any industry in Alabama or in Ohio or in any State to perish? No. If I were to be governed by selfishness, I know that the prosperity of New Mexico will run over into California. I know that the prosperity of Utah or of South Carolina or of Louisiana will be beneficial to my great State. We are producers and you consume our products. We in turn consume your products, but we are friends commercially, not hostile enemies.

But I forget myself and consume too much time. I merely rose to ask my friend from Indiana whether the manufacturers of saws in this country were engaged in bona fide competition; and if so, I want them to continue to have the market of America. I do not wish to surrender that market to any foreign country. Very briefly stated this is my view.

Mr. JONES of New Mexico. Mr. President, I want to disclaim any hostility toward the producers of this country. I rose awhile ago for the purpose of asking the Senator what kind of a protective tariff he believed in. I am inclined to think that his last remark, that he would not allow any foreign product to come in here if it was being produced in the United States, answers my question; in other words, the Senator is in favor of an embargo tariff, and I should like to know if I correctly interpret his language.

Mr. SHORTRIDGE. As to many things, I am in favor of an embargo. I think during the late war an embargo developed great industries in America, which are now threatened. I believe there are times in a nation's history when it is wise to establish an embargo, and if my learned friend is familiar with the tariff history of Germany, if he is acquainted with the tariff history in France, he knows that both Germany and France at different periods of their careers have established embargoes in order to develop great home industries.

Mr. WALSH of Montana. The Senator might go further and say that every country in Europe at one time or another imposed embargoes, and their wiser statesmen in later days have laughed at them.

Mr. SHORTRIDGE. There has been no wiser statesman than Napoleon Bonaparte, the greatest modern military genius and a great civil administrator. He established embargoes, and nobody has laughed at him or questioned the wisdom of his conduct for France when he did it.

Let me remind gentlemen of something. We are all familiar with the fact that Germany was the great forerunner in the production of beet sugar. It was a Californian who was the forerunner of that great industry in our country. It was a poor German lad, Claus Spreckels, who came from Germany, and lived in Charleston, S. C., where his noble son, John D. Spreckels, was born. Claus Spreckels knew what Germany had done in the way of developing the sugar industry of Germany, and he went over there and bought the beet seed of Germany, planted it in the fertile soil of California, and started there the great sugar-beet industry.

Although Germany had grown great in the production of sugar, I am sure my learned friend has not forgotten that before the late war Germany became fearful of Russia, was fearful of Russia in the production of sugar; and not many years before the Great War broke out a convention of German sugar manufacturers was held to consider and devise a way to avert the danger. Their purpose was to insist, and they did insist, upon the German Empire raising the tariff on the importation of Russian sugar to a point which amounted, as of then, almost to an embargo. In other words, Germany saw the fertile soil of Russia and the cheap labor of Russia; and her assembled sugar-beet growers, farmers as well as manufacturers, called upon the German Government for protection, and to the extent which I have suggested.

So, answering the Senator from New Mexico, I want him to know that I think there are times in a nation's history when it is wise not only for national defense but wise in order to develop a given industry to put a complete embargo upon a foreign product.

Mr. JONES of New Mexico. But in the production of saws we have had quite an experience in this country. That industry has had a wonderful opportunity to develop. It has been successful in that development, and it has developed to the point where we not only compete with the world in the American market under a duty, but we ship a lot of those saws and compete with the world.

Mr. SHORTRIDGE. Is not that satisfactory?

Mr. JONES of New Mexico. Does the Senator undertake to apply his infant-industry idea to this saw industry?

Mr. SHORTRIDGE. Oh, no; it is not an infant industry.

Mr. JONES of New Mexico. Then, what kind of a protective tariff would the Senator put upon saws?

Mr. SHORTRIDGE. I certainly would put a rate which would equalize the difference in the costs of production, including labor. There are other elements than the mere cost of labor; there is the cost of all the materials which go into the finished product. So, at least, I would make the rate equal to and, I say, a little in excess of the difference between the cost of production in the one country and in the other.

I may be an extremist on this subject, but with great deference I hold myself ready to defend my position, from the Father of his Country down, and one of these days, for the edification of both of the Senators from Tennessee, where some people of my name and my blood happen to live, I propose, if it has not been done sufficiently already, to invite their attention once more to the sentiments, the matured judgment, of a fairly well-known American, a fairly reputable Democrat, a great American, a great patriot—Andrew Jackson, the protectionist. If I had lived then I might possibly have been a Jacksonite, but I must ask Senators to forgive me for saying that; I would have been for Henry Clay.

Mr. McCUMBER. Mr. President, it is very difficult to discuss any one of these items if three-fourths of the Senators

come in from the outside, look for a moment at the figures of importation upon any particular item, find that the importations are only a small percentage of the production, and then immediately decide that it is not necessary to have any protection because at the present time there is no particular amount of importation into the United States. If the committee were to report a bill based upon that reasoning, in less than two years two-thirds of the American factories would be closed.

Senators ought to realize that Europe has been devastated for four and one-half years, that it has been in an unsettled condition for the years after the war, that production has not become normal in a single one of those countries, and the world is hungry for products. That is one of the reasons why but very few importations are coming in, coupled with the fact that in this country we are very far from a normal condition, and our ability to purchase has been very greatly decreased.

I say, if we are to make our tariffs upon the assumption that we are to base our judgment on the percentage of importations as compared with production, and stop there, then we will say it is not necessary to have any protection whatever. I think we have to go a little further, and we have to determine the possibility of importations next year, and year after next, after making every due allowance for decreasing costs in this country and increasing costs in the other country, if you so desire.

I think we paid about $150,000 to have a commission, headed by Mr. Reynolds, investigate the question of foreign costs, as far as he could get at them, and the comparable American costs, and then give us something on which we could base our judgment as to what the future held in store for us in the matter of foreign importations. What we have certainly bears out the necessity for more than 30 per cent on this item.

Let me call the attention of the Senator from Wisconsin, and I would have liked to have had the attention of the Senator from Minnesota, to this Reynolds report. We will take band saws. There were six separate invoices examined. I assume they tried to get, as nearly as they could, articles that come in competition with the articles manufactured in the United States. These saws come from France. They are sold by the foot. The foreign price was 3.8 cents per foot. The landing cost was 0.003 of a cent. The selling price of the imported article, the little band saws, was 6.8 cents per foot. The selling price of the comparable American article was 8.5 cents per foot. Allowing the foreigner 25 per cent profit upon his landing cost, it would require 71 per cent to bring the French band saw up to the cost of the American saw.

Now, I take the next one. There were only two invoices in that, but I assume they were fair invoices, of articles that are generally imported. These were butcher's saw blades. They come from France. They are sold by the foot, at 52 cents a foot. The landing charges in the United States amounted to 3.5 cents. Those are sold in the United States for $2.23. The comparable American article is sold for $2.35. On the basis of what it costs to produce and import that article into the United States it would require 254 per cent to equalize the two. We have given them 30 per cent.

We take now metal slitting saws. There were two invoices of those, and they were sold for $1.19 each; 2 cents landing cost. The selling price of the imported article in the United States was $2.53. The selling price of the comparable American article—and we tried to get comparable American articles—was $3.79. It would take 153 per cent to equalize that, but I appreciate the fact that the importer made 88 per cent upon those importations.

So we might go over others. I do not for a single moment assume that all the importations that come into the United States would come in at these low prices as compared with our higher prices, but it does indicate to a fair degree what they can make these saws for in Germany or in France and import them into the United States. I candidly believe that when they get on their feet and when there is a sufficient demand outside to enlarge and command all that they can produce, they could produce enough to swamp the American market, and that 20 per cent ad valorem would not be sufficient. We took into consideration the very slight imports, but we could not eliminate from our minds the figures that are made in this report and draw some kind of a conclusion from it that we were justified in our 30 per cent ad valorem.

Mr. WATSON of Indiana. What rate does Canada impose on this article?

Mr. McCUMBER. Canada imposes 30 per cent ad valorem.

Mr. WATSON of Indiana. On our saws?

Mr. McCUMBER. Yes.

Mr. WALSH of Montana. Mr. President, I wish to say just a word in reply to the Senator from North Dakota, because he has referred to the Reynolds report. I want to bring out a few facts with reference to the matter. I find by the Reynolds report that there is no comparison at all so far as cost of saws are concerned, so far as handsaws are concerned, so far as any saws mentioned here are concerned, except band and butcher saws.

Mr. McCUMBER. All right. We will suppose that to be the case.

Mr. WALSH of Montana. That is the case, is it not?

Mr. McCUMBER. All right. That does not mean, however, that none of them are imported.

Mr. WALSH of Montana. Let us take band saws, which is the only one there is. Of course, the band saw is used, as is well known, in doing rather delicate work. The ordinary saw is the cross-cut saw or the circular saw, but let us take the band saw. I find from the Reynolds report, according to invoices they have, that the selling price of a certain gauge of the foreign article is 5.63 cents per point. The selling price of the domestic market is 7.28 cents per point, a difference of about 30 per cent. But can the Senator tell us how much of that 7.28 cents is profit?

Mr. McCUMBER. No. I have said many times over that the experts, those who have made as careful examination as they can, have reported to us that the percentage of profit of the foreign manufacturer is about the same as the percentage of profit by the American manufacturer, and, therefore, I am assuming in making these differences that the proportion of the one to the other as evidenced by their selling price would be equivalent to the proportion of the one to the other in the cost of production.

Mr. WALSH of Montana. Let me inquire of the Senator from what source the committee got the information that the profit to the domestic producer is substantially the same as the profit of the foreign producer?

Mr. McCUMBER. I only have it from the experts of the Tariff Commission——

Mr. WALSH of Montana. Some personal communication?

Mr. McCUMBER. Just a moment—and from those who are making the appraisements year after year in the customs-houses.

Mr. WALSH of Montana. Where can I get the information?

Mr. McCUMBER. Just where they got their information. Just to what extent they have investigated it I do not know, but I think they are in a position to give us as accurate information as we can secure from any source except the verified statement of the manufacturer.

Mr. WALSH of Montana. Can the Senator tell me where I can get the information?

Mr. McCUMBER. The Senator can get it from the same persons. I can give the name, if he wishes, of one of the experts who gave us that information.

Mr. WALSH of Montana. Is there no published information of any kind to which the Senator can direct me?

Mr. McCUMBER. Except such as given to the Finance Committee.

Mr. WALSH of Montana. Was information of that kind given the Finance Committee?

Mr. McCUMBER. Yes; to the members of the Finance Committee, and I have asked the different ones several times what their opinion was in reference to it, and that is the general view that I get of it.

Mr. WALSH of Montana. I may be wrong about it, but I had a general idea that the Tariff Commission never made any investigation into the cost, for instance, of the production of saws in this country so as to be able to form any judgment whatever as to whether the 7 cents includes 50 per cent profit or 20 per cent profit or 5 per cent profit. Can the Senator correct me if I am in error?

Mr. McCUMBER. I can not correct the Senator upon that point.

Mr. WALSH of Montana. There is just one other point I desire to submit before the matter is closed, so far as I am concerned.

The Senator from Indiana [Mr. WATSON] is exceedingly apprehensive that because of the low rate of wage in Germany—and apparently his apprehensions are shared by the chairman of the committee, the distinguished Senator from North Dakota—the 20 per cent now proposed by the Senator from Wisconsin will not be adequate to protect the manufacturer, and that the German manufacturer will come in here and appropriate and absorb the entire market.

That would be most unfortunate, because, Mr. President, in 1920 we produced about $12,000,000 worth of this product, and we exported $4,000,000 worth of it; that is to say, our product to the extent of $4,000,000, one-third of our entire production,

went abroad, where we entered into competition with Germany and with all the world. Now, if Germany by reason of her lower wage rates can come in here and get the American market away from us, of course, our foreign market is gone, too. No tariff that we can possibly impose will protect us in the foreign market, and the industry, if it loses one-third of its entire product, is gone. It will be impossible to sustain it, because there is no industry that can live, that is carried on in any commercial way, that has one-third of its entire production absolutely swept away from it and its markets absorbed by competitors to that extent. So if there is any chance at all of those people coming in and taking the American market, our industry is gone, no matter what tariff is put on the product.

Mr. LENROOT. Mr. President, this comparatively minor amendment which I have offered has given rise to one or two novel theories from the standpoint of Republican protection.

The distinguished Senator from California [Mr. SHORTRIDGE] expresses the view that if there be not a trust or monopoly in this country, that if there be competition in this country, it is immaterial how high the tariff rates are. If that should be the theory, what is the use of spending time on 20 per cent or 30 per cent? Why did not the committee bring in 100 per cent or 500 per cent upon all articles as to which there is manufacture and competition within the United States?

The Senator from California expresses the view that the American manufacturer is entitled to the complete market here in America. That, too, is entirely a new doctrine in the Republican Party. I have never before heard it claimed that the American manufacturers are entitled to a monopoly of the American market. The Republican theory has always been, and it is mine now, that the American manufacturer is entitled to protection so as to give him a fair chance and a fair opportunity to compete in the American market, and that he shall not be discriminated against by undue competition from abroad. But in equalizing conditions it has never been the theory of the Republican Party that they should enact prohibitive tariff rates and embargoes upon the matters of common production in the country.

Then the Senator from Indiana [Mr. WATSON] urges that because we do not know what the future may hold, it ought to be a proper policy to make the tariff rate so high as to cover every possible doubt so far as the future is concerned. Mr. President, to that I can not subscribe.

I have voted for a great many of the committee amendments in the bill with which I have not been satisfied as to their correctness, but I have resolved every reasonable doubt in favor of the American manufacturer. However, I am not willing to go along with the committee and give the American manufacturer the benefit of every possible doubt which under present conditions is sure to create an embargo and give a prohibitive tariff upon articles in common use here in the United States. What is the situation here?

The Senator from North Dakota may read figures from the Reynolds report from now until next month as to costs and as to wages, but the test is what are the imports under present conditions. If the quality was similar and the imports were so much less, as indicated in the Reynolds report, will some one tell the Senate why the imports are not coming in and flooding the country to-day? I think the answer is very simple. I hold in my hand a knife which perhaps costs a dollar. I have no question but that knives might be imported for a cent apiece, but they might not be of the same quality, yet I would not think it fair to compare an article imported from abroad of one quality with an article manufactured here of a higher quality.

When we come to the question of saws, America does produce the highest quality of saws that are manufactured in the world. That is why the American manufacturers are getting the world's markets, and in 1920 exported one-third of their entire production, although they had no tariff, so far as the foreign market was concerned, but they had to compete with the world.

If I were not to resolve any doubts in favor of the American manufacturer, I should have voted for the amendment of the Senator from Montana [Mr. WALSH] to keep the rate at 12 per cent. In proposing the amendment providing for a 20 per cent rate I am giving the manufacturer the benefit of all doubt, but I am not willing to subscribe to the doctrine proposed here upon this floor to-night that we shall in this bill impose tariff rates to cover every possible contingency that may occur in the future.

Mr. President, there is a provision in the pending bill which has been reported by the Committee on Finance manifestly and expressly for the very purpose of taking care of future contingencies; but, if the committee is to go upon the theory that because we do not know what the conditions may be two years from now, that we must make rates so high as to cover every possibility which may then exist, why the necessity of the provision later in the bill for a flexible rate and for an increase or a decrease to the extent of 50 per cent?

Mr. President, as a Republican, I am not willing to vote for tariff rates based wholly upon possibilities occurring in the future. In this item and in other items I propose to base my vote upon actual facts, giving the benefit to the American manufacturer of reasonable doubts, but I am not willing to vote for rates that can not be defended and are not defended from the standpoint of actual competition from abroad.

Mr. SHORTRIDGE. May I ask my friend a question?

Mr. LENROOT. I yield.

Mr. SHORTRIDGE. Does the Senator think that more saws will be imported under a 20 per cent than under a 30 per cent rate?

Mr. LENROOT. Well, I should hope so. If I did not think so, I should not propose it.

Mr. SHORTRIDGE. Then the Senator thinks it is desirable to increase the importation of saws?

Mr. LENROOT. Yes. I think when we are exporting $4,000,000 worth of saws a year and importing only $78,000 worth we may, without any danger to the American manufacturer, look forward to some increase in the importation of saws.

Mr. SHORTRIDGE. But why should we desire it?

Mr. LENROOT. I will tell the Senator why we ought to desire it. To-day the commodities of the farmers of this country are down to pre-war prices, but as to everything the farmers in the State of California and all other States have to buy, including saws, if you please, to-day they are compelled to pay prices very much higher than the pre-war prices. Why? Because agricultural products have been deflated; the farmer's prices have been cut down. We can not expect permanent prosperity in this country until there shall be a level secured between what the agriculturist receives for his products and what he pays for what he must buy; and we are not going to reach that level if, by prohibitive rates, we protect the present high prices of the manufacturers. So I come to the point that a reasonable amount of importations compelling manufacturers to bring their prices somewhere near the level of the farmers' prices will be a good thing for everybody in the United States.

Mr. SHORTRIDGE. I assume that the Senator from Wisconsin thinks that an increase of importations would bring about the result which he says is so much to be desired. That is the theory, is it not?

Mr. LENROOT. I think it would be so, because if we are going to keep up an embargo what is the incentive for them to decrease and deflate their prices, while, on the other hand, if the manufacturers must meet a reasonable competition—and they can meet it by proper economies—why should not the American people get the benefit of it?

Mr. SHORTRIDGE. I do not wish to pursue the matter, Mr. President, but does the Senator from Wisconsin contend now that the manufacturers of saws in America are making exorbitant profits?

Mr. LENROOT. I do say that the manufacturers of saws in America are compelling the American people to pay for that particular product a price very much higher in proportion than the price which the farmer receives for the product of his farm.

Mr. SHORTRIDGE. Of course, I admit all that to be true; but I do not reach the conclusion the Senator apparently reaches that this rate would have anything whatever to do with the price of the farm products to which he refers.

The PRESIDING OFFICER (Mr. TOWNSEND in the chair). The question is on the amendment offered by the Senator from Wisconsin [Mr. LENROOT] to the amendment reported by the Committee on Finance.

Mr. LENROOT. I ask for the yeas and nays.

The yeas and nays were ordered and the Assistant Secretary proceeded to call the roll.

Mr. EDGE (when his name was called). Making the same announcement as heretofore concerning the transfer of my pair, I vote "nay."

Mr. HALE (when his name was called). Making the same announcement as before relative to my pair and its transfer, I vote "nay."

Mr. KELLOGG (when his name was called). I have a general pair with the senior Senator from North Carolina [Mr. SIMMONS], which I transfer to the senior Senator from Minnesota [Mr. NELSON], and vote "yea."

Mr. MCCUMBER (when his name was called). I transfer my pair with the junior Senator from Utah [Mr. KING] to the junior Senator from Delaware [Mr. DU PONT], and vote "nay."

Mr. POMERENE (when his name was called). I have a pair with my colleague, the junior Senator from Ohio [Mr. WILLIS], for the day. I transfer that pair to the senior Senator from Nebraska [Mr. HITCHCOCK], and will vote. I vote "yea."

Mr. STANLEY (when his name was called). I have a general pair with the junior Senator from Kentucky [Mr. ERNST]. I transfer that pair to the senior Senator from Missouri [Mr. REED] and will vote. I vote "yea."

Mr. SUTHERLAND (when his name was called). I transfer my general pair with the senior Senator from Arkansas [Mr. ROBINSON] to the senior Senator from New Hampshire [Mr. MOSES] and will vote. I vote "nay."

Mr. WATSON of Indiana (when his name was called). I transfer my general pair with the senior Senator from Mississippi [Mr. WILLIAMS] to the senior Senator from New York [Mr. WADSWORTH] and will vote. I vote "nay."

The roll call was concluded.

Mr. JONES of Washington. Making the same announcement as before with reference to my pair and its transfer, I vote "yea."

Mr. JONES of New Mexico. I transfer my general pair with the Senator from Maine [Mr. FERNALD] to the Senator from Georgia [Mr. WATSON] and will vote. I vote "yea."

Mr. CURTIS. I have been requested to announce the following pairs:

The Senator from Delaware [Mr. BALL] with the Senator from Florida [Mr. FLETCHER];

The Senator from Rhode Island [Mr. COLT] with the Senator from Florida [Mr. TRAMMELL];

The Senator from West Virginia [Mr. ELKINS] with the Senator from Mississippi [Mr. HARRISON];

The Senator from Massachusetts [Mr. LODGE] with the Senator from Alabama [Mr. UNDERWOOD];

The Senator from Indiana [Mr. NEW] with the Senator from Tennessee [Mr. MCKELLAR]; and

The Senator from Vermont [Mr. DILLINGHAM] with the Senator from Virginia [Mr. GLASS].

The result was announced—yeas 22, nays 27, as follows:

YEAS—22.

Borah	Heflin	La Follette	Stanley
Capper	Jones, N. Mex.	Lenroot	Sterling
Caraway	Jones, Wash.	Overman	Townsend
Cummins	Kellogg	Pomerene	Walsh, Mont.
Dial	Kendrick	Sheppard	
Harris	Ladd	Smith	

NAYS—27.

Brandegee	Frelinghuysen	McLean	Shortridge
Bursum	Gooding	McNary	Smoot
Calder	Hale	Newberry	Spencer
Cameron	Johnson	Oddie	Sutherland
Curtis	McCormick	Page	Warren
Edge	McCumber	Pepper	Watson, Ind.
France	McKinley	Phipps	

NOT VOTING—47.

Ashurst	Gerry	New	Simmons
Ball	Glass	Nicholson	Stanfield
Broussard	Harreld	Norbeck	Swanson
Colt	Harrison	Norris	Trammell
Crow	Hitchcock	Owen	Underwood
Culberson	Keyes	Pittman	Wadsworth
Dillingham	King	Poindexter	Walsh, Mass.
du Pont	Lodge	Ransdell	Watson, Ga.
Elkins	McKellar	Rawson	Weller
Ernst	Moses	Reed	Williams
Fernald	Myers	Robinson	Willis
Fletcher	Nelson	Shields	

So Mr. LENROOT's amendment to the amendment of the committee was rejected.

The PRESIDING OFFICER. The question now is on the committee amendment.

The amendment was agreed to.

Mr. MCCUMBER. I ask unanimous consent that when the Senate closes its session for this calendar day it recess until to-morrow at 11 o'clock.

The PRESIDING OFFICER. Without objection, it will be so ordered.

The Secretary will state the next amendment of the committee.

The ASSISTANT SECRETARY. On page 68, paragraph 341, line 10, after the word "engraved," the committee proposes to insert the words "or otherwise prepared," so as to read:

Steel plates, stereotype plates, electrotype plates, halftone plates, photogravure plates, photo-engraved plates, and plates of other materials, engraved or otherwise prepared for printing—

And so forth.

The amendment was agreed to.

The ASSISTANT SECRETARY. On line 14, page 68, the committee proposes to strike out "15" and insert "25," so as to read:

And plates of iron or steel engraved or fashioned for use in the production of designs, patterns, or impressions on glass in the process of manufacturing plate or other glass, 25 per cent ad valorem.

Mr. WALSH of Montana. Mr. President, this is another increase that seems to have no justification whatever. It proposes to increase the tax on intelligence.

The item under consideration deals with steel plates, stereotype plates, electrotype plates, halftone plates, photogravure plates, photo-engraved plates, and plates of other materials, engraved or otherwise prepared for printing, and plates of iron or steel engraved or fashioned for use in the production of designs, patterns, or impressions on glass in the process of manufacturing plate or other glass, 25 per cent ad valorem; lithographic plates of stone or other material engraved, drawn, or prepared, 30 per cent ad valorem. These particular articles are used almost exclusively in the printing business. The production of these articles in this country is enormous; the imports are negligible; yet it is proposed to tax the printers of newspapers and periodicals and the makers of books an additional amount for these plates needed for purposes of illustration.

I content myself with giving the figures as compiled by the Tariff Commission, as follows:

In 1914 the country's output of engraved steel and copper plate, including plate printing, amounted to $13,786,000; photo-engraved plates not done in printing establishments, to $15,359,000; and stereotype and electrotype plates, to $8,154,000.

That is about $46,000,000 worth of these various articles produced in this country.

I continue reading from the report:

The figures for the output of lithographic plates include so much other material as to be valueless in this connection. England and Germany are large producers of the several articles embraced in this paragraph.

Bear in mind, Mr. President, the total production being in the neighborhood of forty-five to fifty million dollars. The imports in 1914 approximated $50,000, under a tariff of 15 per cent on the steel plates and 25 per cent on the lithographic plates. Since that time the importations are as follows:

Engraved steel plates:

In 1918	$5,139
In 1919	587
In 1920	600
In 1921 (9 months)	255

In the case of engraved plates of iron or steel, engraved or fashioned for use in the production of designs, patterns, or impressions on glass, and so forth, the importations were as follows:

In 1918	$44
In 1919	58
In 1920	900
In 1921 (9 months)	280

Bear in mind, that was at a rate of duty of 15 per cent, which it is proposed to increase to 25 per cent.

In the case of engraved steel plates, dies, and rolls, for use in engraving or printing bonds, stock certificates, and so forth, the importations were as follows:

In 1918 (with a duty of 15 per cent)	$15,946
In 1919	18,920
In 1920	28,761
In 1921 (9 months)	44,010

I inquire of the Senator, am I right in the assumption that these plates for the printing of bonds are on the free list?

Mr. SMOOT. Yes; they are on the free list.

Mr. WALSH of Montana. In the case of plates, electrotype, stereotype, half tone, photogravure, photograved, and plates of other material than steel, engraved for printing, the importations were as follows:

In 1918	$15,369
In 1919	32,312
In 1920	72,585
In 1921 (9 months)	26,546

The total production in this country in 1914, even, being $8,000,000. These plates, of course, are used now by every metropolitan paper. It gets out a Sunday sheet with photogravure pictures, and the plates thus come into use everywhere.

Finally, Mr. President, in the case of lithographic plates of stone or other material, engraved, and so forth, it is proposed to put a duty of 30 per cent ad valorem on that kind of material. The importations were as follows:

In 1918	$979
In 1919	482
In 1920	16,474
In 1921 (9 months)	1,903

Not only that, but we exported in 1914, of these commodities, $72,000 worth; in 1918, $181,000; in 1919, $389,000; in 1920, $535,597; and in the nine months of 1921, $299,431. We export these products to Canada, the United Kingdom, Cuba, Brazil, and the Argentine.

I content myself with this bare statement of facts, which shows, as I think, that this is a prohibitive duty, that it is an embargo which would simply exclude plates that are pro-

duced abroad and that are desired for use in this country by the newspapers and publishers of documents and periodicals.

Mr. SMOOT. Mr. President, I am quite sure the Senator does not understand the use of the articles in paragraph 341, or why this duty is imposed.

Mr. WALSH of Montana. The Senator is quite right in stating that I do not understand why the duty is imposed, but I think he is in error when he thinks that I do not know what they are used for.

Mr. SMOOT. I judged so from what the Senator said in relation to photogravures. That is why I made the statement. I expected the Senator from Montana to get up here and offer an amendment increasing the rates that we propose here in the Senate. There is not an iota of protection in these rates. We do not offer them here as protective rates at all. There is no necessity of it. It is a pure, simple revenue measure, and if it were 35 per cent or 45 per cent or 50 per cent it would make no difference.

The same articles would come in that are coming in under the rates to-day. If there is any real complaint to offer, it is because these rates were not made higher in order to get revenue into the Treasury of the United States.

Most of this work is done to special order; delivery is an important factor in the situation, and American firms will rarely place an order in a foreign country. Imports have consisted mainly of cuts for catalogs sent by a foreign firm to its agents in the United States and electrotypes shipped to American book and music publishers from their foreign establishments. Stereotype plates, it may be said, are almost never imported, since they are made from a papier-mâché matrix, and it is much cheaper to import the matrix. A few engraved steel plates come in from time to time, but these are specialties, the value often depending on their artistic merit. They never would come in otherwise. There is no necessity of it. They never would come in here unless they were of particular scientific or artistic merit.

That is all there is to this. We think we might just as well get that money as not, and as far as newspapers having any work done in a foreign country, or purchasing from a foreign country the photogravures which go into the newspapers on Sunday, is concerned, it is out of the question. The news would be so out of date, the pictures so out of the thought of the general reading public that it never could happen. So I will content myself by saying that these rates are imposed in order, wherever these specialties come over to this country, to make them pay into the Treasury of the United States a little more money than they do under the existing law. Under the existing law the rate is 15 per cent and 25 per cent. The committee reports 25 and 30. We think we can get a little more money, and that is all there is to it.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment.

The amendment was agreed to.

The next amendment was, on page 68, line 16, before the words "per centum," to strike out "20" and insert "30," so as to make the paragraph read:

PAR. 341. Steel plates, stereotype plates, electrotype plates, halftone plates, photogravure plates, photo-engraved plates, and plates of other materials, engraved or otherwise prepared for printing, and plates of iron or steel engraved or fashioned for use in the production of designs, patterns, or impressions on glass in the process of manufacturing plate or other glass, 25 per cent ad valorem; lithographic plates of stone or other material engraved, drawn, or prepared, 30 per cent ad valorem.

The amendment was agreed to.

The next amendment was, on page 68, line 20, before the words "per centum," to strike out the figures "35" and to insert "60," so as to make the paragraph read:

PAR. 342. Umbrella and parasol ribs and stretchers, composed wholly or in chief value of iron, steel, or other metal, in frames or otherwise, and tubes for umbrellas, wholly or partly finished, 60 per cent ad valorem.

Mr. SMOOT. The committee desires to amend the amendment proposed by the committee by striking out "60" and inserting in lieu thereof "50."

Mr. WALSH of Montana. Mr. President, I shall content myself with making no opposition to the amendment proposed by the Senator, but I shall ask the Senate to disagree to the amendment offered by the committee, so that the rate shall remain as fixed in the bill as it passed the House, at 35 per cent ad valorem, the rate in the present law. This is another article which seems to require no further protection at all. Of course, it is rather unimportant, and I shall not take much of the time of the Senate in the discussion of it.

The American production is estimated at from $1,250,000 to $2,000,000, the item being umbrella and parasol ribs and stretchers. I read from the Tariff Commission Summary:

In the calendar year 1918 the imports of metallic ribs, stretchers, and tubes for umbrellas and parasols were valued at $14, the smallest annual importation on record since 1884. In the fiscal year 1914 the amount was $28,985.

That, it will be observed, was a little over 1 per cent of the American production, or about 1⅛ per cent.

After the year 1914 the imports steadily decreased until the year 1918.

Statistics for the years 1919 to 1921 are as follows:

Calendar year.	Value.	Duty.	Ad valorem rate.
			Per cent.
1919	$7,809	$2,733	35
1920	18,063	6,322	35
1921 (9 months)	26,539	.....	.....

Mr. SMOOT. And the balance of the year made the amount $38,285.

Mr. WALSH of Montana. Suppose it did; suppose it went up to $40,000. That would be 2 per cent of $2,000,000, the American production, and it is proposed to shut out even 2 per cent foreign production. I might say that jumping the rates from 35 to 60 per cent, or even to 50 per cent, can not be considered as anything but imposing a prohibitive embargo rate.

Mr. SMOOT. No, Mr. President; it is not an embargo rate, and I am a little doubtful whether, considering the quotations existing to-day, it is going to save the industry. The whole cost of these umbrella and parasol ribs and stretchers is labor, with the exception of what little steel is in the rib or the stretcher, which would not cost 2 cents. The whole of it is labor, outside of that little steel. I will say to the Senator from Montana that I have seen the orders which have been given, and also the invoices, and the quotations being made to-day and the orders that have been given are what led the committee in the first place to give 60 per cent. But the committee took into consideration the fact that perhaps in the near future there will be a lowering of the difference in the cost of producing goods in this country and Germany, from which all of the competition comes, and the committee thought that when conditions were normal 50 per cent would be sufficient protection. It is a very little industry, established just before the Payne-Aldrich law was passed.

I remember when the manufacturers of these goods came before the committee at that time, in 1909, and placed before the committee a picture of the conditions existing at that time, when 50 per cent was given by way of protection in the manufacture of these articles. Conditions are even worse to-day than they were then; but, as I have already said, the committee believed that, considering the fact that the wage scale in Germany may increase and the wage scale in the United States may decrease, the 50 per cent will be sufficient. That is why we ask that the Senate support the committee in the 50 per cent rate.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Utah to the committee amendment.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The next amendment was, in paragraph 343, on page 68, line 24, before the words "per centum," to strike out the figures "25" and insert "40"; in line 25, before the words "per cent," to strike out the figures "35" and insert "50"; and on page 69, line 4, before the words "per cent," to strike out "30" and insert "45."

Mr. WALSH of Montana. Mr. President, this is an exceedingly important paragraph. As proposed to be amended by the committee it reads:

PAR. 343. Spring-beard needles, and other needles for knitting, sewing, shoe, or embroidery machines of every description, not specially provided for, and crochet needles, $1.15 per thousand and 40 per cent ad valorem; latch needles, $2 per thousand and 50 per cent ad valorem; tape, knitting, and all other needles, not specially provided for, bodkins of metal, and needlecases or needlebooks furnished with assortments of needles or combinations of needles and other articles, 45 per cent ad valorem.

That includes not only needles used in industry generally, but, as I take it, the household article. They bear at the present time, under the existing law, a rate of 20 per cent.

Mr. SMOOT. I want to say to the Senator that the household needles are on the free list. All the sewing-machine needles are on the free list. These are crocheting needles on large machines and on knitting machines of all kinds.

Mr. WALSH of Montana. I did not know that the others were specially provided for.

Mr. SMOOT. They are; they are on the free list.

Mr. WALSH of Montana. There does not seem to be any reason for distinguishing at all, so far as I can observe. The Tariff Commission reports that—

> The two principal classes of knitting-machine needles involve so many differences in construction—chiefly in labor and factory equipment—that they are distinct industries. In 1914 the domestic production of latch needles amounted to 46,165,000, valued at $492,387, while spring-beard needles amounted to 47,934,000, valued at $129,397; in 1919 latch needles amounted to 121,000,000, valued at $3,845,000, and spring-beard needles amounted to 43,000,000, valued at $341,000. Reports of manufacturers of spring-beard needles show production for 1919 to have been over 80,000,000 needles, valued at more than $600,000.

The importations of needles of all kinds in 1918 amounted to $388,432, considerably less than the production of any one class of needles in this country. In 1919 the imports amounted to $507,301; in 1920 they were $538,057; and in 1921 they amounted to $276,803. The figures are given in the table here for each particular kind.

We export these commodities in very large quantities.

> It is estimated that somewhat less than one-half of the domestic sewing-machine needles are exported; other classes of needles exported are insignificant. Some domestic shoe-machine needles are exported, but the extent is unknown.
>
> Exports for the calendar years 1918 to 1921 are valued as follows: 1918, $321,651; 1919, $535,656; 1920, $548,783; 1921 (9 months), $270,749. Principal countries of destination were, in 1918, Canada, Brazil, Argentina; in 1919, Canada, Brazil, Mexico; in 1920, Canada, Argentina, Brazil.

I submit that upon this record there is no justification whatever for an increase in the rate of duty upon any of these needles, particularly as the needles for domestic use, as we are advised by the Senator from Utah, have been placed upon the free list, it being apparently not feared that the industry, so far as the domestic production is concerned, is in any peril whatever from foreign production, which appears to be the case with reference to the other classes of needles.

Accordingly, Mr. President, I move to amend the rate fixed in the paragraph by striking out 40, before "per cent" in line 24, and inserting in lieu thereof 5, so that it will read, "$1.15 per thousand and 5 per cent ad valorem," which I take it will still be higher than the present rate.

Mr. SMOOT. Mr. President, the sewing-machine needle is quite different from the latch needle or the spring-beard needle. So important are those to certain industries in France and England that both France and England have designated them as a key industry. Take the latch needle. It is not that the material in the latch needle costs any more than it does in the common sewing needle. If it were made the same, there would be no need of any duty, any more than there is on the common sewing needle that is made and finished mostly by machinery. But on the latch needle, used for knitting purposes on large machines, there is a little beard, and that has to be fashioned exactly right and shaped exactly right and put upon the needle exactly in the same position as the beards on the other needles are. Unless it is, there would be trouble as soon as they undertook to operate a machine by power. The little beard that goes upon the latch needle costs more than 50 per cent of the total cost of the needles themselves, and the labor upon it alone makes the labor upon the latch needle the greater part of the cost of the article itself when completed.

What does the Reynolds report show as to common machine needles? It shows there is no need of any duty at all, and therefore they are put upon the free list. But when it comes to the spring-beard needles it would require a rate of 83 per cent to equalize the cost in the United States and in the foreign country—Germany.

Then take the embroidery needles. The rates in the bill, as reported by the committee, are sufficient to equalize that difference as shown by the Reynolds report.

Mr. POMERENE. What is the source of the information which the Senator is stating?

Mr. SMOOT. I am quoting from the Reynolds report as figured out by the Tariff Commission and handed to the committee.

The shoe-machine needle would require 83 per cent to equalize differences.

On the crochet needle it would require 164 per cent to equalize conditions. But, as I said with reference to umbrella and parasol ribs and stretchers, provided for in the preceding paragraph and just voted upon by the Senate, I expect to see a reduction in the wage in this country somewhat, and I expect to see an increase in the wage in Germany, and therefore I am not going to insist upon the rate that is shown by the Reynolds report to be necessary to equalize conditions in the two countries. I feel, however, that under normal conditions the rates named in the bill are no more than sufficient to protect the industry in the United States. Therefore I hope that the Senate will agree to the amendments that have been offered by the committee.

Mr. WALSH of Montana. Before disposing of this matter I want to call attention particularly to the duties upon shoe needles——

Mr. SMOOT. Shoe-machine needles.

Mr. WALSH of Montana. It reads "shoe or embroidery machine needles." It really reads, "needles for shoe or embroidery machines." Those are free under the present law, and it is proposed to put a duty upon them of $1.15 per thousand and 40 per cent ad valorem. Bear in mind they are absolutely free now, and yet the importations of this particular class of needles for 1920 were only $6,184 worth and for the nine months of 1921 were only $4,727, coming in free. I think it is protection gone mad to think of imposing a duty of $1.15 a thousand and 40 per cent ad valorem upon shoe-machine needles.

The PRESIDING OFFICER. The question is on the amendment offered by the Senator from Montana [Mr. WALSH] to the amendment of the committee.

Mr. SMOOT. Just a moment, Mr. President, I am not going to take the time to read it, but if the Senator from Montana will turn to page 866 of the hearings before the House Committee on Ways and means, part 2——

Mr. WALSH of Montana. I have it right before me.

Mr. SMOOT. And note why the rates are believed to be necessary, I think more than likely he will agree that the rate is not a high rate upon these articles.

Let me call the Senator's attention to what the Tariff Commission reports on these very items to-day. Take shoe machine needles, which come from Germany. One hundred of them cost in Germany 83 cents, and the landing charges are 8 cents. The selling price of the German article is $2.19 in this country. The selling price of the domestic article is $2.15, just about the same. The actual profit and overhead or landed cost of the foreign article was 140 per cent; that is, over and above what it cost them to land here they sold at a profit of 140 per cent. To equalize the difference in the cost in this country and Germany would require 82 per cent, and the Senator can see what we have given. That is the condition existing to-day, I will say to the Senator.

Mr. WALSH of Montana. Of course, I understand perfectly well. The Senator is giving us this information from the brief of the Torrington Co., of Torrington, Conn. That is a significant fact. They are manufacturers of shoe-machinery needles.

Mr. SMOOT. Not only in this country, but in Germany as well.

Mr. WALSH of Montana. Exactly. In this country they are one company, as shown by the brief filed by them, producing sewing-machine needles in 1920 of a value of $1,000,000. There were imported during that year only $6,184 worth of shoe-machine needles to come into competition with products of $1,000,000 worth.

Mr. SMOOT. The Senator was wrong when he said that the Senator from Utah was quoting figures from this witness. I called the attention of the Senator to the witness's statement. The statement I made to-day was from the Tariff Commission, based upon the report of the Reynolds Commission.

Mr. WALSH of Montana. The situation is just exactly as pointed out by the Senator from Wisconsin [Mr. LENROOT] in discussing the subject of saws. Of what consequence is it to be shown by the Reynolds report that they can produce these commodities in Germany or in England at a cost less than we can produce here? The fact is they do not come here, which is a refutation of any statement to the effect that they can be produced at a less cost abroad and laid down here at a less cost than they can be produced for here. Of what avail is it that this man gives extensive figures about the difference in cost of labor in the production of this article in Germany and in the United States, when Germany is not able to lay down the product in the United States, as shown by the test of the imports to this country?

I think this is an outrageous thing. I believe that if the American people had any kind of idea about it they would rise in insurrection against a rate of $1.15 a thousand and 40 per cent on these needles.

Mr. POMERENE. Mr. President, the Senator from Montana perhaps forgets that we were told that during the war Germany had stored up mountains of dyes of all sorts that were to be dumped in here. It may be that while they were carrying on the war they manufactured mountains of needles to be brought in here, too.

Mr. WALSH of Montana. That may be.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Montana to the amendment of the committee.

The amendment to the amendment was rejected.

The amendment of the committee was agreed to.

The PRESIDING OFFICER. The Secretary will state the next amendment.

The ASSISTANT SECRETARY. On page 68, line 25, the committee proposes to strike out "35" and insert "50," so as to read:

Latch needles, $2 per thousand and 50 per cent ad valorem.

Mr. WALSH of Montana. I move to amend the committee amendment by striking out "50" and inserting "5."

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Montana to the amendment of the committee.

The amendment to the amendment was rejected.

The committee amendment was agreed to.

The ASSISTANT SECRETARY. The next amendment is, on page 69, line 4, where the committee proposes to strike out "40" and insert "45," so as to read:

tape, knitting, and all other needles, not specially provided for, bodkins of metal, and needle cases or needle books furnished with assortments of needles or combinations of needles and other articles, 45 per cent ad valorem.

Mr. WALSH of Montana. These, I take it, are the household articles?

Mr. SMOOT. They are all luxuries.

Mr. WALSH of Montana. How are they luxuries? "Needle cases and needle books furnished with assortments of needles or combinations of needles and other articles." I have kept house myself. We do not indulge in very many luxuries in my home—at least, some years ago we did not, when I was familiar with this matter of needle cases and combinations of needles and packages. I move to amend in line 4, page 69, by striking out "45" and inserting "20."

The PRESIDING OFFICER. The amendment to the amendment will be stated.

The ASSISTANT SECRETARY. On line 4, page 69, the Senator from Montana moves to strike out "45," as proposed by the committee, and to insert in lieu thereof "20."

The amendment to the amendment was rejected.

The amendment of the committee was agreed to.

The PRESIDING OFFICER. The Secretary will report the next amendment.

The ASSISTANT SECRETARY. In paragraph 344, page 69, on line 7, before the word "baskets," the committee proposes to insert the word "fishing," so as to read:

Fishing baskets.

The amendment was agreed to.

The next amendment of the committee was, on page 69, line 9, to strike out "35" and insert "45," so as to read:

PAR. 344. Fishhooks, fishing rods and reels, artificial flies, artificial baits, snelled hooks, leaders or casts, and all other fishing tackle and parts thereof, fly books, fly boxes, fishing baskets or creels, finished or unfinished, not specially provided for, except fishing lines, fishing nets, and seines, 45 per cent ad valorem.

Mr. WALSH of Montana. Mr. President, I am some fisherman myself, but if anybody wants to buy foreign fishing rods and flies he is perfectly welcome to do it. The rate is satisfactory to me.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment.

The amendment was agreed to.

The next amendment of the committee was, in paragraph 345, page 69, line 17, to strike out "35" and insert "55," so as to read:

PAR. 345. Saddlery and harness hardware: Buckles, rings, snaps, bits, swivels, and all other articles of iron, steel, brass, composition, or other metal, commonly or commercially known as saddlery or harness hardware, 55 per cent ad valorem.

Mr. WALSH of Montana. I should like to ask the Senator from Utah [Mr. SMOOT], or possibly the Senator from Connecticut [Mr. MCLEAN], who is also a member of the Committee on Finance, to tell us just exactly why the farmers of this country should be charged 55 per cent ad valorem on the hardware going into the manufacture of harness?

Mr. SMOOT. Mr. President, before I answer the Senator's question, I wish to offer certain amendments to this paragraph in order to clarify the paragraph and make it conform to another paragraph in the bill.

On page 69, line 17, I move to strike out the words "saddlery or."

Mr. POMERENE. What is the reason for that amendment?

Mr. SMOOT. Perhaps I had better first state the other amendments in order that Senators may know exactly what they are.

Then, on page 69, line 17, I ask that the Senate disagree to the amendment increasing the rate to 55 per cent and allow it to remain at 35 per cent, as it has been fixed by the other House.

Mr. POMERENE. Before the question is put on the amendment I should like to have an explanation of it.

Mr. SMOOT. I wish to present further amendments to the paragraph in order that the Senator may understand them all.

On page 69, line 18, after the words "ad valorem," I move to insert a semicolon and the following:

All articles of iron, steel, brass, composition, or other metal commonly or commercially known as saddlery or riding-bridle hardware, 50 per cent ad valorem.

In other words, harness hardware will then carry a rate of duty of 35 per cent, and saddlery or riding-bridle hardware will carry a rate of 50 per cent ad valorem.

I will suggest to the Senator from Ohio that the bit and the buckles of such bridles as are used by the very wealthy in this country cost five, six, and sometimes twenty times more than all the remainder of the bridle put together. Those are luxuries pure and simple, and there ought to be a different rate provided for them than for harness hardware which is used not only for carriage harness, but for the farmers' harness and harness of all kinds.

Mr. POMERENE. Mr. President, may not the same thing be said of harness hardware? There is harness hardware that is used on the farm, and there is other harness hardware of such a luxurious character that only the very rich can afford it. I fail to see the distinction which the Senator from Utah seeks to draw.

Mr. SMOOT. There is, however, quite a distinction, I will say to the Senator. Imported saddlery, for instance—and the Finance Committee had samples of it before them at the hearings, which, I think, were attended by the minority members—is a luxury which can not be said, of course, of the ordinary harness used throughout the country.

Mr. POMERENE. Do I understand that under this principle it is proposed to make one rate for saddlery hardware and another rate for gold-mounted harness?

Mr. SMOOT. I do not know that I could say that, Mr. President.

Mr. POMERENE. But would not that be the effect under the amendment as it is now proposed?

Mr. WALSH of Montana. If the Senator from Utah will pardon me, I am in entire sympathy with the idea he has in mind of imposing a higher rate of duty upon what might be considered as luxuries, either in the way of harness or in the way of saddlery, but it does not seem to me that the amendment proposed by the Senator will accomplish the desired result, because, of course, the cowboy out West, whose livelihood is immediately connected with his saddle, would be obliged to pay, according to the division proposed by the Senator from Utah, the same high rate as the idle rich who ride for pleasure or for the reduction of obesity.

Mr. SMOOT. That is true, I will say to the Senator, and I shall now offer an amendment so as to take care of that situation. I will frankly say to the Senator from Ohio [Mr. POMERENE] that I had not thought of the point now suggested. I will propose a change so as to cover the suggestion. I shall offer an amendment to insert after the word "metal," in line 16, the words "not plated with gold or silver." Then it will be plain that common harness hardware will bear the lower rate.

Mr. POMERENE. How would the remainder of the amendment read, then, if that amendment be adopted?

Mr. SMOOT. Then it would read:

All articles of iron, steel, brass, composition, or other metal commonly or commercially known as saddlery or riding-bridle hardware, 50 per cent ad valorem.

Mr. POMERENE. No; the Senator is excepting from the first bracket all silver or gold plated harness. How are those going to be taxed?

Mr. SMOOT. If the harness is plated with gold or silver, then it will fall in the basket clause, which carries a rate of 50 per cent. So it will be exactly the same rate as we have it here.

Mr. POMERENE. I ask the Senator from Utah to read the amendment as it should be perfected.

Mr. WALSH of Montana. I suggest to the Senator from Utah that he insert the qualifying clause after the word "hardware," in line 17.

Mr. SMOOT. I am reminded that the hardware plated with gold or silver carries a duty of 60 per cent; so it would then fall in the higher bracket.

I move to strike out, on page 69, line 17, the words "saddlery or"; then the clause would read:

Saddlery and harness hardware: Buckles, rings, snaps, bits, swivels, and all other articles of iron, steel, brass, composition, or other metal not plated with gold or silver, commonly or commercially known as harness hardware, 35 per cent ad valorem.

Mr. WALSH of Montana. Let me inquire of the Senator——

Mr. SMOOT. Then, following that will be the clause—

All articles of iron, steel, brass, composition, or other metal, commonly or commercially known as saddlery or riding-bridle hardware, 50 per cent ad valorem.

Mr. WALSH of Montana. I do not think the Senator wants it in that way.

Mr. SMOOT. Certainly; that is correct.

Mr. WALSH of Montana. It seems to me that if the qualifying clause be put after the word "hardware" it will be complete, so that it would read thus:

Saddlery and harness hardware: Buckles, rings, snaps, bits, swivels, and all other articles of iron, steel, brass, composition, or other metal, commonly or commercially known as saddlery or harness hardware, not plated with gold or silver.

Mr. SMOOT. The words "not plated with gold or silver" ought to come in after the words "or other metal," so as to read "composition, or other metal, not plated with gold or silver." We want it to include all other metal not plated with gold or silver.

Mr. WALSH of Montana. I shall find no fault with that, except I remark that the other hardware which is plated with gold or silver is also known as saddlery or harness hardware. It is my purpose to strike out the words "saddlery or."

Mr. SMOOT. I am going to move to strike out the words "saddlery or."

Mr. WALSH of Montana. That would improve it.

Mr. SMOOT. So that the first bracket will then only apply to harness. Then, the next bracket will read:

All articles of iron or steel, brass, composition, or other metal, commonly or commercially known as saddlery or riding-bridle hardware, 50 per cent ad valorem.

Mr. WALSH of Montana. I do not think that will accomplish what the Senator desires. I think it should read exactly as it is except for the insertion after the word "metal," in line 16, or after the word "hardware," in line 17—and I think the latter is the more appropriate place for it—the words "not plated." Then it will be complete.

Mr. SMOOT. "Not plated with gold or silver."

Mr. WALSH of Montana. "Not plated with gold or silver"; yes.

Mr. SMOOT. That is what my amendment provides.

Mr. WALSH of Montana. I would not strike out anything; I would make that applicable to it all.

Mr. SMOOT. That would be all right if we covered it in the next paragraph.

Mr. WALSH of Montana. To which paragraph does the Senator refer?

Mr. SMOOT. I refer to the amendment that I am going to offer, to insert a semicolon and the following:

All articles of iron, steel, brass, composition, or other metal, not plated with gold or silver, commonly or commercially known as saddlery or riding-bridle hardware, 50 per cent ad valorem.

That will reach it.

Mr. WALSH of Montana. I do not see why the Senator wants to do that. It seems to me perfectly plain and simple that all we want to do is to put in the qualifying clause "not plated with gold or silver."

Mr. SMOOT. No; there have got to be two brackets.

Mr. WALSH of Montana. So there will be.

Mr. SMOOT. One will provide a duty of 35 per cent and the other of 50 per cent. The 50 per cent duty will be on what is commercially known as saddlery or riding-bridle hardware.

Mr. WALSH of Montana. Why not put it in this way?

Saddlery and harness hardware: Buckles, rings, snaps, bits, swivels, and all other articles of iron, steel, brass, composition, or other metal, commonly or commercially known as saddlery and harness hardware, not plated with gold or silver, 35 per cent ad valorem, and all articles in this paragraph named which are plated with gold or silver, 50 per cent.

Mr. SMOOT. We want another amendment to that, I will say to the Senator. We want to impose a duty of 50 per cent on "all articles of iron, steel, brass, composition, or other metal, not plated with gold or silver, commonly or commercially known as saddlery or riding-bridle hardware"; then insert a semicolon and the words:

all the foregoing, if plated with gold or silver, 60 per cent ad valorem.

Mr. WALSH of Montana. That is what I suggest; that is all right.

Mr. SMOOT. Now, I will read it to the Senator just as it will appear when all of the amendments are offered:

PAR. 345. Saddlery and harness hardware: Buckles, rings, snaps, bits, swivels, and all other articles of iron, steel, brass, composition or other metal, not plated with gold or silver, commonly or commercially known as saddlery or harness hardware, 35 per cent ad valorem.

Then follows:

All articles of iron, steel, brass, composition, or other metal, not plated with gold or silver, commonly or commercially known as saddlery, or riding bridle hardware, 50 per cent ad valorem.

Then follow that with the next bracket:

All the foregoing, if plated with gold or silver, 60 per cent ad valorem.

Mr. WALSH of Massachusetts. In other words, if a steel bit is to be used for harness it is to be taxed 35 per cent ad valorem, while if it is to be used for saddlery it is to be taxed 50 per cent ad valorem.

Mr. SMOOT. Yes.

Mr. WALSH of Massachusetts. Why does the Senator propose such a distinction?

Mr. SMOOT. Because the two are not the same.

Mr. WALSH of Massachusetts. It has been pointed out by a Senator from the West that the cowboy has as much use for a steel bit as the millionaire. Why should he pay more for the steel bit used for a saddle horse than for a steel bit that is used with harness?

Mr. SMOOT. There is quite a difference, I will say to the Senator, and it is just that kind of ware that we think can stand a higher rate of duty.

Mr. WALSH of Massachusetts. I am unable to see the difference between iron and steel bits that are used for saddlery and iron and steel bits that are used for harness.

Mr. SMOOT. I will say to the Senator that there is a great difference.

Mr. WALSH of Massachusetts. I wish the Senator would tell us what the difference is.

Mr. WALSH of Montana. I should like to hear from the Senator from Wyoming [Mr. KENDRICK] on that matter. He ought to be able to advise us quite definitely.

Mr. WALSH of Massachusetts. I should like to hear from him, too.

Mr. WALSH of Montana. I must confess that I can not see any reason. Here is one man. He is engaged in agriculture. He has a team of horses plowing, and he buys a harness, including a bridle. On that bridle there is a duty of 35 per cent. Another man is engaged in the stock business. He has to have a bridle that goes with a saddle, and he has to have a saddle, which, of course, would imply the use of some hardware. He pays 50 per cent.

Mr. SMOOT. Of course, the two bits are entirely different. One is the commonest kind of a bit; the other is a very costly one.

Mr. POMERENE. It may or may not be.

Mr. SMOOT. But it is.

Mr. KENDRICK. Mr. President, as I understand the Senator from Utah, the difference is in the type of the bit that is used, is it not?

Mr. SMOOT. It is.

Mr. KENDRICK. The Senator from Utah has attempted to show that the harness bit is what is known in the language of the harness man as a snaffle bit, and the bit that is used for horseback riding is what is known as a curb bit. Is that the distinction that the Senator draws?

Mr. SMOOT. That would be the distinction in the main, but, of course, the Senator knows that there is a great distinction in the quality of the bit.

Mr. SMITH. Mr. President, does not every riding bridle have the snaffle bit and the curb bit on the same bridle?

Mr. KENDRICK. According to my experience it is not customary to use both kinds of a bit on the same bridle.

Mr. SMOOT. I think the Senator would know, under this description, what kind of a bit it is:

Commonly or commercially known as saddlery or riding-bridle hardware—

"Riding-bridle hardware" is quite different from the bit that is upon the bridle of an ordinary farmer's harness.

Mr. SMITH. Mr. President, if the Senator from Utah will allow me, I do not think there is a man who is familiar with harness at all but that knows that the kind of bit that is used is dependent largely upon the nature of the animal you are going to drive.

On every farm, if you have a refractory animal, you have a curb bit. If you have one that is gentle, you would want a snaffle bit or a smooth bit. I do not believe there is a man in America who knows the kind of bit the individual uses by any terminology or any classification.

Mr. SMOOT. I can say to the Senator that we have had riding bridles before the committee where the bit would cost eight or ten times—yes; more than that—more than all the rest of the bridle put together.

Mr. SMITH. That would depend entirely upon the quality of material that the bit is made out of. You can get as cheap a curb bit as you can a snaffle bit or you can get a snaffle bit that is made out of ductile steel, that will cost you more than a curb bit will cost; and so far as the ter-

minology of a riding bridle is concerned, even that does not admit of strict classification.

Mr. KENDRICK. I think the Senator from South Carolina is quite right about that. As every horseman knows, the riding bit is sometimes used from necessity on driving horses, while the driving bit is occasionally used on riding horses; but the two are distinctly different in make and in type, and are readily differentiated because of the generally accepted and well-known employment of each.

Mr. SMOOT. Let us consider the practical side of it, and just what we are up against, and see if this is not the best wording that could be suggested. This is what the experts of the Tariff Commission tell us, and also the men who impose the duty upon these articles.

The only importations of this character of goods that amount to anything at all come from England. They are all a high type and class of goods. The Senator knows what the English saddle is. Generally, I think, they call them jockey saddles, do they not?

Mr. KENDRICK. They are known as English saddles.

Mr. SMOOT. They constitute the majority of those that come into this country. The bridles are of the highest type of workmanship, and they come in here and are purchased mostly by men who have not anything else to do but to spend their time in pleasure and riding around the polo grounds, I suppose, or going upon hikes to some summer resort, or around the city in the morning and through the parks; and the higher price they can pay for their saddles and for their bridles the better it will please them.

Mr. SMITH. Mr. President, if the Senator will allow me, that pertains entirely to the covering. So far as this is the metal schedule, the covering is what distinguishes between the English and the American make, and that pertains entirely to the upholstery and to the leather that is in the saddle.

Mr. SMOOT. These are the buckles that are on them, and the stirrups that are on them.

Mr. SMITH. Yes; I have had a good deal of experience along that line.

Mr. SMOOT. The only thing that we get in under this schedule is the buckles and the stirrups and the bits that come into this country, and they are imported mostly from England, and I think they can afford to pay 50 per cent.

Mr. SMITH. When it comes to the raw material, such as the stirrups and the buckles and the metal, I think the Senator from Utah would cover the matter entirely if he made the distinction between the plated and the unplated or just the simple metal; and, as the Senator from Montana intimated a moment ago, if he would put in that paragraph—

other metal commonly or commercially known as saddlery or harness hardware, not plated—

I think he would do justice all around, and then put in whatever per cent, in his judgment, is necessary for that plated ware.

Mr. SMOOT. That is just exactly what I am trying to do.

Mr. SMITH. No.

Mr. SMOOT. Yes.

Mr. SMITH. You had three; I think two are sufficient.

Mr. SMOOT. Let the Senator follow it, and then I will read it just exactly the way it will be when it is amended, if the Senate agrees to the amendment:

Saddlery and harness hardware: Buckles, rings, snaps, bits, swivels, and all other articles of iron, steel, brass, composition, or other metal not plated with gold or silver, commonly or commercially known as saddlery or harness ware, 35 per cent ad valorem.

Then:

All articles of iron, steel, brass, composition, or other metal not plated with gold or silver, commonly or commercially known as saddlery or riding-bridle hardware, 50 per cent ad valorem; all the foregoing, if plated with gold or silver, 60 per cent ad valorem.

Mr. SMITH. The second or the middle proposed amendment is the one that I do not believe the Senator can differentiate from the first; and you then have vitiated or made inoperative the first, for the reason that the higher duty will be put on because you can not differentiate between the articles. If the Senator wants to have a tax laid upon the idle rich, or those who desire to have these extra fine or plated-ware articles, if he will strike out that middle paragraph, where he tries to differentiate the saddle and riding-bridle buckles and metal parts, and make the distinction between the paragraph as it now stands at 35 per cent and plated ware at 50 per cent, he will cover all that he wants; or, if he desires—of course I do not—to put on a duty of 50 per cent, he would have a differentiation that would be practicable and workable; but to try to differentiate between a riding-bridle bit or a riding-bridle buckle and a working-bridle bit or a working-bridle buckle is something that not a man in the world can do.

Mr. KENDRICK. I am rather inclined to believe that the Senator from Utah has drawn the distinction as fine as it can be drawn by his amendment, because anyone passing upon it, such as the customs officer, I think would have no difficulty in determining from the general character of the bit what it was intended for.

Mr. SMOOT. Absolutely; and I want to impose 50 per cent duty upon that kind of merchandise. This is commonly or commercially known as saddlery or riding bridle hardware, and any examiner of the port of entry will know just as soon as he sees it that it is not for ordinary, common harness.

Mr. SMITH. How would you tell the difference?

Mr. KENDRICK. The Senator from South Carolina asks how you could tell the difference. I think the designation commonly used would govern.

Mr. SMITH. Mr. President, I do not like to sit here, since I have gotten into this, and do violence to ordinary intelligence, sit here and stultify myself, by an explanation that does not explain a thing to me, and I do not believe it does to the Senator from Wyoming either.

Here is a snaffle bit made in a certain style. You know that every completely equipped riding bridle has a snaffle bit and a curb bit. You use your snaffle on certain gaits of your horse and your curb on other gaits. Now, here come imported into this country a lot of snaffle bits. Can you tell whether the party that buys those snaffle bits is going to use them in the combination riding bridle or in the plow bridle? You know you can not do anything of the kind.

Mr. KENDRICK. The answer to the question is that not all of the bits are combination bits, as the Senator has suggested; not very many of them include both kinds of bits.

Mr. SMITH. But the Senator understands that when these bits come in they are not mounted. Of course, if they were on a riding bridle, with all the features of a riding bridle and already mounted, I would know that the snaffle bit was on a riding bridle; but when they come in unmounted, how do you know that they are going to be put on a plow bridle for a mule in the South or as a snaffle bit for somebody to use in conjunction with a curb bit in a riding bridle? You know you could not make the distinction.

Mr. KENDRICK. The Senator could very easily determine himself the one that is in most common use.

Mr. SMITH. Why, my dear sir, I will guarantee that 60 per cent of the ordinary commercial workaday bridles are snaffle bits, with all the marks of a snaffle bit of the style that you would use on a high-priced riding bridle.

Mr. KENDRICK. That means simply that the snaffle or smooth bit would be classed as a driving bit, and it would be passed upon by the customs officer in that way.

Mr. SMITH. On the other hand, a large per cent of them use the curb bit.

Mr. KENDRICK. That would be designated as a riding bridle without any question, and where both of them were employed you would assume, naturally—I would—that it was for riding purposes. It is sometimes necessary to use the riding or curb bit in driving unusually spirited horses.

Mr. SMITH. Very well. The Senator has admitted that the character of the bit largely depends on the character of the animal the man is using. Therefore you would tax the man who had to use a bit in the ordinary, workaday world the same as the man who rides the spirited horse for purposes of pleasure.

Mr. WALSH of Massachusetts. The first bracket deals with saddlery and harness hardware. The second bracket, which the Senator from Utah proposes to amend, deals with saddlery or riding hardware. I would like to ask if there is any difference between saddlery hardware in the first bracket and saddlery hardware in the second bracket?

Mr. SMITH. None at all.

The PRESIDENT pro tempore. The question is on agreeing to the amendment proposed by the Senator from Utah to the committee amendment, which the Secretary will state.

The ASSISTANT SECRETARY. The first amendment is, after the word "metal," on line 16, to insert the words "not plated with gold or silver."

The amendment was agreed to.

The ASSISTANT SECRETARY. The next amendment is, on page 69, at the end of line 18, after the words "ad valorem," to insert a semicolon and the following language:

All articles of iron, steel, brass, composition, or other metal, not plated with gold or silver, commonly or commercially known as saddlery or riding-bridle hardware, 50 per cent ad valorem; all the foregoing, if plated with gold or silver, 60 per cent ad valorem.

The PRESIDENT pro tempore. The question is on agreeing to the amendment as read by the Secretary.

The amendment was agreed to.

The PRESIDENT pro tempore. The next eight paragraphs have been considered, and the committee amendments have been agreed to.

Mr. McCUMBER. Paragraph 361, page 77, should be the next matter to be considered. That covers pliers, pincers, and nippers of all kinds.

Mr. JONES of New Mexico. Do I understand that the Senator from North Dakota desires to pass over paragraph 354?

Mr. McCUMBER. Yes; I am trying to get some information from the New York customhouse upon that subject which will be a little more up to date than the data we have now.

Mr. JONES of New Mexico. I shall not insist upon going ahead with those paragraphs, but it had been planned on our side to take them up to-night. I see no particular objection, however, to taking up the paragraph dealing with pliers and pincers and nippers if the Senator desires to do it. It is a comparatively simple proposition.

The PRESIDENT pro tempore. The Secretary will state the first amendment in paragraph 361.

The ASSISTANT SECRETARY. In paragraph 361, page 77, line 19, the committee proposes to strike out "25" and insert in lieu thereof "50," so as to read:

Pliers, pincers, and nippers of all kinds, finished or unfinished, 4 inches in length and under, 8 cents each; over 4 and not over 6 inches in length, 10 cents each; over 6 inches in length, 12 cents each; and in addition thereto on all of the foregoing 50 per cent ad valorem.

Mr. McCUMBER. I ask that that committee amendment be disagreed to, and then I will offer another amendment, which will strike out most of this paragraph.

The PRESIDENT pro tempore. The question is upon agreeing to the committee amendment.

The amendment was rejected.

Mr. McCUMBER. On behalf of the committee, I move the following amendment: On page 77, line 16, strike out all the matter after the word "unfinished" and the comma, down to and including the numerals "25," in line 19, and insert in lieu thereof "60."

Mr. JONES of New Mexico. So that it will read:

Plier, pincers, and nippers of all kinds, finished or unfinished, 60 per cent ad valorem.

Mr. McCUMBER. That is right.

Mr. POMERENE. May I ask the chairman of the committee a question? There are certain specific duties here.

Mr. McCUMBER. Those are included in the part I have asked to be stricken out.

Mr. POMERENE. I understand that; but converted into ad valorem duties, what percentages would they amount to?

Mr. McCUMBER. I could not tell offhand, but it would be considerably more than 60 per cent.

Mr. SMOOT. Some of them over 100 per cent.

Mr. McCUMBER. They amounted in some cases, as shown by the Reynolds report, to 146 per cent; others to 79 per cent.

Mr. JONES of New Mexico. Mr. President, I do not believe that we ought to take it for granted that because the committee now recommends much lower duties we should accept the rate which is now proposed. The proposed rate is 100 per cent higher than the rate in the present law. These articles are tools used on every farm and around practically every home in the land. There is not a man who owns an automobile or a bicycle or a tricycle or a wheelbarrow or who has a wire fence but uses these tools. They are universal in their use; and while the committee does propose to make a considerable reduction from the rate they originally presented, yet the modified rate, as I have said, is 100 per cent higher than the rate in the existing law, and the facts surrounding the industry, to my mind, do not seem to warrant any duty, so far as competition is concerned.

Just listen to the facts of the case. These tools, of course, are made by machinery. They are made out of steel, and the steel industry of the United States is able to cope with the steel industry of the world on equal terms, and the report of the industry certainly demonstrates that.

Regarding production, according to the official report, there are 32 firms manufacturing pliers and 16 firms making pincers, but no official figures of output are available. The value of the domestic production has been estimated at from two million to three million dollars for 1914 and eight million to ten million dollars for 1918. As to the imports, in 1914 the imports of nippers and pliers of all kinds amounted to $144,818.

Mr. POMERENE. What was the rate at that time?

Mr. JONES of New Mexico. Thirty per cent. The rate in the present law is 30 per cent ad valorem. As compared with a domestic production of two or three million dollars worth, the imports were only $144,818 in the year 1914. The committee now proposes to increase the duty 100 per cent without further facts.

This is certainly a reckless procedure. How can it be justified? Thirty per cent ad valorem is a heavy tax. When you realize that that 30 per cent includes every element of labor, every element of material, and all of the profits and expenses of the foreign producer, and then that the article comes into the United States, the duty is added and the importer adds his overhead and profits based upon the landing costs, including the duty. Unless some industry suffers, it seems to me that this can not be excused.

Mr. SMITH. If the Senator will allow me, in view of the fact that under the 30 per cent rate there was still a negligible importation; in view of the further statistics given here of the vast amount produced in this country, how can this be justified? I call the attention of Senators to the fact that with the additional use of machinery on the farms of this country, to say nothing of the automobiles, and the rapid increase of their use amongst both the rural and the urban population, these little instruments are of universal use. There is not a farmer to-day in America but who, for the proper care of his fences, which, now that our timber has become so scarce, are mostly of wire, needs them. He needs them for his ordinary farm machinery.

There is not a common, humble little instrument that is more needed by him than these pliers, with the cutting jaws, and the pincers that are provided for here. I do not believe there is a single instrument that is as universally needed by every class of people; and with the showing found here, that with a 30 per cent duty there were practically no importations, what is the reason now why it should be raised to 60 per cent? It is beyond my comprehension. I could understand why, if there was some industry jeopardized, and it were struggling for development, and this was not a universally, imperatively necessary article, that such a duty from the standpoint of the Republicans might be justified; but there is not a man to-day in farm, field, forest, or factory but must have these humble instruments. You can not manipulate the wire and the machinery necessary for your work without these instruments. Yet, in the face of the fact that there were no importations under the 30 per cent rate, and a marvelous increase of production in this country, we now raise it 100 per cent, or to 60 per cent.

Mr. McLEAN. Mr. President, I think perhaps Senators on the other side of the Chamber would like to listen to some of the reasons that I think may legitimately be urged in favor of the rate.

Mr. JONES of New Mexico. I shall be very glad to hear them.

Mr. McLEAN. There are more than 20 concerns in the country which manufacture these articles and they are located in Pennsylvania, Connecticut, Missouri, Illinois, New York, New Jersey, and Massachusetts. They filed a statement which was presented to the Ways and Means Committee of the House.

Mr. SMITH. How many concerns did the Senator say?

Mr. McLEAN. I think there are upward of 20.

Mr. SMITH. The tariff summary of information says there are 32.

Mr. McLEAN. Then I did not exaggerate with regard to the number. The competition is very keen. The statement says that—

Pliers are being laid down in New York from Sweden and offered for sale, the 6-inch button pliers at $4.82½ per dozen, duty paid. We submit an itemized sworn statement of our cost of production on our corresponding style, 6-inch, of $9.88 per dozen. The long chain nose type of pliers are being offered for sale in the 5½-inch size at $6.12½ per dozen, duty paid. We submit a sworn statement of our cost of production on the corresponding style, 5½-inch, $10.57 per dozen. These are merely a few of the items we have been able to check and verify satisfactorily.

They also submit a statement with regard to importations recently received from Germany in which they say that—

These are samples of goods offered for sale in the United States, duty paid, f. o. b. New York City, including packing charges, by Paul Adolph, importer, 400 West Twenty-third Street, New York City, on dates of January 26, 1921, and February 2, 1921. Plier marked "A" was quoted by above concern on above terms at $1.20 per dozen. Plier marked "B" was quoted by above concern on above terms at $3 per dozen.

Mr. Fichthorn, president of Peck, Stow & Wilcox Co., of Southington, Conn., testified before the committee as follows:

I have carefully studied pliers to be submitted to the Ways and Means Committee, marked "A" and "B." I wish to state that a plier similar to the imported plier marked "A" made in our factory marked "P. A." costs us to make $3.21 per dozen, without any addition for profit. We also submit sample marked "P. B.," which is the nearest style we make to imported plier "B" and which costs us to make on the above basis $6.05 per dozen.

There is given on that same page a statement of the cost price of these articles in this country and the imported selling price at New York. German plier A is $1.20 per dozen f. o. b. New York, and in this country the production costs are $3.21 per dozen. On the next plier the imported cost is $1.20 per dozen

f. o. b. New York and $3.46 in this country. The next is $1.20 in New York, imported price, and the domestic price is $3.61. The next is $1.20 imported price, while the domestic price is $6.05. The next is $3 imported price, and the domestic price is $5.79. The next is $3 imported price and the American price is $6.88.

Mr. President, of course, if this statement is correct, the manufacturers of these articles are entitled to much more than 50 per cent ad valorem. They are also entitled to a specific duty which we have not given them, and I think it is a mistake to refuse it. I think they are clearly entitled to it. I think the Reynolds report will sustain my contention that the manufacturers of these articles are entitled to a specific duty in addition to the 50 per cent ad valorem. The House gave a specific duty in addition to the ad valorem duty.

Mr. SMITH. I do not know, of course, just what may be the condition, or what were the samples submitted, but under all the previous manufactures in this country and importations there has been no appreciable importation into the country of these articles, as read by the Senator. I can not understand why we want to add 100 per cent to a duty which, up to the present time, has amply protected, or at least has caused the development of the article and an expansion of the business.

The Senator said there were some 28 or 30 concerns, and that there is the keenest kind of competition. I doubt very much if there is in America any standardized article of manufacture that has any competition to speak of at all. Some time ago I had occasion to price a reaper and binder. There were three classes of those reapers and binders. I asked the dealer the price of the particular kind I wanted. He quoted the price, and I said, "All right, I will take it." He said, "Oh, I can not sell you that reaper and binder." I asked him why. He said, "Your farm is in the territory of another man." I asked him, "Does the same concern make these?" He said, "I do not think they do, but that territory belongs to another man."

In making up a tariff bill it might appear that we have a dozen firms making reapers and binders, but when we get under the surface it will be found that they have an understanding as to price and the parceling out of territory so that the man who purchases is going to pay an agreed price. They have no written agreement, and there is no overt act that would make them liable to the operation of the Sherman antitrust law; but they have a gentlemen's agreement among themselves as binding and effective as though entered into through articles of incorporation.

The Senator from Connecticut knows that with all the numerous and varied shoe manufacturers in the country it is rather a remarkable fact that on a certain given quality and style of shoe the price is practically uniform. We have divided our territory and standardized the manufacturing processes so that in America we have practically no competition. On an article such as this, to say that we have 30 or 35 firms making it, is to say that we have 30 or 35 firms with an understanding, and the territory parceled out and the prices uniform and under one control. I will gurantee that we can take these nippers and pliers, and I do not care what firm makes them, we will find the price to the consumer is uniform, and that one character of pliers dominates a given territory and we can not buy another kind of another quality from any factory within that territory.

If the evidence such as this presented to-night has proven that under a living rate of duty, 30 per cent, the business has prospered, and has prospered because of the unprecedented demand for this little humble implement that every man must use in every kind of business, I do not think that a duty such as is contemplated is justifiable. If it were an article that might be taken or left, it would be a different proposition; but I really think that the committee, rather than take the testimony of those who produced the articles, should consult those who are bound, under the conditions existing, to use them.

Mr. McCUMBER. Mr. President, I do not pretend to know anything about whether all these 32 companies sell their product for the same price; neither do I know whether they are all producing the same kind of pliers. I have an idea that they produce very many different kinds and sell them at very many different prices. I simply know that so far as I could tell in buying at retail there is a vast difference in the price at which one retail store will sell an article and the price at which some other retail store will sell the same article.

I think the statistics themselves will show the necessity of the duty that is requested in the bill. Prior to 1913 we had a duty which amounted to about 60 per cent. It was a compound duty, but in 1910 it was 60.63; in 1911 it was 59.74 per cent; the next year 56.65; the next year 56.77.

The equivalent was about 60 per cent. Then came nine months of the present Underwood tariff law before the war broke out, and, while under the 60 per cent we were importing between $67,000, the lowest, and $81,000, the highest, we immediately jumped in nine months from $76,000 to $144,000 worth. Then came the war and this immense growth was suddenly checked, but when the war ceased those countries again began making pliers. While Germany is probably the most expert of all the nations in making them cheaply, they are nevertheless imported from a great many different countries into the United States.

I call attention to the fact that in 1918, which, of course, was a year of the war, we only imported $10,000 worth. In 1919, after the war closed, we imported $40,000. In 1920 the imports jumped to $194,000, and for the first nine months of 1921 to $226,000, and at that rate the imports in a year would amount to $266,000. That shows the very rapid increase and shows that all of those countries can produce and now supply the American market. We have perhaps more information and more definite information upon this subject than any other of those covered in the metal schedule.

I wish to take a few of the items from the Reynolds report. Here is one invoice of 4-inch pliers. They come from Germany and are sold there at $1 per dozen—not the little 10-cent plier which is bought in a 10-cent store and which breaks the first time it is used, but a good plier and of excellent value. It is produced and sold in Germany for $1 a dozen. It costs 13 cents a dozen to land it. It is sold in this country for $3.60 a dozen. The comparable American article, which is sold for $10.05 a dozen wholesale, is certainly a good article and probably retails in the stores for not less than from $1.50 to $2 apiece. Now, if we were to impose a compensatory duty to measure the difference between the selling price of the two, it would require over 600 per cent duty.

I will take an invoice from France. Here is a 4 to 6 inch plier from France. The regular price in France is $2.18 a dozen. It costs 43 cents to land it. It is sold for $9.70 a dozen as against the American product which is sold for $9.85 a dozen. It would take more than 150 per cent to equalize the difference between the French article and the American article, while in this case we have given but 60 per cent.

Here are two invoices of pliers from 4 to 6 inches imported from Sweden. They come in at $4.33 per dozen invoice price; there is a 43-cent landing charge. They are sold for $9.70 a dozen, as against $9.84 for the comparable American article. Fifty-four per cent duty is necessary in that case.

Next I take four invoices of pliers, measuring from 6 to 8 inches, coming from Germany. They come in at $2.60 a dozen, with a 28-cent landing cost, and are sold at $7.01, as against $8.69 for the comparable American product. It would require 140 per cent to equalize the two.

In the next a plier from 6 to 8 inches, manufactured in France, comes in at $4.96; the landing charges are 25 cents per dozen; it is sold for $10.50, as against the American article, which is sold for $11.75. It would take 73 per cent to equalize those two.

In every one of these instances with the exception of one item—and I think there are seven or eight of them that are reported—it will require more than 60 per cent ad valorem to equalize the difference. That, taken in connection with the fact that importations are now enormously increased, justifies the committee in recommending a duty of at last 60 per cent ad valorem. This is less than one-half, I think, of what the House recommended.

Mr. JONES of New Mexico. Mr. President, I understand that the statistics which the Senator from North Dakota has just read are based upon the Reynolds report?

Mr. McCUMBER. The last figures which I read were based upon the Reynolds report, while some of the figures quoted by me as to the importations, and so forth, were taken from other reports.

Mr. JONES of New Mexico. Mr. President, the Senator from Connecticut [Mr. McLEAN], in presenting to us the evidence which was taken before the Ways and Means Committee of the other House, disclosed a situation which, without more careful examination, would lead the mind to reach the conclusion that the rate suggested here by the committee is very moderate. That is likewise true of the statistics just read to us by the Senator from North Dakota. I call attention to the fact that all of the estimates made in the evidence taken before the Ways and Means Committee are based upon certain importations from Germany in January and February, 1921.

The statistics given us by the Senator from North Dakota are based upon prices of August, 1921. I have not, of course, had an opportunity to examine the Reynolds report as to the comparability of the items embraced in that report. The gatherers of that information frequently made allowances either in cost or in the prices which, in their judgment, would make the articles comparable. I do not mean to state with assurance that that is the case regarding pliers, but anybody who has used pliers knows that "there are pliers and pliers." They may have precisely the same appearance; they may be of the same size, but one article may be worth two, three, or more times as much as the other, and from the mere fact of size only we can not determine the worth. However, even in that case we find that the great discrepancies are based upon some purchases from Germany.

I do not intend at this hour to take up the question of the situation in Germany, but I do purpose to do so when we come to a discussion of the paragraphs passed over to-night. I want to call attention, however, to the fact that the situation in Germany to-day is almost as different from the situation there 12 months ago as day is from night. There are considerable data and information upon the subject, but I am simply going to call attention to a commerce report compiled by the United States Department of Commerce, dated June 5, 1922, the latest publication from that department.

I wish to call attention to sufficient data to indicate the remarkable change in conditions in Germany and the rapidity of those changes. For instance, the pre-war price of steel ingots, which are used in making pliers, nippers, and pincers, was 82.5 marks, while on October 20, 1921, the price of those ingots was 2,435 marks, and from October 20, 1921, to April, 1922, those ingots had increased in price, expressed in marks, from 2,435 to 7,170. Taking the current exchange rate to-day, ingots in Germany are selling 30 per cent higher than they were in 1913. Not only has the purchasing power of the mark kept pace with the depreciation in exchange, but it has gone beyond, until in marks, at the existing low rate of exchange, steel ingots in Germany were selling in April of this year at 30 per cent higher than in 1913; and, mind you, almost two-thirds of that increase has been added since October, 1921, the prices quoted by the Senator from North Dakota being those of August, 1921.

Blooms: The pre-war price was 87½ marks; October 20, 1921, 2,655 marks; April 1, 1922, 7,775 marks, or 33 per cent higher than in 1913, after allowing for this enormous and precipitous decrease in the rate of exchange.

Likewise, sheet bars have increased from a pre-war price of 97½ marks to 2,725 marks October 20, 1921, to 8,200 marks April 1, 1922, an increase in sheet bars of 26 per cent above the pre-war price after making all allowances for exchange.

The same thing may be said of billets, shapes, merchant bars, hoop iron, wire rods, thin sheets, medium sheets, heavy sheets, these last having increased, the medium sheets 65 per cent above the pre-war price and the heavy sheets 52 per cent.

Not only that, Mr. President, that being one of the principal materials, in fact, the only material, entering into the production of these articles, except fuel, let us examine the fuel situation.

At the end of 1913 pit coal, bituminous coal, was selling at 12 marks per ton; in February, 1922, for 468 marks. This statement gives the quotations of coal up to September, 1922, sales for the future; and from February, 1922, from 468 marks, it is selling for September delivery at 907½ marks. That is coal which cost 12 marks in 1913, and so on with the various grades of coal. Moreover, the difficulty in getting coal and the quality of the coal all make for expensive product in the steel industry.

Mr. President, I do not know what comparisons were actually made, but I do know that since August, 1921, the entire situation has changed. Moreover, when those sales were made the contracts may have been made some months prior; exchange may have been purchased at the higher prices; but when the delivery came around, under the law they had to give the price of the exchange as of that date, which had decreased enormously.

In the face of these facts, which must have been known, to-night when we take up this paragraph we are solemnly confronted with testimony based upon German prices in January and February, 1921, and then again, in a still more solemn manner, with more exhaustive figures based upon prices in August, 1921, when everything has changed; and upon such a basis as that we undertake to legislate.

When the Tariff Commission itself says that we make this extraordinary production in value, it further adds that while the exports are not known with exactitude, yet we have been exporting for a number of years these very articles, and it estimates them to amount to 2½ per cent of the American production.

Mr. McLEAN. Mr. President——

Mr. JONES of New Mexico. I gladly yield to the Senator from Connecticut.

Mr. McLEAN. I simply wish to call the Senator's attention to the fact that the labor costs in these articles run from 60 to 90 per cent. I notice that the Senator, in discussing the price of the steel and coal, did not mention that fact in connection with the cost of these articles.

Mr. JONES of New Mexico. What did the Senator say was the labor cost?

Mr. McLEAN. Sixty to ninety per cent.

Mr. JONES of New Mexico. Of these pliers?

Mr. McLEAN. That is my information.

Mr. JONES of New Mexico. I think the Senator must be mistaken. They are made by machinery.

Mr. McCUMBER. Mr. President, will the Senator let me read just a small paragraph from the Tariff Information Surveys?

Mr. JONES of New Mexico. I shall be glad to listen to it.

Mr. McCUMBER (reading):

> In the manufacture of drop-forged nippers, pliers, and pincers, labor costs are relatively important, and raw material costs relatively unimportant. Labor-saving machinery is used, but the operations are not automatic, many of them requiring handling by skilled mechanics. The steel used in making an ordinary drop-forged 8-inch plier represents less than 10 per cent of the total cost of the tool.

Mr. JONES of New Mexico. Of course, we know that labor cost does amount to a considerable proportion of it.

Mr. McCUMBER. Ninety per cent, there.

Mr. JONES of New Mexico. Now, just let me read to the Senator the change in regard to the labor cost in Germany.

We have at different times presented to the Senate statements regarding increases in wages, and I do not propose to repeat those figures to-night; but we have presented here at different times the statements of increases amounting to 20 and 30 per per cent a month, one month following another, and I just want to present some figures which will show the increased cost of living in Germany, how rapidly that is increasing, and it is forcing wages higher and higher.

Using the index figures, taking 100 as the base in 1920, we find that in October, 1921, that had risen to 184; in November to 249; in December to 303; in January, 1922, to 320; in February, 352; in March, 435; in April, 525. So in those short months during the year 1921, and four months in 1922, the cost of living in Germany had increased more than five times over the average cost of living in 1920, and it is increasing by leaps and bounds every month; and that is all based upon the varying rates of exchange. Mr. President, it seems to me that this is no time to raise taxes 100 per cent to cover such a situation as that.

Something has been said as to the amount of importations. Granting the very largest figures which have been given, they are negligible compared with the production of this country. This situation in Germany at the present time is temporary. If you are going to legislate regarding the conditions indicated by the figures presented here by the Senator from Connecticut and the Senator from North Dakota, you do not begin to touch the problem. As business men, I ask you if this is the way to solve this problem? If you were meeting it as business men, would you apply this sort of a remedy? By imposing these duties upon pliers and pincers you apply the duty not only to Germany but to France, to England, to Sweden, and to all countries alike. Their costs of production, according to the statement, are wide apart. If you want to deal with that problem why not use your intellect and see if you can not find some remedy that better meets the situation than raising this tax rate?

I might suggest something for you to consider. If it is the purpose to try to fix prices in this country, to maintain present prices, or to maintain prices at a fixed standard above the pre-war prices, why not say so? Why not say that the tariff, this tax, shall be the difference between the present prices in this country and the prices of the foreign articles? Why not say that? If you want to establish some stable price, why not say that we will take the pre-war price, increased 25 or 50 per cent, and make the duty the difference between that and the selling price of the foreign article? In other words, why apply a remedy which does not meet the situation?

Is it possible that in the confused state of mind you simply do this thing because you do not know what else to do? In all seriousness, I ask that you consider some other plan. Do not apply this remedy, which does not meet the situation. Do not give this dose of medicine, because it is not called for by the diagnosis of the case.

I move to strike out "60" and insert "30," and upon that I ask for the yeas and nays.

The yeas and nays were ordered, and the Assistant Secretary proceeded to call the roll.

Mr. COLT (when his name was called). Making the same announcement as before, I vote "nay."

Mr. EDGE (when his name was called). Making the same announcement as to my pair and its transfer, I vote "nay."

Mr. HALE (when his name was called). Making the same announcement as before, I vote "nay."

Mr. JONES of New Mexico (when his name was called). I transfer my general pair with the Senator from Maine [Mr. FERNALD] to the Senator from Georgia [Mr. WATSON] and vote "yea."

Mr. JONES of Washington (when his name was called). Making the same announcement as before with reference to my pair and its transfer, I vote "nay."

Mr. KELLOGG (when his name was called). Making the same announcement as before with reference to my pair and its transfer, I vote "nay."

Mr. POMERENE (when his name was called). I have announced my temporary pair with my colleague [Mr. WILLIS]. I transfer that pair to the senior Senator from Nebraska [Mr. HITCHCOCK] and vote "yea."

Mr. SUTHERLAND (when his name was called). Making the same announcement as on the previous vote with reference to my pair and its transfer, I vote "nay."

Mr. UNDERWOOD (when his name was called). I transfer my general pair with the senior Senator from Massachusetts [Mr. LODGE] to the Senator from Rhode Island [Mr. GERRY] and vote "yea."

Mr. WATSON of Indiana (when his name was called). Making the same announcement as on the last roll call, I vote "nay."

The roll call was concluded.

Mr. BALL. Transferring my general pair with the senior Senator from Florida [Mr. FLETCHER] to the junior Senator from South Dakota [Mr. NORBECK], I vote "nay."

Mr. GLASS. I transfer my general pair with the Senator from Vermont [Mr. DILLINGHAM] to the Senator from Nevada [Mr. PITTMAN] and vote "yea."

Mr. HARRISON. Making the same announcement as before, I vote "yea."

Mr. STANLEY. I transfer my general pair with the junior Senator from Kentucky [Mr. ERNST] to the senior Senator from Missouri [Mr. REED] and vote "yea."

Mr. FRELINGHUYSEN (after having voted in the negative). I observe the absence of my general pair [Mr. WALSH of Montana] from the Chamber. I therefore transfer my pair to the junior Senator from New Hampshire [Mr. KEYES] and allow my vote to stand.

Mr. CURTIS. I desire to announce that the Senator from Indiana [Mr. NEW] is paired with the Senator from Tennessee [Mr. MCKELLAR].

The result was announced—yeas 17, nays 37, as follows:

YEAS—17.

Caraway	Heflin	Pomerene	Underwood
Dial	Jones, N. Mex.	Ransdell	Walsh, Mass.
Glass	King	Sheppard	
Harris	La Follette	Smith	
Harrison	Overman	Stanley	

NAYS—37.

Ball	France	McLean	Smoot
Brandegee	Frelinghuysen	McNary	Spencer
Bursum	Gooding	Newberry	Sterling
Calder	Hale	Nicholson	Sutherland
Cameron	Jones, Wash.	Oddie	Townsend
Capper	Kellogg	Pepper	Warren
Colt	Ladd	Phipps	Watson, Ind.
Cummins	Lenroot	Poindexter	
Curtis	McCormick	Rawson	
Edge	McCumber	Shortridge	

NOT VOTING—42.

Ashurst	Gerry	Nelson	Stanfield
Borah	Harreld	New	Swanson
Broussard	Hitchcock	Norbeck	Trammell
Crow	Johnson	Norris	Wadsworth
Culberson	Kendrick	Owen	Walsh, Mont.
Dillingham	Keyes	Page	Watson, Ga.
du Pont	Lodge	Pittman	Weller
Elkins	McKellar	Reed	Williams
Ernst	McKinley	Robinson	Willis
Fernald	Moses	Shields	
Fletcher	Myers	Simmons	

So the amendment of Mr. JONES of New Mexico to the committee amendment was rejected.

The PRESIDENT pro tempore. The question is now upon agreeing to the amendment proposed by the committee.

Mr. JONES of Mexico. I ask for the yeas and nays.

The yeas and nays were ordered, and the Assistant Secretary proceeded to call the roll.

Mr. COLT (when his name was called). Making the same announcement as before, I vote "yea."

Mr. EDGE (when his name was called). Making the same announcement as before, I vote "yea."

Mr. FRELINGHUYSEN (when his name was called). Making the same announcement as before, I vote "yea."

Mr. GLASS (when his name was called). Making the same announcement as before, I vote "nay."

Mr. HALE (when his name was called). Making the same announcement as before, I vote "yea."

Mr. HARRISON (when his name was called). Making the same announcement as before, I vote "nay."

Mr. JONES of New Mexico (when his name was called). Making the same announcement as on the previous vote regarding my pair and its transfer, I vote "nay."

Mr. JONES of Washington (when his name was called). Making the same announcement as before with reference to my pair and its transfer, I vote "yea."

Mr. KELLOGG (when his name was called). Making the same announcement as before with reference to my pair and transfer, I vote "yea."

Mr. POMERENE (when his name was called). I transfer my pair with my colleague [Mr. WILLIS] to the senior Senator from Nebraska [Mr. HITCHCOCK], and vote "nay."

Mr. STANLEY (when his name was called). Making the same announcement as before, I vote "nay."

Mr. SUTHERLAND (when his name was called). Making the same announcement as before with reference to my pair and transfer, I vote "yea."

Mr. UNDERWOOD (when his name was called). I transfer my general pair with the senior Senator from Massachusetts [Mr. LODGE] to the junior Senator from Rhode Island [Mr. GERRY] and vote "nay."

Mr. WATSON of Indiana (when his name was called). Making the same announcement as on the last roll call, I vote "yea."

The roll call was concluded.

Mr. CARAWAY (after having voted in the negative). I transfer my pair with the junior Senator from Illinois [Mr. MCKINLEY] to the senior Senator from Arizona [Mr. ASHURST] and allow my vote to stand.

Mr. BALL. I transfer my general pair with the senior Senator from Florida [Mr. FLETCHER] to my colleague [Mr. DU PONT] and vote "yea."

Mr. WARREN (after having voted in the affirmative). I learn that my standing pair, the Senator from North Carolina [Mr. OVERMAN], has not voted. I transfer my pair with that Senator to the junior Senator from New Hampshire [Mr. KEYES] and allow my vote to stand.

Mr. CURTIS. I desire to announce that the Senator from Indiana [Mr. NEW] is paired with the Senator from Tennessee [Mr. MCKELLAR].

The result was announced—yeas 36, nays 16, as follows:

YEAS—36.

Ball	Edge	McCumber	Rawson
Brandegee	France	McLean	Shortridge
Bursum	Frelinghuysen	McNary	Smoot
Calder	Gooding	Newberry	Spencer
Cameron	Hale	Nicholson	Sterling
Capper	Jones, Wash.	Oddie	Sutherland
Colt	Kellogg	Pepper	Townsend
Cummins	Lenroot	Phipps	Warren
Curtis	McCormick	Poindexter	Watson, Ind.

NAYS—16.

Caraway	Harrison	La Follette	Smith
Dial	Heflin	Pomerene	Stanley
Glass	Jones, N. Mex.	Ransdell	Underwood
Harris	King	Sheppard	Walsh, Mass.

NOT VOTING—44.

Ashurst	Gerry	Myers	Shields
Borah	Harreld	Nelson	Simmons
Broussard	Hitchcock	New	Stanfield
Crow	Johnson	Norbeck	Swanson
Culberson	Kendrick	Norris	Trammell
Dillingham	Keyes	Overman	Wadsworth
du Pont	Ladd	Owen	Walsh, Mont.
Elkins	Lodge	Page	Watson, Ga.
Ernst	McKellar	Pittman	Weller
Fernald	McKinley	Reed	Williams
Fletcher	Moses	Robinson	Willis

So the amendment of the committee was agreed to.

Mr. MCCUMBER. On line 22 there is a little amendment of the committee which I wish to have acted on.

The PRESIDENT pro tempore. The amendment will be stated.

The ASSISTANT SECRETARY. On line 22, page 77, after the word "maker," insert the words "or purchaser."

The amendment was agreed to.

Mr. SMOOT. Mr. President, I desire to return to page 69, paragraph 345. I am informed by the Secretary that the

amendment in line 17, which I asked be disagreed to, was not acted upon by the Senate.

The PRESIDENT pro tempore. The amendment will be stated.

The ASSISTANT SECRETARY. On page 69, line 17, the committee proposes to strike out "35" and insert "55" before the words "per centum ad valorem."

The amendment was rejected.

Mr. SMOOT. I wish to ask also whether the amendment in line 17, to strike out the words "saddlery or," was acted on?

The PRESIDENT pro tempore. The Chair is informed that it was not.

Mr. SMOOT. I ask that it may be agreed to.

The PRESIDENT pro tempore. The amendment will be stated.

The ASSISTANT SECRETARY. On page 69, line 17, it is proposed to strike out the words "saddlery or" as printed in the House text.

The amendment was agreed to.

EXECUTIVE SESSION.

Mr. CURTIS. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to; and the Senate proceeded to the consideration of executive business. After five minutes spent in executive session, the doors were reopened, and (at 10 o'clock and 10 minutes p. m.) the Senate, under the order previously made, took a recess until to-morrow, Wednesday, June 7, 1922, at 11 o'clock a. m.

NOMINATIONS.

Executive nominations received by the Senate June 6 (legislative day of April 20), 1922.

COLLECTOR OF INTERNAL REVENUE.

David C. Bennington, of Oklahoma City, Okla., to be collector of internal revenue for the district of Oklahoma in place of Acel C. Alexander, resigned.

UNITED STATES MARSHAL.

Joseph W. Tolbert, of South Carolina, to be United States marshal, western district of South Carolina, vice C. J. Lyon, removed.

APPOINTMENT IN THE REGULAR ARMY.

GENERAL OFFICER.

Col. Samson Lane Faison, Infantry, to be brigadier general from June 5, 1922, vice Brig. Gen. William Hampden Sage, who died June 4, 1922.

PROMOTIONS IN THE REGULAR ARMY.

MEDICAL CORPS.

To be captains.

First Lieut. Henry Stevens Blesse, Medical Corps, from May 25, 1922.

First Lieut. Alberto Garcia de Quevedo, Medical Corps, from May 27, 1922.

CHAPLAIN.

Chaplain Albert Kingsbury Mathews to be chaplain, with the rank of captain, from May 28, 1922.

APPOINTMENT BY TRANSFER IN THE REGULAR ARMY.

CAVALRY.

Capt. Milton Humes Patton, Infantry, with rank from July 1, 1920.

PROMOTIONS IN THE NAVY.

The following-named midshipmen to be ensigns in the Navy from the 3d day of June, 1922:

Chauncey Moore.
Edwin E. Woods.
Robert McC. Peacher.
Halstead S. Covington.
Henry E. Eccles.

CONFIRMATIONS.

Executive nominations confirmed by the Senate June 6 (legislative day of April 20), 1922.

COLLECTOR OF CUSTOMS.

Jennie P. Musser to be collector of customs, district No. 48, Salt Lake City, Utah.

APPRAISER OF MERCHANDISE.

W. O. Jackson to be appraiser of merchandise, district No. 41, Cincinnati, Ohio.

UNITED STATES ATTORNEY.

Lewis P. Summers to be United States attorney, western district of Virginia.

UNITED STATES MARSHALS.

Thomas J. Kennamer to be United States marshal, northern district of Alabama.

George L. Mallory to be United States marshal, eastern district of Arkansas.

POSTMASTERS.

COLORADO.

Thomas E. Downey, Ordway.

CONNECTICUT.

Francis W. Chaffee, jr., Eagleville.
Walfred C. Carlson, Washington Depot.

INDIANA.

George H. Thomas, Fortville.

IOWA.

Gust A. Hall, Colo.
Henry L. Shaffer, Crawfordsville.
John Geiger, Minden.

NEBRASKA.

William H. Willis, Bridgeport.
Marie A. Lybolt, Brunswick.
Herbert M. Hanson, Clay Center.

UTAH.

Clark Allred, Delta.

HOUSE OF REPRESENTATIVES.

TUESDAY, *June 6, 1922.*

The House met at 12 o'clock noon.

The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

Holy Spirit, every day is the Lord's day, for mercy is the eternal pursuit of the Father of us all. Therefore in the spirit of humility and expectation we approach Thee, and may we utter our supreme desires. Give us the support of Thy hand that can crush a mountain and yet would not hurt a little child. Regard our fraternal interest in one another. We commend unto Thee those who lead our thought, our national affairs, and sit in authority. Through Christ. Amen.

The Journal of the proceedings of yesterday was read and approved.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Craven, its Chief Clerk, announced that the Senate had agreed to the amendment of the House of Representatives to the bill (S. 2775) to extend for one year the powers of the War Finance Corporation to make advances under the provisions of the act entitled "An act to amend the War Finance Corporation act, approved April 5, 1918, as amended, to provide relief for producers of and dealers in agricultural products, and for other purposes," approved August 24, 1921.

The message also announced that pursuant to the provisions of the sundry civil act, approved March 4, 1921, the Vice President had appointed Mr. FRANCE, Mr. PEPPER, and Mr. PITTMAN as members of a committee on the part of the Senate to attend the dedication of the monument to Francis Scott Key at Fort McHenry, Baltimore, Md., on the afternoon of Wednesday, June 14, 1922.

THE AMERICAN FLAG.

Mr. HICKS. Mr. Speaker, I ask unanimous consent to address the House for four minutes.

The SPEAKER. The gentleman from New York asks unanimous consent to address the House for four minutes. Is there objection? [After a pause.] The Chair hears none.

Mr. HICKS. Mr. Speaker, on June 14, Flag Day, five years ago, the House was very generous in granting me an hour during which time I spoke of the history of the American flag. I had a number of copies of that speech printed in pamphlet form, and since then there has been quite a demand for this speech from various parts of the country, from Members of the Senate and Members of the House, averaging perhaps four or five a week. My own supply has now become exhausted, and realizing there is this demand for this speech, which covers the history of the flag in a somewhat complete way, it has occurred to several Members of the House that perhaps this speech should be made into a House document, and therefore in order that this may be accomplished and that Members of the House be given an opportunity to procure a copy of this flag speech on Flag Day I ask unanimous consent, Mr. Speaker,

that the speech on the American flag, delivered by myself on June 14, 1917, be published as a House document.

The SPEAKER. The gentleman from New York asks unanimous consent that the speech referred to be printed as a House document. Is there objection? [After a pause.] The Chair hears none.

EXTENSION OF REMARKS.

Mr. MURPHY. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by publishing a Memorial Day speech delivered by an ex-Member of this House, General Hollingsworth, an ex-Union soldier.

The SPEAKER. The gentleman from Ohio asks unanimous consent to extend his remarks in the RECORD in the manner indicated. Is there objection? [After a pause.] The Chair hears none.

MEMORIAL DAY SPEECH OF GENERAL HOLLINGSWORTH.

Mr. MURPHY. Mr. Speaker, under the leave granted to me to extend my remarks in the RECORD, I include an address delivered at Alliance, Ohio, on Memorial Day, 1922, by my predecessor, former Representative David Adams Hollingsworth, of Cadiz, Ohio.

The address is as follows:

[From Alliance Review, May 31, 1922.]

Soldiers, young and old, sons of veterans, and friends, comrades all: I am very glad to be with you on this occasion; glad of the opportunity of joining as a comrade with the soldiers and citizens of Alliance in the holy duties of this hour.

This is the day of all days in the patriotic calendar of America, and as the years go by its sacredness and significance are more and more manifest; its hold on the hearts and affections of the American people more and more fixed.

It is the common heritage of liberty-loving Americans, sacred to the memory of all true soldiers of the Republic, all who have by service or sacrifice in defense of Old Glory, now the proudest and most honored national emblem on earth, one never unfurled except as an inspiration to freedom and progress.

Memorial Day, as a day of remembrance and gratitude to the soldiery of the Republic, was appropriately instituted in a time of profound peace when the people felt secure in their liberties, after American armies had won imperishable honors on foreign and domestic battlefields, and after the final triumph of the Union cause at Appomattox in 1865, when the Confederate flag was furled forever, ending the greatest civil war in history.

The immortal words of General Grant, "Let us have peace," when as idol and hero of the victorious hosts at Appomattox he received the surrender of the Confederate Army, were most significant, and the words of his great rival, General Lee, idol of the Southland, added much to this significance when he at once turned to his devoted followers and said to them: "Boys, the war is over," and straightway advised them to disband peacefully and return to their homes and repair as speedily as possible the wastes of the war.

And when General Grant, out of the goodness of his heart, added to this suggestion, "Take your horses with you; you will need them in planting your crops," the war was effectually ended.

The words of each, admittedly sincere, betokened permanent peace for our beloved land and Nation. They were Americans, and there was no thought of guerilla warfare among the vanquished. Nor was there any need of a Versailles conference to discuss terms. The peace pact of Grant and Lee was an all-sufficient controlling force, North and South.

The time and the occasion were historic and a liberty-loving world felt that the effects would be world-wide and lasting. The future was roseate with hope and a just expectation of long years of peace, stilling forever, if possible, the wild warlike passions of men.

Humanity itself seemed to start anew on the upgrade.

But, unfortunately for civilization, the horoscope of the future was then, as it is now, to finite minds, an unsolved mystery. The dove of peace persists in soaring afar in the realms of uncertainty.

Many years of peace, however, followed Appomattox Day before Armistice Day, following the World War with its frightful record of death and devastation, came, bringing new promises of peace to a suffering world; and yet, despite the victory and the flight of the Kaiser, expected results at the Versailles peace conference were sadly disappointing, and the world to-day stands aghast at the possibilities of the future.

Unsolved world problems multiply, and notwithstanding the success of President Harding's recent peace conference at Washington doubt, uncertainty, and gloom seem to stagger our most experienced statesmen. They seem only to know with certainty that man proposes and God disposes. Justice and truth move slowly and with uncertain tread, which all men and nations must recognize in attempting any forward movements. Tragedy often marks the initiative of good results.

It required the firing on Fort Sumter in 1861 to thoroughly arouse the loyal Northland; Spanish inhumanity and cruelty in Cuba, notwithstanding American restiveness, continued until the blowing up of the *Maine;* and the fiendish sinking of the *Lusitania* was overlooked for a time before the United States entered the World War on the side of civilization and decency. Patient, thoughtful reasoning is a virtue of the strong, not of the weak.

High officials of the Government differed in the matter of preparedness for national defense before the President and Congress acted on the call to arms; educated military and naval experts differed on vital questions of public policy; and the people themselves were divided in sentiment as to whether or not the tragedy of the *Lusitania* called for an immediate declaration of war or justified further diplomatic letter writing; and even yet the question is discussed by would-be statesmen and military critics whether or not the President and Congress failed in duty when they chose to follow the examples set by the patient God-fearing Lincoln and McKinley in not rushing their fellow citizens into war under hasty proffered advice of hot-headed military enthusiasts, regardless of the actual preparedness of the Government to at once strike effectually the great blows it did soon afterwards for civilization and the peace of the world. Such war enthusiasts, if given leadership, might have wrecked American efficiency.

Doubts and misgivings exist even yet among the people as to results when they contemplate the uncertain results of the Versailles conference.

Many things for which our troops fought overseas seem blurred in the public mind or lost to sight in the mad saternalia of modern greed and profiteering. Many ideals of government for which American armies fought in the past seem to-day to be forgotten; distinctions between those who wore the blue and those who wore the gray have faded in fact; the blue and the khaki blend as age and youth mingle in patriotic endeavor to secure abiding world peace, and even the Hun and the Bolsheviki, judging from conditions and results at the Genoa conference, seem disposed to hide their identity as the monster terrors of the human race.

But, happily, the memorial exercises of to-day all over our broad land, in memory of the soldier dead of the Republic of all our wars, attest the fact that the great, loyal heart of America is still as steady and true in its appreciation of American ideals and the valor and sacrifices of those whose lives have been freely offered on its sacrificial altars, from Bunker Hill to Flanders Field, especially when, under the immortal Lincoln, hydra-headed treason first reared its horrid front in 1861, or in later years when the world's civilization was challenged by the autocracy of power and military rule.

There is no mistaking the intense, abiding, patriotic sentiment of real Americans. The immortal truths of liberty and justice, vindicated in every war of the Republic, are the sacred heritage of freemen and are as fixed and eternal as the stars.

God Himself has certainly had the American continent in His keeping for some wise purpose; an unseen hand so far seems to have guided our destiny just as we recently escaped the nets of foreign entanglement set at Versailles and Genoa, against which Washington warned his countrymen in his Farewell Address; and which same unseen guidance has since made of free America the polar star of hope for the burden bearers of the world.

But, comrades, soldiers and sons of soldiers, young and old, let us to-day attune our thoughts in harmony with the tender memories we hold sacred, of those who no longer answer to our annual roll calls.

The blue line wavers, and soon taps must be sounded for the last survivor of the Civil War.

Even those of later wars have no certainty of life; the white horse and his rider come unexpectedly.

A modern writer, apparently of some note for present-day political literature, recently expressed the thought, a fact which must be admitted, that the boys in blue are rapidly vanishing, and soon will have crossed the great divide; but he went on to suggest a fact, disputed and properly resented, that they will then be forgotten or their memories submerged and lost sight of in the sentiment and applause naturally given to a younger generation of American soldiers whose very numbers and more recent victories entitle them to great consideration, entitle them to the love and gratitude of every true-hearted American.

We of the older armies may and do doff our hats to the young khaki-clad lads of the World War, and join in welcoming them with applause to the just honors and fame they have won. It is nature's own order; the sire gives way to the son, but this good old world moves on in its destined course.

But a public writer, man or woman, who for political or less worthy purpose undertakes to discredit, or pretends to have forgotten, or is, in fact, ignorant of the history of Bunker Hill and Yorktown, of Jackson's victory at New Orleans, of Scott's and Taylor's triumphs in Mexico, and of the boys in blue from Fort Sumter to Appomattox, on nearly 2,000 battle fields of the Civil War, or of the Roosevelt heroes of San Juan Hill in the Spanish-American War, shows a density of ignorance wholly inexcusable of his country's history and of the loyal hearts and grateful memories of the American people.

The boys in blue are not forgotten, nor will they be so long as the Government they saved endures among men.

The battle of life for them is not ended. In reality, unlike our young comrades of the World War, they face to-day more dangerous conditions from age and natural causes than in the most critical hours of their army life, when health and youth and hope were with them.

Death as suddenly as from a cannon ball is not uncommon, and the stealthy age grip of 70 years, now on all, equals the most distressing shock of the Hun gases. They are, in truth, on the firing line all the time, or in the trenches unarmed and helpless against the grim reaper.

The average yearly fatality, based upon the number of survivors, is simply appalling. It rivals the deadliest moments of Pickett's charge at Gettysburg or the death struggles at Verdun or on the Marne in the World War.

It admonishes all who had part in the heroic scenes of the sixties that the inevitable end of life's campaign draws near. The majority is upon the other shore and only a shallow river divides. Soldierly courage, however, and manly character are as essential to good citizenship and as characteristic of worthy ex-soldiers now as in 1861–1865, or a half century later during the World War.

I have no patience with American citizens—men or women, young or old, in or out of official life, or seeking to get in through political influence—who look askance or otherwise slight the ex-soldiery of any of the wars of the Republic.

I have no sympathy with carping critics who begrudge or haggle over the small pensions and other allowances of the Government to its unfortunate defenders, their widows and orphans. Call it waste if you please in some instances where pension help is not actually needed, yet I would rather see such waste by the Government in favor of the men, selected or volunteering their lives in its defense, than in favor of ungodly profiteers who fatten upon the necessities of the Government in the hour of its greatest need, and this irrespective of which political party is in power.

I have no words of justification for any Congress in which "slow-up" orders seem effective as against proposed pension legislation and other helpful measures for worthy but unfortunate ex-soldiers, and in which "speed-up" orders are promptly obeyed for big standing armies and subsidized merchant-marine fleets not needed for the safety of the Republic in times of peace.

The old, largely monarchic, theory of preparing for war in time of peace, in the light of modern experiences has been proven to be a fallacy. The hair-trigger preparation of the South in 1861 and of the German Kaiser in later years are object lessons of value against enormous military preparation in times of peace, eating up the substance of a tax-ridden people when not actually needed for defense.

Outside of ordinary police service and the State militia this great Nation in time of peace may well trust as heretofore to a small-sized standing Army and a fair-sized Navy to protect its far-flung coast lines and other exposed points of attack, except in case of threatened

or actual war, when the swiftness of American preparation has been proven adequate to meet any emergency. Our mountains and our coast lines are of themselves a warning to treacherous enemies not to dare to attempt by stealth to strike an unexpected blow at the Republic.

The beacon fires of liberty constantly aglow in the breasts of freemen are the alert signals of a free nation. They blaze forth instantly a timely warning when danger threatens.

Some of us are old enough to remember the voluntary war cry of the sixties when Lincoln, on his inauguration, found the Army depleted and apparently inadequate by reason of the surreptitious removal of Government arms and ammunition from northern to southern arsenals. It was the spontaneous outburst of the irresistible power of a free people when aroused by an emergency. Hill and dale heard the alarm and instantly wafted back the glad refrain, "Hold the fort, Father Abraham, we are coming 600,000 strong." And they did come; armies sprang up as if by magic and soon military preparations were complete and the final doom of the Southern Confederacy sealed, its boasted and stealthy preparation useless, except to prolong the struggle.

Likewise, we all remember the celerity with which the Wilson administration assembled a new Army for overseas service by the selective-draft process, armed and equipped for duty and victory almost before the Hun knew we were coming.

Big standing armies are a menace in peace to a republic; they are distinctively the instruments of tyrants. They are un-American. But, my comrades, young and old, ex-soldiers of all our wars, volunteers or selected followers of the flag, in the soldierly pride we feel on memorial and reunion occasions we must not forget a soldier's modesty; we must not imagine that we own the earth or that it is our right and privilege to control political parties, much less the Government itself, merely because our youthful valor helped to save it from destruction in the hour of danger when the lurid fires of rebellion reached their apex on northern soil at Gettysburg or long afterwards, on armistice day, when autocracy surrendered its strangle hold on the world.

It was really our good fortune to be of the right age for service when war came. It gave us an honorable distinction to be proud of, far above any possible money consideration. It even dwarfs the justice of a bonus.

The American people have been loyal and generous to the men who were with Grant at Appomattox, and will be equally so with those overseas with General Pershing who were fortunate enough and have returned to the ranks of good-citizenship in America with clearer vision and more lofty ideals of duty than when in youth they left home and friends, farm and workshop, to do battle in defense of liberty and human rights.

Ingratitude is not a fault of American character, and sooner or later here or hereafter every sacrifice of an American soldier may be expected to receive its just reward. It is as certain as the eternal verities of justice herself.

Five Union soldiers since Appomattox have been called to the Presidency, and one—Roosevelt—from the ranks of Spanish-American War heroes, and for a half century after the Civil War the halls of Congress and other high official positions at Washington gave marked evidence of the appreciation and gratitude of the people for the boys in blue, and this without any political organization or paid congressional lobby to influence public sentiment in their favor. It was simply the heart-felt expression of a patriotic people.

Be patient and justice will be done to all; the mills of the gods grind slowly, but the grist is ample.

Besides, honors in a republic are not all along military lines. Men and women are not responsible for their environment. Robust and honorable Americanism is and always will be in demand in civil as well as military endeavor. No man or woman who honors the flag should be discriminated against unjustly. Duty and conscience are the only real tests of character and form the only just basis of reward.

The sainted mother who gave to the country her only boy was as much a heroine in that act as he was a hero in the hour of battle, whether he wore the blue or the khaki. A martyr to love and duty, well named "Gold Star" in the ranks here to-day, she must be honored as long as war memories last.

Very properly, therefore, since the World War she has been crowned with full citizenship and wears her new honors with delightful dignity—a veritable princess among voters. The world itself has moved forward since her enfranchisement. American civilization has taken on a broader significance. Its rich fruitage, although still in the bloom, is seen in the present recognition and world-wide influence of the Republic with foreign powers as shown in the acceptance by all the leading nations of the world of President Harding's invitation to the recent peace conference at Washington, and its results, giving earnest of a possible world-wide future federation in which, under American auspices, if not under one flag, civic righteousness and permanent peace may be exalted among the nations.

MAY GOD SPEED THE DAY.

And now, in conclusion, my comrades of the G. A. R., a word to you and to myself. We shall not attend many more Memorial Day exercises. The evening shadows are lengthening and soon memorial and other patriotic functions must be left to a younger generation. Time has set his silver gray mark upon us all, and yet we have duties still to perform in this world before final taps are sounded or we would not be here. He who takes note of the sparrow's fall is not unmindful of His own children, and the gracious lengthening of our days, all now beyond the allotted time of the Psalmist, must be for some wise purpose. Personally, I am, as I trust you are, thankful for many, many blessings of good health and strength, and so, soldiers and sons of soldiers, let us take new courage from the exercises of to-day and highly resolve, as we go hence to mingle with the outer world, to face again the front, heads up and right dress, and for the few remaining years of our active lives do our whole duty as good citizens in peace as we did our duty as soldiers in war. Let us teach by example and otherwise the sacredness of this day set apart for patriotic memories and avoid unseemly diversions and levity calculated to weaken American ideals in our own or in the minds of others.

It is truly a day for serious thought and reflection. It is a time for pure patriotic purpose.

As the years go by and Memorial Day returns, let us do as the American people are doing to-day all over our broad land—hoist high the American flag in every cemetery where sleeps in death an American soldier, and place above his grave those flowers which are emblematic of virtue and nobility. Inquire not whether he was in life a chieftan or a private soldier, whether he wore the blue or the modern khaki, or whether of native or foreign birth, for in the republic of the dead all are equal and age and youth give forth no sign of difference.

Ask not if he was of this or that political party, of this or that college fraternity, of this or that secret society, of this or that religious creed or denomination, or whether he was, in fact, of any creed. Remember only his good and worthy deeds of valor in defense of home and country, trusting if he had faults the recording angel will in charity drop a tear upon the record and wash it out forever.

Finally, my comrades of 1861–1865, vanishing heroes, passing rapidly to the great beyond as we are constantly reminded by well-meaning friends, let us have faith and courage, let us cling to our patriotic teachings and remain to the end full 100 per cent American, believing in the permanent stability of the Republic and confident of our country's future prosperity, growth, and grandeur, as was thoughtfully expressed by Comrade James A. Garfield when seeking to calm and moderate a rising storm of indignation among the people about to break into violence against all suspected enemies of the Government on the morning after the dreadful shock of Lincoln's assassination, when darkness and gloom seemed to envelop the National Capital and stout hearts of brave leaders quailed at the ominous portent, and General Garfield, afterwards President, in earnest voice and seemingly with Divine vision, said in assuring tones to a frenzied populace:

"God reigns and the Government at Washington still lives."

And, my comrades and my countrymen, the same thought to-day might well be expressed of the great economic after-war problems now dominating and disturbing the so-called best minds of the country and many would-be statesmen at Washington, who seem to forget: "There is a Divinity, high over all, that shapes and rules the world."

INDEPENDENT OFFICES APPROPRIATION BILL.

Mr. WOOD of Indiana. Mr. Speaker, I desire to call up the conference report on the bill H. R. 9981, the independent offices appropriation bill.

The SPEAKER. The gentleman from Indiana calls up the conference report which the Clerk will report.

The conference report was read.

[For conference report and statement, see pages 6673 and 6674, House proceedings of May 10, 1922.]

Mr. WOOD of Indiana. Mr. Speaker, I move that the conference report be accepted and confirmed, and I desire to make a little explanation as to what the situation is. Mr. Speaker, this bill has been pending here in some shape or the other since the 4th of March. The first conference report was rejected upon the 22d day of March, and has been back here three times and it has been rejected each time it came back. The only difference there is now between the House and the Senate are two positions involving $20,000. I am of the opinion that the House would have done the country a service had it concurred in the report made in March, and certainly it would have done a service to the country and a great many citizens of this country if it had been concurred in when it was submitted after that time. The fact of the business is that the legislation now proposed has resulted in a net saving to the Government as compared with salaries now paid if these two additional places are granted that are included in the report. We have now three each who are paid $35,000 a year under the present régime. Under the proposed legislation none can be paid exceeding $25,000, and, as I say, there were three paid $35,000 each, which is a saving of $30,000. One was paid $30,000, but can not be paid more than $25,000, which is a saving of $5,000 more, or $35,000, and assuming that these two places will go to two new men it will be an additional expenditure only of $5,000 to the Government of the United States, and assuming that they were given to men now occupying places, there would be a net saving to the Government of some $18,000. Gentlemen will bear in mind that the House provided for six places at $25,000 each. The Senate increased that number to 13. They have now consented to a reduction to two additional places, and I wish to commend the Senate for what they have done, for they have met us fairly, I think. And there is this thing that should be borne in mind, and that is that there are two bodies to this Congress. We like to have our way and they like to have theirs, and when we can meet them in a spirit of fairness and get as near together as we are now upon a bill involving an expenditure of $500,000,000 I think we have done remarkably well.

Mr. WALSH. Will the gentleman yield for a question?

Mr. WOOD of Indiana. I will yield.

Mr. WALSH. Is not the only difference between this provision and the one in the last report that this eliminates in this report the $15,000 position?

Mr. WOOD of Indiana. Yes.

Mr. WALSH. We have six at not to exceed $25,000 and two at $20,000?

Mr. WOOD of Indiana. Twenty thousand dollars.

Mr. KINCHELOE. Will the gentleman yield?

Mr. WOOD of Indiana. I will.

Mr. KINCHELOE. What is the total increase in this conference report over the House bill as it originally passed the House—I mean in regard to this particular item?

Mr. WOOD of Indiana. At the utmost it could not exceed $40,000. But in my opinion it has resulted in a saving of about $18,000, and that is upon the assumption that these two places involving $40,000 are given to two men now employed who are

receiving $11,000 each; it would be a deduction of $22,000 from the $40,000, resulting in a saving, as I have heretofore shown.

Mr. SNELL. Will the gentleman yield for a question?

Mr. WOOD of Indiana. I yield.

Mr. SNELL. I fully appreciate the efforts of the committee in trying to carry out the will of the House in getting this conference agreement, but yet I can not understand why we should pay larger salaries to this department than any other department of the Government. I do not know any other department that has as high-class salaries as in this department.

Mr. WOOD of Indiana. Yes.

Mr. SNELL. What other department?

Mr. WOOD of Indiana. I do not care to enter into a discussion now of what has been or might be. But if you care to enter into a discussion of that theme, you will find under the old régime that far larger salaries were paid.

Mr. SNELL. That we are getting away from.

Mr. WOOD of Indiana. I understand that. But under the appropriation we had here the other day of $500,000 for the purpose of prosecuting war claims it is possible to expend more than the amount of money that is here involved in salaries.

Mr. SNELL. If I understood that correctly, there is only one man to receive $25,000 and the rest are limited to $10,000.

Mr. WOOD of Indiana. It is possible to spend more. But the trouble is here that we are prone, and have been all the way through, to compare this business with other official offices, and it should not be done, because of the fact that the Government is engaged in a private business, competing, if you please, with private business where private salaries are paid by private concerns. And, gentlemen, there are a number of these men who are receiving salaries far in advance of what these men on the Shipping Board are receiving doing the same character of work. As long as the Government is engaged in private business we ought at least to try to keep up the service until we can dispose of it at an advantage and not depreciate it by reason of the fact that we are not taking care of the business. We have said, and said repeatedly, that we have done our best. And, gentlemen, you are just simply depriving day after day men who have given their money for the best interests of this Government and can not be paid until some affirmative legislation is had here. Men have been coming to my office day after day asking when it would be possible for them to get the payment of their claims. So, I say, it seems to me it is a trifle as compared with the amount of money that is involved in this bill, when there is but a difference of $40,000 at the utmost between the Senate and the House upon an appropriation bill involving $500,000,000.

Mr. SNELL. I say to the gentleman that I appreciate the fight they have made. They have probably done the best they could. I do not believe we ought to keep up the big salaries, however.

Mr. BRYNS of Tennessee. Will the gentleman from Indiana yield five or six minutes to me?

Mr. WOOD of Indiana. I yield to the gentleman five minutes.

Mr. BYRNS of Tennessee. Mr. Speaker, I am perfectly well aware of the very great difficulties with which the House conferees have had to contend with this particular item of appropriation, and I think they are deserving of the commendation of the House for the efforts they have made to bring the Senate to agree to the House position in regard to the matter.

I am not, however, in favor of this report. It will be nearly a month before the beginning of the next fiscal year, and I am quite certain that the Senate of the United States will not permit itself to be placed in the position of defeating this appropriation bill merely to provide two attorneys in the Shipping Board with salaries of $20,000 each. This matter has been pending for so long a time that I think probably it would be entirely proper if I called your attention very briefly to its history, for this is the only item in dispute. As the gentleman from Indiana [Mr. WOOD] said, the House passed this bill with a provision that not exceeding six employees of the department should be paid in excess of $11,000 per annum each, and that they should not be paid exceeding $25,000. The Senate struck out that provision and put in a general provision that 13 employees might be paid in excess of $11,000. The amendment came back to the House, and on March 15 a motion to recede and concur in that amendment of the Senate was defeated by an overwhelming vote in the House. It was then sent to conference, and the conference report was submitted and voted on on April 3. That conference report proposed to limit the employees who should receive in excess of $11,000 to six not in excess of $25,000 and four not to exceed $35,000. That report was overwhelmingly rejected by the House. It again went to conference, and another conference report was presented to the House, and voted on on April 20, which provided six at $25,000, two at $20,000, and two at $15,000. That report was overwhelmingly rejected by the House. It again went to conference and another conference report was submitted, which was rejected by the House. That report provided for six not to exceed $25,000, two not to exceed $20,000, and one not to exceed $15,000. The present report provides, as the gentleman from Indiana [Mr. WOOD] has stated, that six shall not exceed $25,000 and two shall not exceed $20,000.

So you gentlemen will see that each time the House has voted down this proposition it has always resulted in a reduction of the number of high-priced employees which the Senate proposes to fix in this bill. And my own idea is that if this report is rejected and sent back to the Senate the House will get what it wishes in the matter and what it ought to have in view of the present state of the Treasury.

Now, as has been stated, we passed a bill here the other day appropriating $500,000 for the Department of Justice, to enable the Attorney General to prosecute civilly and criminally the war profiteers. This House put a limitation upon that appropriation, in which it was provided that not a single one of the attorneys to be employed, with the exception of one, should be paid in excess of $10,000. Under its present appropriation, and under the authority which the Shipping Board now has, it may pay, if it sees fit to do so, every one of its attorneys up to $11,000. Certainly there is no consistency in giving to the department the permission to pay two of its attorneys $20,000, when we denied, as we should have denied, the Attorney General the right to pay more than $10,000. And I may say that that provision, as I understand, was entirely acceptable to the Attorney General. He felt then, and he feels now, if I am correctly informed, that he will be able to employ capable and competent attorneys to prosecute civilly and criminally the war profiteers, involving claims of $192,000,000, with attorneys whom he pays $10,000.

The SPEAKER. The time of the gentleman from Tennessee has expired.

Mr. BYRNS of Tennessee. Will the gentleman yield to me two minutes more?

Mr. WOOD of Indiana. I will.

Mr. BYRNS of Tennessee. I do not believe there is any reason for paying the Shipping Board attorneys more than $11,000. If I had my way I would limit them certainly to $7,500 a year. You and I know that if the chairman of the Shipping Board wishes to do so he can get plenty of competent attorneys to represent the Shipping Board in the settlement of those claims for less than that sum. For, as I have heretofore said, they do not involve any serious or new questions of law but involve to a large extent questions of fact arising between the Government and these various claimants. It does not require the services of highly paid attorneys, and I see no reason why we should now set the precedent of giving two attorneys in the Shipping Board $20,000 each and have it said hereafter that, having paid attorneys in the Shipping Board $20,000, we ought to pay increased high salaries to attorneys in the other departments. If you are going to have high-priced attorneys they ought to be in the Department of Justice. But as I say, the Attorney General has not seen the necessity of having more than $10,000 provided to pay an attorney save the attorney who is to have charge of the whole business. I do not think we ought to allow the Shipping Board to pay these high salaries to men who are now in the Shipping Board and who have been serving in the Shipping Board for not more than $11,000 each, and for that reason I am opposed to this conference report. [Applause.]

Mr. WOOD of Indiana. Mr. Speaker, I move the question on the conference report.

The previous question was ordered.

The SPEAKER. The question is on agreeing to the conference report.

The question was taken, and the Speaker announced that the ayes appeared to have it.

Mr. JOHNSON of Mississippi. A division, Mr. Speaker.

The SPEAKER. A division is demanded.

The House divided; and there were—ayes 59, noes 19.

Mr. JOHNSON of Mississippi. Mr. Speaker, I object to the vote and make the point of order that there is no quorum present.

The SPEAKER. The gentleman from Mississippi objects to the vote and makes the point of order that there is no quorum present. The Doorkeeper will close the doors, the Sergeant at Arms will bring in the absentees, and the Clerk will call the roll. As many as are in favor of agreeing to the conference re-

port will, when their names are called, answer "yea"; those opposed will answer "nay."

The question was taken; and there were—yeas 139, nays 121, answered "present" 2, not voting 168, as follows:

So the conference report was agreed to.

The Clerk announced the following pairs:

Until further notice:

Mr. Kahn with Mr. Rayburn.
Mr. Vestal with Mr. Harrison.
Mr. Fenn with Mr. Drane.
Mr. Ansorge with Mr. Parks of Arkansas.
Mr. Morin with Mr. Connally of Texas.
Mr. Winslow with Mr. Lyon.
Mr. Cooper of Ohio with Mr. McSwain.
Mr. Vare with Mr. Mansfield.
Mr. Stiness with Mr. Padgett.
Mr. Robsion with Mr. Tyson.
Mr. Kiess with Mr. Blanton.
Mr. Fuller with Mr. Stoll.
Mr. Rose with Mr. Hudspeth.
Mr. Glynn with Mr. Kindred.
Mr. Sanders of Indiana with Mr. Johnson of Kentucky.
Mr. Yates with Mr. Upshaw.
Mr. Atkeson with Mr. Hardy of Texas.
Mr. Evans with Mr. Griffin.
Mr. Fitzgerald with Mr. Fields.
Mr. Kline of New York with Mr. Deal.
Mr. Goodykoontz with Mr. Black.
Mr. Brennan with Mr. Sears.
Mr. Olpp with Mr. Taylor of Arkansas.
Mr. Funk with Mr. Smithwick.
Mr. Frear with Mr. Sabath.
Mr. Coughlin with Mr. Rainey of Alabama.
Mr. Treadway with Mr. Cockran.
Mr. Paige with Mr. Sullivan.
Mr. Burtness with Mr. McClintic.
Mr. Perkins with Mr. Cantrill.
Mr. Kennedy with Mr. Bell.
Mr. Campbell of Kansas with Mr. Doughton.
Mr. Knight with Mr. Hawes.
Mr. Beck with Mr. Tague.
Mr. Graham of Pennsylvania with Mr. O'Brien.
Mr. Maloney with Mr. Montague.
Mr. Taylor of Tennessee with Mr. Clark of Florida.
Mr. Davis of Minnesota with Mr. Lea of California.
Mr. Henry with Mr. Weaver.
Mr. Kreider with Mr. Kunz.
Mr. Dickinson with Mr. Bankhead.
Mr. Reed of New York with Mr. Jeffers of Alabama.
Mr. Burke with Mr. Kitchin.
Mr. Michaelson with Mr. Vinson.
Mr. Hutchinson with Mr. Hooker.
Mr. Moore of Ohio with Mr. Swank.
Mr. McPherson with Mr. Tillman.
Mr. Shreve with Mr. Goldsborough.
Mr. Begg with Mr. Riordan.
Mr. Nolan with Mr. Gallivan.
Mr. Arentz with Mr. Driver.
Mr. Codd with Mr. Park of Georgia.
Mr. Fordney with Mr. Collins.

The result of the vote was announced as above recorded.

The SPEAKER. A quorum is present. The Doorkeeper will open the doors.

On motion of Mr. WOOD of Indiana, a motion to reconsider the vote by which the conference report was agreed to was laid on the table.

POST OFFICE APPROPRIATIONS—CONFERENCE REPORT.

Mr. SLEMP. Mr. Speaker, I call up the conference report on the Post Office appropriation bill (H. R. 9859).

The SPEAKER. The gentleman from Virginia calls up the conference report on the Post Office appropriation bill. The Clerk will read the conference report.

The Clerk read the conference report, as follows:

The committee of conference on the disagreeing votes of the two Houses on certain amendments of the Senate to the bill (H. R. 9859) making appropriations for the Post Office Department for the fiscal year ending June 30, 1923, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, and 52.

Amendment numbered 17: That the House recede from its disagreement to the amendment of the Senate numbered 17, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$1,903,380"; and the Senate agree to the same.

Amendment No. 58: That the Senate recede from its disagreement to the amendment of the House to the amendment of the Senate numbered 58, and agree to the same with an amendment as follows: In lieu of the matter inserted by the amendment of the House, insert the following:

"SEC. 4. That for the purpose of carrying out the provisions of the act entitled 'An act to provide that the United States shall aid the States in the construction of rural post roads, and for other purposes,' approved June 11, 1916, and all acts amendatory thereof and supplementary thereto, there is hereby authorized to be appropriated, out of any money in the Treasury not otherwise appropriated, the following additional sums, all such sums to be expended in accordance with the provisions of such act:

"The sum of $50,000,000 for the fiscal year ending June 30, 1923.

"The sum of $65,000,000 for the fiscal year ending June 30, 1924.

"The sum of $75,000,000 for the fiscal year ending June 30, 1925.

"The Secretary of Agriculture is hereby authorized, immediately upon the passage of this act, to apportion the $50,000,000 herein authorized to be appropriated for the fiscal year ending June 30, 1923, among the several States, as provided in section 21 of the Federal highway act approved November 9, 1921: *Provided*, That the Secretary of Agriculture shall act upon projects submitted to him under his apportionment of this authorization and his approval of any such project shall be deemed a contractual obligation of the Federal Government for the payment of its proportional contribution thereto.

"PAR. 2. For the purpose of carrying out the provisions of section 23 of the Federal highway act, approved November 9, 1921, there is hereby authorized to be appropriated for forest roads and trails, out of any money in the Treasury not otherwise appropriated, the following additional sums, to be available until expended, in accordance with the provisions of said section 23:

"The sum of $6,500,000 for the fiscal year ending June 30, 1924.

"The sum of $6,500,000 for the fiscal year ending June 30, 1925.

"PAR. 3. For the purposes of this section and of the acts heretofore making appropriations to aid the States in the construction of rural post roads the term 'bridges' includes railroad grade separations, whether by means of overhead or underpass crossings.

PAR. 4. The provision of section 5 of the act entitled "An act making appropriations for the service of the Post Office Department for the fiscal year ending June 30, 1920, and for other purposes," approved February 28, 1919, fixing the limitation of $20,000 per mile which the Secretary of Agriculture may make, is hereby amended to read as follows:

"That the payments which the Secretary of Agriculture may make from sums appropriated under this act or any act amendatory thereof or supplementary thereto for the fiscal year ending June 30, 1923, shall not exceed $16,250 per mile exclusive of the cost of bridges of more than 20 feet of clear span; and that the payments which the Secretary of Agriculture may make from any sums appropriated under the provisions of this act or any act amendatory thereof or supplementary thereto, after the fiscal year ending June 30, 1923, shall not exceed $15,000 per mile exclusive of the cost of bridges of more than 20 feet of clear span: *Provided*, That the limitation of payments herein provided shall apply to the public-land States, except that the same is hereby increased in proportion to the increased percentage of Federal aid authorized by section 11 of the act entitled 'An act to amend the act entitled "An act to provide that the United States shall aid the States in the construction of rural post roads, and for other purposes,"' approved November 9, 1921."

PAR. 5. Section 24 of the act entitled "An act to amend the act entitled 'An act to provide that the United States shall aid the States in the construction of rural post roads, and for other purposes,'" approved November 9, 1921, is amended to read as follows: "That in any State where the existing constitution or laws will not permit the State to provide revenues for the construction, reconstruction, or maintenance of highways, the Secretary of Agriculture shall continue to approve projects for said State until five years after November 9, 1921, if he shall find that said State has complied with the provisions of this act in so far as its existing constitution and laws will permit."

PAR. 6. If any officer, agent, or employee of the United States, or any officer, agent, or employee of any State or Territory, or any person, association, firm, or corporation, or any officer or agent of any person, association, firm, or corporation shall knowingly make any false statement, false representation, or false report as to the character, quality, quantity, or cost of the material used or to be used, or the quantity or quality of the work performed or to be performed, or the costs thereof in connection with the submission of plans, maps, specifications, contracts, or costs of construction of any project submitted for approval to the Secretary of Agriculture under the provisions of the Federal highway act, or shall knowingly make any false statement, false representation, or false report or claim for work or materials for the construction of any project approved by the Secretary of Agriculture under said Federal highway act and all amendments thereto, or shall knowingly make any false statement or false representation in any report required to be made under said Federal highway act or acts supplementary thereto with the intent to defraud the United States shall, upon conviction thereof, be punished by imprisonment not to exceed five years or by a fine not to exceed $10,000, or by both fine and imprisonment within said limits.

PAR. 7. If any provision of this section, or the application thereof to any person or circumstances, shall be held invalid, the validity of the remainder of the section and the application of such provision to other persons or circumstances shall not be affected thereby.

PAR. 8. All acts or parts of acts in any way inconsistent with the provisions of this section are hereby repealed.

And the House agree to the same.

C. B. SLEMP,
MARTIN B. MADDEN,
THOMAS U. SISSON,
Managers on the part of the House.
CHAS. E. TOWNSEND,
THOMAS STERLING,
GEO. H. MOSES,
E. S. BROUSSARD,
Managers on the part of the Senate.

STATEMENT.

The managers on the part of the House at the conference on the disagreeing votes of the two Houses on certain amendments of the Senate to the bill (H. R. 9859) making appropriations for the Post Office Department for the fiscal year ending June 30, 1923, and for other purposes, submit the following statement in explanation of the effect of the action agreed upon by the conference committee and submitted in the accompanying conference report:

On Nos. 1 to 11, inclusive: Strikes out the increases, proposed by the Senate, in the number of clerks, assistant map mounters, carpenters, painters, and chauffeurs in the department in the District of Columbia.

On No. 17: Corrects a total in the bill.

On No. 52: Strikes out the paragraph, inserted by the Senate, authorizing the Postmaster General to ascertain conditions arising from contracts in star-route, screen-wagon, and other vehicle service entered into prior to January 1, 1918, with a view of determining whether any adjustment should be made in the compensation for the fiscal years 1918, 1919, 1920, and 1921.

On No. 58, relating to appropriations for construction of roads: Adopts the amendment of the House, which is the road bill that passed the House as a separate measure, modified in the following particulars:

Authorizes the appropriation of $50,000,000 for the fiscal year 1923, $65,000,000 for the fiscal year 1924, and $75,000,000 for the fiscal year 1925.

Provides that the Secretary of Agriculture shall apportion the authorization for the fiscal year 1923 immediately upon the approval of the act, and that his approval of any project under such apportionment shall be deemed a contractual obligation of the Federal Government for the payment of its proportional contribution thereto.

Makes an authorization of $6,500,000 for forest roads and trails for the fiscal year 1925 as well as for 1924.

Strikes out paragraph 4 of the House amendment, relating to the reallotment of funds in the event approved projects are not put under contract within one year from the date of the approval of the project.

Fixes the limit of cost per mile at $16,250 for the fiscal year 1923 instead of $12,500 as proposed in the House amendment.

Fixes the limit of cost per mile after the fiscal year 1923 at $15,000 instead of $10,000 as proposed in the House amendment.

C. B. SLEMP,
MARTIN B. MADDEN,
THOMAS U. SISSON,
Managers on the part of the House.

Mr. SLEMP. Mr. Speaker, in explanation of the conference report on the Post Office appropriation bill it is interesting to note that on all items in disagreement relating to the Postal Service the Senate recedes entirely, leaving the bill as it left the House recently.

In this connection I want to put into the RECORD a financial statement of the operations of the bill in its finality.

The bill as it passed the Senate carried an appropriation of $623,573,136.50. As it passed the House it carried $554,215,625. There was therefore added by the Senate the sum of $69,357,511.50. The House recedes from $10,849,161.50. The Senate recedes from $58,508,350. Fifty million dollars of that, however, was the recession on the appropriation for roads.

The Post Office appropriation for 1922 was $580,719,851. The bill for 1923 as agreed to carries $565,064,786.50. The decrease under the appropriation for 1922 is $15,655,064.50.

The estimates for 1923 were $584,974,413. The appropriation for 1923 is $565,064,786.50, a decrease under the estimates of $19,909,626.50.

The only contested item at all after the Senate receded from the provisions relating to the Postal Service was on the subject of roads, and on that the conferees were in conference for quite a while.

The first point of difference was whether we should have a two-year program or a three-year program. The Senate stood for a three-year program and the House provision was for a two-year program. The conferees recommend the three-year program.

The Senate bill carried an appropriation of $50,000,000 for 1923. The House provision was an authorization of $65,000,000 for 1923. The conferees agreed to recommend to both Houses an authorization of $50,000,000, with certain contractual rights left to the States to protect their situations.

Another point of difference was the limitation per mile of Federal aid. The present law is $20,000 per mile. The old law was $10,000 per mile. The House provision was $12,500 for 1923 and $10,000 thereafter. It was held by the representative of the department that that was too drastic a cut, and so a compromise was arranged between the two bodies, 50–50; that is, the limitation is to be $16,250 per mile for the year 1923 and $15,000 thereafter. The Roads Department say that they purpose to build more expensive roads; that they purpose to build the roads 2 feet wider and also to make them about 4 inches deeper because of the heavier traffic that is on the roads.

Mr. LAYTON. Will the gentleman yield for a question?

Mr. SLEMP. I yield to the gentleman from Delaware.

Mr. LAYTON. Is the Federal Government building roads itself unassisted by the States?

Mr. SLEMP. No.

Mr. LAYTON. Then is the Government dictating the width of the roads?

Mr. SLEMP. No; they want to work that out in connection with the State highway commissions; but the attitude of the department was that that is an economic necessity.

Mr. LAYTON. The Government is going to do it?

Mr. SLEMP. The Government will do its proportional amount, according to the allotment.

Now, in regard to the amount of money that should be satisfactory for the fiscal year 1923, the Roads Department furnished a very careful statement of the amount of money that we already have in the Treasury that would be available for use next year. This matter has been submitted to the Bureau of the Budget, and they tell us that there will be available for the fiscal year 1923 the sum of $125,000,000 to be used in Federal-aided projects. There will be from $10,000,000 to $15,000,000 left over out of the 1922 program, so that if not a single dollar of money was carried for the next year for Federal-aided projects at all the Government would be spending on the Federal roads in this country about $140,000,000 of new money, but the department reported to us that there was not any systematic way of building these roads throughout the country so far as progress was concerned. One State would be a little ahead of another, one State would have trouble about its bonds, and another State about legislative inaction. They gave us a list of the States that would be without continuation of a road program unless new money was appropriated in 1923 in addition to the $40,000,000 set aside. These States are as follows (this letter is from the department, written May 25, 1922):

Arkansas will run out of work in March, 1923. Georgia will run out of work in March, 1923. Idaho will run out of work in January, Illinois in February.

Mr. SMITH of Idaho. What does the gentleman mean by running out of work?

Mr. SLEMP. The Federal aid allotted to the State will be consumed in these respective States by that time, and that includes 14 States. Now, if there was not a dollar of money appropriated next year, there would be 34 States that would be able to work along in the road construction without a dollar of money from the Treasury. I will continue with the list of States:

Illinois will run out in February, Iowa in December, Louisiana in December, Maine in December, North Carolina in January, North Dakota in March, Ohio in December, Oregon in January, Pennsylvania in November, Washington in October, and Wisconsin in March. All the other States, if not a dollar was appropriated next year, would be able to run through and carry out the Federal-aid program.

Mr. CRAMTON. Will the gentleman yield?

Mr. SLEMP. I will.

Mr. CRAMTON. The appropriations heretofore made are available until expended.

Mr. SLEMP. Yes.

Mr. CRAMTON. And also the appropriations carried in this bill.

Mr. SLEMP. There are no appropriations carried in this bill; they are simply authorizations. The reason for that was that there would be no additional money needed until October, when the State of Washington runs out.

Mr. SUMMERS of Washington. Will the gentleman yield?

Mr. SLEMP. Certainly.

Mr. SUMMERS of Washington. I think it ought to be borne in mind that the road program does not operate by the calendar year, and there is a fallacy in this argument of considering it in this way. The State legislatures meet every second year.

Mr. MADDEN. We are making provision for that in this bill. We are taking care of that.

Mr. SUMMERS of Washington. I do not see how you can make provision unless you do it in dollars and cents.

Mr. CRAMTON. Continuing my inquiry, the appropriation in the bill of $50,000,000——

Mr. SLEMP. Authorization.

Mr. CRAMTON. The language says "is hereby appropriated."

Mr. SLEMP. The gentleman is reading from the Senate bill and I was referring to a conference report. Now, in the conference report we have a provision to meet the objection made by the gentleman from Washington. On page 2 of the conference report it provides:

> The Secretary of Agriculture is hereby authorized, immediately upon the passage of this act, to apportion the $50,000,000 herein authorized to be appropriated for the fiscal year ending June 30, 1923, among the several States as provided in section 21 of the Federal highway act approved November 9, 1921: *Provided*, That the Secretary of Agriculture shall act upon projects submitted to him under his apportionment of this authorization and his approval of any such project shall be deemed a contractual obligation of the Federal Government for the payment of its proportional contribution thereto.

It was felt that under these circumstances contracts can be made and appropriations be made by Congress in accordance with the need. In that way we will prevent the piling up of a large amount of money in the Treasury that can not be used.

Mr. SNELL. Will the gentleman yield?

Mr. SLEMP. I will.

Mr. SNELL. One of the principal items in controversy is the amount of Federal aid per mile for roads?

Mr. SLEMP. Yes.

Mr. SNELL. As I understand it, the Roads Committee held extensive hearings, and they unanimously agreed on the amount provided for 1 mile.

Mr. SLEMP. I will say that we are getting close to the end of the year, and we have got to get these bills through and another body took an opposite position.

Mr. SNELL. Did the committee of the Senate hold hearings?

Mr. SLEMP. Yes; and the road officials came before us and took the Senate's side and advocated the limit provided in the Senate bill.

Mr. SNELL. The bill was never considered by the regular Roads Committee in the Senate?

Mr. SLEMP. Yes; it was fully considered by them, and we had it brought to us, as the gentleman knows, in an incidental way. We had Mr. McDonald and the head of the roads department, Mr. Allen, and they stood strongly for $18,000 a mile. They felt that the cut of 50 per cent would more than take up the cost of construction. The conferees thought a reduction of 25 per cent would more nearly meet the situation than 50, especially as some of the building material was going up, and further, they insist on building the roads a little wider and a

little stronger road, which would bring an increased cost of construction.

Mr. SUMMERS of Washington. May I say a word?

Mr. SLEMP. I will yield to the gentleman.

Mr. SUMMERS of Washington. The hearings were not extensive, and they were not all in favor of the amount voted by the House committee.

Mr. SLEMP. While in conference we got telegrams from many of the highway departments of the West urging that that be done, that the limit be cut. Then we got the department to furnish us with a list of all the projects in which the Government participated at $20,000 a mile and $21,020, and we found that the entire program was based on figures between $15,000 and $20,000.

Mr. SNELL. On whatever roads are built the State must pay 50 per cent?

Mr. SLEMP. Yes.

Mr. DUNBAR. Mr. Speaker, will the gentleman yield?

Mr. SLEMP. Yes.

Mr. DUNBAR. If the conference report be adopted, then it will provide for an additional appropriation of $50,000,000 for roads for 1923?

Mr. SLEMP. An authorization for $50,000,000. That will be appropriated next year. That will make the total amount of available Federal funds for roads for 1923 about $190,000,000.

Mr. DUNBAR. The conference report provides for an authorization for an appropriation of an additional sum, $50,000,000, for the construction of post roads, for the fiscal year 1923?

Mr. SLEMP. That is correct.

Mr. DUNBAR. If that be adopted, then it would increase our Post Office appropriation bill by $50,000,000?

Mr. SLEMP. That is correct.

Mr. DUNBAR. Can the gentleman inform us if this appropriation be made what will be the post-office deficit for the fiscal year 1923?

Mr. SLEMP. This could not be applied to the Post Office appropriation bill, since it is an authorization and not an appropriation.

Mr. DUNBAR. But in the event the appropriation is made?

Mr. SLEMP. That would then come in on the deficit for the next year. Of course, I do not believe that one should charge a $50,000,000 road-construction fund to the Postal Service, but whatever that would be, if you choose to reason it out in that way, if you add $50,000,000 to it, the result will be the amount. I would like to say here that no one can estimate what the deficit will be, because no one knows what the postal receipts are going to be. Perfectly tremendous increases in the postal receipts have occurred since the 1st of January. During the month of May the receipts showed an increase of 14.5 per cent over the month of May last year, as against a normal increase of 5 per cent.

Mr. WOODRUFF. Mr. Speaker, will the gentleman yield?

Mr. SLEMP. Yes.

Mr. WOODRUFF. Is it not a fact that the road appropriation ordinarily is carried in a separate bill?

Mr. SLEMP. That is true. The fiscal year will be at an end in 30 days and while the appropriation committee did not have any desire to have this thrust upon them, because it is legislation, yet we thought it was the simplest way out of it.

Mr. STEVENSON. Mr. Speaker, I call attention to the fact that there is no quorum in the House.

Mr. WOODRUFF. Will the gentleman withhold that for a moment?

Mr. STEVENSON. For a moment; I will.

Mr. WOODRUFF. The gentleman will admit that in the conference, the House conferees have been enabled to write into this law the legislation as it passed the House.

Mr. SLEMP. I think that is substantially correct.

Mr. WOODRUFF. With the exception that the program has been lengthened for one year?

Mr. SLEMP. Yes.

Mr. WOODRUFF. And the amount the Government can participate in for each mile of road has been increased, as the gentleman has already explained?

Mr. SLEMP. That is correct.

Mr. LARSEN of Georgia. Mr. Speaker, will the gentleman yield on that point?

Mr. SLEMP. Yes.

Mr. LARSEN of Georgia. The gentleman does not mean to leave the impression that we have adopted the program provided by the House bill, because the House bill provided for a greater appropriation than is contained in this bill.

Mr. SLEMP. The House bill did not provide for any appropriation at all.

Mr. LARSEN of Georgia. Well, authorization.

Mr. SLEMP. There is quite a difference between an authorization and an appropriation.

Mr. LARSEN of Georgia. The House bill authorized an appropriation for two years.

Mr. SLEMP. Yes.

Mr. LARSEN of Georgia. And began with $15,000,000 more per year than this bill carries?

Mr. SLEMP. Yes.

Mr. LARSEN of Georgia. Just one other point. Will the gentleman acquaint me with his purpose in this matter? There are some of us here who are members of the Roads Committee who would like to be heard on some provisions of the report. Is it the purpose of the gentleman to aid us in getting an opportunity to be heard?

Mr. SLEMP. I have no objection to anybody talking, so far as I am concerned.

Mr. LARSEN of Georgia. The gentleman is in control of the time.

Mr. SLEMP. I would be very glad to yield some time.

Mr. LARSEN of Georgia. I would like to have some time.

Mr. STAFFORD. Mr. Speaker, will the gentleman yield?

Mr. SLEMP. Yes.

Mr. STAFFORD. I notice for the first time in the history of road legislation that the conferees have bound the Government in the form of a contract to carry out the amount that would be apportioned of the $50,000,000 authorization for expenditures in the next fiscal year.

Mr. SLEMP. Yes.

Mr. STAFFORD. What is the reason why by legislation we should make a contractual obligation to carry out the apportionment fixed by the Department of Agriculture?

Mr. SLEMP. As far as I could get the thought, it is this: The authorization passed by Congress would carry necessarily an obligation on the part of Congress, certainly moral, at least, to carry out the proposition in accordance with the amount authorized.

Mr. SISSON. Mr. Speaker, will the gentleman yield to me for a moment?

Mr. SLEMP. It has been represented that contractors might not know for sure whether they could make the contracts under these circumstances, and we felt this provision placed in there would make it absolutely sure.

Mr. STAFFORD. This applies only for the year 1923?

Mr. SLEMP. Yes.

Mr. STAFFORD. And as the chairman of the committee, the gentleman from Illinois [Mr. MADDEN], just stated, it should be made a permanent policy. If that is so, there is no need for an authorization. You might as well appropriate the money at the beginning.

Mr. SISSON. Let me explain to my friend, if I may. We had great difficulty in getting together at all; in fact, I did not at one time believe we would get good-roads legislation on account of the great disagreement among the conferees. I am happy in the knowledge of the fact that I was somewhat instrumental in bringing about an agreement which, if adopted by the House, will give us good-roads legislation this year. Now, there are many States—all except 14—that had as much money as they could possibly use and more than they could use during the next fiscal year.

Mr. LARSEN of Georgia. Will the gentleman yield on that point?

Mr. SISSON. In one moment. With representations made to us by the good-roads department we in conference felt that we did not want to delay good-roads construction, and we did not want to impede those States that had kept up with the Federal appropriation and now needed more money; but there were members of the conferees who did not want to load this bill down with millions of dollars of appropriation which could not be used during the next fiscal year, because only about $139,000,000 can be used in States other than the 14 States. Not knowing exactly what could be used, we consulted with the good-roads department, and we authorized the $50,000,000 and gave authority in this bill for each State to contract for its pro rata share during this next fiscal year. Therefore that does not impede in the least those States that are out of money, because they can enter into contract with the assurance that at the time of need there will be an appropriation of the money.

Mr. LARSEN of Georgia. As I understand it, if the States do not avail themselves to the full extent of the credit that comes to them under this authorization during the fiscal year 1923 it lapses, so far as that State is concerned.

Mr. SISSON. No, not next year, but there is a provision that the year following it it would go back and would be allotted to that State when it was ready to avail itself of it.

Mr. DOWELL. And the advantage of this is to permit those 14 States to get what is necessary to carry them through 1923, and as to others that do not need the appropriation the appropriation will not be used?

Mr. SISSON. Exactly.

Mr. STEENERSON. I would like to ask what became of amendment 57; did that go out?

Mr. SLEMP. That went out.

Mr. STEENERSON. I would like about five minutes.

Mr. SLEMP. Mr. Speaker, will the Chair state how much time I have used?

The SPEAKER pro tempore. The gentleman has used 23 minutes.

Mr. RAKER. Will the gentleman yield me five minutes on this conference report?

Mr. SLEMP. I yield five minutes to the gentleman from Wyoming [Mr. MONDELL].

Mr. MONDELL. Mr. Speaker, I want to congratulate the committee on the solution it has reached in the matter of road legislation and appropriation. The House passed the bill making certain authorizations for roads, containing certain legislation. The authorizations were generally satisfactory to Members of the House; the legislation, not all of it altogether satisfactory. In the Senate certain appropriations were made for carrying on road work. The conferees on the part of the House were naturally and properly anxious to eliminate from the Post Office bill a direct appropriation for public roads. Such appropriations should not be carried on a Post Office appropriation bill. At the same time the conferees were anxious to carry out the will of the House in making sufficient and abundant provision for the carrying on of road work. Certain of the Senate conferees were not entirely willing to trust the Congress to make the deficiency appropriation, as might be necessary if nothing but an authorization were left in the bill with no definite provision under which road funds would be unquestionably available.

Mr. HAYDEN. Will the gentleman yield?

Mr. MONDELL. I have but a short time.

Mr. HAYDEN. I want to get the idea correctly in my head. This bill authorizes the good roads office to create a deficiency that Congress will meet?

Mr. MONDELL. That is what it amounts to. There is no difference of opinion in regard to the carrying out of the road program.

Mr. DUNBAR. Will the gentleman yield?

Mr. MONDELL. Well, I have only five minutes, and I can not make my statement if I yield further. There is no one who had to do with this conference report who is not as earnest and as anxious and as insistent upon carrying out the road program as any Member of this House, and they have made full and abundant provision for carrying out the road program, but they have wisely avoided the making of an appropriation on a Post Office appropriation bill for roads, and the making of the appropriation at a time when the full amount of the appropriation is not needed, when but a very small proportion of the authorization is needed. Now, the provision of the bill is an unusual one, but it is one that makes the carrying on of the road program absolutely certain. The thing is settled and fixed so that, within the authorization fixed by the House, sums will be available for use. It is a very good solution of the matter.

The SPEAKER pro tempore. The time of the gentleman has expired.

Mr. SLEMP. I yield five minutes to the gentleman from Mississippi [Mr. SISSON].

Mr. SISSON. Mr. Speaker, of course I regret that I can not have more time in which to discuss this important matter——

Mr. DOWELL. Will the gentleman yield for a question right there?

Mr. SISSON. Yes.

Mr. DOWELL. How much, if the gentleman can tell us, will be necessary to supply the 14 States that are in need of appropriations for 1923?

Mr. SISSON. I can not tell the gentleman exactly, but for all the States now from the best estimate we can get on this program it will take about $30,000,000. Now, gentlemen, I do not believe that the members of the committee realize just exactly the difficulties with which we had to contend in conference. I referred a moment ago to this fact, but I want to call to your attention especially the fact that there are many conflicting views in the House and in the Senate and those views found their way into conference. What those of us who favored good roads wanted was results, and as a servant of the House we worked to that end. We hope what we have accomplished will meet with your approval.

The House amended this bill when it came back from the Senate by substituting the Dunn bill for the Senate provision. Now, as between those two we accepted practically the entire Dunn bill, with all of its provisions, as it passed the House.

Now, when we got into conference we did not want any of the States impeded in the least in their progress in developing good roads. Therefore, we agreed with the Senate to the $50,000,000 proposition, with the proviso in the $50,000,000 authorization that each State that needed the money might proceed to contract for work done. And, as my friend Mr. HAYDEN a moment ago stated, a deficiency could be created, which is true, and Congress will care for that deficiency with an appropriation without hesitation for it is authorized.

Mr. BOX. Will the gentleman yield?

Mr. SISSON. I will.

Mr. BOX. I want to know in what attitude this leaves the law with reference to those States which must ultimately amend their constitutional laws in order to work with the Federal Government on this road legislation?

Mr. SISSON. Of course, we can not make a provision about that. We can only legislate, and the States will have to conform to our legislation.

Mr. BOX. The gentleman will remember that three years' time was first given to the States in which to so adjust their laws?

Mr. MADDEN. This does not affect that at all.

Mr. SISSON. Oh, not at all. I think that is a five and not a three year provision; but whatever it is we do not affect that. Here is what I want to say to you: I believe the conferees have worked it out all right in having a three-year program and in providing for a compromise in reference to the amount of money that may be expended on a mile of road by making a $15,000 provision as a permanent limitation, but also providing that for the next year $16,250 is to be the limit. So when you take into consideration the vast differences between the House and the Senate and the insistence of the respective conferees, it seems to me that we have worked out the very best proposition possible. I tell you frankly that we have got, so far as I believe, a better proposition than we had when we went into that conference.

Mr. Speaker, I want also to briefly call the attention of the House to the fact that the provision for village delivery is just as it left the House. This service should be extended, for it is by far the most economical of all the mail services. It has been quite satisfactory where it has been tried.

RURAL MAIL.

It is also gratifying that the House provision for rural mail is also retained in the bill on the same basis. Rural mail carriers are properly cared for. As the Members of the House all know, I have always wanted the rural mail carriers cared for and treated just as city carriers are. The provision in this bill does that approximately. I shall never consent to any reduction of rural carriers' pay, for I contend and have contended that they shall be linked together. When the rural carriers' pay was first increased under General Burleson's administration as Postmaster General, I made the fight then to have them dealt with as city carriers as nearly as their differing conditions would permit. That principle was finally agreed to and to-day the rural carrier is secure, for his salary will be kept practically along with that of the city carrier. This is right. The man delivering mail in the country should receive the same compensation as the man delivering mail in the city.

Mr. Speaker, I trust the conference report will be agreed to.

The SPEAKER. The time of the gentleman has expired.

Mr. SLEMP. Mr. Speaker, I yield four minutes to the gentleman from Georgia [Mr. LARSEN].

Mr. LARSEN of Georgia. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

Mr. LARSEN of Georgia. Mr. Speaker and gentlemen of the House, both of the great political parties of this country are pledged to a road program. The Democratic Party initiated the present system in 1916, and the Republican Party by its platform of 1920 pledged itself to "liberal appropriations" for the construction of public highways. Is the Republican Party living up to the pledge? If we consider the report which the conferees propose for our adoption and which we are informed the administration favors, as the criterion, we must answer no. I ask gentlemen, each and all of you, do you believe that any program is a "liberal one" which will retard the construction of the public highways in 14 States of the Union? Is that your idea of liberality?

Mr. MADDEN. Does the gentleman mean that?

Mr. LARSEN of Georgia. Yes; I mean that. It is what Mr. MacDonald, the Chief of the Bureau of Roads, testified before the Roads Committee of the House. The statement was admitted, I believe, by the gentleman from Virginia [Mr. SLEMP] and one other gentleman on the floor.

Mr. MADDEN. That is just exactly what it does not do. The gentleman does not state the facts.

Mr. LARSEN of Georgia. The gentleman is in error about that. With others on the Roads Committee, I took the testimony on the bill, and I know more about it than does the gentleman from Illinois. I heard the testimony for two weeks, and the gentleman from Illinois did not hear it at all. I propounded questions to Mr. MacDonald, and I know what he said when he answered.

Mr. MADDEN. We are making provision here for the continuation of this work in the 14 States.

Mr. LARSEN of Georgia. But the provision you would make is not adequate to the demands. Read the testimony taken before the House Committee, and you should become convinced of this fact. Beginning on page 80, it is as follows.

The CHAIRMAN. Now, Mr. MacDonald, I want to ask you this question: You would not need these funds, only they are allotted to many of the States that do not take advantage of them?

Mr. MACDONALD. Yes; we would need them, Mr. Chairman. Allowing the same amount of money to go under contract this year as we have been placing under contract for three years, next year, if a $50,000,000 appropriation is made, there will be a number of States that will not have enough of the Federal allotment to carry on as large a program as they have carried on in the past. According to our estimates there will be at least 12 or 13 such States. I may say that our estimates, I believe, are very conservative. They do not allow as large a program as the States say they will be able to carry on. We are basing our program entirely on what has been done in the past. The States—on the basis of what has been done—that would have a smaller program for next year are Arizona, Georgia, Idaho, Iowa, Louisiana, Maine, North Carolina, Oregon, South Carolina, South Dakota, Tennessee, and two or three others.

The CHAIRMAN. Have they used all of their allotments, Mr. MacDonald?

Mr. MACDONALD. On the basis of $50,000,000, their program for next year would be a smaller program than they have had during the fiscal year 1921.

The CHAIRMAN. Building program or estimated program?

Mr. MACDONALD. Building program. Work actually put under construction.

Applying the proposed bill to my own State, Georgia, let me show you how far it falls short of actual demands. Your attention is directed to page 83 of the hearings:

Mr. LARSEN. Well, what amount will it take to meet the reasonable demands of the State of Georgia at the present time, and under the contemplated program and the program of last year—what amount should you have? What should be the amount of the governmental appropriation in order that we would be able to meet their demands?

Mr. MACDONALD. Well, it would be at least double its share of $50,000,000, Mr. LARSEN.

Thus, gentlemen, it will be seen that Georgia needs its pro rata part of $100,000,000. This would be the amount of the appropriation for the last fiscal year, and without it that State must curtail its present program of highway construction. The way you propose to meet the demands of the State of Georgia is only illustrative of what you propose to do in many other States of the Union.

There were only three matters of importance at issue between the Senate and the House. They were (1) the amount of the annual appropriation to be made, (2) the question whether the program should be for two or three years, and (3) what should be the maximum amount of Federal aid participation per mile. The first of these is of major, while the other two are of minor importance.

The able conferees on the part of the House yielded on the major issue, and one of the minor, and compromised the other. My judgment is that when they yielded on the major issue, thereby agreeing to the reduction in the amount to be appropriated annually for road construction, they surrendered all. It was a surrender of real substance for mere shadow, and I can not consent to ratify their act.

We are not suffering for the want of road legislation, but we are suffering, or will suffer, for the want of funds with which to construct roads. The gentleman from Mississippi [Mr. SISSON] said they had a hard time in agreeing. There was only one important issue, and that was the question as to the amount of the appropriation. It must have been hard for him to agree to surrender it.

Mr. SISSON. The gentleman does not state exactly what I said, I think.

Mr. LARSEN of Georgia. I am speaking of the importance of the issues. The real question at issue was as to the amount of funds to be appropriated. The Roads Committee in the House provided, after a two weeks' fight, for a two-year program of $65,000,000 and $75,000,000. The Senate program was for three years, $50,000,000, $65,000,000, and $75,000,000, $25,000,000 less for two years. The gentleman from Wyoming, the distinguished majority leader of the House, showed that he did not know much about the matter when he said we had brought the Senate up to our way of thinking about it; that we had brought them up from $50,000,000 to $65,000,000. He has the matter reversed. We have surrendered to those who are opposed to "liberal appropriations" for road purposes.

The SPEAKER. The time of the gentleman has expired.

Mr. LARSEN of Georgia. You are not surrendering what we have done, but you are surrendering the rights of the people of this country, and they will not stand for it. [Applause.]

Mr. SLEMP. Mr. Speaker, I yield four minutes to the gentleman from Washington [Mr. SUMMERS].

Mr. SUMMERS of Washington. Mr. Speaker, as a member of the Roads Committee I very much regret that the amount being authorized for Federal aid is reduced. Our committee succeeded in reporting out and securing the passage of a bill authorizing $65,000,000 and $75,000,000 for the next two years. However, I want to speak especially at this time of the need of forest roads.

I have heard some whisperings here indicating that it was not necessary that we take care of this item. There are 149 national forests with an area of 156,000,000 acres. Some of you gentlemen from New England I would like to have grasp the scope of these national forests. They equal the area of Maine, New Hampshire, Vermont, Massachusetts, Connecticut, Rhode Island, New York, Pennsylvania, New Jersey, Delaware, Maryland, Virginia, and North Carolina. When you spread $6,500,000 over a territory of that size you are not building very many roads. There will be at the conclusion of this expenditure, as there is now, many, many townships without a road and not a trail in sight. About 40 per cent of forest fires are due to lightning, and in many instances from the time a fire fighter sees the smoke it takes five days to get to the fire. I would like for you to get this picture: You see a great manufacturing district on fire. You see the smoke, but the road conditions are such that you can not get the fire department down there until it has burned for five days, and the thing that is burning is worth at the least calculation $600,000,000.

We need roads for fire protection. Another reason, we are marketing only one-seventh of the timber which ripens in the national forests. Overripe timber becomes windshaken, starts to decay, and not only is a loss but becomes a fire hazard. In other words, with roads, instead of deriving $2,000,000 annually from the sale of timber in the national forests we would be deriving $14,000,000 annually without in any way depleting the forests. We lose $12,000,000 annually because of insufficient roads.

Mr. DOWELL. Mr. Speaker, will the gentleman yield?

Mr. SUMMERS of Washington. I yield.

Mr. DOWELL. Does the gentleman attribute as the reason for not selling this timber the fact that there are no roads?

Mr. SUMMERS of Washington. Very largely.

Mr. DOWELL. There has been no evidence before the committee, has there, of any plan or policy in the department to dispose of more than is being done?

Mr. SUMMERS of Washington. All these figures have been brought out in the hearings.

Mr. DOWELL. Was that brought out by the department as the reason for building these roads?

Mr. SUMMERS of Washington. Fire protection, the marketing of timber, and the possibility of additional receipts from grazing were the three things that we brought out. At least $7,500,000 annually should be appropriated for national forest roads.

The SPEAKER. The time of the gentleman from Washington has expired.

Mr. SUMMERS of Washington. Mr. Speaker, I ask unanimouse consent to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Washington?

There was no objection.

Mr. SLEMP. Mr. Speaker, I yield four minutes to the gentleman from Minnesota [Mr. STEENERSON].

The SPEAKER. The gentleman from Minnesota is recognized for four minutes.

Mr. STEENERSON. Mr. Speaker, on January 14, when this bill was brought before the House, I made a point of order against it because it contained legislation, but the point of order was overruled on the ground that the appropriating clause in the bill says, "That the following sums are appropriated in conformity with the act of July 2, 1836, for the Post Office Department for the fiscal year ending June 30, 1923." That act provides that the actual sums required by the Post

Office Department each year shall be appropriated out of the revenues of the department, and all payments and receipts of the Post Office Department in the Treasury shall be placed to the credit of said appropriation.

Now, the first eight pages of this bill appropriate not for the service of the Post Office Department as it is understood in the law but for the expenses of maintaining the headquarters of the Post Office Department itself here in Washington, and the report of the committee stated that that was intended to be done out of the postal revenues. The point of order was finally overruled because, as suggested by the gentleman from Illinois [Mr. MANN], the appropriation was in conformity with this act and therefore we must assume that they will take the expenses of the Post Office Department out of the Treasury, as that law requires, and that the service of the department in the field will be taken out of the postal revenues.

However, when this bill went over to the Senate the committee of the Senate reported the same way as the committee, that this was a new appropriation for the department expenses here in Washington out of the revenue, contrary to what the ruling of the Chairman of the Committee of the Whole had held here. I then took the matter up with the Budget Bureau and called their attention to the form of their estimate for the Postal Service, which has this headline, "Out of the postal revenues," but no such heading precedes the estimates for the departmental expenses, and I was advised that it was their intention, in submitting the Budget to Congress, that Congress should appropriate out of the Treasury for the departmental expenses, as heretofore when it was carried in the legislative bill, and out of the revenues for the field expenses, the same as they had always done, and they declined to answer the question whether this was an appropriation or not.

When this bill becomes a law I suppose it will be up to the Comptroller General to say whether this is an appropriation out of the Treasury or out of the revenues. If it is an appropriation out of the revenues, of course they will have to send this money in from the different post offices, and there will be a great deal of difficulty in paying the expenses of the Post Office Department which heretofore have been paid directly out of the Treasury.

And another thing: This act does not appropriate anything out of the Treasury, but only "in conformity to the act of July 2, 1836," which says "out of postal revenues." It will be a conundrum for the Comptroller General and the Bureau of the Budget to settle hereafter. I apprehend they will have some difficulty in straightening it out unless they are able to make new law by construction. I think my original point was perfectly good, but if it was properly overruled, then the result must follow that the bill as it now stands does not contain the words necessary to constitute an appropriation out of the Treasury, as the Budget Bureau intended, in the estimate they submitted.

Mr. SLEMP. Mr. Speaker, I yield four minutes to the gentleman from Indiana [Mr. BENHAM].

The SPEAKER. The gentleman from Indiana is recognized for four minutes.

Mr. BENHAM. Mr. Speaker, I ask unanimous consent to revise and extend my remarks in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Indiana?

There was no objection.

Mr. BENHAM. Mr. Speaker and gentlemen of the House, I am pleased with all the features of this conference report except one, the vital one, the authorized appropriation for roads for 1923.

In 1920, when the two major parties held their conventions, there had been appropriated at that time and was available $110,000,000. Both parties in no unmistakable terms declared in favor of governmental participation in road building. One year later the Senate cut the amount by 25 per cent, $25,000,000, from the sum available at the time the two conventions declared themselves favorably, while the House had declared, by a very large majority, in favor of the appropriation of 1920, and the House conferees gave way to the Senate. Two years later—that is, at the present time—the Senate has cut off another $25,000,000 and reduced by one-half the amount authorized in 1920, upon which the people of the United States declared their approval, and the House conferees have again yielded to the Senate, although the House had declared by an almost unanimous vote in favor of a larger sum.

Logically, then, what follows? In two years more, for practical purposes, we will have ceased to participate in a governmental way in public road building. The Republican Party is on record. It promised governmental participation in road building. Is it going to repudiate that promise?

Mr. LAYTON. Mr. Speaker, will the gentleman yield there for an interruption?

Mr. BENHAM. Yes; for a very short question.

Mr. LAYTON. Do you think the people of the country are not interested at this particular time in a reduction of taxes?

Mr. BENHAM. I am not going to undertake to answer that question. It would take an hour to do so, but I will say yes, in a general way. Yet, speaking of the people of this country, if the doctor will get out into the country he will understand that the people are vitally interested in governmental participation in road building at this time.

Now, there are many other things that I would like to say, but my time is too short. The House conferees tell us that we have still available $140,000,000. They should not attempt to mislead the House by quoting the figures for January 1, 1922. This proposed appropriation of $50,000,000 is for the fiscal year 1923, beginning July 1, 1922. If their figures are worth anything, they should show the amount that will be available at the beginning of the new year. The records of the Bureau of Public Roads show that a very large part of that $140,000,000 represents contracts, and nearly all of the remainder has been allotted to given projects.

Instead of 14 States which do not need additional money to keep up their building program, the real number is 29, and 14 States will have to slow up their work if a sum in excess of the $50,000,000 provided by this bill is not appropriated.

We all approve, I am sure, the spirit of thrift and business judgment which prompted the various State highway commissions to slow up their letting of contracts at a time when the price of material and the scarcity of labor made this course judicious, but now that materials have cheapened and labor is not only available but in need of the work as well, this House should not be a party to the hindrance of their program.

The one great work of public improvement for the generation is, and should be, public road building, and, in my judgment, the people of the country expect no backward steps to be taken by this Congress.

The SPEAKER. The time of the gentleman from Indiana has expired.

Mr. SLEMP. Mr. Speaker, I yield four minutes to the gentleman from California [Mr. RAKER].

The SPEAKER. The gentleman from California is recognized for four minutes.

Mr. RAKER. Mr. Speaker, I ask unanimous consent to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. RAKER. Mr. Speaker, I want simply to call the attention of the committee to amendment 52, reading as follows:

> And the Postmaster General is authorized and directed to ascertain conditions arising from contracts in the star-route, screen-wagon, and other vehicle service entered into prior to January 1, 1918, with a view to determining whether any adjustment should be made in the compensation for the fiscal years ended June 30, 1918, June 30, 1919, June 30, 1920, and June 30, 1921, and make a report of his findings to the Congress not later than the first Monday in December, 1922.

The act of July 2, 1918, reads as follows:

> SEC. 4. That the Postmaster General is authorized to investigate conditions arising from contracts in the star route, screen wagon, and other vehicle service entered into prior to June 30, 1917, and from contracts for furnishing envelopes, blanks, and blank books, and the Official Postal Guide, for contracts entered into prior to June 30, 1917, with a view to determining whether any adjustment should be made in the compensation and to adjust the same for materials or services hereafter to be furnished or rendered in cases where the facts disclose the necessity for such adjustment, or, in his discretion, with the consent of the contractor and his bondsmen, the Postmaster General may cancel such contracts.

This act provided for the adjustment of star-route contracts entered into prior to June 30, 1917. Under that law, which was an amendment to the Post Office appropriation bill, the act of July 2, 1918, authorized the adjustment of star-route contracts thus entered into, and the Post Office Department, as shown by the records, did adjust all of the star-route contracts in districts 1, 2, and 3. District No. 4, which includes the Western States, was not provided for by that act, because the entering into of the contract was after June 30, 1917, and before July 1, 1918. You have adjusted the contracts for the war people, for the mineral people, for every public servant during the war, and for every man having a contract growing out of war conditions; but here in the fourth district applying to the star routes you have given these people absolutely no consideration.

Mr. MADDEN. Will the gentleman yield?

Mr. RAKER. I yield for a question.

Mr. MADDEN. I deny that.

Mr. RAKER. That is the fact.

Mr. MADDEN. We passed an act in 1918 making all contracts for star-route, screen-wagon, and other services in the Post Office Department entered into before June 30, 1917, subject to revision by the Postmaster General, and he revised them, and it covered every contract in the United States, including the fourth division; but some contracts in the fourth division were entered into immediately after July 1, 1917, and now what the gentleman wants is to open up the gates to 1919, 1920, and 1921 and revise them again.

Mr. RAKER. While the gentleman makes his statement I have the record here, and the hearings before the Committee on the Post Office and Post Roads, showing that they did not give any consideration to the contracts in the fourth district, because of the fact that those contracts were entered into after June 30, 1917, and these people are the only star-route contractors in the United States who have not been given consideration. I want to say to you that it is not right; that it is not fair; that it is not just; that it is not equitable; and it is not a proper way to do to give compensation and adjustment to all the other districts and exclude one large district of the United States because of its population and because of the want of a larger representation on the floor of the House.

Mr. KNUTSON. There was a general readjustment in 1918, was there not?

Mr. RAKER. Not on these contracts. That is where the gentleman falls down. You have got to know when the contracts were entered into.

Mr. KNUTSON. I am speaking of contracts entered into before the time limits.

Mr. RAKER. That was in districts 1, 2, and 3; but in district No. 4 they had no consideration. They had no adjustment. The Post Office Department so states and the Post Office Department officials so testify, and the record is that way clearly and beyond all cavil or doubt. The contracts in district No. 4 should be adjusted as the others. It is not treating the star-route contractors of this district 4 just and fair to adjust all the rest and leave them holding the sack. Treat all alike and all just; otherwise a great wrong and injustice will have been done. The amendment should be from and prior to January 1, 1919, instead of January 1, 1918. That could have been corrected by agreeing with the Senate amendment with an amendment by making it prior to January 1, 1919.

Mr. SLEMP. I yield four minutes to the gentleman from Alabama [Mr. ALMON].

Mr. ALMON. Mr. Speaker, Congress made an appropriation in 1916 to aid the States in road building. Since that time and during the last administration liberal appropriations were made for this purpose. Federal aid to roads is now an adopted policy of our Government. I favor large and increased appropriations for this purpose.

During the last administration we appropriated as much as $100,000,000 per annum, and I am in favor of double that amount or whatever amount can be properly and economically used in road construction. I am greatly disappointed at the attitude of the present administration in reducing appropriations for this purpose. This is an ideal time for road building. Road materials are cheaper; people are out of employment and need the work which could be furnished with large and liberal road appropriations. The people do not object to being taxed for road building, for they realize that it is a good investment when roads are properly built and maintained. They fully realize the advantages of good roads.

It is true that there are large amounts of Federal appropriations heretofore made which have not been used, and the States, I hope, will be able to carry on their road-building program even with the reduced appropriation provided in the conference report now under consideration. We are told that if this conference report is not adopted that we will not get any Federal-aid appropriation for the next year, so, while I object to the amount provided for, still I shall favor the report with the idea that it is better to get what is offered than no appropriation at all. The amount provided for in this report is the amount which seems to have been agreed upon by the majority and we will have to accept it. I trust that we will be able at the next session of Congress to make some additional appropriations to the items provided for in this report. I am in favor of making large appropriations for this purpose and go on and finish up our road building and get through with it—the sooner the better. [Applause.]

Mr. SLEMP. I yield two minutes to the gentleman from Illinois [Mr. MADDEN].

Mr. MADDEN. Mr. Speaker, I think it might as well be understood at the outset that we have $140,000,000 available for expenditure in 34 States now. When we provide for this $50-000,000 we will have $190,000,000 for 1923. The average annual expenditure for roads since the road program began has been less than $80,000,000 a year, and if you can show me how we can spend $190,000,000 in a single year when we have been spending only $80,000,000 and doing our best to spend it, I would like to have you show it to me.

Mr. SUMMERS of Washington. Will the gentleman yield?

Mr. MADDEN. I have not the time. I have only two minutes. Now, some question is raised about whether you can proceed with the work in 14 States. Well, they already have their work up to the limit of their authority. This legislation provides for them. It authorizes an appropriation of $50,000,000. It authorizes the Secretary of Agriculture to apportion that $50,000,000 among the States under the law. It authorizes the Secretary of Agriculture to enter into contract obligations with the States up to the amount of their allotments. It authorizes the States to enter into contracts with people who are going to build their roads. It binds the Congress of the United States to make the appropriation of the money as needed. What more is there to be done?

First, you have a hundred and ninety millions available; and, second, the contract obligations which authorize deficiencies to be incurred; and, third, you can not spend the money, for you have got twice as much as is needed.

Mr. SLEMP. Mr. Speaker, I move the previous question on the conference report.

The previous question was ordered.

The SPEAKER. The question is on agreeing to the conference report.

The question was taken; and on a division (demanded by Mr. RAKER) there were 51 ayes and 2 noes.

Mr. LARSEN of Georgia. Mr. Speaker, I make the point that no quorum is present.

The SPEAKER. Evidently there is no quorum present. The Doorkeeper will close the doors, the Sergeant at Arms will bring in the absentees, and the Clerk will call the roll. All those in favor of agreeing to the conference report will, when their names are called, answer "yea," and those opposed will answer "nay."

The question was taken; and there were—yeas 211, nays 26, answered "present" 1, not voting 192, as follows:

YEAS—211.

So the conference report was agreed to.

The following additional pairs were announced:

Additional general pairs:

Mr. Greene of Massachusetts with Mr. Jacoway.

Mr. Sanders of Indiana with Mr. Wilson.

Mr. Langley with Mr. Martin.

Mr. Rodenberg with Mr. Rucker.

Mr. Codd with Mr. Taylor of Colorado.

Mr. McPherson with Mr. Ward of North Carolina.

The result of the vote was announced as above recorded.

On motion of Mr. SLEMP, a motion to reconsider the vote whereby the conference report was agreed to was laid on the table.

LEAVE OF ABSENCE.

By unanimous consent, leave of absence was granted as follows:

To Mr. MCSWAIN (at the request of Mr. BULWINKLE), for two days, on account of important business.

To Mr. EVANS, until July 10, on account of important business.

To Mr. MILLER, for four days, on account of being on Board of Visitors, United States Naval Academy.

To Mr. ACKERMAN, for one day, on account of important business.

SENATE ENROLLED BILL SIGNED.

The SPEAKER announced his signature to enrolled bill of the following title:

S. 2775. An act to extend for one year the powers of the War Finance Corporation to make advances under the provisions of the act entitled "An act to amend the War Finance Corporation act, approved April 5, 1918, as amended, to provide relief for producers of and dealers in agricultural products, and for other purposes," approved August 24, 1921.

ADJOURNMENT.

Mr. SLEMP. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 2 o'clock and 34 minutes p. m.) the House adjourned until to-morrow, Wednesday, June 7, 1922, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

623. A communication from the President of the United States, transmitting, with a letter from the Acting Director of the Bureau of the Budget, a deficiency estimate for the Treasury Department for the fiscal year ending June 30, 1921, amounting to $28,122,500 for refunding taxes illegally collected (H. Doc. No. 327); to the Committee on Appropriations and ordered to be printed.

624. A communication from the President of the United States, transmitting, with a letter from the Acting Director of the Bureau of the Budget, supplemental and deficiency estimates for the District of Columbia for the fiscal year ending June 30, 1922, and June 30, 1923, amounting to $292,051.20 (H. Doc. No. 328); to the Committee on Appropriations and ordered to be printed.

625. A communication from the President of the United States, transmitting, with a letter from the Acting Director of the Bureau of the Budget, a supplemental estimate of appropriation for the Department of Commerce for the fiscal year ending June 30, 1923, for the Lighthouse Service, repairs and improvements to Stannard Rock Light Station, Mich., $50,000 (H. Doc. No. 329); to the Committee on Appropriations and ordered to be printed.

626. A communication from the President of the United States, transmitting, with a letter from the Acting Director of the Bureau of the Budget, a deficiency estimate for the War Department for the payment of claims of the Cranford Paving Co., Littlefield, Alvord & Co., and Christian Heurich, amounting to $19,777.82 (H. Doc. No. 330); to the Committee on Appropriations and ordered to be printed.

627. A communication from the President of the United States, transmitting, with a letter from the Acting Director of the Bureau of the Budget, a supplemental estimate of appropriation for the Department of Commerce for the fiscal year ending June 30, 1923, amounting to $36,160, for alterations to mine sweepers, Coast and Geodetic Survey (H. Doc. No. 331); to the Committee on Appropriations and ordered to be printed.

628. A communication from the President of the United States, transmitting, with a letter from the Acting Director of the Bureau of the Budget, a supplemental estimate of appropriation for the fiscal year ending June 30, 1923, in the amount of $353,045, summarized as follows: Interior Department, $279,275; Treasury Department, $39,770; General Accounting Office, $34,000 (H. Doc. No. 332); to the Committee on Appropriations and ordered to be printed.

629. A communication from the President of the United States, transmitting, with a letter from the Acting Director of the Bureau of the Budget, a supplemental estimate of appropriation for the Interior Department for the fiscal year ending June 30, 1922, for printing and binding, $30,000 (H. Doc. No. 333); to the Committee on Appropriations and ordered to be printed.

630. A communication from the President of the United States, transmitting, with a letter from the Acting Director of the Bureau of the Budget, a supplemental estimate of appropriation for the General Accounting Office for the fiscal year ending June 30, 1923, for salaries, General Accounting Office, $58,350 (H. Doc. No. 334); to the Committee on Appropriations and ordered to be printed.

631. A communication from the President of the United States, transmitting, with letter from the Acting Director of the Bureau of the Budget, an estimate of appropriation in the sum of $358.58 required by the United States Coast Guard, Treasury Department, for payment of damages caused by collisions with certain Coast Guard vessels (H. Doc. No. 335); to the Committee on Appropriations and ordered to be printed.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII,

Mr. BULWINKLE: Committee on Claims. H. R. 3499. A bill for the relief of the Atlas Lumber Co., Babcock & Willcox, Johnson, Jackson & Corning Co., and the C. H. Klein Brick Co., each of which companies furnished to Silas N. Opdahl, a failing Government contractor, certain building materials which were used in the construction of Burke Hall, at the Pierre Indian School, in the State of South Dakota; with amendments (Rept. No. 1067). Referred to the Committee of the Whole House.

Mr. ROSE: Committee on Claims. H. R. 9862. A bill for the relief of the Fred E. Jones Dredging Co.; with an amendment

(Rept. No. 1068). Referred to the Committee of the Whole House.

Mr. BULWINKLE: Committee on Claims. H. R. 7447. A bill to reimburse William H. Flagg and others for property destroyed by mail airplane *No. 73*, operated by the Post Office Department; with amendments (Rept. No. 1069). Referred to the Committee of the Whole House.

Mr. GLYNN: Committee on Claims. H. R. 10529. A bill for the relief of Harry E. Fiske; with an amendment (Rept. No. 1070). Referred to the Committee of the Whole House.

Mr. EDMONDS: Committee on Claims. H. R. 11287. A bill for the relief of W. B. Moses & Sons, Willis-Smith-Crall Co., American Home Furnishers Corporation, Western Electric Co., and S. A. Curtis; without amendment (Rept. No. 1071). Referred to the Committee of the Whole House.

CHANGE OF REFERENCE.

Under clause 2 of Rule XXII, the Committee on Claims was discharged from the consideration of the bill (S. 2210) for the relief of Lucy Paradis, and the same was referred to the Committee on Indian Affairs.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII,

Mr. NEWTON of Missouri introduced a bill (H. R. 11928) authorizing the Secretary of the Interior to lease to certain persons and corporations certain lands in Tillman and Cotton Counties, Okla., belonging to the United States that were, prior to February 25, 1920, claimed in good faith under the placer mining laws of the United States, and for other purposes, which was referred to the Committee on the Public Lands.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BROWN of Tennessee: A bill (H. R. 11929) granting an increase of pension to W. J. Johnston; to the Committee on Invalid Pensions.

By Mr. GORMAN: A bill (H. R. 11930) granting a pension to James J. Healy; to the Committee on Pensions.

By Mr. HICKS: A bill (H. R. 11931) granting a pension to Annie Spreeman; to the Committee on Pensions.

By Mr. LINTHICUM: A bill (H. R. 11932) for the relief of Walter Kent, jr.; to the Committee on Claims.

Also, a bill (H. R. 11933) for the relief of the owners of the French bark *France;* to the Committee on Claims.

By Mr. PARKER of New York: A bill (H. R. 11934) granting a pension to Pearl L. Adamson; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11935) granting an increase of pension to Penina A. Wright; to the Committee on Invalid Pensions.

By Mr. ROACH: A bill (H. R. 11936) granting a pension to Eliza J. Pack; to the Committee on Invalid Pensions.

By Mr. STRONG of Pennsylvania: A bill (H. R. 11937) granting a pension to William G. McElhaney, alias William G. McElharney; to the Committee on Invalid Pensions.

By Mr. WHEELER: A bill (H. R. 11938) to correct the military record of John R. Butler; to the Committee on Military Affairs.

By Mr. MACGREGOR: A resolution (H. Res. 362) providing for six months' salary to be paid the widow of Levi E. Short; to the Committee on Accounts.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

5914. By the SPEAKER (by request): Resolutions adopted by unanimous vote of the San Francisco Labor Council, San Francisco, Calif., commending Senator HIRAM W. JOHNSON for his efforts to bring about legislation regulating child labor; to the Committee on the Judiciary.

5915. By Mr. BURROUGHS: Petition of West Congregational Church of West Concord, N. H., Rev. M. Duston Webster, pastor; M. J. Snow, clerk; advocating action by the Government of the United States toward the establishment of a protected and independent life of the people of Armenia; to the Committee on Foreign Affairs.

5916. By Mr. CONNOLLY of Pennsylvania: Evidence in support of House bill 11908, granting a pension to Frederick C. Oulahan; to the Committee on Pensions.

5917. By Mr. KISSEL: Petition of Women's Constitutional League of Maryland, Baltimore, Md., favoring the passage of the Army appropriation bill as passed by the Senate; to the Committee on Military Affairs.

5918. Also, petition of Chamber of Commerce of the State of New York, New York City, favoring the reestablishment of pneumatic tube mail service; to the Committee on Post Office and Post Roads.

5919. By Mr. LAWRENCE (by request): Resolutions adopted by the Ministers Alliance of Hamilton, Mo., indorsing House Joint Resolution 159; to the Committee on the Judiciary.

5920. By Mr. MACGREGOR: Petition of Robert E. Brown, of Buffalo, protesting against the proposed treaty between the allied powers and Turkey which threatens to return the Armenians to unrestricted Turkish control; to the Committee on Foreign Affairs.

5921. Also, petition of Jacob Finger, minister, Normal Park Methodist Episcopal Church, of Buffalo, N. Y., relative to the allied powers of Europe being about ready to turn Armenia over to unrestricted control of Turkey; to the Committee on Foreign Affairs.

5922. Also, resolutions adopted by the Central Council League of Railroad Employees urging the enactment of laws relative to agreements between the railroad shop crafts and the railroad companies; to the Committee on Interstate and Foreign Commerce.

5923. By Mr. RAKER: Petitions of the Women's International League for Peace and Freedom, assembled in Washington, D. C., relative to foreign relations, internal conditions of the United States, and taxation; also, letter from Rev. Gross W. Alexander, of Long Beach, Calif., relative to aid for the Armenians; to the Committee on Foreign Affairs.

5924. Also, petitions of United Chemical Works, of New York City, urging the passage of a tariff bill, and referring particularly to the rate on citrus by-products; H. W. Baker Linen Co., of Los Angeles, Calif., calling attention to the item of linens as proposed in the new tariff rates (Senate bill); to the Committee on Ways and Means.

5925. Also, petition of Grand Parlor, Native Sons of the Golden West, relative to concessions being granted for other purposes to include patriotic purposes; to the Committee on the Judiciary.

5926. Also, petition of Chanslor & Lyon Co., of San Francisco, Calif., urging support of House bill 11, known as the Stephens-Kelly bill; to the Committee on Interstate and Foreign Commerce.

SENATE.

WEDNESDAY, *June 7, 1922.*

(Legislative day of Thursday, April 20, 1922.)

The Senate met at 11 o'clock a. m., on the expiration of the recess.

Mr. CURTIS. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The reading clerk called the roll, and the following Senators answered to their names:

Ball	Frelinghuysen	McCumber	Rawson
Borah	Gooding	McKinley	Robinson
Brandegee	Hale	McLean	Sheppard
Bursum	Harris	McNary	Shortridge
Calder	Harrison	Myers	Simmons
Cameron	Heflin	Nelson	Smith
Capper	Johnson	Newberry	Smoot
Caraway	Jones, N. Mex.	Nicholson	Spencer
Colt	Jones, Wash.	Oddie	Sterling
Culberson	Kellogg	Overman	Townsend
Curtis	Kendrick	Page	Underwood
Dial	King	Pepper	Wadsworth
Dillingham	Ladd	Phipps	Walsh, Mass.
Edge	La Follette	Poindexter	Watson, Ga.
Fernald	McCormick	Pomerene	Watson, Ind.

Mr. UNDERWOOD. I wish to announce that the senior Senator from Florida [Mr. FLETCHER] is absent on account of illness. I ask that this announcement may stand for the day.

Mr. CURTIS. I desire to announce that the senior Senator from Wyoming [Mr. WARREN] is detained in a committee meeting.

The VICE PRESIDENT. Sixty Senators have answered to their names. A quorum is present.

CLAIMS ON UNSURVEYED LAND IN NEW MEXICO.

The VICE PRESIDENT laid before the Senate the amendment of the House of Representatives to the bill (S. 2014) to provide for the settlement of small holding claims on unsurveyed land in the State of New Mexico, which was, on page 3, line 2, after "States," to insert " : *And provided further,*

That this act shall not apply to any city lot, town lot, village lot, farm lot, or pasture lot held under a grant from any corporation or town the claim to which may fall within the provisions of this act."

Mr. BURSUM. I move that the Senate concur in the amendment of the House of Representatives.

The motion was agreed to.

REINTERMENT OF SOLDIER DEAD.

The VICE PRESIDENT. The Chair is in receipt of a communication from the Quartermaster General of the Army, transmitting a list of American soldier dead returned from overseas, to be reinterred in the Arlington National Cemetery, Thursday, June 8. The communication will lie on the desk of the Secretary for the information of the Senate.

BITUMINOUS COAL PRODUCTION (S. DOC. NO. 209).

The VICE PRESIDENT laid before the Senate a communication from the Secretary of Commerce, transmitting, in response to Senate Resolution 298, agreed to June 2, 1922, certain information relative to production, consumption, and prices of mined bituminous coal since April 1, 1922, and the activities of governmental agencies to terminate the coal strike and protect consumers of coal, etc., which, with the accompanying papers, was referred to the Committee on Education and Labor and ordered to be printed.

PETITIONS AND MEMORIALS.

Mr. CURTIS presented a resolution adopted at the thirty-eighth annual convention, Woman's Relief Corps, Grand Army of the Republic, Department of Kansas, of Parsons, Kans., favoring the passage of the so-called Morgan bill increasing pensions of Civil War veterans and their widows, which was referred to the Committee on Pensions.

Mr. CAPPER presented a petition of sundry citizens of Kansas City, Kans., praying for the enactment of legislation creating a department of education, which was referred to the Committee on Education and Labor.

Mr. HARRISON presented a resolution adopted by the Mississippi Valley Flood Control Association, of Natchez, Miss., favoring action by Congress and the Mississippi River Commission to perfect the Mississippi River levees and to construct a sufficient number of control spillways from that river so as to prevent future overflow of the lowlands, etc., which was referred to the Committee on Commerce.

Mr. McLEAN presented a letter in the nature of a petition from J. D. Doolittle, of R. A. Storrs Post, No. 92, American Legion, of Cheshire, Conn., praying for the passage of the soldiers' bonus bill, which was referred to the Committee on Finance.

He also presented a petition of the Hartford (Conn.) Rotary Club, praying for the prompt passage of the so-called Jones-Miller bill, providing for suppression of the traffic in narcotics, which was referred to the Committee on Finance.

He also presented petitions of members of the Talcottville Congregational Church, of Talcottville; the six evangelical churches of Woodstock; the First Congregational Church of Woodstock; the Congregational Church of North Woodstock; the First, Grace, and Trinity Churches of Windsor; the Wauregan Congregational Church, of Wauregan; the Methodist Episcopal Church of Attawaugan; the Womans' Branch, Republican State Central Committee, of Woodstock; and the Young Men's Christian Association of Bridgeport, all in the State of Connecticut, praying for the granting of relief to the suffering peoples of Armenia, which were referred to the Committee on Foreign Relations.

Mr. SHORTRIDGE presented petitions numerously signed by sundry citizens of Los Angeles and vicinity, in the State of California, praying that only a moderate duty on kid gloves be imposed in the pending tariff bill, which were referred to the Committee on Finance.

He also presented resolutions of San Francisco Post, No. 1, American Legion, of San Francisco, Calif., favoring the passage of legislation looking toward the recognition of the Republic of Mexico by the Government of the United States, which were referred to the Committee on Foreign Relations.

He also presented resolutions of the boards of directors of the Exeter Chamber of Commerce, of Exeter, and the Civic Commercial Association, of Bakersfield, both in the State of California, protesting against the enactment of legislation to amend or weaken the transportation act of 1920, which were referred to the Committee on Commerce.

He also presented resolutions of the San Francisco district, California Federation of Women's Clubs, and Pomona Chapter, Daughters of the American Revolution, of Pomona, both in the State of California, favoring the enactment of legislation creating a department of education, which were referred to the Committee on Education and Labor.

He also presented letters in the nature of petitions from sundry granges in the State of California, praying that privileges be accorded farmers in the management of the American banking system; for the election of six directors by farmer stockholders in each Federal land bank, the Federal Government appointing three directors representing the Government and the country's interest, and remonstrating against the effecting of any radical or supergovernmental dominated banking system, which were referred to the Committee on Banking and Currency.

Mr. NEWBERRY presented a petition of sundry citizens of Chesaning, Burt, and New Lothrop, all in the State of Michigan, praying for the imposition in the pending tariff bill of a duty of $2 per 100 pounds on Cuban sugar, which was referred to the Committee on Finance.

ENROLLED BILLS PRESENTED.

Mr. SUTHERLAND, from the Committee on Enrolled Bills, reported that they had presented to the President of the United States the following enrolled bills:

On June 6, 1922:

S. 539. An act to further amend an act entitled "An act to regulate commerce," approved February 4, 1887, as amended; and

On June 7, 1922:

S. 2775. An act to extend for one year the powers of the War Finance Corporation to make advances under the provisions of the act entitled "An act to amend the War Finance Corporation act, approved April 5, 1918, as amended, to provide relief for producers of and dealers in agricultural products, and for other purposes," approved August 24, 1921.

BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. CURTIS:

A bill (S. 3685) granting a pension to Mary Lake (with accompanying papers);

A bill (S. 3686) granting a pension to Maggie Crouch (with accompanying papers); and

A bill (S. 3687) granting a pension to Orpha F. Hampton (with accompanying papers); to the Committee on Pensions.

A bill (S. 3688) for the relief of Harry Wingrove (with accompanying papers); to the Committee on Military Affairs.

By Mr. BALL:

A bill (S. 3689) to amend an act of Congress approved June 18, 1898, entitled "An act to regulate plumbing and gas fitting in the District of Columbia"; to the Committee on the District of Columbia.

By Mr. HARRISON:

A bill (S. 3690) for the relief of Lowe Hayden Bibby; to the Committee on Naval Affairs.

By Mr. McKINLEY:

A bill (S. 3691) granting a pension to Hector C. Fairfowl; to the Committee on Pensions.

PAY OF CERTAIN NAVAL OFFICERS.

Mr. HARRIS (by request) submitted an amendment providing that the Comptroller General of the United States be authorized and directed to allow in the settlement of accounts of disbursing officers of the Navy amounts credited, prior to his decision of May 20, 1922, as the "highest pay of his grade" to the officers detailed as assistants to the chiefs of the Bureaus of Supplies and Accounts and Medicine and Surgery, intended to be proposed by him to the bill (H. R. 7864) providing for sundry matters affecting the Naval Establishment, which was referred to the Committee on Naval Affairs and ordered to be printed.

ANNIE B. LEE.

Mr. CALDER submitted the following resolution (S. Res. 303), which was referred to the Committee to Audit and Control the Contingent Expenses of the Senate:

Resolved, That the Secretary of the Senate be, and he hereby is, authorized and directed to pay from the miscellaneous items of the contingent fund of the Senate, fiscal year 1921, to Annie B. Lee, widow of George L. Lee, late a laborer in the employ of the Senate, a sum equal to six months' compensation at the rate he was receiving by law at the time of his death, said sum to be considered as including funeral expenses and all other allowances.

SUNDAY OBSERVANCE LAW FOR THE DISTRICT OF COLUMBIA.

Mr. MYERS. Mr. President, I ask the indulgence of the Senate for a few minutes. Some months ago I introduced in the Senate of the present Congress a bill (S. 1948) to provide a very mild and liberal Sunday observance law for the District of Columbia. There is some such legislation on the statute books,

I am informed, of 46 States of the Union and, strangely and regrettably, none whatever as to the District of Columbia. The bill was referred to the Committee on the District of Columbia.

There is a very worthy institution, with headquarters in Washington, known as the International Reform Bureau; an institution engaged in promoting legislation of a moral and beneficial character, of which the superintendent is Dr. W. F. Crafts, well known to many Senators.

I observe in a recent edition of a publication called "Liberty," a copy of which I hold in my hand, published at Takoma Park, Washington, D. C., the statement that the bill to which I have referred was "introduced at the instigation of the International Reform Bureau, presided over by Dr. W. F. Crafts." There is not a particle of truth in that statement. There is no foundation whatever for it. It is wholly erroneous. Neither Doctor Crafts nor anybody else connected with the International Reform Bureau was consulted by me about introducing such a bill, or knew anything about the introduction of that bill or made any suggestion about it, or had anything whatever to do with it. They were all in entire ignorance of it.

I feel like apologizing to the Senate for taking up its time with such a matter as this, even to the extent of only a few minutes. I know it does not make any difference to Senators who asked me to introduce a bill. Senators do not care who asks or causes the introduction of a bill. It does not make any difference to Senators who may ask a Senator to introduce a bill. They care nothing about it. In fact, they care little or nothing about what Senator introduces a bill. They judge bills on their merits or demerits, as the case may be. A bill is judged by its objects and provisions, regardless of who may have introduced it or asked its introduction.

I care nothing particularly about this untrue statement. It matters little to me; but I do not like to have another person put in a false attitude, either creditable or discreditable, in connection with any action of mine. I do not like to have something saddled upon Doctor Crafts, when he had nothing to do with it. It is unjust to him. He may not object, but I do not think anything should be attributed to him, either good or bad, with which he had nothing whatever to do. It is not right to do so. I think it a duty that I owe Doctor Crafts and the International Reform Bureau to say that no person connected with it had anything whatever to do with the introduction of the bill to which I have referred. I have very high regard for Doctor Crafts. I am in sympathy with his work. He may be in sympathy with the purposes of the bill I have mentioned, and doubtless is, but he had nothing whatever to do with its introduction. He is engaged in other work of probably even greater importance.

I think a statement similar to the one I have just quoted has heretofore appeared in the same publication, and I think the publishers have been informed that it was incorrect. If so, it would appear that the misstatement of fact quoted by me a few minutes ago is an intentional misstatement. I can not say as to that, however, with certainty. However, if the publishers or the editor should happen to read the correction I am making and if this misstatement of fact should then be repeated, it would be intentional, which I hope will not be the case.

The Sunday observance bill introduced by me originated in my own mind, and I rather object to the implication that nothing good can originate in my mind; that I have to go to Doctor Crafts to get every good idea that I try to promote. I conceived the idea of introducing the bill, and the only persons whom I consulted in advance about its introduction were two representatives of the press who sit in the press gallery. I do not mean they are sitting there now, but they are entitled to sit there and often do so. They approved the idea and advised me to introduce the bill. Thus when I wanted advice I went to representatives of the press, the great supporter and guardian of the public welfare.

As I have said, legislation similar to that proposed by my bill, more or less comprehensive, is on the statute books of 46 States of the Union, and I think it a shame and reproach that nothing of the kind is on the statute books for the District of Columbia; that in the District of Columbia employees may be required by their employers to work seven days in the week the year round; that people may trade and traffic and conduct business on Sunday the same as on any other day; that amusements conducted for commercial profit, monetary gain, run openly all day Sunday. I think the District of Columbia should be in line with the 46 States in the Union which have taken a stand for some respectful observance of the Sabbath day, with some reasonable and moderate legislation upon the subject. The Capital of our country should set an example in that respect to the rest of the country. At least, it should not lag behind the rest of the country. That is the reason I introduced that bill.

While the bill has not been acted upon by the Committee on the District of Columbia, I am ready at any time the committee may wish me to do so to appear before the committee and make an argument in favor of the bill, and I hope some time during the life of this Congress the bill may receive attention from the committee.

In this connection I take occasion now to express my emphatic disapproval of the recent action of the National Woman's Party in holding a nation-wide gathering in this city and dedicating its home on the Sabbath day. Of course, it had a right to dedicate its home, but I think it should have selected some other day for that purpose. In my opinion it should not have used the Sabbath day for the holding of a great meeting of a purely secular and political nature. The two great political parties of this country, the Democratic and Republican Parties, when they hold their national conventions, conducted nearly altogether by men, for some days or a week, always adjourn over Sunday, and in that way show respect for the day and for the sentiment of the millions of Christian people of this country. I think those in charge of the affairs and conduct of the National Woman's Party are setting a poor example to the other women of this country when they do not show as much respect for the Sabbath day and for Christian sentiment as do those men who conduct the affairs of the Democratic and Republican Parties when they hold their great national conventions. They should certainly show as much respect for the Sabbath as do men. If the women who compose the National Woman's Party wish to appeal to the majority of the men and women of the country and to accomplish something, I think they should observe a proper respect for public sentiment upon the question of Sunday observance and for the sentiments of Christian people. I do not believe in devoting Sunday to politics. Six days a week for that are enough.

RECLASSIFICATION OF CERTAIN GOVERNMENT EMPLOYEES.

Mr. STERLING. I desire to call attention to the bill (H. R. 11407) to amend an act entitled "An act for the retirement of employees in the classified civil service, and for other purposes," approved May 22, 1920, which passed the House last Monday. As the House bill is identical with Senate bill 3488, which has already been reported by the Committee on Civil Service, in behalf of the committee I ask unanimous consent to report the House bill favorably, and I also ask unanimous consent for the present consideration of the House bill.

Mr. SMOOT. What is the calendar number of the Senate bill to which the Senator from South Dakota refers?

Mr. STERLING. The calendar number is 625. The purpose of the bill is to give charwomen and laborers after serving the necessary time the benefits of the civil service retirement act. The bill is recommended by the Department of the Interior.

Mr. SMOOT. I wish the Senator from South Dakota would make his request a little later, so that I may have an opportunity of reading the bill over.

Mr. STERLING. It is a very short bill.

Mr. SMOOT. It is not a matter of the length or the shortness of the bill, but it is what the bill really proposes to do in which I am interested. I have had no opportunity to read the bill. I may have no objection to it; I do not know; but I should like to read it.

Mr. STERLING. Very well; I will let the matter go over for the present, in order to give the Senator from Utah an opportunity to read the bill.

Mr. STERLING subsequently said: Mr. President, before proceeding with another paragraph in the tariff bill, I should like to renew the request that I made this morning for the present consideration of H. R. 11407, relating to putting certain laborers, charwomen, and so forth, under the benefits of the retirement law. The Senator from Utah [Mr. SMOOT] this morning said that he would like to have some time in which to examine the question.

Mr. SMOOT. I have no objection, if it does not lead to any debate.

Mr. STERLING. I do not think it will lead to any debate. If it does, I will withdraw it.

Mr. SMOOT. If it leads to any debate, I will ask that it be laid aside.

The PRESIDING OFFICER [Mr. BURSUM in the chair]. The Secretary will state the title of the bill.

The READING CLERK. A bill (H. R. 11407) to amend an act entitled "An act for the retirement of employees in the classified civil service, and for other purposes," approved May 22, 1920.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which was read, as follows:

Be it enacted, etc., That section 2 of the act entitled "An act for the retirement of employees in the classified civil service, and for other purposes," approved May 22, 1920, is hereby amended by inserting after the seventh paragraph the following:

"Class G shall include charwomen, laborers, and other employees whether classified or unclassified, who are employed on a regular annual basis and whose basic salary, pay, or compensation is at a rate less than $600 per annum. The annuity to any retired employee shall be determined according to the method prescribed in the foregoing schedules, except that no annuity shall hereafter be granted to exceed the per cent nor the maximum provided for the respective periods of service. It is provided that this class of employees shall otherwise be subject to the provisions of the act of May 22, 1920."

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

Mr. STERLING. I move that Senate bill 3488, which is the same as the House bill, be indefinitely postponed.

The motion was agreed to.

POST OFFICE APPROPRIATIONS—CONFERENCE REPORT.

Mr. TOWNSEND. I ask unanimous consent that the conference report on the Post Office appropriation bill may be laid before the Senate. It went over on yesterday at the request of the junior Senator from Utah [Mr. KING]. I have seen that Senator this morning and he has withdrawn his objection to the report and consented that it may be considered at this time.

Mr. POMERENE. I did not hear the Senator's statement.

The VICE PRESIDENT. The Chair could not hear the request of the Senator.

Mr. TOWNSEND. I ask unanimous consent that the conference report on the Post Office appropriation bill be now laid before the Senate. It was brought before the Senate on yesterday and read, but the junior Senator from Utah [Mr. KING] stated that he desired that it should go over until this morning to enable him to have time to read it. I have seen the Senator from Utah this morning and he states that he has no objection to the report.

The VICE PRESIDENT. Is there objection to the request of the Senator from Michigan to proceed to the consideration of the conference report?

There being no objection, the Senate proceeded to consider the report of the committee of conference on the disagreeing votes of the two Houses on certain amendments of the Senate to the bill (H. R. 9859) making appropriations for the Post Office Department for the fiscal year ending June 30, 1923, and for other purposes.

The VICE PRESIDENT. The question is on agreeing to the conference report.

Mr. UNDERWOOD. I understand that the conference report was read in full on yesterday?

Mr. TOWNSEND. Every word of it was read.

The VICE PRESIDENT. The question is on agreeing to the report.

The report was agreed to.

G. C. CALDWELL.

Mr. DIAL. Mr. President, I ask unanimous consent for the present consideration of the bill (H. R. 7052) for the relief of G. C. Caldwell. The bill has passed the House and been unanimously reported by the Committee on Claims of the Senate. I presume there will be no objection to it.

Mr. SMOOT. I will inquire of the Senator, what is the calendar number of the bill?

Mr. DIAL. It is Order of Business No. 733.

Mr. SMOOT. I should like to know what the bill provides.

The VICE PRESIDENT. For the information of the Senate, the Secretary will read the bill.

The bill was read, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay to G. C. Caldwell, out of any sums in the Treasury not otherwise appropriated, the sum of $132.85 for damages to his automobile by an Army truck belonging to the Government.

The VICE PRESIDENT. Is there objection to the present consideration of the bill?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

CIVIL WAR VETERANS AND THEIR WIDOWS ON PENSION ROLL.

Mr. BURSUM. Mr. President, I have a statement from the Bureau of Pensions which shows the number of deaths of veterans and widows of veterans of the Civil War since May, 1921. It appears from the statement that since May, 1921, 24,645 veterans of the Civil War and 20,677 widows of Civil War veterans have died. I think that the statement may be of interest to the Senate and I ask unanimous consent that it may be printed in the RECORD.

Mr. POMERENE. Mr. President, in that connection, can the Senator state the number of old soldiers who are now on the pension roll?

Mr. BURSUM. There are approximately 170,000 now on the roll.

Mr. POMERENE. I thought there were about 200,000.

Mr. BURSUM. Last year there were something over 190,000, but the statement shows that over 24,000 have died since that time and, of course, their names have been dropped from the roll. It also shows that more than 20,000 widows have died.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

DEPARTMENT OF THE INTERIOR,
BUREAU OF PENSIONS,
Washington, May 22, 1922.

Mr. JOHN T. RYAN,
Vice Commander Kit Carson Post, No. 2,
Grand Army of the Republic, 759 Seventh Street SE.,
Washington, D. C.

DEAR MR. RYAN: In compliance with your request for a statement of the number of Civil War veterans and widows dropped from the pension rolls during the past year by reason of death, I give below a detailed statement showing these losses, month by month, from May 1, 1921, to April 30, 1922, inclusive:

Month.	Soldiers.	Widows.	Total.
1921.			
May	2,016	1,791	3,807
June	2,170	1,697	3,867
July	1,871	1,394	3,265
August	1,825	1,531	3,356
September	1,945	1,586	3,531
October	1,697	1,279	2,976
November	1,733	1,276	3,009
December	1,959	1,939	3,898
1922.			
January	2,255	1,831	4,086
February	2,164	1,922	4,086
March	2,465	2,327	4,792
April	2,545	2,104	4,649
	24,645	20,677	45,322

Cordially yours,

HAYS HAYMAKER, *Chief Clerk.*

PUBLICITY FUND OF FEDERAL RESERVE BOARD.

Mr. McCUMBER. I ask that the unfinished business be now proceeded with.

Mr. HEFLIN. Mr. President, I was called out of the Chamber a little while ago at the time when I expected to ask unanimous consent to consider the resolution I offered yesterday afternoon. The Senator from Connecticut [Mr. MCLEAN] asked that it should go over until to-day so that he could look into it. I do not think there will be any objection to the resolution, and I ask unanimous consent for its present consideration.

Mr. McCUMBER. The Senator from Connecticut is absent and I have sent for him. If the Senator will withhold his request until the Senator from Connecticut comes in I shall yield to him for the purpose.

Mr. HEFLIN. Very well.

The Senator from Alabama [Mr. HEFLIN] subsequently said: Mr. President, the Senator from Connecticut [Mr. MCLEAN] is in the Chamber now, and I ask unanimous consent for the present consideration of the resolution which I send to the desk, with question 5 added.

Mr. FRELINGHUYSEN. Reserving the right to object, I ask that it be read.

The VICE PRESIDENT. For the information of the Senate, the Secretary will read the resolution.

The ASSISTANT SECRETARY. Senate Resolution 302, which was introduced yesterday and went over under the rule, has now been modified to read as follows——

Mr. FRELINGHUYSEN. I have been informed of the contents of the resolution, and I have no objection.

Mr. WADSWORTH. I should like to hear it read, Mr. President.

The VICE PRESIDENT. The Secretary will read the resolution for the information of the Senate.

The Assistant Secretary read the resolution as modified, as follows:

Whereas it has been charged on the floor of the Senate that the Federal Reserve Board has a publicity fund of several thousand dollars which it uses, from time to time, to carry on a newspaper propaganda in support of the acts and policies of the Federal Reserve Board; and

Whereas it has been charged that a portion of said publicity fund has been used to induce certain newspapers to praise and defend the

acts and policies of said Federal Reserve Board, and to attack and condemn Senators who have criticized the deflation policy of said board: Therefore be it

Resolved, That the Federal Reserve Board be, and it is hereby, requested to furnish to the Senate, at its earliest convenience, in writing, all the information in its possession touching the matters specifically set out in the following questions:

(1) Has the Federal Reserve Board a publicity fund; if so, how much or what amount is provided per annum, and from what source is such a fund derived?

(2) For what purpose is said fund now used, and for what purpose has it been used since May 15, 1920, to June 1, 1922?

(3) To what person or persons and in what amounts and for what service performed has money been paid from said publicity fund since May 15, 1920, to June 1, 1922?

(4) How is such fund disbursed—upon whose order is it paid out?

(5) What sum is expended annually for publishing the monthly bulletins of said board, including salaries and other expenses connected with the printing of said bulletin?

Mr. WADSWORTH. Mr. President, I shall have no objection to the present consideration of the resolution if the Senator will strike out the word "deflation" in the last line of the second preamble.

Mr. HEFLIN. Let me see, Mr. President, how it would read then.

The ASSISTANT SECRETARY. It is proposed to strike out the word "deflation" before the word "policy in the last "Whereas," so that it will read:

Who have criticized the policy of said board.

Mr. WADSWORTH. I am unwilling that the Senate, by direction or indirection, shall seem to go on record as describing the policy of the board as one of deflation. If the Senator will take out the word "deflation," I shall have no objection to the present consideration of the resolution.

Mr. HEFLIN. Mr. President, of course I am at the mercy of the Senator. He can object to the consideration of the resolution. I do not suppose that modification will keep me from getting the information I desire; so, if the Senator demands it, it will have to go out.

The VICE PRESIDENT. The Senator from Alabama modifies his resolution in accordance with the suggestion of the Senator from New York.

The resolution, as modified, was considered by unanimous consent and agreed to.

The preamble as modified was agreed to.

THE TARIFF.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 7456) to provide revenue, to regulate commerce with foreign countries, to encourage the industries of the United States, and for other purposes.

Mr. McCUMBER. Mr. President, I ask that the Senate return to paragraph 318, which covers woven-wire cloth.

The VICE PRESIDENT. The Secretary will state the amendments to paragraph 318.

The READING CLERK. On page 61, line 7, before the words "per cent," it is proposed to strike out "20" and insert "25"; on line 9, before the words "per cent," to strike out "30" and insert "40"; and in line 11, before the word "per cent," to strike out "40" and insert "45," so as to make the paragraph read:

PAR. 318. Woven-wire cloth: Gauze, fabric, or screen, made of wire composed of steel, brass, copper, bronze, or any other metal or alloy, not specially provided for, with meshes not finer than 30 wires to the linear inch in warp or filling, 25 per cent ad valorem; with meshes finer than 30 and not finer than 90 wires to the linear inch in warp or filling, 40 per cent ad valorem; with meshes finer than 90 wires to the linear inch in warp or filling, 45 per cent ad valorem.

Mr. McCUMBER. Mr. President, on behalf of the committee I am going to ask the Senate to disagree to the committee amendment in line 7, and also to the committee amendment in line 9, leaving the committee amendment as proposed in line 11. The rates under the paragraph will then be 20 per cent, 30 per cent, and 45 per cent, respectively. Upon a reconsideration of the matter the committee this morning considered that 20 per cent was sufficient on the coarser mesh wire cloth and screening, that 30 per cent was sufficient duty upon the size with meshes not finer than 90, and that 45 per cent was necessary upon the finer mesh fabrics.

The VICE PRESIDENT. The question is on agreeing to the first amendment reported by the committee on striking out "20" and inserting "25," in line 7.

The amendment was rejected.

The VICE PRESIDENT. The question now is on agreeing to the amendment striking out "30" and inserting "40," in line 9.

The amendment was rejected.

The VICE PRESIDENT. The question now is on agreeing to the amendment in line 11, striking out "40" and inserting "45."

The amendment was agreed to.

Mr. SIMMONS. Mr. President, it was my purpose to offer amendments to the committee amendments, but perhaps that will not be in order now. I ask the Chair whether I may be permitted to offer amendments to the committee amendments?

The VICE PRESIDENT. The Senator is at liberty to move to reconsider the vote whereby the committee amendments were agreed to or to ask unanimous consent to reconsider.

Mr. SIMMONS. In the confusion I did not realize that the amendments had been acted upon. I therefore ask unanimous consent that the votes whereby the several committee amendments were agreed to may be reconsidered.

The VICE PRESIDENT. Is there objection? The Chair hears none, and the votes are reconsidered.

Mr. SIMMONS. Mr. President, in line 7, page 61, I wish to move to amend the committee amendment by striking out "25" and inserting "15"; in line 9 by striking out "40," and inserting "20"; and in line 11 by striking out "45" and inserting "25." I am not sure, Mr. President, that there ought to be this measure of differentiation; I think that a rate of 20 per cent flat would be probably just as fair and would accomplish the same purpose; but I am following the plan of the committee of differentiating. I shall offer the three amendments to which I have referred making the rates 15 per cent, 20 per cent, and 25 per cent, respectively, as a substitute for the amendments offered by the committee.

Mr. President, discussing the first amendment, I have very little to say except that I discover the wire cloth referred to here is used largely for screening to protect against insects, so that I presume the paragraph covers the screening used around the porticos of houses. Am I correct about that, I will ask the Senator from North Dakota?

Mr. McCUMBER. The medium mesh screen is used for that purpose. There is still a finer mesh that is used in paper making, as I understand, and for other purposes, where fine strainers are needed.

Mr. SIMMONS. So that it is an article in common use in most sections of the country and in every home where the family is able to incur the expense of screening the house as a protection against flies and mosquitoes.

Mr. McCUMBER. If I may make a suggestion to the Senator, so that we may understand not only his argument but also what the rate of duty is, the screens that are used against insects, that are used in the ordinary house, are the coarser product, and they come in, as the paragraph is now amended, at 20 per cent. They come in under the present bill at 15 per cent, under the general basket clause.

Mr. SIMMONS. I wish the Senator from North Dakota could see his way clear to let that duty remain where it is now, as I have proposed in my amendment, at 15 per cent. I think scientists and the medical profession are all agreed that the two greatest preventives of disease consist in protection at certain seasons of the year from the fly and from the mosquito, both of them distributors of disease in a different way, and diseases of a different character; so that all over the country the medical authorities and the sanitary authorities are strongly advising everybody to screen their houses against these two pernicious insects. As I stated before, I think the public have come to realize the importance of protection against these distributors of dangerous diseases, and all over the country they are protecting themselves to the extent of their ability.

It does seem to me, Mr. President, that an article of such common use, directed to such a beneficent and necessary purpose, going to the very health and life of the people of the country, ought not to be burdened with tariff duties, especially when there seems to be no evidence given us by the Tariff Commission of any imports, of any foreign invasion of our markets, with reference to this particular product.

I discover in reading the brief statement of the Tariff Commission with reference to this article that excluding woven-wire fencing and poultry netting—and that we are not talking about now—the output of woven-wire products in the United States in 1919 was valued at something in excess of $4,250,000. The imports and exports of woven wire are not separately tabulated by the Bureau of Foreign and Domestic Commerce.

In view of the fact that the committee is asking a duty upon this essential product, of which we produce annually about four and a quarter million dollars' worth, I should be glad if the committee has any information which it can furnish the Senate to give us an idea to what extent this product is being imported into this country and to what extent it is being exported from this country, because, in all candor and sincerity, I think as a matter of humanity we ought not to tax this product unless there is a condition of foreign invasion that really threatens this industry. I wait for an answer. I

do not possess the facts, and I am asking the question simply for purposes of information.

Mr. McCUMBER. Mr. President, where there are so many things that come under a basket clause it is almost impossible to say just the amount of some specific article under that basket clause. My information is that of the finer woven wire there is considerable coming in—that which is used in the manufacture of paper and used for the other purposes which I have mentioned. I think there is very little, if any at all, of the coarser woven wire coming in; but I have here two items of the Reynolds report. The Senator asked if we could not reduce the ad valorem down to 15 per cent upon the coarser woven-wire products.

Mr. SIMMONS. That is, the products that are used for wire netting—for the screening of houses.

Mr. McCUMBER. Yes. There are three different invoices here of wire cloth, 30 wires to the inch, imported from France. The foreign value was 37 cents a square foot. The landing charges were 2 cents. The selling price was 50 cents; and the selling price of the comparable domestic article was 57 cents. Allowing 25 per cent profit to the importer, it would only require 18 per cent to equalize the foreign with the domestic article, whereas we give, as suggested here, 20 per cent, or 2 per cent ad valorem more than would be necessary under that identical shipment; but if it were 15 per cent it would be 3 per cent less than would be necessary. The last item, when we get up to the higher——

Mr. SIMMONS. Before the Senator leaves that, the Senator speaks of one shipment.

Mr. McCUMBER. There are three invoices in this one.

Mr. SIMMONS. What did the three invoices amount to?

Mr. McCUMBER. I do not know. This is simply from the Reynolds report, to get something that is comparable with the American product; it does not state how much. I can only state generally that in the case of that wire fabric there is very little imported. I think we will all agree about that.

Mr. SIMMONS. Yes; very little.

Mr. McCUMBER. Probably very much more is exported than is imported.

Mr. SIMMONS. "Comparable," of course, means that it might be finer, it might be coarser, it might be of higher quality, or it might be of lower quality.

Mr. McCUMBER. No; the comparable American article means the same number of wires to the inch. Therefore they can get exact comparability in those products.

Mr. SIMMONS. It is not identical. That is the point I was making. It can simply be compared.

Mr. McCUMBER. No; but it is as near as it can be made.

Mr. SIMMONS. We might make here in this country an article of the same character as the French article at less than the domestic article which sells for 57 cents.

Mr. McCUMBER. I can not say just what we could have made it for. I simply say that identically the same kind of article—that is, 30 wires to the inch—sells for 57 cents, while the foreign product is sold for 50 cents, and the cost on which we would levy the duty is 37 cents.

Mr. SIMMONS. Now, let me ask the Senator another question with reference to that, and it seems to me to be a vital question in connection with all of these comparisons. Does that report provide for the same profit upon the foreign article that is charged by the American producer upon the American article?

Mr. McCUMBER. No; there are no figures whatever in the Reynolds report as to the cost either in the foreign country or in this country, or what profit is made by the manufacturer in this country or what profit is made by the manufacturer in the foreign country. All it dealt with was the wholesale price of the comparable article in this country and what the imported article is sold for in this country.

Mr. SIMMONS. Now will the Senator be so kind as to state again what the French price was, landed here, with freight and insurance, without profit?

Mr. McCUMBER. The foreign value of the one we are now describing, which is the average of these three invoices, was 37.1 cents per square foot. The landing charges were 2 cents per square foot. The selling price of the imported article was 50 cents per square foot. The selling price of the comparable domestic article was 57 cents. Allowing what we assume to be the usual profit of 25 per cent ad valorem to the importer, we would still have to add 18 per cent on the foreign value to bring the selling price of the foreign product up to the selling price of the comparable American product.

Mr. SIMMONS. Mr. President, I understand that 25 per cent was added there. The experts who have been working with me have advised me that the proper allowance for overhead and profit is 33 per cent, and all the calculations that they have made for me have been based upon that theory, and I had supposed that that was the theory that was adopted. If, now, we add 33 per cent profit to the foreign price, we would have a price equal to the American price.

Mr. McCUMBER. The ad valorem, then, of course, would be less.

Mr. SIMMONS. Yes; but we would not need so much ad valorem.

Mr. McCUMBER. But, Mr. President, I think we have to take a profit that we consider at least reasonable; and 25 per cent was regarded as reasonable, and, as we understood, the usual profit, because in that character of freight, woven wire, there is no breakage, there is no destruction, there is no loss whatever, as there would be in chinaware, and so forth.

Mr. SMOOT. Mr. President, I want to say to the Senator that if they took 33 per cent, as suggested by the experts that the Senator has consulted, and based the rate upon 33 per cent, the ad valorem would be lower.

Mr. SIMMONS. I know that.

Mr. SMOOT. But then the foreigner, instead of making 33 per cent profit, could make 25 per cent, and then the ad valorem would be too low.

Mr. SIMMONS. The Senator misunderstood altogether the point I was making.

Mr. SMOOT. No, no.

Mr. SIMMONS. The point I was making is that if we take the landing cost, which I understand is 37 cents, and add 33⅓ per cent instead of the 25 per cent, for profit and overhead, it will raise the foreign price of the product to the American price.

Mr. SMOOT. I understood the Senator. If we did that and made that difference in our ad valorem rate, then all the foreigner would have to do would be to drop his profit from 33⅓ per cent to 25 per cent, and he would have that advantage.

Mr. SIMMONS. The point I was making is that if the foreign selling price is above the domestic selling price, they do not need any duty at all.

Mr. SMOOT. That is another question. I want to say to the Senator that there are many articles sold in this country on a basis of 5 per cent commission.

Mr. SIMMONS. That may be true.

Mr. SMOOT. For instance, take grain bags and cotton bags of all kinds; they never think of charging more than 5 per cent commission.

Mr. SIMMONS. That is, the commission merchant?

Mr. SMOOT. Yes; the commission merchant.

Mr. SIMMONS. But the wholesaler has his overhead and his profit to add.

Mr. McCUMBER. Mr. President, I think I can satisfy the Senator from North Carolina, by a glance at the Reynolds report, that 25 per cent is a little above rather than below the average allowed for overhead and profit. On one shipment from France the overhead and profit figured on the landed cost, including the duty, was 11.6 cents. In the next shipment it was 11.6. There are three at that rate, one at 15 cents, two at 25 cents, three at 34, and three at 33.8 cents.

Mr. SIMMONS. How did the Reynolds commission get the figures as to the profit and overhead charge?

Mr. McCUMBER. They could get it by taking the American selling price, less the landing cost. Of course, the difference between the two would be the overhead charges, and then it is easy to ascertain what percentage of the original cost those overhead charges represent.

Mr. SIMMONS. I was wondering whether, in estimating the overhead charges and the profits on the foreign products, they took the profits and overhead charges of concerns manufacturing and selling a similar domestic article?

Mr. McCUMBER. No; I think not.

Mr. SIMMONS. That would be the only fair way of doing it, I should think.

Mr. McCUMBER. It seems to me the only fair way of doing it would be to take the identical article sold here in the United States. If it is sold by the same one who is importing it, very well; that would show the difference.

Mr. SIMMONS. That would be true if you could ascertain from the importer exactly what his overhead and profit were; but I do not assume they went to the importers in every case and inquired of them what were their profits and overhead. I assume they had some general way of getting at it without calling up the importer of every particular article.

Mr. McCUMBER. That is undoubtedly true; but what the method is I do not know.

Mr. SIMMONS. I will not press that any further; but the Senator has spoken about three invoices. He is not able to state what was the quantity of those invoices?

Mr. McCUMBER. Neither at home nor abroad.

Mr. SIMMONS. We do not know anything about what amount of this stuff is imported, whether enough of it is imported to affect the American price in the slightest, and whether the present duty is not reasonably protective. The Senator has contended that he wanted to make a competitive tariff. A competitive tariff certainly does not mean a prohibitive tariff, and if the present duty is sufficient to maintain a competitive condition in our market in this product, it ought not to be increased. Of all the products in the bill this is one the rate on which it seems to me ought not to be increased unless it is absolutely necessary to make the increase to protect an industry in this country from a disastrous or ruinous competition from abroad. I do not care to say anything more about it, and I am perfectly willing that a vote shall be taken.

Mr. McCUMBER. Mr. President, I will just complete my statement about these invoices. The Senator now speaks of my willingness to have business competitive. Certainly I would hope that there would be no competition along every line, to some extent. I shed no tears, of course, where the American people can produce everything in a particular line that the American public desires to consume, even though there is none imported, provided there is a sufficient number of manufacturers in the United States to produce that healthy competition which we need.

I think there will be reasonable competition in every one of these different schedules. Let us take this one, where we say that the ad valorem required to protect the American product would be 18 per cent. Looking at the report, we find that the profits of the importer were considerable, and if there is a very little reduction of the profits it would leave him a very good margin, and he could come into the markets of the United States, other things being equal, on an equal footing, so far as the cost price is concerned, with the American manufacturer. But when I take the 90-mesh, which is a much finer grade, I find that the French price was 61.2 cents per square foot, the landing charges were 11 cents, the selling price in the United States was 99 cents, and the selling price of the comparable American article was $1.87. It would therefore require a duty of 142 per cent to equalize the prices. We have given only 45 per cent, or less than one-third of that amount. But, taking it right through, I hardly think we could say there is that much difference in the cost of production at home and abroad or in the fair selling price at home and abroad. We have made due allowance for increases of foreign prices and for decreases of domestic prices, and acted on the assumption that in many instances the present selling price is inordinately high; but after making those allowances we still think we will need 45 per cent to measure the difference on a fair competitive basis.

Mr. SIMMONS. Mr. President, if you would allow the American manufacturer of these wires, both coarse and fine, only 25 per cent to cover the overhead and profits, I imagine you would not find much difference between the American price and the foreign price. The Senator says the selling price is one dollar and eighty some cents. The Senator does not know, and I do not know, how much of that is profit and overhead. He has allowed the foreigner only 25 per cent for profit and overhead. He has no information whatever as to what the American producer and seller in the domestic market allows himself for overhead and for profit.

We do know that it is a general impression, which I think is amply justified, that the production of wire in this country is controlled by combinations and understandings, and that the prices are fixed, not by the law of supply and demand, not by the law of competition, because there is practically no competition in price except such as may grow out of foreign importations.

One thing is very clear to my mind. If this bill establishing highly protective and almost prohibitive duties is passed, and it shall result in the further monopolization of the industries of this country, as I believe it will, followed by the result that there will be no restraint whatsoever of competition in the fixing of prices within the prescribed limits of the duty, as soon as the people have an opportunity, I think they will express their protest. In other words, I mean to say to the Senator from North Dakota, and I am saying it in all candor, the protective principle can not obtain in this country for any great length of time if there is not competition in the domestic market.

If this bill has the effect, as I believe it will, of further advancing the combinations of industries which now exist, and which, with reference to probably 75 per cent of the American products of this country, have already resulted in a suppression of domestic competition, and the American people see that they have fallen upon a time when there is no competition on the part of the protected industries of the country, and that they have no protection whatsoever against their avarice and their greed, I think the American people will see that such a system as that, a system which lends itself to that end and that result, can not and ought not to be tolerated by a free people. If the imposition of these duties contributes to that end, then the legislation which we are considering to-day, and which we shall probably enact, will aid these violators of the law, these people who have trodden upon that fundamental principle of competition, who have stifled all competition, who have destroyed the operation of the law of supply and demand in disregard of the law of the land. I think the people of the country will say that we ought not, by legislation, to make this conspiracy against the people more effective and more complete than it now is.

I have nothing further to say, Mr. President, and I am ready for a vote.

The VICE PRESIDENT. The Chair is not informed what the vote is to be on.

Mr. SIMMONS. I announced that I would offer an amendment to substitute 15 per cent for the proposed amendment of the committee, on line 7, page 61, paragraph 318.

The VICE PRESIDENT. Without objection the vote already taken will be considered as not having been taken.

Mr. SIMMONS. I thought that had already been done.

The VICE PRESIDENT. It is now done. The Senator from North Carolina offers an amendment to the committee amendment, which will be stated.

The ASSISTANT SECRETARY. On page 61, line 7, the Senator from North Carolina proposes to amend the committee amendment by striking out "25" and inserting in lieu thereof "15."

The amendment to the amendment was rejected.

The VICE PRESIDENT. The question recurs on agreeing to the committee amendment.

Mr. McCUMBER. I ask that the Senate disagree to the committee amendment.

The amendment was rejected.

Mr. SIMMONS. On the same page, in line 9, I move to substitute 20 per cent for the 40 per cent proposed by the committee.

The VICE PRESIDENT. Without objection, the vote already taken will be considered as not having been taken, and the amendment offered by the Senator from North Carolina will be stated.

The ASSISTANT SECRETARY. On page 61, line 9, the Senator from North Carolina proposes to amend the committee amendment by striking out "40" and inserting in lieu thereof "20."

The amendment to the amendment was rejected.

Mr. McCUMBER. I ask that the Senate disagree to the committee amendment.

The amendment was rejected.

Mr. SIMMONS. In line 11, on the same page, and in the same paragraph, I move to amend the committee amendment by striking out "45" and inserting in lieu thereof "25."

The VICE PRESIDENT. Without objection the vote previously taken will be considered as not having been taken and the amendment offered by the Senator from North Carolina will be stated.

The ASSISTANT SECRETARY. On page 61, in line 11, the Senator from North Carolina proposes to amend the committee amendment by striking out "45" and inserting in lieu thereof "25."

The amendment to the amendment was rejected.

The amendment of the committee was agreed to.

Mr. McCUMBER. I now ask that we turn to page 78, paragraph 362.

The VICE PRESIDENT. The first amendment in that paragraph will be stated.

The ASSISTANT SECRETARY. On page 78, paragraph 362, the committee proposes to strike out the word "Files," in line 1, and to insert:

So-called precision or Swiss pattern files, and riffler, needle, escapement, and die-sinker files, less than 6 inches in length, 50 per cent ad valorem; all other files.

The VICE PRESIDENT. The question is on agreeing to the amendment of the committee.

Mr. McCUMBER. I ask that the Senate disagree to the committee amendment, so that it will leave the first part of the paragraph exactly as written by the House.

The VICE PRESIDENT. The question is on the amendment of the committee.

Mr. SIMMONS. I wish to ask the Senator from North Dakota if he proposes to strike out in line 4 the words "floats

of all cuts and kinds" and insert in lieu thereof the words "floats, of whatever cut or kind"? In other words, does he propose to disagree to both the Senate amendments in that paragraph and leave only the House text?

Mr. McCUMBER. I desire to strike out all of the Senate amendment from line 1 down to and including the words "other files," in line 4.

Mr. SIMMONS. The balance of the amendment the Senator desires to remain?

Mr. McCUMBER. Yes.

Mr. SIMMONS. I understand the parliamentary situation would be that if that is done it would not be in order at the present time to offer any amendment to the paragraph except as to the words in line 4 which I have just read, because the Senate committee has receded from all its amendments except that one. I have no objection to a vote on the first amendment.

The VICE PRESIDENT. The question is on agreeing to the amendment of the committee.

The amendment was rejected.

The ASSISTANT SECRETARY. The next amendment of the committee is on page 78, line 4, where the committee proposes to strike out the words "floats of all cuts and kinds" and insert in lieu thereof "floats, of whatever cut or kind," so as to read:

Files, file blanks, rasps, and floats, of whatever cut or kind, 2½ inches in length and under, 25 cents per dozen.

The amendment was agreed to.

The ASSISTANT SECRETARY. The next amendment of the committee is on page 78, line 12, in paragraph 363, where the committee proposes to strike out "40" and insert "50," so as to read:

PAR. 363. Sword blades, and swords and side arms, irrespective of quality or use, solely or in part of metal, 50 per cent ad valorem.

Mr. SIMMONS. Mr. President, I wish to offer an amendment to the committee amendment. I move to strike out "50" and insert "30." I would be glad if the Senator from North Dakota would give us some reason why he proposes to increase the House rate, which is 10 points higher than the present law, from 40 to 50 per cent?

Mr. SMOOT. It is for revenue entirely.

Mr. SIMMONS. The Senator from Utah says it is for revenue entirely.

Mr. McCUMBER. I was about to make the same remark, but as the Senator from Utah has already made it it is unnecessary for me to repeat it. I simply wish to say in connection with the item that the present rate is 30 per cent ad valorem, a rate for revenue only. We need a little more money than we needed in 1913.

Mr. SIMMONS. I was going to close the matter by saying if it is for revenue entirely, and I suppose it must be because the imports would not seem to justify it for any other reason——

Mr. McCUMBER. There are not many imports.

Mr. SIMMONS. I shall certainly make no objection, but I do not see how the Senator expects to get very much revenue out of it, in view of the fact that the importations in 1918 seem to have been only $737; in 1920, $8,000; and for nine months of 1921 only $30,000.

Mr. SMOOT. That represents a good many daggers.

Mr. SIMMONS. I imagine there is not going to be any very great increase in the importation of swords and sword blades into this country; at least I devoutly hope so. I hope the sword is going out of use in this country to a very large extent, and with the present importations only $20,000, with a diminishing use, I do not think very much revenue will be derived from that source. However, I make no objection.

Mr. McCUMBER. I do not look for very much revenue, but there were $20,543 worth imported in the nine months of 1921. So the other rate would give us about $6,500, and if we have a 50 per cent duty we would get at least $12,500 from that little item; and we have to pick up these little items of revenue wherever we can.

Mr. SIMMONS. I am very much afraid the Senator from North Dakota and his committee have not much confidence in the pacific intentions of this country. They do not rely very much upon our hope that world conditions may dispense with the use of the sword to a very great extent, if not altogether.

Mr. SMOOT. Wherever there is a person in the United States who wants a foreign dagger, and nothing else but a foreign dagger will do, I am willing that he shall pay the 50 per cent, and that we shall take that amount from him.

Mr. SIMMONS. This paragraph says nothing about daggers.

Mr. SMOOT. It covers daggers.

Mr. SIMMONS. It says side arms. Of course, if a dagger is a side arm in the Senator's part of the country, then it is all right; but they do not use the dagger down in my part of the country as a side arm.

Mr. SMOOT. They use it in their boots, and when taken from there it is from the side of the leg.

Mr. SIMMONS. Very well. Let us vote.

The VICE PRESIDENT. Does the Senator from North Carolina withdraw his amendment to the amendment?

Mr. SIMMONS. Yes; I withdraw it.

The VICE PRESIDENT. The question is on agreeing to the committee amendment.

The amendment was agreed to.

The next amendment of the committee was, on page 78, line 15, to strike out "20" and insert "25," so as to make the paragraph read:

PAR. 364. Muzzle-loading muskets, shotguns, rifles, and parts thereof, 25 per cent ad valorem.

Mr. SIMMONS. Mr. President, many of these articles are still in use in this country, notwithstanding peace, and will continue to be in use, especially with the farmer who lives in remote sections, isolated, without close neighbors. He generally desires some sort of weapon in the house as a matter of protection. Then there are other uses for the items covered by this paragraph. I would like to ask the Senator from North Dakota why he wishes to increase the House rate, which is 5 points higher than the present rate, to 25 per cent?

There seem to be no importations of this article to speak of. In 1918 there were only $821 worth of imports; in 1919 there were only $1,214 worth; and during the first nine months of the present year there were $3,691 worth. Is this rate also imposed as a revenue duty, I will ask the Senator from North Dakota?

Mr. McCUMBER. It is. I will say, however, that we get very little revenue from it, for muzzle-loading shotguns and rifles have practically gone out of use. I do not suppose there will be any great amount of them imported, but there has always been a little duty imposed upon them. There is a 15 per cent ad valorem duty now imposed upon these articles, and the other House imposed 20 per cent on the American valuation. So the committee thought they could bear a duty of 25 per cent ad valorem.

Mr. SIMMONS. The Senator does not propose to increase the duty for the purposes of protection?

Mr. McCUMBER. No; I do not think these articles are now made at all in the United States.

The VICE PRESIDENT. The question is on agreeing to the committee amendment.

The amendment was agreed to.

The next amendment of the Committee on Finance was, on page 78, paragraph 365, line 16, after the words "single barreled," to strike out the word "sporting."

The VICE PRESIDENT. The question is on the amendment of the committee.

Mr. SIMMONS. Mr. President, I beg pardon of the Chair, but I wish to state to the Chair that the Senator who was to look after these items is not now in the Chamber. I am now for the first time having an opportunity to examine the amendments, and I hope the Chair will not put the question on the amendment before I can examine it. However, I have no objection to the amendment.

The VICE PRESIDENT. The question is on agreeing to the amendment of the committee.

The amendment was agreed to.

The next amendment of the Committee on Finance was, on page 78, paragraph 365, line 22, before the words "per centum," to strike out the numerals "35" and to insert in lieu thereof the numerals "45," so as to read:

PAR. 365. Double or single barreled breech-loading and repeating shotguns, rifles, and combination shotguns and rifles, valued at not more than $5 each, $1.50 each; valued at more than $5 and not more than $10 each, $4 each; valued at more than $10 and not more than $25 each, $6 each; valued at more than $25 each, $10 each; and in addition thereto, on all of the foregoing, 45 per cent ad valorem.

The VICE PRESIDENT. The question is on agreeing to the committee amendment.

Mr. SIMMONS. Mr. President, I should be glad if the Senator from North Dakota would advise me as to whether or not this rate is proposed as a revenue duty?

Mr. McCUMBER. I think, Mr. President, I may say that the duty is imposed almost exclusively for revenue purposes. It may amount to protection in some instances, but it is not high enough for protection according to the report of the Reynolds Commission. If the Senator from North Carolina desires, I can give what the specific duties would amount to reduced to ad valorem duties.

Mr. SIMMONS. I was wondering whether the duties were imposed for additional protection or for revenue. It seems to

me that the imports would not justify any increase in duty, and that the duty would yield but very little revenue. I do not think the increase can be justified upon the ground of protection. I notice, Mr. President, that the domestic production of these articles in 1914 amounted to ten and a half million dollars.

Practically the entire industry is located in Connecticut, Massachusetts, and New York.
Imports in general have decreased since 1902, at which time they reached a maximum.

For the first nine months of 1921, of double-barreled and combination shotguns and rifles the imports amounted to $58,376; of single-barreled guns the importations amounted to $39,719; of all other parts of guns, pistols, or rifles, and fittings for stocks, and so forth, the imports amounted to $9,884; of barrels for sporting breech-loading shotguns and rifles, further advanced in manufacture than rough-bored only, the imports amounted to but $9. In the next item, stocks for sporting breech-loading shotguns and rifles, wholly or partly manufactured, the importations amounted to but $30.

Putting the imports all together they did not amount to quite $100,000 of all these various items I have enumerated, including double-barreled and singled-barreled shotguns.

Mr. POMERENE. Mr. President——

The VICE PRESIDENT. Does the Senator from North Carolina yield to the Senator from Ohio?

Mr. SIMMONS. I shall yield in a moment. I repeat that putting double and single barreled breech-loading and repeating shotguns, rifles, and combination shotguns and rifles, and so forth, all together, the importations were not $100,000 during the last nine months of 1921, as against a domestic production as far back as 1914—and that is the last year for which the figures are given—of $10,500,000. Certainly that situation does not call for the enormous increase in these rates over the present law and over the House rates. I now yield to the Senator from Ohio.

Mr. POMERENE. Mr. President, in examining this bill, so far as it relates to the duties on guns, and rifles, and shells, and explosives, this thought has occurred to me: I do not know what ought to be done, but it seems to me there is an utter inconsistency between this legislation and the internal revenue law. Under the revenue bill we adopted, as I now recall, an excise tax of 10 per cent on cartridges, and so forth, because it was desired to discourage their manufacture in this country. This bill imposes a tariff duty on cartridges, and so forth, for the purpose of encouraging their manufacture, and now it is proposed to impose a tariff on guns, rifles, and so forth, evidently for the purpose of protecting that industry, although there has been placed an excise duty upon cartridges which are used in such guns. It seems to me that we have been rather inconsistent in treating this subject. I am not prepared to say what should be done, but the thought has occurred to me that either we did not pursue a very wise policy in connection with the revenue bill or we are not pursuing a very wise policy in connection with the pending bill, for certainly both of them can not be right.

Mr. SIMMONS. Mr. President, the Senator is entirely correct with reference to the action in the matter of the imposition of a direct tax. Articles of this character, which are not supposed to be absolute necessaries and which are indulged in by people who are able to buy them, were considered as proper subjects for internal taxation. I do not know that the Senator is quite right in saying that the object was to discourage their manufacture, but they were recognized as articles not absolutely necessary to the national life. But, Mr. President, why should we increase the present rate of 35 per cent—that is a pretty steep rate—as provided in the present law. That rate has practically kept out of this market the firearms referred to, for under it we did not import $100,000 worth, although there was an annual domestic consumption of something over $10,000,000 worth.

There seems to be no reason for the increased rate from the protective tariff standpoint; the articles receive now all the protection which is needed. Of course, if it is desired to prohibit them, that is another question; and if it is desired to give the manufacturers of these articles an opportunity further to raise their prices without danger of foreign competition, that is likewise another question; but if the proposed rate is purely for the purposes of protecting them against an unreasonable invasion of this market which would upset the general principle of fair competition, I can not see any justification for raising the present duty from 35 per cent to 45 per cent. However, I do not wish to consume the time of the Senate in discussion. I am willing to take a vote. I wish, however, to offer an amendment to the 35 per cent item.

Mr. McCUMBER. Mr. President, I merely wish to place some facts in the RECORD which it may be desirable to have when we come to consider the matter in conference. I call attention to the fact that this is a duty for revenue. The articles referred to are luxuries, being high-priced foreign rifles and guns imported into this country at an immense profit.

The Senator from North Carolina was mistaken, if I understood him correctly, when he said that under the present revenue law we imposed a tax of 100 per cent on this kind of articles.

Mr. SIMMONS. I did not mean the present revenue law, but I think we did in the former law.

Mr. McCUMBER. The revenue tax in the present revenue law is only 10 per cent on those articles, but on dirks and arms of that kind which we wanted to legislate out of existence as much as possible a tax of 100 per cent was imposed.

I wish to refer to an importation of sporting rifles. There is listed in the publication before me a rifle that costs abroad $13.32. It is sold in this country for $60. A similar American article is sold for $60.72. It would require 232 per cent to equalize the two. The importer of the foreign article makes 184 per cent on his selling price, and in view of that fact we felt that it would not be a great hardship upon him to compel him to pay the Government of the United States 45 per cent duty.

The next item is a rifle that costs $28.60 abroad; the importer sells it for $74. It would require a duty of 62 per cent to equalize the two. The importer makes a profit of 83 per cent, and if he sells it at the same price he could still pay the 45 per cent ad valorem duty and make a very handsome profit.

Mr. SIMMONS. Mr. President, will the Senator permit me to ask him a question? He was reading about what sort of a rifle?

Mr. McCUMBER. The sporting rifles and breech-loading shotguns. We have already passed those of inferior value.

Mr. SIMMONS. Mr. President, the Senator tells us about the remarkable profits that the importers made on importing those guns into this country. If that is true, if they can make such profits in this market on their foreign-made guns, I am at a loss to understand why they do not send them over here and why we do not have more of them on the market. I discover from the Tariff Commission that in nine months of 1921 of these sporting guns, so called, there were brought in $4 worth, and in 1921 of stocks for sporting breech-loading shotguns and rifles $30 worth. I am a little amazed, if there are any such profits as those in exporting these guns to this country, that they should only bring in during nine months of the last year $4 worth of one, which would hardly pay for a gun——

Mr. McLEAN. Mr. President, is not the Senator reading from importations of stocks?

Mr. SIMMONS. I am reading from the statistics as to barrels for sporting breech-loading shotguns and rifles further advanced in manufacture than rough-bored only. Those are the barrels of these fine shotguns, and the other section that I read from was stocks. One is the barrels and the other is stocks for sporting breech-loading shotguns and rifles wholly or partly manufactured. I suppose they assemble those barrels and their stocks after they get here; but that seems to be the importation during those nine months—taking them both together, $34 worth.

Mr. McLEAN. There are some importations, as the Senator knows, of these high-grade guns.

Mr. SIMMONS. But the point is, if the figures that the Senator from North Dakota has given us as to profits are correct—I do not know how much it was; over 100 per cent profit—I am utterly amazed that there have not been greater importations. He says those figures are taken from the Reynolds report. The Reynolds report was made as of August, 1921; and I am utterly amazed that more of these articles have not come in under those circumstances.

Mr. McLEAN. The Senator will note that in nine months of 1921 there were imported $58,000 worth of double-barreled and combination shotguns and rifles.

Mr. SIMMONS. We are talking now about these sporting articles. The Senator has given the profits on these sporting articles. The Senator is now talking about the common double-barreled and combination shotgun and rifle.

Mr. McLEAN. Of course, the shotguns are sporting implements.

Mr. SIMMONS. Suppose we say there is $58,000 worth of them, then.

Mr. McLEAN. I should like to explain the matter to the Senator, if he will permit me.

Mr. SIMMONS. I will.

Mr. McLEAN. The Senator knows that there are made abroad by certain makers shotguns that command enormous prices. If you want a Scott gun made in England you will have to pay anywhere from $300 to $1,000 for it; and that is true with regard to the Francotte gun, which is made in France. There are not many importations, but they are very high-priced guns.

Mr. SIMMONS. Do we make that kind of gun over here?

Mr. McLEAN. We make a gun as good. We make very high-priced guns, and they are probably as good; but there are certain gentlemen who will not use anything but a Scott gun or a Francotte gun—it does not make any difference what it costs. I am somewhat familiar with this article and its use, and I know that.

Mr. SIMMONS. And the Senator wants to impose a tax of 45 per cent because there are a few people in this country who are able to pay any price that may be exacted for a thing they want to buy—a gun made over there that is so far superior to anything that we produce over here, or they fancy it is so far superior, that they will pay a fancy price for it.

Mr. McLEAN. Oh, they are expensively engraved; they are inlaid with gold in some instances. The profit on them is anywhere from 200 to 300 per cent, and it seems to me the Government may as well get a little revenue from them.

Mr. SIMMONS. I want to say frankly to the Senator—and I am trying to speak frankly to-day—that when we have a domestic production and a domestic consumption of $10,500,000 of these products in one year, and there are imported only about $100,000 worth of them; when the Senator stands up here and undertakes to justify that tax upon the ground that some gentlemen of wealth, who do not care about price when they find an article that strikes their fancy, fancying some particular brand or type of these firearms that are made abroad, pay these exorbitant prices for it; and then when the Senator undertakes to compare those prices with the price of the thing that is made in this country and which is taxed, I think in all candor that we are trifling, absolutely trifling, with a serious matter.

The VICE PRESIDENT. The question is on agreeing to the amendment of the committee.

The amendment was agreed to.

Mr. HARRISON. Mr. President, in the Morning Herald there appeared in quite large type—and the same article, I think, was carried in many of the other papers—the following article:

QUOTING PRESIDENT BRINGS OUSTER THREAT TO SCRIBES—WHITE HOUSE RESENTS ALLEGED VIOLATION OF CORRESPONDENTS' CODE OF ETHICS.

One more violation of the code of ethics existing between President Harding and newspaper correspondents in the semiweekly conferences will result in cancellation of the conferences, it was said yesterday at the White House.

I suppose whoever said it spoke with authority.

It is an unwritten law that the President is not to be quoted on any subject discussed in these conferences or elsewhere except in a set public address, copies of which are distributed in advance, or in a prepared statement handed out at the White House.

Following the conference last Friday afternoon some newspapers are said to have quoted the President direct on remarks regarding attacks on Attorney General Daugherty, which resulted in considerable embarrassment for the President.

It was made plain that a single violation by any one correspondent would be sufficient to cause a discontinuance of the conferences.

The matter will be taken up with Secretary Christian by the White House Correspondents' Association, looking to disciplinary action on the offending correspondents.

Mr. President, we recall having read in the papers some days ago—which was discussed, following that, by the senior Senator from Kentucky [Mr. STANLEY]—the tirade of the President against the action of certain newspapers of the country in printing news.

I have always thought that the function of the newspapers was to print the news, but it seems that the news which has been printed since the 4th of March last year has not always met the approval of the President, or been welcome at the White House, and this unwelcome news, this displeasing news, I might say, from Republican papers, independent papers, and Democratic papers, has caused the President's ire to be roused, and the other day it broke out in full force.

I shall not refer to that article more than to say this, that it would seem to be perfectly natural that the President should become angry at the news that has come from Pennsylvania, from Indiana, and more recently from Iowa, because we all realize how disappointing must have been the results of the recent primary in Pennsylvania, when Gifford Pinchot, the alleged progressive, the erstwhile friend of Roosevelt, walloped the old guard, the standpat machine of that State, although it took a good deal of money to do it, and although I have no doubt the machine spent considerably more money than Pinchot's committee spent. Money was quite lavishly used in that campaign.

I have no doubt that the news was unwelcome to the President and caused him to become irritable. Then the news came from Indiana, when his good friend, a man who has stood by him fatihfully here upon the floor of the Senate, and in his campaign for the Presidency two years ago as his chief lieutenant, helping to elect the ticket, is defeated at the hands of another alleged Progressive, Mr. Beveridge, was certainly disappointing news.

But day before yesterday in Iowa something happened which the most optimistic friends of the successful candidate did not believe was possible. There was Mr. Brookhart, running on an antiadministration ticket, denouncing much of the legislation that had been championed by this administration, criticizing the seating of Senator NEWBERRY by the majority some weeks ago, going so far in his campaign speeches, as I have read from the press of Iowa and elsewhere, as to say that when he got here he would be in favor now of unseating the junior Senator from Michigan. That was one of the main issues in that campaign. But every progressive principle was advocated by Mr. Brookhart in his campaign for the senatorial nomination in Iowa.

The results of it are more important when we realize the character of men who opposed Mr. Brookhart in that primary. I know two of those candidates personally. I served with Mr. Pickett for two years in the House of Representatives. He is a very able and charming gentleman, one of the most eloquent men I have ever heard. I understand that he, as a candidate in the primary, was willing to indorse all that this administration had done, and was the administration candidate. He ran third. There was a Mr. Thorne, an expert on railroad transportation. He had been in the Interstate Commerce Commission work, and strongly upheld what was known as the Esch-Cummins railroad bill. I did not know him personally, but Mr. Thorne bears a reputation of being a very able man.

Congressman SWEET I knew. I served with him in the House of Representatives. He was a forward-looking man, a splendid gentleman, and when we realized that those three candidates, and two others, went down in an overwhelming defeat at the hands of Brookhart, the antiadministration candidate, the anti-Newberry candidate, against the old guard and the machine politicians, the result of that primary is important, and will so be interpreted throughout the country. It shows how the old guard are constantly being rebuked—your tactics here constantly being repudiated.

So, Mr. President, it is little wonder that this news which is weekly floating in the night of every election held in every State in the Union these days as it comes to the White House is unwelcome, disconcerting, distasteful, and enough to arouse the ire and anger of the President of the United States.

I sympathize with him to some extent, therefore, in the predicament in which he was placed, although his taking the defeat of his friends and the friends of the administration out upon the metropolitan press of the country and the newspaper correspondents at the White House was quite unprecedented—something no other President has ever done. Aye, inexcusable and unjustifiable. I imagine that if President Harding had said all the things that were in his mind when he got the returns from Pennsylvania and the returns from Indiana and the returns from Iowa his utterances would have been unprintable; they would have burned the very paper upon which they were printed. The correspondents as well as the newspapers printing them might have been convicted of libelous matter.

It is the policy now, it seems—it is the settled plan—of the majority in this Chamber and at the other end of the Capitol to seek to distract the attention of the American people from the real issues and try to lead them off on some irrelevant question. The very distinguished and eloquent Senator from Indiana [Mr. WATSON] on day before yesterday delivered a speech in the Senate, following in the tracks of the distinguished chairman of the Finance Committee [Mr. MCCUMBER], in their mad tirade against the metropolitan press of the country. They say the press is against this tariff bill. I am not quoting precisely the words of the Senator from North Dakota, but he gave the impression that the reason the press was opposing this tariff bill was because they were selfish. I have a high respect for the press of the country; and when executive domination attempts to clog the news channels and thwart the high purpose of the metropolitan press to give the news to the people, then there will be a revolt throughout the country against such a policy.

The Senator from North Carolina and other Senators have, day by day, incorporated in the RECORD editorials from the leading Republican papers of this country denouncing this tariff bill in stronger language, I might say, than that employed by even the Democratic press of the country; and I know of no independent paper, no progressive paper, in this country that has

indorsed the tariff bill up to this good hour. You can not expect your friends, even the Republican press, to indorse such a policy of extortion, favoritism, and robbery as is written in this bill and attempted to be passed by you. They are sounding the warning; and you had better surrender—temporarily, at least—your political arrogance and change your policy.

Mr. WATSON of Georgia. Mr. President——

The VICE PRESIDENT. Does the Senator from Mississippi yield to the Senator from Georgia?

Mr. HARRISON. I yield.

Mr. WATSON of Georgia. Has the Senator from Mississippi seen the article on the first page of the Baltimore Sun of to-day, headed "Tariff on wool may add burden of $310,000,000 to our people"?

Mr. HARRISON. I have not seen it, but I have no doubt that that is exactly what this majority would do. They promised to reduce the high cost of living, but instead of doing that they add greater taxes and heavier burdens upon the consumers of this country.

Mr. WATSON of Georgia. This is a wonderful article. Apparently the facts are authentic; and we can now understand why the Senator from Idaho [Mr. GOODING] has been almost frantic in wanting more value put into his flocks of sheep. According to this article, he would be a participant in $310,000,000 additional taxes on the American people.

Mr. HARRISON. The Senator from Idaho can hear nothing but the bleating of the sheep out West. The attacks against the Republican press of the country are merely to distract public attention from the real issues involved in this tariff discussion, and the utterances of the President against the newspaper correspondents is a part of the plan.

Mr. NORRIS. Mr. President——

The PRESIDING OFFICER (Mr. FRELINGHUYSEN in the chair). Does the Senator from Mississippi yield to the Senator from Nebraska?

Mr. HARRISON. I yield.

Mr. NORRIS. I came in after the Senator had started, and it may be that I am asking him about something he explained before I came in. I wanted to ask the Senator if he is complaining of the announcement appearing in the press that the President had announced that some newspaper man who had published a truthful account of what had occurred in the White House would be denied admission if he repeated such an ungrateful act?

Mr. HARRISON. Yes; I was observing on the article which appeared in the paper this morning.

We recall that when the disarmament conference was in session in Washington, and the four-power pact was being considered, and the mainland of Japan was included in the proposition, the correspondents at the White House on that occasion asked the President about the matter in one of their formal conferences, conferences held according to a custom which has been adhered to without exception by all other Presidents so far as history shows. The President one day said that the pact did not include the mainland of Japan, and thereupon some of the representatives of America at the disarmament conference went up to see the President and told him he had made a mistake, that he was wrong. The President and those representatives got their wires crossed, and it put the President in a hole, or somebody got in a hole. Then the practice or plan of allowing the newspaper representatives in the White House conferences to propound questions to the President extemporaneously, so to speak, was discontinued. I take it it was not because of any admission or assumption that the President was unable—he possessing quickness of mind and magnificent ability—to answer the questions which might be propounded in these conferences; but the plan was changed, and after that the representatives of the press—men whom he had known for years, reliable men, men of reputation, straight, honest, trustworthy—were told, "Now, you must not ask these questions any more in the old way. We are going to change the custom, and you must write out your questions upon a slip and submit them to the President first; he will look over them, and if they are easy to answer you will be permitted to ask the questions and get answers. If they are not easy to answer, and the President is unable to answer them, then you will get no answers to those particular questions."

Mr. WATSON of Georgia. Mr. President, I call the Senator's attention to the headline of this article on the first page of the Baltimore Sun of to-day:

Tariff on wool may add burden of $310,000,000.
Notorious "Schedule K" of Payne-Aldrich fame in new guise. Taft as President urged its repeal. Written into Fordney-McCumber measure at trust's behest.

In other words, here is a specific charge that the Wool Trust came here and dictated to the committees of both Houses.

Mr. HARRISON. Yes; they have just changed the letter "K" in order to fool somebody, to deceive them. They knew that "Schedule K" had been denounced too often and was too notorious so they changed the name, but made its meaning worse. Hypocrisy is written in every line and in every syllable of this tariff bill. It seems that deception is the present order of the day from a senatorial Republican viewpoint.

Not only are they trying to distract public attention by abusing the Republican and the independent press of the country, threatening to oust the correspondents from the White House, but the distinguished Senator from Indiana day before yesterday brought the ambassador from Great Britain into the discussion by saying he is over here playing a part in this domestic question. He further said in that speech that if George Harvey, our ambassador to Great Britain, had made in London the statement that Geddes, the ambassador from Great Britain, made here, the President would immediately recall George Harvey.

Mr. President, that very clearly demonstrates what a stranglehold materialism has on this administration and what a grasp big business has upon the White House. I have not read the speech of Sir Auckland Geddes, but I have a stenographic copy of it which I ask unanimous consent to have inserted in the RECORD at the close of my remarks. It will speak for itself.

Mr. NORRIS. Mr. President——

The PRESIDING OFFICER. Does the Senator from Mississippi yield to the Senator from Nebraska?

Mr. HARRISON. I yield to the Senator.

Mr. NORRIS. The Senator is speaking of George Harvey, our ambassador, being recalled. Did the Senator notice in the morning newspapers that he is guilty of an offense which ought to bring about his recall? It is boldly announced in the press dispatches that he has said he is going to wear long pants at social functions hereafter. That is in the papers this morning. What does the Senator think about recalling him for such an offense as that against the dignity of the King of England?

Mr. HARRISON. Mr. President, I think if the administration had desired to recall George Harvey they had a good opportunity to recall him some time ago. The statement of the Senator from Indiana that if George Harvey had made the speech at London that Geddes made here President Harding would have recalled him immediately, causes me to believe that the administration looks to the almighty dollar above patriotism, above principle, and above everything that should be held dear and loved by a great people, namely, the cause for which we go to war and the services and glory of our heroes. When George Harvey, in his speech in London some time ago, made the statement that our boys fought "in order to save their own skin" and "were afraid not to fight," then it was that President Harding would have been justified, and the American people would have indorsed it, if he had cabled immediately his recall.

Mr. WATSON of Georgia. Mr. President, has it ever occurred to the Senator from Mississippi that George Harvey was appointed minister to the Court of St. James and sent out of the country to stop him from writing against such things as the League of Nations and the four-power pact?

Mr. HARRISON. I am not surprised. I think they sent him over there because they were afraid of him here. They would rather have him there and believed him to be less dangerous in London than he would be here as a friend of the White House; that he would do them less harm there than he could do if kept here.

The whole policy of the White House and of the majority in the Senate seems to be to distract the attention of the country to side issues, so that public opinion will not consider the main issue involved here. The people will know that every Senator on the other side of the Chamber promised in the last campaign to reduce the high cost of living, and they will know that you have betrayed them, making no effort to carry out that promise, but, on the contrary, making every effort to increase those costs and add to their already stooped shoulders heavier and greater burdens.

APPENDIX.

THE KEY TO WORLD RECOVERY.

[Address before Chicago Association of Credit Men by Sir Auckland Campbell Geddes, British ambassador to the United States.]

The evils from which the world suffers at the present moment are more economic even than they are political. Much of the political unrest which we see in different parts of the world is based, beyond a shadow of question, upon the economic position in which the various countries find themselves. If there is one thing which the Great War has taught, I believe, it is that we are interlocked economically, nation to nation, in such a way that no nation can prosper unless others prosper, too; that no nation can suffer from economic disturbance without all other nations throughout the world suffering in greater or in less degree, and I believe that all responsible statesmen in all countries at the present time are honestly doing the very best

that in them lies to restore the economic foundations of world prosperity. But of all the nations of the world there are no two so closely interlocked by ties of trade, by ties of commerce and finance, as your great Nation and mine.

The figures of that interlocking are extraordinarily striking and suggestive. In the year 1920 your foreign trade touched the highest peak that so far it has ever reached. Its volume in that year was no less than the astounding figure of thirteen and one-half billions of dollars—exports eight and one-quarter billions, imports five and one-quarter billions of dollars. But your most favorable trade balance was not in that year but the year before, when it touched the really extraordinary figure of $4,000,000,000. The foreign trade of this country is therefore of great, of vast interest to all the citizens of the United States.

Now, the interlocking of your prosperity with ours is extraordinarily close. Even before the war, in 1913, no less than 40 per cent of your total foreign trade was with the British Empire, and that amount rose in importance during the years of war, and rose in its percentage so that now, according to the latest trade returns, your foreign trade is, so far as 46.75 per cent of it is concerned, carried on with the British Empire. And as to your European trade, taking that apart from the rest of your foreign trade, 46 per cent again is the figure which goes to the British territories in Europe. Taking the Americas as a whole, no less than 62 per cent of your foreign trade is with British territories in America.

Those are astounding figures. I quote them merely to make this point clear: That your foreign trade and the prosperity that comes from it are largely dependent upon the capacity of the British Empire to buy your goods and to pay for them in dollars in America.

A great change in the last eight years has come over the position of the United Kingdom of Great Britain and Ireland with regard to their capacity to pay in dollars for the goods which they take from this country—a change that is so profound that it must have a great effect in the future upon the course of trade between your country and mine.

You all know that during the early years of the war the British Government took over from the British citizens who had investments in this country those investments and sold large quantities of them to provide dollar credits to pay for the munitions, the food, and the raw materials required for the prosecution of the war. As a result, those investments passed into the hands of American citizens. The interest on them, no longer accruing to British subjects, no longer provides credits to pay in great part for your exports to the British Empire.

Another large part of the British purchases in this country was paid for through credits established on account of services rendered by the British mercantile marine, by British insurance companies, by education given in Britain, and in other less important ways. There is a great change, again as a result of the war, now taking place in connection with the rendering of those services. You, in your own interest, are building up a great mercantile marine. It is, of course, your right to do so; but let us remember that, when it comes to the question of the balance of trade between the countries that means that there will be diminished credits—dollar credits—for the British to purchase your goods with in this country.

There remains the question of British goods coming to this country to balance the purchases of American goods made here. As you are aware, there is a high tariff that acts as a barrier against goods that would be sent to this country.

We are therefore as two nations—each in its own interest vitally concerned with this international trade—faced by a situation profoundly modified from that to which we had grown accustomed.

Moreover, Britain, as a result of (a) the collapse of Russia, (b) the destruction of Germany, (c) the present state of affairs in Austria and Hungary, has lost a great part of her European markets. Add to the unrest of the Far East and of the East generally, and there is another series of shrinkages in markets which were formerly reached by British goods.

Still further, consider the enormous volume of taxation that it has been necessary for the British Government to impose upon its people. Over 40 per cent of the total cost of the war was paid for as it was incurred out of taxes. Last year alone we paid off over $12,000,000 of debt. That taxation is imposing a very heavy drain naturally upon the manufacturers and merchants of the British Isles.

I draw your attention to these points because I see frequently in the press suggestions that everything is coming right, quickly; that trade is going to boom within a few weeks; that the whole world financial machine is soon going to start up and run smoothly and easily.

It is not going to be easy to get back the old volume of trade. That ultimately that volume of trade, great as it was before the war, will be enormously exceeded, I have no doubt; but I believe that there is a period ahead of us during which there has to be the very greatest skill and care shown, not only by those directly concerned with finance, trade, and commerce but those who are responsible for the governmental policy in the various countries, and by those who, like myself, are in part at least responsible for maintaining the close touch between one Government and another.

We are facing a world disordered so profoundly, when we contrast it with the pre-war condition of affairs, that it is quite obvious that we never can return to the sort of situation that then existed. But I believe that all these difficulties can be got over, provided the best intelligence and the best will that every country can bring to bear upon the situation is brought to bear.

There are still vast devastations to be made good in Europe. The devastated areas of France are still devastated areas; the devastated manhood of the European countries is still a devastated manhood. Perhaps not in two generations can that human devastation be recovered from. The losses are not only losses of existing wealth but losses in the capacity to produce new wealth.

In such a situation as this, one is appalled at times to see the levity with which commentators upon difficult international situations utter their claims. This is a time when we all, nation to nation, country to country, throughout the world, must appeal for efforts to understand one another's difficulties.

Europe as a whole—one of your best customers, almost as great a customer as the British Empire—is shattered, disordered, beyond hope of immediate recovery. You who, by your business or profession, deal with problems impinging closely upon this great world trouble are in a position to know with great accuracy and in great detail where the shoe pinches. The men in Britain who correspond to you know accurately where the shoe is pinching there.

Time and again, throughout this country, I have expressed the belief that the surest way to get rapidly back upon the road to recovery in the financial and economic situation is through the international cooperation of business men. It is not every Government that is able, for one reason or another, promptly to respond to the business, economic, and financial needs of the situation. But among the business men there is a flexibility, a power of adjustment and capacity to fit in, which Governments, because of their inevitably ponderous nature, must always lack. No Government of any great country can move rapidly and with certainty that it is moving in the right direction. I, therefore, appeal to you to do all that you can to see that no unnecessary hindrances are put in the way of international trade; to see that all reasonable assistance is given to international trade.

It is through international trade alone that the world can recover from its present disordered condition, that prosperity can come back into the thousands of homes which at this time are experiencing anything but prosperity.

I believe most strongly that this world problem calls for intelligent cooperation between the business men of all countries. I do not plead especially for cooperation between the business men of this country and my own country any more than I plead for cooperation between the business men of this country and France, Italy, Belgium, Japan, and all the other countries. That cooperation, teaching men to see the community of interests between them, teaching them the habit of cooperation, may go far to lay a foundation upon which peace can stand secure, unshaken, and unmoved throughout the generations to come.

The world surely has had a sufficient lesson in the last great war as to what the real cost of war is—not only the war bill in money, not only the war bill in blood, but a war bill in shattered financial machinery, in shattered economic conditions, and a war bill in suffering, in unemployment, in the starvation of women and children, a war bill that has to be paid for in the years that follow the war by the death of children improperly nourished, and by the death of men and women. The casualties of a war do not end when the fighting stops. Look at Russia to-day; look at Germany to-day; look at the unemployed in Britain to-day; look at your own unemployed. The casualties go on; the war bill of blood and life and health and happiness mounts up for years after the last shot is fired.

It is mounting still, and it will mount perhaps for years to come in death, misery, starvation, and disease. It is a great price to pay; and no man who considers what this past war has meant to the human race can dream of another without feelings of horror, of loathing, that such a catastrophe should come upon us.

The best, the only way, is for the people of the countries who can to get in touch with one another, to cooperate with one another, and to weld the commercial interests of the nations more obviously into one. They are one now; they were one when the war broke out, and although many people had said that in words, few knew it in understanding. Now we know it. Now is your opportunity, if you will, to do much to help this sore stricken world back onto its feet, back to prosperity. But you can do more; you can do work for the future, you can lay firm and true and solid a foundation of mutual interests, respect, understanding between the nations, upon which peace, world peace, may safely rest for years to come.

The PRESIDING OFFICER. The Secretary will state the pending amendment.

The ASSISTANT SECRETARY. On page 78, line 23, the committee proposes to strike out the word "sporting" before "breech-loading."

Mr. SIMMONS. Mr. President, when the proposition to strike out the word "sporting" was first presented in connection with this paragraph on line 16, I did not see any serious objection to striking it out. But as the purpose of striking it out has been made more apparent to me, I do see serious objection to striking it out.

The paragraph as originally framed by the House imposed on double or single barreled sporting, breech-loading and repeating shotguns, rifles, and combination shotguns and rifles, valued at a certain price and graduated as to the value, a specific duty "and in addition thereto, on all the foregoing, 45 per cent ad valorem." The House rate was 35 per cent, and the Senate committee proposes to increase it to 45 per cent.

The firearms on which it was proposed to impose these excessively high duties were, as provided by the House, "sporting firearms," and then in the next clause are "barrels for sporting breech-loading and repeating shotguns and rifles," upon which a duty is proposed according to their selling price of as high as 55 per cent, with this proviso:

Provided, That all sporting breech-loading shotguns and rifles imported without a lock or locks or other fittings shall be subject to a duty of $10 each and 55 per cent ad valorem.

In each one of the sections of the paragraph as the bill came from the House the high rates of $10 each plus 45 per cent and $5 each plus 50 per cent, and so on, applied only to sporting articles. Now it is proposed to strike out the word "sporting" and instead of applying to sporting articles, the paragraph as the committee would rewrite it would apply to all firearms of this character.

I suppose that these very high duties were imposed upon these articles by the House and by the Senate committees because they were sporting articles and because, as the Senator from Connecticut [Mr. McLEAN] contended, there were certain highly specialized products of Europe that Americans fancied very much for which they were willing to pay big prices and which would come in here and be sold in competition with our domestic-made guns, and that the profits the foreigners received on the transaction were very great. Sporting materials are proper subjects of taxation ordinarily and proper subjects of high taxation, but the Senate committee has stricken out the word "sporting" wherever it appears, so that it extends to all

firearms of this particular description. In the original bill the paragraph applied only to sporting firearms of the kind such as the Senator from Connecticut described in his speech.

Under these circumstances it seems to me the Senate committee has completely changed the whole paragraph by striking out the one word. The whole purpose and the sole purpose of the paragraph as written by the House was to give these high rates of protection against imports of sporting products, and now the Senate committee proposes to strike out the word "sporting." It not only strikes out that word and changes the character, but it is tremendously raising the rate. I would be glad if the Senator from Utah would make some explanation of the reason why he wants to change the paragraph entirely by eliminating the qualifying word.

Mr. SMOOT. Mr. President, the existing law does not have the word "sporting" in it. When the present law was enacted there was no idea of putting the word "sporting" in it or making any such classification.

Mr. SIMMONS. No; and it did not have these high duties in it, either.

Mr. SMOOT. The Senator asked me——

Mr. SIMMONS. The present law has only 35 per cent.

Mr. SMOOT. I am perfectly well aware of that. The Senator asked me why these words were stricken out.

Mr. SIMMONS. Very well. I shall not interrupt the Senator further.

Mr. SMOOT. With the word "sporting" used, it has developed that it is next to impossible, if not impossible, to tell what a sporting breech-loading or repeating shotgun or rifle is. There are shotguns and rifles used for other purposes than sporting, and no human being can tell the difference between them and a sporting gun. I know that before the war the shotguns bearing the name of one of the greatest gun inventors in the world were all made in Belgium. Although the patent was issued in the United States and we have plenty of workmen in the United States to make the guns in this country, yet they were all made in Belgium, and they came into this country to be sold to the American people. Under that condition I think there ought to be a duty collected on those guns coming into the United States.

It is true, as the Senator from North Carolina has said, that by striking out the word "sporting" the rates apply to all the breech-loading and repeating shotguns and rifles and combination shotguns and rifles.

In other words, any kind of gun such as is described in the paragraph will fall under the same rate of duty. What the Senator from Connecticut said is true—that many of the shotguns which are imported from foreign countries, costing hundreds and hundreds of dollars, are imported by some American hunter who perhaps on a visit to Europe upon some occasion met some lord or prince who used a certain kind of breech-loading rifle or shotgun and nothing would satisfy him but to have one just like the lord or the prince had; and he pays anything that is asked him for that kind of a gun. If it comes into this country, there is no reason why he should not pay the duty on it as is provided in this paragraph.

The ordinary shotgun that the average man uses can be made in this country as against almost any other country in the world, but when it comes to using fancy shotguns with coats of arms engraved upon them, which are decorated in some fashion, which makes the shotgun no better but adds to its price, I can not see why anyone should object to imposing a heavy duty upon that kind of goods coming into the United States. The committee thought it was right and proper to strike out the word "sporting" because of the fact, in the first place, that no human being can tell whether a rifle is a sporting rifle or is to be used for some other purpose.

The Senator from North Carolina himself when the present law was under consideration did not in framing that law use the word "sporting"; it is not in the present law, but it was in the Payne-Aldrich law. In the execution of that law, however, it was found almost impossible of administration. Many conflicts arose in connection with the importation of that class of goods. For that reason, and for that reason only I think, when the existing law passed the word "sporting" was eliminated from it.

Mr. TOWNSEND. Mr. President——

The PRESIDING OFFICER. Does the Senator from Utah yield to the Senator from Michigan?

Mr. SMOOT. Yes; I yield.

Mr. TOWNSEND. May I ask the Senator for what purpose shotguns and rifles are used if they are not used for sporting purposes? I have been trying to ascertain for what such guns are purchased and for what they are used except for sporting purposes.

Mr. SMOOT. I will say to the Senator that rifles may be purchased for defense and for rifle practice, but I do not know whether or not rifle practice would be called a sporting purpose.

Mr. TOWNSEND. I doubt whether it would be necessary to put in the word "sporting," for I can not think of any purpose for which one buys a gun except it be for a sporting purpose.

Mr. SIMMONS. I think it is a common custom—it is certainly so in the section from which I come—for every householder living in the country to have a gun in that house for the purpose of protection.

Mr. SMOOT. I never had a gun in my house.

Mr. SIMMONS. The Senator, perhaps, has never lived in a remote rural section. Guns may not be needed in town.

Mr. TOWNSEND. From what I have heard about some places where guns are used I had supposed they were employed for sporting purposes even when feuds were being carried on.

Mr. SIMMONS. I think not, Mr. President.

Mr. SMOOT. I well remember that when a certain wonderful repeating shotgun came out I took the inventor of the gun to call on President Roosevelt. I shall never forget the reception that was given him by President Roosevelt. It was not the kind of reception which the inventor expected to receive. President Roosevelt stated at the time that the manufacture of such guns ought to be barred; that they should never be allowed to be made. He then gave his reason for that statement, saying that the invention of such guns meant the destruction of bird life in this country.

Mr. SIMMONS. Now, let me ask the Senator from Utah a question. If he is quoting President Roosevelt with approval about this matter and thinks such guns ought to be barred altogether, why does he wish to protect the man who is making them?

Mr. SMOOT. It is not in order to protect against guns coming from a foreign country, for we can make all we want in this country without going to Belgium, where most of the imported guns are made. Every one of the guns to which I had reference was made in Belgium; there was not a single one of them made in this country.

Mr. SIMMONS. Is it not the purpose of the duty to protect the manufacturer in this country? If it is not, will the Senator tell me what is the purpose?

Mr. SMOOT. The guns to which I have referred are made in a foreign country.

Mr. SIMMONS. We are not protecting guns in foreign countries. Is it not the purpose of this paragraph to protect the American producer of these guns against foreign competition?

Mr. SMOOT. President Roosevelt thought there should be an embargo on such guns.

Mr. SIMMONS. Then, let us strike out the whole paragraph.

Mr. SMOOT. There is no necessity for that.

Mr. SIMMONS. If the Senator thinks the producers ought not to be protected, but, on the contrary, ought to be driven out of business, let us strike the paragraph out.

Mr. SMOOT. The reference which I made has nothing to do with business in this country. It has to do with business abroad.

Mr. SIMMONS. The Senator does not contend that these duties are being imposed for the benefit of the foreign producer, does he?

Mr. SMOOT. I never made such a statement and never thought of such a thing.

Mr. SIMMONS. Why should they be imposed for the benefit of the American producer if he is an evildoer and ought to be suppressed?

Mr. SMOOT. So far as that is concerned, I did not say he ought to be suppressed. I stated what President Roosevelt had said as to one particular kind of gun. As to rifles, they are used by deputy sheriffs all over the country, and of late I think more of them have been used by agents of the Government engaged in the enforcement of prohibition than for almost any other purpose.

Mr. SIMMONS. Does the Senator think that is a sporting purpose?

Mr. SMOOT. No; I do not; but the question of whether a gun is to be used for sporting or other purpoess can not be determined, and therefore the committee struck out the word "sporting."

Mr. HEFLIN obtained the floor.

Mr. SIMMONS. Will not the Senator from Alabama let me finish this matter? It will take but a moment.

Mr. HEFLIN. I yield to the Senator.

Mr. SIMMONS. Mr. President, I do not want to delay a vote; I think we ought to have a vote, and we can take it in a very few minutes.

Mr. President, the House imposed very high rates on these articles. Just listen to them now: On shotguns valued at more than $5, $1.50 each; valued at more than $5 and not more than $10, $4 each; valued at $10 and not more than $25, $6 each; valued at more than $25, $10 each; and in addition thereto on all of the foregoing the House added an ad valorem rate of 35 per cent, while the Senate committee makes it 45 per cent ad valorem. So that on guns costing $25 or over the duty will be $10 each and 35 per cent ad valorem. As the House passed the provision that rate of duty would only apply to sporting guns, but the Senate committee has stricken out the word "sporting," so that the paragraph applies to all of the articles mentioned whether they are purchased for sporting purposes or are purchased by the officers of the Government for use in the enforcement of the law and the discharge of their duties to protect the public, or by the farmer who lives in a remote section of the country to protect himself against evildoers.

Mr. President, I assume that the House never would have imposed those excessive duties if it had not been intended to restrict the provision to sporting goods. What has troubled me is that the Senate committee should strike out the word "sporting" and give the paragraph universal application instead of the restricted application of the House provision, and then increase the rate from 35 per cent to 45 per cent in addition to a $10 specific duty.

I have said the proposed duty could not possibly be for revenue purposes. I do not think it can be, because, according to the report of the Tariff Commission, there were about $100,000 worth of these articles imported in the nine months of 1921. The duties are for protection. Bearing in mind, Mr. President, the small imports, I wish to read what the Tariff Commission says about the exports:

> Exports during the four years previous to the war amounted to between three and four million dollars annually, of which approximately one-half went to Latin-American countries. In the fiscal year 1914 the exports amounted to over 30 per cent of the production.

With $100,000 worth imported, as against an enormous production and exports amounting to 30 per cent of the American production, yet it is proposed to impose a duty of $10 on each gun valued at more than $25, and in addition 45 per cent ad valorem. I say the duties can not be for protection, because no protection is needed upon a product of which the imports are not 1 per cent, although the exports amounted to 30 per cent of the total production. No duty of any kind is needed to protect under such circumstances; and if the duty is imposed for revenue purposes, no revenue will be derived. It is true that the old law imposed a duty of 35 per cent, but it added no specific duty. The ad valorem duty now proposed is 10 points higher than that of the present law, and to that there has been added a specific duty of $10 for each article costing more than $25.

There is no way in the world, Mr. President, by which there can be justified any such tariff imposition as that, and I think nothing can more conclusively show that there is no justification for it than that the Senator from Utah, with all of his skill and his knowledge and his ingenuity, despite his effort to defend these rates, was utterly unable to do so. I submit that the reasons which he assigned were no reasons at all.

Mr. NORRIS. Mr. President, I am surprised that the Senator from North Carolina, who has served here for a long time, who was a Member of the House, and has been on the Finance Committee for many years, should not know why this tariff was levied.

Mr. SIMMONS. It has been one of the greatest mysteries of my life. I have been trying to find out, and I have gotten no light.

Mr. NORRIS. I am surprised that the Senator does not understand it. Of course, it is not for protection, because we send guns all over the world. We command the world's market in guns. There is no protection in it. It is not for revenue, of course, because none are imported; but the Senator forgets—and this applies to a good many other things in this bill—that there is another reason that might have a practical effect, and I am surprised that the Senator does not understand it. Has he forgotten the men who are engaged in making guns in this country? Has he forgotten that the war is over and that their market is probably somewhat interfered with, and that they need some assistance from somebody? Does not the Senator realize, too, that while there are no guns imported, because they can not compete with us, there are, nevertheless, people in other countries who make guns?

We have this market. We are reaching out to get the balance of the world. We want a tariff away up high so that we can raise the price here and still keep out the foreigner, while we go out into the foreigner's country and sell guns at less than cost and put him out of business. We could not do that if we did not have the American fellows here toiling and working to make up here what we lose abroad, and hence we have to have this. It is necessary. If we can raise the tariff high enough to keep out the other fellow, and raise the price here up to the level of the tariff wall and compensate ourselves while we go out and conquer the rest of the world in the gun business, when we have driven the other fellows out of business in their home countries, which may take some time, we can increase the price there. We could not do that without losing some money unless we had this thing in the bill, and so we have it in here.

It may be pretty hard on the fellows who want to buy guns to shoot prairie dogs and rabbits, but it is a splendid thing for the millionaire who makes the gun. The Senator has forgotten about that, and while he is traveling out to gather in the world market we will toil and sweat and work and labor and keep the wolf from his door. That is why we have this tariff, not only on guns but on a good many other things. We are going to do the same thing with sewing machines and paints, and a lot of things made out of steel, and a whole lot of other things; and will it not be a glorious day when that time comes, when our millionaires will control the world, and we will go hungry and toil while they are getting around to do it? We ought to be glad of the opportunity to make these sacrifices. We ought to rejoice that we are the instrumentalities by which these men will not only profiteer but continue to profiteer. They have us captured now. We want them to capture everybody else, and let everybody pay tribute to their greatness and to their grandeur.

The Senator from North Carolina has not grasped the idea yet. He ought, it seems to me, to be able to understand, and he will when he gets as old as I am and lives as long as I have, that one of the blessings that come to us through such legislation as this is that for every drop of sweat and every bit of toil that our people go through and all the suffering they have to endure they are going to be able to see somebody living high and flying with the geese.

Mr. SIMMONS. Mr. President, I want to say that I have heard quite a number of good tariff speeches, but I think the speech just delivered by the Senator from Nebraska is the best tariff speech that I have ever heard. It is the best indictment of this bill that has been made. It is the best indictment of the application of the principle of protection so as to help those who do not need help and oppress those who are already overburdened that has been made.

I have been trying ever since we first took up this bill, in my feeble way, to say just exactly what the Senator from Nebraska has said. The picture he has drawn and presented to the Senate visualizes accurately the situation as it will exist under the operation of this bill if it should pass. It is the same picture that has been in my mind ever since I first began to study and understand this bill; but I am not a word painter, as is the able and courageous Senator from Nebraska, and I have not been able to express in such terms and forceful language the real purport and meaning and the ultimate effect of the passage of this bill as he has expressed it.

But, Mr. President, I want to say that in addition to the clearness and the force and the picturesque way in which the Senator has accurately and truthfully described the consequences of this legislation, what it will lead to, and what it will end in, he has demonstrated here to-day a degree of courage which inspires my profound admiration. That a man representing the other side of the Chamber, a Republican, always true and faithful to his party, should have the courage to stand up here in the face of this drive of the old guard in the interest of the monopolies and the trusts of the country and to the great hurt and harm of the masses of the people, to my mind presents a very inspiring and enthusing spectacle.

Mr. WATSON of Georgia. Mr. President, will the Senator yield to me?

The PRESIDING OFFICER. Does the Senator from North Carolina yield to the Senator from Georgia?

Mr. SIMMONS. I do.

Mr. WATSON of Georgia. In 1824 George McDuffie, who was born within a few miles of the place where I live and where I have spent my life, but who afterwards became a Senator from South Carolina, made in Congress the very best speech that was ever made against the protective tariff system; and in that speech he predicted the very conditions which have been so ably described by the Senator from Nebraska.

Mr. SIMMONS. Mr. President, I arose only to express my admiration of the courage of the Senator from Nebraska [Mr. NORRIS], and my delight at his splendid success in visualizing

and picturing the results of this tariff bill, for his little speech was not only a gem but it was a picture. He pictured the situation like an artist, as nobody else has done it, as I do not think anybody else will be able to do it.

I want to express my gratitude and my admiration for the Senator. He has done the public a service in making this thing so clear, and I hope and believe that what he has said will be taken by the press of the country to the people of the country. He said it in a vein of irony, it is true, but an irony which will be understood. Before we get through with this business I look for other courageous utterances of this kind. I look for more independent action on the part of Members on the other side than have developed up to this time.

There is no question about the fact that the people are beginning to understand this bill pretty well. Outside of this Chamber, in private conversation and in public gatherings, it is being discussed with a freedom with which it is not discussed here, and the volume of protest and criticism is growing every day. I do not understand why it has not reached the sacred precincts of the majority members of the committee more fully than it has. Of course, I appreciate the fact that they have already made a great many surrenders and receded from a great many of the cruel exactions they originally proposed, but they have not gone half far enough. They have not gone anything like half far enough. They ought to take the bill back into the committee and rewrite it from beginning to end. The sentiment of the country would approve and applaud them if they would take the thing back into the committee and rewrite it altogether. The sentiment of the country is overwhelmingly against it. In fact, when you get outside of this Chamber it is very difficult to find anybody, outside of the beneficiaries, the representatives of the combinations whom this bill was made to subserve, who defend these rates.

Mr. HEFLIN. Mr. President, I want to read what a Republican witness said upon the pending tariff schedule. I am about to read a statement which appears in the hearings before the Senate Finance Committee regarding the tariff on "shotguns, rifles, and automatic pistols." This statement is from Mr. E. P. Gebhart, representing the Milford Co., of Milford, Del.

Mr. POMERENE. Will the Senator give the page?

Mr. HEFLIN. Page 1986 of the hearings before the Senate Committee on Finance on the proposed tariff measure. Speaking in condemnation of tariff barons, of those who are trying to hold up the American people and tax them for the benefit of themselves, taking money out of the pockets of the people by the use of the taxing power of the Republic to put money into their own pockets, this man said:

> And they would have the American people believe that they are not increasing the cost to the consumers by this Fordney Act. And they would have them believe that it does not put the importer out of business, nor enable our manufacturers to still further gouge the poor, overburdened buying public, who are now and have been crying out to this very Congress for protection and relief from the profiteering prices that still rule in so many instances; especially is this true of the prices of the firearm manufacturers that rule to-day, as will be seen in the list of wholesale prices of the guns produced by the few factories in our country. Examine these prices and ask yourselves what justification these manufacturers had in further advancing their prices only last year. Can you conceive of a worse case of profiteering outside of the one just discovered where they are selling coffins to the people of this country that cost $30 for $600?

Mr. President, you have a band of tariff marauders roaming the country carrying the American flag as they use the taxing power to rob the consuming masses of America. You do not even let the people give you a reason why they should not be taxed and robbed under the provisions of this bill. You stand here, and under the lash of your party leaders—Senators LODGE, of Massachusetts; WATSON, of Indiana; WILLIS, of Ohio; MCCUMBER, of North Dakota; and SMOOT, of Utah, and others—quarrel and scold at those on this side who denounce this bill, and a few on the other side who dare to differ with you and refuse to support it.

You say we are delaying you. Is a Senator committing a wrong when he is delaying and trying to prevent an outrage like this? If we should fight it all summer, we would hold its robber hand off the throats of the people just that much longer. That would do some good. We are not filibustering; we are calling attention to the deadly provisions that you have written into this bill.

I had no idea when you started out with this thing that you were going to tax everything the American people consume; everything they have to buy. But there is scarcely anything in all the catalogue of necessities in American life that you have not scheduled for taxation in this bill.

The Senator from North Carolina [Mr. SIMMONS] has stood here day after day showing in instance after instance that there was no necessity for the tax you have imposed, showing that you were putting a tariff tax on a necessity of life when the imports of that particular item from all the countries of the world amounted to only a few thousand dollars a year, and that we were exporting—selling in foreign markets—millions and millions of dollars worth of the same item. Yet you stand here, under the flag and under your oaths, and levy taxes day after day upon the consumers of our country. The consumers that I speak of include all classes that make up the mass of a hundred millions of people.

Let me read further from the statement of this man Gebhart, a Republican:

> The writer has always voted a Republican ticket, but had the Fordney Act been the issue on election day last November instead of the League of Nations and the favoritism shown labor by the last administration, myself as well as millions of other Republican voters would undoubtedly have voted against our party. Let that verdict on last election be a warning. Pass this Fordney Act and deny relief to the overburdened taxpayers of our country who are so earnestly asking relief from the high prices that rule to-day, and which have put a stop to all business, and you will witness a result at the coming elections that will make the 7,000,000 majority last November look small.

Oh, Mr. President, this man must be a prophet. What bill was he talking about? He was talking about the Fordney bill that came over from the House of Representatives. It is the same bill that is now here before us, except that it is worse now than it was then. You have offered to it 2,000 amendments increasing the tariff tax levied by the House. You are making the tax larger than the House had it in about 2,000 instances, and yet this man denounced it before you put your amendments to it. He said the country would repudiate you, and that was before you increased the taxes as you have over here. He said if the country could ever vote upon the bill even as it passed the House it would repudiate you and would reverse the 7,000,000 majority and roll up a much larger majority in repudiation of your conduct.

Mr. President, I saw the party in power lay a tax upon brick, brick that we must use for building houses in which to live, for building chimneys for our houses up which the smoke must go from the fire below which keeps the building and the inmates of the household warm in winter. Then I saw you put a tax upon nails that are used in the construction of the house in which the citizen lives. I saw you put a tax upon the hammer and the saw used in the construction of the dwelling house, and I thought of the poet's reference to the song of the hammer and the saw. How delightful it was before you put a tax on these two common necessities of life.

I saw you lay a tax on the windowpane that lets God's sunlight into the home circle of the American citizen. You put a tax on that. You put a tax on every rod and bar and bolt and nail that goes into his dwelling. You tax the roof that covers his head, the windowpane that lets light into his household. You tax the food that he eats. You tax the salt that goes into his bread. Then you tell us we are delaying you, and that we are filibustering because we dare to stand here each day and tell you that it is wrong to tax such things.

What right have you to lay a tax of 40 cents a sack on salt, especially in these distressing times? Was there any danger of salt imports injuring our American market? They shipped into our country last year only a few thousand pounds of salt, and we shipped out hundreds and hundreds of thousands, and yet you build a wall around the American people, and you shut out that little salt that comes here in competition and helps somewhat in making the American consumer get a reasonable price. Have you no consideration at all for the millions who must buy and consume salt? Are you here to serve the purpose of two or three thousand people who are interested in the Salt Trust of the United States?

As you strut around on dress parade you boast that you are the party of Lincoln. My God, if he should come back here and see the gang of burglars that is pillaging and plundering the American people in his name, he would repudiate it. Why, Lincoln would vote the Democratic ticket if he were alive to-day. There is nothing more certain than if Lincoln were here now and could see what the Republican Party is doing and how it is invoking the taxing power for robbing purposes in his name he would scorn and repudiate it. Until you strike from this tariff bill the taxes that you have imposed upon the common necessities of life, never again insult the name of the lamented and martyred President by calling yourself the party of Lincoln.

Mr. President, you have protected the Saw Trust of the United States. Was it in any danger from foreign competition? Let us see. The value of all the saws shipped into our country from all the countries of the earth in 1920 amounted in value to only $126,000, and we exported $4,445,000 worth, which were sold in the markets of the earth. You shut the doors to those who would come in and give us a little competition to help every laborer who must buy a saw and every farmer who must

buy a saw and every sawmill man who must have saws. You have levied a tax upon them for the benefit of the saw combine of the United States.

You have not a tariff duty in all this bill—not one—that helps the rank and file, the average man and woman in the common walks of life. You have imposed no tax in this bill that helps anybody except the tariff barons of the United States, the men who come to your committee meetings, the men who write big fat checks for your campaign fund.

Those are the men who control the items that go in the bill, and the mass of men and women out yonder, in whose name I plead to-day, are literally held up and robbed for the benefit of those who seem to think that they have paid for the privilege of taxing the American people. It may be that for the immediate present our pleading is falling on deaf ears. The Senator from Indiana [Mr. WATSON] said that the other day. He quoted one of the Senators on the Democratic side in a speech made 30 years ago, in which he said: "I know what I am saying is falling on deaf ears." The Senator from Indiana then said: "It is a pity you can not realize that is what is happening now, and that your appeals are falling on deaf ears."

Mr. President, there is an appeal which can be taken after awhile from this body, thank God, and that is to the judgment bar of the American people. That is the sovereign power in America. There is no power in the country above that. By wielding the ballot they can drive from this Chamber those who have violated their trust and perverted the taxing power from the ends of its creation.

Senators, the people are not going to stand for what is going on here. Can you not read the signs of the time? Just think of what occurred in Pennsylvania a few weeks ago and what occurred in Indiana a few weeks ago and what occurred in Iowa on yesterday. If that is any index at all to what is to happen later on, there are some hopeful and helpful things to occur in the next few months, Mr. President. Of course, there are some exceedingly clever gentlemen over there; gentlemen that I like personally, but I would not permit my personal friendship for anyone to cause me to consent to a policy that would do a wrong thing. You have no right to tax one man to enrich another. You have no right to hold up the American consumer and say, "You have to give of your earnings so much money to the salt manufacturer; you have to give so much of your money to the saw producer of the United States; you have to give of your earnings to the big brick dealers of the United States; you must pay something to this one and something to that one." The consumer says, "Where am I going to get the money?" Your tariff barons say "That is none of our business. It is our business to put the tax on you, and we are going to do it. It is your business to pay it." "But," says the American consumer, "I have to have these necessities." And then you say, "If you have not got the money, you will not get them. If you have got it, you will pay tribute money to every trust in America when you buy." That is what you are doing.

Mr. President, let me again remind you that when Carnegie bought out the big steel company he testified under oath that it was worth $10,000,000. In three years' time, under the Dingley tariff law, he testified that it was worth $360,000,000. How did he make it? Every farmer who used a steel implement of any kind paid tribute money into the pockets of Carnegie. Every surgeon who used the steel blade in operating upon an unfortunate human being paid tribute money for his steel instrument to Carnegie. Every pocketknife and every other kind of knife that had steel in it paid tribute money to Carnegie. Every woman who wielded a sewing needle in America paid tribute money to Carnegie. His taxgatherers were wherever those things were sold and handed over the counter to the consumer. The money rolled in in tremendous volume, and in three years' time, under the reign of the Republican Party and its high protection, Carnegie reaped $350,000,000 profits on a $10,000,000 investment when the Dingley law was in effect.

Then you tell us you are levying these taxes for the benefit of the American people. Do you suppose it benefited the poor woman who had to sew day and night, eking out a miserable existence, trying to make an honest living? Did it help her to have to pay an additional price for needles? Those who knit socks and stockings and sweaters and other things—do you suppose that it helped them to pay a higher price on steel knitting needles? That is the position you take. You stand here and say you are writing the bill in the interest of the American people. It is not true. Not a word of it. You are writing it purely and wholly in the interest of the tariff barons of the United States. You are trying to shut out every friend we have in the world who buys American products. We are a producing Nation.

The old doctrine was: That mercy which I to others show, that mercy show to me. What is America doing following the great World War? We are the richest Nation in all the world, and yet 60,000,000 of our population are absolutely in a state of uneasiness and distress to-day under the reign of the Republican Party.

What are we doing? Are we selling our goods abroad? Certainly. Are you going to shut out all trade with other people and insist that we sell to people from whom we will not buy? If we sell, we must buy. Are we going to quit buying? If they can not trade some with us, how will they get money to buy our goods? Are we going to draw ourselves up into a shell and shut out foreign customers altogether and then permit trusts to hold up the American consumer with one hand and rob the producer with the other? Where are the American people benefited by such a policy? And yet that is what you are proposing to do.

"Live and let live" is an eternal doctrine. That is the fundamental principle of the Democratic Party. Live and let live. What provision are you making to let live the rank and file, the great common people of whom Lincoln spoke so tenderly and lovingly a thousand times? Nothing. Absolutely nothing. You are huddling them together as a shepherd huddles his sheep when he gets ready to shear them. He brings them up and he shears them. The good shepherd will not shear them too close. He will let them go and let the wool grow out before he shears them again. You Republican leaders are arranging to shear the mass of American consumers as the shepherd shears his sheep. Just as soon as they can earn a little something you shear them or fleece them and take it away from them and say you are doing it in the interest of the American masses. God pity such philosophy.

The junior Senator from Ohio [Mr. WILLIS] day before yesterday reminded us, as did the Senator from Indiana [Mr. WATSON], that one of the first bills ever passed by Congress was a tariff bill. Yes. Why? Our country was just organized. It was doing business with other countries. It had some infant industries. Our forefathers said, "We ought to impose a little tariff tax for that infant until it can get upon its feet." That is what was done. There were only 100 items in all in the first tariff bill, while in the pending bill there are 4,000.

What was the plea then? The plea was, protect an infant industry until it can get on its feet; but, as Mr. Bryan once said, the infant industry has now become so big that it stands on everybody's else feet in the United States. [Laughter.] The Republicans do not apply that principle now. Take the item of saws, of which only $126,000 worth annually are imported from the entire world, while we export $4,445,000 worth. Let me ask again, Do we need any protection on saws? Not a cent. Why was a high protective duty imposed? Because the Saw Trust of the United States demanded that it be imposed.

Mr. President, I desire to refer to some statements made by the Senator from Ohio yesterday. He referred to the tariff laws of 1790, 1800, 1810, 1820, 1830, 1840, and up to 1870. He said those bills were discussed and disposed of in the Senate in a week or in two weeks, while we have been discussing the pending bill for six weeks. Now, let us see as to that. What was the population of this country in 1790? In round numbers, it was 3,000,000. There were about 100 items in the tariff bill of that year. In 1800 the population of the country was 5,000,000; in 1820 it was 9,000,000; in 1840 it was 17,000,000; in 1860 it was 31,000,000; in 1871 it was 38,000,000. We have now a population of over 100,000,000. It is proposed to tax more people now than were then taxed, and it takes more time to keep the robber tariff barons off 100,000,000 people than it did to keep them off five or ten millions of people many years ago.

Mr. President, let us consider the number of items that were embraced in those several bills. The act of July, 1789, embraced 153 items; the act of May 19, 1828, to which the Senator from Ohio yesterday referred, covered 72 items; the act of March 3, 1857, embraced 100 items; the act of June, 1864—the Senator from Ohio also mentioned that—included 272 items; and the act of June 6, 1872, covered 81 items and no subdivisions.

Yet, Mr. President, the Senator from Ohio would have us infer from his speech that the tariff bill now before us is the same kind of a tariff bill as those referred to; that it contains the same number of items, embraces the same list of necessities, and that we ought to dispose of it, therefore, as quickly as such bills were disposed of by Congress 30, 40, 50, and 100 years ago. Not so. The early days of the Republic

never produced such a crafty and avaricious bunch of tariff marauders as now sit in this gallery awaiting the enactment of a law which gives to them the privilege of plundering the American people.

What I wish to show to the Senate and to the country is that when we levied taxes on 100 items it did not take long to dispose of the bill; that could be done even now in a little while; but in this instance a bill has been written which contains not 100 and not 1,000, not 2,000, not 3,000, but 4,000 items. This bill has been brought into the Senate after having been framed when no Democrat was present; none of us knew what was in it; not even the Democratic Senators who were on the committee were permitted to know about its provisions. The committee sat behind closed doors and shaped the bill and wrote what the trust magnates and tariff barons asked them to write and then brought it into the Senate. Then what happened?

I wish now briefly to refer to the argument of the Senator from Indiana [Mr. WATSON]. He said, in substance, "We did not intend to discuss the bill; we brought it in here and submitted it." Think of that, Senators! A tariff bill that involves practically all of the necessities of life from the cradle to the grave is submitted by the Republican members of the Finance Committee, and they acknowledge that they did not intend to explain it to the American people. They were not going to discuss it at all. The Senator from Indiana said that Senators on this side of the aisle—the Democrats—persisted in asking questions, and the Senator from North Dakota [Mr. MCCUMBER] and the Senator from Utah [Mr. SMOOT] felt, of course, that they had to answer the questions. Mr. President, how kind, how generous, and how considerate are the majority members of the committee! This is a Republic, a Government that belongs to the American people. No crowned head presides over this great Government. The men who sit in this body, with the exception of those who have bought their seats, have been elected by the sovereign voters of the United States. This is their Government, this is their Senate, and that is their House over yonder. What right has any pompous statesman of the modern plutocracy to stand up and say, "We did not intend to discuss the bill, but, of course, we will condescend to answer your questions"? They will condescend to make some answer to questions which we propound, of course, and that is kind of them.

What are the questions we are asking? We are asking why it is that the Republican majority places a tax on cement, which every man engaged in building and every farmer in the land must use and every county in the United States uses in abundance? Why do they tax a commodity which is used in every sidewalk, in every pavement, in the construction of public roads, and in thousands of bridges, stables, dwelling houses, business houses, and steamboats, which carry our products to the market of the world? We ask why is a tax imposed on cement when we import only 5,000 barrels, as against 4,000,000 produced in the State of Michigan alone? We are told by Republican Senators that they will condescend to answer some of our questions; that they will be good enough to be patient and tolerate us and make answer to some of our questions. Well, that is very good, I must admit.

When I point out that every man who kills meat and brings it into the market to feed the consuming mass of our people, is obliged to use salt to save and preserve and season that meat, and that salt must be used to season the food upon our tables, and then ask why a tax of 40 cents a sack is imposed upon salt, so that under this proposed law on every 200 pounds that a man buys he must pay 40 cents tribute money to the Salt Trust of the United States, I am told by you that salt must be protected.

I have told the Senate what Senator Vest of Missouri said 30 years ago, that the Salt Trust went down into West Virginia and bought up salt mines and shut them down, to be tapped later on, so that the trust could be left in absolute control of the American market and be enabled to fix the price to the American people to suit themselves. We ask, "Why is a tax imposed upon salt?" and the answer comes back, "Why, you Senators on the other side of the aisle are filibustering." We ask, "What right have you Republican leaders to tax the common necessities of life?" And the answer is, "Why, you are filibustering." The question is, Will your answer satisfy the American people?

The Senator from Indiana [Mr. WATSON] said they did not intend to discuss the bill when they submitted it.

Mr. CARAWAY. Well, he did not.

Mr. HEFLIN. And he has not yet. But we corkscrewed a few answers out of them. If we had not done that we would not have gotten any answers at all. Senators on the other side have shown impatience; they have looked as if they were very bitter toward us at times, because we are making them go down on printed page and tell in the CONGRESSIONAL RECORD each day why it is that they are holding up the people of America as they are in this bill. I know they are sore with us; but when a man gets in such a condition he ought not to remain as a Senator in this Chamber; and the people, actuated by the same spirit that influenced them in Indiana, Pennsylvania, and Iowa will sweep you out of this body and ought to do so. I do not care whether it affects me or whom it affects, when any man in this Chamber uses his power and the Government's power against the interest of the people in favor of those who contribute to his election, he ought to be driven out of this Chamber, whether he be a Democrat or a Republican. I am willing to be measured by that standard. I am willing to have my record of 18 years in the House and Senate measured by that standard.

Mr. President, if the Republic is to live, somebody has got to fight. I know the Senator from Indiana spoke the truth when he said that in the outset they hoped to put this through at an early date. They certainly did not intend to discuss it, and they thought, as it covered 4,000 items, with more thousands of subdivisions, and over 2,000 amendments that had been reported to it, as the work involved was great and the summer months were coming on, that we would not go in and expend the labor and energy to look into it and stand here day after day and night after night expending our strength exposing the infamy of the measure; but we have, to their utter surprise and confusion and the great delight of the country.

Where is the great Republican daily which has characterized our efforts as those of filibusterers? It can not be found. Why? Because the Republican majority are going to find sooner or later that the rank and file Republican does not believe in being robbed any more than does the rank and file Democrat. I have read what Mr. Gebhart said. He said if the Fordney bill—and that was before the Senate committee added its robber provisions—had been before the country at the last election, the voters would have repudiated it and that he and thousands of other Republicans would have voted against the Republican Party. What would he think now if he could look in the face the monstrosity we now have before us, with its 4,000 items and more than 2,000 amendments, most of them increasing the tariff tax?

Creeping up, little by little and bit by bit. That is the way you accomplished it, and the American people must pay it all. But you are not going to get away with it, Senators. The American people are not like a herd of sheep to be herded in a pasture, to be sheared by the shepherd, or robbed at will by the tariff baron.

Mr. President, the political situation is changing rapidly. Mr. Brookhart, or whatever his name is, swept Iowa in the Republican primary yesterday. He condemned on every stump in the State the deflation policy of the Republican Party, and said that if he should be elected he would help clean this thing out. Here you are; you have been in power not quite two years, and strong men are already rising up in your own ranks and repudiating the leadership of those who are carrying them to the altars of Baal and seeking to make them bow down and worship the god of gold. They will not stand for it. There are many rank-and-file Republicans in this country, men and women, who will not submit to it. If they do submit, they are nothing more nor less than cowards.

The Senator from Nebraska [Mr. NORRIS] sounded a truthful note this morning. He made it as plain as the English language can make it that you were simply increasing the profits and the fortunes of one class of people by law, while you were decreasing the substance of another class of people by the operation of that same law. Can a Republic live and do that, Senators?

Mr. President, I do not intend to talk but just a little while. I wanted to read that Republican's testimony, and, in the light of the splendid speech made by the Senator from Mississippi [Mr. HARRISON], reminding you of what was going on, I thought it apropos to read what this Republican said would happen to you if you passed the Fordney bill; and now you have one so much worse than the Fordney bill that if FORDNEY were to meet this thing in the road in the nighttime I believe that he would flee from it. He is a rank protectionist, too; but there are some things that old Uncle JOE FORDNEY would not stand for, and I do not believe he would stand for this monstrosity that you have here.

The Senator from North Dakota [Mr. MCCUMBER], with political cyclones raging all around the country, is having to stand up here practically alone and feed this mill day by day.

Where is Senator LODGE? Gone. Where is Senator WATSON of Indiana? After being away a month, he came back and delivered his campaign speech, and he is gone again. Where are they who in the old days stood here and pleaded in the open for high protection? They are all gone except SMOOT and MCCUMBER. There they stand, the faithful old guard; and when the ides of November come it may be that they will be standing out like the outposts of winter, pelted and beaten by the ballots of a political storm. Why? Because they, with their comrades, will have been weighed in the balance and found wanting. Senators, whose Government is this? It belongs to the people. You do not act like it when you urge the passage of this tariff bill. Here are 4,000 items that enrich 4,000 tariff barons, 4,000 captains of industry, and you filch the pockets of 100,000,000 people in order to make these men, not millionaires but millionaires many times over.

Mr. President, are we killing time, filibustering? What are we doing? The Senator from Ohio [Mr. WILLIS] says: "Why, they discussed a tariff bill in the old days in 10 days, discussed another one in 2 weeks, and discussed another one in 3 weeks, and here you have been 6 weeks."

I want to submit this proposition to Senators: If the fathers spent 10 days in discussing a bill with 100 items in it, how long should we spend in discussing a bill with forty hundred items in it? If we devote 10 days to each 100 items, we will be here a good long time. The population then was five, ten, fifteen, or twenty millions of people, and now it is over a hundred million souls. Then you taxed only a few things, and you were trying to help infant industries, and here you are putting everything under the sun on the tax list. You are taxing absolute necessities and all down the line, with no reason for it except the clink of campaign coin and the demand of those who make contributions to your election fund.

The Senator from North Carolina [Mr. SIMMONS] has repeatedly asked you, the Senator from New Mexico [Mr. JONES], the Senator from Utah [Mr. KING], the Senator from my State [Mr. UNDERWOOD], the Senator from Mississippi [Mr. HARRISON], myself, and others have asked you, time after time, why you put the tax on this and why you put the tax on that necessity of life. Your excuse is not worth the time it takes to make it. The roll is called, and the Republican Members come in from their lounging places, and they vote it in. Why, when they walk in over there we can hear them over on this side saying, "How shall I vote? What is our vote?" You say, "Your vote is 'yea,'" and just as soon as a Member's name is called he says, "Yea."

The Senator from Indiana [Mr. WATSON] says, "We are in mass formation, and we will run over the fellow that stands in front of us." I said, "Yes; you are running roughshod over the American consumer with your mass formation." Who is the commander of that army? He is the high priest, the high muck-a-muck of the tariff barons of America. He has commanded his army of 4,000 captains. There are no privates in that army. They pass the word to Republican leaders to form you in mass formation, and that is why you come in here and vote in mass formation. With 24 Republican majority, the people have no more chance to keep this thing from going through than a snowball has to roll through Pluto's infernal regions and keep its freezing temperature.

Mr. President, they say, then: "Well, why don't you get out of the way and let us pass it?" They quoted one of those old Senators as saying, "Why, I want you to pass this bill. I want to see what the people will do with it. Go ahead and pass it." The Senator from Indiana said to us: "Why don't you look at it that way? Why don't you let us go ahead and pass it?"

Mr. President, is that the way for a statesman to consider a measure—to let it go through here when he knows it will injure the people, because he thinks it will be advantageous politically to his party? There ought to be some statesmen left—there are, thank God—who will dare to do the right, and not simply consider what is for their political advantage. The man who would sit in this Chamber with closed lips and folded arms while a monstrous thing went through that would work injury to the American masses but would help him politically is not worthy of a seat in this body.

What is my duty? If I know that this bill is wrong, it is my duty to oppose it one day and every day as long as it is within my reach. Why should I sit down and say: "As soon as the people find out what is in it they will repudiate you"? I want to tell them now, so that you will not have the opportunity of deceiving them in the coming election. I want them to know this fall when they come to vote at the polls and when your spellbinders get out on the stump. The Senator from Indiana [Mr. WATSON] thought he was out there the other day, and he said several times, "Fellow citizens," as he spoke, in enthusiastic fashion.

When these spellbinders get on the hustings this fall they are going to face old Uncle Johnny and Aunt Mary, who are not able to own an automobile under a Republican administration. They used to have one under Democratic rule. Nearly every fellow in the country when they had any sort of a meeting at the crossroads or in the town or city would come in and you could hear these horns, "Honk! honk! honk!"

They were just whirling everywhere, like bees around a hive. That was under Democratic rule; and you could take up a collection for any purpose, and they would reach up in their inside pockets—they did not go in these little watch pockets then and fish out a dime, like they do now—they would go in their inside pockets under Democratic rule and take out a pad of bills and just give liberally, with a smile. You would say, "Thank you." They would say, "Don't mention it. The Democratic Party is in power." Why, we had a glorious time; and now, where the automobile used to stand the old man says, "Hold those steers, Jimmy." [Laughter.]

The situation has changed entirely under Republican rule, and the man who used to ride up in his automobile is no longer able to do so. Then they were just parked around in the grove. They used to come out to hear speeches about the country and the glory of the flag, and the intrepid spirit of our great warriors who won renown on the battle field and brought that flag back more radiant because of their valor and heroism. They used to gather around in automobiles; but they can not do that now. Their automobiles are gone. Almost everything else they had is gone. Some few of them have a few old mules left, and a horse, maybe, and one of them will come riding up to the camp to hear one of these fellows speak in a tent about the glories of the Republican Party; and when he rides up he will say, "Is that fellow a Republican?" "Yes; he is one of the Senators who helped to pass the tariff bill." "Oh, yes; I have just had my horse shod this morning, and I had to pay more for horseshoe nails and more for horseshoes than ever before. Not only that, but I bought a new bridle, and they taxed everything on the bridle; they taxed the leather, they taxed my saddle, and every piece of iron and steel about it. They taxed all that. They drove me out of my automobile, and now they are about to put me afoot, and this under the reign of the Republican Party." And yet you ask us why we are consuming time!

What right have you to put a tax on horseshoe nails? What right have you to levy taxes upon horseshoes? I said at the outset that nothing escaped. You have taxed everything under the sun in the way of a necessity, and now you have made it so hard for the average fellow to make a living that he has to take his gun and go out and forage, shoot game, and under your party's reign he is not going to be particular about inquiring whether the turkeys are tame or wild if he kills them far from the house, because he has to live.

He goes down to the store and says, "Under the deadly deflation policy of the Republican Party I have lost my farm; I have lost my produce; I have lost my stock; and now I have to hunt for a livelihood, and I will go down to the hardware store and buy a rifle and see what I can do there." He goes down there, and they say, "Here is a rifle. It is $10 more by reason of the tariff tax," and he says something about you under his breath. [Laughter.] There is no rescue for him. Where is the city of refuge for him from the tax gatherers of the Republican Party?

The greatest government that ever existed on earth was the theocracy of God himself, and there was a city of refuge, and when any man in distress, sought by his foe, ran toward the city of refuge, as soon as he crossed a certain line no man could lay his hands upon him. If he did, the penalty was death. If he reached that line and stepped over it, he was entitled to protection under the law of the theocracy, and he was protected. It was the city of refuge.

Where is the city of refuge in America from this band of tariff marauders turned loose under the law in the United States? Where is the city of refuge from the tax gatherers of the Republican Party? There is no escape, from the cradle to the grave.

You ask us, "Why are you consuming time?" I know you hate to hear these things, but we are going to let the people know them. Every republic that has perished in this world perished because those who were in power sought to move against the lines of least resistance, sought to hold themselves in power, sought not to serve the people but to retain their places. This continued until the people became mere figureheads, with their morale broken and their courage gone, independence and strength departed, and free government perished. That is why those republics of earth went down.

What happens here? If a man dares to speak out against some big interest, they commence inquiring, "I wonder if he

could be defeated in his State?" That is the first inquiry. They say, "Is there some good fellow we can pick up to run against him? Could we not help some fellow to beat him?" They say, "He is a pretty good fellow, we know, but he hammers us too much. He tells of our devilment, he puts his finger on the sore spot, and we want to get him out, and get some smooth, namby-pamby fellow who will hold his seat, remain silent, and smile." That is the sort of fellow they want, and they will help him.

Then they commence to nag the Senator who dares to criticize their crooked conduct and to boost somebody else in order to quiet the Senator, if possible, who tried to do what is right by his people.

What are we to do? What are we here for? Life is short at best, and we go this way but once. How much the more important it is then that every one of us should fulfill his duty to the limit, follow the course which he believes is right. But Senators stand up on the other side as if they were in a monkey-wrench convention, saying, "Get on; hurry out of the way. Let us pass this bill." They take out their watches and look at them and say, "I would love to go to the seashore." They would, too. Nearly half of them are down there now. I pictured the other night how some of them are splashing in the surf, and every time they hit the cool waves they say, "Hurrah for the Republican Party." [Laughter.] Oh, yes, it is nice.

Mr. President, it is well that the American people are waking up. There are people in this country who understood the victory of 1920 to mean pillage and plunder. That is what they understood it to mean, and they did not stand back and wait for any ceremonies, either. They rolled up their sleeves and got busy. What have they done? They passed a bill through Congress giving the members of the Shipping Board big salaries and giving officers under them $25,000 a year. That is more than the Cabinet officers of the United States Government get, more than is paid to the Chief Justice and the justices who sit with him in the greatest court in all the world. And this is a sample of your economy. Then you ask us why we undertake to impede your progress as you tax all the common necessities of life. It is our duty to do it.

You are talking now about building a merchant marine. We have or did have the greatest fleet of merchant ships in the world, except Great Britain, and your Shipping Board huddled them like a drove of ducks in a lake and undertook to barter them to the Shipping Trust for $2,100 each, when they cost $600,000 and $800,000 each. Then you ask us why we impede your progress, why we undertake to show you up a little.

What is this Republic? What is our duty in the premises? Shall we fold our arms and sit supinely down and permit you to do these things in the name of the people, when graft and corruption are holding high carnival in the Capitol, when the tariff barons are dictating, under their whip and lash, the bill which you shall write, which will take out of the pockets of the American people $5,000,000,000 out of the earnings and the means of the consuming masses of America? And yet you appear sometimes to wonder why we dare to oppose your remorseless program.

What you are doing is un-American. The fathers never intended that the taxing power should be used for such a nefarious purpose. There are 4,000 items in your tariff bill, and you have proposed 2,000 amendments. Do you expect us just to swallow them without protest? The people are entitled to know what is in this iniquitous bill. Why should they not know? They have a right to know. They have a right to demand that every item in it be explained to them. It is going to affect them. They are the people, and they alone, who will be injuriously affected by it. Why should they not know? It is their Government, and you tell them on the hustings that you are their servants. They will say, "You did not write the bill as if you were our servants. You wrote the bill as if you were the servants of the tariff barons."

Mr. President, a moment ago I mentioned the guns which the farmer, the merchant, the clerk, everybody, would want to buy. You have robbed the man in all the peaceful pursuits of life, and when he comes away from his daily toil and wants to get a gun and go out where he can have a little sport, he finds that you have put a tax on the little squirrel gun and the rabbit gun and the quail gun of the farmer and the farmer's boy. Yet you stand up here each day and say you are writing this bill in the interest of the farmer.

My good friend from Georgia [Mr. WATSON] suggests to me that the man who lives in the country far from the electric lights and policemen of the town and the city, out on his farm in the rural district with his family, needs a gun to protect them, and you have made it harder for him to keep a weapon about the house to protect those dependent upon him, those that he loves. You have laid a tax on the gun that he needs. When the ground is too wet to plow he would go in search of a gun and say, "I will get a gun and go down on the river and see if I can shoot a duck." They would say, "They have put a tax on it. The price has gone up." So he says, "I guess I am not able to buy a gun." So you deny him that sport and that means of providing a little meat for his family. When the hawks come to catch his chickens, he says, "Go and bring me my gun." They say, "Your old gun is rusty. The lock won't work." He says, "Go down and tell the merchant to send me a certain kind of gun." His boy goes to the store and says, "What is the price of that gun?" The storekeeper tells him. The boy says, "I had better run back and see my father and tell him the price has advanced $10." He goes back and tells the old man, and the father says, "All right. Hang up a shirt out there on a pole, and see if that will scarce the hawk away. I am not able to buy a gun."

The crow comes and pulls up his corn. Pulling up corn has been the crow's trade since Adam was born. The crow goes out in the farmer's field to pluck up the corn, and you make it hard for the farmer to buy a gun to drive away the crow, to drive away the hawk, to have a little sport hunting game, and to protect his home in the night time from those who might desire to burglarize it or invade it.

As I said before, you tax the swaddling clothes of the infant; you tax the milk bottle in his hand; you tax his wearing apparel; you tax the window pane through which he beholds the sunlight for the first time; you tax his food and his raiment through life; you tax the winding sheet when he dies; you tax the coffin in which he is to be buried; and you tax the tombstone that stands over his dreamless dust after he is through with the tax gatherers of the Republican Party. There is no escape, from the cradle to the grave, from this band of tariff marauders to whom you have turned over the taxing power of the Republic.

Mr. President, I believe that is about all I care to say at this time. I hope those in charge of this bill on the other side will repent of their sins and take out these nefarious, obnoxious, and oppressive schedules, and let the people of America get out from this deadly time of depression under your party. Take the money supply of the country out of the control of Wall Street and permit it to serve the needs of the American people. It does not belong to Wall Street. Let it go to serve the purpose for which it was created. It is the lifeblood of business, intended to circulate in the body of business, to answer the business needs of every man in the country. Let that be done. Keep your tax fingers out of the pockets of the people, and let them have a chance to get out from under this debt which your deflation policy has unloaded upon them. It will take some of them five years to recover from it. Do not put any more burdens on them, Senators. Take the necessities of life out of this bill and give the masses of the people a chance to obtain the actual necessities of life.

Mr. KING. Mr. President, I return to a consideration of the provision under discussion. We are considering paragraph 365. In order that the extent of the tax imposed in this paragraph may fully appear, I beg the indulgence of the Senate while I read the paragraph:

PAR. 365. Double or single barreled breech-loading and repeating shotguns, rifles, and combination shotguns and rifles, valued at not more than $5 each, $1.50 each; valued at more than $5 and not more than $10 each, $4 each; valued at more than $10 and not more than $25 each, $6 each; valued at more than $25 each, $10 each; and in addition thereto, on all of the foregoing, 45 per cent ad valorem.

That is an advance of 10 per cent ad valorem over the House rate:

barrels for sporting breech-loading and repeating shotguns and rifles, further advanced in manufacture than rough bored only, $4 each; stocks for sporting breech-loading shotguns and rifles, wholly or partly manufactured, $5 each; and in addition thereto, on all of the foregoing, 50 per cent ad valorem.

The Senate committee has advanced the House rate from 40 per cent ad valorem to the rate which I have just stated, 50 per cent:

on all parts of such guns or rifles, and fittings for such stocks or barrels, finished or unfinished, 55 per cent ad valorem.

That is a tax of 10 per cent by the Senate committee above the rate fixed in the House bill.

Provided, That all sporting breech-loading shotguns and rifles imported without a lock or locks or other fittings shall be subject to a duty of $10 each and 55 per cent ad valorem.

The House rate was 40 per cent ad valorem, and the Senate increased it to 55 per cent ad valorem. In addition to the amendments which I have indicated the Senate committee has stricken out the word "sporting" in line 1 of the paragraph, so that it reads:

Double or single barreled breech-loading and repeating shotguns, rifles, and combination shotguns and rifles—

Instead of—

Double or single barreled sporting breech-loading and repeating shotguns—

And so forth.

In three other places in the paragraph the same amendment has been made, striking out the word "sporting."

My colleague [Mr. SMOOT] made a strong argument for a tariff upon the grade of guns of which he spoke, guns which were costly not because of intrinsic worth but because of the ornamentations and fine handwork and carving on stock and barrel. These guns, he argued, were used by princes and wealthy persons in Europe, and some Americans, for reasons which may be apparent, desired to use the same kind. These guns, of course, are within the category of luxuries, and should be taxed for revenue purposes, although so few are imported that the revenue is unimportant. One would suppose from the argument of my colleague that the paragraph was designed solely to obtain revenue arising from a product which was not used generally by the people. I repeat, an argument based upon that premise is logical and a tariff laid upon costly guns can be defended.

However, an analysis of the paragraph before us discloses that the purpose is to tax all guns, those which are cheap as well as those of moderate value and the few costly firearms which may be imported. The tax is general and inclusive. It reaches all classes of guns, and is thus a heavy tax upon the people who purchase any kind of a shotgun or rifle. The paragraph is not limited to the weapons to which my colleague referred. The language of the paragraph includes "all double or single barreled breech-loading and repeating shotguns, rifles, and combination shotguns and rifles." So that the argument of my colleague is without the facts and of but slight value as applied to the comprehensive language of the paragraph.

Mr. President, the Senator from Alabama [Mr. HEFLIN] called attention a moment ago to a portion of the statement made before the committee, found on pages 1984 to 1989, inclusive, of the hearings before the Committee on Finance upon schedule 3, metals and manufactures. Mr. Gebhard, who submitted the statement, makes this observation:

To our mind none of the above changes—

Referring to the paragraph under consideration—

should be made if it is the intention of Congress to protect the American people against the already overprotected half dozen or so manufacturers of firearms in this country and the very few hundred of laborers employed in said factories, who are also overprotected.

The present duty of 35 per cent under the Underwood law is more than ample to protect both manufacturer and laborer, as is shown by the fact that foreign-made guns and rifles are almost entirely off the American market to-day. And for this reason we think the duty of 35 per cent should be reduced if we are to have any competition at all. The few American manufacturers have the field to themselves to-day and require absolutely no further protection at the hands of Congress.

The manufacturers of firearms in this country are the best protected, most prosperous, and richest manufacturers of such goods in the world. Where has one ever failed? They rolled in wealth before the war, coined money during the war, and now they ask you to further protect them by putting up a tariff wall that will absolutely prevent a foreign-made gun coming into our country. They are far behind their orders, can not fill an order for 50 guns for delivery this coming hunting season, so we have been told by a leading manufacturer.

* * * * * * *

That the American firearms manufacturers have anything to fear from foreign competition is simply rot, for the whole trade in guns to-day in this country is in the hands of the American makers. I am speaking of shotguns and rifles. There have been some foreign-made pistols sold, but after you consider what these contemplated tariff changes will do to the foreign-made pistol you will see what a slim chance one of them has of getting into this country should you adopt these changes.

* * * * * * *

Under the present tariff a foreign-made gun invoiced at $50 is taxed 35 per cent duty, or $17.50.

Such a rate is indefensible and can only be regarded as a subsidy to the domestic manufacturers of the articles covered by this paragraph.

Under the existing tariff, which it is disclosed is unreasonably high, the power to exploit the people is apparent; and yet it is proposed to increase the rates and give to the American gunmakers a monopoly of the domestic market. They now successfully compete with all countries and sell in the markets of the world millions of dollars worth of their products annually.

Package charge, freight, etc., stands the importer, say, 5 per cent, or $2.50. Importer's profit, 10 per cent, is $7; war tax, 10 per cent more, $7.70; total cost to wholesaler, $84.70. Add to this the wholesaler's profit of 25 per cent and you have the wholesaler's price to the retailer of $105.77. The latter's profit of 25 per cent makes the consumer's price of $132.21.

Now, let us consider what happens to this same gun under the Fordney Act. The appraiser puts it in the same grade with Parker Bros. grade No. G. H. E., the wholesale price of which is $112.38. Add to this 35 per cent duty, also the extra $10 duty, and you have with the 5 per cent freight, package, etc., charge a total of $101.83. Then add the importer's profit of 10 per cent and also the war tax and you have a total of $123.21. To this add the wholesaler's profit of 25 per cent and we have the wholesaler's price to the retailer of $154.01. Add the latter's profit of 25 per cent and you have the consumer's price of $192.51, instead of $132.21, as per the figures under the present tariff. The comparison made above with the Parker grade No. G. H. E. is very conservative, for they used to sell this Parker grade for around $50 before the prices soared to the present absurd wholesale price of $112.38.

In other words, the gun which was formerly sold in all parts of the United States for approximately $50 is now sold by the wholesaler for $112.38, and yet it is proposed, in the face of this enormous increase in the domestic price, to further increase the tariff rates so as to enable the wholesaler and the manufacturer to increase the prices to the public who purchase their commodities.

On page 1987 the same witness states:

Our gun trade is mostly with farmers, their sons, and colored people. None of these can afford to buy guns at the prices asked to-day. The great majority of guns sold in this country is sold to the above class of trade. As a rule, they pay from $10 to $25 for a double-barrel hammerless shotgun. All of these priced guns are off the American market to-day.

Further on he states:

The farmer's son who craves the ownership of a cheap single-barrel gun from the time that he is able to tote a gun used to be able to buy these at $3.50. Now this same gun costs him around $12. We used to buy this same gun at $2.75. Now the wholesaler asks $9.65. The gun we used to sell the farmer for his own use at $22 we must get now $60. Parker Bros. Trojan grade gun was sold to the farmer at $25 and even less. Now we must get from the farmer $60 for the same gun, and when these reasonable prices ruled the manufacturers were not in business for their health.

Mr. WATSON of Georgia. Mr. President——

Mr. KING. I yield to the Senator from Georgia.

Mr. WATSON of Georgia. The New York Herald is well known as being owned by a gentleman who is in favor of tariff protection. The leading editorial this morning is under the headline "The Herald's Tariff Stand." The concluding paragraph reads as follows, in reference to the Fordney-McCumber tariff bill:

The New York Herald, reflecting the protective principles and convictions of its owner, is a consistent and steadfast advocate of the American tariff system, but the owner of the New York Herald can not stand for "damn fool" protectionism, and the New York Herald will not stand for it.

Mr. KING. If a Democrat were to so characterize this bill, he would be denounced by some of the "die hards" in the Republican Party. But this courageous paper properly appraises this bill and accurately denunciates it as a "damn fool" brand of protectionism.

Mr. President, I am glad to have the Senator put before the Senate the editorial referred to.

Returning to the statement of Mr. Gebhard:

On page 1987 he prints a table of comparative wholesale prices to the retail trade for double and single barrel shotguns. I shall not take the time to read the table, but I invite attention to one or two items found therein. For instance, Smith guns, field, were sold in 1915 for $21.35, in 1918 for $33.50, and in 1921 for $46.20. Manhattan hammerless, No. 2, were sold in 1915 for $13 and in 1921 for $35.97. My recollection is that in 1913–14, before the war, before the high prices in Europe reflected themselves here and reacted upon our domestic prices, the same gun and all of these guns to which I am referring were much cheaper than they were in 1915.

In 1915 the Stevens hammerless, No. 335, sold for $13.50; in 1921 it sold for $27.50.

The Knickerbocker hammerless, No. 6, in 1915 sold for $11; in 1921 it sold for $24.

The Riverside hammer, No. 215, in 1915 sold for $7.75; in 1921 it sold for $20—an advance of nearly 300 per cent.

The American Gun Co. hammer, No. 0, in 1915 sold for $8.25, and in 1921 sold for $19.75.

The Harrington & Richardson single-barrel gun, no ejector, in 1915 sold for $3.25, and in 1921 sold for $9.65; and so on down the list.

These figures demonstrate that the present prices are inordinately high and are an oppressive burden upon the people. But the bill is to maintain these prices and indeed to afford opportunity to the domestic producers to increase them. War-time prices are to be continued into peace periods, and are to be the basis of tariff legislation. It is designed to help domestic producers keep up high prices and to make enormous profits. They are unwilling to adjust their prices to pre-war conditions or to bring prices to lower levels. So we must increase the tariff to enable them to execute this impolitic, uneconomic, and oppressive policy. The public are unimportant—the trusts and big interests are the only objects of our solicitude. Thus does the Republican Party care for its own and prove its hostility to the American people.

It is barely possible that with the enormous prices which are now charged, even with a 35 per cent ad valorem duty, there might be a few guns imported into the United States; but the

purpose is to make it impossible to import any guns, and, therefore, give the domestic producers a complete monopoly.

I was interested yesterday in the statement which was made by the junior Senator from California [Mr. SHORTRIDGE] in appealing to the Republican Party and challenging their attention to what the "principles of protectionism" were, according to orthodox Republicanism. The junior Senator from California is an orthodox Republican—a high-tariff Republican—and his speech indicated that he would impose a tariff on any commodity produced in the United States, to the exclusion of any foreign article. If we could not possibly produce the commodity or the product in the United States, then he would favor a low tariff or, possibly, he would permit the placing of the article upon the free list; but if there were any possibility of producing the commodity in the United States, then a tariff should be laid—no matter how high its rate—in order to keep out any foreign competition. The theory of the difference in the cost of labor at home and abroad or the question of an "infant industry" has been entirely abandoned. The theory of a competitive tariff has also been discarded. We are now confronted with the bald, naked, ugly proposition that we are to give to the domestic manufacturer the absolute control of the domestic market; we are to embargo all imports if it is asked by the domestic producer. Indeed, Mr. President, a perusal of the testimony before the committee reveals the fact—a most astonishing fact—that on many items placed in these tariff schedules high duties are imposed, although no witness appeared before the committee and asked for an increase in rates. There must have been some secret understanding somewhere by which the rates should be increased, whether an increase was demanded or not. So we have in this bill not 4,000 items, as was stated by the distinguished Senator from Alabama [Mr. HEFLIN], but we have tens of thousands of items that are covered by the tariff schedules, and upon which the rates have been increased from 60 per cent to 800 per cent.

The chemical schedule alone embraces, perhaps, 10,000 items, and that is only one of the schedules of this bill. It may safely be said that there is no commodity that enters into the lives of the people or affects them in any manner that is not covered by some schedule in this tariff bill.

Mr. President, an examination of the information furnished by the Tariff Commission with respect to the items under consideration reveals the fact that the production of shotguns and rifles in 1914 amounted to millions of dollars, and the exports in 1918 were valued at nearly five times the entire domestic output in 1914.

Imports in general have decreased since 1902, at which time they reached a maximum. Since 1917 they have been as follows:

Doubled-barreled and combination shotguns and rifles in 1918, only 22; in 1919, 184; in 1920, 2,423; and for nine months of 1921, 1,021.

That is the fearful foreign competition that the manufacturers of these guns to which I have just referred are subjected.

I may say, in passing, that I am advised that some of these guns which were imported were bought as curiosities or bought merely because the Americans who buy overseas took a fancy to them. It may be accurately said that there have been practically no imports; yet in the face of that situation the proposition is to impose these extortionate rates.

Mr. President, if I had my way, I would put these articles upon the free list because no revenue is derived from them, and we are now exporting them and successfully competing with all foreign countries in the markets of the world. We have a foreign market; we produce more than the domestic need; and we must, if the business is to continue, drive for a foreign market. Therefore there is no purpose in having a duty on this commodity. This is not an infant industry; it does not need protection even if one believes in protection per se, so these articles should be placed upon the free list. At the proper time, Mr. President, I shall move that the Senate adhere to the rate in the present law of 35 per cent ad valorem.

Mr. MCCUMBER obtained the floor.

Mr. MCCUMBER. I will yield to the Senator if he desires to discuss the matter in question. I was going to discuss the particular point at issue, but I will yield to the Senator if he desires.

Mr. WILLIAMS. I can not promise to confine myself to that.

Mr. MCCUMBER. I do not ask the Senator to do so. I simply state that I will yield to him if he desires me to do so.

Mr. WILLIAMS. Very well; I thank the Senator.

Mr. President, I take it that no good man in this body wants to see, here or elsewhere, any continuance of present bad conditions wherever bad conditions exist. I take for granted that every man who loves his kind wants to see the world everywhere recover from the evils with which it is now afflicted.

The Senator from Utah [Mr. KING] just made an argument to prove something which, in my opinion, is a truism. Any tax upon commerce, whether upon shotguns, or anything else, necessarily decreases the volume of commerce; it must do it; just as an increase of freight rates will decrease the volume of freight. It may not decrease the existing volume of commerce or of freight, because the world may be getting into a better condition in spite of that and everything, but it will decrease it from the level at which it would have been if the tax had not been put upon commerce. That, I say, is a truism, and no one with common sense will deny it. The very object of the levying of a tariff tax is to decrease foreign commerce so that the American producer may, comparatively speaking, increase his sales, and the way to enable him to increase his sales is to increase the price of the foreign product up to the level of his price or above it, and generally above it.

Mr. President, long years ago, however, Commodore Vanderbilt—I believe it was—said that "A man was a fool who bets on the bear side of progress in America." I go further than that; the man is a fool who puts his money on the bear side in any country wherever the English-speaking race lives and works. Already, Mr. President, Great Britain is coming out of the slough. Nonemployment is decreasing; shipping is increasing; the production of coal is increasing; and Great Britain, Scotland, and Wales are all coming out of the slough. So America will come, for even a Republican tariff bill can not put an end to the recovery of prosperity, gradually and slowly, by the energies and the individuality, remarkable all through history, of this very remarkable race wherever it exists. It may, and indeed must, scotch the wheels of the car of progress a bit, but can not stop it. That prosperity reborn in peace and freedom has already been sounded in Canada, in Australia, and in Great Britain, as well as here.

But I rose for the purpose of preventing the Republican Party from playing in the future its usual game. I do not want the future to repeat past history. I remember when Mr. McKinley was running for the Presidency that after he was elected and after a tariff bill had been passed—14 months afterwards, I believe—a great many people said that prosperity had returned because of the tariff law. I remember that upon the stump many word spouters belonging to the Republican school of politics said that "wheat went up because McKinley was elected," and I remember, *as an actual statistical fact*, that McKinley was elected because wheat went up. Wheat went up in September and October and McKinley was elected in November. It was the increase in the price of wheat which put an end to the great Populist prairie fire out West and enabled McKinley to be elected. I do not want that repeated any more, and therefore I obtained the floor to read something from a Republican paper, and I am going to read it myself for fear the clerk might not read it as distinctly. The article which I have in mind is from the New York Tribune, the standpat Republican paper of this country, and when in the future you begin to say that the energies of the American people, their intellects, their inventiveness, and their courage were not the things that brought recurring prosperity, I want you to keep these facts, as accidentally stated truly by the Tribune, in mind. Mr. President, if the English-speaking race here and in Great Britain and in her colonies be given peace long enough, they will attend to the balance of the game of recovering comparative prosperity, as they always have done—after the Revolution here, after the Civil War here, after the Napoleonic wars in Europe. They always have done it and always will, because God made them that way. But I do not want the second lie in the regular program of Republican politics repeated later on if I can help it; and I want to put in the RECORD now the proof of the fact that this prosperity which after a while you may claim to have come from some sort of legislation, even tariff legislation, the least promising of all forms of legislation, has already had its start, and I want to warn every "prophet of evil," every calamity howler, that old Vanderbilt was right when he said, "A man is a fool who bets on the bear side of progress in America." The bull side is always safe, providing two things happen—that you leave the people free enough and that you give them peace long enough. That is all that is necessary.

Here is what the New York Tribune says:

Signs of a revival of business and a return to normal activities are multiplying in the news.

Not in politics and in speeches in the Senate, but in business.

Yesterday's papers contain striking evidence of a change for the better in many fields. The United States Employment Service reported that there had been a further gain in employment in May—

There was a gain in April; there was a gain before that—

and that within 30 to 60 days unemployment will again be normal, excluding the present anomalous "vacation" experiment in the coal industry.

That is, this coal strike.

The director of the service says: "The broadening out of industry in nearly all lines of activity for May clearly emphasizes the fact that the business depression is behind us. Confidence is restored. June will accentuate the upward movement. Industry is steadily expanding."

Dispatches from Pittsburgh announce that 6,000,000 gross tons of steel ingots were produced in April and May, against about 4,900,000 tons in February and March.

That is an increase in production of 50 per cent.

This is to say, the mills turned out 23 per cent more steel in the first two months of the coal strike than they did in the two months preceding the strike.

Building operations in Chicago have widened out.

They have in Washington, too. They have in the towns in Mississippi. They have everywhere, though the writer does not say so here.

Building operations in Chicago have widened out. The permits issued during May call for an expenditure of $27,000,000, a gain of $10,000,000 over April. Steel mills in the Chicago territory are now operating at 85 per cent of capacity.

That is pretty nearly normal. Steel mills generally, even in very prosperous times, do not operate to theoretically full capacity. They have various accidents and things that pull down production from the maximum.

Mail order houses had an increase of 13.2 per cent in business in May, the first substantial gain in nearly two years.

Oil shares have advanced $1,000,000,000 in value since January 1. The railroads are at last earning nearly the return guaranteed them under the transportation act. The Liberty bond issues all passed par recently. The general bond market has been splurging for several months. There can be no question that the tide has turned for good and that prosperity is lurking around the corner.

That is not only the case here, but that is the case in Canada and Australia and New Zealand, and to a lesser extent it is the case in Great Britain.

I wanted, as "a chiel takin' notes," a "looker-on in Vienna," to put in the RECORD this article from the chief and most partisan and perhaps least scrupulous Republican paper in the United States, so as to fend off the second political lie before it becomes necessary for the opposition to utter it. They will find it necessary, after a while, as a part of the usual Federalist and Republican game.

Mr. McCUMBER. Mr. President, the war in Europe left about 10,000,000 men dead upon the field and in hospitals. It left 10,000,000 men who had been armed. It left, however, their arms. It left about 30,000,000 more in arms in Europe. Those guns are there. I do not think they have very much use for them. I have no doubt but that they would like to sell them to the people of the United States at very greatly reduced rates.

By the time we got through with war prices and the prices of 1919 and 1920 the American pocketbook was empty. There was no demand for firearms, no demand in this country for any kind of sporting goods to any extent. They could not have been sold, probably, in this country at this time for much of anything; and I assume that the Committee on Ways and Means of the House were cautious, perhaps from the standpoint of the other side were overly cautious, in protecting the American public against possible importations of an immense amount of rifles, and so forth, from Europe.

I am not going to say for a single moment that these duties imposed by the Ways and Means Committee of the House are not high. I am willing to say that they are excessively high duties, and under ordinary conditions I certainly would be willing to admit that they would be wholly unnecessary. I can not say that I would admit that they will not be necessary when this revival of business of which the Senator from Mississippi has just spoken shall have overtaken the American public, and they will again have money to spend.

There are two kinds of guns coming into the United States or that have been coming in. One is a rather cheap article, almost worthless, that it would really be better to keep out than to bring in. Another is a very expensive gun. Now, I think the good American hunter who is a sportsman rather than a sport can buy a good enough gun for ordinary hunting purposes for from $20 to $30. That is a good American gun, good enough for anyone, and under ordinary conditions there is a good demand for that kind of a gun, and that is about the price of the gun that the American ordinarily buys.

There are imported into this country—and my information is that they constitute the greater part of the value of the guns that are imported—guns which are sold for from $500 to $800 each. Now, when we come to the sport who goes down to Florida in the fall and spends a month or two hunting, who wants to hunt with an $800 gun, I am perfectly willing to exact from him a good, round price for the privilege of importing that gun, and I am shedding no tears whatever for his sake. The man who wants to buy a good American $20 to $30 gun can buy it to-day, and it is good enough for anyone. The gun that is absolutely useless for any purpose, outside, possibly, of gopher shooting, may be taxed a little high under the provisions of this bill. I hardly think it is worth bringing into the country, however.

Mr. President, we can theorize all we want to about this matter, but the fact still confronts us that while very few of these guns have been shipped in, because, being a luxury, we are buying very little of those products at this time, nevertheless they do come in. The report, which I admit runs back as far as August, 1921, shows that one class of guns that are introduced here, and that come from Sweden rather than from France, would require an ad valorem duty of 140 per cent to equalize them with the comparable American article. The next class, which is called a sporting gun, would require 232 per cent ad valorem duty to bring its price up to the selling price of the comparable American article. The next, which is of the same character, would require 45 per cent. So we have two out of these three classes which would require a very much greater percentage than the duty imposed under this bill, and we have one class which would require less.

While I admit that the duty appears to be rather high upon those low-priced guns, I submit that they are the class we do not want, and none of our American people buy them in any great quantities. The excessively high-priced gun will be purchased by the man who can afford to pay from five to eight hundred dollars for a sporting rifle, no matter what its cost is; and I submit that there is some danger, at least, from the immense quantity of rifles and guns that were used in the Great War in Europe, that might come over with a very low tariff, or even with a medium tariff.

Mr. SIMMONS. Do I understand the Senator from North Dakota to contend that the guns described in this paragraph are the same character of guns used by the military forces in the late war?

Mr. McCUMBER. It would cover all kinds of rifles and breechloaders of a certain value, whatever that value is.

Mr. SIMMONS. I understood the Senator to make the point that there are enormous quantities of guns left over from the war. I assumed the Senator meant such as were used by the military forces.

Mr. McCUMBER. I said they could come in under this provision, single or double barrel shotguns, or breech-loading rifles. Of course all the rifles are breech loading.

Mr. SIMMONS. I hardly think, under the characterization "Double or single barreled breech-loading and repeating shotguns," the guns used by the military forces could come in.

Mr. McCUMBER. "Rifles" is the next item.

Mr. SIMMONS. "Rifles, and combination shotguns."

Mr. McCUMBER. The word "rifles" is set aside by a comma on each side. "Rifles" is an entirely different article from "shotguns." But, of course, this refers to double or single barreled rifles of a breech-loading character.

Mr. SIMMONS. Doubtless the forces used rifles, but they did not use these other kinds of firearms. Would the Senator, for the purpose of excluding the rifles which have accumulated in large numbers in foreign countries as wastage of the war, think it quite right to impose these duties upon these other firearms, which have not been amassed in such quantities abroad as a result of the war?

Mr. McCUMBER. I do not know where we would draw the line between the different kinds of firearms. We have put them in two classes here, and I think that is a sufficient designation.

Mr. SIMMONS. In all fairness I think if the Senator is really leveling these duties at the rifles which were left over by the soldiers at the close of the war, he ought to make a separate paragraph to reach that situation.

Mr. McCUMBER. I am inclined to think that the differentiation by values is the better method of differentiating them.

Mr. SIMMONS. There might be a necessity, or a justification, so to speak, for these duties as to that character of firearms, because there may be, as the Senator says, a vast accumulation in Europe which might possibly be sent here, and very seriously interfere with the sale of the domestic rifle; but because of the necessity for these high duties to keep out that enormous accumulation that is now seeking a market throughout the world, and is likely to come over here in great quantities, why place these high duties upon other guns, unless there is some other reason than the one assigned by the Senator for imposing the duty?

Mr. ASHURST. Does the Senator wish to dispose of this item now?

Mr. McCUMBER. Yes; I would like to have it disposed of now.

Mr. ASHURST. I wish to address the Senate after this item is disposed of.

Mr. KING. I think we ought to have a yea-and-nay vote on this item in the bill.

The PRESIDING OFFICER (Mr. KELLOGG in the chair). The question is on agreeing to the committee amendment on line 23.

The amendment was agreed to.

Mr. KING. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state his inquiry.

Mr. KING. I would like to address the inquiry to the Senator from North Dakota. We would like to have a yea-and-nay vote upon the rate. I am not very particular whether we take it now on striking out the word "sporting," in the first item, or later, on the 45 per cent rate.

Mr. McCUMBER. The Senator has no objection to striking out the word "sporting" where it appears on line 23?

Mr. KING. We object; but the Senator may take a vote on that, and then we would like a yea-and-nay vote on the rate.

Mr. McCUMBER. To which rate does the Senator refer?

Mr. KING. I refer to the rate on line 22, page 78.

The PRESIDING OFFICER. That has been agreed to as it stands.

Mr. KING. May I inquire whether the second rate, found on page 79, has been agreed to?

Mr. McCUMBER. It has not.

Mr. KING. When we reach that, we will ask for a yea-and-nay vote.

Mr. ASHURST. I wish to address the Senate for about 10 or 15 minutes, but I will yield until this item is disposed of.

Mr. McCUMBER. I will be much obliged to the Senator if he will let us dispose of that.

Mr. ASHURST. I am glad to yield.

The PRESIDING OFFICER. The Secretary will state the next amendment.

The ASSISTANT SECRETARY. On page 78, line 23, the committee proposes to insert the words "and repeating" at the end of the line, so as to read:

Barrels for breech-loading and repeating shotguns and rifles.

The amendment was agreed to.

The next amendment was, on page, 78, line 25, before the word "breech-loading," to strike out the word "sporting."

The amendment was agreed to.

The next amendment was, on page 79, line 2, to strike out "40" and insert in lieu thereof "50," so as to read:

And in addition thereto, on all of the foregoing, 50 per cent ad valorem.

Mr. KING. There will be some debate on this amendment.

The PRESIDING OFFICER. The Senator from Arizona is entitled to the floor.

FEDERAL COOPERATIVE RECLAMATION.

Mr. ASHURST. Mr. President, on the 24th day of May last I submitted some observations urging the passage during this present session of Congress of the McNary-Smith reclamation bill. I pointed out that the bill had been reported favorably by the senior Senator from Oregon [Mr. McNARY], the chairman of the Committee on Irrigation and Reclamation. I will read the last two paragraphs of his report, submitted to the Senate on March 8 last:

The North and East should welcome the opportunity to assist in the upbuilding of the West and South, especially when they would add to their own prosperity thereby.

That paragraph will be the diamond pivot upon which my remarks will revolve during the few minutes that I claim the floor to-day, so I will repeat it:

The North and East should welcome the opportunity to assist in the upbuilding of the West and South, especially when they would add to their own prosperity thereby.

The principle embodied in this measure has the indorsement of the last Republican and Democratic National Conventions, the unqualified support of Secretary Fall, and the strong recommendation of President Harding.

During the course of my speech on May 24 the junior Senator from Wisconsin [Mr. LENROOT] gave me his attention, and as I was descanting upon the necessity for the passage of that bill during the present session that Senator, who illuminates every subject he discusses, asked me a question, as follows:

Mr. LENROOT. Mr. President, will the Senator yield?

Mr. ASHURST. I yield with pleasure.

Mr. LENROOT. I should like to ask the Senator whether he believes the country needs an increased production of agricultural products to-day?

Mr. President, for a time I feared that the Senator might have had some objection to the bill, and an objection from him or an argument from him, would cause me concern, because he has established a reputation on this floor as a powerful debater. But I am consoled by the belief that when that Senator and other Senators analyze and reflect upon some data I am going to submit this afternoon they will perceive that the penultimate paragraph of the report submitted by the Senator from Oregon [Mr. McNARY] answers every argument that could by a most remote excursion of the imagination be brought against the McNary-Smith bill.

The passage of that reclamation bill and its enactment into law will bring a prosperity to the manufacturing interests of this country which no tariff bill could bring. I hope the Senator from Wisconsin [Mr. LENROOT] will return to the Chamber as soon as possible, because we need his presence; we need his support of this bill, and it must not happen that so able a statesman as the Senator from Wisconsin shall oppose this statesmanlike bill.

Consider the Salt River or Roosevelt project in Arizona. The Salt River project, according to the figures furnished me up to June 30, 1921, has cost $14,738,628, of which $4,800,000—round numbers—have been repaid to the Government. Last year there were shipped from other States of the Union—not merely into Arizona but into the region or valley of the Salt River project—7,935 loaded freight cars of goods, wares, and merchandise. I am not speaking of carloads of goods which went to other portions of the State, nor am I speaking of less than carload lots; but I repeat, that during the year 1920 there were shipped into the Salt River project in Arizona 7,935 carloads, and from the State of Wisconsin alone, so well represented in this Chamber by her two eminent Senators, there were shipped into the Salt River project 213 carloads of goods, wares, and merchandise, to be used and paid for by the people residing in the Salt River Valley.

I do not have at hand the figures showing the number of carloads of goods, wares, and merchandise which came from Wisconsin to the other project in Arizona and to other points in Arizona. But let it be remembered that in 1920 the State of Wisconsin furnished to the Salt River project alone 213 carloads of trade.

There are 30 irrigation projects in the United States at this time. The projects are the Salt River, Yuma, Orland, Grand Valley, Uncompahgre, Boise, King Hill, Minidoka, Garden City, Huntley, Milk River, St. Mary's storage, Sun River, Lower Yellowstone, North Platte, Newlands, Carlsbad, Hondo, Rio Grande, North Dakota pumping, Lawton, Umatilla, Deschutes, Klamath, Belle Fourche, Strawberry Valley, Okanogan, Yakima, Shoshone, Riverton, and various secondary projects. I leave it to the fertile faculties of Senators to estimate the number of carloads of merchandise of various kinds that the State of Wisconsin undoubtedly furnished in 1920 to each of these projects.

The State of Minnesota, so well represented here, furnished in 1920 to the Salt River project 40 carloads of goods, and I am speaking only of carload lots. I do not speak of shipments of less than carload lots, nor do I speak of shipments even of carload lots to other points than to the Salt River project.

When I refer to the Salt River project, I mean, for the purposes of this address, the Salt River Valley, in which the city of Phoenix is situated, and about 250,000 acres are irrigated in that valley.

The State of Ohio in 1920 furnished 225 carloads of merchandise of various kinds to be used by the people who reside in the Salt River Valley. I repeat, for the third time, I am not speaking of less-than-carload lots and that I am not in this address referring to merchandise in carload lots or otherwise shipped to other points in the State. I am speaking simply, solely, and only of carload lots going into the Salt River Valley, where the Salt River project is located.

The State of North Dakota, not a manufacturing State, purely an agricultural State, so well represented here, furnished one carload of products from within her borders to the people of the Salt River Valley. The State of Illinois in 1920 furnished 457 carload lots of merchandise to be used and paid for by the people residing within the Salt River project. Maine, where the sunlight first salutes the American flag upon the American coast, furnished 3 carload lots of merchandise in 1920 shipped into the Salt River project. California, out by the gates of sunset, furnished in 1920 to the citizens of the Salt River Valley 2,897 carloads of goods, wares, and merchandise, and no doubt some of these shipments came from the Atlantic coast into California via the Panama Canal, and were thence transshipped into the Salt River project.

Missouri, that politically storm-tossed State, during the same year furnished the Salt River project with 218 carloads of mer-

chandise; Oregon, 502 carloads in 1920; and Texas sent to the Salt River project 981 carloads; whilst the saddle bags of the Arkansas Traveler brought to the Salt River project in the same year 26 carloads of fine wares and merchandise; West Virginia furnished 18 carloads; Massachusetts, 12; and New York, 67 carloads.

It would require a bold flight of the imagination to stand here and estimate the number of carloads of merchandise that were shipped into each and every one of the irrigation projects, 30 in number. They would reach scores of thousands. So I repeat that the senior Senator from Oregon [Mr. MCNARY] wrote well when he wrote the penultimate paragraph of his great report on the McNary-Smith bill, wherein he said:

> The North and East should welcome the opportunity to assist in the upbuilding of the West and South, especially when they would add to their own prosperity thereby—

He must have had in mind in writing his report that the various States of the Union would—if Federal reclamation were further expanded—soon be shipping enormously increased numbers of carloads of steel, iron, rubber, cotton goods, woolen goods, leather goods, furniture, carpets, stoves, automobiles, tractors, sewer pipe, wagons, and so forth, into the West.

Now, to gratify curiosity and to ascertain what were some of the products shipped into the Salt River project in 1920, I will select the State of Wisconsin, because I happen to have that data at hand. As I said before, the State of Wisconsin shipped 213 carloads to the Salt River project in 1920. Agricultural implements, 4 carload lots; auto parts, 41; auto bodies, 2; trailers, 1; butter, 1; canned goods, 7; cheese, 8; chairs, 3; furniture, 18; hardware and stoves, 1; household goods, 1; lumber, 1; machinery, 12; paper bags, 2; paper, 7; powder, 1; refrigerators, 2; rubber hose, 1; tractors, 27; and the other articles making in all 213 carloads.

Mr. President, I ask unanimous consent that I may include in the RECORD as an appendix to my remarks a table showing the number of carload lots shipped from various States into the Salt River project in 1920?

The PRESIDING OFFICER. Without objection, it is so ordered.

(See Appendix A.)

Mr. ASHURST. Mr. President, there is generally in view the West only when we speak of reclamation, but this policy has been enlarged; it is no longer the irrigation and reclamation of arid lands. Federal agencies of reclamation will no longer be employed only in reclaiming arid lands, but they will also be employed in reclaiming any and all lands. If in the South, lands are overflowed with water, the arm of the Government will be eligible under the McNary-Smith bill to remove the water and reclaim the land. If it be the stump lands of the North or the Northwest, this reclamation law will afford the eligible means to reclaim those lands. It may no longer be called a western policy. It is national in its scope.

The record of achievement of the United States Reclamation Service enriches the annals of the American people. Irrigation projects charm us with their wizardry the while they pour the life-giving waters out upon the thirsty soils and transform deserts into orchards and green fields. When you think of the Federal reclamation policy, the lamp of Aladdin and the purse of Fortunatus become prosaic and commonplace in comparison, and the wildest hyperbole would not be adequate to describe the wealth, the advancement, the prosperity, and public order that would come not only to the West and to the South but to the East and the North as well if the McNary-Smith reclamation bill were enacted into law.

During the past 19 years, or since Federal irrigation began, 3,000,000 acres of theretofore practically worthless desert land have been made productive by Government irrigation. The value of the crops produced thereon now amounts to $90,000,000 annually. The increase in value of the irrigated acreage amounts to $600,000,000, and since the Government began the delivery of irrigation water the crops produced on the reclaimed lands to-day aggregate $400,000,000 in value. Nor does this sum of $400,000,000 include the value or expansion of production of live stock or stock products; in other words, the figures ($400,000,000) as to the aggregate crop value are limited to vegetable, fruit, and grain values at the farm, for which Government reclamation furnishes the sole supply of water. All the moneys disbursed by the Government to the various irrigation projects will ultimately be repaid.

At the outset let it be remembered that the full importance of national irrigation can not be measured in dollars, for it has an intangible value not to be estimated in tonnage tables nor transportation rates. In building new Commonwealths in the arid lands of the West the Government is utilizing undeveloped resources and creating opportunities for its citizens. One of the primary purposes of the reclamation law was to create homes, and this purpose has been richly fulfilled. Viewed from this standpoint alone, national reclamation has amply justified all for which its advocates hoped.

Since 1902 the Reclamation Service has constructed the irrigation systems to supply abundant water to 2,000,000 acres of land, and the capacious storage reservoirs of the Government are furnishing a supplemental supply of stored water to a million additional acres in other projects, or a grand total of 3,000,000 acres. On these irrigated lands are now profitably employed and satisfactorily housed approximately 500,000 persons.

On the Government project lands are 50,000 families in independent homes. The population in cities, towns, and villages in these Government projects has been increased by an equal number of families. The arguments for increasing and making permanent the Nation's virility, prosperity, and growth by creating more homes of this kind were never more forcible and unanswerable than at this juncture.

The American people can not claim to have measured up fully to their opportunity and responsibility until the deserts of the West and the unused agricultural lands of the Nation have been replaced by prosperous farmsteads.

When measured by the yardstick of the financier—the dollar—the results of the Reclamation Service activities are enormously great.

As a creator of wealth, its service to the Nation and the State has been as great as in its principal task of home making. Out of the uninhabited and almost worthless desert, reclamation has carved an empire of nearly 3,000,000 acres, intensively cultivated and producing crops whose annual average gross returns per acre about double those per acre for the balance of the country.

Mr. President, I ask unanimous consent to insert in the RECORD, as appendices to my remarks, a letter addressed to me by the Acting Director of the Reclamation Service, Mr. Morris Bien, setting out the total gross investment of the United States in irrigation and reclamation projects, and the total amount of reimbursement and credits that the various projects have paid in, and the total net investment of the United States in irrigation projects.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See Appendices B and C.)

Mr. ASHURST. This money is being repaid to the Government, and under the McNary-Smith bill it will all be repaid to the Government. This is not a subsidy. Senators and others may clamor for ship subsidies, if you please, but those interested in reclamation and irrigation are not asking subsidies. They are merely asking that the Government, with its efficient arm, shall construct these projects, and that the money expended in their construction shall be repaid to the Treasury of the United States.

I ask unanimous consent to include in the RECORD as a further appendix to my remarks a copy of the report of the Committee on Irrigation and Reclamation on the McNary-Smith bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ASHURST. I observe that my esteemed friend, the senior Senator from Michigan [Mr. TOWNSEND], gives me his attention. May I say to the Senator that the great State of Michigan furnished 377 carloads of goods, wares, and merchandise to the Salt River project of Arizona in 1920?

If Congress desires to start the spindles, looms, and wheels of industry, to light the fires in the furnaces, to fill the empty cars now in congested terminals, to give employment to worthy workmen, and to cease puzzling its brain over foreign trade, let Congress pass the McNary-Smith bill.

Mr. President, in conclusion, I ask unanimous consent that there may be included in the RECORD as a part of my remarks a chart which I have here from the Department of the Interior. The figures in circles represent the number of carload lots shipped from the various States to the Salt River Valley project for the year 1920. It graphically sets forth before Senators and before the country what each State furnishes to this project alone. [A pause.]

My friend from Utah [Mr. SMOOT], whom I greatly esteem, tells me, however, that there may be some doubt as to whether the chart may properly, under the rules, go into the RECORD. I believe that since it apparently comes from the Department of the Interior—it is so marked—it will not, therefore, require the action of both Houses. So I ask that it be included as an appendix to my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(The charts referred to appear on pages 8318 and 8319.)

APPENDIX A.

Carload traffic over Southern Pacific and Atchison, Topeka & Santa Fe Railroads, between points in Salt River Valley and points in the United States, segregated as to commodities and States of origin, for the year 1920, as shown by the books of said companies.

DEPARTMENT OF THE INTERIOR
ALBERT B. FALL, SECRETARY
GENERAL LAND OFFICE
WILLIAM SPEER, COMMISSIONER

APPENDIX B.

DEPARTMENT OF THE INTERIOR,
UNITED STATES RECLAMATION SERVICE,
Washington, D. C., August 6, 1921.

Hon. HENRY F. ASHURST,
United States Senate.

MY DEAR SENATOR: In the absence of Director Davis we duly received your letter of July 20, 1921, to him, requesting a revision of figures sent to you in 1919, showing the net investments in several Government reclamation projects.

When your letter arrived we were, for other purposes, compiling such data to the end of the last fiscal year, and as that is a convenient period to use, it seemed best to withhold reply until these figures were available.

I am now sending them herewith in a tabulation similar to the one returned with your letter.

You may recall that these figures were made up in this way originally by specific request from your office by telephone. They are not in the form that we would select for ordinary purposes of publication because there is danger that they will mislead.

In other words, the inclosed figures are bookkeeping data and involve considerable duplication that swell the totals and make these misleading unless there is given and read with them considerable explanation. For example, we are constantly transferring from one project to another machinery, equipment, and materials in order to work the greatest economy and efficiency in utilizing these.

To keep the books showing the investments in any particular project, it is necessary to include an agreed value for such things transferred from and to the project. Thus, the total investment for each project includes "transfers received" of such things, and the column "Reimbursements and credits" includes "transfers issued." On any particular project these two entries necessarily differ, and hence must be included to bring out the net investment for that project, whereas for all projects these items merely balance one another and swell the totals, aggregating upward of $8,600,000.

The figures given for total investments include cash disbursements from the reclamation fund, appropriations for "increase of compensation," and other special appropriations, such as that of a million dollars toward the cost of Elephant Butte Dam under the act of March 4, 1907; others for judgments of the Court of Claims, the funds for the Yuma auxiliary project, etc.

At the bottom of the table you will notice a number of other items added to bring the figures into agreement with our book totals. The "secondary projects" include a great number of possibilities that have been surveyed or examined from time to time in addition to the projects actually undertaken. For example, in Arizona this includes the San Carlos, San Pedro, Sentinel, and other propositions that will occur to you.

The item of "general expense" includes headquarters offices at Washington and Denver for administration, engineering design, and other purposes, legal services, and many other items that can not readily be allocated to particular projects except in bulk from time to time on the basis of expenditures or similar criteria. This item of general expense is the largest one included under the head of transfers already mentioned.

The item entitled "Indian projects" represents expenditures from the reclamation fund reimbursed by the Indian Bureau.

If you intend to publish these figures and want to avoid the possibility of misleading suggested above, you may want to use merely the figures of "net investment." In most cases we find that figures of cost rather than investment answer the questions in the minds of inquirers, and if you wish figures on a cost basis, or if we can otherwise be of further service in this connection, we shall be glad to do so.

Very truly yours,

MORRIS BIEN, *Acting Director.*

APPENDIX C.

Reclamation projects investment to June 30, 1921.

APPENDIX D.

(Senate Report No. 542, Sixty-seventh Congress, second session.)

FEDERAL COOPERATIVE RECLAMATION ACT.

Mr. MCNARY, from the Committee on Irrigation and Reclamation, submitted the following report, to accompany S. 3254:

The Committee on Irrigation and Reclamation beg leave to report an original bill (S. 3254) to encourage the development of the agricultural resources of the United States through Federal and State cooperation, giving preference in the matter of employment and the establishment of rural homes to those who have served with the military and naval forces of the United States, with the recommendation that the bill be passed without amendment.

This is a measure to provide for the reclamation of dry, swamp, and overflowed lands, which when reclaimed will be used for agricultural purposes. Under the provisions of the bill the Secretary of the Interior is authorized to build, for reclamation districts, reclamation works. He can only contract with a district organized under the laws of a State, and the district must have authority to enter into a contract with the Government and the right to issue bonds with which to pay for the reclamation work. The bonds must be a general charge upon all the land within a district. All reclamation projects must be initiated by parties interested in the land to be reclaimed. The district must advance one half of the money for the investigation of a project, the other half to be advanced by the Government.

When the Secretary investigates a project and finds it feasible, he may contract with the district to build the project works, upon condition that the district issue and deposit with the Federal Farm Loan Board district bonds in an amount equal to the estimated cost of the reclamation works, the bonds to bear a rate of interest not exceeding 5 per cent per annum and be payable within a period not exceeding 40 years. The Federal Farm Loan Board is to hold the district bonds deposited with it until the completion of a project and its successful operation, and when the property within the district has twice the value of the bonds, the board may sell the bonds at private or public sale at not less than par, the proceeds of the sale to be credited upon the contract between the district and the Government.

The money arising from the sale of bonds is covered into a reclamation fund to be appropriated in the construction of other irrigation projects. That the Secretary may have funds with which to carry on reclamation work, the bill authorizes an aggregate appropriation of $350,000,000, which is to be appropriated by Congress upon estimates made by the Secretary as he may need money for reclamation purposes. The $350,000,000 and its turnover through the sale of district bonds will constitute a revolving fund, to remain such at the will of Congress.

The contract between a district and the Government must establish the amount of reclaimed land which may be owned or acquired by a party. The amount so fixed is denominated the farm unit. The unit is the amount of land which will support a family. It will vary from 20 acres in orchard sections and lands to be devoted to intensive farming, and not to exceed 160 acres where general farming is practiced. All parties within a district owning land in excess of the farm unit must place their excess holdings under the authority of the Secretary of the Interior, to be disposed of at prices and on terms and conditions to be fixed in the contract between the district and the Government. Unless 80 per cent of all excess lands within a district are placed at the disposal of the Secretary, he can not contract with the district.

All ex-service men, for a period of 60 days after the opening to sale or entry, are to have a preference right to acquire all excess and public land within a district, and they are also to be given preference right of employment on all reclamation works to be constructed under this measure.

This bill provides that the act of June 17, 1902, commonly known as the reclamation law, and all amendatory or supplementary acts shall hereafter be known as the national irrigation law, and the fund provided in said law shall hereafter be known as the national irrigation fund, and the act under consideration and all amendatory or supplementary acts shall be known as the national reclamation law, and for the purpose of carrying out its provisions, there is established in the Treasury a fund to be known as the national reclamation fund.

This bill, while not disturbing the old reclamation fund or its use, creates an additional fund to be used in a broader field. While the old reclamation law provides for the reclamation of arid and semi-arid lands, the present law contemplates the reclamation of arid, swamp, and overflowed land by means of irrigation, drainage, and dikeage.

There is nothing novel in the provisions of the bill under consideration. Laws for the establishment of drainage districts are common to almost every State in the Union, and laws for the establishment of irrigation districts are common in the arid and semiarid States of

the West. The development of the drainage district law is traceable largely to the States of Ohio, Indiana, Michigan, Wisconsin, and Minnesota, while the irrigation district laws of the far West are, to a great extent, a mere adaptation of the principles of the drainage laws to irrigation problems. As all these laws have proven beneficial, they have been sympathetically interpreted and upheld by the courts. A drainage or irrigation district is, as a rule, treated as a municipal corporation with limited powers, the right of taxation and assessment not reaching beyond raising money with which to meet indebtedness, operation, and maintenance.

What has been accomplished under the old reclamation law justifies the Government in advancing one step further in the reclamation of the waste lands of our country. Under the present reclamation law, there is a net investment in construction work, placed by the Reclamation Service at $130,000,000. As a result, directly traceable to this investment, is property having a total value upward of $500,000,000; the crops raised on purely Federal reclamation projects exceed the gross value of $400,000,000, to which should be added crops raised on more than a million acres to which the Government has rented water from its reservoirs. Within Federal reclamation projects there are 223 towns, 32,835 irrigated farms, with a total population of 450,000. Within these projects there are 879 schools, 649 churches, and 247 banks, the banks having a total capital stock of $14,732,633, deposits of $143,539,856, and 283,976 depositors.

Irrigated lands, as a rule, produce twice as much as lands in the humid districts, which, under ordinary circumstances, results in great prosperity of irrigationists. At the present time, owing to the severe drop in prices of farm products, high transportation rates, and the remoteness of the irrigated districts from the markets, there has been brought about an accentuated condition which can not long exist.

Over 30 years ago the Federal Government commenced the investigation and survey of the swamp lands in the different sections of the country, and in many instances have developed plans for their reclamation so that a large amount of available data is on hand for future use.

It is generally recognized that the money arising from the sale of public lands and from royalties upon coal, oil, and other minerals taken from the public domain, percentages of which are covered into the reclamation fund, will not be sufficient to even complete, within a reasonable length of time, irrigation projects in the West already begun by the Federal Government.

The Secretary of the Interior, in his late report, has called attention to the vast wealth of the West and Alaska, reserved by the Federal Government for the benefit of the people of the United States. He fixes this wealth at $150,000,000,000. In some of the Western States it exceeds by several times the assessed valuation of lands in private ownership. This vast wealth held in Federal reserve escapes all taxation for State, county, township, town, school district, or other municipal purposes. Its withdrawal actually hinders local improvements.

On August 31, 1920, President Warren G. Harding, then a candidate for the Presidency, speaking to a delegation of governors of Western States, while discussing the subject of reclamation, said in part:

"Our vision, then, of the ultimate development of the mountain empire reveals a great region, developed uniformly with regard to all its variegated possibilities. I have never been able to think of 'reclamation' as connoting merely the construction of ditches and dams and reservoirs to put water on dry lands. In my view this has been only a phase—though a most important phase—of reclamation. I have believed that our mountain West is one day to be one of the richest and most completely self-contained economic areas in the world. My vision of the future pictures it as a wonderland whose streams are harnessed to great electrical units, from which flows the power to drive railway trains, to operate industries, to carry on the public utilities of cities, to smelt the metals, and to energize the activities of a teeming population."

Near the conclusion of the address Mr. Harding said:

"We must make our mountain West a country of homes for people who need homes. It has everything that they will need. It can provide them with food, with the materials for industry, with lumber from its forests, with metals and minerals from its mines, with power from its streams, and waters for the irrigation of its land. And the work must be so done that it will inure most to the advantage of society and the development of the independent, self-sustaining family unit in our citizenship. There must be proper cooperation and direction in this development, but there must be all care to prevent monopolization of resources and opportunities.

"It has been intimated by some who take, I feel, the narrow view that the industry of the East and the agriculture of the Middle West and South will not view favorably the proposal to develop new industry and new agriculture in the mountain country to compete with them. I confess to very little sympathy with this attitude. The sons of New York and New England built the great States of the Ohio Valley, and the sons of the Ohio Valley reared the splendid Commonwealths beyond the Mississippi. The sons of every generation in our country have been the pioneers of some new land."

The President, in his message to Congress December 6, 1921, strongly recommended reclamation, not only by irrigation but by drainage and other means, and he called particular attention to the vast area of waste land to be reclaimed, and the desirability of reclamation that the population might be increased, and he aptly stated:

"Home making is one of the greater benefits which government can bestow. Measures are pending embodying this sound policy to which we may well adhere. It is easily possible to make available permanent homes, which will provide, in turn, for prosperous American families without injurious competition with established activities, or imposition of wealth already acquired."

It is fit to recall the splendid vision Theodore Roosevelt had of the vast possibilities of the West. In a chapter of his autobiography devoted to national resources of the Nation he said: "The first work I took up when I became President was the work of reclamation." It was his judgment that reclamation, conservation, and proper utilization were all involved in one great plan for the development of our western country. In the same work President Roosevelt declares: "It is better for the Government to help a poor man to make a living for his family than to help a rich man to make more profit for his company." Commenting upon this declaration, President Harding said in his speech heretofore adverted to: "The principle is particularly sound to-day. We have need to make these areas the seat of millions of new American families, just as we broke up our prairies and distributed them among strong, enterprising, vigorous men, who developed them into the great States of the Mississippi Valley."

The strength of the proposed legislation lies in the means provided whereby valuable assets created through the reclamation and settlement of the lands in a district are rendered liquid and available for financing the reclamation of other lands. This situation is brought about through further financing of the bonds of the districts that are organized. These bonds when issued will be deposited with the Federal Farm Loan Board. And when the value of the property in the district, subject to assessment for the payment of the bonds, is not less than twice the par value of the bonds, the board shall offer the bonds at public or private sale and shall deposit the proceeds to the credit of the reclamation fund. By this method the Government simply authorizes an existing governmental agency to give its estimate of the value of the property, thereby entailing neither moral nor legal obligation upon the Government to assume any of the liabilities imposed by the issuance of bonds.

An accurate statement of the number of times the fund made available herein will turn over can not be made. But it is fair to assume that the $350,000,000 will make three turnovers in 18 years, allowing a period of 6 years for each turnover. It may be asserted with confidence that within a period of six years from the time of construction the land within a project will have attained sufficient value to warrant a sale of the district bonds to the public.

Water or arid land, each by itself, in the far West has little value. The two brought together by an irrigation system have great value.

The assertion that reclaiming millions of acres in the far West would decrease farm values of the South, East, and Middle West was mischievous, and calculated to incite sectional prejudices. The passing of time has clearly demonstrated the fallacy of this argument.

An examination of the Yearbooks of the Department of Agriculture for the years 1914 and 1919 will show a general increase in farm-land values per acre, from which, as indicative of the whole country, we give the following:

Plow lands.

	1909	1910	1920
Eastern States:			
Massachusetts	$27.62	$36.69	$72.00
New York	32.86	48.00	64.00
Middle Western States:			
Ohio	33.35	53.34	105.00
Illinois	46.17	95.02	170.00
Nebraska	16.27	41.80	125.00
South Dakota	9.92	34.69	90.00
Minnesota	21.30	36.82	100.00
Iowa	36.00	82.00	219.00
Far Western States:			
California	21.87	47.16	130.00
Washington	11.68	44.18	115.00
Idaho	11.07	41.63	105.00

There is just one view which should be taken of agriculture in the United States, and that is to consider it and maintain it as one of the basic industries of the Nation. The late war proved the necessity of a country being self-sustaining as to its food supplies; that armies, as Napoleon asserted, "move upon their bellies" was again demonstrated.

The Secretary of Agriculture, in his report for 1919, asserts:

"America during the war helped to save Europe and to preserve civilization by making available to the Allies, through increased production and conservation, large supplies of foodstuffs. But for this contribution it is difficult to say how the Allies could have waged the war to a victorious conclusion. Lacking such support and with their own producing capacity seriously crippled, the German people experienced partial famine conditions, and the collapse of their military power was due in no small measure to the shortage of food."

While no nation can be deemed progressive which fails to engage in an extensive export and import trade, it is nevertheless true that the best and surest market for all concerned is the home market. If the home market should be withdrawn from the manufactures of the Nation they would wither and decay.

That the reclaimed areas of the far West call upon east of the Mississippi points for vast amounts of manufactured articles is clearly demonstrated by much data, from which we select but a small portion.

Carlsbad, N. Mex., has a population of 3,000. It is the principal trade center within 25,000 acres of irrigated land. It draws practically all its trade from this acreage. Its wholesale purchases during 1920 were as follows:

Dry goods, clothing, boots and shoes	$367,600
Lumber	125,000
Automobile trucks, etc	250,000
Groceries	402,000
Hardware and implements	235,000
Coal, feed, flour, and bags	250,000
Drugs, sundries, and cigars	85,000
Furniture	126,000
Other merchandise	55,000
Total	1,995,600

Wenatchee, in the State of Washington, has a population of 6,324. There are 30,000 acres of irrigated land tributary to the city. The town's trade is based almost entirely upon these reclaimed lands. In 1918 the fruit shipments alone amounted to 9,606 cars; in 1919, 13,350 cars; and in 1920, 10,000 cars. A well-organized commercial club in that city uses this language:

"As near as can be estimated, there are approximately as many carloads of manufactured products received in this territory as there are carloads of fruit shipped out."

Ogden, Utah, has 32,804 inhabitants. Immediately tributary to it are 50,000 acres of irrigated land. Its trade, however, is influenced by 200,000 acres of irrigated lands, there being several smaller towns within the 200,000 acres. Its chamber of commerce asserts that Ogden receives about $50,000,000 worth of manufactured products each year, such as dry goods from New York; farm tools from Chicago; automobiles and tractors from Michigan; machinery from the Middle States.

Burley, Idaho, has a population of 5,408. It is located in the heart of the Minidoka project, where 120,000 acres are irrigated. There are a number of other towns within the project, Burley being the largest, and it is fair to say has 25,000 acres directly tributary.

The following statement shows the wholesale purchases during two years:

	1918	1919
Dry goods, clothing, and shoes	$675,800	$1,203,000
Lumber, cement, brick, etc	848,000	1,060,000
Groceries	569,800	814,000
Hardware	471,200	589,000
Coal, feed, flour, and bags	437,400	486,000
Farm implements	357,200	434,000
Machinery and supplies	230,000	375,000
Electrical supplies	246,000	279,000
Automobile trucks, etc	1,120,000	1,009,000
Jewelry and miscellaneous, music	203,000	249,000
Drugs and supplies	112,000	124,000
Cigars, tobacco, etc	110,000	125,000
Confectionery	98,000	115,000
Furniture	100,000	121,000
Other merchandise	103,000	129,000
Total	5,681,400	7,112,000

The reclaimed areas about these western towns constitute but a small portion of the irrigated West. They are, however, suggestive, and demonstrate that the manufacturers of the East sell each year to the far West irrigationists hundreds of millions of dollars' worth of wares.

Reclaimed lands in the West and South will be especially adapted to the growing of sugar beets and cane. The consumption of sugar in the United States has now reached 95 pounds per capita. If all this sugar were produced from sugar beets and cane in this country, it would take each year 5,250,000 acres of land to yield the beets and cane. The United States, however, only produces one-fifth of the sugar it consumes. It buys the balance in foreign countries, paying each year therefor upward of $250,000,000, a sum two-thirds as large as the amount authorized to be appropriated by this bill.

We can only gain in national wealth as we keep our people employed. We can only have a contented populace as the mass is engaged in lucrative work. Forced idleness long continued will sap the best of institutions. The war has interrupted the old lines of activity. It may be some time before they are fully restored. For the time being some of the energy of our people should be directed into new channels, such as internal improvements. Unless there is to be a general retrogression, a breaking down of civilization, the human family will increase, there will be more mouths to feed, more bodies to clothe, and more wants to be supplied than ever before. At the present hour there is not overproduction but an unusual underconsumption. We firmly believe through favorable congressional action with respect to this measure the food supplies of the Nation will be increased, the home market extended, the idle given work, and the ex-service men and women afforded an opportunity of acquiring land for homes.

The bill in question is in harmony with the plank in the national Republican platform of 1920, which states:

"We favor a fixed and comprehensive policy of reclamation to increase national wealth and production. We recognize the development of reclamation through Federal action with its increase of production and taxable wealth, a safeguard for the Nation. We commend to Congress a policy to reclaim lands and the establishment of a fixed national policy of development of natural resources in relation to reclamation through the now designated agencies."

The reason why the Government is asked to loan $350,000,000 with which to finance reclamation projects grows out of the fact that the money of private parties is generally loaned on existing securities and not upon securities to be created by the money loaned. The inability of parties in the United States to borrow private funds with which to reclaim land is the same as exists in other countries, and the record our Government is making in reclaiming lands compares favorably with the accomplishments of other nations. Asking the Federal Government to carry on reclamation works is requesting nothing more of the Federal Government than what progressive Governments have been doing elsewhere.

Vice Consul Charles M. Hayden, Calcutta, through the Commerce Reports, October–December, 1918, advances late data as to India, where he states there are annually cropped 229,620,075 acres, of which 48,300,917 acres are irrigated, the British Government having put in irrigation works for 26,026,942 acres at a cost of $231,126,000. He further sets forth the estimated value of crops produced by means of irrigation for the year 1916–17 was $298,417,000, or 25 per cent greater than the cost of the irrigation plants. Further, he says, there are either under construction or about to be started in the near future 15 new projects, the estimated cost of which is $149,563,770, which will reclaim 7,000,000 acres of land. Reclamation has practically banished famine in India and the population has greatly increased.

The ministry of public works, Egypt, annual report 1915–16, asserts that the dam across the Nile at Aswan, which cost £5,000,000, furnished water that makes possible the production of crops valued from £5,000,000 to £10,000,000 per annum, and it is further asserted that in a generation the population of Egypt grew from 7,000,000 to 13,000,000, the cultivated areas increasing by 40 per cent and the amount of crops by 60 per cent. By irrigation through English capital in a few years Egypt was brought out of bankruptcy into wealth, and the contemplated works on the upper Nile by the British are far more ambitious than those heretofore undertaken from Aswan to Alexandria.

What probably interested British manufacturers most was the knowledge that from 1899 to 1909 Egyptian imports increased from £11,000,000 to £22,000,000, and the exports, largely to the British Isles, increased in value from £13,000,000 to £24,000,000, while the Egyptian revenues increased from £11,500,000 to £16,000,000.

The English have not been idle in the delta of the Euphrates and Tigris, where there are 12,000,000 acres, of which two-thirds are desert and one-third fresh-water swamps, the rainfall being 8 inches per year and high water occurring in the spring months. The works already planned will entail an expenditure of $30,000,000, which will make possible the condition so graphically described by Hammurabi, one of the greatest monarchs of Babylonian history:

"I have made the canal of Hammurabi a blessing for the people of Shumir and Accad. I have distributed the waters by branch canals over the desert plains. I have made water flow in the dry channels and have given an unfailing supply to the people. I have changed desert plains into well-watered lands. I have given them fertility and plenty, and made them the abode of happiness."

In India the British have investigated the practicability of diverting the Indus, with which to reclaim millions of acres of desert waste.

The Russian Government prior to the war spent a large sum upon investigation of the possibilities of reclamation by means of irrigation in the steppes of southern Russia and the plains of Siberia.

The Canadians have investigated their arid wastes and the Australians have actually undertaken the reclamation of theirs, and already spent many million dollars.

Peru, under a national policy, is restoring the irrigation projects which were the wonder of the Spanish invaders, and Argentina is engaged in an irrigation enterprise which will cost upward of $60,000,000.

Thus this Government embarking upon a national reclamation program is not doing something contrary to the spirit of a progressive people, as is manifest the world over.

In conclusion, what the United States needs is a permanent and constructive policy of reclamation. This bill provides it.

The amount of money to be appropriated and the projects to be undertaken is subject to the approval of Congress.

The lands subject to irrigation are lying idle and of no value, the waters necessary to reclaim them running to waste. Those subject to drainage, in the same condition—an inconvenience to transportation and a menace to health. When reclaimed, both will add vastly to the taxable wealth of the several States.

The Reclamation Department, highly efficient, with a splendid record of performance in the past, can achieve even greater results if given the funds necessary for continuous operation, as provided for in this bill.

There are practically no more public lands in the United States, in their present state, subject to entry that can be profitably farmed.

The funds under this act will revolve, and, therefore, continuously furnish new lands for settlers, the productivity of which is about double that of our best farming lands, not subject to irrigation and drainage.

The Government is merely assisting to create new national wealth. The money advanced will all be repaid with interest.

The proposition is national in scope. As the West and South increase in agricultural production, the North and East will increase in industrial production.

It will not reduce farm values in the East and Middle West.

The world is not troubled with overproduction, but underconsumption. As soon as world conditions are restored there will be an abundant demand for all we can produce. Furthermore, the late war proved the necessity of the country being self-sustaining as to its food supply.

Again, we need a larger home market for our manufacturers. It not only gives a preference right in matter of employment and settlement to those who have served with the military and naval forces of the United States, but it will offer opportunities for our young men to secure homes and continue profitably in agricultural pursuits.

Our country, having adopted a policy of no further territorial expansion, should develop the waste lands within its own borders.

The North and East should welcome the opportunity to assist in the upbuilding of the West and South, especially when they would add to their own prosperity thereby.

The principle embodied in this measure has the indorsement of the last Republican and Democratic National Conventions, the unqualified support of Secretary Fall, and the strong recommendation of President Harding.

Mr. SUTHERLAND. I ask unanimous consent to have printed in the RECORD, in 8-point type, an address delivered by the Vice President at the American University this afternoon at 2.30 p. m.

There being no objection, the address was ordered to be printed in the RECORD in 8-point type, as follows:

At American University, Washington, D. C., on Wednesday, June 7, 1922, at 2.30 p. m., Vice President CALVIN COOLIDGE spoke as follows:

"The world needs education in order that there may be a better estimation of true values. It is not easy to assemble facts. It is not easy to draw deductions. It is not easy to distinguish between the accidental and the essential. In the complications of modern civilization these are becoming more and more difficult. If world problems are to be solved it will be through greater application, through more education, through a deeper faith and a more complete reliance upon moral forces.

"It is only those who can not see beyond the present, who are lost in particulars, and who have no training to comprehend the greater sweep of events that come to lack the necessary courage to bear their share of the common burden. To a race which claims a heritage of eternity the important question is not where we are but where we are going. Education fails which does not help in furnishing this with some solution. It ought to confer the ability to see in an unfolding history the broadening out of the base of civilization, the continued growth of the power and the dignity of the individual, the enlarging solidarity and stability of society, and the increasing reign of righteousness.

"There are two great standards, and two alone, by which men measure progress—creation and redemption. These are not accomplished facts; they are ever-present processes. While we speak their work is going on. They are the measure of the dominion of man over himself and over nature, and of his dedication of himself and all his powers to a moral purpose.

"Measured by these standards, it would not seem difficult to justify the superiority and the increasing progress of modern civilization. Looking far back, the circumference of the enlightened world was very small. Its light existed, but it was everywhere surrounded by the darkness of ignorance, of super-

stition, and of savagery. There is no nation existing to-day which does not trace its ancestry back to a primitive people, yet each has come up through all the intermediate gradations to the present state, which it is scarcely too much to designate as world enlightenment. There are still dark places. There are yet remnants of the lower order, but even the Dark Continent is yielding to the light. There have been times when peoples have lapsed, when the march of a certain limited progress which they appeared to represent has ceased, but the cause has never lapsed. The Greek and Roman world lost for a time a part of its power of creation, but the power of redemption was not lost; it was rather increased as the people who inhabited those ancient empires and their dependencies turned to the Christian faith.

"It was through that faith and through the rediscovery of ancient learning by larger and larger masses of people, the great universities and through the teachings of the clergy, that there was brought about the final great reawakening of the Middle Ages which reestablished and strenghtened the mighty creative power of modern science and invention. No one can dispute that power, no one can deny its increased and increasing dominion over all the forces of nature. Science stretches out its hand and reaches instantly any portion of the earth. It has brought under control forces comparable only with the resistless rise of wind and tide. It has weighed the earth in a balance and created instruments so delicate that they can detect a far-off whisper or measure the dynamic force of thought.

"The Old World motive for creation, the motive of selfishness, of military aggrandizement, of imperialism, and of slavery, the motive which finally gained the ascendancy over the one-time devotion to moral purposes which characterized the early rise of Greece and Rome, was lost. It was lost because it became a perverted motive. It destroyed itself. A reawakened world rededicated itself to what was sound and true and good in the old motive strengthened and purified by Christian ideals. It was the general acceptance by modern life of this new motive which gave it direction and strength and an increasing creative power.

"It was under its inspiration that despotism and slavery have steadily been diminished and self-government and freedom have steadily been increased. It has been the directing force which has provided the material development of the modern world, established the groundwork of enlightened institutions, and given to humanity the moral character which has been the sustaining power of them all. The supremacy of this motive has marked the great world decisions of recent times. It lay at the foundation of the ambition of Peter the Great to reorganize and direct the energies of the Russian people, it inspired Gustavus Adolphus in his struggle for freedom. it was the deeply cherished sentiment of the parliamentary forces under the leadership of Oliver Cromwell, it was exhibited in the spirit of the French people when they were rousing themselves against despotism, it broke the power of the great Napoleon when he grasped at world dominion. The final consummation of these world forces has been America.

"Wherever you may explore the high places of American history you come upon this same motive as the main cause of the action of her people. It was the thought of the early settlers as they hewed out for themselves a home in the wilderness where they raised up their altars and established their schools. It was the meaning of the life of Washington, of the great Declaration, and of the greater Federal Constitution. It is the explanation of Abraham Lincoln and the all-embracing freedom wrought out in his day. Finally, it sent 2,000,000 men across the sea that the cause of a Christian civilization might still remain supreme.

"The power of creation and the power of redemption have come down through all the ages with mankind in ever-increasing proportions. They are the power to build and the power to endow with righteousness. They represent intelligence and sacrifice, the state and the church, the material and the spiritual. These are the forces upon which mankind can rely; they do not fail, they endure.

"The world has been greatly shaken in the past decade. These forces have been tested as they never before were tested. The wonder is not that Russia, under a comparatively new organization which had never reached down to the heart of the people, collapsed; the wonder is that the world as a whole has stood firm, that it is gathering up the threads of existence, resuming its orderly progress, creating and redeeming itself anew. In the doing of this it is doing more, it is striving successfully to reach higher ideals.

"The lessons of the great conflict have not gone unlearned. There is, to be sure, disappointment, disagreement, and irritation; but where in ages past such conditions would have made armed conflict inevitable they are yielding to the power of persuasion and reason, through mutual consultation. There is a general admission throughout the earth of a mutual relationship and a mutual responsibility. There is the League of Nations, which, whether it be successful or not, whatever imperfections may be contained within its terms, is at least the attempted expression of a noble aspiration for world association and understanding. There is the four-power treaty and the covenants for the limitation of the extent and use of armaments, all expressive of an even higher and nobler aspiration and an even firmer reliance upon reason as the foundation for all peace.

"All these are creations the like of which the world has never before seen. There is, moreover, the working out of the salvation of mankind through the ever-existing law of redemption through sacrifice.

"It would be easy to glance back over recorded history and see how when new institutions are needed they have been brought forth and how when they have ceased their usefulness they have been cast aside. It would likewise be apparent that when there has been need for leaders they have been raised up to direct and to inspire and when there has been a requirement for the results of science and invention these have been produced to meet the increasing necessities and to lighten the burden of mankind. Intelligence never rests; ceaselessly it works, building, perfecting, adorning. When creation has been required, creation has appeared.

"Along with creation has gone redemption, always through sacrifice. The power of good ultimately to triumph over evil has never failed. When western civilization was threatened by Attila, Rome and Gaul in common cause made that heroic sacrifice which redeemed all subsequent history. When later the followers of Mahomet imperiled Christianity, it was the Frankish hosts who saved it forever at Tours. Always the story runs the same. Whether it be necessary to meet the evil intent of Stuart kings or the liberty-destroying acts of a Parliament inspired by a mad monarch, or to preserve a nation and rescue it from the curse of slavery, or to overcome the great delusion of world dominion, always there have been those who have made the supreme sacrifice by which these results have been accomplished. Always the cross and always the response. There is a power which moves resistlessly that justifies our faith.

"There is scarcely any reliable authority which denies the right of the people to self-government, there is scarcely any dominion which denies obligation to the law of righteousness. Institutions of learning, organized charities, all of the forces of government and of religion, are making their ceaseless contributions to the unbought salvation of the world. The redemption goes on. The moral forces of the world are supreme.

"This is the civilization which intelligence has created and which sacrifice has redeemed. We did not make it. It is our duty to serve it. Education ought to assess it at its true worth. It ought not to despise it, but reverence it. If there be in education a better estimation of true values, it must be on the side of a great optimism. Under its examination human relationship stands forth as justified and sanctified. There is no place for the cynic or the pessimist. Who is he that can take no part in business because he believes it is selfish? Who is he that can take no part in government because he believes it is sordid? Who is he that can take no part in religion because he believes it is imperfect? These institutions are the instruments by which an eternal purpose is working out the salvation of the world. It is not for us to regard them with disdain; it is for us to work with them, to dedicate ourselves to them, to justify our faith in them. It is a high calling in which to be even a doorkeeper is better than to rule over many multitudes of critics and Philistines.

"The great service which education must perform is to confirm our faith in the world, establish our settled convictions, and maintain an open mind. The heritage of all the past is neither mean nor insignificant. It is a high estate. The work of the world is neither undignified nor degrading. It lacks neither character nor nobility. It is the means and measure of all real manhood. It is truly the creation and the redemption. Those who are worthily engaged in it are ministers of a holy cause, priests of a divine imposition."

THE TARIFF.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 7456) to provide revenue, to regulate commerce with foreign countries, to encourage the industries of the United States, and for other purposes.

The PRESIDING OFFICER. The Secretary will state the next committee amendment.

The ASSISTANT SECRETARY. The next amendment of the Committee on Finance is, on page 79, paragraph 365, line 2, before the words "per cent ad valorem," to strike out the numerals "40" and insert in lieu thereof the numerals "50," so as to read:

and in addition thereto, on all of the foregoing, 50 per cent ad valorem.

Mr. KING. I move to amend the committee amendment by striking out the numerals "50" and inserting in lieu thereof the numerals "35."

The PRESIDING OFFICER. The question is on the amendment of the Senator from Utah to the amendment of the committee.

Mr. KING. Mr. President, I called the attention of the Senate a few moments ago to some figures which dealt with the commodities referred to in this paragraph. May I further trespass upon the time of the Senate a few moments to direct attention to some information which is contained in the Tariff Information Survey in reference to this subject?

Mr. President, it seems to me that there is no justification for any duty upon any of the items embraced in this paragraph, except, perhaps, guns upon which there has been a great deal of skilled work and ornamentation. I concede that guns of that character might very properly be taxed for revenue purposes; they might be classified as luxuries; and I should be in favor of imposing a heavy duty. I say I should be perfectly willing to impose a high duty upon firearms of that character; but this paragraph does not distinguish between the cheaper grades, the ordinary grades of guns and firearms such as are purchased generally by the American consumer and in the American market and the article which is a luxury. It is proposed to impose the same rate of duty upon all grades, regardless of character or value.

To show, Mr. President, how unimportant the importations are and the extent to which the domestic producers have a monopoly, I call attention to the fact that in 1918 there were only 22 double-barreled guns and combination shotguns and rifles imported into the United States.

I am perfectly willing that those 22 guns—for evidently they were high priced—should pay a considerable, indeed, a heavy duty; but under the guise of imposing a high rate of taxation upon the very high-priced guns, it is proposed to impose a heavy burden upon all guns used by the people. It is unfair; it is deceptive. We use the high-grade guns, those of great value, as a pretext for imposing a high rate of duty, and seek to convey the impression that such duty relates only to guns of that character. This bill confirms the right of seven or eight manufacturing concerns in the United States to continue a condition which is tantamount to a monopoly. They are to be permitted to control the market and to fix such prices for their products as their greed may determine.

With reference to the cost of production and the possibility of competition, I call attention to a statement in the Tariff Information Survey to the effect that—

automatic machinery is employed to a large extent in this country and to a lesser extent in Europe. It is used more largely for the making of rifles, pistols, and repeating shotguns than for single and double barreled shotguns, on which considerable hand labor is employed for fitting the parts. Shotguns are also often built to special orders. Hand labor is employed to a larger extent in Europe than here, and in Belgium much of it is performed in the homes of the workers, where all members of a family often spend part of their time on the work.

All of which indicates our superiority in the methods of production and that we can manufacture these guns cheaper than they can be manufactured in any other country.

Speaking of the domestic production and consumption, it is stated that in 1914 one-third of the output was exported. We not only satisfied the domestic market but our production was so great that we were able to send abroad, in competition with other countries, one-third of our entire output. How is it possible for us, under conditions of that kind, to have competition from abroad? It is obvious that no danger menaces us from foreign producers, for we not only satisfy the domestic needs but we were able to go out into the world and take from other nations markets in their own territory, for we exported, as stated here, one-third of our entire production.

It is further stated:

The only article for which a demand exists which can not be supplied by American manufacturers is the highly ornamented or "figured" shotgun barrel and the twisted Damascus barrel.

* * * * * * *

Domestic exports: Exports in the four years previous to the European war amounted to between $3,000,000 and $4,000,000 per year, of which approximately one-half went to Latin American countries; the remainder were divided about equally between Canada, Europe, and the rest of the world. In 1914 the export business amounted to over 30 per cent of the production.

Of imports, it is declared that—

Imports decreased in general since 1902, when they reached a maximum, and reached in the last pre-war year an amount only one-sixth of that maximum, notwithstanding a slight increase in 1914 under a somewhat reduced tariff.

It is further stated that—

The importation of shotguns has been falling off, due perhaps partly to the diminishing game supply and partly to the increasing popularity of the repeating shotgun, which is an exclusively American product.

Of course if the Tariff Commission had stated more fully the facts they would have said that importations fell off because of the cheaper production in the United States and because of the ability of the American manufacturers to supply not only the domestic market but to supply a part of the demands of the world.

Mr. President, in the light of a situation which shows that our production exceeds our consumption, that we must find a world market, that we have no fear from the production of foreign countries, it is now proposed to increase the tariff rate upon the products that are embraced in the portion of the paragraph now under consideration. I can not with any degree of patience discuss schedules and items of this character. I have said upon a number of occasions that I have no quarrel with Senators or others who believe that the best interests of our country require a reasonable tariff for the purpose of establishing infant industries; I have no controversy with those who insist that because of the difference in the price of labor in the United States and abroad there should be laid a duty sufficient to establish an equilibrium; but when no reasons are assigned for these high rates, when there are no importations, or, if any, they are negligible, when there is no competition from abroad, when the industry is not in the infant class but is a well-established and profitable one, when, notwithstanding the disparity in wages abroad and here, there is no possible competition, then, Mr. President, it does seem to me that those who advocate these tariff rates put themselves in an indefensible, inexcusable, and un-American attitude.

They are unfair to themselves; they do violence to their intellectual integrity; they are doing a great injustice to the people of the United States. Under conditions of that character it looks as if the purpose was, as has been stated so frequently upon the floor, to permit the domestic manufacturer to exploit the American public, and, when we come to consider the prices now charged by the domestic manufacturers of guns, we find they are robbing and exploiting the American public; they are charging for guns 200 and 300 per cent more than prior to the war. I repeat, Mr. President, that when the tariff may not be urged to measure the difference in wages at home and abroad, when there is no excuse for it upon the ground that the industry sought to be protected is an infant one, then I can not comprehend the theory upon which such rates are suggested.

Mr. President, this bill is already reacting to the disadvantage of the American producer. The corporations who will profit by these extortionate tariff rates, in anticipation of the passage of this bill, are already advancing the prices of their commodities. Yesterday's New York papers carried this information. I read now from the World, from an article by Mr. C. F. Hughes, and the same information in different language will be found in the trade journals:

Announcement of one of Chicago's leading clothing manufacturers to the effect that an average increase of $2 a suit would be made on fall clothing lines within approximately 30 days was received yesterday with interest by local manufacturers. The increase was explained by the recent advances in the cost of woolens.

Of course, the woolen mills, by reason of the increased duties laid in this bill, already have indicated their purpose to advance the prices of their products, and that, of course, will be reflected in increased prices on all woolen products, clothes, blankets, and so forth, consumed by the American public.

"The result of this condition," the company says, "is that clothing prices are advancing and will continue to advance."

Why not? That is the object of this bill. It is not for the purpose of benefiting the American people. It is for the purpose of swelling the profits of the woolen manufacturers, of the textile manufacturers, of the boot and shoe producers, and of those who are taken care of in the numerous schedules of this bill.

In the local market the general sentiment was that fall clothing prices could no longer remain stationary under continued pressure from higher piece-goods costs. The manufacturers appear willing to maintain their quotations for current orders—

"Current orders," let Senators understand—

but see no chance of avoiding increases in the near future or after they have used up the material bought before woolens advanced. There is still a strong desire to keep the cost of clothing at the minimum—

"There is still a strong desire," but the desire to increase the cost is stronger than the desire to keep the prices at the

minimum. We will see, in this contest between the desires, which one triumphs—

but the manufacturers declare they are helpless in the present circumstances of high labor rates and rising piece-goods prices.

This is what I wish particularly to call attention to:

Now, that the path has been broken by one manufacturing concern, it is believed other announcements will be made. The trade is of the opinion that the first increase will amount to about 7 per cent, as this is what the $2 advance would represent, approximately. It was freely predicted yesterday that upon the reorder business to develop in August and September the range of increase might well mount up to 15 per cent, depending upon the bookings at that time.

On the same page and in the same column the following appears:

AMERICAN WOOLEN CO. ANNOUNCES SECOND ADVANCE.

The American Woolen Co. yesterday announced price changes which complete the second advance upon its fabrics. These included increases of from 5 to 55 cents a yard on the staple woolens in department 3, division C, 2½ to 80 cents a yard on the staple woolens in department 8A, 7½ to 35 cents on worsteds and 2½ to 55 cents on woolens in department 4, which handles women's wear.

The key number among worsteds in the American line was brought up in the second advance to $2.60. This number is the well-known Fulton serge, and its present price stands 25 cents over the opening figures. The advance, therefore, has been about 10 per cent.

What does that mean, Mr. President? It means that many of the manufacturers of the United States, not only of woolen goods but of other products, anticipating the passage of this bill, fortified and buttressed by the high tariff rates therein provided, are already advancing their prices and are giving notice to the public that prices, high as they are, will continue to advance.

Mark this significant expression:

Now that the path has been broken by one manufacturing concern, it is believed other announcements will be made.

Why, of course; these organizations so articulate that when one moves all move. They are so bound together by secret agreements or by interlocking directorates or by hidden cords that when one moves all move; when one advances all will advance.

Mr. President, we have charged, and the charge will be made again, that trusts and monopolies and conspiracies in restraint of trade and to destroy competition exist in the United States. They rear their ugly heads everywhere, and they rob and plunder the people apparently at will. A few magnificent gestures have been made by some of the prosecuting officers of States and of the Federal Government to bring these conspirators who violate the law into the courts, that they may be punished for their misdeeds. How many prosecutions under the criminal provisions of the antitrust law have been brought during the past year, or, for that matter, during the past 10 or 15 or 20 years?

Mr. WATSON of Georgia. Mr. President——

Mr. KING. I yield.

Mr. WATSON of Georgia. If the Senator recalls a provision of the Sherman antitrust law, the most practical, immediate, and effective way to enforce that law would be to seize the goods of the shippers, wherever they are found in any depot in this Union, and confiscate those goods right there.

Mr. KING. Mr. President, the suggestion of the Senator has merit. If Congress desires, and the present law does not authorize this course, it has the power to provide for the seizure of goods in interstate commerce which have been manufactured or are being vended in contravention of the criminal provisions of the Sherman antitrust law. If Congress has the right to prevent combinations in restraint of trade, and to provide punishment for those who conspire to destroy competition, and to provide in civil proceedings for the dissolution of such corporations and trusts, then, for the purpose of effectuating the object, it can provide for the seizure of property carried in interstate commerce in violation of the terms of the law. But, Mr. President, the Sherman antitrust law is being flouted by manufacturers, by great trusts and corporations in the United States. They regard it as if it were a nullity, as if it were a joke; and so those combinations now coordinating, articulating, are getting ready to advance with steady tread, united in their steps, toward higher prices for the commodities which the people of the United States are compelled to purchase.

Who shall say that this tariff law is not for the purpose of increasing the prices of commodities to the people of the United States? When the Senator from Alabama [Mr. HEFLIN] described this bill as one which increased the prices of all commodities from the cradle to the grave and the shroud which enveloped the dead, he was not speaking metaphorically; he was describing an actual condition which will be realized—indeed, it is already being realized under the probability of the passage of this bill.

Mr. WATSON of Georgia. Mr. President, the Senator from Alabama might have said that one of the hungriest trusts that ever robbed the American people was the Coffin Trust.

Mr. KING. I think, Mr. President, the Senator from Alabama did refer to the fact that coffins—that is my recollection of the figures—have advanced in price 600 per cent. There never were such greedy corporations and individuals in the world as some who are engaged in business pursuits and enterprises in the United States. They desire a complete embargo so as to prevent any importations of commodities produced by them, Then they could fix domestic prices at such levels as would satisfy their greedy souls.

I repeat, Mr. President, that the question at issue here is not whether there shall be a tariff or no tariff, but whether there shall be a just and a fair tariff, measured by the conceptions of those who believe in a fair tariff system, or a system which licenses the domestic producer to exploit at will the American people.

I said in the beginning of this debate that if a bill had been offered providing fair and reasonable rates based upon the difference in cost of production at home and abroad it would have gone through the Senate with but a few weeks' debate. Some would have voted against it, but it would not have provoked the discussion that this iniquitous bill does, because this measure finds no precedent, no authority, in any previous tariff legislation. It is sui generis. It stands out alone in its own nakedness and in its own hideous deformities.

In the same paper, Mr. President, and on the same page, I find this article, and I call the attention of Senators, and especially my Republican friends who have been defending this bill upon the ground of the frightful menace that Germany was to the United States, to this statement:

GERMANS FACE DEPRESSION.

WASHINGTON, June 5.—Gloomy prospects for German industry and foreign trade were reported at the recent convention of the National Union of German Industry, says a wireless report received at the Department of Commerce to-day from Commercial Attaché Herring at Berlin.

I might say that Mr. Herring has been making some very illuminating reports to the Commerce Department, in which industrial conditions in Germany are being revealed.

Recurring to the article:

As the level of export prices of many commodities approaches the world market level, the convention found, a decline of foreign orders and some cancellations of contracts follow as a natural consequence.

The minister of labor, Mr. Herring added, has informed the Reichstag that serious unemployment may be expected soon, due to decline of the German industrial boom.

Those who know anything about economics and the function of money realized that the balloon conditions in Germany must soon come to an end, that the balloon would be punctured, and a most distressing depression in Germany would result. This situation, it was apparent, would result in unemployment, doubtless in serious discontent, possibly followed by revolutionary movements.

With the enormous paper inflation, with the struggles which Germany is experiencing in obtaining the gold with which to meet her indemnities, though moratoriums have been granted, it is obvious that Germany, if not now brought to face the issue, will be compelled to face it in the near future, and this boom, so called, will be exploded, and the German people will be brought down to earth again, and there will be such financial disaster, such industrial chaos, as perhaps will not be found in any country of the world other than Russia.

We are discussing this paragraph, which proposed a prohibitive duty upon guns and various parts of guns, when we manufacture and export, when there is no danger of competition from abroad to be apprehended, when the domestic market is secure in the hands of a few firms, and when the profits of those concerns have been enormous.

These rates can not be defended. It is a pure gratuity to these corporations, a gratuity which we pay by robbing the American people, putting our hands into their pockets by the strong arm of the law, abstracting money therefrom, and transferring it to the pockets of rich corporations and trusts.

Such is this Republican tariff bill, iniquitous, infamous—damned before it is born, destined to be damned during its life time, and doomed to damnation and obloquy after its death.

The PRESIDING OFFICER (Mr. EDGE in the chair). The question is upon agreeing to the amendment offered by the Senator from Utah [Mr. KING] to the committee amendment.

Mr. KING. I ask for the yeas and nays.

The yeas and nays were ordered, and the reading clerk proceeded to call the roll.

Mr. POMERENE (when his name was called). I am paired for the day with my colleague [Mr. WILLIS]. I transfer that pair to the senior Senator from Nebraska [Mr. HITCHCOCK] and vote "yea."

Mr. UNDERWOOD (when his name was called). I transfer my general pair with the senior Senator from Massachusetts [Mr. LODGE] to the junior Senator from Rhode Island [Mr. GERRY] and vote "yea."

The roll call was concluded.

Mr. BALL. Transferring my general pair with the senior Senator from Florida [Mr. FLETCHER] to the junior Senator from Delaware [Mr. DU PONT], I vote "nay."

Mr. CURTIS. I desire to announce that the Senator from Indiana [Mr. NEW] is paired with the Senator from Tennessee [Mr. MCKELLAR].

Mr. HALE. Making the same announcement as before, I vote "nay."

Mr. COLT. I transfer my general pair with the junior Senator from Florida [Mr. TRAMMELL] to the junior Senator from Oklahoma [Mr. HARRELD] and vote "nay."

Mr. STANLEY. I transfer my pair with the junior Senator from Kentucky [Mr. ERNST] to the senior Senator from Arizona [Mr. ASHURST] and vote "yea."

Mr. JONES of New Mexico. I transfer my general pair with the senior Senator from Maine [Mr. FERNALD] to the senior Senator from Missouri [Mr. REED] and vote "yea."

Mr. GLASS. I transfer my general pair with the senior Senator from Vermont [Mr. DILLINGHAM] to the senior Senator from Nevada [Mr. PITTMAN] and vote "yea."

The PRESIDING OFFICER (Mr. EDGE in the chair, after having voted in the negative). I transfer my general pair with the senior Senator from Oklahoma [Mr. OWEN] to the junior Senator from Nevada [Mr. ODDIE] and allow my vote to stand.

Mr. FRELINGHUYSEN. I transfer my general pair with the senior Senator from Montana [Mr. WALSH] to the junior Senator from Oregon [Mr. STANFIELD] and vote "nay."

The result was announced—yeas 24, nays 36, as follows:

YEAS—24.

Borah	Harrison	Overman	Stanley
Capper	Heflin	Pomerene	Swanson
Caraway	Jones, N. Mex.	Robinson	Underwood
Dial	King	Sheppard	Walsh, Mass.
Glass	La Follette	Simmons	Watson, Ga.
Harris	Lenroot	Smith	Williams

NAYS—36.

Ball	Frelinghuysen	McKinley	Shortridge
Broussard	Gooding	McLean	Smoot
Bursum	Hale	McNary	Spencer
Calder	Johnson	Newberry	Sterling
Cameron	Jones, Wash.	Nicholson	Sutherland
Colt	Kellogg	Page	Townsend
Curtis	Kendrick	Pepper	Wadsworth
Edge	Ladd	Phipps	Warren
France	McCumber	Poindexter	Watson, Ind.

NOT VOTING—36.

Ashurst	Fernald	Moses	Ransdell
Brandegee	Fletcher	Myers	Rawson
Crow	Gerry	Nelson	Reed
Culberson	Harreld	New	Shields
Cummins	Hitchock	Norbeck	Stanfield
Dillingham	Keyes	Norris	Trammell
du Pont	Lodge	Oddie	Walsh, Mont.
Elkins	McCormick	Owen	Weller
Ernst	McKellar	Pittman	Willis

So Mr. KING's amendment to the committee amendment was rejected.

The PRESIDING OFFICER (Mr. BURSUM in the chair). The question is upon agreeing to the committee amendment.

The amendment was agreed to.

The next amendment was, on page 79, line 5, to strike out "45" and insert in lieu thereof "55," so as to read:

On all parts of such guns or rifles, and fittings for such stocks or barrels, finished or unfinished, 55 per cent ad valorem.

Mr. KING. I move to amend by striking out "55" and inserting in lieu thereof "35."

Mr. President, let me say just a word on this amendment. There is no doubt that under the facts in the case this item ought to be transferred to the free list, as should all the items in this paragraph; but in deference to some upon the other side, I have proposed a very liberal and indeed a very extortionate rate. Without further discussion, because, in my observations heretofore, the matter was generally discussed, I ask for a vote.

The amendment to the amendment was rejected.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment.

The amendment was agreed to.

The next amendment was, on page 79, line 5, to strike out the word "sporting" before "breech-loading," so as to read:

Provided, That all breech-loading shotguns and rifles imported without a lock or locks or other fittings shall be subject to a duty of $10, etc.

Mr. KING. This paragraph provides that all breech-loading guns, shotguns and rifles, imported without a lock or locks or other fittings, shall be subject to a duty of $10 each and 55 per cent ad valorem. An examination of the record shows that the importations for nine months of 1921 were 48 and the exports of guns and parts were to the extent of millions of dollars. Yet with 48 parts of guns imported we propose to impose this enormous tariff. If Republican Senators can defend it and justify it, then, Mr. President, this exemplifies the fact that no argument will avail and that our Republican friends are impervious to reason.

I ask for a vote. I hope that the committee amendment may be disagreed to.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment to strike out the word "sporting" in line 5.

The amendment was agreed to.

The READING CLERK. The next amendment of the committee is, on page 79, in line 8, where the committee proposes to strike out "40" and insert "55," so as to make the proviso read:

Provided, That all breech-loading shotguns and rifles imported without a lock or locks or other fittings shall be subject to a duty of $10 each and 55 per cent ad valorem.

Mr. KING. I move to amend the committee amendment by striking out the numerals "55" and inserting in lieu thereof the numerals "35."

The PRESIDING OFFICER. The question is upon the amendment offered by the Senator from Utah to the amendment of the committee.

The amendment to the amendment was rejected.

The amendment of the committee was agreed to.

The next amendment was, on page 79, at the beginning of line 14, before the words "per centum," to strike out the figures "25" and to insert "60," so as to make the paragraph read:

PAR. 366. Pistols: Automatic, magazine, or revolving, and parts thereof and fittings therefor, valued at not more than $4 each, $1.25 each; valued at more than $4 and not more than $8 each, $2.50 each; valued at more than $8 each, $3.50 each; and in addition thereto, on all of the foregoing, 60 per cent ad valorem.

Mr. MCCUMBER. Mr. President, the only amendment in this paragraph is to strike out "25 per cent ad valorem" and insert in lieu thereof "60 per cent ad valorem." I desire to read a portion of the testimony that was given before the Committee on Ways and Means and then make reference to the importations and the results of the investigation of the Reynolds commission.

On page 858 of the hearings before the Ways and Means Committee of the House we have the testimony and brief that was furnished by Mr. Strugnell, in which he says:

We are not including herein specific comparison between wages and hours of domestic and foreign labor, as we understand such figures are available to your honorable committee, but we do wish specifically to point out the large employment of women and children in continental Europe in the production of small arms, particularly in Belgium, where they advertise that children of tender years, even as young as 8 years of age, become educated producers both in the factories and in the homes, whereas child labor is rightly prohibited with us.

Further on he said:

The marked increase in the protection asked in this paragraph is because actually current importations are now being made at as low a figure as $2.24 free on board European port. The records of the New York customhouse, we believe, will disclose to you larger importations of cheap automatic pistols during the past 90 days than during any 12 months' period in the past, and unless prevented such importations will continue to increase in much the same ratio, and finally be fatal to the industry in this country. We have before us a recent trade circular of a Spanish manufacturer which is so illustrative of the present-day character of foreign competition that we are appending hereto a photostatic copy of a portion of it. It will be noted that its headline reads, "Revolvers systeme Smith Y Wesson Y Colt." The quoted prices are as low as $2.03 each. The domestic and foreign markets will be flooded with similar advertisements. We respectfully submit that such unfair methods of competition are contrary to our laws and should not be encouraged. The parties are beyond the reach of our own Federal Trade Commission, and the only remedy of the American manufacturer is suitable tariff protection.

In other words, they advertised the Smith & Wesson and Colt revolvers at those low prices, when in fact they were not the Colt or the Smith & Wesson revolvers.

Now, Mr. President, looking at the importations, let us take the year 1909 as a fair year, in which the importations were $57.67. Let us then come to 1913, with a new tariff law, when the importations ran up as high as $55,212. Then, the war coming on, the importations went down; but let us look at 1918, when there were only $165 worth imported. In 1919 there were $13,421 and in 1920, $169,217. In the calendar year 1921 there were $674,229—an increase from 1918 of $165 to 1921 of $674,000, or nearly three-quarters of a million dollars' worth in that one single year. That is some evidence of the ability to swamp the market with this product.

I now turn to the Reynolds report and will give some of the importations. Automatic pistols from Germany were imported at $3.76 each, with 39 cents cost of landing. They are sold for

$8.20, as against the American selling price of $12.38. It would require 136 per cent to equalize this difference. With both the ad valorem and the specific rate, the duty is about 96 per cent.

Next is an automatic pistol from Belgium. It comes in for $4.75, with 24 cents landing costs. It is sold in this country for $8.50, as against the American wholesale price of $14.37. It would require 122 per cent to cover the difference. The amount that is given in the bill, both specific and ad valorem, would make about 113 per cent.

Take the next from Spain. The cost is $4.20, with 25 cents landing costs. The selling price of the foreign article is $9.08, against the selling price of the American article of $16.50. It would require 188 per cent to equalize the difference. The ad valorem plus the specific duty allowed by the bill is about 120 per cent.

The only ones falling below the necessity for the duty fixed by the bill are two importations from Spain of revolvers quoted over $4 and less than $8. The price was $5.71, with 28 cents landing costs, selling price in the United States $8.64, and the American selling price $18.44. It would require only 85 per cent to equalize the two products, while the bill would give 104 per cent. But on the average the duties included in the bill are very much below those required as an equalizer between the foreign and the domestic article in the American market. When it is recalled that they are coming in at such enormously increased rates, in amounts that have changed from $165 worth in 1918 to nearly a million dollars worth in 1921, it can be seen that there is a necessity for sufficient protection.

Mr. DIAL. Mr. President, I have been voting persistently and consistently here for two months against this tariff bill. I have seen some of my colleagues on this side of the Chamber from time to time join Senators on the other side of the aisle in different ballots. I did not think that I would fall, but it seems that the time will arrive in all our lives when we have to tumble, however, for different reasons.

The objection I have to the tariff on pistols is that it is not high enough. I think it ought to be 500 per cent, or, better still, an embargo, and then I think the bill ought to be amended to prohibit their manufacture in the United States altogether.

Mr. KING. Mr. President, the Senator from North Dakota [Mr. McCUMBER] did not invite the attention of the Senate to the fact that the prices of pistols, assuming that there is the importation of which he speaks, are still maintained at levels greatly in excess of those prior to the war. For instance, as shown in the brief on page 1988 of the Senate hearings, metal and manufactures schedule, Colt revolvers, new service, price in 1915, $14, and in 1921, $30.50, more than 100 per cent increase. New service target pistols, $25 in 1915 and now selling for $49. Army special pistols in 1915 sold for $13 and in 1921 for $27.25. Officer's model target revolvers sold for $16 in 1915 and in 1921 sold for $38.10; for the pocket positive revolver the price in 1915 was $11 and in 1921 it was $24. The police positive in 1915 was sold at $12 and in 1921 was sold at $24.50; of the police positive special in 1915 the price was $12 and in 1921 the price was—I am speaking, of course, of the domestic market—$25.60; the police positive target in 1915 sold for $13 and in 1921 for $28.25; the single-action Army in 1915 sold for $13 and in 1921 for $29.40. The Smith & Wesson safety hammerless .32 caliber sold for $11.75 in 1915 and for $22.80 in 1921; the safety hammerless .38 caliber sold for $12.78 in 1915 and for $24.40 in 1921; the hand ejector, model 1903, .32 caliber, sold for $12.78 in 1915 and for $24.40 in 1917; hand-ejector military and police, model 1902, .38 caliber, sold for $13.60 in 1915 and in 1921 sold for $27.25; the same hand ejector, model of 1905, .32 and .38 caliber, was sold in 1915 for $13.60 and in 1921 for $27.60.

The Iver Johnson .22, .32, and .38 caliber sold in 1915 for $1.60 and in 1921 for $4.25; the automatic—hammer—sold for $4 in 1915 and for $9.65 in 1921; the automatic—hammerless—sold for $4.50 in 1915, as against $10.30 in 1921; the Harrington & Richardson hammer auto revolver sold for $2.60 in 1915, and in 1921 sold for $7.50; the police auto sold for $2.60 in 1915 and for $7.50 in 1921; and so on. These figures indicate, Mr. President, that the manufacturers of these commodities are continuing in peace times the prices they charged during the war, with enormous increases. If there is any competition from abroad, it has not been sufficient to bring down the domestic prices.

My good friend, the junior Senator from South Carolina [Mr. DIAL], because he does not believe—I should judge from his remarks—in the manufacture or sale of pistols, would invoke the taxing power of the Government to establish an embargo. He does not propose to deal with the domestic manufacturer; he proposes to cut off all possibility of foreign competition and to offer no restriction whatever to domestic producers in the manufacture and vending of pistols. He is not consistent. Why does he not offer an amendment to this bill if he objects to the manufacture and sale of pistols—assuming, of course, that Congress has the right to interdict the manufacture and sale of firearms. I deny that it has that right. It is possible that it may prohibit the transportation in interstate commerce of firearms, but Congress would have no right, in my opinion—I am speaking now without mature consideration—to prohibit the manufacture in the State of New York or the State of New Mexico of pistols, or the vending in the State of New York or in the State of New Mexico of the manufactured product within those States.

A different question, of course, would be presented if the articles that are manufactured and sold were offered for transportation in interstate commerce; but the Senator from South Carolina, having fallen from grace, as he frankly concedes, joins our Republican friends upon the other side on this article, and says, "I propose to turn over to the domestic manufacturer the market and the opportunity to charge what he pleases, to rob the American people by the imposition of such prices as the greed and cupidity of the domestic manufacturer may dictate."

We exported of these products in 1920 $1,337,400 worth; in the nine months of 1921 the exports were $446,059 worth. What the exports were in the last three months for 1921 I am unable to state.

Mr. President, we have here an item as to which the evidence shows that we manufacture large quantities and export large quantities; that there is not sufficient competition to reduce the prices appreciably below the war level and the domestic manufacturers are charging now for these products from 100 to 200 per cent and upward above that they charged before the war.

I move, Mr. President, to strike out the numerals "60" which are found in line 14, page 79, and to insert in lieu thereof the numerals "35." My amendment would still leave the specific duty and an ad valorem duty of 35 per cent.

The PRESIDING OFFICER. The question is on agreeing to the amendment proposed by the Senator from Utah to the amendment of the committee.

The amendment to the amendment was rejected.

The PRESIDING OFFICER. The question recurs on agreeing to the committee amendment.

The committee amendment was agreed to.

The next amendment was, in paragraph 367, page 79, line 16, after the word "knocked," to strike out "down for reassembling" and insert "down."

The PRESIDING OFFICER. The question is on agreeing to the amendment reported by the committee.

The amendment was agreed to.

The PRESIDING OFFICER. The Secretary will state the next amendment.

The SECRETARY. In the same paragraph, on page 80, line 3, before the words "per cent," it is proposed to strike out "35" and insert "50."

The PRESIDING OFFICER. The question is on agreeing to the amendment of the committee.

Mr. JONES of New Mexico. Mr. President, there are not many important amendments proposed to this paragraph by the committee, but I am inclined to call to the attention of the Senate the very great increases made in this paragraph by the House over the present law and concurred in by the Senate committee, in not proposing amendments to them.

Mr. SMOOT. The Senator has reference, I presume, to movements adjusted to different positions?

Mr. JONES of New Mexico. Yes.

Mr. SMOOT. Would it not be better to discuss that question when the Senator has an opportunity to offer the amendments he desires to offer?

Mr. JONES of New Mexico. I presume it will be.

Mr. SMOOT. I will say to the Senator that the provisions as to movements adjusted to different positions are new in this bill.

Mr. JONES of New Mexico. They are new; and, of course, there are great increases over the existing law.

Mr. SMOOT. That is true with reference to watches that are adjusted to different positions. The amendments to the paragraph, however, do not amount to much.

Mr. JONES of New Mexico. Mr. President, I believe on reflection that I shall not undertake to discuss the paragraph at this time. It is a very important paragraph and should be discussed at the time when we can propose amendments to the main provisions.

Mr. SMOOT. I agree with the Senator as to that.

Mr. JONES of New Mexico. But I believe I shall not discuss the matter now. The only amendment bearing upon rates in this paragraph relates to watchcases and to enameled dials for watches. The rate has been increased in each instance above the recommendations of the House, and, of course, they are greatly above the existing law. I do not believe that the change should be made, but I must say that the increases as to these items are not any more excessive than the increases in the case of watch movements themselves, and I presume it would do no good at this time even to offer amendments. From my examination of the subject I think we ought not to raise the duty any higher than the duty imposed by the present law, but it can all be handled when we come to consider the paragraph as a whole. So for the present I think I shall simply content myself with voting against the committee amendment.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment.

The amendment was agreed to.

The next amendment was, on page 80, line 6, before the words "per cent" to strike out "35" and insert "50."

The PRESIDING OFFICER. The question is on agreeing to the committee amendment.

The amendment was agreed to.

Mr. JONES of New Mexico. Now, Mr. President, I reserve a separate vote on the amendments in the paragraph when the bill reaches the Senate.

The PRESIDING OFFICER. The reservation will be made.

The next amendment was, on page 80, line 10, after the word "plates" to strike out "lever clock movements with jewels in the escapement."

The PRESIDING OFFICER. The question is on agreeing to the amendment of the committee.

Mr. JONES of New Mexico. I have no objection to that amendment. It merely adds a specific designation which is already in existing law.

Mr. SMOOT. The reason the words are stricken out here is that the proper provision is made in the next paragraph.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the committee.

The amendment was agreed to.

The next amendment was, on page 80, line 12, after the word "knocked," to strike out "down for reassembling," and insert "down."

The PRESIDING OFFICER. The question is on agreeing to the committee amendment.

The amendment was agreed to.

The next amendment was, on page 80, line 13, after the word "manufacturer," to insert the word "or purchaser."

The amendment was agreed to.

The next amendment was, on page 80, line 14, after the word "or," to strike out "die-sunk" and insert "die sunk."

The amendment was agreed to.

The next amendment was, on page 81, line 3, after the word "movements," to insert "including lever clock movements,"; in line 7, after the word "time," to insert "distance, or fares,"; in line 12, after the word "down," to strike out "for reassembling"; in line 16, before the words "per cent," to strike out the figures "35" and to insert "50"; and on page 82, line 3, before the words "per cent," to strike out "40" and to insert "55," so as to read:

PAR. 368. Clocks and clock movements, including lever clock movements, and clockwork mechanisms, cased or uncased, whether imported complete or in parts, and any device or mechanism having an essential operating feature intended for measuring time, distance, or fares, or the flowage of water, gas, electricity, or similar uses, or for regulating or controlling the speed of arbors, drums, disks, or similar uses, or for recording, indicating, or performing any operation or function at a predetermined time or times, any of the foregoing whether wholly or partly complete or knocked down (in which condition they shall be appraised at the valuation of the complete article); cases and casings for clockwork mechanisms imported separately; all the foregoing, 50 per cent ad valorem; and in addition thereto, upon any of the foregoing articles or parts thereof, having jewels, but not more than two jewels, in the escapement, $1 each; having more than two but not more than four jewels, $2 each; having more than four jewels, $4 each; if without jewels in the escapement and valued at not over $1.10 each, 35 cents each; valued at more than $1.10 and not more than $2.25 each, 70 cents each; valued at more than $2.25 but not more than $5 each, $1 each; valued at more than $5 but not more than $10 each, $2 each; valued at more than $10 each, $3 each; all parts and materials for use in any of the foregoing if imported separately, and not specially provided for, 55 per cent ad valorem.

Mr. JONES of New Mexico. Mr. President, I feel regarding this paragraph just as I did with regard to the preceding one. There are a number of rates put in here by the House and concurred in by the Senate committee which, of course, can not be modified upon this consideration of the bill; and I believe it better to permit the discussion of the entire paragraph to go over until it is reached in the regular order of considering the text of the bill. I shall, therefore, simply vote against the committee amendments on line 16, page 81, and line 3, page 82.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the committee.

The amendment was agreed to.

The next amendment was, on page 82, line 3, after the word "all," to strike out "dials," and to insert "dials, whether attached to movements or not, when imported, shall have indelibly painted, printed, or stamped thereon the name of the country of origin"; in line 8, after the words "of the," to strike out "maker" and to insert "maker or purchaser, the name of," and in line 12, after the word "name," to insert "or trademark," so as to make the proviso read:

Provided, That all dials, whether attached to movements or not, when imported, shall have indelibly painted, printed, or stamped thereon the name of the country of origin, and the front or back plate of the movement frame of any of the foregoing when imported shall have the name of the maker or purchaser, the name of the country where manufactured, and the number of jewels, if any, indelibly stamped on the most visible part of same; but if such markings are in whole or in part sufficiently similar to the trade name or trade-mark of an established American manufacturer as to be liable to deceive the user in the United States, entry thereof shall be denied if such trade name or trademark has been placed on file with the collector of customs.

The amendment was agreed to.

The next amendment was, on page 82, line 18, after the word "chassis," to insert "motor cycles"; in the same line, after the words "parts of," to strike out "automobiles," and to insert "the foregoing"; and in line 19, after the word "tires," to insert "all of the foregoing whether finished or unfinished"; so as to read:

PAR. 369. Automobiles, automobile bodies, automobile chassis, motor cycles, and parts of the foregoing, not including tires, all of the foregoing whether finished or unfinished, 25 per cent ad valorem.

Mr. SIMMONS. Mr. President, I presume the amendment of the committee striking out all after "*Provided*" will be agreed to. I shall offer no objection to it myself, and if that is agreed to it is probable that I shall offer no objection to the other changes made in the paragraph. So I am willing to take a vote now, if the Senator from North Dakota desires it, upon the committee amendment beginning with the word "*Provided*."

Mr. TOWNSEND. We have not reached that yet, have we?

Mr. SIMMONS. We are on paragraph 369, as I understood, "automobiles, automobile bodies," and so forth.

Mr. SMOOT. The Senator has no objection to inserting there "motor cycles," has he?

Mr. SIMMONS. No; I have no objection to that amendment, and I have no objection to the amendment striking out "automobiles" and inserting the words "the foregoing." or the amendment inserting "all the foregoing whether finished or unfinished." I think we might just as well vote on those amendments. The matter of rate is not involved, and of course that can be acted upon, in case we desire to offer an amendment to it, when we have finished the committee amendments.

The PRESIDING OFFICER. The question is upon agreeing to the amendment of the committee.

The amendment was agreed to.

The next amendment was, on page 82, line 20, after the words "ad valorem," to strike out:

Provided, That if there be imported into the United States any of the foregoing articles manufactured in or exported from any country which imposes a duty greater than 25 per cent ad valorem upon similar articles exported from the United States, there shall be levied, paid, and collected upon such articles a duty equal to the duty imposed by such country upon such articles imported from the United States, but not to exceed in any case 50 per cent ad valorem.

Mr. McCUMBER. Mr. President, before that is agreed to I think it is fair that I should state that the question of countervailing duties has not yet been definitely settled by the committee; and while it has been cut out in this and the following paragraph and in some other paragraphs, I do not want it understood that the committee intends to be precluded from reporting countervailing duties to some amount on some of these articles. They have not yet agreed, however, as to just under what circumstances and at what rates they will advocate countervailing duties. I think the proper thing is to have a general countervailing paragraph covering the specific articles to be brought under the countervailing duty, and limited to those.

Mr. SIMMONS. I have not read this proviso very carefully; but, as I understand, this proviso is that if any country shall charge more than 25 per cent on our exports, then you want a countervailing duty to cover such additional amount?

Mr. McCUMBER. We have stricken out all of that for the present.

Mr. SIMMONS. That is what this proviso says.

Mr. McCUMBER. Just what the provisions of the countervailing paragraph may be, I do not want to say at this time.

Mr. SIMMONS. The Senator does not want to strike that out at this time?

Mr. McCUMBER. Yes; I want to strike it out.

Mr. SIMMONS. Very well; I am satisfied either way.

Mr. TOWNSEND. Mr. President——

Mr. McCUMBER. If the Senator from Michigan wants to pass that for the present, I have no objection.

Mr. TOWNSEND. I do not want to discuss it now. I am very much in favor of this countervailing duty on automobiles. In fact, I am much more in favor of it than I am of any specific duty. The most that I care about is that this country shall treat other countries with reference to automobiles the same as those countries treat us with reference to a tariff; so I do not want this amendment adopted now until I know what countervailing provision the Senator from North Dakota will present. When that comes in I shall be prepared to consider this matter.

The PRESIDING OFFICER. Without objection, the amendment will be passed over. The Secretary will state the next amendment of the committee.

The next amendment was, on page 83, at the beginning of line 5, before the words "30 per cent," to strike out "thereof" and to insert "of the foregoing," so as to make the paragraph read:

PAR. 370. Airplanes, hydroplanes, motor boats, and parts of the foregoing, 30 per cent ad valorem.

The amendment was agreed to.

The next amendment was, on page 83, line 6, after the word "bicycles," to strike out "motor cycles, and finished parts of bicycles and motor cycles, 30," and to insert "and parts thereof, not including tires, 45," so as to read:

PAR. 371. Bicycles, and parts thereof, not including tires, 45 per cent ad valorem.

Mr. SIMMONS. Mr. President, as I understand this amendment, the proviso is stricken out, it being a proviso very much in the nature of the one we have just discussed in connection with paragraph 369; and nothing is left in the paragraph by the committee except the words "bicycles, and parts thereof, not including tires, 45 per cent ad valorem," as a substitute for "30 per cent," proposed by the House; so that the only effect of the committee amendment, outside of the proviso—which I presume the committee will want to consider further in this case, as in the other case—is to change the House duty from 30 to 45 per cent upon bicycles.

Now, I wish to ask a question of the Senator from North Dakota, who, I understand, is in charge of this paragraph.

The Senate committee proposes to raise the tariff on bicycles from 30 to 45 per cent. I should be very glad to have the Senator from North Dakota advise us as to why he thinks this heavy increase in the rate on bicycles should be made. The present law provides for 30 per cent. The House provided for 30 per cent.

Mr. McCUMBER. All I can give the Senator now is the statement that, as I understand, about 90 per cent of these articles consist of labor, and only about 10 per cent of raw material, and they are being manufactured to a considerable extent in Germany. While the importations, as stated, are not heavy at this time, with the great labor difference it was thought by the Committee on Ways and Means that 30 per cent upon the American valuation was necessary. That is equivalent to about 45 per cent upon the foreign valuation. While that may not be necessary to-day, I think it will be necessary before the end of the year.

Mr. SIMMONS. I do not know what the Senator has in mind when he says that a different situation with reference to the importation of bicycles may be presented during the present year. In connection with these rates, we hear a great deal about what is going to happen unless something is done to prevent it from happening. That is a very unsafe and unsound way of legislating, upon mere prophecy, upon apprehensions of the maker as to a livelier competition and an increase in importations.

If the Senator has any substantial reason which he could give to the Senate to show that there is a prospect of a very serious change in the present international traffic, so far as we are concerned, in automobiles, which is likely to take place in the future, imperiling the industry in this country, I would like very much to have him state what it is, so that we can weigh it, and ourselves pass judgment upon whether it is sufficiently important, or whether the information is of a sufficiently certain and definite character to justify us in imposing taxes upon the people of this country in anticipation of it.

I assume it would hardly be contended that under present conditions of imports there is any reason why the duty upon bicycles should be raised from 30 to 45 per cent. That is a tremendous jump. The present rate seems to have been very effective in protecting the American producer, so far as the facts which we have from the record show.

The production of bicycles in 1914 was 398,899 machines, valued at $5,361,230. The output in the year ended August 31, 1918, was estimated by the War Industries Board as 507,207. The production of bicycles in 1919 was 470,675, valued at $12,277,341.

During the period from 1914 to 1919 the bicycle industry again showed rapid growth, much greater than that of the motor cycle. The total value of the products of the bicycle industry was $22,234,000 in 1914 and $53,000,000 in 1919.

Mr. SMOOT. That includes motor cycles.

Mr. SIMMONS. No; it says the bicycle industry. The imports of bicycles increased up to the time of the war; they were chiefly from England, but a portion came from Germany.

The imports in 1914 of bicycles and finished parts were valued at $205,062, a mere fraction. The values of the imports of bicycles and finished parts thereof for 1918 were $3,920, for 1919 they were $10,953, for 1920 they were $48,193, and for the nine months of 1921 they were $38,695. So that there was a material falling off from 1920 to 1921.

Mr. SMOOT. It would be about the same.

Mr. SIMMONS. The exports of bicycles, tricycles, and so forth, in the fiscal year 1918 amounted to $1,366,747, and in 1914 to $608,931. I will skip a part of this, because part of it relates to bicycles and part to motor cycles.

The exports of bicycles, tricycles, and so forth, for the calendar years 1918 to 1921 have been valued as follows:

1918	$1,540,920
1919	3,234,915
1920	4,725,643
1921 (nine months)	1,353,234

Here we have a $52,000,000 production, an exportation ranging from one and a quarter millions to one and three-quarter millions in 1920, and three millions in 1919, with imports in the two latter years of $48,000 in 1920 and $38,000 in nine months of 1921.

Evidently the importations up to this time have cut no figure at all. They are absolutely negligible. They need not be considered. The duty carried in the present law has been practically prohibitive, and now, upon the suggestion that some very radical change in the conditions of production, exportation, or importation is anticipated, I do not know which, we are asked to increase this rate 15 per cent.

Mr. McCUMBER. If the Senator will be satisfied with 30 per cent, I think we can cut that from 45 to 30. It is 25 per cent under the present law. Thirty per cent would, of course, be but 5 per cent above that.

Mr. SIMMONS. While I would not say that I would be satisfied, as I would prefer the 25 per cent rate, if it is proposed to cut it from 45 to 30, I am willing that a vote shall be taken without further discussion.

Mr. McCUMBER. I move, then, that "45" be stricken out and "30" be inserted in lieu thereof.

The VICE PRESIDENT. The question is on agreeing to the amendment of the Senator from North Dakota.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The next amendment was, on page 83, line 8, after the words "ad valorem," to strike out the following proviso:

Provided, That if there be imported into the United States any of the foregoing articles manufactured in or exported from any country which imposes a duty greater than 30 per cent ad valorem upon similar articles exported from the United States, there shall be levied, paid, and collected upon such articles a duty equal to the duty imposed by such country upon such articles imported from the United States, but not to exceed in any case 50 per cent ad valorem.

Mr. McCUMBER. I would like to pass that amendment over, as we will take it up with the previous one of like character which was passed over.

The VICE PRESIDENT. The amendment will be passed over.

The next amendment of the committee was, in paragraph 372, page 83, line 17, to strike out "15" and to insert "20," so as to read:

Steam engines and steam locomotives, 20 per cent ad valorem.

Mr. JONES of New Mexico. Mr. President, I am inclined to think that this paragraph may be referred to as the colossal mistake of the bill, because of the largeness of the articles referred to and the amount of the industry. I can not conceive that the paragraph received any careful consideration. I realize that some very important amendments have been pro-

posed, and undoubtedly they were deliberately put in there, but the first amendment is to increase the duty on steam engines and locomotives from 15 per cent to 20 per cent.

The production of steam engines and locomotives in this country is something stupendous, both in material and in value. We export steam engines and locomotives to the farthest corners of the earth. The imports are nothing to be considered. The same thing may be said regarding a number of these other items. This paragraph includes machinery of various kinds. I think I shall read the paragraph in the bill, so as to get it into the RECORD in a consecutive way.

I may state that at the present time there is a duty of 15 per cent on steam engines, steam locomotives, printing presses, and machine tools; and on embroidering machines and lace-making machines, including machines for making lace curtains, nets, or nettings, there is a duty of 25 per cent ad valorem. Under the existing law sewing machines, cream separators valued at not exceeding $75, whether imported in whole or in part, are free.

Now, here is the proposal as it comes from the committee:

PAR. 372. Steam engines and steam locomotives, 20 per cent ad valorem; sewing machines, and parts thereof, not specially provided for, valued at not more than $75 each, 25 per cent ad valorem; valued at more than $75 each, 40 per cent ad valorem; cash registers, and parts thereof, 25 per cent ad valorem; printing presses, not specially provided for, lawn mowers, and machine tools and parts of machine tools, 35 per cent ad valorem; embroidery machines, including shuttles for sewing and embroidery machines, lace-making machines, machines for making lace curtains, nets, and nettings, 30 per cent ad valorem; knitting, braiding, and insulating machines, and all other textile machinery or parts thereof, finished or unfinished, not specially provided for, 50 per cent ad valorem; all other machines or parts thereof, finished or unfinished, not specially provided for, 30 per cent ad valorem: *Provided*, That machine tools as used in this paragraph shall be held to mean any machine operating other than by hand power which employs a tool for work on metal.

Mr. President, as I said, I think that is one of the colossal mistakes of this bill. In 1914 steam locomotives, valued at $46,968,144, were manufactured in 33 establishments, and all other steam engines, valued at $30,498,638, were manufactured in 243 establishments, making about $77,000,000 in 1914 of steam engines and steam locomotives. The value of all steam engines made in 1919 was $72,047,000.

I call attention now to the imports of locomotives. I find that they have not amounted to as much as $100,000 in the last four years for any year, and in the first nine months of 1921 amounted to $20,050. The domestic production was about $77,000,000; yet it is proposed to increase the duty on locomotives, which we export to every country in the world which is able to buy a locomotive.

Mr. WILLIAMS. Mr. President, will the Senator pardon me a moment?

Mr. JONES of New Mexico. I am glad to yield to the Senator.

Mr. WILLIAMS. Has there been a single instance during this time of even one locomotive being imported?

Mr. JONES of New Mexico. I find that there was probably one during the year 1921, of a value of $20,050.

Mr. WILLIAMS. Suppose there had been six locomotives imported in the United States?

Mr. JONES of New Mexico. I am afraid, according to the views of the committee, it would have created consternation in the industrial life of America.

Mr. WILLIAMS. I thought it would. Suppose there had been 12, we would have had a panic, would we not?

Mr. JONES of New Mexico. Very likely.

Mr. WILLIAMS. Twelve locomotives imported into America creating a panic, and yet the Senator from New Mexico tells me there was but one imported.

Mr. JONES of New Mexico. Causing the Congress of the United States, both the House and the Senate, to take up time deliberately to increase the tariff on the importations of locomotives.

Mr. WILLIAMS. But, my dear Senator, can you not understand that even if one locomotive came in American industry would be threatened in a most pungent style?

Mr. JONES of New Mexico. I am beginning to realize that fact. I have listened to just such statements as that here day after day, and whenever anything shows up as coming toward the United States apparently there is great disturbance in the minds of all of the Senators on the opposite side of the Chamber.

Mr. WILLIAMS. But does not the Senator as an ignorant Democrat—and, of course, all Democrats are ignorant—realize that the invasion into our shores of one locomotive means a potential destruction of all American industry in the locomotive business?

Mr. JONES of New Mexico. Not only that, but that one locomotive is liable to run wild in this country and kill some of our people.

Mr. McCORMICK. Some of the Democrats, for instance.

Mr. JONES of New Mexico. Yes; doubtless they are very considerate of the Democrats and keep that locomotive from killing the Democrats in the United States.

Mr. WILLIAMS. I hope so. However, does not the Senator realize when it comes to the question of the protection of "American industry"—from the smallest industry to the highest—that the only way to protect it completely is to keep out any sort of foreign importation? Does not the Senator know as well as I do that if the Republican theory is correct there is no way of responding to it except by keeping out all importations? Does not the Senator know that if we keep out all importations, that would stop one-half of the foreign commerce, and after about 10 years it would stop the other half?

Mr. JONES of New Mexico. I have been getting some light on that subject here during the discussion of the bill. On yesterday at least one Senator said he was in favor of an embargo tariff. Others have not been quite willing to make the confession; but if they properly designate or use the right nomenclature in connection with their acts, it seems to me there are a great many who are in favor of an embargo tariff at this time. Of course, that means that nothing shall come in here which is produced at all in the United States.

Mr. WILLIAMS. In competition with anybody else on the surface of the earth.

Mr. JONES of New Mexico. Certainly.

Mr. WILLIAMS. That would include everything except tea and coffee, would it not?

Mr. JONES of New Mexico. Yes; and a few spices from Arabia.

Mr. WILLIAMS. And under the present prohibition law, alcohol, as well as some spices and things of that sort. Does not the Senator from New Mexico feel ashamed of himself while he is standing here pretending to defend the foreign producers of products that might possibly be imported into the United States as against somebody in the United States who might possibly, at five or ten times the cost to the consumer, produce the same articles and sell them on our market? Does not the Senator feel ashamed of himself?

Mr. JONES of New Mexico. I must confess to a degree of humiliation for trying to defend anything in connection with the bill or opposing anything in it. There has been some modification of the bill thus far, but there seems to be a determination to put it through.

Mr. WILLIAMS. I want to ask the Senator from New Mexico another question, and I intend this to be a Dick-nailer. Does not the Senator know that the duty of every nation on earth is to produce at its own expense everything that it needs and not to pay for it at its ports at the expense of its people, even if it costs them ten times as much to produce as it does to import it from a foreign nation? Does not the Senator know that the great American ideal is that we must sew our own shoes and sew our own hats, and do everything else, no matter how much it costs, and no matter how cheaply the pauper labor of Europe or Asia or Africa may furnish them to us?

Mr. JONES of New Mexico. That doctrine, I think, has been virtually announced here a number of times.

Mr. WILLIAMS. But does the Senator deny it?

Mr. JONES of New Mexico. The statement has been made here from the beginning that we should not produce any surplus of anything in this country; that if we are engaged in a business which will result in the production of a surplus, we shall desist from that occupation and seek some other. That doctrine was announced here in the very beginning of the discussion of the bill. It was distinctly stated upon the floor of the Senate that the wheat growers of the country should not produce any surplus, and if they were producing a surplus should quit growing wheat and grow flax. If we apply that doctrine to the business of the country generally, we will have no surplus of anything to export and, of course, having no surplus to export we could not afford to buy anything that other nations might want to send in here.

Mr. WILLIAMS. But, if the Senator will pardon me for just a moment longer, if we could reach the ideal condition or status where we do not produce any surplus, and were absolutely and industrially independent of all the balance of the world, why should we stand here as an ordinary southern or western fool Democrat, contending that we ought to produce a surplus?

Why should we have a surplus? If a man can get along well enough upon what he has already produced, without a surplus or anything to sell outside of the family, why should he have a surplus or anything to sell outside of the family?

Mr. JONES of New Mexico. I presume if I were to stay here long enough in the discussion of this bill I might become converted to that doctrine.

Mr. WILLIAMS. The Senator from New Mexico knows as well as I do that the old original Henry Clay protective doctrine is that we ought not to have a surplus and that we ought not to sell anything to foreign nations, because if we did they might sell something to us, and that if they sell anything to us that threatens our very life. The Senator from New Mexico ought to know that, if he does not know it.

Mr. JONES of New Mexico. As I have said, I may be converted to that doctrine.

Mr. WILLIAMS. It is a doctrine very highly commendable in the sanctum sanctorum of the Republican stand-pat theologians of this moment, including the Senator from Massachusetts [Mr. LODGE], who seems to have temporarily deserted this arena, for fear that he might have to oppose some of the provisions of this bill.

Mr. JONES of New Mexico. If this bill becomes a law it will, in great measure, force upon this country precisely the conditions suggested by the Senator from Mississippi.

Mr. WILLIAMS. Those were happy conditions that I suggested.

Mr. JONES of New Mexico. They are happy in the minds of some.

Mr. WILLIAMS. Well, "some" are all.

Mr. JONES of New Mexico. The Senator means in the minds of Senators on the opposite side of the Chamber?

Mr. WILLIAMS. No; I do not; but I mean that when we make some—comparatively few—people happy and highly prosperous at the expense of all, who sacrifice nothing in the world but the humble consumers and buyers of products, that spells very high statesmanship; and the Senator from New Mexico ought to know that.

Mr. JONES of New Mexico. I have been listening to that doctrine here for some time.

Mr. WILLIAMS. And the Senator is not yet converted?

Mr. JONES of New Mexico. I have not yet been converted to that doctrine.

Mr. WILLIAMS. The Senator from Utah [Mr. SMOOT] ought to have converted the Senator from New Mexico to that idea long ago.

Mr. JONES of New Mexico. If this bill becomes law, we shall have a most wonderful opportunity to experience the benefits of that kind of doctrine.

Mr. WILLIAMS. That is true; and, by the way, I want to warn the Senator from New Mexico against one thing. Of course, America is going to recover as, of course, England, Scotland, and Wales are going to recover, from the present depressed conditions; but I want to warn Senators that after those countries have recovered, the Senator from Utah [Mr. SMOOT], possibly, and the Senator from Indiana [Mr. WATSON], very certainly, will come in and tell us, "It is because of the new tariff law we have passed." Of course, the world is going to recover from its present depressed condition; it can not help it, if it is given peace long enough, but we will be told just a little later on that it all came about because of the enactment of the pending tariff bill.

I want, however, to call attention to the fact that the old Republicans, history repeating itself, said, "The rise in the price of wheat in this country was owing to the election of McKinley"; but I reckon the Senator from New Mexico remembers that McKinley's election was owing to the rise in the price of wheat about two months before he was elected, and that the rise in the price of wheat kept up. So I want to impress upon Senators, if I can, now speaking seriously, the idea that nobody must go bankrupt upon the future prosperity of the United States.

The United States are going to prosper; they are going to prosper because of their population, their invention, their advention, their courage, their industry, their vigilance, and their intelligence. So do not sound the keynote that maybe this fool bill may destroy prosperity. It can not do so; prosperity is coming anyway; but the passage of the bill will scotch the wheels so much that the prosperity we shall hereafter enjoy will be a very small measure in comparison with the prosperity we should have enjoyed if this bill had never been passed. This bill can scotch and will scotch the wheels of industry, but it can not destroy the progress of the wagons.

Do not forget the second program lie of the Republican Party—I put into the RECORD this morning the proof from the New York Tribune, the par excellence Republican newspaper of this country, of its being a lie—that the prosperity has already set in and is going forward. I do not want the Republican Party again to repeat what they stated in 1897, attributing to a piece of legislation a prosperity that was owing really to the advention, the invention, the industry, and the vigilance and the individuality of the American people.

Mr. President, there is not a possible condition under which the American people can be held down in industry for five years. Whether there be war or peace, conditions will improve a little, but if we have peace long enough my constituents and the Senator's constituents, armed with the original race virility and the individuality of the pioneers of whom we are the descendants, will boost things to a point where there will at least be no panic and no depression. What I am trying to do with the Senator from New Mexico and other Senators now is to cut off the second program lie of the Republican Party, which will be, after we reach a stage of comparative prosperity, no matter whatsoever laws we have, that it is owing to this Republican tariff measure.

As I have said, I put in the RECORD this morning the proof from the New York Tribune that we already are starting ahead. We do not need any law of any description to make prosperity.

I beg the Senator's pardon for the camouflage and the badinage in which I have indulged, but I did not see any other way of reaching the point.

Mr. JONES of New Mexico. Mr. President, I thank the Senator very sincerely for his words of wisdom. He has grown grayer than I have in the service of his country and has handled in detail many of the questions with which we are now wrestling.

Mr. WILLIAMS. I do not like that gray-haired reference. However, I will not interrupt the Senator.

Mr. JONES of New Mexico. I am glad to listen to his words. We have been discussing this bill now for some weeks; a few changes have been made in it, and I agree with the Senator from Mississippi that even this bill is not going to destroy the United States. This country is going to progress.

Mr. WILLIAMS. So are Great Britain, Scotland and Wales, and all other branches of the English-speaking people.

Mr. JONES of New Mexico. Yes, every hard-working, intelligent people will progress. In my judgment, as barriers to our progress rise we will either surmount them or cast them aside; but we shall have a different kind of prosperity if this bill shall be enacted from what we would have if it were not enacted.

If this bill shall pass, we will see the vast earnings of this country become concentrated more into the hands of a few; we will still listen to the recital of the enormous amount of income taxes that some particular sections of the country pay more than other sections pay. That will be dinned into our ears more and more in the years to come. We will still have protests from certain sections of the country that we should levy a sales tax and put the burden of government upon the mouths and backs of the consumers of the country. That is what is going to follow the passage of a bill of this kind. Fortunes will be built up; and from them will come the organized propaganda and protest against paying the expenses of the Government with an income tax, and they will want a sales tax to put the burden upon those who are least able to bear it. The system which has been built up in this country will be greatly augmented by reason of the passage of this bill.

Mr. WILLIAMS. Mr. President, I agree completely to all the Senator has said. This tariff bill will be a scotch in the wheel of the car of progress, and a very great scotch, too, but it will not be sufficient to turn the car backward. It will be sufficient, however, to halt its acceleration. That, however, is not all. I agree with the Senator that if this bill shall pass there will be great impetus given to the idea that poor people ought to be taxed more and rich people ought to be taxed less. If there is anything in this bill that means anything, it means that.

I do not hold a brief for the poor or for the rich. As once I said on this floor I thank God that I am neither rich nor poor, but as between the two, when taxation comes, it ought to fall heaviest upon those who are able to bear it. This bill shifts taxation from those who are best able to bear it to those who are least able to bear it; and if the sales tax should prevail, it would shift nearly all taxation to those who are least able to bear it.

I did not intend to be really funny at the Senator's expense; I meant to be sort of—what shall I call it?—quizzical. But really, Mr. President, I should like to utter about two more sentences, and then I will relieve the Senator from further interruption.

If there is anything in the world that is absolutely and clearly a truism, it is that a tax upon commerce is a burden upon commerce and is a cost to the consumer, and that when any parliament or Congress in the world puts an increased tax upon foreign commerce it means that it has the intent, at any rate, to decrease the volume of foreign commerce. That may or may not be the effect, depending upon the degree of intelligence with which the men who have contemplated the effect have worked. Luckily for the American Union, the men who have contemplated the effect as a rule were Republican successors of old Federalist tariff men, and did not completely

understand the economical condition, and now and then they failed in effecting their purpose; but their purpose always was to decrease the volume of international commerce, and their method of decreasing it was to raise the price to the American consumer to the level of a high profit price for the American producer. That is all there is to it. There can not be anything else to it.

I do not care a cent about the duty upon saws, and I do care a cent about the duty upon shotguns. Of course, I know that when you put a duty upon shotguns you decrease the commerce in shotguns; and, if I heard the Senator from North Dakota correctly when he was arguing that question, his main reason—or one of his reasons, at any rate, whether a main reason or not—for putting a duty upon shotguns, *was* to decrease the sale of shotguns to people who had no business having shotguns.

Mr. McCUMBER. Mr. President, I do not want to take the Senator from Mississippi off his feet at all, but I should like to ask a question of the Senator from New Mexico.

Mr. WILLIAMS. I yield for that purpose. I reckon I have the right to yield.

Mr. McCUMBER. I thank the Senator. I have to leave the Chamber in a moment, and that is the reason why I want the attention of the Senator.

The Underwood bill places a duty of 15 per cent ad valorem upon these engines. The Senator's arguments indicated that he thought that we were putting it on for protection.

I do not think protection is at all necessary. I think the 15 per cent did not bring us in very much revenue, but we put it at 20 per cent. That was 5 per cent greater than the rate of the Underwood bill, and both of them, if they are justified at all, in my opinion, are justified only as a revenue measure; and it is only a question then whether it should be 15 per cent ad valorem or whether it should be 20 per cent. I should not seriously object to letting it go back to the 15 per cent rather than the 20 per cent if the Senator thinks the little 5 per cent takes it out of the category of being a very good rate and makes it an abominable and outrageous rate.

Then, on the question of sewing machines, may I just say this, as the Senator alluded to that:

The ordinary sewing machine in the United States, in my opinion, does not need any protection whatever, but I admit that sewing machines can be manufactured cheaper outside of the United States. That is, I admit that the Singer Sewing Machine Co. can manufacture a sewing machine in Europe—I think they have a factory in Germany, and one in Scotland—cheaper than the American independents can manufacture in the United States.

Mr. JONES of New Mexico. My latest information about it is that they have closed up the German factory and are now manufacturing all their machines in this country for export.

Mr. SMOOT. Oh, they have not closed their plant in Scotland at all.

Mr. McCUMBER. They have not closed up the others; and the testimony that was given at least shows that they can produce a sewing machine cheaper abroad by that cheaper labor, and then bring in their machine and sell it in competition with the American-manufactured machine. The only purpose of the 30 per cent ad valorem was to measure at least the difference in what we regarded as the cost to the American—not the foreigner, the American—of manufacturing his product in Europe and then bringing it over here free, as against a much higher wage scale in the United States.

Mr. WILLIAMS. Mr. President, as I understand the Senator from North Dakota, he is afraid that Americans composing an American corporation doing business in Germany or Scotland may possibly furnish the sewing women of America, who, as a class, are very poor, with a cheaper machine than the American sewing machine company could furnish it.

Mr. McCUMBER. No; let me correct the Senator right there—that they will sell their machines for the same price as their competitors, and they will not reduce it a penny, but they will make more money out of it by manufacturing it abroad with cheaper labor and bringing it in here and then selling it, not in serious competition but selling it at the same price that the other sewing-machine factories sell their machines.

Mr. WILLIAMS. Mr. President, if I understand the Senator now, he says that an American corporation, or rather a corporation composed of Americans, doing business in Germany, engaged "not in serious competition" with the American corporation doing the same business here and producing the same product, can sell the machine cheaper to the women who are working by the hour, by the day, by the minute, almost, in the great cities of the United States. Of course, if these women can buy their sewing machines cheaper, they will make more profit upon the product which hitherto they have turned out, or else can turn out more product at the same profit.

Mr. President, what sort of an argument is that? It is that Americans who have taken stock in a foreign corporation can, by producing sewing machines abroad, sell them cheaper than other Americans who, in a corporation in the United States, are making exactly the same machines here. What is the odds? Why should you or I favor the American in a corporation here, against the Americans in a corporation elsewhere, providing he is making the same machine, of the same excellence, at the same cost, and of the same efficiency?

Why, Mr. President, what has the poor girl to do with that—the poor girl who is running a sewing machine in New York or Chicago, in a sweatshop or in an upper office, in the twelfth story of some place, while she is merely making her thread meet the cost of her bread? What have you and I to do with that, except, perhaps, if we are live human beings, to help the girl or the woman who is doing that sewing? If she can get the machine cheaper, she can make more profit out of the same price for her labor, or else she can reduce the price of her product and make the same profit with more volume of trade; one or the other.

Oh, Mr. President, there is one human being that is neglected. It is not even the "ultimate" consumer; it is the middle consumer, the medial consumer, and in this particular case it is the poor girl that is working the machine—widow, wife, or daughter, standing halfway between respectability and prostitution—and we can not help her, because we want the American stockholders of the American company to have an advantage over the American stockholders of the German or Scotch company, or a foreign company of some description; I do not know whether it is German or not. I did not quite catch the argument of the Senator from North Dakota. He said "foreign," at any rate. I did not know whether it was German-foreign, or Scandinavian-foreign, or French-foreign, or Belgian-foreign, or Scotch-foreign; but, above all things, let us beware of the foreigner. The Senator from Idaho [Mr. BORAH] is not in his seat now, or else he would admonish me to beware of the foreigner, the hated, barbarous foreign individual of some description or other. We must not buy his things, and we must not sell him our things. We must have nothing to do with him. We are "the chosen children of Israel" in a commercial sense, and so we will keep out "the gentiles and the heathen" from afflicting us with their cheap products.

Mr. President, did you ever think of what afflicting a people with cheap products means? It is worth mentally dwelling on for just a few minutes before I verbally dwell upon it. Afflicting a people with cheap products, or "flooding" them with something cheap that they want! How in the name of God are you going to hurt a people by "flooding" them with something cheap that they want and which they have to buy from somebody somewhere, at home or abroad?

Mr. President, this whole fallacy grows out of the idea that there is such a thing as German trade with America, and American trade with France, and English trade with Germany, and so on. There is no such thing. There never was any such thing. No government ever traded with another, except the modern soviet government in Russia, which has tried to trade with other governments, and could not do it. There is no such thing as national commerce internationalized. SMOOT, of Utah, trades with CUMMINS, of Iowa, and CUMMINS, of Iowa, trades with WILLIAMS, of Mississippi, and Hans Jacobs in Germany somewhere, perhaps at Mannheim, trades with each of us, and Jean Jacot, somewhere down about Bordeaux in France, trades with Hans Jacobs and with us three; but the nations do not trade at all. Adam Smith long ago destroyed the idea that there was any sense in "the balance of trade." All that a balance of trade means is that somebody pays somebody else for products in gold, and the only reason why he pays in gold is because the products are worth more to him than the gold is, and the only reason why the other fellow sells is because the gold is worth more to him than the products are. That whole foolishness was destroyed a hundred years ago; and yet here you are, as representing the legal legatees of the original American Federalist Party and English Mercantile Party, so-called "intelligent parties of America and England," and you are still talking in 1922 about "the balance of trade," and you are still talking about whether you are going to get gold or products in exchange for what you need to sell.

If you get products, it is because you prefer products. If you get gold, it is because you prefer gold. You will not sell for gold unless you think your product is worth it, and you will not swap gold for the product unless you think the product is worth it. Here we are talking still in the twentieth century, substantially, about "the balance of trade," and substantially

about the idea that some human being in the world somewhere can produce everything he wants and everything he needs with a slight surplus, and sell it to the balance of the world without buying anything from the balance of the world. It seems absolutely ridiculous that anybody would hold such a view in the twentieth century, after the Great War, which brought the world so close together that one airplane could circumnavigate it in 12 days. It would be so excessively ridiculous that the man who discussed it would be ridiculous no matter which side of it he discussed, except for the mental pretensions of the so-called "Republican" Party.

How are you going to help commerce by taxing commerce? How are you going to help foreign commerce by taxing foreign commerce? I hear somebody say, by improving domestic commerce. But how? Simply at the expense of the man who buys the product of domestic commerce; in other words, at the expense of the consumer.

All men and all women and all children are consumers. Hardly any of the children are producers; very few of the women are. Most of the men are not producers of more things than they are consumers, because every man must eat and wear clothes, and every man must buy the necessaries of life. So you are protecting the Government upon the idea of taxing the great generality of men, women, and children of your country for the benefit of the so-called producers of particular products.

Many seem to be obsessed with the idea of this country being "flooded" with foreign products. Suppose they did flood us with the cheap products of all the world. Could you make me buy foreign products unless I wanted them? Could you make me buy them unless it was to my interest to buy them? Could you make me buy them unless my wife and children and I needed or thought we needed them?

Fools just took the word "flood" in order to indicate something destructive. They would "flood us with foreign products." Mr. President, I would like to see the American people flooded with every valuable thing they want at the lowest possible price. That is the sort of flood I would welcome. That is the sort of flood that would help the women and children, as well as the men. Flood us; overflow us; inundate us. Inundate us with cheap clothes. Inundate us with cheap food. Inundate us with cheap mechanical tools. Inumdate us with everything cheap we want, that we are really praying for every day, and that we need in our business. My prayer is, that we may be "inundated" with things of value cheaper than our profiteers can make them.

The VICE PRESIDENT. The question is on agreeing to the committee amendment.

Mr. SIMMONS. I do not know what the committee amendment is. I understood the Senator from North Dakota to make some suggestion about reducing the rate proposed.

Mr. JONES of New Mexico. Mr. President, a great many people, I am sure, are interested in this paragraph, and I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The principal legislative clerk called the roll, and the following Senators answered to their names:

Ball	Frelinghuysen	McCumber	Sheppard
Borah	Gooding	McKinley	Simmons
Brandegee	Hale	McLean	Smith
Bursum	Harris	Newberry	Smoot
Calder	Jones, N. Mex.	Nicholson	Spencer
Cameron	Jones, Wash.	Oddie	Sutherland
Capper	Kellogg	Overman	Townsend
Cummins	Kendrick	Pepper	Walsh, Mass.
Curtis	Ladd	Phipps	Warren
Edge	La Follette	Poindexter	Watson, Ind.
Elkins	Lenroot	Pomerene	Williams
France	McCormick	Rawson	

The PRESIDING OFFICER (Mr. JONES of Washington in the chair). Forty-seven Senators have answered to their names. There is not a quorum present. The Secretary will call the names of the absentees.

The principal legislative clerk called the names of the absent Senators.

Mr. SHORTRIDGE, Mr. CARAWAY, Mr. MCNARY, and Mr. HARRISON entered the Chamber and answered to their names.

The PRESIDING OFFICER. Fifty-one Senators have answered to their names. There is a quorum present.

Mr. SMOOT. Mr. President, I ask that the committee amendment on page 83, line 17, be disagreed to.

The PRESIDING OFFICER. The amendment will be stated.

The PRINCIPAL LEGISLATIVE CLERK. On page 83, line 17, the committee proposes to strike out "15" and insert "20," so as to read:

Steam engines and steam locomotives, 20 per cent ad valorem.

The amendment was rejected.

The next amendment of the Committee on Finance was, on page 83, in line 18, after the words "ad valorem," to insert:

Sewing machines, and parts thereof, not specially provided for, valued at not more than $75 each, 25 per cent ad valorem; valued at more than $75 each, 40 per cent ad valorem; cash registers, and parts thereof, 25 per cent ad valorem; printing presses, not specially provided for; lawn mowers and—

And after the word "tools," in line 24, to insert:

35 per cent ad valorem—

So as to read:

PAR. 372. Steam engines and steam locomotives, 15 per cent ad valorem; sewing machines, and parts thereof, not specially provided for, valued at not more than $75 each, 25 per cent ad valorem; valued at more than $75 each, 40 per cent ad valorem; cash registers, and parts thereof, 25 per cent ad valorem; printing presses, not specially provided for, lawn mowers, and machine tools and parts of machine tools, 35 per cent ad valorem.

Mr. SIMMONS. Mr. President, under the present law sewing machines are on the free list. I had hoped that in the mad rush of the manufacturers to get higher protection for their products, to the end that they might not only maintain certain high prices in this country but that they might be given an opportunity further to increase those prices without any risk of foreign interference, they would not go this far. I do not know who asked for this duty of 25 per cent on sewing machines.

I do not know any reason why it should now be proposed to take the sewing machine of the poor women of the country, the machine with which they are enabled in many instances to make the things necessary to defray their living expenses, to make clothes for their children and save and economize in that direction, and place upon it what would ordinarily be considered a very, very high tariff. Of course now, when we are levying duties ranging all the way up to 200, 300, and even 500 per cent, duty of 25 per cent does not seem to be very much. It sounds very insignificant, but in former times, when we were making tariffs, even when we were making the Payne-Aldrich tariff, 25 per cent sounded like a pretty high duty. It is more than the average duty under the present law, and it is not very far below the average duty under the Payne-Aldrich law. Speaking with reference to other high tariffs, it is a very high duty. Speaking with reference to the rates in the pending bill, it could not be called one of the high duties, but it adds 25 per cent to the cost of the poor woman's sewing machine. I had hoped that the manufacturers of the country, in their mad rush to get additional protection and increased prices to swell their already excessive profits, would not lay their hands upon this little household implement.

Mr. President, it is a very simple story, one that ought to be told to the country. I have to go to the free list to find the data about this item. It has been bodily lifted from the free list, from paragraph 1541, and put into paragraph 372 along with steam engines, printing presses, machine tools, and parts of machine tools.

The House did not do this, Mr. President. In the House of Representatives, closer to the people than the Senate is supposed to be, yet yielding very largely to the demands for more and still more, higher and still higher protection, demands that nearly everything that is produced in this country should be protected against the foreigner by a wall sufficiently high to make it impossible for him to scale it, they did not lay the hand of desecration upon this humble little machine which means bread and better clothes to the women and the children of the country, a thing that gets nearer to the 110,000,000 of people in the country than any other instrument which is made by the hand of man.

This little machine has driven the wolf from many a humble home. This little machine has enabled many a poor woman, stitch by stitch, late in the hours of the night, to make it possible for her children, when they went to school or to church, to make a reasonably presentable appearance. I say it is the last thing upon which the vandals of protection ought to have laid their sacreligious hands.

The House knew better than we know, because its membership is closer to the people than we are. They knew what this machine meant to the poor people of the country. If those men who prevailed upon the majority of the committee of the Senate to do this thing appealed to the Members of the House, they in their humanity said, "Nay, thus far and no further."

So far as the House was concerned, the sewing machine was left upon the free list, where, in God's name, it ought to remain; where, in the name of humanity, it ought to remain; where, in the name of the poor little underfed and underclothed children of the people, it ought to remain.

I honor the House of Representatives that they had the strength and the love for mankind and sufficient sympathy with the poor people of this country to say "nay," if the demand was made there, as it seems to have been made in the Senate

before the Committee on Finance, where there seem to have been no such barriers of human sentiment and human sympathy.

Mr. President, we shall show that the American producer of this little machine is in no danger from foreign competition; that there has practically never been any importation of this product into this country; that, on the contrary, we have sold these machines in every part of the world; that we produce them more cheaply, probably, than they are or probably can be produced anywhere else in the world. Yet, when we show those facts, not by statements of interested persons but by the statements of officials of this Government, who are sworn to impartiality in the ascertainment of facts connected with the tariff, we shall be told, as has been forecast in the statement made by the Senator from Utah [Mr. SMOOT] across the aisle from me, that, while all that is true, while there is no condition now existing which would require any protection, even if this were an article for which protection would otherwise be justified—and there are no importations and therefore no ground for either a protective tariff duty or a revenue duty—there is reason to believe that some capitalist in this country contemplates establishing, in Russia or somewhere else where it is claimed labor is very cheap as compared with American labor, factories for the manufacture of these machines, and that if that shall be done, if no duty be levied upon this article to offset the cheaper labor in the foreign country, these machines will be imported here and they will drive the American producer out of the market.

Mr. President, there has not been a day for the last 50 years when the very thing which these gentlemen say is likely to happen and is now in contemplation could not have been done just as well as it may be done if this article is put upon the dutiable list. It has been free all the time.

Never has any Congress of the United States, however strong the pressure was upon it, ventured to place a duty upon this little machine. If it can be made so much cheaper somewhere else than it can be made here, why has it not been done heretofore? What is there in the present conditions of things to make it more probable that American capital will now go abroad and manufacture these machines instead of manufacturing them here at home than there has been at all times in the past?

Mr. President, from the very beginning of the framing of this tariff bill there have been advanced all sorts of invented and concocted pretexts, some plausible and some foolish, in the hope of deceiving Congress and inducing the enactment of laws imposing duties that would enable the American manufacturers and profiteers to advance their prices and increase their profits. Most of those pretexts have been exploded. Some of them were, too, so silly to be addressed to the intelligence which ought to characterize the representatives of the Government in the greatest legislative assembly in the world; but the pretext which is now advanced to induce the Senate to take this little machine off the free list and impose a high duty of 25 per cent upon it is one which, to my mind, ought not to appeal to the good common sense of any Senator.

In the first place, Mr. President, what mandate have we from the people to levy tariff duties based upon conjectural conditions? What is the mandate under which the Republican Party is operating in acting on this bill? Properly construed, it is that tariff taxes shall be levied to equalize the difference between the cost of production here and abroad. That cost of production must be ascertained. It should be scientifically ascertained. How is the cost of production of an industry in another country going to be ascertained before that industry is established? How is the difference going to be measured? If a plant to manufacture these machines shall be established in Russia and, as it is said, cheap Russian labor shall be employed to operate that plant, what reason have we to know or to suppose that the Russian laborer, who is generally a peasant and who has not been trained in the art of manufacturing as the operatives in the American factory have been trained, will be able to turn out as much work as the efficient American who has been trained in the sewing-machine factories of this country, perhaps, from the time he was a boy?

Some individuals interested in cotton mills in my section of the country on one occasion conceived the idea of locating a cotton plant in China, where they were told that labor was so exceedingly cheap as compared with that which they employed in the home factories, and they ventured to try the experiment. They invested large sums of money in the erection of a splendid plant, and equipped it with up-to-date machinery, and they employed Chinese workmen; but, Mr. President, the result of the venture was that, while the Chinamen did not expect or receive anything like the same compensation demanded by the American workmen, the cost of production in the Chinese mill was greater than the cost of production in the American mill.

Are we to assume that because a Russian peasant possibly is willing to work for a little less or much less than the American who has been trained to labor in the sewing-machine factories of this country his labor will be as efficient or that the labor of five Russians or even 10 Russians will turn out as much of the product as the labor of one man would turn out in this country. It is all speculation. It is speculation where we ought to have a scientific ascertainment of the facts.

Again, Mr. President, aside from the speculative feature as to whether these machines could be made as cheaply in Russia as they can be made here, what right have we to assume, when the gentlemen who are seeking this high duty upon this humble machine of the working women come here and tell us that American capital is going over there to establish these factories, that they intend it? Is not the more reasonable conclusion that they are telling that story for the purpose of securing duties upon this product?

But it is said it is not the sewing-machine man in this country who is going to establish factories in foreign countries, but it is somebody else. We have learned that capital is considering doing that, and the sewing-machine people come here and tell us that we ought to put this duty on for their protection in case it is done.

Mr. President, when an industry is confronted by the fact that under conditions which have long existed the sentiment of the people, which has developed from time immemorial, will not permit a duty to be imposed upon this machine, it is very natural that these people when they come and ask for this rate of duty should advance a pretext of this kind; and we have a right to question it.

But even if something of that character is in contemplation, even if these factories may be established in some other country than this, the fact does not exist to-day. It is a mere matter of conjecture. It is a mere matter of prophecy. It is a thing that may happen and may not happen, and when it happens we do not know what the consequences are going to be with reference to a lower cost of production; and deliberately to impose a tax upon this machine upon this conjectural, this prophesied, this predicted condition of affairs, would be, to my mind, an abuse of the power of legislation which has been bestowed upon the Congress of the United States.

But, Mr. President, enough about that. I want now to present some of the facts of the present situation; and I do insist, and I insist most vigorously, and I am deeply in earnest about it, that when we legislate, imposing taxes upon the people, we have no authority to impose them except upon conditions that exist. We have no authority to assume that a condition may hereafter exist, and then to draw our inferences, without proper evidence that if that condition ever exists it would be disastrous to the American producer.

Coming now to the present conditions with reference to this industry, production is shown for 1914 and 1919 as follows:

Sewing machines are mentioned together with a number of other machines. In 1914 the production was $21,710,000; in 1919, $48,946,000.

The imports for 1914 are not given; but in 1919, when the domestic production was $48,946,000, the imports of sewing machines into this country amounted to $225,000. In the same year the exports of sewing machines amounted to $12,774,000. That is the case, Mr. President; and I am only going to repeat the figures to emphasize the statement, and then I am going for the present to drop the discussion.

In 1919 there was a production of practically $49,000,000. In 1919 there were exports of $12,774,000. In 1919 there were imports of $225,000; and yet the committee, in those conditions, proposes to take from the free list and place upon the dutiable list this little machine, which always has been free, which no party and no Congress ever before dared to think of putting upon a dutiable list, which the House refused to touch. In these conditions the majority of the Senate committee lift this item from the free list, where it was born and has been reared and developed—developed to the point where we supply the world with its sewing machines, developed to the point where we have actually absolutely excluded from our shores the foreign product. With this history running through the years of our great development and of the world's development, without there ever being a time when the American producer was ever in jeopardy for a minute as the result of foreign competition, with this unbroken history and with these basic facts staring us in the face, brought up to date, with no competitor yet in the world that can even so much as make a contest with us for the American market, when, as a matter of fact, I reckon, there is but one American producer of this article—I think it is one of our big trusts; they have never had any competition in the market between themselves; their prices have been high—

with these facts before us, it is now proposed to make the prices even higher. Mr. President, the very proposition smells to heaven.

Mr. McCUMBER. Mr. President, the Senator from North Carolina seems to have forgotten his history as well as his figures.

The Senator has reiterated again and again that these articles have always been upon the free list. Why, Mr. President, they have never been upon the free list, except for the years of the Underwood tariff bill, since we began to make sewing machines. Under the Dingley bill they came in under the basket clause, and under that clause there was a 45 per cent ad valorem duty. Under the Payne-Aldrich bill the duty was 30 per cent, and then under the Underwood bill they were put upon the free list. All the developing period of these great manufacturers was during the time of protection. They grew enormously, the product enormously increased, and the price enormously decreased during the period of the very highest protection.

The Senator says we have no right to assume that there will be any danger of any importations from any source if we should not place a tariff duty upon this product. First, I want to read from the Tariff Commission's report, and then I should like to present for the thoughtful consideration of the Senator from North Carolina some of the facts relative to this matter.

The report says:

> The sewing machine has been developed by American manufacturers after years of experimentation and considerable expense in perfecting a standard-type machine. After the sewing machine had been developed to a very high degree in respect to performance the protected patent rights expired. With these rights no longer protected—

And I should like the ear of the Senator—

> Germany began the manufacture of sewing machines, copying the American product. This situation immediately placed German and other foreign manufacturers upon an even footing with American manufacturers in respect to the quality and standardization of the product. The foreign manufacturers adopted American machinery and American methods of manufacture and employed American superintendents, all of which made it possble for them to produce a sewing machine equal in every respect to the American standard machine. American capital is also engaged in operating sewing-machine factories in some foreign countries.
>
> There is a considerable amount of capital invested in this industry. * * * This has since been increased. * * *
>
> The importation of sewing machines increased from $53,000 in 1911—

Under a 30 per cent ad valorem duty—

> to $109,000 in 1913. After the duty was removed, the imports for 1914 amounted to $586,945, which was over five times that of the previous year. Imports decreased during the war.

What did this mean, Mr. President? It meant that in nine months there was imported over half a million dollars' worth of these machines immediately they went upon the free list, and then came the war, and the war alone saved the independent American industry. There was one American manufacturer, the Singer Sewing Machine Co., which could have withstood the onslaught, because they had their factories in Germany, they had their factories in Russia, they had their factories in Scotland, and when the American wages went up they could easily, from the lower wage of these countries, bring in their products.

This duty is imposed for two purposes: First, to protect against the foreign factories, foreign owned; secondly, to protect against the American factories owned in a foreign country.

Let us see the operation. The evidence shows that the standard American machines are retailed at from $30 to $75 apiece. They are sold by the Singer Sewing Machine Co. for the same price at which the other eight companies sell the comparable article, there being nine competing manufacturers in the United States. Let us take a machine which costs each of the factories in the United States $20. In Scotland or Russia it will cost, we will say, 30 per cent less—that is, about $6 less. It is produced, then, in Scotland or in Russia, for about $14. The Singer Sewing Machine Co., if American wages are too high, brings over these $14 machines, and one would think from the hogshead of tears shed by Senators on the other side that the American sewing woman would get a cheaper machine.

Senators know better, Mr. President. Every man knows better who knows anything about the trade. They will sell in this country for the same old prices; they will not go down a penny. If the Singer Sewing Machine Co. brings in its $14 article, that sewing-machine company, which produces 80 per cent of the American product, is not going to compete with its own products, is it? Any man who has judgment knows that is an impossibility.

If the Singer Sewing Machine Co. wants to go over to Berlin or Soviet Russia and, with the cheap labor there, produce a machine that costs them two-thirds or one-half what it costs their competitors or themselves to produce in the American market, then for Heaven's sake let them pay a little something for bringing it into this country.

Not only should we have our American capital first employed in America but it is idle for us to talk about keeping out foreign labor and at the same time importing the product of that foreign labor and having it imported by a company that also employs American labor, but will not reduce the product in price to the consumer one penny by reason of the importations.

Mr. SHORTRIDGE. Mr. President——

The PRESIDING OFFICER. Does the Senator from North Dakota yield to the Senator from California?

Mr. McCUMBER. I yield with pleasure.

Mr. SHORTRIDGE. I listened very attentively to the remarks of the Senator from North Carolina and I thought I understood him to say that this machine had never been on the protected list, that it had always been on the free list. I so understood him to state.

Mr. McCUMBER. I called the Senator's attention to that error.

Mr. SIMMONS. The Senator called my attention to that.

Mr. SHORTRIDGE. I wanted to be sure that I now understood the Senator from North Dakota; I wanted to be sure as to which Senator was right.

Mr. SIMMONS. Mr. President, the great Senator from South Carolina who used to occupy this seat, Senator Tillman, was in my State making a speech, and in the course of his speech he referred very feelingly to a man who had been found guilty of committing an unmentionable crime, and he spoke of him as being dead, and continued to so speak of him. Finally somebody in the audience hallooed out, "Why, Senator, the man is in jail; he is not dead." Senator Tillman said, "You do not tell me that man is alive! I would assume that he was dead." Without indorsing that sentiment of the Senator from South Carolina as to that particular incident, I will say that I did not examine very closely the Payne-Aldrich law with reference to this item, but I would assume it were on the free list in the present law. If it was not on the free list, it ought to be on the free list; and I assumed that no party in this country had ever been so forgetful of its duty to humanity as to put that article on the dutiable list.

Mr. McCUMBER. And I assumed just the contrary, and my assumption happened to be right and the Senator's wrong; and my assumption as to the effect of free trade, even in sewing machines, is right and the Senator's is wrong. The Senator assumes that if we leave this article upon the free list, the Singer Sewing Machine Co., manufacturing 80 per cent of the sewing machines in the United States, is going to bring in something in competition with its own products, and then sell its own products at a lower price. It has had many opportunities for a great many years to do that, but it has failed to do it so far, and I am inclined to think that it will continue its practice of failing to do so.

Mr. SIMMONS. Mr. President, the Senator now misrepresents me. My contention was that if these manufacturers had gotten up this story about these factories that were to be established abroad and come in competition with them, it was gotten up for the purpose of inducing and persuading the Finance Committee to give them a protective rate upon their products, so that they might advance their present prices without fear of foreign competition.

Mr. McCUMBER. Mr. President, the Singer Sewing Machine Co. has not asked for any protection. I do not know who gets up the stories for the Senator from North Carolina. I am not interested in that, but I am interested quite often in statistics and an attempt to derive some conclusion from them. In looking over the statistics of importations of sewing machines, and the effect of a free trade policy, I find that in 1910, under the Payne-Aldrich law, in which the rate was 30 per cent ad valorem, we imported $76,964 worth of these machines. In 1911 we imported $52,776 worth; in 1912 we imported $70,146 worth; in part of 1913 we imported $108,947 worth; in 1914, after the Underwood-Simmons law became effective, we imported $516,945 worth, and in 1915 we imported $516,947 worth, notwithstanding the war. I will say that out of this $516,000 which came in that year very many of them were the products of the Singer Sewing Machine Co., produced in foreign countries.

Now we come to the period after the war. In 1918, the last year of the war, there were $98,245 worth imported, and most of them came in from Scotland and the other countries where the Singer Sewing Machine Co. had their factories.

In 1919 the importations jumped to $225,000 worth; in 1920 they jumped to $346,000 worth, and in 1921, notwithstanding

everything else had decreased, the importations increased to $398,495 worth.

The Tariff Commission report says that all these factories abroad have all the varieties of machinery we have in the United States, they have the same standardization, they can practice the same economies, and they have labor at from one-fifth to one-tenth the cost of the American labor. I believe they will be able to import if it is to their advantage, and I believe the time is coming when it will be to their advantage to become important exporters of their products to the United States.

Mr. SIMMONS. Mr. President, if the Senator will pardon me for an interruption, as I expect to leave the Chamber in a minute, I want to call his attention to the fact that the imports in 1916, 1917, and 1918——

Mr. McCUMBER. During the war, of course, they were very light. During that time, while the imports were very low, the exports were increasing.

Mr. SIMMONS. For none of those three years were the imports in excess of $100,000, while the imports during the last full year of the operation of the Payne-Aldrich law, namely, 1913, were $108,000.

I want further to call the attention of the Senator to the fact that notwithstanding his statement that this industry had developed under the Payne-Aldrich rate in the year 1914, which was the first year of the operation of the present law, the production in this country was only $21,000,000, while in 1919, under the same law, the production had increased from $21,000,000 to $48,000,000, showing that in the first five years of the operation of the present law the production of these machines in this country more than doubled what it was at the time of the enactment of that law.

Mr. McCUMBER. And of course the Senator argues that the Underwood-Simmons law caused it to expand. The Senator is an honest man, and he is a man of good judgment. He knows the enormous market Germany had over the world prior to the war for her German machines. He knows that there were immense quantities being manufactured, and he knows that as soon as the war began Germany lost all her markets and we took them all, and as we took all her markets we enormously increased our output to take care not only of our own trade but of the Russian and German and practically all of the European trade, and of course there was an enormous increase.

Now, Mr. President, what I tried to show particularly here was that it was not going to make any difference in the cost of the American machine. I do not think even if Germany should come in and should supply half of the machines used in the United States that she could sell her product any cheaper than the American manufacturer is selling his to-day. If we will look through nearly all the imports from Germany, we will find that she sells ordinarily close up to the American selling price. Very naturally what she wants is American gold. She needs all she can get. She needs every penny she can get out of her exports, and she is not going to cut the price at the present time when she can get good prices for her products. She is not going to cut her own throat. What she may do in the future is entirely a different question, because it may be to her advantage in some lines to destroy her competitor, but it is not to her advantage to do that to-day.

I want to read a little from the testimony. This is from the testimony of one of the independent manufacturers, who said:

> The plants of these companies are American owned and operated and located in the United States, with the exception of one branch assembly plant located in Canada.
>
> Under the Payne-Aldrich bill family sewing machines were afforded protection by a tariff of 30 per cent ad valorem, which was removed in 1913 by the Underwood bill, which placed family sewing machines on the free list.
>
> Shortly thereafter German manufacturers, who number two and one-half the number of American sewing-machine manufacturers, with one and one-half times the output, instituted a campaign for business in this country and would have supplanted American family sewing machines and ruined our industry, owing to their ability to greatly undersell us in our own markets by reason of much lower cost of production, but for the intervention of the war just as they were getting started.
>
> We now ask that our product be taken from the free list and that a minimum duty of 30 per cent, based on American valuation, be levied on family sewing machines, in whole or in parts, including repair parts.

That was not granted, but they were given a duty of 30 per cent on the foreign valuation.

> This will partially offset the great advantage held by German sewing-machine manufacturers on account of lower labor costs, and will yet place them on a fair and equitable basis of competition with ourselves.
>
> Senator SMOOT. The highest importation of sewing machines into the United States, I see, is $100,304, and at the same time there were exportations of $7,793,718.
>
> Mr. HUFFMAN. I think those figures are substantially correct, Senator. The reason for that is that we were enjoying the protection of the Payne-Aldrich bill of 30 per cent.
>
> Senator SMOOT. That is after the Payne-Aldrich bill.
>
> Mr. HUFFMAN. Well, before the Germans could take advantage of the freedom provided under the Underwood bill the war intervened and German machines were not brought into this country in any quantity.
>
> Senator CURTIS. Are they bringing many in at this time?
>
> Mr. HUFFMAN. No; not at this time.
>
> Senator SMOOT. Your largest export of sewing machines was, as I said, $7,793,718, and that was in the year 1918?
>
> Mr. HUFFMAN. Yes, Senator, and the reason for the large exportation at that time was that Germany and Scotland, which are the two great producing nations on sewing machines, were prevented from exporting by reason of the war, which left the market open to the American manufacturers, and they exported during that period in large quantities. There was a great opportunity for American export during the war.
>
> Senator MCCUMBER. What does the ordinary family sewing machine sell for in this country now?
>
> Mr. HUFFMAN. It sells to-day at from $30 to $75. There are some that are offered at special bargains for less than that, but the standard prices will run from $30 to $75.
>
> Senator MCCUMBER. And if a duty of 30 per cent were given, would that raise the price of them to the American user?
>
> Mr. HUFFMAN. No, sir; I could see no reason why it should, Senator.
>
> Senator MCCUMBER. Is there any competition here in the United States between the several companies that manufacture them?
>
> Mr. HUFFMAN. There is a great deal of competition in the sewing-machine industry; more than in any I know of.

Further on he said:

> It must be understood that I am in no way speaking for the Singer Sewing Machine Co., whose situation is entirely different from that of the manufacturers I represent, in that the Singer Co. has factories in Germany, Scotland, and Russia. We do not know what their attitude is on the tariff subject, but we would assume they favored being on the free list.
>
> Senator SMOOT. Did they put a plant in France, do you know?
>
> Mr. HUFFMAN. I do not know that they have; I have never heard of it, sir.
>
> We would think they would be opposed to a duty for the reason that they could shut down their plants in America and continue to supply the American market with machines made in their German factory and in their Glasgow, Scotland, plant, employing the lower-priced German or Scottish labor, and bringing the machines into this country and selling them in the place of the machines made in American factories by American workmen. As a matter of fact, large quantities of Singer foreign-made machines are being sold on the American market, and at no saving to the American consumer.

This is the point I want to make—

> at no saving to the American consumer over the price of the American-made machine.

I think that is enough to indicate, first, that we need protection and shall need it in the future; second, that the protection which we have will not, at least in the immediate future, add one penny to the price of the machine; third, that it will exact revenue from the Singer Sewing Machine Co. if they desire to bring over a cheaper made machine and sell it in this country for the same price as those manufactured in this country.

Mr. UNDERWOOD. Mr. President, I have listened with a great deal of interest to the defense of one of the great trusts of America that has been made by the chairman of the Finance Committee. I think if there is an indefensible tax in the bill it is that found in this paragraph—building tariff walls to defend the Sewing Machine Trust and a cash-register trust.

You may amass your figures until doomsday sounds, and you can never convince the final jury which must consider this question that the Singer Sewing Machine Co. is not a trust and that the National Cash Register Co. is not a trust. They control the markets here and abroad in these articles.

Mr. McCUMBER. They are the ones who want free trade.

Mr. UNDERWOOD. Yes; but they testified, and the Senator just read the testimony, that they thought they needed a tariff.

Mr. McCUMBER. Not the Singer, by any means.

Mr. UNDERWOOD. Oh, well, Mr. President, I had hoped that his experience as a member of the committee would have opened the Senator's eyes to the fact that a trust never appears in person. Their agent and tools are always put forward to testify for them when tariff bills are under consideration.

Referring now to the item of the sewing machines, everybody knows that the Singer sewing machine dominates the American market. There are other sewing-machine companies, but they follow the price set by the trusts. The only competition they fear is from the trust itself. More than that, the sewing-machine trust long before the present law was written had established its factories throughout the globe, building its own factories in foreign countries, exporting its own goods in enormous quantities into the fields of the world; and then it hides behind the cloak of war conditions and says it can not compete with Germany. Germany!

This is the most indefensible tariff bill that ever looked the American people in the face. There never was a tariff bill written since James Madison presented the first one to the American people that was more of a synonym for trust-made goods and a surrender to special interests than the bill which is now presented to the Senate, and no item in it is more indefensible than the item which the Senate at this hour has under consideration.

These men had gone for years into the markets of the world and competed in the open market with Germany and England and every other country that made these goods, and they are doing it to-day where they can find markets that will purchase their products.

Mr. STANLEY. Mr. President——

Mr. UNDERWOOD. I yield to the Senator from Kentucky.

Mr. STANLEY. I do not like to interrupt the Senator, but I want to ask him a question. My understanding is that the genesis of the American patented machine production in foreign countries was due to the fact that the goods were being sold in vast quantities for much less in foreign countries than in this country after paying import duties in many of those countries. It was established with reference to the Harvester Machine Co., the Singer Sewing Machine Co., the Domestic Machine Co., as to agricultural implements and all that sort of thing, that in order to escape the import duty and in order to cover up this thing that created such a howl of indignation on the part of the American consumer they established their American patented-machine shops and factories at enormous cost in foreign countries. But the Senator knows better about that than I do.

Mr. UNDERWOOD. Mr. President, this organization, as has been admitted on the floor of the Senate, has more than doubled a great business in the last five years. The idea of saying that it accomplished that result simply because Germany went out of business! Germany has no such business to surrender. If the American concern had gained all the foreign trade in sewing machines which Germany gave up, it would not have anywhere nearly approached the great maximum of increased production that their own statistics show.

There are some items, Mr. President, on which taxation may justly rest, because it neither burdens the taxpayer nor unjustly discriminates against his rights, but there are some taxes that no Government is justified in levying. No justification may be found for a proposal to build a tax wall in the interest of protecting a trust, and it has just been stated that the proposed tax of 25 per cent on sewing machines which are worth less than $75 and 30 per cent on those worth more than that is for protection. For protection to what? To protect one of the greatest trusts and monopolies in America.

Who are the buyers of their products—at least, so far as the family sewing machine is concerned? They are not those who dwell in the homes of the rich. The rich as a rule have their sewing done somewhere else. It is in the humble homes of the poor that these machines are purchased. The woman who must raise her own children and make their clothing in the sweat of her face is to pay tribute to this soulless trust under the sacred name of protection to American industry.

Mr. President, if I felt that I must wring blood money out of the American people in order that the business in which I was engaged should survive, I had rather have my own business perish than to go into partnership with a combination to loot the poor of America. That is all the defense that can be made when an unnecessary tax is levied.

As to importation, these sewing-machine people have their own factories strung around the world. If they want to frighten the Finance Committee or the Ways and Means Committee they can send importations into this country by the thousands. In all probability, due to war conditions, lack of money, inability of people to purchase, they did send to this country, certainly temporarily, the overproduction of their foreign factories back to the best consuming market in the world—the American market—for the remainder of the world has but little money to pay for even the necessities of life. That is not a normal condition; it is an abnormal condition.

Does anybody say that the Singer Sewing Machine Co., or other sewing machine companies, are threatened with bankruptcy? No. Does anybody say they are going out of business? No. Has anybody said they have stopped production, awaiting the enactment of a protective tariff? No. They are here with the graft and the greed of every monopoly; the greed to wring dollars out of other men's pockets by the enactment of law; and in this instance they are here to wring the dollar out of the poor of America. If there is any one clause in this indefensible bill that deserves condemnation it is this particular clause.

Mr. STANLEY. Mr. President, there is one little incident which, in my opinion, should be called to the attention of the country. A short time ago the Secretary of War wrote a letter to the Vice President of the United States, who now occupies the chair, in which he mentioned the fact that a great number of patents—several hundred patents—which are essential to our national defense, were owned and controlled by the insidious emissaries of Germany, who were using the protection afforded by the patent laws of the United States to control instrumentalities essential to the operation of our railroad artillery, to the manipulation of great guns, and to the operation of airplanes; innumerable processes essential to the manufacture of explosives and poisonous gases; and that the national defense demanded an immediate amendment to the patent laws.

Having made some cursory examination of the matter, with the assistance of the War Department, I prepared a bill granting the relief requested by the Secretary of War. We were told, however, and told truthfully, that the bill as drawn should not be passed at this time, because of the fact that it would endanger the rights of certain American patentees in Germany.

The revival of a treaty which absolutely guaranteed to the Germans the control of our own guns, the operation of our own airships, the manufacture of our own explosives was demanded by Mr. Hughes in person, because, said Secretary Hughes, if we do not revive the treaty protecting these patent rights and subsequently remedy this evil by appropriate legislation we will endanger untold millions of property of American citizens who have valuable concessions in Germany; and there was no property mentioned by the Secretary more valuable than the Singer patents, and it was the Singer Sewing Machine Co. which made the loudest cry. They said, "We have millions and tens of millions of capital at stake in American patents in Germany, and if this treaty is not revived and the proposed act is passed, Germany can come in and take control of our patents; that to-day, notwithstanding the fact that Germany is making thousands and thousands of sewing machines, it is done under American patents and by American capital and American enterprise in Germany.

Sewing-machine plants were placed upon the Rhine in order to cover up the fact that they were selling to the Germans more cheaply than they were selling to the needy women of America. They knew that if that condition kept up much longer even the gorge of Republicanism would rise and they would lose this invaluable aid to monopoly—a protective tariff upon a trust-made article. And now the party that once talked about infant industries is absolutely protecting a grandmother trust against its own grandchildren in Germany. This is a tax to protect a big trust at home against a little trust planted abroad. This duty is the conclusive proof, not that the trusts can make the Republican Party subservient, but that they can, if need be, make the Republican Party ridiculous, if not contemptible, in the eyes of honest and discerning men.

Mr. JONES of New Mexico. Mr. President, I do not care to extend further the discussion regarding sewing machines, and I therefore move to amend the amendment of the committee by striking out on page 83, line 18, after the semicolon, the words "sewing machines and parts thereof," and so forth, down to and including the semicolon in line 21, so as to eliminate from the paragraph sewing machines of various kinds specified in that portion of the committee amendment. If the amendment be adopted it will leave the item on the free list or rather to be dealt with when we come to consider the paragraphs of the free-list schedule.

Mr. UNDERWOOD. Mr. President, I should like to ask the Senator a question. In the peculiar situation in which this paragraph is, it not being in the House bill, I am not sure, but I think the House bill left it on the free list, did it not?

Mr. JONES of New Mexico. It was on the free list in the House bill.

Mr. UNDERWOOD. Then it is the Senate committee which is responsible for putting it on the dutiable list.

Mr. JONES of New Mexico. The Senate committee takes sewing machines in the various brackets specified in the paragraph from the free list and puts them on the dutiable list.

Mr. UNDERWOOD. That is what I thought. So that only one branch of Congress is responsible so far for this indefensible act.

Mr. JONES of New Mexico. It is on the free list in the bill as the bill comes from the House of Representatives, and the Senate committee proposes to put it upon the dutiable list.

Mr. UNDERWOOD. I was going to suggest that under that peculiar state of facts, although on account of the agreement we can not move at this time to take an article from the tax list and put it on the free list, it seems to me in order at this time for the Senator to make that motion.

Mr. JONES of New Mexico. I think so. When we come to consider the paragraphs under the free list, then it can be specifically inserted; but we can strike it out from this amendment.

Mr. ROBINSON. Mr. President, if the Senator will pardon me, if the words "sewing machines" are stricken out of the

pending amendment, and then the Finance Committee amendment transferring them from the free-list paragraph is not agreed to, it will accomplish the same purpose.

Mr. UNDERWOOD. Yes; because they are on the free list as the bill came from the House.

Mr. ROBINSON. What we want to do is to disagree to both Senate amendments relating to the subject—the Senate amendment that puts a duty on it and the Senate amendment that takes it out of the free-list paragraph.

Mr. JONES of New Mexico. Mr. President, there are several different items put in the dutiable list here by reason of this committee amendment, and I think we should have a separate vote upon each one of these items. Therefore, I think my motion is a proper one to test the views of the Senate upon the question of sewing machines alone.

Mr. KENDRICK. Mr. President——

Mr. JONES of New Mexico. I yield to the Senator.

Mr. KENDRICK. I want to ask the Senator from New Mexico whether or not there is any duty on sewing machines in the Underwood law?

Mr. JONES of New Mexico. They were put upon the free list. Under the existing law they are on the free list, and the House left them upon the free list. Now the Senate committee proposes an amendment to this paragraph, transferring from the free list sewing machines, cash registers, and other items.

I therefore move to amend the committee amendment by striking out as I have indicated.

Mr. UNDERWOOD. Mr. President, I think this matter is of such grave importance that we should have a quorum here before it is voted on, because I think the Senate should decide whether it is going to sustain the Finance Committee or sustain the House of Representatives on this item.

I therefore suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The roll was called, and the following Senators answered to their names:

Ashurst	Frelinghuysen	McKinley	Shortridge
Ball	Gooding	McLean	Simmons
Brandegee	Hale	McNary	Smith
Bursum	Harris	Newberry	Smoot
Calder	Harrison	Nicholson	Spencer
Cameron	Jones, N. Mex.	Oddie	Stanley
Capper	Jones, Wash.	Overman	Sterling
Colt	Kellogg	Pepper	Sutherland
Cummins	Kendrick	Phipps	Townsend
Curtis	King	Poindexter	Underwood
Dial	La Follette	Pomerene	Wadsworth
Edge	Lenroot	Ransdell	Walsh, Mass.
Elkins	McCormick	Robinson	Warren
France	McCumber	Sheppard	Watson, Ind.

The VICE PRESIDENT. Fifty-six Senators have answered to their names. A quorum is present.

Mr. JONES of New Mexico. Mr. President, I simply want to call attention to the amendment which I proposed just before the call of the Senate.

Paragraph 1541, which is one of the paragraphs of the free list as it came from the House, included cash registers, linotype and all typesetting machines, sewing machines, typewriters, shoe machinery, and other items. It is my purpose, of course, if the motion should prevail to strike out the clause in paragraph 372 relating to sewing machines, when we come to consider paragraph 1541 not to agree to the committee amendment, and to leave sewing machines on the free list, where they are now.

With that understanding, I ask to have the amendment which I have proposed stated from the desk.

The VICE PRESIDENT. The amendment of the Senator from New Mexico to the amendment of the committee will be stated.

The ASSISTANT SECRETARY. The Senator from New Mexico proposes to strike out from the proposed amendment of the committee the following words:

> Sewing machines, and parts thereof, not specially provided for, valued at not more than $75 each, 25 per cent ad valorem; valued at more than $75 each, 40 per cent ad valorem—

And the semicolon.

Mr. JONES of New Mexico. Upon that amendment, Mr. President, I ask for the yeas and nays.

The yeas and nays were ordered, and the Assistant Secretary proceeded to call the roll.

Mr. BALL (when his name was called). Making the same transfer as on the last roll call, I vote "nay."

Mr. COLT (when his name was called). Making the same announcement as before, I vote "nay."

Mr. EDGE (when his name was called). Transferring my general pair with the Senator from Oklahoma [Mr. OWEN] to the Senator from Pennsylvania [Mr. CROW], I vote "nay."

Mr. HALE (when his name was called). Making the same announcement as before, I vote "nay."

Mr. JONES of New Mexico (when his name was called). I transfer my general pair with the Senator from Maine [Mr. FERNALD] to the Senator from Missouri [Mr. REED] and will vote. I vote "yea."

Mr. POMERENE (when his name was called). Announcing my pair with my colleague [Mr. WILLIS], I transfer that pair to the senior Senator from Nebraska [Mr. HITCHCOCK], and vote "yea."

Mr. STANLEY (when his name was called). I transfer my general pair with the junior Senator from Kentucky [Mr. ERNST] to the senior Senator from Texas [Mr. CULBERSON], and vote "yea."

Mr. UNDERWOOD (when his name was called). I transfer my general pair with the senior Senator from Massachusetts [Mr. LODGE] to the junior Senator from Rhode Island [Mr. GERRY], and vote "yea."

Mr. WATSON of Indiana (when his name was called). I transfer my general pair with the senior Senator from Mississippi [Mr. WILLIAMS] to the junior Senator from Vermont [Mr. PAGE], and vote "nay."

The roll call was concluded.

Mr. CURTIS. I desire to announce the following pairs:

The Senator from Vermont [Mr. DILLINGHAM] with the Senator from Virginia [Mr. GLASS];

The Senator from New Jersey [Mr. FRELINGHUYSEN] with the Senator from Montana [Mr. WALSH];

The Senator from New Hampshire [Mr. MOSES] with the Senator from Louisiana [Mr. BROUSSARD]; and

The Senator from Indiana [Mr. NEW] with the Senator from Tennessee [Mr. MCKELLAR].

Mr. JONES of Washington (after having voted in the negative). The senior Senator from Virginia [Mr. SWANSON] is absent. I have a pair with that Senator for the day, which I find I can transfer to the senior Senator from Minnesota [Mr. NELSON]. I do so, and allow my vote to stand.

Mr. MCKINLEY. I transfer my pair with the junior Senator from Arkansas [Mr. CARAWAY] to the junior Senator from New Hampshire [Mr. KEYES] and vote "nay."

The result was announced—yeas 23, nays 31, as follows:

YEAS—23.

Ashurst	Kellogg	Overman	Smith
Capper	Kendrick	Pomerene	Stanley
Dial	King	Ransdell	Townsend
Harris	La Follette	Robinson	Underwood
Harrison	Lenroot	Sheppard	Walsh, Mass.
Jones, N. Mex.	McCormick	Simmons	

NAYS—31.

Ball	Elkins	McNary	Smoot
Brandegee	France	Newberry	Spencer
Bursum	Gooding	Nicholson	Sterling
Calder	Hale	Oddie	Sutherland
Cameron	Jones, Wash.	Pepper	Wadsworth
Colt	McCumber	Phipps	Warren
Curtis	McKinley	Poindexter	Watson, Ind.
Edge	McLean	Shortridge	

NOT VOTING—42.

Borah	Frelinghuysen	Moses	Shields
Broussard	Gerry	Myers	Stanfield
Caraway	Glass	Nelson	Swanson
Crow	Harreld	New	Trammell
Culberson	Heflin	Norbeck	Walsh, Mont.
Cummins	Hitchcock	Norris	Watson, Ga.
Dillingham	Johnson	Owen	Weller
du Pont	Keyes	Page	Williams
Ernst	Ladd	Pittman	Willis
Fernald	Lodge	Rawson	
Fletcher	McKellar	Reed	

So the amendment of Mr. JONES of New Mexico to the committee amendment was rejected.

Mr. UNDERWOOD. Mr. President, I give notice that I shall reserve a separate vote on this item in the Senate, if necessary. I hope that when a vote is taken on the motion to take this article off the free list the Senate may reverse its action and sustain the vote of the House of Representatives, which, as the bill was sent to the Senate, left this particular item on the free list.

Mr. JONES of New Mexico. Mr. President, the suggestion has been made by a Senator that the motion might be more meritorious if limited to the machines which are used in the household, and that it might be advisable to have a separate vote upon that part of the committee amendment. In order to test the sense of the Senate relating to the common sewing machine not above $75 in value, I move to amend the committee amendment by striking out, on page 83, line 18, beginning with the words "sewing machines," the following:

> Sewing machines, and parts thereof, not specially provided for, valued at not more than $75 each, 25 per cent ad valorem.

Mr. SMOOT. Let me suggest to the Senator that if he wants to reach what I think he has in mind, he can do so by simply striking out, beginning with line 19, the language "valued at not more than $75 each, 25 per cent ad valorem." Then it would read:

Sewing machines, and parts thereof, not specially provided for, valued at more than $75 each.

Mr. JONES of New Mexico. I think the Senator from Utah is quite right about it. I accept his suggestion in the matter, and therefore move to amend, on line 19, by striking out the words "valued at not more than $75 each, 25 per cent ad valorem." It has been suggested that I state the effect of that. It will be simply to strike from the dutiable list the sewing machines which are commonly used in the households of the land. On this I ask for the yeas and nays.

The yeas and nays were ordered.

Mr. LENROOT. May we have the amendment to the amendment reported?

The VICE PRESIDENT. The Secretary will state the amendment to the amendment.

The ASSISTANT SECRETARY. On page 83, in the committee amendment, beginning on line 19 with the word "valued," strike out the words "valued at not more than $75 each, 25 per cent ad valorem," so that, if amended, the committee amendment will read:

Sewing machines, and parts thereof, not specially provided for, valued at more than $75 each, 40 per cent ad valorem.

The VICE PRESIDENT. The yeas and nays have been ordered, and the Secretary will call the roll.

The Assistant Secretary proceeded to call the roll.

Mr. COLT (when his name was called). Making the same announcement as before, I vote "nay."

Mr. HALE (when his name was called). Making the same announcement as before, I vote "nay."

Mr. JONES of New Mexico (when his name was called). Making the same announcement as to my pair and its transfer as on the previous vote, I ask that this announcement may stand for the remainder of the day, and I vote "yea."

Mr. JONES of Washington (when his name was called). Making the same announcement as before with reference to my pair and its transfer, I vote "nay."

Mr. McKINLEY (when his name was called). Making the same announcement as before, I vote "nay."

Mr. POMERENE (when his name was called). Making the same announcement as heretofore, I transfer my pair with my colleague [Mr. WILLIS] to the senior Senator from Nebraska [Mr. HITCHCOCK] and vote "yea."

Mr. STANLEY (when his name was called). Making the same announcement as before with reference to my pair, I vote "yea."

Mr. UNDERWOOD (when his name was called). I transfer my general pair with the senior Senator from Massachusetts [Mr. LODGE] to the junior Senator from Rhode Island [Mr. GERRY] and vote "yea."

Mr. WATSON of Indiana (when his name was called). Making the same announcement as before, I vote "nay."

The roll call was concluded.

Mr. EDGE. Making the same announcement as before, I vote "nay."

Mr. BALL. Making the same announcement as to my pair and its transfer, I vote "nay."

Mr. CURTIS. I desire to announce the following pairs:

The Senator from Vermont [Mr. DILLINGHAM] with the Senator from Virginia [Mr. GLASS];

The Senator from New Jersey [Mr. FRELINGHUYSEN] with the Senator from Montana [Mr. WALSH];

The Senator from New Hampshire [Mr. MOSES] with the Senator from Louisiana [Mr. BROUSSARD]; and

The Senator from Indiana [Mr. NEW] with the Senator from Tennessee [Mr. McKELLAR].

The result was announced—yeas 24, nays 31, as follows:

YEAS—24.

Ashurst	Jones, N. Mex.	McCormick	Simmons
Capper	Kellogg	Overman	Smith
Cummins	Kendrick	Pomerene	Stanley
Dial	King	Ransdell	Townsend
Harris	La Follette	Robinson	Underwood
Harrison	Lenroot	Sheppard	Walsh, Mass.

NAYS—31.

Ball	Elkins	McNary	Smoot
Brandegee	France	Newberry	Spencer
Bursum	Gooding	Nicholson	Sterling
Calder	Hale	Oddie	Sutherland
Cameron	Jones, Wash.	Pepper	Wadsworth
Colt	McCumber	Phipps	Warren
Curtis	McKinley	Poindexter	Watson, Ind.
Edge	McLean	Shortridge	

NOT VOTING—41.

Borah	Gerry	Myers	Stanfield
Broussard	Glass	Nelson	Swanson
Caraway	Harreld	New	Trammell
Crow	Heflin	Norbeck	Walsh, Mont.
Culberson	Hitchcock	Norris	Watson, Ga.
Dillingham	Johnson	Owen	Weller
du Pont	Keyes	Page	Williams
Ernst	Ladd	Pittman	Willis
Fernald	Lodge	Rawson	
Fletcher	McKellar	Reed	
Frelinghuysen	Moses	Shields	

So the amendment of Mr. JONES of New Mexico to the committee amendment was rejected.

Mr. JONES of New Mexico. I desire to reserve a separate vote upon this item in the Senate.

The VICE PRESIDENT. The question is on the entire committee amendment.

Mr. WALSH of Massachusetts. Mr. President, a parliamentary inquiry.

The VICE PRESIDENT. The Senator will state the inquiry.

Mr. WALSH of Massachusetts. Are we about to vote on the entire paragraph or only on the item dealing with sewing machines?

The VICE PRESIDENT. On the entire paragraph.

Mr. WALSH of Massachusetts. I move to strike out in lines 21 and 22 the clause which reads:

Cash registers, and parts thereof, 25 per cent ad valorem.

Mr. President, if there is an item in the bill that is indefensible it is this duty proposed to be levied on cash registers. Never before has there been any duty levied upon cash registers. They have always been upon the free list. Never before has there been any occasion for any duty upon cash registers, because there has existed in the United States a world monopoly in the manufacture of cash registers. For what reason has the Finance Committee of the Senate recommended this excessively high duty of 25 per cent ad valorem, equivalent to one-fourth the value of most cash registers, the average price of the cash registers purchased in America being about $400? Upon what ground can the committee justify this unusual item?

So far as I can discover from reviewing the evidence, one Mr. Howard, of the American Cash Register Co., located in Michigan, an independent company, appeared before the committee and stated that the National Cash Register Co., which is the largest producer of cash registers in the world, and which has an almost complete monopoly of the manufacture of cash registers, was about to build a factory in Germany, and that with cheap German labor and with the patents which the National Cash Register Co. possessed they would immediately flood the American market with cash registers made in Germany by this American trust.

That statement naturally would arouse attention, and was deserving of some examination as to its accuracy. So far as the record discloses, no examination was made. The statement was accepted as true; and without any other evidence but the statement of this one witness, representing one of the three independent companies which make a small number of cash registers in the country, the committee reports and recommends a duty of 25 per cent ad valorem, the very duty petitioned for by this rival and, naturally, self-interested company.

Now, the facts are that the National Cash Register Co. has a plant in Canada where it assembles cash registers from parts that are made in the United States. It has a factory in England, where it does repair work to its cash registers. It is enlarging a factory in Germany for the same purpose that has led it to build factories in Canada and England. As there was no effort made to examine into the accuracy of the testimony received by the committee, I telegraphed a few days ago to the National Cash Register Co. and asked them if they intended to build or make cash registers in Germany and export them to America. I have a letter from them, which I shall place in the RECORD later, asserting that they have no such purpose and that they have no such intention; that the reason why they are building a factory in Germany is to take care of their sales in Germany and in Europe and to compete with their German competitor. So much for that phase of the question.

There are few businesses that have developed so rapidly in this country and been so successful from a financial standpoint as the cash-register business. The National Cash Register Co., as I said, is the chief and almost exclusive maker of cash registers in this country. There are three independent companies, one in St. Louis, one in Michigan, and one other in Dayton, Ohio, and neither of them is a very serious competitor.

Let us see who are engaged in this business. The manufacturers of cash registers in the United States are:

(1) The National Cash Register Co., Dayton, Ohio.
(2) The St. Louis Cash Register Co., St. Louis, Mo.
(3) The Remington Arms Co., Ilion, N. Y.
(4) The American Cash Register Co., Saginaw, Mich.
(5) The Ohio Cash Register Co., Dayton, Ohio.

There is only one factory outside the United States making cash registers:

(6) Ankerwerke, A.-G., Bielefeld, Germany.

The companies listed under (2) and (3) are putting on the market only one style of cash registers, namely, the press-down key machine, competing with the corresponding style of the National Cash Register Co. The one listed under (4) is a small factory, and the one listed under (5) will build, about July, 1924, a small cash register of the press-down key type.

The foreign factory in Germany manufactures only certain styles capable of competing with the National Cash Register Co.

Seventy-five per cent of the machines made and sold by the National Cash Register Co. are used by department stores and larger enterprises, and there is no foreign competition on these. The sales force of this company is organized to cater to the user and not to any dealer in cash registers. The foreign company has no such organization in the United States.

The National Cash Register Co. has 2,500 patents on cash registers. It makes all the types known to the world. It has an enormous business. Its business last year was $40,000,000, and of that business 40 per cent is export business and 60 per cent domestic business.

The nearest competitor, if we may call it a competitor, of the National Cash Register Co. is the German company making the Anchor cash register. That cash register has never been imported into this country until very recently. That company has a small capacity for making cash registers and has not been able to fill even its orders in Germany. Senators can appreciate the extent of the control of the business by the National Cash Register Co. when they consider the fact that the output of the National Cash Register Co. is 500 cash registers per day, and the next largest manufacturer is the German company, with 40 per day.

In the 40 years of the existence of the National Cash Register Co. there have been put upon the market over 2,000,000 cash registers. In the 22 years of the existence of the German company there have been put upon the market but 17,000 of its cash registers. The importations of the German cash registers in 1918 amounted to $800, in 1919 to $597, in 1920 to $324, and in 1921 to $4,045, representing about 25 registers. I am informed by the only importer of the German cash register that there have been imported into this country 90 of those cash registers in the last year. Yet we are asked to tax every merchant in this country and every buyer of cash registers of the common type used in the stores of our small merchants and industries approximately $100.

That is what it means to put this duty on cash registers when the leading manufacturing concern in this country is making 500 cash registers a day. It is a preposterous proposition. I can not conceive of a single sound reason for putting this burden upon the American users of cash registers. The levying of a duty of 25 per cent ad valorem can only mean that there is danger to this American industry and that it is necessary for the American manufacturer to increase his price so as to keep the German-made machine out. Twenty-five per cent ad valorem! Twenty-five per cent additional cost is asked of the merchants of this country who will be called upon to buy cash registers in the future because 90 machines have entered the ports of America since cash registers were invented 40 years ago.

Let us examine the cost of the 90 machines which have been imported. In six months the price of the German cash registers has increased 600 per cent, proving what has been said again and again by the distinguished leader of the minority on the Finance Committee, that the prices of labor and the prices of commodities in Germany have steadily and constantly advanced, and that the use of statistics of August last in framing the tariff bill is an imposition and a fraud upon the American people. I could give the day and date, because I have them, of the changes in the price of this one commodity. The statistics show that 600 per cent has been the increase in one year as inventoried at the port of New York. Indeed, the German-made cash register does not seriously compete with the American make. It is of a different type. It is only one of the many types that the National Cash Register Co. makes.

I repeat, there are five types of cash registers. The National Cash Register Co. makes every one of them. The German company competes only with one of those types, and that is the so-called handle-operated cash register. The three independent American companies which compete with the National Cash Register Co. make the press-down key type.

The National Cash Register Co. has grown fabulously wealthy because of its control of this commodity. Stock dividend after stock dividend has been issued in the last 40 years. So effectively did they control prices of cash registers in this country that they were prosecuted a few years ago under the Sherman antitrust law and found guilty. I believe it is the only case in the United States where the officers of a company were actually sentenced to imprisonment under that law, although later the sentence of imprisonment was reversed.

Mr. HARRIS. Mr. President——

Mr. WALSH of Massachusetts. I yield to the Senator from Georgia.

Mr. HARRIS. During the investigation when the National Cash Register Trust was prosecuted it was found that the National Cash Register Co. had what they called a morgue, which they showed to those who visited their plant. In this morgue they kept samples of the cash registers of their competitors which had been destroyed by every kind of unfair method of competition that could be thought of which was practiced by this trust.

Mr. WALSH of Massachusetts. I thank the Senator for his information. I may say to the Senate that so completely does this company control the cash registers of the world that I understand it makes a different type of cash register for sale to European trade than it places on the market in the United States.

But one can not buy a European-made national cash register in America. The reason is because their cash registers in Europe are of a much cheaper type than they sell in America. A different type and a different style is used in the European market from that which is used in the American market.

It is only fair, however, to say of this trust that it has not any heart in the effort to put this duty into this bill; it is only fair to say that so far as the record appears they have not had any part in asking for this duty.

The Senator from North Carolina was very vigorously opposed by the Senator from North Dakota a short time ago for asserting that the Finance Committee ought not to give serious weight to the suggestion that American companies are going over to Europe to establish manufacturing plants.

The facts in this case show how the committee have been misinformed, because the only evidence that could justify that assertion was the suggestion from one of the companies that the National Cash Register Co. intended to equip a factory in Germany for the purpose of making these machines and shipping them to America and underselling—whom? Themselves, because they make 500 machines a day while the other three companies—I do not know how few they make, but the number is much less than 40 a day, for the German company ranks second in output. How absurd—this trust going to Germany to rival itself in America! Let me read the following telegram from Mr. J. H. Barringer, the general manager of the National Cash Register Co.:

DAYTON, OHIO, *June 2, 1922.*

Senator DAVID I. WALSH,
United States Senate, Washington, D. C.:

Our company now enlarging factory in Berlin, Germany. We plan to limit output there to sales in Germany and other foreign countries. We never imported registers for sale. Canadian factory assembling place. England only repairs. Writing.

J. H. BARRINGER,
General Manager the National Cash Register Co.

The letter which followed the telegram reads as follows:

THE NATIONAL CASH REGISTER CO.,
Dayton, Ohio, June 2, 1922.

Hon. DAVID I. WALSH,
United States Senate, Washington, D. C.

DEAR SIR: In reply to your telegram of even date, I have just wired you as follows:

"Our company now enlarging factory in Berlin, Germany. We plan to limit output there to sales in Germany and other foreign countries. We never imported registers for sale. Canadian factory assembling place. England only repairs. Writing."

We never have nor do we now intend to import registers from any foreign country.

Here is the statement of the manager of the National Cash Register Co., the company that will benefit particularly if this duty is imposed upon imported cash registers. Remember this company practically controls the American output.

Our main motive in enlarging our factory in Germany—

They already have a factory there for assembling purposes—

Our main motive in enlarging our factory in Germany at this time is to meet the state of trade in these foreign countries, due, as you know, to a very low labor market. There is no ground for the statement made by the concern named in your telegram.

That refers to the representative of the Michigan concern who appeared before the committee—

It may, however, be interesting for you to know that there is a cash register now being manufactured in Germany, namely, the Anker, which is appearing on the American market.

That is the cash register to which I have referred, ninety of which have come into this country, $4,000 worth, one one-hundredth of 1 per cent of the output of the National Cash Register Co., whose business last year was $40,000,000 worth of cash registers. The letter continues:

For your information we wrote your committee—

Referring to the Committee on Finance—

on February 4, to the effect that if it was decided to place a tariff on cash registers it would meet with no objection from this company. For your convenience we are inclosing a copy of this letter.

Very truly yours,

J. H. BARRINGER.

The letter to the Finance Committee is as follows:

FEBRUARY 4, 1922.

The HONORABLE FINANCE COMMITTEE,
United States Senate, Washington, D. C.

GENTLEMEN: Our attention has been directed to a petition which has been filed with your committee by certain companies, bearing on the question of tariff on cash registers and their parts, copies of which petition, we understand, have been sent to all Members of Congress.

While this bill was before the House we decided that it would be immaterial to us whether or not a tariff was placed on cash registers.

Note it is immaterial to them whether or not a tariff is placed on cash registers.

Should you decide to place a tariff on cash registers your action would meet with no objection from this company.

Yours very truly,

J. H. BARRINGER.

Mr. President, I ask to have printed in my remarks the portion I have marked of a leaflet published by the National Cash Register Co. giving information as to the capacity, the production, the number of employees, the number of patents, and other information tending to show how little this company needs protection.

The VICE PRESIDENT. Without objection, it is so ordered.

The matter referred to is as follows:

The National Cash Register factory is equipped with every modern improvement for the production of a perfect cash register.

Our plant utilizes 47 acres of ground. It comprises 23 buildings, with 43 acres of floor space.

Daily capacity, 500 registers; 6,000 employees.

We own 2,512 patents, covering over 36,500 claims.

For more than 37 years we have made cash registers. They are made of the best material, carefully tested. They are made by skilled workmen, under the supervision of men who have had many years of cash-register experience.

National cash registers represent the highest type of mechanical development. They are easy to operate, work fast, and make no blunders.

We build registers suitable for every kind of business, from the smallest to the largest.

We buy, sell, and exchange secondhand and rebuilt National cash registers.

Our registers can be bought on easy monthly payments, or we allow a liberal discount for cash.

THE NATIONAL CASH REGISTER CO.,
Dayton, Ohio.

(Offices in all the principal cities of the world.)

Mr. WALSH of Massachusetts. Mr. President, it is not necessary to prolong the discussion. The National Cash Register Co. has almost a monopoly of the cash registers which are made in the world. It has three small competitors in America who compete with it in the making of one of the many types made by the National Cash Register Co. There is a cash-register company in Germany that has been doing business in Europe, but the National Cash Register Co. has been competing with the German company in Europe, and successfully, for 40 per cent of the business of the National Cash Register Co. is export business and 60 per cent of it is domestic.

I ask once more upon what ground can there be a tax of this excessive character levied upon the struggling business men of this country? What justification can be urged for a 25 per cent ad valorem duty upon cash registers, which will amount merely to permission to this trust and three independent companies to increase its price to the American public by a sum of money which will vary from $100 to $200, dependent upon the price of the cash register? Business men, take notice. This one item seeks to exact an increase of 25 per cent on your cash registers in the name of protection.

There is absolutely no serious competition. The number of cash registers imported into this country has been insignificant, while the domestic output is over 150,000 a year by one company alone.

Mr. President, it does not seem to me that the committee ought to urge the adoption of this amendment. Evidently the House did not consider that the facts before it warranted or justified the imposition of a duty upon cash registers, and I can not help but feel that the Senate committee were influenced by the assertions made by the representative of one of the independent companies who feared that there might be competition from a cash-register factory which was being built in Germany.

Why should we construct a tariff bill upon fears? That is all we have been hearing here from the beginning to the end of this discussion—fear of German competition. The time for fear has gone. There was such a time six months or a year ago, but every bit of reliable information that comes from Europe, and from Germany as well, is to the effect that prices are increasing. We know that pre-war prices for cash registers have already been restored in Germany. There is no occasion or necessity for burdening the American people with these high rates of duty based upon fear that at some time somebody in Germany will build a factory that will compete with an American producer. The argument is ridiculous; it is not sound; and this amendment is indefensible unless the majority of the Senate are going to listen to the murmurings of every producer in every corner of the United States who may come here and say, "Some day somebody in Germany is going to build a factory to compete with me and I want protection." Let us wait until there is serious competition and serious danger to our industries. Don't be too gullible. Protection means levying a tax on all for a few. Let us use this special privilege sparingly and cautiously.

In this case we are not dealing with an infant industry, but with one of our strongest and most powerful industries. In trying to help a small independent company or companies let us not place 25 per cent ad valorem duty upon cash registers, with the result that the chief tariff beneficiary will be the monopoly that controls all the patents, was the first in the business, and for 40 years has been engaged in the business, without any competition except during the last 20 years. Even without their asking for it it is proposed to give them and a few other dealers a license to increase by 25 per cent their price to the American consumer. This committee amendment should be rejected if we have any regard or consideration of the American consumers.

Mr. McCUMBER. Mr. President, I can not imagine an argument that would be more acceptable to the National Cash Register Co. than that just made by the Senator from Massachusetts. I think it is worth while for us first to take a little glance at this company to ascertain what it has done in the United States, what it has attempted to do with reference to other companies, what it has been prevented from doing by the strong arm of the law, and what it now seeks to do by another method. I agree with everything the Senator from Georgia [Mr. HARRIS] has stated about the National Cash Register Co. and its methods. It is a great powerful company, and it has sought by every possible way in the world to destroy its competitors in this country.

The methods it adopted, as shown by the findings of the court in the injunction order, ought to startle anyone who has any sense of fair business dealings. Notwithstanding its strenuous efforts to destroy every attempt at competition in the United States, an injunction was obtained against the company and its competitors were allowed to live in the United States.

What are they producing? The St. Louis company is producing little machines that sell for from $60 to $200; the machine produced by the Saginaw, Mich., company, I think the testimony shows, is sold for from $40 to $80, and the average price of the machine manufactured by the American Cash Register Co., I think, is about $150 to $650. After making every possible effort in the United States to destroy its competitors, after having been enjoined by the courts, what did the powerful National Cash Register Co. propose to do? It proposed to go over to Germany and to build a great establishment over there, with a wealth much greater than all of the German concerns.

The Senator from Massachusetts then writes a letter to these gentlemen, whom he says have just got out of jail, and asks them if they intend to ship any of the product of their German plant into the United States, and they say "no"; they do not intend to do anything of that kind; they are merely going over to Germany to compete with the Germans in their own market.

Mr. WALSH of Massachusetts. Mr. President, I am sure the Senator does not intend to misquote me.

Mr. McCUMBER. Certainly not.

Mr. WALSH of Massachusetts. I made no statement about any gentleman just getting out of jail.

Mr. McCUMBER. No; I think the Senator stated that the officers of this company were the only ones that had been sent to jail.

Mr. WALSH of Massachusetts. I stated that they were sentenced to jail, and their sentence was afterwards reversed.

Mr. McCUMBER. Well, then they got out.

Mr. WALSH of Massachusetts. That they were the only officers of an American company that were actually sentenced to jail under the Sherman Antitrust Act.

Mr. McCUMBER. That was the idea I intended to convey; and having been sentenced to jail, I would not have been too credulous myself in believing everything they might write to me about what their future intentions were, in the light of what they had been trying to do.

Mr. WALSH of Massachusetts. I might say to the Senator that actions speak louder than words. The Senator is seeking by his vote to give this wicked trust, as he describes it, a 25 per cent duty. I am opposing a 25 per cent ad valorem duty to it or to anybody else making cash registers.

Mr. McCUMBER. Let us see whether I am or not. If the Senator will just wait a little while, I think I can convince him to the contrary. They wrote a letter to the Senator and told him that they did not intend to ship any cash registers into the United States, if I understand the Senator correctly.

Mr. WALSH of Massachusetts. They wrote a letter to me in answer to a telegram from me asking for information because of the statements made by the one witness who appeared before the Finance Committee.

Mr. McCUMBER. Very well; it does not make much difference in what form it came. Anyway, they gave the information that they did not intend to ship cash registers into the United States. Then it means that they went over to Germany to build up a great establishment there to compete with the Germans, necessarily, to have the German home market and the German foreign market. Now, I do not believe it. I do not care what they say; I do not believe that that is true. I do not believe that that was their intent when they established a great concern in Germany. I do not think that they intend for a single moment to manufacture those high-priced machines that come in competition with the machines which they manufacture in this country that sell for from $400 to $2,000.

I think they can well stop the manufacture of the little, cheaper machines, that run from $40 to $60, and manufacture them in Germany and bring them into the United States to supply a certain portion of their American trade, and I think that is just exactly what they intend to do; and then they will not be competitors against themselves to any appreciable extent, but they will be strong competitors against their little rival concerns in this country.

Mr. STANLEY. Mr. President, will the Senator yield?

The VICE PRESIDENT. Does the Senator from North Dakota yield to the Senator from Kentucky?

Mr. McCUMBER. Certainly.

Mr. STANLEY. Has the Finance Committee any evidence of the fact that this company has ever built in Germany a type of machine used in America and shipped it into this country?

Mr. McCUMBER. They have not got their factory built yet, as I understand.

Mr. STANLEY. Oh, you are killing the chicken before it is hatched, before the egg is hatched, or even before it is laid? Some fellow heard a rooster crow, and you assumed that the hen would lay the egg, and the chicken would be dangerous, and you would kill it, apparently.

Mr. McCUMBER. I suppose if the Senator saw a great structure growing up, the contracts let, the plans laid out, and the structure half built, he would say: "Oh, no; they do not ever intend to finish that. We never need have any fear of that at all. That is merely the crow of a rooster before he is even hatched."

I understand that they have a factory and are enlarging it. It is a small one, and it has not gone on very far into the business as yet.

Mr. KING and Mr. STANLEY addressed the Chair.

Mr. McCUMBER. Mr. President, that is one of the oldest concerns in the world. What they have done in the United States they will know how to do in Germany.

Mr. STANLEY. Mr. President, they already have a factory. The Senator admits that. They operated it for many years and never produced a single, solitary cash register that was ever sold in this country. Then they built an addition to the same factory, and the Senator assumes that they will do in the addition what they never have done in the original factory. Why, it is worse than I thought. He is afraid of a crow after he has tried the hen and knows she will not lay.

Mr. McCUMBER. Mr. President, I think we had better talk a little sense about this matter. I am not here to engage in that kind of a colloquy with the Senator at all.

Mr. STANLEY. I meant no discourtesy to the Senator.

Mr. McCUMBER. I will let the Senator have his own views on the subject, but I think I can substantiate the danger there is from the evidence that is taken in this case; and it is a great deal more reliable than the testimony of a company that says it went over to Germany to produce articles over there in competition with the Germans, but it never will send a single machine into the United States, no matter what profit it can make. I do not believe any such slush and nonsense as that.

Mr. KING. Mr. President, will the Senator permit an inquiry and a suggestion?

Mr. McCUMBER. Certainly.

Mr. KING. Has not the Senator, in the investigations made by the Finance Committee, encountered situations of this kind: I instance the Carbide Trust to illustrate what I mean.

The Carbide Trust, as the Senator knows, has a capital of approximately $300,000,000. It has absolute control of the domestic market. Possibly apprehending a few years ago some little competition from abroad, it constructed in Sweden a carbide plant. It never has turned a wheel. It never intended to. It used that as a club to threaten Europe, the Swedish manufacturers and the German manufacturers, that if they imported carbide into the United States this company, with its tremendous capital, would engage in competitive business in Europe, and would interfere with their market.

Has not the Senator, in the investigations of the Finance Committee, encountered just that situation, where some of these big trusts in the United States, in order to terrorize Europeans, have built plants in some parts of Europe and threatened to enter into competition with them there if they imported any of their products into the United States?

Mr. McCUMBER. I have never known any company or anything else that has ever terrorized the great commercial German Empire, and I doubt if there is any that will come into existence that will terrorize them.

Mr. KING. The Senator has not answered my question.

Mr. McCUMBER. I rather think that with their cartels they will be able to take care of themselves and will not be seriously influenced by any kind of a threat of that character.

Mr. CARAWAY. Mr. President, may I ask the Senator a question?

Mr. McCUMBER. Certainly.

Mr. CARAWAY. As I understood the Senator's statement, he feared an importation of a cheap machine to compete with the lower-priced machine built in this country. Is that so?

Mr. McCUMBER. I state that in all probability this company, the National Cash Register Co., which manufactures a very high-priced machine compared with the machine its competitors produce, would not manufacture the same machine and import it into this country in competition with itself; that with the other class of machines, those selling for a low price, it could well perhaps surrender the market, so far as its own manufacture in the United States is concerned, and supply that portion of the market from its German factories.

Mr. CARAWAY. And the duty, then, is to prevent that?

Mr. STANLEY. Mr. President——

Mr. CARAWAY. If the Senator will just permit me, I want to ask the Senator from North Dakota a question. Was the duty to prevent that?

Mr. McCUMBER. Why, the duty would undoubtedly make it a little more difficult.

Mr. CARAWAY. Why was it, then, that the duty is on all kinds of machines, if you are only trying to prevent the importation of the cheaper machine?

Mr. McCUMBER. Mr. President, would you still further protect the great National Cash Register Co. by saying that the duty shall be only on the small machines and that the others shall be free?

Mr. CARAWAY. If they are what the Senator is trying to reach, I do not see why he should put a duty on the high-priced machines when he contemplates no importation of that kind.

Mr. McCUMBER. Very well. I do not know where the Senator would draw the line. I certainly would not know where to draw it.

Mr. STANLEY. Mr. President——

Mr. McCUMBER. I yield to the Senator.

Mr. STANLEY. Is the Senator aware of the fact that the National Cash Register Co. built a factory in England, thinking they could avail themselves of the cheaper English labor, that they sent an American superintendent over there and operated the factory for several years, and, discovering the fact that they could make a cheaper cash register in the United States than in England, they actually dismantled the English plant? Is the Senator aware of that fact?

Mr. McCUMBER. Mr. President, the English laborer and the German laborer are two entirely different individuals.

Mr. STANLEY. That was not my question.

Mr. McCUMBER. The pay of the English laborer has always been 50 to 60 per cent higher than that of the German laborer,

and is now almost on an equality with that of the American laborer.

Mr. STANLEY. I simply asked whether the Senator knew of this instance.

Mr. McCUMBER. I have heard of it, I think.

Mr. STANLEY. Now, Mr. President, one other question, because I am anxious to get some light on this subject.

Mr. McCUMBER. I do not want to take too much time.

Mr. STANLEY. I will ask categorical questions. Has the Finance Committee ascertained, or made any effort to ascertain, the difference in cost of production by the National Cash Register Co. of its own machines in Germany and in the United States?

Mr. McCUMBER. Where the labor is about from one-fifth to one-tenth, and the skill just as great, and the product is all made by machinery, I do not think I need even to attempt to get the cost price of either of their factories. I could not if I should try to get it; but it is evident that with equally skilled workmen, and with machinery as good as our own, they can manufacture very much cheaper. I should draw that natural conclusion without anything further to guide my judgment.

Mr. STANLEY. Mr. President, another question, and then I am through. The Senator, of course, is aware of the fact that we produce in this country now, notwithstanding our higher price of labor, coal, pig iron, and steel billets at a less cost than they can be produced in either England or Germany.

Mr. McCUMBER. That may be true, Mr. President. There are a great many things we produce in the United States which are standardized and which we can produce cheaper than they can be produced anywhere else in the world. I have no doubt that a Ford machine can be produced very much cheaper in the United States to-day, even with very much higher-priced labor, than it can be produced for anywhere else on the face of the earth. But that does not mean that everything can be so produced.

Mr. STANLEY. I want merely to suggest to the Senator, in passing, that there is no more reason why a Ford machine should be produced more cheaply in the United States than a cash register. We can produce steel wire, from which these machines are made, just as much more cheaply in the United States as we can produce steel billets. It is all done from the heated metal, and while I have made no detailed investigation, all the presumption is in favor of an actually cheaper cost of production, to say nothing of having this National Cash Register Co. take out patents in Germany and then pay the cost of transporting a machine to the seaboard, load it on a ship, bring it over here, break bulk, put it on a railroad train, and ship it to its store in order to compete with itself. I think it is preposterous on its face.

Mr. McCUMBER. The Cash Register Co. may be a very wicked company, but I do not think it is idiotic enough to do that——

Mr. STANLEY. It would be if it did it.

Mr. McCUMBER. Unless it feels it can gain some advantage by going over there, I think I fully comprehend what the advantage is. The Ford Co. may produce in this country cheaper than it could produce at any other place in the world, but if it goes over to Germany with the same equipment, and can get its labor for one-fifth of what it gets it here, it could produce more cheaply in Germany than it could produce in the United States, and we are wasting our breath in arguing to the contrary.

Now I want to read the testimony of Mr. H. A. Savage, of Saginaw, Mich., representing the American Cash Register Co. I want to differentiate this from the National Cash Register Co. I shall read only a portion of it. He states:

> I am representing the American Cash Register Co., being president and general manager of that company. I represent also the St. Louis Cash Register Co. and the Michigan Machine Co.—the three so-called independent cash register companies in the United States.
>
> As I said before, I shall touch only some of the high points in order that you may have an idea of what we are asking for.
>
> I may say to you again before I forget it that this brief is not complete, so far as some of our exhibits are concerned. The complete brief, I believe, is in the hands of your committee, or the secretary of your committee, it having been filed some time ago by Senator TOWNSEND.
>
> The cash registers manufactured by the three companies that I have mentioned cover a wide range of sizes and styles, and fill the requirements of 90 per cent of our American merchants. The retail selling prices vary from $40 to $80 for Michigan cash registers, from $60 to $200 for St. Louis cash registers, and from $150 to $650 for American cash registers. I am mentioning these prices so that you may understand that they are not only fair, but they are very reasonable.
>
> Senator McCUMBER. The prices range from $40 to $650?
>
> Mr. SAVAGE. The National Cash Register Co. makes machines that sell for as much as $1,600 and $1,800, but they are not this particular line of machines. They are the multiple-drawer machine.
>
> The cash register manufacturers, other than the National Cash Register Co., were never able to make any substantial progress whatever until after the United States district court permanently enjoined the National Cash Register Co., of Dayton, Ohio, from unfair and illegal practices as interpreted under the antitrust laws enacted by Congress July 2, 1890. A copy of the court's decree in this case is attached to the brief marked "Exhibit A."
>
> Just let me explain that brief for a moment. The National Cash Register Co. was then the old Halwood Co. For 25 years suits were pending in every court of the land from the lowest court up to the United States district court at Cincinnati.
>
> Senator WATSON. What has that to do with the tariff?
>
> Mr. SAVAGE. I want to tell you what it has to do with it. If you do not care to hear it, I can file the brief.
>
> Senator WATSON. What particular bearing it has on the tariff I can not see.
>
> Mr. SAVAGE. I was mentioning the fact in connection with the fact that the competition from abroad leads up to this. If you will pardon me, I will touch on that for just a moment, to show that the competition comes from the fact that this company now has a factory in Germany. The cash registers known as the Anker brand are manufactured in many different types and sizes and are now being offered for sale in the United States. Their representatives are now attempting to secure agencies throughout this country. The representatives appointed are De Lumen Bros., New York, N. Y., and they claim to be the sole distributors of Anker cash registers for the United States and Canada. This is the German cash register. They have quoted prices that are very much below the actual cost of production in this country, as shown by Exhibit E, which is attached to our brief.
>
> The National Cash Register Co. also has a factory in Berlin, Germany.

I ask that Exhibit B be printed as a part of my remarks without reading.

There being no objection, the matter was ordered to be printed in the RECORD, as follows:

EXHIBIT B.

KRUPPS EMPLOY 18,000 MORE PEOPLE THAN BEFORE—FORMER ARMAMENT PLANTS BUSY TURNING OUT ARTICLES NEEDED IN TIMES OF PEACE.

WASHINGTON, *October 1, 1921.*

Employing 18,000 more laborers than in the pre-war period, the big Krupp plants of Germany are manufacturing steel products ranging from locomotives to motion-picture apparatus, a special report to the Department of Commerce from William T. Daugherty, American trade representative, says.

The manufacture of railroad equipment has reached the point where the factory of Essen is turning out one locomotive and a train of eight 15-ton cars every day. At the plants at Eheinhausen and Annen automobiles, fire apparatus, street-cleaning apparatus, stationary steam engines, Deisel motors, cash registers, farm machinery, and machinery for the textile, paper, cement, rubber, and earthenware industries are being manufactured. The shipyard at Keil-Gaardon is working on passenger and cargo ships and river barges.

Mr. McCUMBER. I continue reading from the testimony of Mr. Savage:

> Germany has very recently increased the duty upon cash registers from 20 marks per 100 kilograms.

Mr. WALSH of Massachusetts. The Senator does not claim that that change has increased the duty, measured in terms of gold?

Mr. McCUMBER. I have not figured it out so as to know whether it has increased it or not.

Mr. WALSH of Massachusetts. I am informed that the change made in the German import duty on cash registers has been made to conform to the depreciation in the German mark, and represents the same rate in gold as formerly.

Mr. McCUMBER. I think it is a slight raise, but it is immaterial. I continue reading from the testimony of Mr. Savage:

> I want to draw your attention to another thing. The labor used in connection with this class of work is paid an amount equal to 2 cents per hour in German factories, based on the value of United States money in Germany as shown by the reports of our Bureau of Foreign and Domestic Commerce. The average wage scale for the same class of work in the United States is 57.5 cents an hour. It is rather difficult for us to compete under such conditions as that if the cash registers are permitted to come in free of duty.

Now, as I am a little hoarse, I ask the Secretary to read the marked portions of the brief.

Mr. CARAWAY. Has the Senator yielded the floor?

Mr. McCUMBER. No; I have asked the Secretary to read the brief.

Mr. CARAWAY. I did not understand the Senator's request.

The Assistant Secretary read as follows:

BRIEF OF H. A. SAVAGE, REPRESENTING THE ST. LOUIS CASH REGISTER CO. (INC.) AND AMERICAN CASH REGISTER CO.

When the existing tariff laws were passed by Congress there was but one financially strong cash-register manufacturer in the United States, namely, the National Cash Register Co., of Dayton, Ohio. That company enjoyed what amounted to almost a complete monopoly of the cash-register industry. That tariff act imposed no import duty upon cash registers, with a view, no doubt, of encouraging foreign competition and thus protecting the merchants of the United States against the very high prices charged by the one manufacturer above referred to.

Since then, however, conditions have changed very materially. The St. Louis Cash Register Co., of St. Louis, Mo., now manufactures 22 models or sizes of cash registers, retailing at very moderate prices. The American Cash Register Co., of Saginaw, Mich., are manufacturing many models or sizes of cash registers, which also retail at moderate prices. The Michigan Machine Co., of Detroit, Mich., manufacture five sizes or models of cash registers, which sell at very low prices.

The cash registers manufactured by the three companies last mentioned cover a wide range of sizes and styles, and fill the requirements of fully 90 per cent of our American merchants. The retail selling

prices vary from $40 to $80 for Michigan cash registers, from $60 to $200 for St. Louis cash registers, and from $150 to $650 for American cash registers.

It is possible, therefore, for American merchants to obtain cash registers at fair and reasonable prices, based upon the cost of production, and they are now well protected against any exorbitant prices that might be demanded by a single manufacturer.

The cash-register manufacturers, other than the National Cash Register Co., were never able to make any substantial progress, however, until after the United States district court permanently enjoined the National Cash Register Co., of Dayton, Ohio, from unfair and illegal practices as interpreted under the antitrust laws enacted by Congress July 2, 1890. A copy of the court's decree just mentioned is hereto attached and marked "Exhibit A."

Cash registers are now being manufactured in several foreign countries, and particularly in Germany. It is stated upon reliable authority that the Krupp Gun Works are now manufacturing cash registers. See newspaper clipping marked "Exhibit B." But the principal one which has come to the attention of the manufacturers in this country is that of the Anker-Werke, of Bielefeld, Germany. (See catalogue marked "Exhibit C.")

The cash registers known as the Anker brand are manufactured in many different types and sizes and are now being offered for sale in the United States. Their representatives are now attempting to secure agencies throughout this country. The representatives appointed are De Lumen Bros., 110 East Twenty-third Street, New York, N. Y., and they claim to be the sole distributors of Anker cash registers for the United States and Canada, and they have quoted prices that are very much below the actual cost of production in this country, as shown by "Exhibit E" hereto attached.

The National Cash Register Co. also has a factory in Berlin, Germany. Page 63 of a catalogue issued by that company is hereto attached and marked "Exhibit D," and your attention is called to statement that they have a branch factory at Berlin, Germany.

It is a well-known fact that cash registers or other manufactured articles can be manufactured in Germany under the industrial conditions existing in that country and shipped to the United States and offered for sale at prices much less than the cost of production of similar products manufactured in the Middle West of this country.

If any German manufacturer, including the National Cash Register Co., with its factory at Berlin, is able to manufacture cash registers in Germany, where the value of the United States dollar is so high and where material and labor costs are so low, and offer their product for sale in the United States, duty free, thereby participating in the American market on an equal basis with American manufacturers, it can readily be seen that the manufacturing companies located in the United States other than the National Cash Register Co. will be forced out of business, and their long years of struggle to attain success will come to naught.

The National Cash Register Co. is in a position where it need not become active in securing tariff protection against foreign competition. Foreign competition in this market will accomplish for that company what it can not do for itself on account of the injunction against it; and then with a factory at Berlin, Germany, it will be able to compete on an equal manufacturing basis with other foreign makes of registers.

In other words, the National Cash Register Co. can well afford to remain inactive until foreign manufacturers have driven the other manufacturers of the United States out of business; and then it, with the product of its Berlin factory, could no doubt drive the other foreign manufacturers from the field and thus again enjoy a monopoly of the cash-register industry in this country.

Canada imposes a 30 per cent ad valorem import duty upon cash registers. Mexico imposes an import duty upon cash registers, and Germany also imposes an import duty upon cash registers amounting to 1,200 marks per 100 kilograms in weight. (See letter from Bureau of Foreign and Domestic Commerce hereto attached and marked "Exhibit F.")

Germany has very recently increased the duty upon cash registers from 20 marks per 100 kilograms to 1,200 marks per 100 kilograms. Germany has thus protected her cash-register industry against the importation of cash registers from other countries.

The transportation charges upon cash registers from Hamburg, Germany, to New York City amount to only a few cents more per register than the freight charges on cash registers from the Middle West to New York.

Without a careful analysis of the peculiar conditions attached to the cash-register industry in the United States, it may on the surface appear that the greatest benefit will accrue to the great mass of American merchants by admitting cash registers free of duty, and that this is the end to be sought rather than the protection of a few concerns that are manufacturing this product and their employees, but if conditions are such that these manufacturers are forced out of business, as we firmly believe they will be, unless a substantial duty is enacted in the present tariff act, then exactly the opposite effect will result.

The cash-register manufacturers of the United States are sincere in the belief that if foreign manufacturers are permitted free access to the American market, then within a remarkably short period of time the National Cash Register Co. will again be in control of the cash-register industry in the United States, and in consequence the American merchants will again be compelled to pay exorbitant prices for cash registers.

Before the United States district court entered its injunction decree February 21, 1916, against that company the history of all cash-register manufacturers who had the temerity to engage in the business was a succession of organization, reorganization, and final dissolution.

Since that decree became effective, however, other manufacturers have made considerable progress, and a great many people in the United States are by them now employed in manufacturing and marketing cash registers, notwithstanding severe handicaps because of the fact that the industry was not especially attractive to capitalists, they fearing that the injunction decree herein referred to might some time be dissolved or modified and the former monopolistic competition again become effective or that foreign competition would arise without ample tariff protection to equalize the difference in the cost of production in this country and in foreign countries.

Prior to the issuance of the said injunction the National Cash Register Co. sold cash registers of certain competitive models at a price less than cost of production, making up its loss on certain other models not manufactured by competitors, which models were sold at a very high price, with resultant large profits. This was done solely to stifle and throttle competition in the United States, and the means used were highly successful. The injunction issued by the United States court put a stop to this unethical practice, but the identical conditions, even with the injunction, would become prevalent if registers made in Germany can be sold in the United States at a price less than the cost of production here.

Mr. JONES of Washington. Mr. President, I would like to know if there is any reason why this brief could not be printed in the RECORD without reading?

Mr. MCCUMBER. It will be printed in the RECORD, of course, but I thought it was a brief so much to the point that it was well worth listening to.

Mr. JONES of Washington. But no one is listening to the reading.

Mr. MCCUMBER. Knowing how little inclined we are to read the RECORD the next day, I thought it was best to have it read now.

Mr. JONES of Washington. I think no one is listening to it.

Mr. KING. Mr. President, may I say to the Senator from Washington that there are some listening to it. I have been making inquiries since the reading has been in progress to see if this was all that is in the record upon which to predicate the demand for this extortionate rate. I have been listening with the utmost care, in order to find some reason to justify the rate.

Mr. MCCUMBER. Of course, any rate is extortionate in the opinion of the Senator, I appreciate that, whether it is 5, 10, 15, or 25 per cent; but the committee, from the thought and consideration which they gave to the subject, felt justified in recommending the 25 per cent duty.

Mr. UNDERWOOD. I know there were some Senators listening to the reading. It is the most remarkable argument I ever heard, and I would like to have an opportunity to comment upon it when the reading is concluded.

Mr. JONES of Washington. It will then lead to some discussion?

Mr. UNDERWOOD. Oh, undoubtedly. I think what was really in the minds of some Senators was whether we are going to take a recess at the usual hour of 10 o'clock, or whether we are going on until 12 or 1 o'clock.

Mr. MCCUMBER. I am going to ask the Senate to take a recess very shortly. I think the reading was very nearly concluded and I was then going to ask for a recess until to-morrow morning.

Mr. WALSH of Massachusetts. May I ask the Senator from North Dakota a question? Is not the brief simply a repetition of the testimony which the witness gave and which the Senator read into the RECORD?

Mr. MCCUMBER. Oh, no; I did not read any part of the brief.

Mr. WALSH of Massachusetts. I think the brief is merely a summary of the testimony of the witness.

Mr. MCCUMBER. If Senators are in a hurry to get home I will ask that the remainder of the brief be printed in the RECORD without reading.

The VICE PRESIDENT. Without objection, it is so ordered.

The remainder of the brief of Mr. Savage is as follows:

If German-manufactured cash registers are now permitted to enter the American market free of any duty that will equalize the cost of production between this country and that country; it will not only be impossible to secure additional capital if needed, but the money already invested in the industry will in a comparatively short period of time be lost, and thereafter it will be impossible to again interest American capital in the cash-register industry.

It is the sincere belief of the cash-register manufacturers, other than the National Cash Register Co., that their sole hope of success depends upon a reasonable protective tariff, and that there will be no modification or nullification of the court's decree entered against the National Cash Register Co.

From the foregoing it must be evident that there should be a duty of at least 25 per cent ad valorem upon cash registers entering this country—

First, to secure the revenue upon that product for our own Treasury.

Second, to protect the great mass of American merchants against the possibility of one manufacturer again gaining a monopoly of the cash-register industry in this country and thereafter demanding exorbitant prices for his product.

Third, to protect our own laborers against the cheaper labor of foreign countries, including foreign labor employed by an American manufacturer on foreign soil.

Fourth, for the protection of American capital that has been invested by the manufacturers, other than the National Cash Register Co., in the cash-register industry in this country.

The undersigned, therefore, earnestly and respectfully request that the present tariff bill now before Congress be amended to include an ad valorem duty of at least 25 per cent upon cash registers, cash-register parts, including wood and/or metal bases, and/or cash drawers for same, and upon calculating or adding machines and parts for same if their ultimate use is for the purpose of being mounted or attached to a cash drawer or in any way used as a cash register or as a substitute for a cash register.

Mr. MCCUMBER. I ask unanimous consent that the Senate, when it concludes its session on this calendar day, shall take a recess until to-morrow morning at 11 o'clock.

The VICE PRESIDENT. Without objection, it is so ordered.

Mr. McCUMBER. Now, if it is satisfactory, I will move that the Senate take a recess——

Mr. HARRISON. Does the Senator expect to have an executive session?

Mr. McCUMBER. If it is desired to have an executive session, I will withhold the motion.

Mr. HARRISON. I was just wondering if an executive session is desired.

Mr. CURTIS. It is not.

Mr. McCUMBER. I have not heard any such desire expressed.

Mr. HARRISON. Very well.

RECESS.

Mr. McCUMBER. I move that the Senate take a recess, the recess being under the order just entered, until to-morrow morning at 11 o'clock.

The motion was agreed to; and (at 10 o'clock and 7 minutes p. m.) the Senate, under the order previously entered, took a recess until to-morrow, Thursday, June 8, 1922, at 11 o'clock a. m.

HOUSE OF REPRESENTATIVES.

WEDNESDAY, *June 7, 1922.*

The House met at 12 o'clock noon.

The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

Blessed Lord, come to our waiting hearts and minds. Forgive us everything that is unworthy of the holy name which we have taken upon our lips. As Thou hast set before us high and patriotic tasks, may we fulfill them worthily. Bless our whole family of citizens, and may they not be led along false ways. O help our country in its questions, in its problems, and in its fears. Dispel all earth-born clouds and be gracious unto every State and every citizen under the folds of our flag. For Thy name's sake. Amen.

The Journal of the proceedings of yesterday was read and approved.

Mr. SCHALL. Mr. Speaker, there are in the gallery to my right about 90 blind World War veterans. From here they go to the Senate, and from there they are invited by the President to the garden party at the White House. I ask unanimous consent to proceed for 10 minutes.

The SPEAKER. The gentleman from Minnesota asks unanimous consent to address the House for 10 minutes. Is there objection?

There was no objection.

Mr. SCHALL. Mr. Speaker, the American people say little, but feel deeply. The greatest war in all history, in its reach and cost and catastrophe, is barely over. Hardly a family in the land but has felt its heavy toll. Yet to judge from the infrequent reference to it you might, if you were a superficial judge, think that America had forgotten.

The burial of the unknown soldier when the whole Nation paused in the midst of its busy, onward rush, gave a fleeting glimpse of the depth of emotion buried in the hearts of a people great enough to master their sorrow. Somewhat over 100,000 American lives were given outright. Many lost their reason. Thousands were mangled, wounded, torn, while thousands upon thousands will carry through the years the loss of arm or leg, or burned-out lungs or stomach. Some gave even more than their lives. With us to-day are representatives of those who by war injuries gave as their contribution their sight. They have come from the Navy and from every European battle field where Americans fought. They are to-day the wards of the Government, recuperating, rehabilitating themselves at the Evergreen School for the Blind at Baltimore. No doubt every one of these boys has cried out in his hour of trial, "O Lord, if possible, take this cup from me," and would have chosen to have remained upon the battle field, with no wakening, to bear, day after day, the heavy cross of silent waiting. The constantly recurring thought in the early days of blindness is, "Is not death to be preferred?" for they then reason with the mind of the seeing. I can remember upon losing my sight, acquaintances meeting me after a lapse of time would say, "SCHALL, I heard you were dead." I replied, "Not dead, just blind." But I could readily interpret what they thought. When they heard that I had lost my sight, they said to themselves, "I would rather be dead." And so, having said it, they concluded that I was dead. But I am not dead. [Applause.] And I am quite sure that the blind soldiers who are here in the gallery to-day will prove that they are not dead. [Applause.]

It is not in never falling that our strength is shown, but in rising when we fall, and the greater the fail the more strength required, and the more strength required the more strength developed, which gives the foundation for the Biblical quotation, "Whom the Lord loveth He chasteneth." Perhaps, like myself, they may sometimes wish the Lord had not loved them quite so much. [Laughter.] But as they go on in their handicap fight for life they will come to realize more and more as they meditate and strive within their prison walls of darkness that the things of earth are temporal, the soul is eternal. They come to know, as they develop patience, endurance, courage, and will through the suffering and discipline of thwarted endeavor, a philosophy of understanding that will lift them above the material interference of worldly things and give them a supreme faith far in advance of what their souls' attainment would have been under the advantages of sight. But of what value is faith? Faith is the engine that moves the world. It is the motive of action. It is the heart of progress, and every pulse sends life through its veins. It is the greatest power in man and gives him the highest stimulus. Faith gives herculean strength, which enables him to accomplish almost the impossible. Faith moves the mind, mind moves the world.

Faith earned for King Solomon the reputation of being the wisest of the wise. When the Lord asked him what he most desired, he did not say, "Make good my sight and my hearing and give me back my youth," but answered, after his hundreds of years of experience, as the most priceless thing in all the world, "Give me a heart of understanding, that I may discern between right and wrong," thus witnessing that the fruit of life is understanding; that the heart is the source of power, the source of love, the source of everything that is good in the world, and that men and women and nations are great as their hearts are great, as their souls are great, as their understanding is great.

Not in reveling palaces nor pillared halls nor the imposing coteries of the learned are the deepest emotions felt, grandest conceptions born, or most vital truths discovered. But from the epic shores of Greece, from Sinai's slopes, from the felon's cell at Bedford, from the chamber of blindness in London have come the inspirations that have blessed mankind. You can not know without understanding. You can not attain understanding without adversity. You may avoid, but to reach fulfillment you must have been upon Mount Sinai and seen the lightning flash and heard the thunders roll, partaken of the meal of locusts, and clothed yourself in the camel's hair. You may shrink from the cup, but to fill your destiny you must with calm patience and resignation humbly concede, "Nevertheless, not my will but Thine be done." [Applause.]

These men are making good under their trials. There is one young lad up there, deaf in one ear, both hands gone, blind, yet he is studying law. He has learned the typewriter, and he writes as fine a letter as any one of you can do with your sight. [Applause.] They are all very much alive. They have refused to be downed. They have tackled their handicap with the same spirit and go and dash that they bucked the stalemate of the trenches, and with a yell, "Come on, boys, do you want to live forever?" sent the American spirit up and down the allied lines to win the victory for the world. [Applause.]

Mr. Speaker, I was on the *Mount Vernon*, an American transport, when she was torpedoed the 5th of September, 1918, 250 miles off the coast of Brest. A great hole 20 by 30 feet was torn in the middle of her side, 18 feet below water level. Many sailors were lacerated and burned, 37 killed, one of whom was a friend and constituent, Leon Heath, with whom I talked just before he went on duty. The saving of the vessel was due to the heroism, alertness, and esprit de corps of the officers and sailors, under the command of Captain Dismukes. At some future date I want to secure time from the House to recount in detail the calm valor and efficiency of these wonderful sailor boys together with the magnificent leadership of their officers.

I had ample opportunity at the time of the encounter and during our struggle back to land to observe the working of that superb organization known as the American Navy, without whose aid, under the direction of Admiral Wilson, the World War could never have been won, and whose personnel, officers and men, are without equal in all the world. [Applause.]

I was in France during July and August of 1918, and followed our boys in the Chateau-Thierry drive. On one occasion I had the honor of speaking to a Michigan and New York regiment, just back of the battle line on Hill 210, to take which over 500 of our boys had given their lives. While speaking I could hear the uneven whir of the German planes and the steady hum of the American engines engaged in combat high to my left—an old story to the boys, who hardly vouchsafed an upward glance.

I spent the night at Fere-en-Tardenois. The following night Doctor Dillon, in the very bed in which I slept, had his legs broken by a shell. We pushed on farther toward the front. I was with Major Fuchs in Cohan, where white-hot fragments of shell lay smoking in the street, the town being shelled every 15 minutes; heard the missiles of death screaming like demons through the air. I heard the voices of men whom the fierce barrage and tense current of life had left with eyes that strained and throats that swelled, and never a smile. We sped around Dead Man's Curve, an exposed bit of the road, where the whine of a 1-pounder, crossing our trail, gave token of the watchfulness of the enemy. I experienced creeping upon hands and knees for about half a mile to avoid exposure to the enemy; motoring along camouflaged roads at speed not to exceed 8 miles per hour lest dust arouse a shell attack.

I savored the heavy white dust, the flies, the heat, and the scantiness of water; the smell of decaying flesh, where the human dominated the animal. I heard the mighty uproar of night attacks, where like heat lightning the barrage played along the sky; the boom of artillery and the burst of shell; the heavy rumble of trucks bringing troops, munitions, and supplies to the front; and ambulances setting out with the wounded.

From actual contact with the soldiers in action, in field and camp, I know something of what our boys suffered and what they accomplished over there. I lined with them at mess and communed with them in bivouac in the night, at a time when men's tongues are loosed and they talk. To-day they narrowly missed death. Perhaps it would be their turn to-morrow, and so on the verge of eternity they spoke their hearts and told the plain truth without fear or favor. No whiners among them. No boasters. Just matter-of-fact, pure stuff, the dross burned away in actual fellowship with death, leaving their souls vibrant instruments of truth. If I had but one word with which to describe the American soldier, I would describe him with the word "courage." No nation in all the annals of war has produced average individuals with such predominant courage, such unheard of heroism, such willing offering of life.

We have been accustomed to believe the European propaganda, that anything from overseas is far, far better than our home product; that to produce a soldier up to European grade, they must be drilled year after year. But here were these raw American boys, the same unassuming fellows that brought the meat to the back door, delivered the groceries or the ice, or sold you shoes over the counter, followed the plow or drove the binder on the farm, worked in shop and factory or studied in high school and college—these same lads, performing deeds of judgment, decision, and valor that forced from their war-trained allies and opponents the admission that they had never seen or heard the like.

A heroic soul here and there would have been within the bounds of expectation but the constant grade of the whole product of a nation, drafted and volunteers, with whom you came in contact there on the death fields could not but give you pause and force the thinking mind to ask why a nation had produced such universal phenomena.

In touch with these wonderful men day after day, in whom heroism was as common as the dirt under foot, comparing them with the other soldiery, I was impelled to ask myself what made this vast gap in fortitude, courage, judgment, between human individuals of the same civilization, and the answer was driven in upon me that the difference lay in their greater soul power, because at last God had reared a government under which the soul, that thing akin to Him, could grow; a government whose aim was the development and fostering of initiative of the individual, where they had freedom to choose between right and wrong; where any citizen could aspire to the highest office in the land; where religion was unhampered, their thoughts unrestrained, where they dared to think and feel out loud; where equal opportunity was their birthright, and no high wall of "Verboten" is endured; where each stands upon his own resources, for what he is and what he can do, and every man is the equal of his neighbor; where the Stars and Stripes from the towers of our public schools speak the spirit of America and beckon her children to a heart of understanding that can discern between right and wrong. It is true the Allies furnished the guns, but America furnished the soul that won the war [Applause.] Until that soul was loosed in combat upon the battle fields defeat of the Allies was inevitable. Paris had been ordered evacuated. Big Bertha shells were bursting everywhere in the streets. Consternation prevailed. Lines of refugees were streaming from the city. A German army, headed by the Prussian Guard and commanded by the Crown Prince, was advancing with the steady precision of clockwork at the rate of 4 to 5 miles a day. German patrols had been captured within 6 miles of Paris. The terrible bombardments and onslaught of the shock troops had forced the French back and back until the Germans, gaining possession of the heights about Belleau Wood, had cleared the roads for 8 miles in advance.

Had Paris fallen, France would have fallen, for Paris is the heart of France. Munitions, railways, manufactures center there. Had France fallen, the English would have soon been pushed back into the channel, and the war would have been over.

Foch, realizing that Paris was doomed, called for American troops, not with any hope of their altering the result, for he had no faith in the raw, undisciplined, untrained Americans. No criticism of him for that, for he could not know of what stuff they are made, since his experience has been only with Europeans. But, fighting man that he was, he intended to reform the French veterans farther back toward the city for a last desperate stand, and not wishing to waste any of these precious veteran soldiers he bethought himself of the American troops, who, in his opinion, could in nowise serve as actual combat troops, but who might be made of some avail in slightly deterring the speed of the oncoming victorious army. And so as a last resort, to avoid the inevitable, he permitted the American troops to be rushed in as a sort of stop gap. With their march unresisted for several miles ahead, the Prussian Guard were ordered to put on their dress uniforms with spiked helmets. The officers decked themselves in dress regalia with starched bosom shirts. The Germans had no other thought but that they were going triumphantly into Paris. The French believed it, the English believed it, the Belgians believed it, the Italians believed it, all the world believed it. But the boys of four American regiments did not believe it. The Fifth and Sixth Marines, the Ninth and Twenty-third Infantry of the Second Division, being the nearest at hand, were crowded into trucks as close as they could stand and hurried in the night to striking distance of the enemy. As they passed the retreating French they were met with cries of, "You're zigzag; you're crazy. Sure death ahead. There is no hope; go back." But these eager, smooth-faced Americans, who had never smelled the smooke of battle, were not made of the stuff that goes back when the enemy is in front. Unperturbed, they landed in the mud, and under cover of the woods formed their lines and calmly waited for the dawn, when about 15,000 Americans met and held and stopped five German divisions. [Applause.] So fierce and unfaltering was the attack that the enemy took it for granted that there were unlimited reserves in the rear. The miracle was performed, the march on Paris stopped, the oncoming hordes turned back, the Chateau-Thierry drive begun, the destiny of civilization changed. [Applause.]

The soul of America had won because it had broken the cocksure spirit of the enemy, had rekindled in the breasts of the drooping Allies a morale that ran from one end of the lines to the other. For the supersoldier of the world, with tremendous advantage of numbers, had been outsupered by a few simple, modest, untrained Americans; and these same Americans were here in great numbers, and they were coming by the thousands. The war could end in but one way. At the height of the Chateau-Thierry drive, when the pall of that terrible certain daily advance, when the shelling of Paris and the nightmare of air raids was too recent to be forgotten, not a soul could be found in the ranks of any army or in any walk in life so base but he was free to admit that it was the American soldier who won the war, turned the tide, saved them when they had their backs to the wall. Yet now, when it is all safely over, there are those who ungratefully say, "We would have won, anyway." They would, like hell. [Applause.]

The SPEAKER. The time of the gentleman has expired.

Mr. SCHALL. I will ask for five additional minutes, or so.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

Mr. SCHALL. They were down and out and, like Caesar, "* * * did cry, 'Help me, Cassius, or I sink.'" In one breath they say that they would have won without our aid. Superior in number to the enemy, they were at it for four years and were licked. Our boys cleaned up the mess they had made of it in six months. In another breath they inconsistently say we were too late in coming. It comes with ill grace from them to say, after we gave them $25,000,000,000 and loaned them $11,000,000,000 and raised an Army of 4,000,000, at a cost of $3,500,000,000, built a merchant marine for their protection, built up wharves and docks and railroads, dredged their harbors, that we were slow to cooperate. If we had been as slow to give as they have been to even acknowledge gratitude, let alone acknowledging their debt for borrowed money, they might have some basis for complaint. We have voluntarily relinquished the advantage in armament at a time when we could well afford to take the lead. That is not being slow to cooperate.

We asked nothing and we got nothing from the war, and an honest tribute to the heroism of our boys, in all fairness, is the least they could offer.

Our boys were far from their homes. It put shame into the hearts of men who were fighting for their very hearth sides and families to see such daring and spirit in lads who needed no spur. It began June 6 at Belleau Wood and continued through the Aisne-Marne drive; the Somme campaign, St. Mihiel, Ypres-Lys, through the Meuse-Argonne, clear up to November 11. Six months and the job was done. And through it all the American soldier kept his simplicity. Nowhere in the world is the soul developed in any nation that equals the soul that comes from America. The only soldier who was comparable to the American were the Canadian and the Australian. They too were bred on free soil. But Europe can not produce that freedom of spirit. They are too tied down by laws. Their soil is too corrupt, too full of intrigue and sycophancy and deceit, of truckling and subserviency, of caste and precedent, of fraud and hypocrisy, what they call diplomacy. Reared on American soil, imbibing her principles of freedom, the American soldier did not need years of intense training. He was used to thinking and deciding. In a pinch, every man was an officer. The intelligence of the American equipped him to understand the war game quickly. Heroes every one, they dared to move apart, 20, 30, 50, 60 feet; they dared to fight alone and die alone. The average run of the European soldier has not the private initiative to fight alone and die alone. He fights best in mass where he sees the form of his companion ahead, feels the rub of the elbow of his pal at his side, hears the tread of his comrade in the rear. He must have a crowd to give spirit and soul to do and die. The American soldier, because of his individual development, has soul power that dares stand alone. The European must group this soul power to produce the necessary courage. The American soldier is a lion who dares forage alone. Wolves hunt in packs. The American soldier is an eagle who dares soar aloft in the awful solitudes. Swallows hover in thousands. The American soldier dares to die right now. The European soldier to-morrow. Ask the German soldier or officer who won the war, and he will tell you that it was the Americans. That it was the Americans who advanced into no man's land without hesitation, and came on with that dogged determination that sharpshooter, machine-gun nest, ambush, hand grenades, rifles, concealed mines, gas shells, curtains of fire, small and big artillery, the blasts of hell itself could not stop. [Applause.]

It was the American alone who slowly but surely advanced through the deadly barrage. Though men by the thousands dropped, their places were filled and on they came. They died crouching forward, all their wounds in front. There was no stopping them. It was the Americans, whose salient was driven deep into the enemy's ranks, always pressed far in advance of their allies. Though the French command, under whom they fought, protested again and again to the American officers to hold them back, the officers were forced to report that they were unable to do so. And an American officer, being court-martialed for not holding them back, defended himself and secured his release by asking, "How the h—— do you expect me to stop 'em when the whole damn German Army can't?" [Laughter.] Another American officer was called to the carpet for not ordering his boys to retreat in order to straighten out the line. And he replied, "I'll not order my boys to retreat. They've won this ground with their blood. I understand our destination is Berlin. If you want the line straightened out, bring up your troops alongside." [Applause.] The French command retorted, "You're getting ahead of your soup kitchens and supplies." To which he replied, "We're going to Berlin, soup kitchens or no soup kitchens." [Laughter.] One night in camp I was visiting with Roy and Harold Distel, of the Fifth Marines, whose parents were born in Germany. Harold had just come up as a replacement. He was listening with me to Roy's description of the Belleau Wood fight. I said, "Roy, didn't you fellows know that that was the Prussian Guard you were going against? The most perfect fighting machine the world had ever known; who had never been stopped in all the four years till you boys stopped them?" And he replied, simply and without boast, "Oh, hell, they ran just like any other Dutchman." [Laughter.]

You can't overawe the American boy. He takes nothing for granted. All human beings look alike to him until they have demonstrated their title to superiority. America is an aristocracy of brains, ability, and deeds.

My friend, my constituent, my neighbor, Capt. George Mallon, has been officially designated one of the 100 heroes. All our allies have honored him with distinguished notice of exceptional bravery. He well typifies the ordinary American soldier, who performed his duty without boast or consciousness that he was doing anything out of the ordinary. Up to the present time, though I have tried and tried, I have been unable to get him to talk of his war experiences. George is a big-hearted, big-fisted, big-bodied 6-footer, gentle, simple, modest, intelligent, who has earned his living by the use of his hands and the sweat of his brow—a plain American who has had no advantages except those of his own making. I cite him because of the accident that drew official recognition to his valor, for his character and war record aptly illustrate the soul of the plain American soldier who has not had the approving stamp of official notice, who makes no claims as to heroism, who performs his duty without thought of reward or praise. The Adjutant General informs me that the official citations in my State alone would take a stenographer over two weeks to copy. Were all the officially unnoted heroism recorded, what volumes and volumes would it make. Captain Mallon was a delegate to the burial of the unknown dead. I tried my best to get him into the gallery that I might have the honor to proudly introduce him to the House, but his retiring, simple, and modest nature would not cooperate with me. I wanted to tell this House of the War Department's citation of this steamfitter soldier, whose heroism blazes forth even from the cold, meager details of officialdom. On the 26th of September, 1918, he and nine of his men because of a dense fog became separated from his company. They captured 100 German prisoners, together with 11 machine guns, four 155-millimeter howitzers, and one antiaircraft gun. In attacking the entrenched Germans, Captain Mallon ordered four of his men to one side and five to the other for flank attacks, he remaining in front, and at a given signal charged; the captain himself going straight in the face of their fire against the mouth of the guns, matching his willingness to die now against tremendous odds, he landed within the entrenchments, knocking senseless with his great fists the commanding officers, silenced the guns, and compelled surrender. [Applause.]

I talked to officers and soldiers of the French, of the English, of the Belgians, of the Italians, of the Germans, and all were eager to assert that the American soldier was the bravest in the world. There was some criticism as to his soldierly technique, but his superiority of valor was everywhere extolled as phenomenal. I talked to a prisoner, an officer of the Prussian guard, who, in company with six of his men, had been captured in a shell hole by an American soldier. I asked him what he thought of the American soldier, and he said, "He is the bravest man in the world, but he is no soldier." I asked him how that was. He said that the Americans did not pay any attention to authority, that they called their officers Jim and Jack and Pete, and that they did not keep their coats buttoned or their shoes shined, and gave utterance to several other what seemed to me petty criticisms, and in order to prove his point, he told me this story.

He and six of his men had taken refuge in a shell hole. An American came up to the shell hole with his coat off, with his shirt torn open. He didn't have any gun or belt or knife—did not have anything. I said, "Was this the man that captured you?" He nodded. "Well," I said, "You fellows had your guns and belts and knives and equipment." "Yes," he said. "We'd be court-martialed if we had not had them." I said, What did he do?" "He came up to the hole, and he leaned over, and he said, "You come out of there you blankety blank blanks or I'll blow you to h—." [Applause.] I said, "What did you do?" He said, "I came out." "Do you mean to tell me that you, with six companions, with your guns and knives and all equipment came out of there for one man?" He said, "Yes; he had two hand grenades." I said, "Yes; but you were seven against one, and you had all the advantage." "I know," he said, "But those hand grenades are very dangerous." [Laughter.]

My colleagues, it was not the hand grenades that made those men come out, it was the soul of the man who dared to die now, not to-morrow, standing there on the edge of that hole; the man who dared to place all at issue now. They had not in all seven of them the match of the soul in the one. They instinctively knew their master and obeyed. They would have come out if he had had nothing but a rotten egg in his hand. It is the soul that counts. [Laughter and applause.]

It is the soul in the breasts of these boys up here in the gallery that is going to count. It is the soul that measures the size of the man, whether on the battle field or in the conflict of life, and our blind friends in the gallery have been tried and found not wanting. They will meet the fight unflinchingly that Fate has laid out for them, as they met the fight in the battle fields for their country, and there will be no question of their success. These blind soldiers in the gallery will build for themselves, perhaps, greater understanding, greater souls, than they would have had had they gone on in the hearing, seeing world.

These boys are going to conquer; they have made up their minds they are going to conquer. I have no doubt that they will conquer in proportion to the fertility of their soul. No better words can typify their dauntless souls than the trench-coined expression, "Let's go." [Applause.] For my blind friends in the gallery, for the soul of the American soldier, the source of power that won the war, I want to say, in the words of Henley:

Out of the night that covers me,
Black as the pit from pole to pole,
I thank whatever gods there be
For my unconquerable soul.
In the fell clutch of circumstance
I have not winced or cried aloud;
Under the bludgeonings of chance
My head is bloody but not bowed.
And all the menace of the years
Finds and shall find me unafraid.
It matters not how straight the gate,
How charged with punishments the scroll—
I am the master of my fate,
I am the captain of my soul.

[Prolonged applause.]

These blind veterans are asking Congress to give them an incorporation. I have introduced a bill to that effect. They want this as a memorial, as a unit for getting together in after years, and maintaining enshrined their common sacrifice. This bill is before the Judiciary Committee. On behalf of these boys I ask you to do anything you can to further its report and passage. There is another bill that I feel confident will soon come before us, and it ought to pass, and I feel confident it will. It gives to the totally disabled $50 a month for nurse hire or guide, which will be of inestimable value to these blind boys.

On the 2d of March of this year I was invited by Mr. Joseph Vance, the director of the Evergreen School for the Blind, where these boys are being educated and trained, to address them upon the subject of how a blind man got to Congress and what he has seen there. I ask unanimous consent to extend my remarks by printing that speech, together with the introduction of the director, in 8-point type.

The SPEAKER. The gentleman from Minnesota asks unanimous consent to extend his remarks in the manner indicated. Is there objection? [After pause]. The Chair hears none.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Crockett, one of its clerks, announced that the Senate had passed with amendments bill of the following title, in which the concurrence of the House of Representatives was requested:

H. R. 11450. An act to provide for the printing and distribution of the Supreme Court Reports and amending sections 225, 226, 227, and 228 of the Judicial Code.

The message also announced that the Senate had agreed to the amendment of the House of Representatives to the joint resolution (S. J. Res. 173) authorizing the President to appoint a commission to represent the Government of the United States at the centennial celebration of the independence of Brazil, to be held at Rio de Janeiro in September next.

The message also announced that the Senate had passed bills of the following titles, in which the concurrence of the House of Representatives was requested:

S. 3580. An act to extend the time for the construction of a bridge across the Red River of the North at or near the city of Pembina, N. Dak.; and

S. 3610. An act authorizing the construction of a bridge across the Ohio River near Steubenville, Ohio.

The message also announced that the Senate had passed without amendment the bill (H. R. 6313) authorizing the Secretary of Commerce to grant a right of way for a public highway to the county of Skagit, Wash.

The message also announced that the Senate had agreed to the reports of the committees of conference on the disagreeing votes of the two Houses on the amendments of the Senate to bills of the following titles:

H. R. 9859. An act making appropriations for the Post Office Department for the fiscal year ending June 30, 1923, and for other purposes; and

H. R. 9981. An act making appropriations for the Executive and for sundry independent executive bureaus, boards, commissions, and offices for the fiscal year ending June 30, 1923, and for other purposes.

The message also announced that the Senate had agreed to the amendment of the House of Representatives to the bill (S. 2014) to provide for the settlement of small holding claims on unsurveyed land in the State of New Mexico.

The message also announced that the Senate had passed without amendment the bill of the following title:

H. R. 7052. An act for the relief of G. C. Caldwell.

SENATE BILL REFERRED.

Under clause 2, Rule XXIV, Senate bill of the following title was taken from the Speaker's table and referred to its appropriate committee as indicated below:

S. 3580. An act to extend the time for the construction of a bridge across the Red River of the North at or near the city of Pembina, N. Dak.; to the Committee on Interstate and Foreign Commerce.

ENROLLED JOINT RESOLUTION AND BILLS PRESENTED TO THE PRESIDENT FOR HIS APPROVAL.

Mr. RICKETTS, from the Committee on Enrolled Bills, reported that June 6 they had presented to the President of the United States for his approval the following joint resolution and bills:

H. J. Res. 339. Joint resolution making available funds for repairing and restoring levees on the Mississippi River above Cairo, Ill.;

H. R. 9344. An act providing for the appropriation of funds for acquiring additional water rights for Indians on the Crow Reservation, in Montana, whose lands are irrigable under the Two Leggins Irrigation Canal; and

H. R. 10972. An act to readjust the pay and allowances of the commissioned and enlisted personnel of the Army, Navy, Marine Corps, Coast Guard, Coast and Geodetic Survey, and Public Health Service.

CALENDAR WEDNESDAY.

The SPEAKER. To-day is Calendar Wednesday, and the Clerk will call the roll of committees.

The roll of committees was called, and when the Committee on Banking and Currency was reached—

DEPOSITARIES OF PUBLIC MONEYS IN FOREIGN COUNTRIES, ETC.

Mr. McFADDEN. Mr. Speaker, I call up House Joint Resolution 94.

The SPEAKER. The gentleman from Pennsylvania calls up the House joint resolution, which the Clerk will report.

The Clerk read as follows:

House joint resolution (H. J. Res. 94) authorizing the Secretary of the Treasury to designate depositaries of public moneys in foreign countries and in the Territories and insular possessions of the United States.

Resolved, etc., That the Secretary of the Treasury may designate such depositaries of public moneys in foreign countries and in the Territories and insular possessions of the United States as may be necessary for the transaction of the Government's business, under such terms and conditions as to security and otherwise as he may from time to time prescribe.

Mr. DOWELL. Mr. Speaker, I make the point of order that there is no quorum present.

The SPEAKER. Will the gentleman withhold that until the committee amendment is reported?

Mr. DOWELL. I will.

The committee amendment was read as follows:

Page 1, line 8, after the word "prescribe," strike out the period, insert a colon, and add: "*Provided*, That in designating such depositaries American financial institutions shall be given preference wherever, in the judgment of the Secretary of the Treasury, such institution is safe and able to render the service required."

SPEAKER PRO TEMPORE.

The SPEAKER. The Speaker is likely to go away to-morrow, and designates the gentleman from Massachusetts [Mr. WALSH] to act as Speaker pro tempore until his return.

The gentleman from Iowa makes the point of order there is no quorum present. Clearly there is no quorum present.

Mr. MONDELL. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The Clerk called the roll, and the following Members failed to answer to their names:

Ackerman	Connolly, Pa.	Foster	Jefferis, Nebr.
Andrew, Mass.	Cooper, Ohio	Frear	Jones, Pa.
Ansorge	Cooper, Wis.	Free	Kahn
Arentz	Copley	Freeman	Kennedy
Bankhead	Coughlin	Fuller	Kiess
Beck	Crowther	Funk	Kindred
Black	Davis, Minn.	Gallivan	Kinkaid
Blakeney	Deal	Glynn	Kitchin

Padgett	Sabath	Taylor, Colo.	Yates
Paige	Sanders, Ind.	Taylor, Tenn.	Zihlman
Park, Ga.	Sanders, N. Y.	Temple	

The SPEAKER. Two hundred and fifty-nine Members have answered to their names; a quorum is present.

Mr. MONDELL. Mr. Speaker, I move to dispense with further proceedings under the call.

The motion was agreed to.

The SPEAKER. The Doorkeeper will open the doors.

DEPOSITARIES OF PUBLIC MONEYS IN FOREIGN COUNTRIES, ETC.

Mr. McFADDEN. Mr. Speaker, I ask unanimous consent that the Banking and Currency Committee be discharged from the further consideration of House Joint Resolution No. 94, and we may take up Senate Joint Resolution No. 7.

The SPEAKER. The gentleman from Pennsylvania asks unanimous consent that the Committee on Banking and Currency be discharged from further consideration of House Joint Resolution 94, and that Senate Joint Resolution No. 7 be considered in lieu thereof. Is there objection?

Mr. WALSH. Mr. Speaker, reserving the right to object, I would like to have the Senate resolution reported.

The SPEAKER. The Clerk will report the Senate resolution.

The Clerk read as follows:

Senate joint resolution (S. J. Res. 7) authorizing the Secretary of the Treasury to designate depositaries of public moneys in foreign countries and in the Territories and insular possessions of the United States.

Resolved, etc., That the Secretary of the Treasury may designate such depositaries of public moneys in foreign countries and in the Territories and insular possessions of the United States as may be necessary for the transaction of the Government's business, under such terms and conditions as to security and otherwise as he may from time to time prescribe.

Mr. WALSH. Is it the intention of the gentleman to offer the same amendment to this joint resolution as the committee had proposed to the House joint resolution?

Mr. McFADDEN. It is.

Mr. WALSH. Then I do not see any advantage to be gained by considering the Senate resolution; it will have to go back to the Senate. We could pass the House resolution and let them concur.

Mr. McFADDEN. I will say to the gentleman that the Senate has already passed this resolution; it is a short resolution.

Mr. WALSH. But they have not passed it with the House amendment, and you are going to send it back for them to concur in it. Well, I object.

The SPEAKER. The gentleman from Massachusetts objects.

Mr. McFADDEN. Mr. Speaker, I ask unanimous consent to consider Senate Joint Resolution No. 7 in lieu of House Joint Resolution No. 94.

The SPEAKER. Is there objection?

Mr. KING. Reserving the right to object, I would like to ask the gentleman what is the difference in the two?

Mr. McFADDEN. I will say to the gentleman that there is practically no difference, but it was suggested that we consider the Senate resolution as a parliamentary convenience.

Mr. WALSH. There is not any parliamentary convenience in it.

Mr. WINGO. I do not understand. I thought the gentleman was making this request a few moments ago and that the gentleman from Massachusetts [Mr. WALSH] objected. Does he now withdraw his request?

Mr. McFADDEN. I ask that the Senate resolution be considered in place of the House resolution.

Mr. WINGO. It is practically the same request?

Mr. McFADDEN. Practically. That is, the resolution has been on the calendar for quite some time. The committee has not had an opportunity to get the resolution up for consideration, but the Treasury has been considerably embarrassed in carrying on the fiscal functions of the Government in some of these countries. Under the different acts that were enacted by Congress during the war, which provided for the methods of financing the public business in these countries, there were designations made, but the provisions of those acts were terminated six months and two years after the war. I am informed by the Treasury that they are still embarrassed because of the lack of authority to establish depositaries in such sections as are not now authorized to have them, and because of this they are very anxious to have this resolution passed. The Senate has already passed the resolution, and I am informed by the Treasury that they are only going to designate, in a very limited manner, where it is absolutely necessary to carry on the functions of the Public Treasury.

Mr. SNELL. Will the gentleman yield for a question there?

Mr. McFADDEN. I will.

Mr. SNELL. As I understand, the old resolution expires, and this is a continuing resolution without any limit of time?

Mr. McFADDEN. Practically all of the war authorizations have expired. This does give them, without any special limitation, the authority to establish depositaries wherever the Treasury finds it necessary.

Mr. SNELL. Is it the understanding that they will have continuing depositaries?

Mr. McFADDEN. So far as the Treasury finds that it requires depositaries in different countries or possessions, I will say to the gentleman there are only slight amounts now there, and under the amendment which I propose to offer, under the authority of the committee, it is proposed to limit these depositaries to American institutions where their facilities are available.

Mr. SNELL. I think that is a good idea, and I can see why, when we had a great many men over there, it was necessary; but I was wondering, when all the war activities had ceased, why it should be necessary to keep American money there.

Mr. McFADDEN. There are transactions at all times not incident to the war which make it necessary for the Treasury to have depositaries which they can use for the purpose of facilitating the fiscal affairs of the Government.

Mr. SNELL. Previous to the war did they have some authority there?

Mr. McFADDEN. Yes; but just what the limitations were I do not now recall.

Mr. SNELL. Under what authority was that?

Mr. McFADDEN. That does not apply to this situation.

Mr. SNELL. Have they the same authority now that they had previous to the war?

Mr. McFADDEN. I do not understand that they have.

Mr. SNELL. We have never passed any law changing that, to my knowledge.

Mr. McFADDEN. The Treasury say that they are handicapped and embarrassed, and feel that they should have this additional authority at this time. The amendment which I propose to offer at the proper time provides as follows:

Provided, That in designating such depositaries American financial institutions shall be given preference wherever in the judgment of the Secretary of the Treasury such institution is safe and able to render the service required.

Mr. SNELL. I think that is a very important amendment. I think we should have a definite statement as to why, after all the present war activities cease, it will be necessary to have any more authority to bank in foreign countries than we have before.

Mr. McFADDEN. I will read from the statement of the Secretary of the Treasury on this very point.

He says:

You will recall that the only authority existing at the present time for the designation of United States depositaries in foreign countries is found in section 8 of the act of September 24, 1917, as amended by the act of April 4, 1918, and in section 4 of the act of September 24, 1918. The authority given by the first-named act expires six months after the termination of the war between the United States and the Imperial German Government, and the authority of the second-named act is limited to the period of the war and two years after its termination. The authority given by the first-named act therefore expires on January 2, 1922.

Mr. SNELL. That does not refer to the authority that existed previous to the war.

Mr. McFADDEN. I judge from this letter that there was no authority for such designations prior to the war.

Mr. SNELL. I was wondering what had happened since that made it absolutely necessary that we should give them this.

Mr. McFADDEN. I will say to the gentleman that we still have soldiers in Germany, and many transactions incident to the debt owed by these Governments and other financial operations, which we did not have prior to the war.

Mr. SNELL. Is there anything being paid on the debt into the depositaries over there?

Mr. McFADDEN. I understand from last evening's paper that Great Britain is about to make an arrangement to pay

$250,000,000. The debt commission is dealing with that situation under authority of Congress.

Mr. KING. Will the gentleman from Pennsylvania yield?

Mr. McFADDEN. I will.

Mr. KING. Is it not a fact that the letter you are reading from was written in 1921, and has not this legislation been before the House for many months? Is that a recent letter that the gentleman from Pennsylvania has?

Mr. McFADDEN. It is dated December 28, 1921.

Mr. KING. We are talking to-day as if we were back in 1921.

Mr. McFADDEN. I will call the gentleman's attention to the fact that most of the authority which we have expires two years after the termination of the war with Germany has been declared officially ended.

Mr. SNELL. It will run for another year yet?

Mr. McFADDEN. Yes; but it does not give them sufficient authority to designate authorities where they find the Treasury needs require them at the present time.

Mr. SNELL. You would naturally expect that two years after the war they would get pretty nearly through putting our money over there.

Mr. McFADDEN. One would naturally infer that, but sometimes it takes longer.

Mr. SNELL. If it is absolutely necessary, so far as I am concerned, I will not object.

Mr. McFADDEN. I think it is absolutely necessary that they have this authority.

Mr. SNELL. But I do not like the proposition very well.

Mr. McFADDEN. I agree with the gentleman to some extent there.

Mr. LAYTON. Will the gentleman yield?

Mr. McFADDEN. I yield to the gentleman from Delaware.

Mr. LAYTON. Is it intended to divert any funds in the United States to these depositaries?

Mr. McFADDEN. Only as the needs of the Government in the settlement of matters pertaining to these countries are involved. I do not understand that it is the purpose of the Treasury to take from this country any funds except what may be necessary for settlement of accounts locally in those countries where these depositaries are to be designated and where in special cases the funds are not already in hand in those countries.

Mr. JONES of Texas. Merely as a matter of language in the adoption of the amendment you use the word "institutions" in the first part. Should you not use it also in the latter part?

Mr. McFADDEN. It might improve the phraseology a little bit.

Mr. Speaker, does the gentleman on the other side desire some time?

Mr. WINGO. Yes; I would like to have some time.

Mr. McFADDEN. How much time would the gentleman like to have?

Mr. WINGO. Give me five minutes.

Mr. McFADDEN. Mr. Speaker, I yield to the gentleman from Arkansas five minutes, and I reserve the balance of my time.

The SPEAKER. The gentleman from Pennsylvania reserves the remainder of his time, and yields five minutes to the gentleman from Arkansas.

Mr. WINGO. Mr. Speaker, this bill is a practical necessity. Of course, the committee thought it should be adopted. The Government, of course, in handling its funds in foreign countries ought, as far as possible, to use American financial institutions or their branches.

Mr. KING. Mr. Speaker, will the gentleman yield?

Mr. WINGO. Yes.

Mr. KING. What institutions does the gentleman refer to that are permitted to act as depositories under this act?

Mr. WINGO. Well, it is possible that there would be some in South America. One practical illustration comes to my mind. The gentleman from Pennsylvania [Mr. McFADDEN] will correct me if I am in error; it has been quite a time since the hearings were had on this bill. One situation that will be covered is our deposits for Panama Canal operations. As I recall now, the depository, an American institution, is just now outside the zone. As a matter of fact, there is very grave doubt whether the Treasury has authority to use that depository as it is being used at the present time outside the zone.

Mr. DENISON. I think that authority exists by special act.

Mr. WINGO. There is some doubt about it, as to whether or not it goes far enough. The gentleman may be right. The hearings were so long ago my mind is hazy on the details. In the war we did undertake to authorize the Secretary of the Treasury to use foreign depositories for disbursements.

Mr. SNELL. Mr. Speaker, will the gentleman yield?

Mr. WINGO. Yes.

Mr. SNELL. That has never been done before in time of peace, has it?

Mr. WINGO. I do not think we have ever undertaken to authorize it down there in time of peace, but it has been done and is being done.

Mr. SNELL. Under this bill could you maintain a depositary in any South American country? Is that your idea?

Mr. WINGO. Yes. This is intended to give the Secretary of the Treasury the necessary leeway and authority, but I do not think any Secretary of the Treasury would send funds to a foreign bank without some necessity for it. But take naval stations, for example. This not only covers foreign countries, but it covers our insular possessions, our outlying territory.

Mr. SNELL. What are we doing in Hawaii, for instance?

Mr. WINGO. I think we are doing it there now without authority. This will grant authority where in some instances unquestionably it does not now exist, and it will legalize practices that have grown up heretofore. For illustration, there is very grave doubt in the minds of lawyers whether or not we could authorize England, say to-morrow, if she is going to pay interest to the United States, to do anything else than actually transfer that interest to the United States by a draft or actual cash. But if we have a depositary over there for the purpose of receiving funds, if this commission desires to designate a certain depository to receive them, and it should appear to the Secretary to be to the advantage of the United States to receive that deposit as designated in a foreign country on account of the exchange situation, and if the Secretary of the Treasury should know that if it would be to the interest of the United States to do that, there is nothing wrong in giving him, a high official of the United States Government, the head of our Treasury Department, the discretion to do it. That is why I, for one, believe the discretion should be given to the Secretary.

Mr. LAYTON. Mr. Speaker, will the gentleman yield?

Mr. WINGO. Yes.

Mr. LAYTON. But that is a very large discretion to be lodged in an official.

Mr. WINGO. Oh, yes; but whether you want to be or not, we are part of the world, and our Government has certain transactions that must be conducted abroad. If it were nothing but the foreign debt that is due to us, if we never had a warship in foreign waters or in our insular possessions, there might still be occasion to use a foreign depositary. It should not be required that they should come to Congress every time the Treasury or this foreign refunding commission wants a depositary designated. You do not do that in the United States.

Mr. LAYTON. How did we get along during the last 140 years?

Mr. WINGO. Oh, well, we have gotten along just as we got along without railroads and telephones and electric lights and automobiles and everything else. We should enable the United States Government to empower its own chief financial officer in the interest of the United States to use a foreign depositary.

Mr. SNELL. Mr. Speaker, will the gentleman yield?

Mr. WINGO. Yes.

Mr. SNELL. Has the committee any idea of how many places would be named as depositories?

Mr. WINGO. Well, I have an idea that one of them would be in Germany. It has been announced that we will keep some troops there indefinitely. You would make a depository down there in the Canal Zone in the territory just over the line. You would legalize a present depository in the Philippine Islands and in the Hawaiian Island, and in Alaska.

Mr. SNELL. You do not think there is any legal authorization for such a depository at the present time?

Mr. WINGO. There is some dispute about it. At first I had the impression that you gentlemen have.

Mr. SNELL. With respect to the foreign debt, what advantage would it be to us?

Mr. WINGO. I think the gentleman as a business man can conceive of a situation on account of exchange conditions where the Treasury of the United States or this debt commission might find it to the interest of the United States to let the payment be made in the first instance to a depository of the United States in London and then send it over here. We might get a benefit by it, and I am going to assume that the Secretary of the Treasury is not going to take money out of this country as a matter of favor, but that he is going to confine it to the purposes and benefit of the United States.

Mr. LAYTON. Might we not get a loss?

The SPEAKER. The time of the gentleman has expired.

Mr. McFADDEN. I yield 10 minutes to the gentleman from Wisconsin [Mr. A. P. NELSON].

Mr. A. P. NELSON. Mr. Speaker, at the time this bill was originally considered and unanimously reported by the Committee on Banking and Currency I gathered some data from the Treasury Department, and after listening to the discussion that has taken place here to-day I think it appropriate to state at this time the facts therein contained, because I think such facts will help to clarify the situation and enable Members to understand some of the underlying reasons why this bill ought to be passed.

In the first place the recommendation came from Secretary Houston in his report of 1920, in which he very strongly recommended that depositaries of this kind should be designated by our Government in order to facilitate the orderly transaction of our business in foreign countries.

The same recommendation was again reiterated by the present Secretary of the Treasury, Mr. Mellon, in a written communication to the chairman of this committee and also to myself. Therefore we have the recommendation of two Secretaries of the Treasury who are charged with the responsibility of seeing that the business of this Government in foreign countries is properly carried on. If I may be permitted, therefore, I will quote from the memorandum given to me in May, 1921, which is just as apropos to-day as it was then, because there has been no change in the conditions so far as the relationships of our Government in foreign countries are concerned except those which had to do strictly with war activities; and if you will study the bill and the report upon it you will find that Congress should to-day make some deliverance upon this subject that will make it proper in every way for the Secretary of the Treasury to designate in foreign countries depositaries for our consular and diplomatic officers and for our Postal Service in foreign countries. In the first place, then, let me say that it is not only convenient but practically necessary that there be Government depositaries in certain foreign countries and in the Territories and insular possessions of the United States, for the purpose of furnishing United States disbursing officers with adequate financial facilities, both as to disbursements and deposits. Disbursing officers of the Army and of the Navy stationed outside the continental limits of the United States frequently require supplies of cash for pay rolls and other expenditures, and they, as well as officers of the Diplomatic and Consular Service, and occasionally of the Postal Service, have deposits to make for credit of the Treasurer of the United States. The absence of depositary facilities from time to time causes great inconvenience, particularly to consular officers. I wish the House to note this particularly.

Second, the only authority existing at the present time for designation of United States depositaries in foreign countries is found in section 8 of the act of September 24, 1917, as amended by the act of April 4, 1918, and in section 4 of the act of September 24, 1918. The authority of the first-named act is limited in two respects: First, it authorizes the designation of depositaries to provide for current disbursements only; second, the authority is limited to six months after the termination of the war between the United States and the Imperial German Government.

Of course, that authority has now terminated. The authority of the second-named act is also limited, first, to the designation of depositaries with which may be deposited all or any part of the avails of any foreign credits or foreign currencies, and, second, to the period of the war and two years after its termination.

Mr. JONES of Texas. Will the gentleman yield?

Mr. A. P. NELSON. I would like to complete my statement first.

Third, the authority for the designation of depositaries in the Territories and insular possessions of the United States is found in section 5153 of the Revised Statutes, the act of June 6, 1900 (depositaries in Cuba, Porto Rico, and the Philippine Islands), the act of July 1, 1902 (depositaries in Philippine Islands), and sections 25 and 25a of the Federal reserve act.

The authority granted by section 5153 of the Revised Statutes is limited to national banks only. It frequently happens that there is no national bank in the particular locality in the territory where a depositary is needed.

It is also possible that there are no American banks in some localities where it is necessary for us to transact foreign business. Hence this act is simply to make provision in a general way and in a concrete and specific way for the orderly transaction of our business in foreign countries.

The acts of June 6, 1900, and July 1, 1902, cover only Porto Rico and the Philippine Islands.

Section 25 of the Federal reserve act, known as the Edge Act, grants authority to national banking associations to establish branches in foreign countries or dependencies or insular possessions of the United States, and to act, if required to do so, as fiscal agents of the United States. In view of the language used elsewhere in the Federal reserve act, authorizing the use of the Federal reserve banks as depositaries and as fiscal agents of the United States, it is doubtful whether fiscal agent authority is authority for the designation of depositaries. I want you to note this statement.

Section 25a of the Federal reserve act provides that the Secretary of the Treasury may use Edge Act corporations organized under this section as depositaries in Panama and the Panama Canal Zone, or in the Philippine Islands, and other insular possessions and dependencies of the United States.

Fourth, it will be seen, therefore, that the existing authority for the designation of depositaries in foreign countries and in the Territories and insular possessions of the United States is much restricted, and that as to foreign depositaries even the existing authority has now expired. The language of the joint resolution will take care of the situation, and at the same time provide proper safeguards, for it limits the Secretary's authority to such depositaries as may be necessary for the transaction of the Government's business.

Under the language of the joint resolution now before us it is not intended to deposit our home funds in foreign countries. The purpose is merely to provide a place where the ordinary and necessary Government business in foreign countries may be properly taken care of, and not compel the consular or diplomatic offices to be without any place properly designated by the United States authorities where they may deposit funds that are temporarily in their hands or charge, in the legitimate transaction of the business of our Government. Hence it appears to me that this resolution merely provides the designation of depositaries in foreign countries by the Secretary of the Treasury for the purpose of facilitating and safeguarding our governmental business in foreign countries.

Mr. GRAHAM of Illinois. Will the gentleman yield?

Mr. A. P. NELSON. Yes.

Mr. GRAHAM of Illinois. I wonder if the gentleman would be willing to accept an amendment placing a limitation of a certain number of years on this authority, for instance, two, three, or five years, or whatever time may be thought to be wise, so that we can try this thing out and not make it unlimited authority, but for the present, place a limitation on it, and then if it is found that it works satisfactorily we can extend it by action of Congress at some future time? Personally I am somewhat averse to making this legislation continuing indefinitely in the future. Had not we better try it for a number of years?

Mr. McFADDEN. If the gentleman will yield, I think he is magnifying the importance of this, for it is only used in minor transactions.

Mr. GRAHAM of Illinois. I do not know whether I am or not; nobody knows. Had we not better limit it; is it not safer?

Mr. KING. They have been doing it for a year and a half.

Mr. GRAHAM of Illinois. It may be that they are doing it. I am not advised about the situation except as to general legislation; in matters of this kind I think it is safer to limit it to a certain period.

Mr. A. P. NELSON. The gentleman knows that we are now conducting certain governmental business in foreign countries, and this is merely to facilitate and improve such business transactions.

The SPEAKER pro tempore (Mr. WALSH). The time of the gentleman from Wisconsin has expired.

Mr. KING. Mr. Speaker, this is a very ancient and honorable bill, one of the heirlooms from the former administration upon which we have spent much time, effort, and thought. The recommendations of the former Treasurer, Mr. Houston, no longer contain the force and volume which they once contained when addressed to Congress. It might be well to suggest for the enlightenment of the few that are here this morning that this bill is a complement to the Edge Act which was passed by this House at the time or a little before this bill came out of committee, which was expected to make a great success in foreign trade, stabilize exchange, and bring about reconstruction. It was not long before they appeared before the committee and desired this bill passed. Why? Because they want the words "U. S. Depository" put over the door of the banking corporation as a suggestion to the public that it is used as a United States depository, therefore it must be a very safe and good banking institution.

Now, that is one of the purposes of this bill. There is nothing reprehensible in it. I am only offering additional reasons why the House should pass the bill without much dis-

cussion. But I could not let the time go entirely by and be consistent without mentioning this fact, and it is only for the purpose of assisting the committee and assisting these great Edge corporations which would revolutionize the world and put us all on our feet that I desire to make remarks. I say let us help the Edge banks out; they need assistance. Pass this little bill, which has been on the calendar for more than a year, and help them in that way.

Mr. A. P. NELSON. In what particular does this assist the Edge banks?

Mr. KING. By making them United States depositories. They will all put the words up over the doors of the bank, and the Government will put its money into these international banks. Now, we are being regaled by all sorts of propaganda for internationalism, and it is proper to establish these outposts for the benefit of internationalism.

Mr. WINGO. Will the gentleman yield?

Mr. KING. Yes.

Mr. WINGO. What bill is it the gentleman wants to get up?

Mr. KING. I am not asking to get up any bill; I am speaking in behalf of this bill.

Mr. WINGO. Oh, the gentleman is speaking in behalf of this bill. I misunderstood.

Mr. KING. The gentleman from Arkansas is very frequently disturbed.

The SPEAKER pro tempore. The time of the gentleman from Illinois has expired.

Mr. McFADDEN. Mr. Speaker, how much time have I used?

The SPEAKER pro tempore. The gentleman has used 28 minutes.

Mr. McFADDEN. I yield 10 minutes to the gentleman from Maine [Mr. HERSEY].

Mr. HERSEY. Mr. Speaker, I ask unanimous consent to speak out of order.

The SPEAKER pro tempore. The gentleman from Maine asks unanimous consent to speak out of order. Is there objection?

There was no objection.

Mr. HERSEY. Mr. Speaker, there is now pending before the Judiciary Committees of both the House and Senate a joint resolution introduced in the House by the gentleman from New York [Mr. LONDON] providing for the recommendation of Congress to the President of amnesty and pardon for political prisoners in the United States (H. J. Res. 60).

This resolution sets forth that there is grave doubt as to the constitutionality of the espionage act and the acts amendatory thereof, and recommends to the President of the United States, the Attorney General of the United States, and the Secretary of War the wisdom of granting immediate pardon and amnesty to these prisoners.

On May 16 last the gentleman from New York [Mr. LONDON], who in Congress is the representative of the Socialist Party, addressed the House upon this matter and, among other things, he said:

> I want to present to the House, now that you are all singing the praises of those who love peace, of those who advocate international concord, of those who seek the abolition of war, the question of amnesty for the men who had the courage to speak their true convictions about war during the war.
>
> There are hundreds of them in jail. There are 113 political offenders of the kind I have described in the Federal jails. There are hundreds of them in the State prisons, over which Congress has no jurisdiction. The men on whose behalf I speak have been convicted under section 3 of the espionage act.
>
> * * * * * * * *
>
> The children of some of these prisoners have been for some time in Washington. The President has refused to see them. I have a sort of suspicion that the President has been advised by his friends not to see them. It is very likely that he could not have a sort of suspicion that the President has been advised by advisers, the Wall Street clique, the open-shop supporters, the enemies of every progressive thought, see to it that the President should not be influenced by the plea of the children, and that the appeal of the victims of the espionage law should not reach his heart.
>
> * * * * * * * *
>
> It is evident that the interests which surround the President just now are too strong for him to consider this proposition. I want the Congress to act upon it.

There has been much propaganda and ridiculous agitation in the country over socialistic draft evaders, conscientious objectors, and those who opposed the draft during the war in favor of the release of all prisoners who were convicted during the war of the violation of the espionage act.

This agitation and propaganda from socialistic bodies and cheap newspapers might well be overlooked by this Congress, but when statements such as those made by the gentleman from New York, on the floor of the House, with such a disregard of the facts, it is time that his challenge was accepted and the real facts put before the people of this Nation.

The gentleman from New York [Mr. LONDON], when he made his speech before the House, was perfectly familiar with the extended hearings held on this resolution before the two Committees on the Judiciary of the House and Senate. He also attended those hearings and testified himself, and he knew full well that there is no such thing as a "political prisoner" or a "conscientious objector" now among the 113 in prison, for whom he recommends a presidential pardon.

Let me briefly review the facts that have led up to the speech of the gentleman from New York. When the armistice was declared there were in Federal prisons about 17,000 persons convicted under the espionage act and other war statutes. Attorney General Gregory issued to all the United States attorneys the following:

> DEPARTMENT OF JUSTICE,
> *Washington, D. C., February 1, 1919.*
>
> CIRCULAR NO. 931.
>
> *To all United States attorneys:*
>
> You are undoubtedly aware of an agitation now current demanding a "general amnesty for all political prisoners." In the view of this department, section 3, title 1, of the espionage act was enacted to prevent willful obstruction of the prosecution of the war and was not directed against individual beliefs and opinions as such, and the department has sought to conduct its prosecutions on this basis. It therefore recognizes no such class of persons as "political offenders," and it is not in favor of any general amnesty.
>
> Nevertheless it may be that during the war some individuals in close cases have been convicted upon inadequate evidence of their willful intent to interfere with the war program, and others have undoubtedly received sentences unduly severe.
>
> In the interest of justice these mistakes, if any, should be corrected. With this consideration in mind, I some time since directed that my department make a study of all cases which have arisen under said section, with a view to presenting to the President for Executive clemency, by way of commutation or reduction of sentence, any cases which clearly merit such treatment.
>
> In making this study I desire your personal opinion and advice. Will you, therefore, immediately send the department a frank and informal expression of your views upon the justice of the verdict and sentence in each case of conviction under this section where the term of the sentence remains unexpired, together with your recommendations, if any, concerning commutation, pardon, or reduction of sentence? In reviewing the justice of the verdict, you will please apply the test of sufficiency of evidence to prove a willful intent and not any such tests as the general disloyalty or dangerousness of the defendant. In connection with your report and recommendations upon each of these cases, will you please confer with the trial judge and transmit any suggestions or recommendations as the trial judge may be willing to make?
>
> Also please fill out and return for each such case the attached docket entries, one to be made out for each defendant. If more than one defendant is involved in a case, and your recommendations are identical for all, one docket entry will be sufficient for such case.
>
> Respectfully,
>
> T. W. GREGORY, *Attorney General.*

Attorney General Palmer testified before the Senate Judiciary Committee that he came into office the 5th day of March, 1919, and found these reports were coming in to the Attorney General's office from the district attorneys, and Senator STERLING asked him this question: "Did you carry on the policy inaugurated by your predecessor?" and he answered:

> Yes; we continued that, and have continued it up to the present time. There have been many cases where applications for pardon in due form have been filed. You know, of course, that the Department of Justice, acting for the President in the matter—he being the sole pardoning power—has framed certain rules and regulations which have long been in force in the Department of Justice. For instance, a pardon will not be considered unless an application, either in the form prescribed by the regulations or one similar to it, is received. Upon the receipt of such an application the regular procedure is to request the district attorney and the trial judge for their opinion. The President does not consider any application for pardon unless either the district attorney or the judge makes a favorable recommendation. Neither does he consider an application for pardon unless innocence be alleged as a reason, until the parole period has been reached, that is to say, one-third of the sentence.

He further testified:

> Attorney General PALMER. The total number of cases handled by the Department of Justice under war-time statutes, as shown by the dockets kept by the department in Washington, based upon the reports which I have mentioned, has been 17,900. Of these 2,924 have been disposed of otherwise than by convictions. Five thousand seven hundred and twenty have resulted in convictions and 9,259 are pending.
>
> As for the details of those cases, the largest number, of course, are the cases arising under the selective service act, under sections 5 and 6, of which 2,144 have been disposed of otherwise than by conviction, 4,812 have resulted in conviction, and 8,846 are still pending.

He also said to the committee:

> Now I hand you a statement covering 581 cases of persons convicted under the espionage act, giving the name of the defendant, the nature of the case, the date of the sentence, and the judgment; and where the sentence has been commuted or changed, that fact appears under the heading, "Circumstances of execution of sentence."

He further testified that 199 of these 581 cases were pardoned by President Wilson after the cases had been fully reviewed by the Department of Justice and the President and a recommendation for pardon made by Attorney General Palmer.

Attorney General Palmer was a man of great legal ability and, I believe, of sterling honesty. I think he fairly and courageously performed his duty, and his recommendations for

pardon were made after a full consideration of all the facts; and whatever may have been the political faults of ex-President Wilson, it is well known that in cases for pardon brought before him he exercised great kindness of heart and always gave the benefit of doubt to the prisoner.

When President Harding took the oath of office and Attorney General Daugherty became a member of the Cabinet, the Department of Justice, at the request of the American Federation of Labor, reviewed all the remaining cases of persons in prison convicted under the espionage act, and recommendations were made by the present Attorney General to President Harding, and the President reviewed all the evidence in these cases and issued many pardons, even for Debs, for it is well understood that there has been no man in the White House since Lincoln that has been so approachable, has such a large heart for all unfortunates, and who has exercised so much kindness and mercy in the matter of pardon, as Warren G. Harding.

The hearings before both Judiciary Committees of Congress disclose the fact that there are now in prison, of all these 581 cases convicted under the espionage act, but 113. These remain in prison after their cases have been fully reviewed by the Department of Justice and by two Attorneys General and by two Presidents, and the record shows that these are not political prisoners. They are not convicted for expressing their opinions, but they were indicted, tried before juries, convicted, and their sentences affirmed by the courts of appeal under section 3 of the espionage act, which act reads as follows:

Whoever, when the United States is at war, shall willfully make or convey false reports or false statements with intent to interfere with the operations or success of the military or naval forces of the United States, or to promote the success of its enemies, and whoever when the United States is at war shall willfully cause or attempt to cause insubordination, disloyalty, mutiny, or refusal of duty in the military or naval forces of the United States, or shall willfully obstruct the recruiting or enlistment service of the United States, to the injury of the service of the United States, shall be punished—

And so forth.

Mr. KEARNS. Will the gentleman yield?

Mr. HERSEY. Gladly.

Mr. KEARNS. Would a man or woman be convicted under section 3 of that act for criticizing the Government or criticizing the President for official action?

Mr. HERSEY. No; and the court has so ruled.

Mr. KEARNS. Are not many of these prisoners to-day now in prison for doing that very thing?

Mr. HERSEY. Not one of them.

The gentleman from New York [Mr. LONDON] approves and advocates the picketing of the White House by the children of these 113 prisoners, men who have been found by the Department of Justice and the President of the United States not worthy of pardon, and not safe to go at large. I have hitherto expressed my opinion of picketing as a disgraceful means, however used, to secure legislation. I know of no more disgraceful, unpatriotic, and unfair method than that now used by these elements of discontent to force a pardon for these prisoners from the President.

A morning Washington paper has the following:

The children's crusade for amnesty will picket the White House to state its case "on banners carried by the women and children," it was announced last night by Mrs. Kate Richards O'Hare of St. Louis, commander in chief of the crusade.

Mrs. O'Hare issued a statement in connection with her announcement, saying:

"Over 30 wives and children of the men in prison have been waiting week after week in Washington to see the President and tell him why all the men should be freed. Their right of petition has been denied. The President has turned them away 20 times without any good reason. This is an appeal in the name of the American right of free speech, which so many politicians seem to have forgotten. We do not intend to let them forget it. The President's refusal to see us forces us to state our case at the White House gates on banners carried by the women and children. We will not leave Washington until we have succeeded in getting the administration to meet this issue squarely."

Socialism, the father of bolshevism, can never ascend to power in the United States through the efforts of the gentleman from New York [Mr. LONDON] or the picketing of the White House by the children of convicts. It is time that the Members of Congress accept the challenge thrown down by the gentleman from New York and in Congress and on every public platform and in every place meet the issue squarely of socialism against civilization. It is the solemn duty of every true American to register on every occasion a protest against these anarchistic methods to destroy the Republic. [Applause.]

Mr. MCFADDEN. Mr. Speaker, I yield five minutes to the gentleman from New York [Mr. LONDON].

Mr. LONDON. Mr. Speaker, 51 Members of the House of Representatives have signed a petition asking the President to grant amnesty to the 113 political offenders to whom the gentleman from Maine [Mr. HERSEY] has referred. I assume that he is not among those who have signed that petition.

I am astonished that a gentleman of his ability should resort to the cheap and vulgar method of denouncing the amnesty movement as socialism, Bolshevism, and anarchism, instead of employing argument. He read section 3 of the espionage act—a French word, hard to pronounce, and representing a system which was perfected by Napoleon. Under this section a jury of business men, a jury of laymen, were called upon to interpret the meaning of a speech, of a book, or of a circular. During the excitement of war they were called upon to render deliberate judgments as to the possible implication of language which they frequently did not understand.

Mr. WARD of North Carolina. Mr. Speaker, will the gentleman yield?

Mr. LONDON. Yes.

Mr. WARD of North Carolina. I heard a United States Senator in a speech in the Senate the other day say that one man was convicted and imprisoned for repeating a speech which he, the Senator, had made, and I wish to ask the gentleman from New York if he knows whether that man or such a man is among those now in prison and whom he thinks should be pardoned?

Mr. LONDON. I want to say to the gentleman from North Carolina that Jefferson would have been sent to jail; that the reading of the Declaration of Independence could have been interpreted as an act to incite opposition to the draft; that the reading of the Bible, the recital of the Ten Commandments might have been construed by ignoramuses as opposition to the draft.

Mr. WARD of North Carolina. If the gentleman will permit, I suggest that his answer is not quite satisfactory, or to the point.

Mr. LONDON. I beg the gentleman's pardon. I do not know whether the particular individual to whom the gentleman has referred is now in jail, but I do know that among the 113 political offenders there are men who have been sentenced to 20 years' imprisonment, and that many of them are so firmly convinced of the justice of their principles that they refuse to sign a petition for clemency. They say that they have committed no crime, that they have no hatred in their hearts, that they were advocates of international peace, and that they would rather rot in jail than petition for mercy and be forgiven the commission of a crime which they have not committed. I think men who are capable of such martyrdom deserve respect, deserve that their cases be analyzed and studied. Every man owes it to himself to search his own soul and find whether he did his full duty during the great crisis that confronted mankind during the war. The men convicted under section 3 and now in jail are political offenders.

The SPEAKER pro tempore. The time of the gentleman from New York has expired.

Mr. LONDON. Mr. Speaker, will the gentleman from Pennsylvania yield me two or three minutes more?

Mr. MCFADDEN. Mr. Speaker, I yield two minutes more to the gentleman from New York.

Mr. LONDON. Mr. Speaker, during the hearings I defined a political offender as one who had come in conflict with wartime laws by reason of his sincere advocacy of a religious doctrine, of a political philosophy, or of an economic theory. All of the 113 cases are covered by my definition of a political prisoner.

Where does the gentleman find the authority for the statement that these men are not political offenders? He admits that they have been convicted under section 3 of the espionage act, and section 3 is the elastic, the gutta-percha section of that act, which permitted the conviction of any man who happened to be in the minority during the war.

Mr. Speaker, it requires courage in ordinary times to be in a minority, but when the world is mad with the fury of war, the man who has the courage to proclaim a principle which is true for all time is the first victim of the mob. The patriotic fervor during the war was such that it was utterly impossible for any judge or jury to do justice in the ordinary sense of the word. I am a pacifist at heart. I detest war, but many a time during the war I found rising within me hatreds such as I thought myself incapable of. I can see how the average juror would find it practically impossible to give a square deal to a man who was charged with having made a strong, radical statement which appeared to him, the juror, as opposition to the Government and as endangering the country.

Mr. HUSTED. Mr. Speaker, will the gentleman yield?

Mr. LONDON. Yes.

Mr. HUSTED. Did not these men who were convicted advocate opposition to the execution of the Federal statutes?

Mr. LONDON. No; let me tell the gentleman what happened.

The SPEAKER pro tempore. The time of the gentleman from New York has again expired.

Mr. LONDON. Will the gentleman from Pennsylvania yield me three minutes?

Mr. McFADDEN. I yield three minutes to the gentleman.

Mr. LONDON. These men, most of them, were men who were advocating certain unpopular doctrines prior to the war.

Mr. HUSTED. Was it not more a question of opposition to the execution of the laws than the declaration of any particular doctrine or opinion which they may have held which led to their conviction?

Mr. LONDON. Some of them persisted in advocating their doctrines in spite of the fact that we had a war. Gentlemen should not forget that even in this Congress the war was not taken seriously until the beginning of 1918. I recall that in this very Congress a conservative Member made a motion that the enlisted men should not be called upon to serve abroad until an opportunity was given to them to volunteer. It was in effect a motion that they should not be sent abroad except when they volunteered, and this fool motion received 115 or 117 votes in the House. Such was the sentiment in the House. Resolutions were introduced in the House that men of German birth should not be called upon to serve. All sorts of similar resolutions were introduced in the House and in the Senate. A speech delivered along these lines outside of Congress would have exposed the man who delivered it to conviction and imprisonment under the Federal statutes.

These men are the victims of a war psychology, of war insanity. Let us admit that we are not normal in war times, and we are not. Every civilized government admits it. After war amnesties are granted. Take, for instance, the French commune. The French communards organized a revolution against their Government while Paris was surrounded by the enemy. The uprising was suppressed with brutality. But as soon as the Republic of France began to feel that it was out of danger amnesty was granted by the Government. Amnesty was granted after the Civil War here by our Government. The first act of amnesty by the American Government took place after the whisky insurrection. After every political upheaval civilized governments grant amnesty. Such has been the course of every European Government since the last war.

Under leave granted to extend my remarks, and as a reply to the statement made by the gentleman from Maine that all the cases involving convictions under the espionage act have been thoroughly examined by the previous and by the present Attorneys General, I submit the following extracts from the CONGRESSIONAL RECORD, dated January 25, 1922, page 1671:

PROSECUTIONS UNDER ESPIONAGE AND OTHER WAR ACTS.

Mr. BORAH. Mr. President, I have here a resolution of inquiry directed to the Attorney General which I desire to submit and for the immediate consideration of which I ask unanimous consent. The information called for by the resolution, I think, will not require any extra effort upon the part of the Department of Justice, for, as I understand, the information is already available.

Mr. CURTIS. I ask that the resolution may be read before unanimous consent is given for its consideration.

The VICE PRESIDENT. The Secretary will read the resolution submitted by the Senator from Idaho for the information of the Senate.

The reading clerk read the resolution (S. Res. 226), as follows:

"*Resolved*, That the Attorney General be, and he is hereby, directed to furnish the Senate with the following information in regard to persons prosecuted by the Government under the espionage act or for conspiracy to violate war laws, where such persons are either in prison or on parole, or whose cases are still in the courts, either untried or on appeal:

"1. The names and home addresses of each of the defendants.

"2. The statutes under which each indictment was brought, with synopsis of the offense charged.

"3. The date and place of each conviction wherever trials were had.

"4. The sentence, showing the time of expiration.

"5. The appeals taken, if any, and the result thereof.

"6. Action taken by the Executive in commuting sentences and by the pardon board in paroling defendants, or any review of the case resulting in unfavorable recommendations for commutation or parole."

The VICE PRESIDENT. Is there objection to the immediate consideration of the resolution?

Mr. STERLING. I do not know that I understand the first part of the resolution. I inquire does it relate to those persons who are at present confined under sentence?

Mr. BORAH. Yes.

The resolution was considered by unanimous consent and agreed to.

And from the CONGRESSIONAL RECORD, dated February 3, 1922, page 2091:

PROSECUTIONS UNDER ESPIONAGE AND OTHER WAR ACTS.

The President pro tempore laid before the Senate a communication from the Attorney General in response to Senate Resolution 226, directing the Attorney General to inform the Senate relative to prosecutions under the espionage law or for conspiracy to violate war laws, agreed to January 25, 1922, which was ordered to lie on the table.

Mr. BORAH subsequently said: Mr. President, I ask the indulgence of the Senate for but a moment with reference to a letter which has just come to the Senate from the Attorney General. A few days ago I submitted a resolution asking for certain information with reference to the conviction of persons under the espionage act, with reference to those who are charged with crime and not yet tried, and so forth. The Attorney General in his letter says:

"In reply I beg to advise you that the department is not in possession of all of the information requested, nor is it readily obtainable. In fact, it is doubtful whether in some respects the information can be obtained at all. Certainly it will be necessary to circularize the United States attorneys throughout the country, and even that, in all probability, will be insufficient."

The Attorney General closes by saying:

"The department will further consider these questions and an effort will be made to comply with the request of the Senate as fully as practicable and consistent with the public interest, but a considerable delay is inevitable, and I may say its cost at this time to the department will be a substantial item."

I had understood, Mr. President, when I introduced the resolution that this information was now in the hands of the Attorney General. I had that information from such a source that I thought it was reliable. I only wish to say that I have no desire to impose upon the Attorney General work which will lead to the expenditure of a large amount of money. I do not see how obtaining the information asked for in the resolution would lead to such an expenditure, and I do not desire that, but I should like to have such information as the Attorney General now has in his possession, which can be sent to the Senate, I am sure, without any considerable cost, or, indeed, at practically none at all. I feel that if all of the information which is now in the possession of the Attorney General or the Department of Justice is sent to the Senate it will be a practical compliance with this resolution.

The information subsequently furnished—Senate Document No. 159, Sixty-seventh Congress, second session—by the Attorney General reads like a catalogue, and fails to furnish the real information which would enable the reader to determine the merits of these cases.

The real question in all these cases is not whether the defendants were convicted under section 3 of the espionage act, but what were the acts charged against them, what did they say, what did they write, what did they do, what facts were proven against them?

A careful reading of the hearings had on Senate Joint Resolution 171, Sixty-sixth Congress, third session, and on House Joint Resolution 60, Sixty-seventh Congress, second session, before the Committee on the Judiciary of the House of Representatives will bring the reader to the inescapable conclusion that the victims of the espionage act now in prison or under indictment should be immediately relieved of all penalties and restored to full civic rights.

The SPEAKER pro tempore. The time of the gentleman from New York has again expired.

Mr. LONDON. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD.

The SPEAKER pro tempore. Is there objection?

There was no objection.

Mr. McFADDEN. Mr. Speaker, I ask that the Senate joint resolution be read for amendment.

The SPEAKER pro tempore. Does the gentleman desire to offer an amendment?

Mr. McFADDEN. Line 8, after the word "prescribe," I desire to offer this as a committee amendment: "*Provided*, That in designating such depositories American financial institutions shall be given preference wherever, in the judgment of the Secretary of the Treasury, such institution is safe and able to render the service required."

The SPEAKER pro tempore. The Clerk will report the amendment.

The Clerk read as follows:

Amend Senate joint resolution, on page 1, line 8, after the word "prescribe," by striking out the period, insert a colon, and adding: "*Provided*, That in designating such depositaries American financial institutions shall be given preference wherever, in the judgment of the Secretary of the Treasury, such institution is safe and able to render the service required."

The question was taken, and the committee amendment was agreed to.

The Senate joint resolution as amended was ordered to be read a third time, was read the third time, and passed.

On motion of Mr. McFADDEN, a motion to reconsider the vote by which the Senate joint resolution was passed was laid on the table.

Mr. McFADDEN. Mr. Speaker, I ask that House Joint Resolution 94 be laid on the table.

There was no objection.

AMENDING FEDERAL RESERVE ACT.

Mr. McFADDEN. Mr. Speaker, I ask to take up Senate bill 831.

The SPEAKER pro tempore. The gentleman from Pennsylvania calls up the bill which the Clerk will report.

The Clerk read as follows:

An act (S. 831) to amend the proviso in paragraph 10 of section 9 of the Federal reserve act amended by the act of June 21, 1917, amending the Federal reserve act.

Be it enacted, etc., That the proviso in paragraph 10 of section 9 of the Federal reserve act amended by the act of June 21, 1917, amending the Federal reserve act, be amended as follows:

Strike out all after the word "than" in the sixth line of said proviso and insert in lieu thereof the following:

"That which could be borrowed lawfully from such State bank or trust company were it a national banking association," so that said proviso when amended shall read as follows:

"*Provided, however*, That no Federal reserve bank shall be permitted to discount for any State bank or trust company notes, drafts, or bills of exchange of any one borrower who is liable for borrowed money to such State bank or trust company in an amount greater than that which could be borrowed lawfully from such State bank or trust company were it a national banking association."

Mr. McFADDEN. Mr. Speaker, this is an amendment to paragraph 10 of section 9 of the Federal reserve act as amended by the act of June 27, 1917, the purpose of which is to place the State banks and trust companies who are members of the Federal reserve system on the same basis that national banks who are members of the Federal reserve system are. The statements in the report are very lucid, and with the permission of the House I think I shall read this, as it contains a complete explanation of what we are proposing to do.

As the law now is, if the regular line of credit of the borrower from a member State bank is not more than the 10 per cent limit, as fixed by section 9 of the Federal reserve act, Federal reserve banks may rediscount for State member banks to the same extent that they may for national banks. If, however, the regular line of credit of the borrower from a member State bank is more than that 10 per cent limit, then the Federal reserve bank can not rediscount any of that regular line of credit.

The Federal Reserve Board is in favor of this bill, and a portion of the communication signed by Governor Harding, which explains its provisions, is as follows:

"Section 13 of the Federal reserve act authorizes a Federal reserve bank to rediscount for any member bank, whether a national bank or a State member bank, the notes, drafts, and bills of any one borrower up to but not in excess of 10 per cent of the member bank's capital and surplus, and provides that this 10 per cent limitation shall not apply to the discount of bills of exchange drawn in good faith against actually existing values.

Mr. WALSH. Will the gentleman yield for a question?

Mr. McFADDEN. I will.

Mr. WALSH. I would like to know where this proviso that is sought to be amended is found in the act of June 27, 1917? That is an amendment to section 19 of the Federal reserve act. Now, I have examined the act of June 21, 1917, and I do not find in paragraph 10 such language.

Mr. McFADDEN. I will say the gentleman raised that question a while ago, and I am having it looked up at this time. It may be a typographical error in printing. Before we get through the consideration of this bill I shall be able to answer the gentleman fully on that point. I hope the gentleman will wait till then. I want to answer correctly.

Mr. GARNER. Will the gentleman yield?

Mr. McFADDEN. I do.

Mr. GARNER. Is this proposed law intended to remove an inequality existing at the present time between national banks and State banks as to their——

Mr. McFADDEN. It is.

Mr. GARNER. Does the inequality exist in favor of the national banks or the State banks?

Mr. McFADDEN. In favor of the national banks.

Mr. GARNER. This is to put the State banks on an equality with the national banks in borrowing power from the Federal reserve system?

Mr. McFADDEN. When members of the Federal reserve system. And I will say to the gentleman that this benefits more particularly the little banks to the west and southwest, and it is a very desirable amendment.

Mr. GARNER. It ought to have been in the original law.

Mr. McFADDEN. I agree with the gentleman in regard to that, but there are a great many things that should have been in the original law that were not in.

Mr. GARNER. But the original law is the best ever framed in this country; give it credit for that.

Mr. WINGO. Mr. Speaker, I deny that there is any discrimination in the original law, but by subsequent acts of Congress over my protest. The original law put both on an equality.

Mr. GARNER. There seems to be a difference of opinion between two very distinguished gentlemen.

Mr. WINGO. The gentleman from Pennsylvania will not say there is a discrimination in the original law because I think that was covered by section 5200, but it was by an error, not by the Banking and Currency Committee, but in a revenue act coming from the Ways and Means Committee.

Mr. GARNER. I am glad to have the certificate of the gentleman from Arkansas that the original act did not discriminate against State banks, because it ought not to discriminate.

Mr. McFADDEN. The gentleman is quite correct. The gentleman from Arkansas was present when the Federal reserve act was formulated, and I know that he has always been a friend interested in the rural communities and would see that they were properly provided for. The gentleman is correct.

Mr. WINGO. There should not be an impression that anybody attempted deliberately to discriminate. Here is where the trouble came in: The rights of State banks as member banks were fixed by the original Federal reserve act. Subsequently certain changes were made by war-time revenue laws. The first change was we undertook to change the 10 per cent rule. Then subsequently that particular act was amended by an amendment to the Federal reserve act that met an erroneous ruling of the Federal Reserve Board. And in the amendatory act you failed to take care of the State banks, as I contended at the time.

This bill confesses my contention by giving the State bank members equal rights.

Mr. McFADDEN. I will read:

The provisions of section 5200 of the Revised Statutes authorize a national bank, subject to the conditions and limitations therein prescribed, to make loans to a single borrower in excess of 10 per cent of the bank's capital and surplus by discounting certain kinds of paper therein described, including notes secured by shipping documents, warehouse receipts, and other such documents conveying or securing title covering readily marketable nonperishable staples, including live stock, and notes secured by bonds or notes of the United States issued since April 24, 1917, or certificates of indebtedness of the United States. Consequently a national bank may have outstanding loans to a customer, represented by notes of the kinds just described, in excess of 10 per cent of its capital and surplus, and the Federal reserve bank may, nevertheless, under the provisions of section 13, rediscount for that national bank the paper of that customer up to 10 per cent of the national bank's capital and surplus, provided, of course, the paper is eligible. On the other hand, if a State member bank with the same capital and surplus has made loans to one of its customers in the same amounts and of the same character, the Federal reserve bank is prohibited under the terms of section 9 from rediscounting for that State member bank any of that customer's paper.

That is the situation we are trying to correct here, so that the State banks and trust companies will have the same advantages when they are members of the Federal reserve system that the national banks have now.

Mr. WINGO. Will the gentleman yield there?

Mr. McFADDEN. I will.

Mr. WINGO. I have not looked up the act of June 21, 1917. Evidently there is an error, because the history of this is that the amendment to the Federal Reserve Board act was to meet the warehouse paper ruling of the Federal Reserve Board.

Mr. McFADDEN. I think the gentleman is correct. I have not a copy of that amendment before me.

Mr. WINGO. That was subsequent to 1917. The first change made there was made in a war-time revenue bill which undertook to loosen up section 5200. And in that amendment the trouble has come. After that there was an amendment to the Federal reserve act to cover the warehouse situation and meet the decisions of the board on that, and so I think really the draftsmen of this bill had in mind that last act, because that was the last law on the subject, which wiped out and made the change that was made in the revenue act. I think that is evidently where the gentleman will find it. If he will get the date of the last act, the one covering the warehouse situation, he will find it is there.

Mr. McFADDEN. Answering the inquiry of the gentleman from Massachusetts [Mr. WALSH], I will now say that the amendment that I will offer at the proper time to correct the situation which he raises is on page 1, line 4, after the word "by," by inserting the words "section 3 of."

The SPEAKER pro tempore. The gentleman from Pennsylvania offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. McFADDEN: Page 1, line 4, after the word "by," insert the words "section 3 of."

The SPEAKER pro tempore (Mr. WALSH). The question is on agreeing to the amendment.

The question was taken, and the amendment was agreed to.

The SPEAKER pro tempore. The Chair's attention has been directed to the fact that in volume 40 of the statutes the word "than" occurs in the fifth line, while the bill refers to the sixth line.

Mr. McFADDEN. Mr. Speaker, I move to strike out in line 6 of the bill the word "sixth" and insert "fifth."

Mr. WINGO. We have not yet reached the amendment stage.

The SPEAKER pro tempore. The Clerk will report the amendment.

Mr. WINGO. I thought that gentlemen were to be recognized for debate.

The SPEAKER pro tempore. The gentleman from Pennsylvania finished debate and sent an amendment to the desk. The Clerk will report the amendment.

The Clerk read as follows:

Amendment offered by Mr. MCFADDEN: Page 1, line 6, strike out the word "sixth" and insert in lieu thereof the word "fifth."

The SPEAKER pro tempore. The Chair will state that this is a House Calendar bill, and, of course, under the rules an amendment may be debated for an hour. The gentleman from Pennsylvania [Mr. MCFADDEN] concluded his explanation of the bill and submitted an amendment.

Mr. McFADDEN. I do not wish to take time away from the gentleman from Arkansas [Mr. WINGO]. Can he utilize the time under the amendment?

Mr. WINGO. I am going to exercise all the ingenuity I can under the rules to find time, in view of the situation. The gentleman not less than 30 minutes ago stated that we could have time under general debate.

Mr. McFADDEN. I was suggesting that it come up at the proper time, but the Speaker put the motion. It was not my intention to deprive the gentleman of time. The RECORD will show that I offered that in proper language.

The SPEAKER pro tempore. Does the gentleman from Pennsylvania yield time to the gentleman from Arkansas?

Mr. McFADDEN. How much time does the gentleman want?

Mr. WINGO. I think the gentleman had better explain his amendment first and I will try to get recognition in my own right.

Mr. McFADDEN. The amendment does not need much explanation. It corrects a mere oversight in the drafting of the bill.

Mr. WINGO. Where does the change come in?

Mr. McFADDEN. The last amendment comes in on line 6. After the word "the," strike out the word "sixth" and insert the word "fifth."

Mr. WINGO. That is on the first page of the bill?

Mr. McFADDEN. Yes.

Mr. WINGO. Can the gentleman tell me the correct date of the act he is amending?

Mr. McFADDEN. June 21, 1917.

Mr. STEVENSON. Will the gentleman yield?

Mr. McFADDEN. I yield.

Mr. STEVENSON. I will call attention to the fact that as printed in this volume it says when this amendment is adopted it will be to strike out all the rest of line 5, and that will only take it down to "such State bank or," and leaves the words "trust company" in line 6 in there, and it is not intended to strike out "State bank or trust company." You are going to strike out "sixth" and insert "fifth" and the balance of line 5 and the first two words in line 6. I do not know why they mixed it up that way.

Mr. McFADDEN. I suggest that the gentleman prepare a proper amendment and offer it.

Mr. WINGO. Will the gentleman yield?

Mr. McFADDEN. I will.

Mr. WINGO. I think the gentleman is satisfied that the act of June 21, 1917, is not the last act that was passed?

Mr. McFADDEN. Offhand, I presume the gentleman is correct. I have not a copy of the law here.

Mr. WINGO. I may be in error in my recital of the fact, but I think the gentleman's memory will bear me out that that is true. Of course, years pass very quickly—and I notice in the report you quote some one—I do not know whether it is the Federal Reserve Board or the attorney for the board. My recollection is you settled the warehouse proposition by the warehouse act two or three years ago.

Mr. McFADDEN. It is my impression that it was that long ago.

Mr. WINGO. And as I recall, that covers section 5200 as amended.

Mr. McFADDEN. Evidently in considering this bill, which was a bill that was drafted in the Senate, the committee have assumed that this portion of the bill which referred to the part of the law which was being amended was properly drawn and did not consider it carefully, but did consider the main facts in the amendment to the bill.

Mr. WINGO. I have an idea that the Senate took what was sent down to them from the Treasury.

Mr. McFADDEN. I can not say as to that, but evidently some one who was not familiar with the law drafted the preamble.

Mr. WINGO. I never looked into anything regarding it before except the subject matter, and I have not undertaken to verify that date, but I fear it is an error.

Mr. STEVENSON. Mr. Speaker, will the gentleman yield?

Mr. WINGO. Yes.

Mr. STEVENSON. I think this is probably the last interference with this particular part of the section. The act which broadened the loans on warehouse products was passed in 1919, according to my recollection, but it did not change the provision of law relative to rediscounts that could be allowed to member banks that were not national banks. I do not think it dealt with that particular section at all, so that I think this section stands now as it is in the law. But I think I can get it quickly and verify my impression.

Mr. WINGO. The reason for bringing this up was that the loosening up of section 5200 took place subsequent to the enactment of the Federal reserve act. The language that was used in the amendatory act applied only to national banks. As I recall, there have been two acts that affected this. One was in one of the war revenue acts and the other was the warehouse paper amendment.

Mr. McFADDEN. I think the original one was to permit loans to be made on Government bonds or securities, which was necessary to permit the financing of governmental loans. The other was what the gentleman just referred to, the warehouse act, which was passed in 1919.

Mr. WINGO. Section 5200 originally applied to national banks only.

Mr. McFADDEN. Yes.

Mr. WINGO. And at the time the Federal reserve act was enacted there was embodied in the State bank member provision an exact copy of the restriction in section 5200 as it then applied to national banks.

Mr. McFADDEN. Yes; to make it applicable to State banks.

Mr. WINGO. I say the restriction in the Federal reserve act was an exact copy of the restriction placed on national banks. Then the amendment to section 5200, which applied strictly to national banks, did not carry with it a provision taking care of State bank members.

Mr. McFADDEN. That is what is proposed to be covered by this amendment.

Mr. WINGO. The last amendment to the State bank member provision to the Federal reserve act was passed in 1917, and that is probably the reason why the draftsman used this reference instead of referring to later bills.

Mr. McFADDEN. In the interval we can look that matter up as regards this correction.

Mr. WINGO. Mr. Speaker, while the gentlemen are doing that I will speak in opposition to the amendment, purely in a pro forma manner, to fill in the time, as there are some things I wish to discuss anyway.

The SPEAKER. The gentleman from Arkansas is recognized for an hour.

Mr. WINGO. Mr. Speaker, the gentleman from South Carolina [Mr. STEVENSON] says he will get it straight, and he always gets straight every legal proposition that he goes after. In the meantime I want to submit a few rambling remarks while the legal gentlemen are getting after that matter with reference to this amendment.

This bill has been pending on the calendar nearly a year. It should have been passed last Congress. The only thing that prevented its passage then was a mistaken movement that was on foot to drive State banks out of business. Those who are responsible for the administration of the banking and currency laws under this administration are a part and parcel of that movement. It has been thought that for 50 years Congress had acted upon the assumption that a national bank was not authorized to have branches. Members who were present will remember that time and time and time again bill have been called up on this floor to authorize the national banks to have branches, and the gentleman from Illinois [Mr. MANN], I think it was, always opposed throwing the bars down entirely, but did agree upon a compromise that he and I worked out by which a bill at one time was passed through the House the effect of which was to have permitted branch banks in the city of Chicago and the city of New York to meet peculiar situations that prevailed there. But nobody had ever suggested until this administration took charge that national banks could establish a national branch banking system in the United States. This administration recognized that that was the law, because the present Comptroller of the Currency at one time raised the question before the Committee on Banking and Currency, and when he found out that there would be a very strong and strenuous resistance to his efforts to turn the American banking system into the British and Canadian branch banking system he then commenced studying the statutes, and if the current rumor among the members of the committee is true he has either rendered a decision or is going to. I noticed a statement in a St. Louis paper the other day to the effect that he had done so, holding that the United States national banks could have such branches.

There is no authority for such a ruling. It is contrary to his own interpretation of the law when he appeared before the Committee on Banking and Currency. It is contrary to the philosophy of the American banking system, and it has back of it and is only a part, Mr. Speaker, of this movement, which is well organized, to absolutely destroy the State banking system in the United States.

Now, why do they oppose little State banks, Mr. Speaker? Their first excuse was that the small State banks could not come into the Federal reserve system. Under the present administration and under the former administration of the Federal reserve system especially, the small country banks were prevented from coming under the system. One bar was a discrimination that was sought to have been removed by this act and which should have been removed a year ago. But what was the real objection of these gentlemen? They say these little country banks are really not banks. They have about the same respect for the little country banks—these little $10,000, $15,000, and $20,000 banks, these incorporated State banks—that John Wanamaker has for a little grocery store in a country town.

Mr. STAFFORD. The gentleman apparently does not know John Wanamaker.

Mr. WINGO. In other words, John Wanamaker, the great merchant of Philadelphia, does not think that these little grocerymen in the country towns are merchants.

Mr. STAFFORD. As I said before, the gentleman from Arkansas apparently is not acquainted with John Wanamaker.

Mr. WINGO. The gentleman says I am not acquainted with John Wanamaker. Perhaps I am not fair to John. I use him simply as typical of a class. In other words, to change my expression, I will say that these great city banks have the same feeling toward this country bank that the great department store in the city has toward the little shop in the country town. They do not call them merchants at all. Oh, no, they just think they are little warts on the commercial body. Why, gentlemen, they absolutely argue that if you will abolish these little country banks and adopt the English banking system and the Canadian system of branch banks, and let the strong bank in Chicago, for instance, put a little branch in the little country town in Illinois, where there are two or three thousand people, it will give that little community all the banking resources of that big bank up at Chicago. Well, recently, when one of the proponents of this branch banking system was before the Committee on Banking and Currency I challenged that theory and pointed to the fact that in principle the branch banking system had been tried in the South and West and had been found a failure, and I referred to the so-called chain banking system, by which one man or group of men would control different banks by owning a majority of the stock. I have no criticism of the men who are running those banks. I have in mind one man who is one of the closest friends I have. There is nothing to prevent him from doing it except the wishes of the community in which his branch bank is located, because that is all it is. He incorporates it, and he and the stockholders of his large bank own all of the stock, and they dominate and control it. What happens? They say to that little bank down there which they dominate and control, "Here, you do not need all this cash. Send it on up to our parent bank. You have behind you all the resources of our large bank, and if you get into trouble we will come to your rescue."

The reason why he goes out and controls that little bank is not because he wants to be a Santa Claus to that community and give it something, but because he wants to suck the funds from that community to swell the deposits of his main institution in the city. That is the reason why he does it. I do not blame him, because he is but exercising his right to follow his selfish desire to reach out and get all the business he can honestly and fairly.

Now, how has that been broken up? In a good many places it has been broken up, and I have helped to do it, and I will tell you how it has been done. In the first place, the city bank organizes a little local bank, which is really nothing more than a branch of the larger bank, by getting the business men and prominent farmers in the community to take small amounts of stock. They say, "Now, here, you have no bank here, or if you have one it is not very strong, and we would like to have in this town a branch of our big bank, and we would like to help you people. You have not the banking accommodations that you ought to have, and we are not permitted to give you a branch, but we are going to organize a little separate corporation, and we will put up the majority of the capital, and we want you to take $100 or $500 worth," and they get the most influential gentlemen in the community to take a little stock. I knew of one young man who was very popular in the community who possessed considerable influence, but who was something of a spendthrift, and he told them, "I have not got the money." They said, "We will lend you the money on your stock," so they lent him the money, and they controlled that little local institution, owning 51 per cent of the stock. Finally the men of that community woke up to the fact that all of their funds were just automatically drawn out, and that they were nothing but a feeder to the larger bank. Finally they got together and served notice upon the man who had sent his own cashier down there, who did not even give them a local cashier, which they do sometimes. They served notice on him, "You will either sell this stock of this bank to us, so that we can control it legally and be free to make any correspondent arrangement that we want to make, or we will organize another bank in competition with your bank, and you know the community is not large enough to support two banks," and by doing that they were able to freeze out the city bank and set up a little banking institution of their own in that town.

Mr. LAYTON. Will the gentleman yield?

Mr. WINGO. Yes.

Mr. LAYTON. As a matter of fact, under the present system of banking, under which, about all the banks with which I am acquainted must retain a certain amount on deposit, every bank must have a preferred depositary where it can send its funds out of the community in order to be able to put that money out at interest, so as to pay for keeping this reserve on deposit. Is not that the effect of it?

Mr. WINGO. No; that is not necessarily the effect of it. I do not think it is absolutely necessary for them to have an outside depositary to the extent that some of them do. But here is the trouble with these banks that undertake indirectly to have branches. Instead of requiring the little local institution or branch to keep on deposit with them only sufficient funds to meet their exchange and other requirements, they compel them to keep in the parent bank all their funds that are not absolutely necessary for till money, and they restrict them in the extension of credits to local people to a greater extent than they would if that little institution was purely a local institution owned and operated by the local people. In other words, the point I want to make is this: That human nature is naturally selfish; that these people who go and organize these little banks—which are nothing but branch banks, in fact, although they have separate organizations—do not organize them for altruistic purposes. They do it for profit, and their profit requires that they suck away and absorb all the local funds they can and take them to the parent institution.

Now, that is the prime evil of the branch banking system. Oh, I know those who are responsible in this administration are very much enamored with a lot of these English ideas. Recently I talked with an English banker and he said he wished that it were possible for them to set up an independent banking system in England and Canada like they have in the United States instead of the English banking system.

If the gentlemen back of this propaganda at this time—if they have their way they will destroy every country bank in this United States, and they are making their first start with the State banks. The first movement in their plan, frankly admitted, is that they come in and get you to grant to national banks a perpetual charter. They did it under the specious plea that some of the States have made the mistake of granting a perpetual charter to State institutions. Then they came in and got you to authorize national banks, demand deposit commercial banks, to act in a fiduciary capacity, a thing absurd on its face. It is an act that no man can defend who knows the A B C of the philosophy and safety of demand deposit banks. They put over those two things.

Now, this bill pending here is worth something. They can not deny this. It has been held up for over a year, and I venture the assertion that it may be some time yet before this little sop—this little fairness, this little justice to State banks—becomes a law. In one breath they complain that the State banks do not come into the Federal reserve system, and in the next breath they admit their real desire is to destroy the State bank system and turn our national banking system into a branch banking system.

I wish the gentlemen on the floor could wake up to what they are up to, but unfortunately the State bankers are not alive to it themselves. They do not know; they have not talked to some of these gentlemen as I have, but if these State bankers do not wake up and bring it to the attention of their Congressmen and Senators they will find that little by little they will be put out of business.

The specious plea that will be used until they get momentum enough to make the movement irresistible, is that they have got to do it to meet the competition of the State banks. If the

comptroller is going to do what is stated in the papers that he is going to do—permit by direction or indirection national banks to have branch banks—you will see in every State and county in this land a repetition of what you see on the streets of Washington to-day. Go along here and you will find little community banks in the outskirts or the suburbs of the city of Washington, changing their names in some instances, and in other instances advertising on their windows that the stockholders of a certain bank, naming a big bank in the city, control the stock in this bank; they are absorbing the deposits of the little suburban merchant that is putting his deposit there each day. It simply means that the large central bank is using these little deposits, not for the pretended convenience of the suburban community and of the country town, but as an outpost to such from the local community and the country the business and the credit of their surplus funds, which might be used to build up and for the interest of that outlying town or community.

Mr. Speaker, I do not own any stock in any bank on earth. I have no selfish motive. I at first was deceived and thought it was the beginning of a competition between the banks, but I have documentary evidence, I have speeches made, which show a conviction on their part that it is for the public welfare to drive the State banks out of existence, especially the small State banks and the small national banks.

Under this perpetual charter act that you passed the other day, which is now in conference, the only difference between the House conferees and the Senate is that the House says perpetual, and the Senate says 99 years; then, whenever you have a Comptroller of the Currency who believes in the vicious branch-bank system that I have just described, and one of these small outlying banks which has a 20-year charter about to expire under existing law, applies for a 20-year renewal or a perpetual charter, more and more you will find the Comptroller of the Currency saying, "No; your community does not need it, because right across the street the First National Bank of St. Louis, or Chicago or New York, or the nearest big city, has a branch and is capable of rendering greater service to the community than your organization is capable of rendering, and I will not renew your charter." As one man stated to me, it might take 20 years to make the reform, but sooner or later, he said, we will have nothing but branch banks in these small towns and suburban communities.

He says it will give more stability to the banking of the country. Oh, it will give stability, but there is a question about that, for it has just one fault that will make it unstable, and history shows it. You let a run start on one of those branch banks, you let the people of that community find out what may be the fact, that that branch bank has been run crookedly, and it will put a fear in the heart of every depositor in every other branch of that parent bank, and really produce more danger and bring about less guaranty of stability than your present independent banking system.

Mr. Speaker, there is not any better banking institution on earth than the little local bank, whose stock is owned by and whose directors number among them the local merchants, the local doctors, the local lawyers, the local farmers. They know the needs of the community. Their selfish interests are interwoven with the selfish interests of every class of that country town and the surrounding territory. That little local bank in a town in the South and West of under 10,000 people has personal touch with the farmers of the territory, it has sympathy with the needs of those farmers, and will do its utmost within the law and within the bounds of sane banking to meet the needs of the people of that particular community. But, Mr. Speaker, a carpet-bag cashier presiding over a little branch bank, coming from the city in which the parent bank is located, will have an amused contempt, an impatient intolerance with what he regards as the provincial social customs and activities of the little community to which he is sent, and the man who comes to him will have to depend upon the cold question of banking profits, because never will the heart of that carpet-bag cashier be moved with a feeling of intelligent, comprehensive appreciation of his neighbors' needs, but he will regard as an unfortunate the man with whom he deals in a cold-blooded business way, and will demand a pound of flesh in every instance, thinking only of profit and never of the community. That is the failing of this threatened branch-banking system which men want to fasten on the United States.

These men ask, "You will admit that this little bank with a capital of $10,000 is a joke as a bank?" But I will not, Mr. Speaker. All over the wheat belt and the cotton belt you will find village banks with a capital of only $10,000 or $15,000. That is all they need. There may be only one or two stores in that village. It is a trading point, a shipping point for the farmers, nothing but a little local money till and an exchange instrument, and they do not need more capital to meet their little local needs than that. It would be mockery to put down there a bank of large capital, just as it would be a mockery to put a big 10-story office building in that sort of a village. I deny that they are a joke as a bank. I say that they are the backbone of the American banking system.

You say that you want to get these larger State banks into the Federal reserve system. I will tell you how to do it. It was never contemplated by the original framers of the Federal reserve act; there is not a line in the original Federal reserve act that will authorize the present Federal reserve policy of making the member banks bear the "float" themselves. I will say to gentlemen on the other side that I guarantee that gentlemen on this side will join with them if you want to do something for the country banker of the United States, if you want to make it attractive for the State banks to come into the Federal reserve system. I will tell you what you will do that will appeal to every one of them. You pass a law that will repeal this regulation and practice of the Federal Reserve Board—a law which will compel the Federal reserve banks to carry the "float," and not the member banks. Gentlemen ask what I mean by the "float."

Here is what I mean. You walk into a bank and cash a check on a bank in another city. That local member bank will put it in an envelope with other items and send it to the Federal reserve bank for collection. There is an arbitrary rule of the Federal reserve bank that they will not give that bank credit for that check for three days—I believe it is longer on the Pacific coast.

Mr. McFADDEN. Five days.

Mr. WINGO. Say that in New York City you give a check on a bank in San Francisco, you being a citizen of San Francisco. The bank would not get credit for that at the Federal reserve bank until five days had elapsed. Why is that done? Is there any necessity for it? No. Under the system that had been built up out of the experience of bankers for over 50 years, what was the real condition? The little country bank that cashed your check, drawn on a foreign bank in another part of the country, sent that check to its correspondent in the nearest city, and that very evening that it put the check in the mail it charged that city bank correspondent with that deposit, and its statement that night showed that they had that much additional deposit with that bank. What I mean by making the Federal bank carry the "float" is this: Let the little country banker and every bank the very moment it sends an item to the Federal reserve bank enter it on their books as a deposit of the Federal reserve bank, and let the Federal reserve bank, when it receives it, credit the member bank with the item that has been forwarded it. Oh, but you say, some of these checks may be bad and may be protested. True, but the presumption is that every bank which cashes a check for an outsider is protected by an indorser, and if that check is protested and it is returned to the Federal reserve bank, the Federal reserve bank, as under the old correspondent system they used to do, could charge it up to the member bank, and when it got back to the member bank they would go out and call on the local merchant or the doctor or the business man who indorsed it and say that it had charged the amount of the check up to his account, as he had indorsed it. That is the old system, but they have reversed it.

Mr. McFADDEN. Mr. Speaker, will the gentleman yield?

Mr. WINGO. Yes.

Mr. McFADDEN. In respect to what the gentleman says about the float I am not in disagreement. I think myself that the Federal reserve system should carry that float. That burden should not be placed upon the country banks at all, and I would be glad any day to cooperate with the gentleman on the other side to correct that situation, which I think should be corrected.

There is one proposition and that is this: The gentleman is speaking of doing away with the desire of national banks to get rid of trust companies. Can the gentleman give a solution of how we can keep the national banks in the Federal reserve system? What is troubling me and what is troubling the bankers of this country and which affects the Federal reserve system, is because of the fact that State laws apparently are more attractive to many of the national banks and they are leaving the Federal reserve system and taking out State charters. Only this morning my attention was called to the fact that in the great commercial center of Detroit—only three national banks there—that some of these banks are contemplating the taking out of a State charter because of the fact, they claim, they are more liberal than the Federal reserve law.

Mr. WINGO. Now, what is the gentleman's question?

Mr. McFADDEN. My question is, How can you keep the national banks in the Federal reserve system?

Mr. WINGO. Just like you put them in. You took them by the nape of the neck and put them in. If they did not go in voluntarily you took the charter away from them. Now, let me notice an erroneous statement made by the gentleman in his question. I do not mean to say that it was done intentionally, but I did not say the national banks were trying to get rid of these trust companies. I said there are a group of bankers and financiers in this country who believe that you ought not to have a State banking system at all, but it ought to be transferred to a branch banking system. That is what I said. Now, the gentleman spoke about national banks surrendering their charter and taking out State charters. I could answer by referring the gentleman to the last statement made by the comptroller's office, showing that in one of the Western States the State banks were surrendering their charters and taking out national bank charters. But here is the trouble with the gentleman's philosophy. Because some States have made unwise State banking laws, and, as I have said here once before, there is one State of this Union in which a State bank under a State bank charter can do any kind of business under the sun. It can run a millinery shop, a peanut shop, a barber shop, a garage, or anything else. The gentleman says that because that State permits State banks to do that, that you would authorize a national bank to run a barber shop?

Mr. McFADDEN. No.

Mr. WINGO. That is competition.

Mr. McFADDEN. Will the gentleman yield?

Mr. WINGO. I will yield.

Mr. McFADDEN. Not in the least; but the fact remains that, for instance in the State of California, the probabilities are within another year the national banks of that State feel it will be absolutely necessary for them to go to the State banking system. Recently in a contemplated consolidation of banks in Cleveland, Ohio, they were undecided whether they would combine under the national banking system or under the State banking system, and the determining thing with them was just this simple question as to whether or not they could have a perpetual charter.

Last week, fortunately, the House passed a bill giving national banks the right to have a perpetual charter. The Senate has amended that bill putting on a limitation of 99 years. That very specific question confronts the national banks of the country as to whether under the State laws they shall leave the national-banking system. That is attractive in many of the large cities, and, another thing, they are asking that they have the right within those States to branches the same as the State banks have.

Mr. WINGO. Has the gentleman concluded? Well, now, the gentleman started out with the proposition that I was misrepresenting him by saying that his philosophy was unsound because they offer as an argument in some of the States that they permitted these foolish things. Then he turns around and says that because the State laws permit State banks to do certain things, that certain groups of national banks desire to take out State charters because they could get a perpetual charter.

Mr. McFADDEN. Will the gentleman yield?

Mr. WINGO. Let us get back to the proposition. I deny there is, and the gentleman has not yet shown any argument to justify the deposit commercial bank acting in a fiduciary capacity. No man can defend it, and no man will try to defend it who knows anything about the philosophy of banking. You do not try to defend it. You put it on a basis not of wisdom but expediency. Well, I get back to the original proposition, that instead of our undertaking to encourage evil banking laws in the States we ought to frown them down, because the very moment you give one preference to a national bank that very moment in every State in the Union the State banks are going to their legislatures and they will say: "You had better go them one better; we have got to have that in order to meet competition." Do you put it upon wisdom? No, but a basis of competitive expediency. Because a State may authorize a State bank to run a barber shop, would you allow a national bank under the same principle to run a barber shop? That is the end of the argument. It is upon the one question of expediency.

Of course, under the present Secretary of the Treasury the men who think it their duty to represent and defend the farmer's needs can expect very little consideration. Under the present administration those who have faith in the country banks of America get scant courtesy. Under the present administration, those who believe in the soundness of the farm credits of this country, and recognize the necessity for the freest marketing of those credits, get scant courtesy. Under the present administration, whenever the question of rural credits is to be considered in our committee in order to be sure that none of the so-called radical gentlemen, like some of the gentlemen from some of the Western States, who were Republicans, and myself, can get through their progressive ideas, the Republican chairman goes to the State of New York and gets Mr. MACGREGOR and puts him at the head of the committee to consider and frame a credit system for the farmers of the West and South.

Mr. DUNBAR. Will the gentleman yield?

Mr. WINGO. I will.

Mr. DUNBAR. Is the gentleman aware that the chairman of the Banking and Currency Committee, Mr. McFADDEN, is one of the largest farmers in the House?

Mr. WINGO. He is the same kind of a farmer that you and I are. He farms with his mouth.

Mr. DUNBAR. I beg your pardon. He cultivates his farm. His income is largely derived from the products of his farm, and why should he be questioned?

Mr. WINGO. I used to think the gentleman was a farmer, but by your statement he is not. For it is impossible for a man to be an active farmer and act as chairman of the committee and a Member of the House and be in the House as closely as is the gentleman from Pennsylvania.

Mr. DUNBAR. I think you will find that most of the members of the Banking and Currency Committee not only look like farmers but they are Members who have the interest of the farming industry at heart.

Mr. WINGO. I suppose the gentleman is talking about Mr. Mellon now, is he not?

Mr. DUNBAR. No. I did not have any reference to him.

Mr. WINGO. He is whom I was talking about. Why did he interrupt me?

Mr. DUNBAR. You were talking about the chairman of the Banking and Currency Committee.

Mr. WINGO. The gentleman does not mean to say that the other Republicans of the Banking and Currency Committee dominate the policy of this Republican administration?

Mr. DUNBAR. I think very largely we have had our say, and to a considerable extent have dominated the policy.

Mr. WINGO. Let us see what you did.

Mr. DUNBAR. We have reported a bill to extend the charter of national banks for 99 years instead of 20 years.

Mr. WINGO. You did that for the benefit of the farmer? [Laughter.] Proceed.

Mr. DUNBAR. Of course, nearly every American farmer who has an estate to be settled will, under the new arrangement, want a national bank to administer the affairs of the estate.

Mr. WINGO. They may do that in Indiana, but not in Arkansas.

Mr. DUNBAR. Another thing which the Banking and Currency Committee did was to authorize the increase of credits, not only in joint-stock land banks but also in farm-land banks.

Mr. WINGO. I am glad the gentleman reminded me of that. You gentlemen will remember that when we had that proposition up of deposits for the farm-land banks I prophesied then you would not meet the requirements.

I said that Members of Congress would receive protests from farmers that their loans were held up for months. Then you said that the amount you provided would be ample. Later on your excuse was that you could not sell bonds. Then, when I was able to show that I could bring gentlemen that would buy those bonds at par, free from any commission, and was ready to back it up with a deposit that was sufficient, what was your excuse? It was that you did not have the machinery to pass on the applications fast enough. I said then that you ought to give them a greater capital deposit, a greater revolving fund, and a greater machinery by which you could handle the business more expeditiously. Did you do it?

Mr. DUNBAR. Will the gentleman yield?

Mr. WINGO. No. I want to get the record straight on that. Is there any gentleman that denies that I called your attention to what would be the effect? You said I was playing politics then. I knew what I was talking about. Farmers have made bona fide applications for loans, and they have had to wait over six months, and farm land banks have sent notices to the local associations in many instances refusing to furnish the local associations with more application blanks, because they said they did not have the funds and could not catch up with the accumulated business. In more than one county in the West, right after the local association could not get action on an application, and after the applications had been sent in, they said the appraiser was too busy to get around, and after they had waited a sufficient length of time, and the farmer thought he would not get his loan, along came a representative of some insurance company or mortgage com-

pany and said, "I understand you could not get your loan from the land bank, but I will get it for you from my concern if you pay me the customary commission." And they did it. You understand that situation; what is going on? They say now that they have not the force. They admit the money market will float every bond that is necessary, but now they have not the force and can not get the papers out fast enough.

They say, "We have got to have the mortgages and notes in order to issue the bonds, and have not got them." You gentlemen are in charge. Why do not you give them sufficient funds? Why do not you give them sufficient force? Why do not you give them enough floating capital, so that they can be independent of this syndicate that holds them up for a quarter of 1 per cent commission? I can tell the gentleman from Indiana why it is. It is because of the activity of the same gentlemen who are controlling the financial administration of this administration, headed by Mr. Mellon, of Pittsburgh, although the gentleman from Indiana thinks he and others are exercising a controlling and dictatorial influence over that policy.

Mr. DUNBAR. How many bonds have been sold since that amendment?

Mr. WINGO. How many does the gentleman say?

Mr. DUNBAR. One hundred and forty-five million.

Mr. WINGO. What was the last?

Mr. DUNBAR. About twenty or thirty millions.

Mr. WINGO. Then you did not have enough bonds to cover 50 per cent of the applications. Why did not you put out enough bonds to get the necessary money to meet pending applications? I ask the gentleman why they did not do it?

Mr. DUNBAR. I will answer that by stating to the gentleman what Mr. Lobdell stated to the committee, and that was——

Mr. WINGO. When?

Mr. DUNBAR. And that was that there were so many applications for loans by people who did not have adequate security to offer for their loans that so much time was used in the consideration of people who did not have an adequate security to offer that sometimes those who had the security to offer had to wait longer than members of the board would have them wait.

Mr. WINGO. Now, I thank the gentleman for his contribution. He is simply giving corroborating testimony. He says they have not enough force to sift out the good applications from the bad. An application has got to be indorsed by the local loan committee and the stockholders of the local institution have got to get back of the loan to the extent of their own subscription to the stock, and on the face of it one man can go over these applications—100 of them a day—and on the very face of them be able to tell which ones are good and which ones are bad, so that he can send out the good ones to an inspector.

Mr. DUNBAR. Mr. Speaker, will the gentleman yield right there?

Mr. WINGO. I want corroboration, but I do not want any more just now from the gentleman. The gentleman admits that they have not force enough down there to separate the false applications from the good, and he admits that the good have to wait so long that they get tired and have to go to a private loan agency. But the question that the gentleman was asked to answer was this: Why did they not issue more bonds to meet the bona fide applications, about which there can be no question? He did not answer that, but the reason for it is that Secretary Mellon has publicly and privately stated that in his judgment there is a certain fixed limit as to what ought to be put out on the market of farmer loan bonds. I am not blaming Mr. Lobdell and I am not blaming the Farm Loan Board; I am not blaming them for the restrictive policy that has driven out of the Farm Loan Board system the best men who were in it, the policy that has driven out Mr. Lever, the ablest member of the board, and compelled him to leave the board and enter the service of a private concern. The statements of the board itself show that you are not putting out half enough bonds to meet the clear-cut applications of bona fide honest farmers?

Mr. DUNBAR. Mr. Speaker, will the gentleman yield there?

Mr. WINGO. Yes.

Mr. DUNBAR. On what does the gentleman base his last assertion?

Mr. WINGO. I base it on the record books themselves, the statements of the Farm Loan Board, and the investigations that I have made.

Mr. DUNBAR. Where did the gentleman obtain those records?

Mr. WINGO. Most of them have come to the gentleman's desk, although the gentleman has probably not read them. Has the gentleman ever investigated the number of applications that have come to the banks and are held up?

Mr. DUNBAR. They have never appeared in the evidence of anyone who has testified before the Committee on Banking and Currency.

Mr. WINGO. Let us see. Has the gentleman ever investigated the pending number of applications to any local association?

Mr. DUNBAR. No. Where has the gentleman obtained the official information?

Mr. WINGO. I have got it from the men who are running the banks, from the men who are running the associations, and I have got it from the papers and letters that come to my desk.

Mr. DUNBAR. You have never obtained it from anybody that appeared before the Committee on Banking and Currency, and so far as concerns the reading of every circular letter that a Congressman receives in 24 hours, a whole day would not be long enough for the reading of them.

Mr. WINGO. The gentleman dodges. He would make a pretty good witness for this administration. I am not asking the gentleman to read every circular that he receives. The assertions that the gentleman has made here are a challenge to every man who has read the official records. He admits as a Member of Congress that he has not read those statements at all. The facts are admitted.

The only dispute about it is the justification for it. The board does not deny it. The board gave the excuse that the gentleman repeated a while ago, and then after having given the excuse, he denies the conditions that have made necessary the excuse. A while ago the gentleman admitted the facts and gave an excuse, but when the excuse could not be substantiated he denied the existence of the facts that he had formerly admitted.

Mr. DUNBAR. Does not the gentleman remember that members of the Federal farm loan banks have appeared before the Committee on Banking and Currency and have testified that they have a sufficiency of funds?

Mr. WINGO. Who and when?

Mr. DUNBAR. In order to meet the demands of the time?

Mr. WINGO. Who and when?

Mr. DUNBAR. Judge Lobdell, about six months ago.

Mr. WINGO. All right. I do not think you can find any statement where Judge Lobdell stated that. The gentleman must have been sleeping or dreaming it. Judge Lobdell did not state that. He is not to blame for it. The Secretary of the Treasury of the gentleman's party and the administration is responsible for it.

Mr. DUNBAR. The gentleman has a louder voice than I have, and he can drown the sound of my voice with his.

Mr. WINGO. Yes; I happen to have the floor.

Mr. DUNBAR. I want the gentleman to refer to the hearings that were had before the Committee on Banking and Currency. If he will do so he will find that what I have said will be proved by the hearings that he will read.

Mr. WINGO. I was present and examined Judge Lobdell myself on at least one occasion.

Mr. DUNBAR. Did he not say that they had a sufficiency of funds, and did not Mr. Lever say so?

Mr. WINGO. No; Judge Lobdell has never taken the position that the gentleman from Indiana now takes. He took the position that the gentleman from Indiana first took, not the one that the gentleman from Indiana now takes.

Mr. DUNBAR. Can the gentleman point to any occasion when any member of the Federal loan bank has appeared before us and said, "We have not got money enough or force enough to function"?

Mr. WINGO. Yes.

Mr. DUNBAR. Why not put it in the RECORD?

Mr. WINGO. What good would it do? What attention would the gentleman pay to it? It would not be of any use to put it in the RECORD. The gentleman would deny the next moment that it existed. If the gentleman will go and investigate the bank that is operating in his own district, he will find they have not sufficient funds to meet the demands of all applicants. The gentleman should go and get the reports from his bank.

Mr. DUNBAR. The gentleman might put it in the RECORD for the same purpose that he is now making this speech.

Mr. WINGO. What good would it do? It would be like pouring water on a duck's back, because the gentleman will not stand hitched. Nobody knows now, after listening to the gentleman, whether he really believes they have got plenty of funds or whether he really believes what he said a while ago—that they did not have force sufficient to pass on the applications fast enough, and that they have plenty of money. I do not know which position the gentleman will finally take.

Mr. DUNBAR. Does the gentleman think that anyone in the House is more definitely informed by what he has said?

Mr. WINGO. No; I have not been making this speech for the information of the gentleman. The gentleman butted into this. I did not. I stated in the beginning that I was going to kill time while the chairman got certain information, and if the gentleman wanted to avoid the proverbial fate of the innocent bystander he should have gotten out of the way. I have no quarrel with the gentleman, and as an evidence of that I have yielded about half my time to him. I have been making this speech for my own pleasure and not for the gentleman's edification.

Mr. DUNBAR. I am not quarreling with my genial friend, but I did not know he was trying to kill time.

Mr. WINGO. Oh, yes; I have already stated that while the gentleman from Pennsylvania [Mr. McFADDEN] and the gentleman from South Carolina [Mr. STEVENSON] were going over and correcting the manifest error of the man who drafted the bill I would submit a few rambling observations.

Mr. TINCHER. Will the gentleman from Arkansas yield?

Mr. WINGO. I yield to the gentleman from Kansas.

Mr. TINCHER. The gentleman has made one statement that is very interesting to me. I am not informed at all on the subject, but I am very much interested in the gentleman's statement that Frank Lever quit the Federal Farm Loan Board because of the fact that he did not approve of the handling of the Farm Loan Board by Mr. Mellon. I have no prejudice on this matter, and I am very much interested in the gentleman's statement.

Mr. WINGO. Here is another gentleman who must have been asleep. I did not say any such thing, or anything that could be interpreted in that way, or anything that remotely intimated that. The gentleman knows why Frank Lever left the Federal Farm Loan Board. It was for two reasons. I do not presume to give them. Lever did not tell me why, but there were obvious reasons why he should want to quit.

Mr. TINCHER. Perhaps I misunderstood the gentleman. I thought he said that Mr. Lever resigned from the Federal Farm Loan Board because of the attitude of Mr. Mellon.

Mr. WINGO. The gentleman can read what I said and then he will find out that I did not say that.

Mr. TINCHER. Reading what the gentleman said and listening to what he says are not always the same thing.

Mr. WINGO. I will admit that that is true. Sometimes I charm the gentleman and he imagines I have said something and he looks in the RECORD and will not find it there because I have not said it. In some instances he dreams I said something, and sometimes I do say something that appears unnecessary and confusing, and then cut it out of the RECORD or revise it. We both do the same thing.

Mr. TINCHER. I do not admit the soft impeachment so far as I am concerned.

Mr. WINGO. It was not an impeachment but a mere recital of a well-known fact.

Mr. JONES of Texas. Can the gentleman tell us why the Secretary of the Treasury will not permit the sale of these farm-loan bonds when they are above par?

Mr. WINGO. I do not know. I can go down and see President Harding with reasonable ease, and I really suppose I could discuss public questions with the President at greater length and more satisfaction and greater ease than I could even reach the presence of the Secretary of the Treasury. Did the gentleman ever try to get any information out of the present Secretary of the Treasury?

Mr. JONES of Texas. Those gentlemen who are connected with the banking system of the country do not seem to be able to do so, and I do not know why I should make the attempt. It is a fact, however, that farm-loan bonds are selling at above par, and that he could sell them.

Mr. WINGO. If the gentleman had gone down and tried to buy them he would have had to pay 102¼, and the 102 would go to the bank and the quarter would go to a syndicate over here in Philadelphia, even if the bank had sold them to him and the syndicate had never sold him anything.

Mr. JONES of Texas. They could sell them above par, and there are many applications, are there not?

Mr. WINGO. Oh, yes; there is no question about that. I have received a bushel basketful of complaints in my office, giving names and dates. I have letters from the managing officers of the banks, and whenever I get a complaint I sit down and look into it. I do not do like my genial friend over yonder—sit around fanning myself. I look into the complaints that I receive. But, gentlemen, it is distressing the way things are going, and I will not be surprised if more gentlemen connected with the system lose heart and recognize what is the fixed policy of this administration. I understand that President Harding is sincere and that the present Secretary of the Treasury is sincere. They honestly do not believe in such things, and they have good reasons for their belief from their point of view. I do not blame the Secretary of the Treasury or President Harding.

When President Harding was a Senator he gave his reasons for not believing in this kind of thing. One time Mr. Mellon, before the Banking and Currency Committee, undertook to give his reasons, and I refer the gentleman to what he then said. Of course, a man who is one of the wealthiest men in the world, who lives in the heart of a great city like Pittsburgh, and all he sees of the American farm is from the windows of his private car or from the observation end of a Pullman going 90 miles an hour, naturally that kind of a man would be afraid of anything so beneficial as the American farm loan banking system. He does not consider it sufficient to overcome his suspicions against it.

The SPEAKER pro tempore. The time of the gentleman from Arkansas has expired.

Mr. McFADDEN. Mr. Speaker, I ask unanimous consent to withdraw the amendment to line 6, page 1.

The SPEAKER pro tempore. The gentleman from Pennsylvania withdraws the amendment.

Mr. McFADDEN. Mr. Speaker, I offer the following amendment.

The Clerk read as follows:

Page 1, line 5, after the word "amended" insert the words "to read."

Mr. McFADDEN. I will say, Mr. Speaker, that we have carefully considered the error that was committed in drafting the bill in the Senate. The committee inadvertently overlooked that, dealing with the vital part of the bill and assuming that the first part was properly prepared. I have two other amendments that I will offer which will correct the situation.

Mr. WINGO. The gentleman from South Carolina and the gentleman from Pennsylvania have agreed on this, have they?

Mr. McFADDEN. We have.

The SPEAKER pro tempore. The question is on the amendment offered by the gentleman from Pennsylvania.

The amendment was agreed to.

Mr. McFADDEN. Mr. Speaker, I offer the following amendment.

The Clerk read as follows:

Page 1, line 6, strike out 6 to 11, inclusive.

The SPEAKER pro tempore. The question is on the amendment.

The amendment was agreed to.

Mr. McFADDEN. Mr. Speaker, I offer the following amendment.

The Clerk read as follows:

Page 2, line 7, after the word "association," strike out the period and insert a comma and the following: "but the discount of bills of exchange drawn against actual existing value and discount of commercial or business paper actually owned by the person negotiating the same, shall not be considered as borrowed money within the meaning of this section.

Mr. WINGO. Will the gentleman yield?

Mr. McFADDEN. Yes.

Mr. WINGO. This will only make the bill comply with the explanation that the Federal Reserve Board really gave to the original bill.

Mr. McFADDEN. That is my understanding.

Mr. WINGO. The Senate committee or whoever was to blame for drafting it wrote the bill so it would repeal existing law?

Mr. McFADDEN. The gentleman is correct, and it came about in this way. The copy of the Federal reserve act issued by the document room is printed differently than is the statute, and evidently the person who drafted the bill followed the document print rather than the statute itself. What we have done here is to correct that with the able assistance of the gentleman from South Carolina.

Mr. WINGO. It includes the part overlooked?

Mr. McFADDEN. Yes.

The SPEAKER pro tempore. The question is on the amendment offered by the gentleman from Pennsylvania.

The amendment was agreed to.

The Senate bill was ordered to be read a third time, was read the third time, and passed.

On motion of Mr. McFADDEN, a motion to reconsider the vote whereby the bill was passed was laid on the table.

PENALTY FOR EMBEZZLEMENT TO INCLUDE NATIONAL-BANK EXAMINERS OR ASSISTANTS.

Mr. McFADDEN. Mr. Speaker, I call up the bill (H. R. 9409) to amend section 5209, Revised Statutes of the United States, relating to penalty for embezzlement by Federal reserve officer, agent, or employee, so as to include national-bank examiner or assistants.

The SPEAKER pro tempore. The gentleman from Pennsylvania calls up the bill which the Clerk will report.

The Clerk read as follows:

Be it enacted, etc., That section 5209 of the Revised Statutes of the United States be, and the same is hereby, amended so as to read as follows:

"SEC. 5209. That any officer, director, agent, or employee of any Federal reserve bank, or of any member bank as defined in the act of December 23, 1913, known as the Federal reserve act, who embezzles, abstracts, or willfully misapplies any of the moneys, funds, or credits of such Federal reserve bank or member bank, or who, without authority from the directors of such Federal reserve bank or member bank, issues or puts in circulation any of the notes of such Federal reserve bank or member bank, or who, without such authority, issues or puts forth any certificate of deposit, draws any order or bill of exchange, makes any acceptance, assigns any note, bond, draft, bill of exchange, mortgage, judgment, or decree, or who makes any false entry in any book, report, or statement of such Federal reserve bank or member bank, with intent in any case to injure or defraud such Federal reserve bank or member bank, or any other company, body politic or corporate, or any individual person, or to deceive any officer of such Federal reserve bank or member bank, or the Comptroller of the Currency, or any agent or examiner appointed to examine the affairs of such Federal reserve bank or member bank, or the Federal Reserve Board; and every receiver of a national banking association who, with like intent to defraud or injure, embezzles, abstracts, purloins, or willfully misapplies any of the moneys, funds, or assets of his trust, and every person who, with like intent, aids or abets any officer, director, agent, employee, or receiver in any violation of this section, shall be deemed guilty of a misdemeanor, and upon conviction thereof in any district court of the United States shall be fined not more than $5,000 or shall be imprisoned for not more than 10 years, or both, in the discretion of the court.

"Any Federal reserve agent, or any agent or employee of such Federal reserve agent, or of the Federal Reserve Board, or any national bank examiner appointed by the Comptroller of the Currency, assistant or clerk to said examiner, who embezzles, abstracts, or willfully misapplies any moneys, funds, or securities intrusted to his care, or which shall come into his possession while making an examination of any bank, or without complying with or in violation of the provisions of the Federal reserve act, issues or puts in circulation any Federal reserve notes, shall be guilty of a misdemeanor and upon conviction in any district court of the United States shall be fined not more than $5,000 or imprisoned for not more than 10 years, or both, in the discretion of the court."

The following committee amendments were read:

On page 3, line 1, strike out "ten" and insert in lieu thereof "five."

On page 3, line 15, strike out "ten" and insert in lieu thereof "five."

The committee amendments were agreed to.

The bill was ordered to be engrossed and read a third time and was read the third time.

The SPEAKER pro tempore. The question is on the passage of the bill.

Mr. McFADDEN. Mr. Speaker, I yield 10 minutes to the gentleman from New Jersey [Mr. APPLEBY].

Mr. APPLEBY. Mr. Speaker, I will not take the 10 minutes allotted. In the first place, I want to answer the charges presented against the Republican members of the Banking and Currency Committee by the gentleman from Arkansas. I think the RECORD will show that since the present committee has been in existence it has had under consideration more proposed laws and reported more bills favorable to agriculture and business in general than the average preceding Congresses. Such amendments as have been made to the Federal reserve system were offered in good faith and were made with the object of strengthening the Federal reserve system. This bill which we are considering to-day, like a number of others, is designed to encourage the national banks to stay in the Federal reserve system. A great many members of the Federal reserve system are dissatisfied, because they are receiving no interest on the daily balances. We have endeavored to induce trust companies and State banks organized in various States to become members of the Federal reserve system. The bill before us to-day is based on that theory. A great many statements have been made as to what State banks are allowed to do in the various States. The answer to that is this: This Congress has no power to control legislation in the various States, and the unusual liberal charters of some States which have been referred to here to-day Congress has had no part in making. What we, the Republican members of the Banking and Currency Committee, have endeavored to do is to strengthen from every angle the Federal reserve system. It is true that a small percentage—less than 50, 33⅓ I think, to be accurate—of the banks of the country are members of the Federal reserve system. It is not the fault of the present Banking and Currency Committee that there are not more member banks. We are endeavoring with each bill presented by our committee to strengthen the Federal reserve system by getting as many members as possible in it, and we are trying to make it so attractive that the State banks and the trust companies which are now consolidating in the various States under State charters may come into the system and take out national-bank charters.

I resent the statement of my friend across the aisle that there has been any intention on the part of the Republican majority to do anything other than to be conservative in recommending legislation. I believe there should be some amendments to the Federal reserve act. The question of whether the member banks shall have an additional rate of interest paid to those who have subscribed for the stock of the Federal reserve system is a question on which we are not fully agreed. I am in favor of some proposition which will cause a division of profits to be made after all expenses have been fully paid by the Federal reserve system. That has been my purpose as a member of the Banking and Currency Committee. The question of politics has not entered into the matter at all. Secretary Mellon has appeared before the committee, as has the Comptroller of the Currency and numerous other financiers. The idea of the committee has been to get the best possible suggestions pertaining to banking enacted into law and to give the banks of the country, irrespective of whether they are National or State banks or trust companies, a fair and equal chance to become members of the greatest system that has ever been operated in this country.

A statement was made by the gentleman from Arkansas to the effect that the Republican members are in favor of branch banking. That statement is not correct in so far as I am concerned and in so far as many other members of the committee are concerned. The State of New Jersey has gone on record more than once against the enactment of any law which allows a State bank to have a branch in the State. The question became so acute that even after one of the governors of that State vetoed a bill prohibiting it both branches of the legislature passed the bill over his veto. There is no question, so far as the members of the Banking and Currency Committee are concerned, they are not trying to protect big business or big banks as has been intimated. I believe the majority of the committee is in favor of continuing, as am I, the local bank in its community, whether it be a State or a National bank, or a trust company as a home institution. The strength of the banking system of the country is built upon the question of the individualism of the banks. The directors are gathered from the various men in every community. The best men are selected in that way. Better supervision, to my mind, can be had by having business done under one roof. Many troubles can easily come from branch banks that are away from the parent institution. I believe I can safely say that there is very little danger of the present Banking and Currency Committee ever reporting out a banking bill calling for branch banks.

The SPEAKER pro tempore. The time of the gentleman from New Jersey has expired.

Mr. McFADDEN. Mr. Speaker, just a brief word in explanation of this bill. It is an amendment to section 5209 of the Revised Statutes relating to the penalty for embezzlement by a Federal reserve officer, agent, or employee so as to include national bank examiners and their assistants. The law heretofore never has been applicable to national bank examiners or assistants who may abstract from the banks either securities or funds. The bill was introduced at the suggestion of the Comptroller of the Currency, and I believe it is a worthy measure. It has been slightly amended by the committee by cutting down the penalty from 10 years to 5 years in addition to the fine of $5,000.

I now yield 10 minutes to the gentleman from Indiana [Mr. DUNBAR].

Mr. DUNBAR. Mr. Speaker, I wish to state to the gentleman from Arkansas [Mr. WINGO] who has just inveighed against the directors of the Federal farm loan banks, that Judge Lobdell has stated since the gentleman finished his remarks that all applications are now being expeditiously considered and that there are ample funds at his disposal to take care of every legitimate request for a loan that is made, that the loans are being made as promptly as it is possible to do. I think possibly the gentleman has had in mind the chaos that existed in times gone by, and possibly he has been appealed to by some of his constituents and, due to the fidelity and zeal which he always manifests in the discharge of a duty, he became interested, of course, in securing the loans for his constituents and has not yet realized that the trouble and confusion that heretofore existed under the Democratic administration has by Republican business methods been overcome and is now almost negligible, and that the Federal farm loan banks

are functioning as efficiently as the gentleman could wish. I think if he will make an investigation he will find this statement to be true.

Mr. BOX. Mr. Speaker, will the gentleman yield?

Mr. DUNBAR. Yes.

Mr. BOX. I am not sure that I understood the gentleman. Does the gentleman mean to state that all these loans that are safe are now being made, and people are not being denied and applications are not being delayed, that they can get action promptly on meritorious applications for loans?

Mr. DUNBAR. That is the information that I have obtained.

Mr. BOX. I state for the information of the gentleman that the complaint from my own people to the contrary is well-nigh universal.

Mr. DUNBAR. I would suggest that the gentleman confer with Judge Lobdell and find wherein the trouble lies.

Mr. JONES of Texas. I would state that the complaints from my section are that they can not get funds.

Mr. DUNBAR. I would answer the gentleman by saying, as I suggested to the previous gentleman, that he confer with Judge Lobdell and find where the trouble lies.

I wish to state, gentlemen of the Sixty-seventh Congress, that the financial affairs of this Government for the past year have been so administered that by the end of the fiscal year, due to excess of receipts over expenditures brought about by economical supervision of a Republican Congress, we will be able to reduce the Government indebtedness between six and seven hundred million dollars, and will still have the same amount of money in the Treasury on July 1, 1922, that we had in the Treasury on July 1, 1921; and to show that the Secretary of the Treasury has confidence that the public debt of the United States during the present fiscal year will be reduced that amount, I will say that the gross debt of the United States since May, 1921, has been reduced more than $800,000,000.

I can not understand why it has been that, up until the last three weeks, we have daily read statements in the newspapers and from chamber of commerce orators and heard statements upon the floor of the House that we were facing a deficit. I remember when I was first elected to the Sixty-sixth Congress, then the prediction was frequently made that we were facing a deficit. If you will look at the report of the Secretary of the Treasury under the Wilson administration, December, 1920, you will find that he predicted a deficit for the year 1921 of over $2,000,000,000, but instead of there being a gross deficit of over $2,000,000,000 there was a surplus of more than $500,000,000. I remember more than a year ago Mr. Mellon, the Secretary of the Treasury, was daily quoted in the newspapers as saying that there would be a deficit for the fiscal year of 1921 of, I believe, $500,000,000. Instead of there being a deficit of $500,000,000 there was a surplus of more than $500,000,000. I remember, on May 5, that the gentleman from Tennessee, the ranking member of the Committee on Appropriations, made the assertion upon the floor of the House, and his remarks appear in the CONGRESSIONAL RECORD of May 5, 1922:

> There would be a deficit, taking the figures of the Secretary of the Treasury as a basis, of over $785,000,000 for the fiscal year 1923.

This I deny. He also, in another part of his speech, made the remark:

> Unless revenues are increased there will be a deficit in the financial affairs of the Government.

I want to say to the credit of the gentleman from Tennessee that he based his remarks upon the report made by Mr. Mellon, at present the Secretary of the Treasury. To give you an illustration——

Mr. WINGO. Will the gentleman yield before he leaves that?

Mr. DUNBAR. I will.

Mr. WINGO. The gentleman remembers that the chairman of the Committee on Appropriations, the gentleman from Illinois [Mr. MADDEN] the other day in protesting against certain proposals cited figures to show that there would perhaps be a deficit of $500,000,000, did he not?

Mr. DUNBAR. For 1923. Were they his own figures, or were they the figures of the Secretary of the Treasury?

Mr. WINGO. Well, I do not know whether they were his own or those of the Secretary of the Treasury, but the Secretary of the Treasury has been stating practically the same thing.

Mr. DUNBAR. Well, I know the Secretary of the Treasury has, but unless you know what the Secretary of the Treasury is estimating on you can not form any idea of the state of the finances of our Government at the end of the fiscal year.

Mr. WINGO. The gentleman would not blame an unsophisticated Member like myself taking the statement of the chairman of the Committee on Appropriations as being good on a question of deficit, would he?

Mr. DUNBAR. I will take either one as good; but if the gentleman would have a correct conception in his own mind, the gentleman would realize and know upon what they base their calculations and would not talk a deficit. In the Washington Post of May 9 there appeared this article——

The SPEAKER. The time of the gentleman has expired.

Mr. DUNBAR. Can the gentleman give me 10 minutes more?

Mr. McFADDEN. Does the gentleman want more time?

Mr. DUNBAR. I wish 10 minutes more.

Mr. WALSH. Mr. Speaker, this is Calendar Wednesday, and the rule provides that discussion shall be confined to the bill under consideration. I have no objection to the gentleman proceeding for another 10 minutes, but I hope he will ask to proceed out of order.

Mr. DUNBAR. I ask unanimous consent to proceed, out of order, for 10 additional minutes.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

Mr. McFADDEN. I yield the gentleman 10 additional minutes.

Mr. DUNBAR. Mr. David Lawrence, in the Washington Star of May 9, had this to say:

> Secretary Mellon sees no immediate prospect of lowering the estimated deficit in Government finances for 1923 of approximately $340,000,000 and gives the impression of fear that the deficit may be increased.

Then on further down the statement is made that the surplus for 1922 will amount to $45,000,000. He is indeed very generous. The receipts, according to the statement issued by the Secretary of the Treasury, from July 1, 1921, to May 31, 1922, 11 months, are $3,636,168,339.59. The estimated receipts for June, 1922, are $440,000,000, making the total receipts for the year of $4,076,168,339.59.

Now, what will be spent out of the $4,076,168,339.59? The operating expenditures to May 31, 1922, are $3,057,837,635.29. The expenditures for June are estimated at $350,000,000, making a total of $3,407,837,635.29 and a surplus for the year of $668,330,704.30.

I have made a very liberal allowance for expenditures during the month of June, and I feel certain that the surplus of the Government for the present fiscal year will amount to more than $700,000,000.

The Secretary of the Treasury, in the last communication which he has sent to Congress and which was sent to a committee of the Senate, revised as of March, 1922, places the excess of receipts over expenditures at but $47,000,000. It is hard to understand why, in the face of existing conditions, the Secretary of the Treasury or any other member of the administration will so try to "bear" the influence of the administration as to give out a statement of that character. I have no doubt but that the Secretary of the Treasury is honest and sincere.

I believe the Secretary of the Treasury to be a man of many parts, hoping in endeavors accomplished, to excel "Alexander the Great," who set out to conquer the whole world, and then cried because there was no more worlds to conquer.

The present Secretary of the Treasury would try to conquer a hundred worlds, and if, in his endeavors he conquered but 99, he would become pessimistic, because of the remaining 1 world unconquered. With the revelation of the power impounded in a gram of radium and with his well-known enterprise and speculative tendencies, I would not be surprised to hear of him financing an expedition to explore the universe; but as there are countless numbers, and as the largest telescope we have leaves no grounds for doubt that countless universes extend beyond our vision, no achievements that he may make will be satisfactory, because he will yearn and pine because of the universe undiscovered and unrevealed.

And so, when he sets out to spend many hundreds of millions of dollars in the reduction of the public debt, fearful that he will not succeed, assumes an air of pessimism, in the hope to inject a hypodermic of ginger in the Government executive heads, so far as civil service will permit, for the purpose of getting better results. Of course, this is very commendable and I would not detract from his fame, his attainments, and his accomplishments. It would be a great thing if we had more executives like him; but he gives too much ammunition to the Democrats. He raises their hopes and inspires dreams impossible to realize. What he needs is an advertising agency and more apparent optimism that will proclaim to the world the glories and achievements of this Republican administration, especially this Republican Congress.

Here is a part of the difficulty: First, he makes his estimates very modestly. The expenditures ought to be kept within the

estimates which he has made, and that is very commendable, and while the excess he estimates at $47,000,000, you will find in his expenditures the sinking fund and other debt requirements chargeable against ordinary receipts amount to $435,000,000. In other words, out of the $800,000,000 reduction in the gross debt of the United States since the 1st of June, 1921, $423,000,000 is chargeable to the ordinary operating expenses of the Government. So that if you would add the excess of receipts of $47,000,000 to the $423,000,000, you would have, according to the Secretary's own estimate, a surplus of receipts over operative disbursements amounting to $470,000,000 for the present fiscal year, or, rather, a reduction in the bonded indebtedness of the United States of nearly $500,000,000. But in addition to that, his estimates have been so conservative that the actual reduction of debt will amount to $200,000,000 more than was estimated by the Secretary of the Treasury two months ago. I submit in tabulated form as follows:

Estimated receipts, June, 1922	$440,000,000.00
Estimated expenditures	350,000,000.00
Surplus for month	90,000,000.00
Excess of receipts for 11 months fiscal year	578,330,704.30
Estimated excess of receipts for fiscal year 1922 over expenditures	668,330,704.30
Estimated receipts, June, 1922	440,000,000.00
Total receipts for year	4,076,168,339.59
Operative expenditures to May 31, 1922	3,057,837,635.29
Estimated expenditures, June, 1922	350,000,000.00
Total	3,407,837,635.29
Amount from ordinary receipts for fiscal year 1922 applicable to reduction of public debt	668,330,704.30
	4,076,168,339.59
Gross debt, June 30, 1921	23,977,450,552.54
Gross debt, May 31, 1922	23,138,838,607.18
Reduction in gross debt, 11 months	838,611,945.36
Cash in Treasury, June 30, 1921	549,678,105.76
Cash in Treasury, May 31, 1922	289,396,864.70
	260,281,241.06
Floating debt, August 31, 1919	4,201,139,050.39
Floating debt, June 30, 1921	2,699,572,950.00
Floating debt, May 31, 1922	1,736,749,000.00

One of the difficulties that this administration has had to deal with is the effect of the large floating indebtedness piled up by the Wilson administration, which on August 31, 1919, amounted to $4,201,139,050.09. Inasmuch as this fell due every four to six months it was a constant menace to the Treasury, but due to the excellent management of the Secretary of the Treasury this was reduced on May 31, 1922, to $1,736,749,000, with a corresponding reduction in interest paid.

The administration of affairs by a Republican Congress seems to have inspired confidence in the directors of the financial world, notwithstanding they blame us, curse us, and try to bring us into disrepute for not reducing the surtax in the upper reaches below 50 per cent.

In their hearts they have confidence in the superiority of the ability of the administration of a Republican Congress. It is natural for them to object. They object to everything that does not come their way. The reason that they have been successful is that they have brains enough to overcome obstacles, and because Congressmen have brains they are chagrined because in all things they do not prevail.

Now, gentlemen, the Secretary has given us another very doleful tale regarding the expenditures and deficits for the year 1923. He tells us that the excess of expenditures for the year 1923 will amount to $359,000,000. In other words, the impression created is that our revenues will not equal our expenditures by $359,000,000. But if you look into the items that compose his report you will find that the fixed debt charges amount to $325,000,000. In other words, after reducing the bonded indebtedness of the United States $325,000,000, then he says we will have a deficit of $359,000,000. But if the bonded indebtedness remains the same, then our deficit would amount to but $30,000,000. And even that, gentlemen, is not substantiated by the items contained in his report. In the estimates that he made for the expenditures of 1923 I claim that this Congress will make a saving in the expenditures which he estimated for the War Department, the Navy Department, and the Shipping Board if the bill goes through, which provides for an arrangement whereby we will pay our shipping owners a bonus or subsidy on the freight they carry.

The $50,000,000 deficiency in the operation of the Shipping Board will all be provided for by the sale of ships. If the subsidy bill goes into effect it will cost the United States Government about $20,000,000 a year; but, you will find it will so stimulate the shipping industry that a ready market will be found for the ships now owned by the Shipping Corporation. This will bring a large revenue into the Treasury of the United States, and instead of contributing to a deficit will add large sums of money to our Treasury assets and will be a considerable item in enabling a further reduction of taxes. The amount he estimates that it will be necessary to pay the railroads can all be provided for by sales of railroad securities owned by the Government. I claim on these amounts there will be some three to five hundred millions of dollars of savings effected. So that instead of running behind next year, as the Secretary of the Treasury claims we will do, I really believe that our excess of receipts over disbursements will amount to more than $300,000,000.

It is said, gentlemen, that next year we will have to pay the railroads $200,000,000. If this is true, it is to our everlasting shame that we have not paid them this year. It has been said by the article of Mr. Lawrence, to which I have just referred, that we have not paid the railroads, and that by reason of the money withheld from the railroads we will show a light surplus this year but a great deficit next year. But, gentlemen, I want to say that, while the $200,000,000 which we will owe to the railroads at the end of this year may not be paid to them, yet there is money in the Treasury sufficient to pay the railroads without any additional item of taxation.

And I want to call the attention of you gentlemen to another fact. We have in our Treasury many securities which can be utilized and probably will be available in the coming year which will help to reduce our indebtedness. We have railroad securities of $223,000,000 which will be sufficient to pay the railroads every dollar that we owe them. And I want to say that this year we have been able to sell more railroad securities than were necessary to pay the railroads the amount that we did pay to them. We have Federal farm loan bank bonds to the extent of $183,000,000. We have securities for war supplies which have been sold.

The SPEAKER. The time of the gentleman has expired.

Mr. DUNBAR. May I proceed for two minutes out of order?

Mr. McFADDEN. I yield two minutes more to the gentleman.

Mr. DUNBAR. We have securities for the sale of war supplies, amounting to $35,000,000, of the War Finance Corporation, the Housing Corporation, the Sugar Equalization Board, the United States Grain Corporation—for $350,000,000—that will now be practically liquidated, amounting altogether to nearly $800,000,000, every dollar of which within the next two years should be available, and many dollars of which will be available next year. So I do not see how it is possible for anyone to be correct in any assertion that might be made that the revenues received for the coming fiscal year will not be adequate to meet our expenses.

But, on the other hand, gentlemen, I want to make this observation, that this so-called "do-nothing" Congress has been able within the last year and will be able in the year to come to reduce the Government expenses to such an extent as will enable the liquidation of $1,000,000,000 worth of our indebtedness. And the credit belongs to Congress; not to the administration.

Within the last year this Congress has reduced the appropriations recommended by the administration more than $500,000,000. This Congress has reduced the appropriations recommended by the chairman of the Bureau of the Budget more than $350,000,000. Instead of this being a "do-nothing" Congress this is a Congress that has had at heart the success of the affairs of our countrymen, the brains to solve perplexing problems, and a Congress that has not only watched the affairs of our Government as administered by our President and his departments, but has reduced the expenses to an extent that entitles them to receive credit from every fair-minded, loyal American citizen.

What this administration needs is an advertising agent. They do not get credit for what they do. This Congress does not get credit for what it does. The only department of this Government that gets any credit for what it does is the new Bureau of the Budget that was but recently established.

The SPEAKER. The time of the gentleman has expired.

Mr. DUNBAR. May I have one more minute in which to finish?

Mr. McFADDEN. I yield one more minute to the gentleman.

Mr. DUNBAR. The only function of this Government that has an advertising agent is the Bureau of the Budget. The head of the Budget Bureau, Mr. Dawes, or some equally capable man, should have been made advertising agent of the

administration by the President in order that the world might know what this Congress and this administration has done for the American people. I admit and know that Mr. Dawes is a good business man, a brave and courageous soldier. He is a man of many capabilities, not the least of which is that of a good advertising agent, and I really wish the President of this great Republic would employ an advertising agent like Mr. Dawes, so that the people of America could know what this Congress and what this Republican administration has done for economy and for the business of the country. [Applause.]

The SPEAKER. The time of the gentleman from Indiana has expired.

Mr. WINGO. Mr. Speaker, I yield two minutes to the gentleman from Maryland [Mr. GOLDSBOROUGH], and I ask unanimous consent that he may be permitted to proceed out of order and also to extend his remarks.

The SPEAKER. The gentleman from Arkansas asks unanimous consent that the gentleman from Maryland may proceed out of order and may extend his remarks in the RECORD. Is there objection? [After a pause.] The Chair hears none.

Mr. DUNBAR. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD.

The SPEAKER. The gentleman from Indiana asks unanimous consent to extend his remarks in the RECORD. Is there objection? [After a pause.] The Chair hears none.

Mr. GOLDSBOROUGH. Mr. Speaker, the general public, and particularly that part of the public in close touch with agriculture, with the man of moderate means, with the salaried man, and with the wage earner have recently shown great interest in legislation to stabilize the purchasing power of money. On the general subject the Baltimore Sun on May 25 last spoke editorially as follows:

PROFESSOR FISHER'S DOLLAR.

Representative GOLDSBOROUGH'S introduction to Congress of Prof. Irving Fisher's "stabilized dollar" permits that body, if it will, to study with seriousness the tremendously important questions with which Professor Fisher's proposal deals. Every sort of business activity is involved in them, every worker is affected by them—and now Congress is asked whether it believes that in the stabilized dollar lies some relief from the evils of the present fluctuating standard of values.

Professor Fisher's proposal that a dollar should be based ultimately upon a wide range of consumable commodities instead of upon one unconsumable commodity, gold, can not be ranged with various crack-brained financial schemes of the past. It has been approved by enough competent students of banking and finance to give it a good standing in the field of economic philosophy, and the reputation of its author is alone sufficient to establish it as worthy of attention.

The fact that goods have generally increased in cost during the last few decades, instead of decreasing in accordance with what one supposes are more efficient methods of production, is enough in itself to suggest that some method of stabilizing the dollar is needed in order to make certain that on top of the fluctuations in the value of goods caused by the law of supply and demand there will not be superimposed steady increases in price which are caused solely by the type of monetary system that happens to be in use. It is this steady rise which Professor Fisher wants to check.

Whether his proposal, if adopted, will do what he claims for it without at the same time causing serious breaches in the financial structure of the country is a question which should be settled beyond possibility of error before this or any nation puts it into effect. America, with its foreign trade, must also consider the problem of foreign exchange between countries using the gold and the commodity standard of value. Finance, in the broader sense of the word, is so fundamental to industry and commerce that one dare not tamper with it without clearly understanding the soundness and practicality of the contemplated reforms.

Even though the Fisher plan can not be immediately approved, it is nevertheless true that Mr. GOLDSBOROUGH has at least brought to Maryland the credit of having from one of its Representatives come the request that Congress take under consideration this most important matter. Here is no petty politics, but rather an attempt to deal with a problem of profound importance to the whole country and to the world. If, following Representative GOLDSBOROUGH'S lead, Congress turns its attention to the shrinkage of the dollar and tries seriously to understand why it occurs, that body may even correct some of its curious ideas about the tariff.

Mr. WINGO. Mr. Speaker, I yield five minutes to the gentleman from Oklahoma [Mr. CARTER].

Mr. CARTER. Mr. Speaker, I ask unanimous consent to proceed out of order and to extend my remarks in the RECORD.

The SPEAKER. The gentleman from Oklahoma asks unanimous consent to proceed out of order and extend his remarks in the RECORD. Is there objection?

There was no objection.

Mr. CARTER. Mr. Speaker, for the past several months there has been considerable agitation in the southwestern part of the country for legislation fixing the price of wheat, cotton, corn, and other products. What school of political economy such a principle emanates from is beyond my information and understanding. Certainly it is not in harmony with Democratic principles, nor do I think it has any place among Republican policies. While unable to account for the antecedents of this peculiar philosophy, I do know that there is nothing which would prove more perilous and disastrous to the farmer than any attempt to fix the price of his products by the Congress of the United States as it is composed to-day.

Any bill fixing the price of these products would be introduced in the House in the regular way and referred to the Committee on Agriculture. Before it could be considered by the House it would be necessary to have the Committee on Agriculture make a favorable report. Any price that the Committee on Agriculture might recommend would, of course, be subject to amendment when it reached the floor of the House.

Take cotton, for instance. By consulting the records in the document room I find that only two bills have been introduced in the last six years proposing to fix the price on cotton. One, H. R. 11517, introduced by Mr. Emerson, of Ohio, a Republican, on April 18, 1918; the other, H. R. 12737, introduced by Mr. Cox, of Ohio, a Democrat, on August 12, 1918, both in the same year. The Emerson bill proposed to fix the price at 20 cents per pound and the Cox bill at 15 cents per pound. Now, this was back in the summer of 1918, mind you, when cotton was bringing a price of 35 to 40 cents a pound, and it had cost not less than 25 to 30 cents to raise, gather, and market that crop. I cite these two bills as the only two expressions of sentiment with reference to the price of cotton by Congressmen coming from States which do not produce cotton.

When the item fixing the price of cotton is reached, we all know amendments would certainly be offered both increasing and decreasing the price of this product, and we all know fully as well that these amendments when offered would be divided according to the line that defines what is commonly called the North and the solid South. In order to understand what might be the effect of these amendments let us consider for a moment the composition of the present membership of the House, and when that is understood it will be easy to decide what will be sure to happen to the cotton farmer. The present House is composed of 435 Members.

If my memory serves me right, less than 100 of these represent districts producing cotton, but there are 113 of them who come from cotton-producing States, so let us assume they will stand together for the cotton producers. One hundred and thirteen from 435 leaves 322, so there would be 322 representing noncotton-producing States.

There is no mistaking how the Congressmen would vote on this proposition. The issue would be clearly defined and the geographical line of division would run a few miles south of what is commonly called the Mason and Dixon line. Those representing cotton-producing States would naturally contend to have the price of cotton fixed at a point where it would yield the cotton farmer a profit plus the cost of production. Those coming from States which produce no cotton, but which consume cotton, would just as naturally be interested in placing cotton at a price where their clothes would be cheaper and where their factories might procure the raw material as cheaply as possible.

Mr. WHITE of Kansas rose.

Mr. CARTER. I yield to the gentleman from Kansas [Mr. WHITE].

Mr. WHITE of Kansas. The gentleman in his statement does not make it entirely clear to my mind when he speaks of 113 Members representing cotton-producing districts, and says the balance of the membership represent cotton-consuming districts. He does not mean to say cotton-manufacturing districts, does he?

Mr. CARTER. Oh, no; certainly not. I mean that 113 Congressmen come from cotton-producing States and the balance of the 435 come from cotton-consuming States. Now, if my friend will just be patient a moment, let me say it would place the cotton farmer in this situation: The proposition for fixing the price of his principal product would be submitted to a tribunal of 435 men, 113 of these in full sympathy with him and 322 representing constituents antagonistic to him and who desire to get his product as cheaply as possible. It is no reflection on any Member of Congress to say he will represent the interests of his constituents.

Suppose a farmer should drive into town with three bales of cotton on his wagon for sale; one, we will say, strict good middling; one middling; and the other good ordinary. Three cotton buyers approach him to buy his cotton, each wanting one of the different grades, but none wanting all three. They are unable to agree on a price, and finally one of the cotton buyers makes this proposition: "The market does not justify the price you ask for your cotton and we can not pay it, but we are willing to do the fair thing and submit the price to arbitration. There are four of us here. We will all vote on the price of the three bales and let the majority rule." If

the farmer should agree to that we can readily see what would transpire. By a vote of 3 to 1 his three bales of cotton would go for the smallest possible price, certainly far below their actual value. Now, that illustrates what would take place should the proposition of fixing the price of the farmer's cotton be settled by this House.

Mr. WHITE of Kansas. Mr. Speaker, will the gentleman yield?

Mr. CARTER. I yield.

Mr. WHITE of Kansas. Are not the constituencies to which the gentleman alludes of the 113 Members as truly consumers of cotton as the constituencies of other Members, except those districts where there are cotton factories?

Mr. CARTER. Certainly they are; but their interest as producers is far greater than their interest as consumers. Ergo, these 113 would represent the wishes of the producers and not the consumers; but I repeat, there would be 322 other Congressmen having an intense interest in the consumers, but no direct interest whatever in the producers, and it doesn't take a mathematician or seer to figure the ruin and havoc that would be visited on the cotton farmer under any such foolish proposal as that.

This being granted, the vote, then, of the membership of the House would be as follows: For fixing the price of cotton sufficient to assure a reasonable profit over and above the cost of production, 113; for the lowest possible fixed price of cotton, 322 votes. So it can be naturally seen where the cotton farmer would land. His cotton would be fixed at a price below the cost of production by a vote of almost 3 to 1 in this House. The natural result would be that the farmers would refuse to raise cotton, and not only the South but the whole country would eventually suffer from such an unwise procedure.

So much for the cotton farmer. Now as to the calamity that might befall the wheat farmer, I have only to call attention to the interview of Congressman MARTIN MADDEN, published in the newspapers of January 1, 1921, as follows:

For the first time in history the territory which pays the bulk of Federal taxes will have full working control of the House of Representatives after March 4.

Checking up the new list yesterday, Representative MADDEN, Republican, of Illinois, found that with the opening of the new session the section east of the Mississippi and north of the Ohio Rivers would have a solid Republican voting strength of 228. The House majority is 218. Mr. MADDEN'S figures indicated this section pays 84½ per cent of all taxes, with the South and West, now able to control the House by joint action, paying the balance.

"This will give the Republicans from the tax-paying belt a clean majority hereafter over all other combinations," Mr. MADDEN declared, "and I believe we will soon begin to see a change in sectional or class legislation.

"Under Democratic administrations the South has been in the saddle, and the South paid only 6 per cent of all taxes. Most people have imagined that the landslide put the West on top in the House, but that is wrong.

"By their vote in November the people decreed that the tail no longer should wag the dog of Congress."

Mr. MADDEN is a Republican Representative from the State of Illinois, and is chairman of the most powerful committee in the House—the Committee on Appropriations. So it may reasonably be presumed that he knew whereof he spoke. This interview was read into the RECORD by Hon. MARVIN JONES, of Texas, one week thereafter. Mr. MADDEN was present at the time, and while taking some part in the controversy did not at that time deny the authenticity of the statement.

The majority of the wheat producers live west of the Mississippi River, and a majority of those living east of the Mississippi River and north of the Ohio are consumers of wheat and not producers. The Republican Party controls the House. If Mr. MADDEN'S statement be true that those Republicans north of the Ohio and east of the Mississippi Rivers control the Republican Party, then it follows that these same would control any policy of the House, for the Republicans control the House by more than two to one. So the same thing that applies to the cotton producer would apply to the wheat producer, and the wheat farmer would find himself raising wheat at a price fixed by Congress at less than the cost of production.

Under leave given me to print, I am submitting herewith a statement of my votes cast on measures of major importance which have been considered by the House since I have been a Member of Congress. My reason for giving only the more important measures is that Congressmen have been called upon during the past few years to vote upon such a volume of legislative matters, many of them of minor importance, that any document seeking to give the vote on every question would be so voluminous and complicated as to make same almost worthless to the average busy citizen engaged in the necessity of making a living. If, however, my record should be desired on any particular matter other than those enumerated herein below, I shall be glad to candidly furnish same, with reasons therefor, upon request.

All legislation necessary for a final disposition of tribal affairs of the Five Civilized Tribes and per capita distribution of tribal funds has been properly enacted, and all the tribal property has been disposed of with the exception of a portion of the coal deposits in the segregated mineral land of the Choctaw Nation. The law requires that all these deposits be sold, but the department claims that it has not been able up to this time to receive adequate bids on that portion which is left unsold and promises that just as soon as the financial conditions of the country warrant the coal deposits will be disposed of.

During the last eight years there has been distributed per capita to the Choctaws and Chickasaws under resolutions proposed by me a total of $25,571,610. These payments were made from tribal funds which accumulated in the Treasury as a result of the sales of tribal property. Because of the failure of the department to sell the coal deposits and on account of the shortage of collections of deferred payments on unallotted lands and other tribal property the per capita payment may be somewhat curtailed this year, but just as soon as the coal deposits are sold and normal conditions resumed so payments can be made on other property, the per capita payments should return to their former dimensions.

First. There is enumerated herein below my record on some of the more important measures pertaining to the east side of the State of Oklahoma only. I had the honor of proposing most of these measures and gave my unqualified support to the few which were proposed by others.

1. Per capita distribution of tribal funds since 1912:
Choctaws—per capita, $940; total, $19,677,850.
Chickasaws—per capita, $920; total, $5,893,760.

2. Sale of the surface of the segregated mineral land.

3. Sale of the coal and asphalt deposits of the segregated mineral land.

4. Sale of the Choctaw timber reserve.

5. Sale of the unallotted lands.

6. Amendment confining bank deposits of Oklahoma Indian funds to State and national banks in Oklahoma only.

7. Amendment authorizing Government bonds to be used as surety for deposit of tribal funds.

8. Oklahoma State courts vested with full and final probate jurisdiction in settlement of Indian estates, including the determination of heirship and partition, a jurisdiction enjoyed by no other State in the Union.

9. Three and one-half million dollars in support of rural schools in Oklahoma during the past 14 years.

10. Consolidation of two Indian bureaus at Muskogee under one head, which has eliminated much red tape and duplication of work and unnecessary expense.

11. Amendment prohibiting the department from spending tribal funds until specifically appropriated by Congress, which has saved millions of dollars of the Choctaw and Chickasaw tribal funds.

12. Provision for titles to unsold town lots on the segregated mineral lands.

13. Provision requiring probate attorneys to confine their activities to restricted Indians only.

14. Removal of restrictions on more than half of the allotted lands of the Five Civilized Tribes.

15. State use amendment, which prevents coal under the State penitentiary from being sold in competition with free labor.

I voted for the following measures of general legislation:

1. Federal reserve banking act.

2. Farm credits act, enabling farmers to borrow money at low rates of interest for purchasing and improving their homes. More than $500,000,000 has been loaned to farmers by the 12 farm land banks, $10,000,000 of which was loaned in Oklahoma.

3. Farm loan bank deposits: This authorizes the deposit of $25,000,000 Federal funds to be used by said banks in making farm loans during the time sales of the loan bonds are taking place.

4. Farm loan bonds: Under the authority of this law the Secretary of the Treasury purchased $195,175,000 of farm loan bonds, to be used by the farm loan banks in increasing the amount of money available for loans to farmers.

5. War Finance Corporation: A bill authorizing money to be advanced to banks to be loaned to cooperative organizations of farmers and other financial institutions to assist in the production of farm products, live stock, and in the orderly marketing of same. About $340,000,000 has been loaned under this act.

6. Good roads extension act: Providing a system of cooperation between Federal and State Governments in building good roads. In all, $350,000,000 has been appropriated for building

hard-surface roads and over eight million has been apportioned to the State of Oklahoma. It is a regrettable fact that the present Congress has reduced the good-roads appropriation to $50,000,000 for next year.

7. Agricultural extension act, which extends agricultural educational facilities to the farmer and his family.

8. Bureau of Farm Markets, with the purpose to aid the farmer in marketing his crops.

9. Federal warehouse act, which enables the farmer to store his crop with insurance when prices are inadequate and makes Federal warehouse receipts prime collateral for securing loans at Federal reserve banks.

10. Cotton futures act, to prevent gambling in cotton and manipulation of the cotton market by cotton jobbers.

11. Grain grades act, which establishes uniform grades and classification for grain.

12. Vocational educational act, which provides cooperation with the States in promoting vocational education and training of teachers in vocational subjects.

13. Clayton Antitrust Act, which prohibits interlocking directorates and defines and expands the provisions of the Sherman law. It is designed to open the door of opportunity to the business man of moderate means.

14. Creation of Federal Trade Commission, to investigate and regulate unfair methods of competition, thereby affording further protection to the small business man.

15. The Underwood Tariff Act, reducing the taxes on necessities and increasing the taxes on luxuries.

16. Physical valuation of railroads, which directs the Interstate Commerce Commission to make an actual physical valuation of railroads in order that all water may be squeezed from railroad stock.

17. Act giving labor a seat in the President's Cabinet.

18. Child Welfare Bureau.

19. Resolution submitting prohibition constitutional amendment to the several States.

20. Constitutional amendment providing for direct election of United States Senators by the people.

21. Constitutional amendment for woman suffrage.

22. War risk insurance law, providing insurance at a low rate of interest as well as allotments and allowances for sailors, soldiers, and marines.

23. Sweet bill, which liberalizes the war risk insurance act.

24. Veterans' Bureau act: This creates an independent bureau under the President, known as the Veterans' Bureau, and coordinates under one head hospitalization, vocational training, war-risk insurance, and compensation payments of veterans of the World War.

25. Adjusted compensation to ex-service men.

26. Establishment of a budget system.

27. Coordination of Government bureaus.

28. I supported all measures necessary to the conduct of the war, and when the war was over voted for the resolution to repeal war-time legislation.

29. While not in full accord with its terms, I supported the Porter peace resolution, offered by the present administration, because it was the only proposition presented at that time to end the technical war status.

30. I voted against the Esch-Cummins railroad bill, which guaranteed the railroads a fixed dividend of 6 per cent at a time when nearly every other line of business in the country was operating at a loss.

31. I voted against a large standing Army in times of peace.

32. I voted against a Navy greater than required by the terms of the world conference for a reduction in armament.

33. I voted against the Fordney revenue bill, increasing the taxes on small incomes and reducing the taxes on incomes of millionaires.

34. I voted against the Fordney tariff bill, which, with its American-valuation plan, in my opinion, will raise import duties to the high point of stifling our commerce with the world and further embarrassing the marketing of our farmers' products.

35. I voted against the proposal to surrender securities for foreign debts.

36. I voted against the antilynching bill.

The SPEAKER. The time of the gentleman from Oklahoma has again expired.

Mr. McFADDEN. Mr. Speaker, I yield three minutes to the gentleman from Wyoming [Mr. MONDELL].

Mr. MONDELL. Mr. Speaker, I ask unanimous consent to speak out of order.

The SPEAKER. The gentleman from Wyoming asks unanimous consent to proceed out of order. Is there objection?

There was no objection.

Mr. MONDELL. Mr. Speaker, I am very much interested in what the gentleman from Oklahoma said about price fixing. There is one argument against price fixing that the gentleman has not referred to, and that is to be found in the all-sufficient reason that you can not fix the prices of commodities by law or hold them at the prices you fix amid the changing conditions of supply and demand. You may try to do it, but you can no more fix and establish and maintain the price of a commodity by law through the running of the years than you can regulate the laws of gravity——

Mr. CARTER. And ought not to——

Mr. MONDELL. And say how much pull the earth shall have on the apple falling from a tree.

Mr. CARTER. And, if you could, it would not be wise policy to do so.

Mr. MONDELL. Yes; you would have a deuce of a time between conflicting interests.

Mr. CARTER. Yes.

ORDER OF BUSINESS.

Mr. MONDELL. Mr. Speaker, the Committee on Agriculture, having a number of important matters under consideration, does not care to occupy the time of the House to-morrow, as was suggested in the tentative program for the week, and instead we shall consider to-morrow the so-called basket bill, which is the unfinished business before the House.

Mr. QUIN. Mr. Speaker, will the gentleman yield?

Mr. MONDELL. Yes; I yield.

Mr. QUIN. Are you prepared to keep a quorum in this House all day?

Mr. MONDELL. Oh, yes. I know the gentleman from Mississippi is in favor of the measure and will help to keep a quorum present here in order that the bill may be passed. [Laughter.]

Mr. Speaker, I want to ask unanimous consent that at the conclusion of the consideration of the basket bill to-morrow we may take up the consideration of unobjected bills on the Private Calendar, beginning at the place where we left off at the time of their last consideration.

The SPEAKER. The gentleman from Wyoming asks unanimous consent that to-morrow, after the completion of the basket bill, it shall be in order to take up from the Private Calendar unobjected bills, beginning at the place where we left off on their last consideration. Is there objection?

There was no objection.

Mr. MONDELL. I ask unanimous consent that on Friday, after the conclusion of the consideration of matters from the Pension Committees, we may continue consideration of the Private Calendar under the order just agreed to with regard to to-morrow.

The SPEAKER. The gentleman from Wyoming asks further that the same class of unobjected bills on the Private Calendar in order to-morrow may be considered on Friday after the consideration of pension bills. Is there objection?

Mr. WALSH. Reserving the right to object, Mr. Speaker, do I understand that we are going to have two days for claim bills?

Mr. MONDELL. Parts of two days only.

Mr. WALSH. We have passed more private-claim bills in this session of Congress than in the three preceding Congresses, and the Senate has passed less of them. If we send over another batch the Senate will not consider them.

Mr. MONDELL. I want to suggest to the gentleman from Massachusetts that it is not entirely parliamentary to criticize the other legislative body.

Mr. WALSH. Oh, I am commending them. I think all praise and honor should be given them because they have treated those bills in that way.

Mr. WINGO. I do not think you will reach them to-morrow.

Mr. WALSH. If that is the situation I will not object.

The SPEAKER. Is there objection?

There was no objection.

Mr. GARNER. Is it the purpose to move to adjourn from Friday until Monday?

Mr. MONDELL. No; we shall be in session Saturday for a short time; but I know of no reason now why we should continue in session for any length of time.

Mr. McFADDEN. Mr. Speaker, I ask unanimous consent to revise and extend my remarks in the RECORD.

The SPEAKER. The gentleman from Pennsylvania asks unanimous consent to revise and extend his remarks in the RECORD. Is there objection?

There was no objection.

Mr. McFADDEN. Mr. Speaker, I move the previous question on the bill and amendments to the final passage.

The SPEAKER. The gentleman moves the previous question on the bill and amendments to the final passage.

The previous question was ordered.

The SPEAKER. The question is on the passage of the bill.

The bill was passed.

On motion of Mr. McFADDEN, a motion to reconsider the vote by which the bill was passed was laid on the table.

LEAVE OF ABSENCE.

By unanimous consent, leave of absence was granted—

To Mr. LEATHERWOOD, for five days, on account of important business.

To Mr. STEVENSON, for 10 days, on account of needing a rest.

To Mr. LONDON, for three days, on account of important business.

ADJOURNMENT.

Mr. McFADDEN. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to.

Accordingly (at 3 o'clock and 58 minutes p. m.) the House adjourned until Thursday, June 8, 1922, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

632. Under clause 2 of Rule XXIV, a communication from the President of the United States, transmitting, with a letter from the Acting Director of the Bureau of the Budget, a supplemental estimate of appropriation for the Interior Department for the fiscal year ending June 30, 1922, amounting to $16,726.85, for the protection of the so-called Oregon and California railroad lands and the Coos Bay wagon road lands (H. Doc. No. 336), was taken from the Speaker's table, referred to the Committee on Appropriations, and ordered to be printed.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII,

Mr. JAMES: Committee on Military Affairs. H. J. Res. 343. A joint resolution authorizing the Secretary of War to loan cots, mattresses, and blankets for the use of the American Legion at the Michigan State encampment to be held in Iron Mountain, Mich., in July, 1922; without amendment (Rept. No. 1072). Referred to the House Calendar.

Mr. JOHNSON of South Dakota: Committee on Indian Affairs. H. R. 243. A bill providing for the construction of a spillway and drainage ditch to lower and maintain the level of Lake Andes, S. Dak.; with an amendment (Rept. No. 1073). Referred to the Committee of the Whole House on the state of the Union.

CHANGE OF REFERENCE.

Under clause 2 of Rule XXII, the Committee on Invalid Pensions was discharged from the consideration of the bill (H. R. 11834) granting a pension to Jannie E. Bell, and the same was referred to the Committee on Pensions.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. McFADDEN: A bill (H. R. 11939) to amend section 5219 of the Revised Statutes of the United States; to the Committee on Banking and Currency.

By Mr. KINCHELOE: A bill (H. R. 11940) to authorize Union and Crittenden Counties in the State of Kentucky to construct and maintain a bridge across Tradewater River at or near the mouth of Cypress Creek, State of Kentucky; to the Committee on Interstate and Foreign Commerce.

By Mr. RIDDICK: A bill (H. R. 11941) defining the crop failure in the production of wheat, rye, barley, oats, and flax by those to whom the Government of the United States loaned money, under the act of March 3, 1921, for the purchase of wheat, rye, barley, oats, or flax for seed, and for other purposes; to the Committee on Agriculture.

By Mr. JOHNSON of Mississippi: A bill (H. R. 11942) to amend section 14 of the Federal reserve act in order to permit the increase of the open-market powers of Federal reserve banks by permitting them to purchase and sell long-time paper secured by shipping documents or warehouse receipts covering agricultural products, or by chattel mortgages on live stock; to the Committee on Banking and Currency.

By Mr. ANDERSON: Resolution (H. Con. Res. 61) providing for the printing of additional copies of the report of the Joint Commission of Agricultural Inquiry; to the Committee on Printing.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. ALMON: A bill (H. R. 11943) for the relief of Lucy L. Wheeler; to the Committee on Claims.

By Mr. BENHAM: A bill (H. R. 11944) granting an increase of pension to John A. C. Hazel; to the Committee on Pensions.

By Mr. DOWELL: A bill (H. R. 11945) granting a pension to Orilla J. Hainline; to the Committee on Invalid Pensions.

By Mr. DUNBAR: A bill (H. R. 11946) granting a pension to Jessie May Robinson; to the Committee on Invalid Pensions.

By Mr. HAUGEN: A bill (H. R. 11947) granting a pension to Elizabeth Haas; to the Committee on Pensions.

By Mr. HICKEY: A bill (H. R. 11948) granting a pension to James N. Parker; to the Committee on Invalid Pensions.

By Mr. KITCHIN: A bill (H. R. 11949) granting an increase of pension to Mary E. Todd; to the Committee on Invalid Pensions.

By Mr. LOGAN: A bill (H. R. 11950) for the relief of Clarence Benton; to the Committee on Claims.

Also, a bill (H. R. 11951) for the relief of Sullivans Island, S. C.; to the Committee on Claims.

By Mr. MONTOYA: A bill (H. R. 11952) granting a pension to Mary A. S. Taylor; to the Committee on Invalid Pensions.

By Mr. REED of West Virginia: A bill (H. R. 11953) granting a pension to Mary A. Powell; to the Committee on Invalid Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

5927. By Mr. BRIGGS: Letter of Rev. W. E. Phillips, rector Grace Church, Galveston, Tex., appealing in behalf of the Armenians; to the Committee on Foreign Affairs.

5928. By Mr. DYER: Resolutions adopted by the board of aldermen of the city of St. Louis, Mo., urging Congress to complete the slack-water system on the Ohio River from Pittsburgh to Cairo, as planned by the Engineering Corps of the United States Army; to the Committee on Rivers and Harbors.

5929. Also, resolution adopted by the board of aldermen of the city of St. Louis, Mo., indorsing the provisions of House bill 10212; to the Committee on the Judiciary.

5930. By Mr. GALLIVAN: Resolution of Greater Boston Chapter, Military Order of the World War, 60 State Street, Boston, Mass., urging Congress of the United States to support the national defense act of 1920, and that it comply with the recommendation of the President of the United States and of his Secretary of War and of his Secretary of the Navy in determining the size and strength of the Army and Navy of the United States; to the Committee on Appropriations.

5931. By Mr. KISSEL: Petition of Peoria County Farm Bureau, Peoria, Ill., relative to the proposed tariff act of 1921 (H. R. 7456); to the Committee on Ways and Means.

5932. Also, petition of Robert E. Brown, Esq., Buffalo, N. Y., relative to conditions in Armenia; to the Committee on Foreign Affairs.

5933. By Mr. MacGREGOR: Petition of Rev. M. S. Howland, of the Lafayette Avenue Presbyterian Church, Buffalo, N. Y., opposing the trusting of the Armenians to the sovereignty of the Turks; to the Committee on Foreign Affairs.

5934. By Mr. NEWTON of Missouri: Resolution adopted by the Brotherhood of the Ebenezer Baptist Church of St. Louis, Mo., in favor of the proposed constitutional amendment to prohibit sectarian appropriations (H. J. Res. 159); to the Committee on the Judiciary.

5935. By Mr. RIDDICK: Petition of citizens of Billings, Mont., urging the passage of the Towner-Sterling bill; to the Committee on Education.

5936. Also, petition of several members of the First Christian Church of Great Falls, Mont., urging that the United States protect the Armenians; to the Committee on Foreign Affairs.

5937. By Mr. ROACH: Resolution by Union Baptist Church of Tipton, Mo., in support of House Joint Resolution 159; to the Committee on the Judiciary.

5938. By Mr. ROSSDALE: Petition of the Fordham Council American Association for the Recognition of the Irish Republic to protest against the murder of innocent men, women, and children in Ulster because of their religious beliefs, etc.; to the Committee on Foreign Affairs.

5939. By Mr. YOUNG: Petition of North Dakota State Federation of Labor protesting against raising money for the soldiers' bonus by a sales tax and advocating that the money be raised from war and excess-profit taxes; to the Committee on Ways and Means.

5940. Also, resolution of Devils Lake Kiwanis Club protesting against the repeal of section 416 of the transportation act; to the Committee on Interstate and Foreign Commerce.

5941. Also, resolution of the Devils Lake Business and Professional Women's Club protesting against the repeal of section 416 of the transportation act; to the Committee on Interstate and Foreign Commerce.

SENATE.

THURSDAY, *June 8, 1922.*

(Legislative day of Thursday, April 20, 1922.)

The Senate met at 11 o'clock a. m., on the expiration of the recess.

Mr. McCUMBER. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The reading clerk called the roll, and the following Senators answered to their names:

Ashurst	Hale	Newberry	Spencer
Ball	Harris	Nicholson	Sutherland
Borah	Harrison	Oddie	Swanson
Brandegee	Heflin	Overman	Townsend
Calder	Jones, Wash.	Page	Underwood
Capper	Kendrick	Pepper	Wadsworth
Caraway	Ladd	Phipps	Walsh, Mass.
Culberson	La Follette	Poindexter	Watson, Ga.
Curtis	Lenroot	Ransdell	Watson, Ind.
Dial	McCormick	Rawson	Williams
Dillingham	McCumber	Robinson	Willis
Fernald	McNary	Sheppard	
Glass	Myers	Simmons	
Gooding	Nelson	Smoot	

Mr. KENDRICK. I wish to announce the absence of the Senator from Nebraska [Mr. NORRIS] and the Senator from New Hampshire [Mr. KEYES], who are engaged in a hearing before the Committee on Agriculture and Forestry.

Mr. UNDERWOOD. I desire to state that the senior Senator from Florida [Mr. FLETCHER] is detained from the Senate by illness. I desire that this statement shall stand for the day.

The VICE PRESIDENT. Fifty-three Senators have answered to their names. A quorum is present.

STATEMENT BY SENATOR MYERS.

Mr. OVERMAN. Mr. President, our much-esteemed colleague, the senior Senator from Montana [Mr. MYERS], has declined to be a candidate for reelection, which we all regret. He has issued a statement to the people of Montana which is a matter of interest to Senators and to people generally. I ask that the statement may be printed in the RECORD in 8-point type.

There being no objection, the statement was ordered to be printed in the RECORD in 8-point type, as follows:

"During the last several weeks I have received from Montana many inquiries if I would be a candidate for reelection, and I feel the time to answer them has come. Many Montana people have urged me to be a candidate and offered their support, for all of which I am deeply grateful.

"I have given the matter careful consideration, and I have decided not to be a candidate. Upon the expiration of my term my plan is to return to Montana and to endeavor to reestablish myself in the practice of law.

"Here this announcement might appropriately end, but I take this occasion to thank my friends, who have remained steadfast. Their loyalty is deeply appreciated, and I hope my record merits it. If not, it is not because of lack of effort on my part.

"For more than 11 years I have tried to serve faithfully the people of Montana and their best interests. During that time I have given them the best and all there was in me. I have ever been at their service. I have sought service, not publicity; results, not credit. The work has been hard and wearing, and there have been very few days, when not prevented by illness, when I was not at my post, working long hours.

"In matters not political I have ever endeavored to give prompt, faithful, courteous attention to everything in which my aid was sought by any constituent—Democrat, Republican, Socialist—those of any politics and those of none. In such matters I have known no politics, factions, or past differences, but have tried to serve all alike. It has been a pleasure to me to do so. No one has appealed to me for aid in any legitimate matter whose appeal has been ignored.

"In political matters I have nearly always voted with the majority of my party. During both of President Wilson's terms, with one exception, I heartily supported all of his administration measures. For eight years, with one exception, I voted to confirm every nomination to office made by him. During the World War, from start to finish, I ardently supported him in all measures for the prosecution of the war and in preparation therefor. I unwaveringly followed him, as our leader, throughout that great conflict. After the cessation of hostilities I earnestly supported him in his efforts to have us enter the League of Nations, which I sincerely favored.

"Since President Harding's induction into office on administration measures upon which my party divided I have voted to uphold him when I thought it to the interest of my country to do so, otherwise not. Generally, when I did so, I was in company with Senator UNDERWOOD, Democratic leader of the Senate. I put but three things above my party—they are the Constitution, my conscience, the welfare of my country and State.

"Realizing the desperate plight of agriculture since the World War, I have voted for every measure for the benefit of farmers which has come before the Senate. I have supported many measures for the benefit of labor. I have voted for all measures for the benefit of disabled former service men, for whom the Government is now expending $1,000,000 a day, for all of which I voted. I have voted for all measures to promote good morals and clean living.

"I have not during either my first or second term in the Senate taken any stand or given utterance to sentiments or cast votes or made promises with a view to advancing my political fortunes or procuring reelection. My only aim has been to do what I thought right; my only guide has been my conscience. I have tried always to do my duty, be the consequences what they might. I know some things I have done have not been popular. I have not sought popularity. I realize I have not pleased all. I have not tried to do so. However, I have done my best, according to my sense of duty.

"I hope I may be succeeded by some one who will serve the people of Montana and of the country as diligently and faithfully as I have tried in my humble way to do, and who will do so more successfully and effectively. I hope the Democrats of Montana may nominate for my successor some one who may be acceptable to the party and who may be worthy of receiving the votes of a majority of the voters of Montana.

"When I shall return to the people of Montana the trust with which they have twice graciously honored me, I hope and expect to do so without having brought upon it discredit by any act of mine. I have broken no promises. I have given conscientious if not valuable service.

"I was here at my post the first day of my first term, upon the convening of Congress, and I expect to be here the last day of my present term. Meantime I shall continue to serve my constituents as heretofore. Thereafter, to such law business as I may be fortunate enough to get I expect to give the same degree of attention, diligence, and fidelity I have tried to give to public business.

"In conclusion, I thank the good people of Montana for all they have done for me and thank the Democrats of Montana for the honors they have conferred upon me. May the blessings of Providence rest upon Montana."

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. Overhue, its enrolling clerk, announced that the House had passed the bill (S. 831) to amend the proviso in paragraph 10 of section 9 of the Federal reserve act amended by the act of June 21, 1917, amending the Federal reserve act, with amendments, in which it requested the concurrence of the Senate.

The message also announced that the House had passed the joint resolution (S. J. Res. 7) authorizing the Secretary of the Treasury to designate depositaries of public moneys in foreign countries and in the Territories and insular possessions of the United States, with an amendment, in which it requested the concurrence of the Senate.

The message further announced that the House had passed a bill (H. R. 9409) to amend section 5209, Revised Statutes of the United States, relating to penalty for embezzlement by a Federal reserve officer, agent, or employee, so as to include national bank examiners or assistants, in which it requested the concurrence of the Senate.

The message also announced that the House had agreed to the following concurrent resolutions, in which it requested the concurrence of the Senate:

H. Con. Res. 36. Concurrent resolution providing for printing as a House document 1,500 copies of the Journal of the Fifty-sixth National Encampment of the Grand Army of the Republic; and

H. Con. Res. 59. Concurrent resolution providing for printing 3,000 additional copies of Senate Document No. 181, Sixty-seventh Congress, entitled "A letter of the Alien Property Custodian transmitting a report showing the names of all persons employed by the Alien Property Custodian."

ADJUSTED COMPENSATION FOR WORLD WAR VETERANS.

Mr. McCUMBER. Mr. President, I ask unanimous consent at this time to report back from the Committee on Finance the so-called soldiers' compensation bill, the bill (H. R. 10874) to provide adjusted compensation for veterans of the World War, and for other purposes.

The VICE PRESIDENT. Is there objection?

Mr. UNDERWOOD. I shall not object for the moment, as I do not want to interrupt the Senator's statement. I prefer to let him make his statement first.

Mr. McCUMBER. Mr. President, I only desire at this time to say that the committee has sought in the revision of the bill to meet the objections that were urged against its consideration and upon which it was referred back to the Committee on Finance some time ago. The committee have made quite an elaborate report, and I shall ask Senators to carefully consider that report, because it fully explains everything that it will be necessary to understand in the discussion of the bill.

At this time, without presenting the bundle of papers, I wish also to present and have referred to the Committee on Finance a petition containing something over one million names. It is the second installment of a million names of persons who have petitioned for the enactment of the bill into a law.

The VICE PRESIDENT. Without objection the petition will be received and referred to the Committee on Finance.

Mr. WILLIAMS. Mr. President——

Mr. McCUMBER. Will the Senator allow me to finish my statement first?

Mr. WILLIAMS. I beg the Senator's pardon. I thought he had finished.

Mr. McCUMBER. I shall finish in just a moment.

Mr. WILLIAMS. I merely desired to reserve the right to object later.

Mr. McCUMBER. Very well.

Mr. President, at some time in the very near future I hope to be able to lay aside for a day or two the consideration of the tariff bill for the purpose of considering and passing, if possible, the soldiers' compensation bill.

I desire to say at this time that while the pending tariff bill which is under consideration marks the dividing line between Republicanism and Democracy, and in its discussion necessarily there must be partisanship and an attempt to take some partisan advantage if possible, in the soldiers' compensation bill we have nothing but an American bill. I hope we shall be able to dispose of it as an American measure in the same spirit that we voted for appropriations to carry on the war.

In fixing a time to bring up the measure I shall consult with Members on both sides of the Chamber, because there are many on each side whose States are having their primaries, who must be absent at times, and who are desirous of being present when the measure is considered. I shall try to fix a date for bringing it up that will suit the convenience of most Senators upon both sides of the Chamber.

Mr. UNDERWOOD and Mr. BRANDEGEE addressed the Chair.

The VICE PRESIDENT. The Senator from Alabama.

Mr. UNDERWOOD. Mr. President, the Senator from North Dakota has stated that the so-called bonus bill is not a partisan bill, and that is true. There are comparatively few of us on either side of the Chamber who are opposed to its passage, so far as I know, and probably those in opposition are about as many on one side of the Chamber as on the other.

I indicated a moment ago that the Senator could not have the bill taken up by unanimous consent, but that was not with any idea of filibustering the bill, because I realize that the majority of the Senate are entitled to act when they get ready; but I feel so earnestly that the bonus bill, if it shall be passed, will, in the end, not only work injury to the American people but will be an injury to the men whom it proposes to help that I do not want to feel that I myself have given consent to its consideration.

Of course I realize that objection to unanimous consent for the consideration of the bill is a mere matter of form; that the Senator from North Dakota may have the bill taken up and allow the tariff bill to go to the calendar for a few days and then move to take the tariff bill off the calendar without changing the status any more than by having the bonus bill taken up by unanimous consent; but I think I represent the views of those on both sides of the Chamber who intend to vote against the bonus bill when I say that I do not wish, as far as I am concerned, that we shall be parties to the consideration of the bill.

If the Senator from North Dakota is going to have the bill taken up this summer, I see no objection to taking it up to-day or to-morrow any more than taking it up in July or August. I think, however, when the Senator has a bill before the Senate which is intended, on its face, at least, to raise revenue, it is not a very good time to take up a bill which is admittedly going to make a charge against the Treasury of over $4,000,000,000, and which, in my judgment, if the interest is calculated against the claims, will amount to $6,000,000,000 or $7,000,000,000, and especially a bill which will not take effect until next year. If the bill is passed now, the only effect it will have may be a political effect. It is not going to help the ex-soldiers any to pass it this month any more than if it shall be passed in next December, because the resultant effect of the bill will not be accomplished until next year, no matter when it may be passed.

I should be very glad if the bill went over until after the election, so that the American people might have an opportunity to voice their sentiments on the subject. I realize that the American people are behind the soldiers. The soldiers are the heroes of this generation, and they are entitled to be the heroes of this generation; but it is now proposed by Senators to bring before the country a bill that is going to put a charge of from four billion to seven billion dollars on the American taxpayers, and, if I read the bill aright, it is so framed as to pass on that charge from the present to the future. So the young men who are going to receive this bonus, or will receive a certificate for a bonus, after the bill shall have been passed, in all human probability, if they make good in life, will be the men who must ultimately pay this great debt and in the future carry the great burden which it is proposed to put on the American people.

I realize, so far as I am concerned, that any efforts on my part to prevent the passage of the bill will be practically futile; I recognize that what I say represents on the Democratic side of the aisle only a few, and represents only a few Senators on the Republican side of the aisle; but I believe, in the effort of Senators to respond to a call which they think is in the interest of the finest young men who ever followed the American flag, that they are not only making a great mistake for the country but in the end they will do a serious injury to the ex-service men themselves.

Therefore I ask the chairman of the Committee on Finance when he gets ready to bring the bill before the Senate to do so on motion, so that the responsibility may rest on those Senators who are going to sustain the bill and not in any way on the Senators who are opposed to it.

Mr. TOWNSEND. Mr. President, will the Senator yield to me?

Mr. UNDERWOOD. I yield.

Mr. TOWNSEND. I understand that the request of the Senator from North Dakota is merely that he may be permitted to present the report for the purpose of having it printed. I should very much like to have the report printed.

Mr. UNDERWOOD. I may have misunderstood the Senator from North Dakota. I thought he said that he wished to bring the bill up.

Mr. McCUMBER. Oh, no; I merely asked that I might present the report now; and I explained that I wanted to consult Senators on both sides of the Chamber as to what we shall do in the future.

Mr. UNDERWOOD. I misunderstood the Senator. There is no reason why the Senator should not be permitted to present the report by unanimous consent.

Mr. McCUMBER. That is all that is involved in my request.

Mr. UNDERWOOD. I have no objection to that. I merely ask the Senator when he gets ready to bring the bill before the Senate that he will do so by a motion.

Mr. McCUMBER. I shall not seek to bring the measure up, of course, until I have consulted Senators on both sides of the Chamber.

Mr. BORAH. That is, both sides of the question.

Mr. McCUMBER. That is the same thing.

Mr. BRANDEGEE. Mr. President——

The VICE PRESIDENT. The Senator from Connecticut.

Mr. BRANDEGEE. Will the Senator from North Dakota allow me to call up a resolution?

Mr. McCUMBER. Will the Senator from Connecticut merely allow me to submit the report?

Mr. BRANDEGEE. I thought the Senator had presented the report.

The VICE PRESIDENT. Is there objection to receiving the report from the Committee on Finance in accordance with the request of the Senator from North Dakota?

Mr. WILLIAMS. A parliamentary inquiry, Mr. President.

The VICE PRESIDENT. The Senator will state his inquiry.

Mr. WILLIAMS. Does the filing of a report require unanimous consent?

The VICE PRESIDENT. The Chair understands that it now requires unanimous consent, because the Senate has had no morning hour for some time.

Mr. WILLIAMS. Very well. If it requires unanimous consent, I object, because I do not want to be particeps criminis in the remotest manner to any part of this performance.

The VICE PRESIDENT. There is objection.

Mr. McCUMBER. Then, later in the day, I shall again ask unanimous consent that I may submit the report, and I hope the Senator from Mississippi will accord us that courtesy, because it will make no difference in the matter of printing or of time.

Mr. ASHURST. Mr. President, the soldiers' adjusted compensation bill has already been delayed too long. Why does not the Senator from North Dakota move to proceed to its consideration? Contractors have been paid, profiteers have been paid and, in addition thereto, have had their excess-profits taxes removed; but an objection is interposed when a soldiers' adjusted compensation bill is reported. I hope the Senator from North Dakota will show some grit and, notwithstanding the objection of my friend from Mississippi [Mr. WILLIAMS], will move to proceed to the consideration of the compensation bill. This is the time for courage and sand.

Mr. McCUMBER. Mr. President——

The VICE PRESIDENT. Does the Senator from Connecticut yield to the Senator from North Dakota?

Mr. BRANDEGEE. The Senator from North Dakota, I think, still has the floor.

The VICE PRESIDENT. The Chair is of the opinion that the Senator from Connecticut has the floor.

Mr. BRANDEGEE. If so, I yield to the Senator from North Dakota.

Mr. McCUMBER. Mr. President, I wish simply to say in response to the observations of my good friend from Arizona [Mr. ASHURST] that there is at least a "gentlemen's agreement" in the Senate that I shall not ask to lay aside the pending tariff bill without giving due notice and consulting with Senators on the other side of the Chamber, and also consult with the leader on the other side of the aisle.

Mr. ASHURST. I was not aware of that agreement.

Mr. McCUMBER. Therefore, I do not wish to move to take up the bill at present.

Mr. ROBINSON. Mr. President, will the Senator from Connecticut yield to me?

Mr. BRANDEGEE. I yield.

Mr. ROBINSON. I thank the Senator from Connecticut.

Mr. President, during the course of the debate on the tariff bill a large number of measures have, by unanimous consent, been reported to the Senate from various committees of the Senate. I do not recall a single instance in which an objection has heretofore been interposed. The only effect of an objection to the filing of the report on the adjusted compensation bill by the Senator from North Dakota at this time will be to force an adjournment for a day, when, of course, during the morning hour, which would result on the following day after an adjournment, he would be able to submit the report.

The question of the bonus for ex-service men has been before the Senate for a long time. In my opinion, it is desirable that the subject be discussed and disposed of. It is a vexing question, not only threatening to enter politics but affecting almost every phase of industry and business. This country would have been better off, business interests in my opinion would have been advanced, by the settlement of the bonus question a year ago. The longer the delay the worse it will be for the country.

I realize that there are two sides to the controversy, and that the opposing viewpoint should be given liberal and free expression in the consideration of the measure, but I hope that my friend the Senator from Mississippi [Mr. WILLIAMS] will not persist in an objection to the submission of the report on the bonus bill by the Senator from North Dakota, and I also express the hope that within the next two or three weeks an agreement may be reached under which the Senate may proceed to the consideration of the bill and dispose of it. If no agreement can be secured, it will be necessary to carry a motion to proceed to the consideration of the adjusted compensation bill.

It is due to the American soldier to act promptly upon the measure. If we are going to decide that he is not entitled to adjusted compensation, we ought to give the decision promptly; if we are going to award adjusted compensation, we ought not to detract from the value of it by an undue delay in granting it.

This statement is made that it may be understood that the objection of my friend the Senator from Mississippi and the views expressed by my friend the Senator from Alabama do not reflect the viewpoint of all on this side of the Chamber. I thank the Senator from Connecticut.

Mr. McCUMBER. If the Senator will allow me, in addition to what he has said and in response to the statement made by the Senator from Alabama to the effect that, as the bill does not go into effect until the 1st day of January, there is no hurry about securing its passage, I desire to suggest that if the bill becomes a law the department ought to have fully six months' time in which to get ready to put the matter into operation.

Mr. ROBINSON. Mr. President, in addition to that, with the indulgence for a moment further of the Senator from Connecticut, there is a feeling that is growing in the minds of American soldiers that ought to be allayed, a feeling that Congress regards the so-called bonus bill as a mere gratuity, and that its enactment will be the result of political fear and not of a sense of justice and necessity for righteous action.

Added to the suggestion just made by the Senator from North Dakota that a very large organization will be necessary in order to put into effect the administration of this measure, is the further consideration, which is of great importance, that there is nothing in the conduct or the record of the proposed beneficiaries of this measure to justify either branch of Congress or any department of the Government in dealing with it in such a manner as to create the impression that whatever relief is granted under the measure is grudgingly given.

Mr. LENROOT subsequently said: Mr. President, I feel very sure that the Senator from Arizona [Mr. ASHURST], who is always fair, will be willing to correct his statement of challenge to the Senator from North Dakota [Mr. McCUMBER] as to moving to take up the bill reported this morning. I am sure he was in error. That motion is not in order.

Mr. ASHURST. Mr. President, it is a fact that such a motion does not lie at this time, because we would first have to adjourn and have a new calendar day. I thank the Senator from Wisconsin for calling my attention to this. I now, however, express the hope that the Senate may adjourn to-day at the close of business and that we may have a new calendar day to-morrow, so that on to-morrow the eligible motion may be made to consider this soldiers' adjusted compensation bill.

This Republic will not endure if its Congress passes bills looking toward paying the profiteer what he claims, then removes the profiteer's excess-profits taxes, and then declines to consider the bill to pay adjusted compensation to soldiers. I thank the Senator from Wisconsin, however, for calling my attention to the parliamentary situation, and I shall rely upon him to-morrow with his parliamentary skill to assist some of us on this side and on the other side in securing consideration of the soldiers' compensation bill and the McNary-Smith reclamation bill.

This Government *owes* no man a living. It is the idler, slacker, and coward who says the Government *owes* him a living; but this Government does *owe* every man and woman in this land a fair *chance* to *earn* a living. Do you catch the distinction? The idler, the sluggard, will say: "The Government *owes* me a living"; but every man and every woman in our land has a right to say: "The Government *owes* me and must give me *an opportunity* to *earn* a living." Unless we pass the adjusted compensation bill and pass the McNary-Smith reclamation bill, we shall have denied many of our citizens the fair opportunity to earn a living.

STATUE OF ABRAHAM LINCOLN.

Mr. BRANDEGEE. I ask unanimous consent to submit a report from the Committee on the Library upon House Joint Resolution 127.

The VICE PRESIDENT. Is there objection? The Chair hears none and the report will be received.

Mr. BRANDEGEE. From the Committee on the Library, I report back favorably with an amendment the joint resolution (H. J. Res. 127) to reerect the statue of Abraham Lincoln upon its original site, and I submit a report (No. 754) thereon.

Will the Secretary, if there is no objection, kindly read the joint resolution?

The VICE PRESIDENT. The joint resolution will be read.

The reading clerk read the joint resolution, as follows:

Resolved, etc., That the Superintendent of Public Buildings and Grounds of the War Department be, and he is hereby, authorized and directed to reerect the statue of Abraham Lincoln upon its original site in front of the courthouse, city of Washington, D. C., upon an appropriate foundation or pedestal in harmony with the statue.

The VICE PRESIDENT. Does the Senator ask for the immediate consideration of the joint resolution?

Mr. BRANDEGEE. I ask for its immediate consideration.

The VICE PRESIDENT. Is there objection?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the joint resolution.

Mr. BRANDEGEE. Mr. President, there is a committee amendment.

The VICE PRESIDENT. The amendment will be stated.

The READING CLERK. On page 1, line 5, before the word "upon," it is proposed to insert the word "approximately."

The amendment was agreed to.

Mr. BRANDEGEE. Mr. President, this joint resolution was passed, I think, unanimously by the House of Representatives, and it has received the unanimous approval of the Committee on the Library; but I want to call attention to the fact that I am informed that it cost about $2,500 to take down the statue and store it in the basement of the courthouse, where it is at present. No appropriation seems to be made in the House joint resolution directing the Superintendent of Public Buildings and Grounds to reerect it upon a foundation and pedestal which will have to be constructed. I therefore asked Colonel Sherrill to make an estimate of the cost of reerecting it according to the directions of the joint resolution, and he writes the letter which I send to the desk and ask to have read; and then I will offer an amendment to the House joint resolution to provide the funds which it is suggested are necessary.

The VICE PRESIDENT. Without objection, the Secretary will read the communication.

The reading clerk read as follows:

WAR DEPARTMENT, CORPS OF ENGINEERS,
OFFICE OF PUBLIC BUILDINGS AND GROUNDS,
Washington, D. C., June 3, 1922.

HON. FRANK B. BRANDEGEE,
Chairman Joint Committee on the Library,
United States Senate, Washington, D. C.

MY DEAR SENATOR: In accordance with the request made by your secretary, Mr. Lundy, I have to inform you that the estimate of cost of replacing the Lincoln Monument complete, approximately on its old site, including the cost of design and construction of a suitable new pedestal, the foundation work and erection of the monument, is all told $5,000.

Yours very respectfully,

C. O. SHERRILL,
Lieutenant Colonel, Corps of Engineers.

Mr. BRANDEGEE. I call attention to the fact that the committee has recommended that the word "approximately" be inserted before the words "its original site" because the committee was informed that originally the statue or its pedestal stood out a few feet upon the sidewalk, and it is desirable that the statue should not intrude upon the sidewalk; and that much latitude was thought advisable by the committee.

I now offer an amendment to provide the necessary money to pay for the cost of reerecting the statue.

The VICE PRESIDENT. The amendment will be stated.

The READING CLERK. It is proposed to add at the end of the joint resolution the following:

The sum of $5,000, or so much thereof as may be necessary, is hereby appropriated out of any money in the Treasury not otherwise appropriated to pay the expense of the same.

The amendment was agreed to.

The joint resolution was reported to the Senate as amended, and the amendments were concurred in.

The amendments were ordered to be engrossed, and the joint resolution to be read a third time.

The joint resolution was read the third time, and passed.

OHIO RIVER BRIDGE.

Mr. WILLIS. Mr. President, on the 6th of June the Senate unanimously passed a bill authorizing the construction of a bridge across the Ohio River at Steubenville. Meanwhile, an identical bill was passed in the House and came here and was handed down during the absence of the Senator from New York [Mr. CALDER], and consequently his attention was not called to it. The bill is now reported by me from the Committee on Commerce. I am authorized to make a unanimous report from the committee on the bill (H. R. 11646) authorizing the construction of a bridge across the Ohio River near Steubenville, Ohio, and ask for its immediate consideration. It is absolutely identical with the bill which has already passed the Senate.

Mr. UNDERWOOD. Does it conform entirely to existing law?

Mr. WILLIS. Entirely so. It is exactly the same as the bill we passed, based upon Report No. 751.

The VICE PRESIDENT. Without objection, the report will be received. The Senator from Ohio asks unanimous consent for the present consideration of the bill. Is there objection?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which was read, as follows:

Be it enacted, etc., That the consent of Congress is hereby granted to the Steubenville and Pittsburgh Bridge Co., and their successors and assigns, to construct, maintain, and operate a bridge and approaches thereto across the Ohio River, at or near the north city limits of the city of Steubenville, Ohio, in accordance with the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906.

SEC. 2. That this act shall be null and void unless the construction of said bridge is commenced within two years and completed within five years from the date of the approval hereof.

SEC. 3. That the right to alter, amend, or repeal this act is hereby expressly reserved.

The bill was reported to the Senate without amendments, ordered to a third reading, read the third time, and passed.

FEDERAL RESERVE BANK OF ATLANTA.

Mr. HEFLIN. I ask unanimous consent for the present consideration of the resolution which I send to the desk. It calls on the Federal Reserve Bank of Atlanta for certain information.

The VICE PRESIDENT. The resolution will be read.

The resolution (S. Res. 304) was read, considered by unanimous consent, and agreed to, as follows:

Whereas it has been charged upon the floor of the Senate that the Federal Reserve Bank of Atlanta has had printed and distributed in the State of Alabama, at its own expense, a speech delivered in the Senate by Senator GLASS, of Virginia, in which the position of Senator HEFLIN on the deflation policy of the Federal Reserve Board was assailed and criticized; and

Whereas it is charged that the said Federal Reserve Bank of Atlanta, its officials or agents, wrote, or caused to be written, a letter which was sent into the State of Alabama with the speech of Senator GLASS commending the speech and calling on the recipient thereof in the State of Alabama, the State represented in part by Senator HEFLIN, to write the Federal Reserve Bank of Atlanta his opinion of the speech and his position in the matter: Therefore be it

Resolved, That the Federal Reserve Bank of Atlanta be, and it is hereby, requested to furnish to the Senate, in writing, at its earliest convenience, a list of the names and addresses of citizens in the State of Alabama to whom said speech and letter were sent, and all information in its possession called for in the following questions:

1. Was the speech in question of Senator GLASS sent into the State of Alabama by or at the instance of the Federal Reserve Bank of Atlanta?

2. Was a letter written by said Federal reserve bank, or any of its officials, and sent with the speech of Senator GLASS to voters in the State of Alabama; if so, what were the contents of such a letter?

3. At whose instance and expense was the speech of Senator GLASS printed and distributed to voters in the State of Alabama?

4. How was the fund provided, and how much money was expended in printing and sending into Alabama the speech of Senator GLASS and the letter which accompanied it?

5. To how many people in the State of Alabama were the said speech and letter sent?

6. Did the Federal Reserve Board, or any member of it, suggest the sending or have anything to do with the sending of the speech of Senator GLASS and the letter which accompanied it into the State of Alabama?

PRICES OF COAL.

Mr. WALSH of Massachusetts. Mr. President, I desire to take the time of the Senate for a brief period to call attention to the critical situation that is developing in this country as a result of the shortage of anthracite coal and the increase in the price of bituminous coal.

There are two fuels produced and used in this country—bituminous coal and anthracite coal. Two strikes have been in progress since April 1 last, the strike of the bituminous-coal miners and the strike of the anthracite-coal miners. The strike in the anthracite coal regions has resulted in a complete suspension of the production of anthracite coal. No anthracite coal whatever is being produced at the present time. The strike in the bituminous-coal regions has resulted in a possible serious shortage in the supply of bituminous coal in the near future.

I take the time of the Senate this morning for the purpose of impressing the Congress with the critical situation that has developed, and the serious consequences that are likely to follow if some steps are not taken to solve the present difficulties in regard to our supply of fuel. Perhaps I can not impress the seriousness of the situation better than by reading two or three brief letters which have been sent me recently by residents of Massachusetts.

The first letter is from Mr. Robert Robertson, a contractor in the city of Beverly, Mass. He writes me, under date of May 29, as follows:

I wish you would tell me what the situation is on the coal strike. I suffered a great deal in the last coal strike and I wondered what the situation is, and why we do not hear more about it in the newspapers.

I understood a committee was appointed, or was to be appointed, by the National Government to take this matter up.

It seems to me something ought to be done, and I would be obliged for any information you can give me.

Sincerely yours, ROBERT ROBERTSON.

Another letter is from Mr. J. O. Sturtevant, of the Marston-Sturtevant Co., 278 Cabot Street, Beverly, Mass., also dated May 29, as follows:

DEAR SIR: Why is it that there is no direct effort made by the Government to investigate and settle the coal strike? This ought to be done immediately and the facts made public. It is of vital importance to the New England industries as well; and the newspapers seem to be saying little about the coal situation.

Respectfully yours,

J. O. STURTEVANT.

A third letter is from a dealer in anthracite coal in the city of Boston. The letter is dated June 5, and reads:

According to report in Boston papers you confined yourself in your resolution mostly to the "bituminous" situation, which, of course, is commendable. We in Boston think the "anthracite" situation is in a far more desperate condition, as it is used almost entirely for the comfort of the homes throughout New England, and we can truthfully say that the stock of "anthracite" now in Boston could be cleaned up by the 15th of July if the dealers had their entire equipment at work delivering to customers.

Yours sincerely,

D. DOHERTY CO., *Coal and Wood.*

Information of a similar character, namely, that by the middle of July the supply of anthracite coal will be exhausted in New England, comes to me from many reliable sources.

Some facts have been revealed in the last few days which tend to show that improper advantage is being taken of the coal shortage to increase prices. The bituminous operators met in this city a few days ago with the Secretary of Commerce, called here for the purpose, it was announced, of fixing the price of bituminous coal to the consumers. Up to the time of the meeting in Washington of these operators with the Secretary of Commerce there had been practically no change whatever in the price of bituminous coal to those having contractual relations with, and were recognized as regular customers of, the bituminous operators whose mines are now in operation. It is a fact that certain public service corporations and other coal consumers who were obliged to buy bituminous coal in the spot market were charged excessive prices prior to the 1st of June, but these cases are somewhat isolated. From April 1, however, until June 1 the average selling price of the most salable quality of bituminous coal was about, if not less than, $1.75 per ton. That coal delivered in Chicago and the Middle West was selling to the householders of Chicago for about $7 per ton, this including cost at the mines, freight rates, and retail dealers' commissions.

After the meeting of the coal operators with the Secretary of Commerce, announcement was made that a voluntary agreement had been reached whereby the maximum price of bituminous coal was to be $3.50 a ton. Almost overnight, after a meeting with the Secretary of Commerce, bituminous coal advanced in price from $1.75 per ton to $3.50 per ton. It is unbelievable that a public official would be a party to increasing the price of bituminous coal to this extent under the circumstances and in the light of the facts which he has disclosed in his report to the Senate in response to Senate Resolution 298, introduced by me a few days ago.

First of all, the strike in the unionized bituminous coal regions has not as yet seriously affected the supply of bituminous coal. The figures presented by the Secretary of Commerce in response to Senate Resolution 298, and the undisputed figures presented by the brief filed by the retail coal merchants of this country, show that there was on hand 60,000,000 tons of bituminous coal at the time this strike took place April 1.

Mr. OVERMAN rose.

Mr. WALSH of Massachusetts. Let me finish this thought, and I will yield to the Senator in just a moment. The production has been between 4,000,000 and 5,000,000 tons every week from that time to the present time, and the consumption has been from 5,000,000 to 7,000,000 tons. I think the brief of the retail coal merchants states that the consumption may reach 8,000,000 tons. So we have this situation: Coal is being produced in the bituminous coal regions of this country where there is no strike in sufficient quantities to take care of, for the present, the consumption of the country; but because there is a strike in certain coal regions, and because those who have been purchasing from those coal operators whose plants are closed by reason of the strike are obliged to go out into the spot market, exorbitant prices have been charged to the business men forced to go and buy in a spot market.

Now I yield to the Senator from North Carolina.

Mr. OVERMAN. I wish to understand what the Secretary of Commerce had to do with increasing the price in a week from $1.75 a ton to $3.50 a ton? Did he consent to that increase from $1.75 to $3.50 to the consumers of this country?

Mr. WALSH of Massachusetts. I will come to that in a moment. I have no quarrel with the Secretary of Commerce. I think he tried to do a public service. I believe his intentions and motives were of the best. He learned that certain public-service corporations, forced into the spot-coal market, were being charged by these coal operators exorbitant prices, namely, $3.50, $4, and $4.50 a ton, but he failed to appreciate the fact that the price to the regular customers of these operators had not varied during February, March, April, May, and June; indeed, not until the operators met Mr. Hoover here in Washington on Memorial Day, and then an advance of 100 per cent was given the retailers.

Let us consider the facts: Every person who is a regular customer of the bituminous-coal operators whose mines were in operation was being charged $1.75 per ton up to June 1. A few individuals, forced into the spot market, were being asked exorbitant prices, and paid them. Mr. Hoover called the coal operators together, and they met with him in this city on Memorial Day. No other agencies or representatives of the coal industries or the consuming public were invited, though it appears that a telegram was sent to Mr. Hoover from the retail dealers of this country requesting that they have a conference before the price was finally fixed, and he had fixed the date for that meeting, which was the day after Memorial Day, namely, May 31. When the representatives of the retail coal dealers of this country, those who bring the coal to the homes of the American people, arrived in Washington on Memorial Day afternoon they found Mr. Hoover in session with the coal operators, and they were informed by the coal operators that they came too late, that the price was already fixed at $3.50 a ton.

I say only in fairness to Mr. Hoover that he probably intended to fix a maximum price for spot coal of $3.50 a ton. I can not explain his conduct in any other way; but the results that followed were that every coal dealer in American was notified the instant Mr. Hoover met with the operators and agreed to $3.50 per ton that the price for all had been raised to $3.50 per ton, and every single user of bituminous coal, as the result of the meeting of May 30 and 31, has had his coal bill advanced $1.75 per ton.

Mr. ROBINSON. Mr. President, under what authority does the Secretary of Commerce assume to raise the prices?

Mr. WALSH of Massachusetts. Under no authority. I repeat, I think he thought he was doing a public service. I, personally, think he was buncoed. I believe that he was deceived and misled by the coal operators, and I think he ought to do something to undo the harm that has been done, for very serious results have followed.

I have received from coal dealers, who are buying from operators, information which I will put in the RECORD later as to just how and what advance in price took place. Coal dealers all over this country, having contractual and business agreements with operators for prices made before May 30 for $1.75 per ton, found on May 31 that their prices were raised to $3.50 per ton. Of course there is no justification for it. If the consumption of bituminous coal had been greatly in excess of the production, some possible excuse might be advanced for increasing the price, but the cold facts are that the consumption is not as much as the weekly production, plus the supply that was on hand April 1.

What happened was this: Because some dealers and some users of bituminous coal had to go to a different operator to do business they were held up and these extortionate prices have been demanded of them because of the distress in which they found themselves by reason of the strike in the mines owned by the operators with whom they had been doing business.

Mr. ROBINSON. Mr. President, during the war the Government deemed it necessary to regulate the prices of certain basic commodities, and in so far as it could do so conferred power upon certain agencies of the Government to execute its will in that particular. It is astonishing, beyond my power to realize, that a high officer of the Government would presume to act in a matter of that character without any authority of law and to impose upon the consumers of this Nation his individual viewpoint as to what was the proper price for such an indispensable commodity as coal.

The statement which the Senator from Massachusetts is making is very important. It is astonishing to me to learn that without any semblance of authority, and for merely benevolent reasons, the Secretary of Commerce would assume to determine, in conference with the wholesalers of coal, or the producers of coal, what the people of this country should pay for that indispensable product.

Mr. OVERMAN. And be a party to an agreement, without any authority, to increase the price about $2 a ton.

Mr. WALSH of Massachusetts. The agreement into which they entered was and had to be voluntary, but it is my opinion

that it was illegal, and that a committee of this body ought to hear the facts and suggest to the Attorney General that proceedings immediately be instituted against these coal operators.

I want the Senator from Arkansas to realize this situation, too. Understand there is no strike in the region where the coal operators have increased the price. Their cost of production has not increased at all. They are mining coal as cheaply as they did before the strike. Their relationship to the general public is exactly as it was before the strike. And yet because of the demand coming to them from those who have purchased coal from other operators they, without any justification, proceed to profiteer and to extort to the extent of 100 per cent. It is inconceivable. The American people will not tolerate a condition like this. They will not tolerate increasing so suddenly and arbitrarily the price of coal, such an essential to the prosperity of our country and to the happiness and welfare of our people. They will not tolerate increasing the cost of coal 100 per cent overnight simply because a few operators are in a position to hold up the country.

Mr. OVERMAN. And yet they come here and get an agreement with the head of the Department of Commerce to agree to approve this increase. Is not that true?

Mr. WALSH of Massachusetts. That is exactly the situation.

Mr. ROBINSON. Mr. President, will the Senator permit me to interrupt him?

Mr. WALSH of Massachusetts. Certainly.

Mr. ROBINSON. The responsibility of fixing the price of a commodity like coal, something of almost universal use in all the industries of the Nation and indispensable to the comfort of nearly all the people and to the life of many of them, can not be overstated. The power to do that ought to be exercised with some regard to the rights and interests of the people who consume the commodity. It ought not to be exercised arbitrarily and without authority, because it is the power of life and death itself. It is amazing that an officer of the Government, even in a spirit of benevolence and from a desire to render a kindly service to an oppressed people, would attempt to exercise a power of that kind without any authority of law whatever.

Mr. WALSH of Massachusetts. It is quite apparent that the Secretary of Commerce thought, because he was reducing the maximum charge to a few buyers in the spot market, that he was doing a public service, but what must he think of the men with whom he entered into the agreement when they accepted his statement that the maximum price would be $3.50 by raising the price everywhere and to everybody? The price-fixing conference resulted in price raising.

Mr. CARAWAY. Mr. President, what other interpretation could they have put upon his terms if he granted the right to raise prices?

Mr. WALSH of Massachusetts. Their interpretation is that maximum and minimum mean the same thing.

Mr. CARAWAY. Is there not always the temptation to apply the maximum?

Mr. WALSH of Massachusetts. Yes; and the Secretary of Commerce had had previous experience and ought to have realized what the consequence would be. So bold were they in raising their prices that evidence can unquestionably be produced to show that dealers in bituminous coal, who had contracts for 10 or 20 carloads of bituminous coal at $1.75 per ton, were notified after the price-fixing agreement that the contracts were canceled, and that they would now have to pay, under the new agreement with the Secretary of Commerce, $3.50 per ton.

Mr. ROBINSON. Thus giving to that advance the color of governmental authority.

Mr. WALSH of Massachusetts. Absolutely. I do not want my statement alone to be accepted about the situation. I repeat and I emphasize the fact that there is as yet no serious shortage of bituminous coal.

Mr. SUTHERLAND. Mr. President, may I ask the Senator a question?

Mr. WALSH of Massachusetts. Certainly.

Mr. SUTHERLAND. Upon what does the Senator base that statement, which is absolutely without any foundation in fact?

Mr. WALSH of Massachusetts. I thank the Senator for characterizing my statement in that fashion. I am not in the habit of asserting that other Members of this body make unfounded statements without hearing their explanation or hearing from them the evidence upon which they base their statement. I will give the Senator the information. I will give him the information from Secretary Hoover himself. I will read from the report which is on the desk of every Senator, the report of the Secretary of Commerce in response to the resolution which I offered some days ago asking for certain information about the production and consumption and price of bituminous coal. I read:

1. "The present supply of mined bituminous coal."

The latest information we have is a canvass of the situation at the opening of the strike on April 1 by the Department of Commerce and the Geological Survey, partly depending upon various trade associations. No funds have been available for the repetition of this inquiry.

On April 1 the stocks of mined bituminous coal in the hands of consumers were estimated at 63,000,000 tons. In addition thereto there was estimated to be 4,000,000 tons on the Lake Superior and Michigan docks and about 2,500,000 either on tracks or in storage belonging to the operators. There was also an unknown amount of coal in transit on the railways. A guess has been made that it amounts to between 10,000,000 and 15,000,000 tons.

So there were on hand 63,000,000 tons and 2,500,000 tons in addition to that, plus between 10,000,000 and 12,000,000 tons, making about 75,000,000 tons of coal on hand.

Mr. ASHURST. And 4,000,000 tons on Lake Superior.

Mr. WALSH of Massachusetts. Yes; making about 80,000,000 tons in round numbers.

Now, let us confine ourselves to two inquiries: What is the production since April 1 and what has been the consumption?

2. The average weekly production and consumption of such coal since April 1, 1922.

That is the second question I put to the Secretary of Commerce through the resolution to which I have referred. His reply is as follows:

The only statistics as to production are the daily number of cars loaded, and are furnished by the railways as follows:

Week ending—	Estimated tons.	Week ending—	Estimated tons.
Apr. 8	3,825,000	May 20	4,484,000
Apr. 15	3,656,000	May 27	4,856,000
Apr. 22	3,575,000	June 3	4,600,000
Apr. 29	4,175,000		
May 6	4,164,000	Total	37,768,000
May 13	4,433,000		

That is the production. Now, let us see what the consumption is. I read:

There are no statistics of consumption. A rough estimate may be deduced by assuming the consumption to be equal to production based upon car loadings in other periods.

1921.

Week ending—	Tons.	Week ending—	Tons.
Apr. 9	5,684,750	May 14	7,482,250
Apr. 16	6,085,600	May 21	7,461,900
Apr. 23	6,363,150	May 28	7,630,050
Apr. 30	6,512,850	June 4	6,366,650
May 7	6,901,600		

Thus we see that, with all this supply on hand April 1, there has been a production on an average of between 4,500,000 tons and 5,000,000 tons, and there has been a consumption of between 5,000,000 tons and 7,500,000 tons.

Mr. SUTHERLAND. Mr. President, may I ask the Senator a question at that point?

Mr. WALSH of Massachusetts. I yield to the Senator.

Mr. SUTHERLAND. The Senator states that the estimate of production ran up to 5,000,000 tons. I am looking at the same table from which the Senator read his figures, and the highest production shown during the period for the week ended April 8, to and including the week ended June 3, was 4,856,000 and it runs down to 3,575,000 tons. So that the average production for those weeks, from April 8 to June 3, would be between 3,575,000 and 4,856,000, or a little over 4,000,000 tons instead of nearly 5,000,000 tons.

Further than that, the consumption based upon former years runs from the lowest, about 5,000,000 tons, up to the highest, about 8,000,000 tons. The ordinary consumption is about eight or nine million tons a week. So that there is a shortage of about 5,000,000 tons a week.

Now, if the Senator will read just below that——

Mr. WALSH of Massachusetts. If the Senator had not interrupted me, I was about to read it.

Mr. SUTHERLAND. He will see that while there were 63,000,000 tons above ground on April 1, that the stock has been reduced until in the week ending June 3 there would be about 32,000,000 tons, or about one-half as much coal as there was on April 1, and that during the period when ordinary production should have kept up with consumption. So the Senator's statement that there was no shortage of coal was absolutely erroneous.

Mr. WALSH of Massachusetts. Does the Senator agree with me that there are 32,000,000 tons of bituminous coal on hand now?

Mr. SUTHERLAND. I accept the Senator's statement.

Mr. WALSH of Massachusetts. And yet he says there is a shortage of bituminous coal in this country.

Mr. SUTHERLAND. I say that the statement made by Mr. Hoover shows that on April 1 there was a total above ground of about 63,000,000 tons and that has now been reduced in these few weeks to 32,000,000 tons. If the Senator will figure at

that rate of production and consumption up until the 1st of September, he will see what the conditions will be at that time.

Mr. WALSH of Massachusetts. Of course, the supply is lessening all the time. Of course, the amount of coal on hand April 1 has been drawn upon and is decreasing in volume every week as the strike goes on. There is no question about that.

Mr. SUTHERLAND. Does not the Senator know that it is during this period when they stock up on coal and when there should not be that reduction, and the purchasers of coal know, when that reserve stock is being depleted week by week, that in the future, and in the no distant future, there is going to be an absolute famine in the quantity of coal above ground.

Mr. CARAWAY. Mr. President, will the Senator yield to me?

Mr. WALSH of Massachusetts. Will the Senator please let me read the paragraph which I had intended to read when the Senator from West Virginia interrupted me?

Mr. CARAWAY. Certainly.

Mr. WALSH of Massachusetts. The conclusions stated by the Secretary of Commerce, after he gave the tables from which I have quoted, are as follows:

As there has been considerable industrial recovery from the situation of 1921 and less activity than 1920, our rough guess is that the total consumption from April 1 to June 4 is about 65,000,000 tons.

The total consumption up to April 1 was 65,000,000 tons. There were 80,000,000 tons on hand and there were produced each week an average of 5,000,000 tons, making 40,000,000 tons, a total of 120,000,000 tons, and only about 65,000,000 tons have been consumed up to June 1.

Upon this data the stocks of mined bituminous coal remaining on hand week ending June 4 should be about 32,000,000 tons, and in addition the amount of coal in transit may amount to 10,000,000 tons.

So we see from the statement of the Secretary of Commerce that while there has been a steady and constant decline in the amount of bituminous coal on hand, there has been no shortage and there has been no necessity for raising prices except to profiteer. If there be necessity for any Government action, it should be to regulate the distribution of bituminous coal rather than price fixing.

But I am not going to confine myself to the report from which I have just read. I am going to read from the brief of the National Retail Coal Merchants' Association. Let it be understood that the coal operators who have been given permission to increase the price of coal to the industrial plants of America and to the home consumers of coal by 100 per cent are the very concerns who are paying nonunion wages of $4 per day to their miners, while the union mines whose miners are on strike have been selling coal before the strike for the same price; that is, $1.75 per ton, and paying $7.50 per day wages to the mine workers. Let me read that statement:

Not less than 68 per cent of the cost of bituminous coal is directly due to the labor in mining it. Not more than 65 per cent of the miners employed in the bituminous fields are union miners and members of the United Mine Workers of America.

It is the United Mine Workers of America who are on strike. I ought to say that this brief also brings out the fact that in the bituminous coal industry there are an excessive number of employees; it is overdeveloped.

I think the estimate of the figures here is that there are 600,000 miners who have been employed in the mining of bituminous coal when the demand is only for about 450,000 miners to take care of the demand.

The high labor cost in the organized field operating at artificial wage scales creates a situation which makes it impossible for the union mines to compete with the nonunion mines where wage scales are returning to normal. Under the union agreement, which terminated on March 31, 1922, the unionized mines were forced to pay $7.50 per day as the minimum wage rate to common labor.

Yet the union mines were selling bituminous coal up to April 1 for under $1.75 a ton.

As against this, the nonunion mines were paying about $4.50, and with the unionized mines shut down owing to the strike, the nonunion mines are operating full force.

A Geological Survey report of May 14 states that during the week previous 4,500,000 tons of bituminous coal were produced—

That was during the week previous to May 14—

A similar report for the week following, or ending May 27, states that the nonunion production had reached the total of 5,000,000 tons.

That amounts almost to the entire normal consumption, and we know that there has been an increased demand now because of the fear of what will happen in the future by reason of the prolongation of the strike.

Wages in the nonunion fields are based on current competitive and economic conditions, and the union mines can not compete with the nonunion since wages paid in the latter are dependent upon the inexorable law of supply and demand; whereas the United Mine Workers of America is attempting to force the unionized mines to pay an arbitrary wage regardless of conditions and prices under which their product must meet competition.

I think that information covers all available in regard to consumption and production. I have been handed some telegrams from coal dealers in my State with reference to the price now being charged. I have a telegram, although I have not had an opportunity to note its contents until this minute, from W. B. Finney, who is one of the leading coal dealers in the city of Boston, who, in response to a telegram from me, says, in part, that the price of low-grade bituminous coal has been quoted at $1.75 net in March and April.

I have explained the situation, and the question now is, What are we going to do about it? To the people of New England anthracite coal during the winter is an absolute necessity for health and comfort. Yet there is no production whatever of anthracite coal, practically not one ton coming out of the earth. With almost inexhaustible resources of coal, with money plentiful to capitalize the business, yet our people are without relief. Bituminous coal prices, with the assistance of governmental authority, have increased overnight by 100 per cent.

I want to be fair to Mr. Hoover; I am not charging him with any improper motives; but he owes it to himself to call the operators together and ask them for an explanation; and the Senate owes it to itself to summon all the coal operators with their books and papers and to find out what they were charging for bituminous coal up to May 20, and what authority and what right they had to increase their prices 100 per cent on the morning of May 31, after they had obtained the public sanction of the Secretary of Commerce.

The Secretary of Commerce has been fooled and deceived. His good intentions will not help the American consumers of bituminous coal. They can form their judgment of the wisdom of his acts only by results.

What are we going to do about it? How long are we going to say to the American people, what Mr. Hoover said in his report to the Senate submitted in response to the resolution presented by me, that there is no authority of law to settle the coal strike, and that there is no law to stop profiteering? How long will a patient public receive that answer without a protest?

This is no temporary misadjustment of the coal industry. I have been a Member of the Senate for three years, and each year I have been here I have found the exact situation which confronts us now. The same demands have come from my section of the country to do something to let them have coal, to do something to prevent robbery and extortion in coal prices.

Mr. President, private enterprise in the coal industry is on trial. The people will overlook an occasional or temporary misadjustment of an industry, even one producing an essential necessity of life, but constant repetition of trouble between labor and capital and constant profiteering they can not and will not overlook much longer. If this question is not settled, there will be a movement in this country to take the coal industry out of the hands of private enterprise, and, much as that result may be deplored—and I would deplore it—the people will take it into their own hands, for the people must have coal, and they will mine it themselves if private enterprise does not mine it for them.

What is the real trouble here? The coal operators have been unable to get along with their miners; they can not agree upon the share of profits which are derived from the sale of coal; they can not agree as to how those profits shall be distributed.

The public do not care about the profits of the coal operators and they do not care especially about the wages of the miners, but they do care about having this industry serve them coal at reasonable prices. The trouble has been that this industry, so essential and important to our people, has been used solely for profit making and no consideration whatever has been given to service. The day has gone by in America or elsewhere when any industry engaged in the production of an essential commodity can put service to the public after profit making. But the most damnable feature of the present situation is that they have not planned to make their profits over a long period of time, as most industries do, but they have proceeded, because of a strike in another part of the coal industry and a consequent curtailment of production, to extort exorbitant prices.

Mr. OVERMAN. Mr. President——

Mr. WALSH of Massachusetts. I yield to the Senator from North Carolina.

Mr. OVERMAN. I agree with the Senator from Massachusetts that if this kind of thing continues the American people will demand that the Government take over the industry. There is a distinction between coal and oil in this country and the railroads. Coal and oil have been put in the ground by God Almighty for the benefit of mankind, and are we going to sit silent here and allow a few men in this country to organize and profiteer upon the people of America until they suffer and

freeze and die because of the greed of profiteers? The people are not going to submit to such a condition.

Mr. WALSH of Massachusetts. Mr. President, I do not propose to sit here silently and see my people in New England obliged to pay a 100 per cent increase in their coal bills, or obliged to shiver and shake and endure hardships during the coming winter simply because the coal operators and coal miners can not agree.

We have been hearing much about discontent. Why should there not be discontent in view of the hard times through which we have been passing and in view of the terrible business depression in this country? Now, when there is a ray of hope and light and the indications are that there may be some improvement in the future, comes notice to the industries of America that their coal bills are to be henceforth increased 100 per cent and that next winter they will be without coal.

Mr. SUTHERLAND. Mr. President, may I ask the Senator a question?

Mr. WALSH of Massachusetts. Certainly.

Mr. SUTHERLAND. Does not the Senator think it will be better, however, for the consumers in New England to pay the uniform price fixed in the manner which has been suggested than to be subjected to the chance of a runaway spot coal market, in which, under the stress of the continued shortage of coal and the approach of winter, coal may go from $10 to $15, or perhaps more per ton?

Mr. WALSH of Massachusetts. Oh, yes; if every haberdasher except one in this city should be burned out overnight, and a sudden demand should come for straw hats, the one dealer in straw hats might double his price, but it would be unmoral; it would lead to discontent; it would be an abuse of legitimate business practices; and when a similar condition is brought about in reference to the very commodities which we must eat, with which we must clothe ourselves, which we must have for our comfort and even for life itself, it will not be tolerated. Emergencies do not justify unconscionable profits.

I know the sentiment of many of the Members of this body that Government regulation is a failure, Government price fixing is a failure, Government control of distribution is a failure, Government ownership is a failure. In God's name, is there no remedy for a situation like this? Must we tell the people that under the American flag and under the American Constitution and under the laws of our Government, when an emergency arises everybody is licensed to profit where he will, how he will, and in whatever sums he may see fit to extort from the general public? Do you wonder that there is unrest and discontent in this country? Do you wonder that the masses of the people are beginning to lose confidence in the power of their Government to protect them against robbery and extortion, against profiteering, against taking advantage of emergencies to raid their pocketbooks as they are being raided?

Mr. President, the demand for coal for our industries and for domestic use is insistent and will grow more so as the winter months approach. There is hardly a city or village in the whole country where a shortage of coal is not now or will shortly be felt. Our coal resources are abundant. Whether operators or miners are responsible for the prevailing conditions, the general public will begin to care less and less, and will come to the inevitable conclusion that the coal industry is so organized in this country that it is no longer being conducted from motives of service but motives of greed and profit. Whether these motives are more pronounced in the operators than the miners will become immaterial.

Hardly a year passes when we are not confronted with a contest and scramble as to who shall have the most of the profits of this business, the miners or the owners, and between these two conflicting interests the public is squeezed.

Mr. President, I have talked longer than I intended. I want to protest——

Mr. LENROOT. Mr. President——

Mr. WALSH of Massachusetts. I yield.

Mr. LENROOT. I should like to ask the Senator, who is a very distinguished lawyer, whether he believes there is not any remedy short of nationalization of coal?

Mr. WALSH of Massachusetts. Mr. President, I did not intend to convey the impression that the Secretary of Commerce misstated any fact when he said there was no legal remedy.

Mr. LENROOT. And none that Congress could afford short of nationalization?

Mr. WALSH of Massachusetts. Aye, sir; I think there are many remedies. I say that to tell an indignant public, who have been gouged and robbed because of emergencies like this, that we are powerless, is absurd and ridiculous, is a blow at the freedom of our institutions and our capacity to promote the welfare and prosperity of our people. I believe the Government could step in and say: "Unless you settle this strike, unless you come together on mutually satisfactory terms, rather than let our people suffer, rather than have our people profiteered upon, we propose to step in temporarily and conduct this business."

Mr. LENROOT. I agree with the Senator about that.

Mr. WALSH of Massachusetts. Not only that but the Government could step in and control the distribution of the supply, and it could step in and control the price; it could step in and take hold of the mines themselves, which is a condition that we are rapidly facing if the misadjustment that we find existing now in the industry continues from year to year as it is continuing year after year, due to—I am not trying to place the blame—selfishness or greed for profits of either miners or operatives; but I say, as a representative of the public, "I care not; private enterprise is failing to conduct this business satisfactorily."

Mr. LENROOT and Mr. SUTHERLAND addressed the Chair.

The PRESIDING OFFICER (Mr. LADD in the chair). Does the Senator from Massachusetts yield, and, if so, to whom?

Mr. WALSH of Massachusetts. I yield to the Senator from Wisconsin.

Mr. LENROOT. I quite agree with the Senator's view, but I did not know that the Senator held the view—I should be very glad if he can substantiate it—that in a crisis of this kind the Government has the power to step in and fix the price or compel operation other than by taking over the industry.

Mr. WALSH of Massachusetts. It so happens, and men like the Senator, who are known to be on the alert to protect the interests of the general public, ought to be all the more on the alert to prevent an apparent abuse of power, because it happens in this instance that the stepping in of Government authority to advise with the coal operators has resulted in this widespread and general increase in the price of coal which did not exist until June 1.

Mr. SUTHERLAND. Mr. President, will the Senator yield?

Mr. WALSH of Massachusetts. I yield.

Mr. SUTHERLAND. Is the Senator yielding the floor?

Mr. WALSH of Massachusetts. No; I am yielding for a question. I will yield the floor shortly.

Mr. SUTHERLAND. On what information does the Senator base his statement that there is a large increase in the price? The Senator has raised a scarecrow, and is fighting something that does not really exist.

Mr. WALSH of Massachusetts. I call to bear testimony to the accuracy of my statement the distinguished Senator from Idaho [Mr. BORAH], who, with me, talked to three coal dealers day before yesterday.

Mr. SUTHERLAND. I talked to those same three.

Mr. WALSH of Massachusetts. I call to support me two more coal dealers that I talked with this morning, who informed me that the price of bituminous coal up to May 30 was $1.75 per ton.

Mr. SUTHERLAND. The Senator is entirely mistaken about that, and at the proper time I will give him the accurate figures to show what the price of coal was.

Mr. WALSH of Massachusetts. Will the Senator now tell me what the price of bituminous coal was on April 1, the day of this strike?

Mr. SUTHERLAND. I have here the figures from April 3 down to this date, the figures the Senator has been discussing most of the time, at the time when he alleges the price was so largely increased by the action of Mr. Hoover.

Mr. WALSH of Massachusetts. Is the Senator talking about spot prices?

Mr. SUTHERLAND. I am talking about the average coal prices of all kinds, the average market prices. These are official figures, which the Senator can verify by reference to the Bureau of Mines:

Week of April 3	$2.06	Week of May 1	$2.67
Week of April 10	2.19	Week of May 8	2.78
Week of April 17	2.23	Week of May 15	3.16
Week of April 24	2.49	Week of May 22	3.67

The Senator stated that the best grade of bituminous coal was selling at $1.75. I will say for the Senator's information and the information of the Senate that the average price of the best grade of coal—which, of course, is mined in West Virginia—for the week of May 22 was $3.99. That includes all the lower grades of coal, screenings, and, also, domestic lump. The domestic lump coal from those grades of coal, which is the best grade of coal mined in the world, produced in my State, was selling at $5 and $6 a ton, and upon the holding of this conference which the Senator from Massachusetts is complaining about it dropped to $3.50 a ton, which shows that the Senator is very much exercised about a condition that does not exist and never has existed.

Mr. WALSH of Massachusetts. Mr. President, unfortunately I get my opinions and views from the poor consuming public, and not from the coal operators. I suppose they have a limited fund of information about the price of coal; but I did not expect from the Senator from West Virginia such confirmation of my argument, because, on his own statement, these coal operators, paying these cheap wages, without any increase in the cost of production, have increased to the American public the price of bituminous coal from $2 to nearly $4 per ton in two months. That is the conclusion from his own statement.

Mr. BORAH. Mr. President——

Mr. WALSH of Massachusetts. I yield to the Senator from Idaho.

Mr. BORAH. Mr. President, I was going to say that, of course, I have no information about the price of this coal except that which comes to me from men who are in position to know and can only misstate the facts willfully, because they would not misstate them through ignorance.

Mr. SUTHERLAND. I will state to the Senator that I talked to the very same men that he talked to and the Senator from Massachusetts talked to and knew exactly how their statements, well intentioned as they are and representing a very small fraction of the business, are entirely misleading.

Mr. BORAH. It may be, Mr. President.

Mr. SUTHERLAND. The amount of domestic coal sold by retailers is about 10 per cent of the whole bituminous coal business. A few of those men out in Chicago have had contracts and are still enjoying the contractual price of $1.75 a ton, which was fixed down in my State and other States at a time when there was absolutely no business, and to keep the mines going the coal was sold to them at a loss.

Mr. BORAH. Mr. President, I am not sufficiently informed as to all the details of this coal controversy at this time to state what the actual facts may be. I can only state that the information which has come to me came voluntarily. The retail coal dealers sought us out, I presume, because we were members of the Committee on Education and Labor, and made their statements. For instance, there was a gentleman in my office this morning who is an officer of what is known as the American Wholesale Coal Association. They were in session on the 30th day of May in Detroit, Mich. They were also in session on the 31st day of May, their entire association, from different parts of the country. This gentleman stated that upon the 30th day of May the members of their association were purchasing coal at three prices, according to the quality of the coal, ranging from $1.20 to $1.75 and $2.19, and that upon the 1st day of June, while they were still in session, the price having been agreed upon Washington telegraphed to Detroit, not only was the price raised upon them, but in some instances contracts were canceled, and they were compelled to pay $3.50 for that for which they were paying $1.20, $1.75, and $2.19.

I can only say that this gentleman has expressed his willingness to come forward and make a statement under oath before the committee. I am not in a position, under those circumstances, to question the assertion. Other gentlemen called upon us day before yesterday and made similar statements with reference to their experience.

I want to say before I sit down, because I am not going to enter into any discussion of this matter at this time, that if things are not adjusted, of course we will have an investigation, so that we will know the facts, if the facts can be ascertained. I have assumed, as the Senator from Massachusetts has said, that it was the intention of the Secretary of Commerce to put a maximum price upon the coal, and that they, after talking with the coal operators, came to an agreement which was understood, as I understand, to be a maximum price of $3.50 at the mines.

That, however, it was treated as a minimum price by the operators I do not think there is very much doubt. That it was not intended to be a minimum price I think is pretty apparent from all the circumstances; but the facts as they come to us are indisputable that that which was regarded as a maximum price was immediately treated as a minimum price also, and the operators have not only notified those who were purchasing coal at $1.75 that they could not have it at that price, but these people state to us emphatically that contracts have been canceled, and that contracts which call for $1.75 have been canceled, and they are now paying $3.50. To what extent that covers the country we are not able to say at this time, of course, having talked to the representatives of only two or three of these associations.

Mr. NORRIS. Mr. President, I would like to ask the Senator whether the meeting of the wholesale coal dealers' association at Detroit was at the same time Secretary Hoover was in consultation here?

Mr. BORAH. Yes; it was the same date.

Mr. NORRIS. And the result of the conference here with Hoover was the sending of the telegrams to Detroit and other places to increase the price and cancel the contracts?

Mr. BORAH. As the gentleman stated to me this morning, while they were yet in session at Detroit the result of the conference here was telegraphed to the dealers in Detroit, to wit, that the price had been agreed upon at $3.50 at the mine, and, as a result, they were immediately notified, as retailers, that the price of the coal which they had been paying these figures for was $3.50.

Mr. NORRIS. Was the idea conveyed that the dealers who were in session at Detroit were given to understand that this agreement had governmental sanction?

Mr. BORAH. No statement was made to me to the effect that they regarded it as governmental action. I think, however, that in all probability a construction was placed upon it to that effect, not by reason of anything that happened here but from the mere fact that a Government official was in conference.

Mr. NORRIS. What excuse did they give for the cancellation of the contracts? As I understand it, these contracts were regular legal contracts, enforceable at law.

Mr. BORAH. It was so stated to me.

Mr. NORRIS. I do not understand what excuse one party to a contract could give for arbitrarily violating it and changing the price.

Mr. SUTHERLAND. Mr. President, there is absolutely no basis for the statement that any contract was violated by these men, and I am sure the Senator misapprehends the situation, or has been misled by the men who have been talking to him. Contracts for the sale of coal to wholesale dealers and retail dealers out in the cities of Detroit and Chicago are made upon the condition that they require adjustment each month according to market conditions. This conference was held on the 30th day of May. It perhaps is true that on the 31st day of May the operators told their customers that in the ensuing month they would have to pay the market price, which, by agreement held to be in the public interest, and which was undoubtedly in the public interest, had been increased or would be increased, to $3.50. That was not a violation of the contract. It was pursuant to a contract thoroughly understood by these wholesalers and retailers.

Mr. BORAH. I desire to say to the Senator that when he states there is no foundation for the statement I am making——

Mr. SUTHERLAND. I do not say that.

Mr. BORAH. He is himself greatly in error.

Mr. SUTHERLAND. I say, Mr. President, that the Senator has been misinformed.

Mr. BORAH. I have not been misled. I may have been misinformed, but I understand the English language.

Mr. SUTHERLAND. I say the Senator has been misinformed, and he may have misunderstood. I do not say he did misunderstand, but he may have misunderstood. But he certainly has been misinformed. His informants have not given him all the information in making to him a statement of that kind. The contracts with these men read that the price shall be adjusted from month to month, and that they shall pay according to the market price. Many of the contracts are continuous, and those people are getting their coal at $1.75 a ton, or whatever price was named in the contracts.

Mr. BORAH. Mr. President, these gentlemen also stated that the custom was to notify them upon the 25th of each month as to what the price would be the next month. Upon the 25th of May they were not notified. The operators were awaiting the action which was anticipated here in Washington, so the usual custom was broken. They were not notified upon the 25th of May, and they were not notified until the conference adjourned here in Washington, and then they were notified, contrary to custom, on the first day of the month, instead of the twenty-fifth day of the month.

As I said, there can not be any misunderstanding upon my part of the proposition. I am wholly unconcerned in the matter. I questioned them repeatedly as to the effect of the conference here, and I went as much as I could into the details as to why they supposed they assumed to increase that which was intended to be a maximum to make it a minimum price. I know what has happened, if these men are telling the truth, and if they are not telling the truth, we will find it out later. But I have no reason to doubt the statements which they made. I am interested only in securing the facts and working out a solution, if possible, of this problem.

Mr. SMOOT and Mr. SUTHERLAND addressed the Chair.

Mr. WALSH of Massachusetts. Mr. President——

Mr. SMOOT. Will the Senator yield?

Mr. WALSH of Massachusetts. I will be through directly.

Mr. SMOOT. I think we ought to have some testimony from others than interested parties, other than either the coal producer or the purchaser.

Mr. WALSH of Massachusetts. I wish the Senator would take his own time to make his statement. I can not yield at this time. I want to finish my statement, and then the Senator can take the floor and make any statement he wants to.

My statement that coal was being sold for $1.75 per ton is challenged. Of course, there are different grades of bituminous coal selling at different prices. I referred to the average price of bituminous coal. If my statement is false, the telegram which I hold in my hand, from a man by the name of Phiney, of Boston, is false, for he informs me that they purchased bituminous coal in February and March for $1.75 per ton. There can not be any dispute about the fact that bituminous coal was selling at an average price, at the time of this strike, under $1.75 per ton, though there may have been a grade here and there that was bringing a higher price than $1.75 per ton.

Mr. SUTHERLAND. Mr. President——

Mr. WALSH of Massachusetts. I want to finish.

Mr. SUTHERLAND. I do not deny that there was some coal sold at $1.75, and some sold at less than $1.75.

Mr. WALSH of Massachusetts. That was all I was talking about.

Mr. SUTHERLAND. Because these operators, in order to keep their men employed and having operated at a loss down there during a year or so, were still selling the coal at a loss. But that refers only to a very small fraction of the coal business.

Mr. WALSH of Massachusetts. Mr. President, I rose for the purpose of calling the attention of the country to the critical situation so far as the supply and price of coal are concerned. I have no quarrel with the coal operators. I have not attempted to fix the blame between the coal miners and the coal operators.

Mr. SUTHERLAND. Mr. President, the Senator certainly has made some statements that reflect very seriously upon the coal operators, and I think entirely without justification.

Mr. WALSH of Massachusetts. Time will tell. Then I hope the Senator, when he rises on this floor, will state publicly that he will cooperate with the Senator from Idaho and myself in bringing these operators here, putting them under oath, and finding out what they were charging in April, May, and June.

Mr. SUTHERLAND. The coal operators of my State would welcome such an inquiry. They have nothing to fear from the fullest publicity in regard to their prices or any of the conditions of their business.

Mr. WALSH of Massachusetts. Then it gets down to this: The Senator from Idaho and myself have been misled, have been deceived, have been misinformed by our constituents and by men to whom the increased price of $3.50 per ton was directed after the meeting of May 30, and who have to face the public all over this country in asking $1.50 increase in the price of coal. We also were misinformed that coal, in consequence, has increased from $7 to $9. I think the gentlemen who conferred with us are as reputable, though perhaps not as wealthy or as influential, and are as public-spirited as are the coal operators of this country. Certainly they can have no selfish interest. There can be no self-interest on the part of dealers who, knowing how powerful the lash of the coal operators can be and is, come to Senators voluntarily and ask us, as public servants, to protest against a scheme and plan now in operation to extort from the people of this country a 100 per cent increase in the price of coal. My only interest is to stop this price increase and to try and direct public attention to what is going on.

The Senator from Wisconsin asked me what remedy there was. The best remedy of all is publicity. Let us have a hearing. Let us call the roll, find out who these operators are, where they are located, what they have been selling their coal for, and how much they have been profiteering. That is the best means of all.

Mr. SUTHERLAND. I suggest that we bring all other branches of business here and make the same inquiry in regard to all other branches of business. Why single out the coal operators? They are not more guilty of these things than are other business people. The coal operators are perfectly willing to submit to the same kind of an inquiry that is directed to other kinds of business.

Mr. WALSH of Massachusetts. It so happens that the coal operators, unlike any other business in this country that I know of, have been taken under cover by the administration and received the moral sanction of a Government official to increase the price of coal 100 per cent.

If any other business in this country, whatever it may be, comes to Washington and gets the consent of any Cabinet officer or any Senator, or anyone else, to proceed immediately and increase its prices to the general public, then I say investigate it, too. But now we are dealing with the coal operators, and let us finish one at a time.

Mr. SUTHERLAND. Mr. President, the Senator must have watched the course of the coal market in 1920, when there was a shortage, and a sudden shortage, as the result of the strike called in the fall of 1919. The rumor of a shortage in coal largely operates in the same way that a run on a bank operates. You let the story be whispered about in this city that the strongest bank here is in a shaky condition, and that there is a scarcity of money in that bank, and you would destroy it.

Mr. WALSH of Massachusetts. Yes; but those who start and keep up the run do not get any more money as time goes on.

Mr. SUTHERLAND. The Senator thoroughly well knows that in 1920 there was a threatened shortage, just as there is now. The shortage is increasing every week. In 10 weeks the visible supply of coal—not a reserve supply, but the working capital in coal of a great many industries, wholesalers and others—will be wiped out at the present rate of consumption. The Senator must be familiar with what happened in 1920.

The very wise and farseeing action just taken by the Secretary of Commerce was taken in order to prevent what happened before, and it was with the cordial cooperation of coal operators, who might go out in the market to-day and get six or eight dollars a ton and next week more, if they chose to do so, as other people do who are engaged in business when they take advantage of market conditions. Patriotically they have agreed to cooperate with Secretary Hoover in an effort to prevent such conditions as occurred in 1920. I do not know of another industry where the men engaged in it have so willingly subjected themselves to governmental suggestions of that character to keep down prices, in the interest of the consuming public, as have the coal operators.

Mr. CARAWAY. Mr. President——

The PRESIDING OFFICER. Does the Senator from Massachusetts yield to the Senator from Arkansas?

Mr. WALSH of Massachusetts. I yield.

Mr. CARAWAY. It seems that the Senator from Massachusetts and the Senator from Idaho were misinformed and misled. Instead of being gougers, these coal operators came here to entreat the Government to prevent them from profiteering and to help them keep from raising their prices.

Mr. WALSH of Massachusetts. That is exactly the case.

Mr. CARAWAY. They were afraid the prices were going up, and they came here and asked the Governmnet to keep them from profiteering.

Mr. CALDER. Mr. President, the Senator from West Virginia has complained of the frequency with which the coal industry is brought in here for discussion and why we do not drag in all the other businesses of the Nation. Is not the answer, in part, that this business is the one great necessity of the people, next to the use of water? It is the thing all the people must have.

Mr. WALSH of Massachusetts. And the operators and miners are constantly in trouble.

Mr. CALDER. I quite agree with the Senator from Massachusetts. It is the duty of the Congress and the Government to secure accurate information concerning this most necessary business and particularly to watch over and guard the people's rights in its operation. I agree with the Senator, too, that unless some remedy is found it will not be long before the universal demand of the country will compel the Congress to deal with this subject as they have with water, the other great fundamental necessity of the people.

Mr. SUTHERLAND. And the same result will follow in that case that followed in the case of the railroads. We had Government regulation and control of the railroads for some years, and the Senator must know that we are paying double the cost for transportation, both of freight and passengers, on an average throughout the country. The inevitable result of governmental ownership or operation of coal mines would be to vastly increase the cost of coal to the consumer. If the Senator wants to try that experiment, let him look, if he pleases, at what has already happened when the Government has taken hold of any kind of business and operated it.

Mr. CALDER. It has not increased the price of water to the people.

Mr. WALSH of Massachusetts. The inevitable result is what? You say the Government can not interfere, the Government can not regulate, the Government can not fix prices, the Government can not control distribution. Again you cry out, look at the railroads and see how they were mismanaged.

The inevitable result is distrust upon the part of the people in the capacity of their Government to protect them against extortion and against gross mismanagement of an essential industry, essential to their very life and existence.

It is absurd to say that we are powerless, that we can not listen to complaints; that if we stand here and voice a protest in a matter of vital interest to the consuming public we are to be charged with being too radical, charged with being oppressors of industry and of coal operators. The real friends of the operators are the people who are calling attention to the discontent of the people over the way the matter is being conducted and trying to find some reasonable remedy that will give a living wage to the miner and a decent and reasonable profit to the operators.

Mr. NORRIS. Mr. President——

Mr. WALSH of Massachusetts. I yield to the Senator from Nebraska.

Mr. NORRIS. I want to pour a little oil on the troubled waters. I think this is just a misunderstanding here. The Senator from West Virginia [Mr. SUTHERLAND] stated the fact, or what he supposed to be a fact undoubtedly, that freight rates have been doubled under Government operation. The Senator, like he said of another Senator, has been misinformed by somebody. The Government turned the railroads back to the private operators long ago, and it is while they have been operating the railroads that the freight rates have been doubled.

Mr. SUTHERLAND. I will say to the Senator that he must admit that Congress placed in the hands of the Interstate Commerce Commission full control over the rates of our transportation companies and, if those rates have been increased, it must have been by the sanction of the Interstate Commerce Commission, which is acting as an agency of the Government.

Mr. NORRIS. Then the Senator cites, as an illustration for increased rates, Government ownership and Government operation of the railroads. It is a historic fact that this great increase has come under private operation and private ownership of the railroads.

Mr. SUTHERLAND. The Senator must know that that is the nearest approach to Government operation that we now have. We had absolute Government operation for a period of years during the war.

Mr. NORRIS. And when the private parties got their railroads back the first thing they did was to increase the rates.

Mr. SUTHERLAND. With the sanction of the Interstate Commerce Commission.

Mr. NORRIS. I am only stating an historical fact to rebut the statement of the Senator from West Virginia. In giving an illustration of how the Government destroys a thing, he said to look at the railroads; that the Government, operating the railroads, doubled the rates. As a matter of fact the Government may be as bad as he thinks it is and full of sin and have many things to answer for on the judgment day, but the great increase in freight rates came when the Government was not operating the railroads.

Mr. SUTHERLAND. I will ask the Senator whether the increases were not made by Government sanction?

Mr. NORRIS. Certainly they were made with the approval of Government officials. How else would they be made?

Mr. SUTHERLAND. That is just the point.

Mr. NORRIS. Private parties wanted them increased. It was on their demand that the increase was made. They said to the Government officials, "We want to increase the rates," and the Government officials said "Yes." Is the Senator condemning Government officials because they let the private owners of railroads have their way, or what did he mean when he was citing the increase of freight rates under Government operation? He has to concede that it was private operation even though Government officials did consent to it.

Mr. SUTHERLAND. The point I am making still holds that we have more nearly Government control of transportation interests than of any other business in the country. We had absolute operation of the transportation interests for a period during the war. It is true, as the Senator says, that since then the railroads have been turned back to private ownership, and the rates have been increased under private ownership, but always with Government sanction.

Mr. NORRIS. What difference does that make? The private owners asked for the increase. It is private ownership. It is private operation. They got the consent of the Government officials to increase their rates. Is that an argument against Government operation or Government ownership or the Government taking charge of business when it enters into the very vitals of the country and the people?

Mr. SUTHERLAND. The Senator must be aware that we have been paying some very large bills that resulted from Government operation of the railroads. It is conceded pretty generally that Government operation of the railroads was a failure. When the Government undertakes to operate the coal mines or to regulate the price of the coal, which it failed to do during the war satisfactorily to anybody, it will reach the same deplorable result that it did in the case of the railroads when it was wholly in charge of them or when it was partly in charge of the fixing of their rates.

Mr. NORRIS. If the Government took the railroads or if the Government takes over the coal mines it is not because the Government wants to do so. The Government took over the railroads in the war and the cost of operation increased, but it took them over when private operation absolutely failed and laid down and said, "We can not do any better." I am not approving of Government operation during the war. I think there were thousands of mistakes made. Perhaps the war would be sufficient excuse for those mistakes, but it is sufficient to say that the private owners, at the time the Government took over the railroads, were on their backs helpless, and the great railroad systems of the country were absolutely paralyzed and the Government took them over to save its own life.

Nobody is advocating that the Government operate the coal mines except as a necessity. I think, as the Senator from New York [Mr. CALDER] has well said, we must have coal under our civilization and that we have reached a point where it is as important as water. The people must have it. They do not want the Government to take the coal mines, but if to save their lives it must be done, then it will be done and must be done. I for one do not want the Government to operate the coal mines, but before I will see the people freeze I will vote for a proposition to take possession of every coal mine in the United States in the name of the Government and operate it in the name of the Government. We must protect the people, who must have coal in order to live. It would be just as bad to give to a private concern the control over the air we breathe. We must have it. It is an absolute necessity, not because we want to, but because we must if we do.

Mr. KING. Mr. President, will the Senator from Massachusetts permit an interruption?

Mr. WALSH of Massachusetts. I yield.

Mr. KING. I think perhaps a word ought to be said in reply to my good friend from Nebraska with respect to the railroads. The Senator, to use his expression, states that the railroads were upon their backs and imploring or importuning the Government to take them over. That in a sense is true, but I think all of the antecedent causes, in fairness to the railroads, ought to be stated, and the conditions which precipitated the collapse of the railroads, if they did collapse, ought to be adverted to.

Mr. WALSH of Massachusetts. Will the Senator from Utah kindly take some one else's time than mine to do that?

Mr. KING. Oh, very well.

Mr. WALSH of Massachusetts. I do not want to digress into a discussion of the merits and demerits of Government ownership.

Mr. President, there is no need of Government ownership. If the Government or one of its officials with authority gave notice that within three months the coal strike must be settled and coal produced for the consumers in America, and meant it, these coal strikes would be settled and there would be no need of Government ownership or Government control. It is because there is nobody with the courage and the nerve to tell the operators that unless a settlement is made and the American public sold the coal that they must have there will be some drastic action taken.

Mr. SUTHERLAND rose.

Mr. WALSH of Massachusetts. I am not only interested in bituminous coal, I am also concerned about anthracite, and I hope the Senator from West Virginia will not interrupt me when I talk about anthracite, because I do not think they produce it in West Virginia.

Anthracite is not being produced at all. What are you going to say to the people of Wisconsin and of Michigan and of Ohio and of Indiana, of the great Northwest, and what am I going to say to the people of New England this winter when they turn to me as their representative in the National Government, and say "What are you doing to give us coal to keep our children from dying of cold and hunger and disease?" It is a serious matter, Mr. President, and that is why I do not think it is necessary to apologize for taking so much time. A critical situation is here. Anthracite may not be available for purchase by a human being in New England after August 1 next unless something is done, and yet we sit here powerless, with no authority, no law, nothing to be done except to tell our people "Go and die; go and suffer; go and perish, because intelligence and good will is not being exercised by the miners and operators in the coal industry."

Government? Why, the people will be denouncing our Government if we do not do something to stop this terrible tragedy. We must act. We must find out where the remedy is. Every Senator here ought to do his best to suggest some remedy or some solution of this problem. When it comes to bituminous coal we ought to know why the prices have been increased, if they have been increased, and we ought to take some steps to prevent an operator in coal increasing his price simply because the production is falling off.

Mr. President, I am sorry to have taken so much of the time of the Senate, and I apologize to the Senator in charge of the tariff bill. However, I want to ask for cooperation here. I want to ask, in the name of the 100,000,000 consumers of the country, some consideration. I want to stop this squeezing of the public between the operators and the miners.

I do not know where the blame lies. I know that it is selfishness and greed between one or the other. I know that we are all suffering and we are becoming impoverished and business is being injured and our people will soon be obliged to suffer because of a broken-down economic system in the coal industry. It is time to act; and I hope the result of our discussion here this morning will lead the Committee on Education and Labor to summon these people here and find out the facts and take at least the first step in the solution of this question, namely, the utmost publicity.

You are deceiving yourselves, Senators, if you think an intelligent people will continue to stand idly by while this coal shortage and high prices go from bad to worse. The public is going to demand in the conduct of industries of this kind which produce the essentials of life that motives of service be superior to motives of profit. The public is going to demand that good will and intelligence be invoked in the coal industry in order that the public may have the coal industry organized for service and not for profiteering. If such an organization can be brought about, private enterprise will be secure; and those who say that private enterprise is breaking down will find themselves without followers. But if an organization founded upon the necessity and importance of service is not immediately set up it is inevitable that the coal industry will sooner or later be taken out of the hands of private industry. The people will have to mine coal for themselves when the coal industry fails them.

Mr. SUTHERLAND. Mr. President, I hold no brief for the coal operators of my State or any other State. I realize that it is one of the largest industries in my State, the largest industry, perhaps, and that the prosperity of my State largely depends upon it. I am as much interested in the prosperity of the industry because of the men who labor in it, who work in the mines, and because of the interest that all our banking institutions and our commercial institutions of every kind have in it, as I am because of any interest of any coal operator, and much more so.

The Senator from Massachusetts has made some reflections, and some other Senators have joined in those reflections, in a sense, upon the action of the Secretary of Commerce in calling the conference of coal operators in order to make some arrangement by which a reasonable limitation could be put upon the price of this essential product. There was a preliminary conference held by the Secretary of Commerce and various coal operators. As a result of that preliminary conference a considerable decrease was immediately made in the price of coal, amounting to about 50 cents a ton. At the suggestion of President Harding, a larger conference was held, participated in by many coal operators from all over the country. I regard the action of the President and the Secretary of Commerce in calling that conference as certainly justified by the experience of the country under similar conditions two years ago, and as being in the interest of the consumers of coal. If temporarily they might, in some instances almost abruptly, have to pay an increased price for coal, in the long run, if the strike continues any length of time, they will be vastly the gainers because the price will be steadied. Quite a quantity of coal has been sold at $1.75 per ton; some of it has been sold as low as $1.10 per ton.

I call the attention of Senators to a portion of the speech made by Secretary Hoover before the coal operators upon the subject of the prosperity or the lack of prosperity in the coal industry. He said:

> I have some little knowledge, perhaps, of the situation in the coal industry as it has existed during the past 12 months. I am fully aware that the industry as a whole has operated without profit and, perhaps, even at a loss: that prices to the public have been unduly low, so far as the mine operator is concerned; that differences in prices of 10 cents or 15 cents or 20 cents a ton make the difference between profit and loss in coal production. The public does not realize, I believe, that these are the margins for which the operator must contend.

I am sorry the Senator from Massachusetts [Mr. WALSH] has disappeared from the Chamber when I am reading these facts as stated by the Secretary of Commerce, one of the wise, strong men of the country, who is internationally known, a very thorough student of economic conditions, who, after a personal examination into the facts regarding this industry, makes these statements.

The fact is that the coal operators, as a class, have been losing money during the past year; that they have been operating at a loss. Many of them have not been able to run their mines at all during the past year, or they have been able to run them to but a very limited extent; some of them for only two or three days a week. So, at a time when there is some resumption of business these men should be allowed such a return for their coal as will pay their fixed charges during the time when the coal business was slack. If there is any way by which the coal business may be steadied so that it may run uninterruptedly and evenly during the entire year, no one will welcome such a condition more readily than will the coal operators; but the very nature of the business is such that it is probably impossible to do that.

I think a great deal of the criticism in this body and elsewhere in the country arises from a lack of understanding of the conditions that surround the coal business. The coal operator must invest a very large sum of money. In the first place, if he goes into the State of West Virginia or Pennsylvania or some other State and buys coal land of high quality he must pay anywhere from $100 to $2,500 an acre for it. If a shaft is needed to develop the coal, it requires a very large outlay of money in order to prepare the underground workings, to place the mines in operation, and bring a sufficient quantity of coal to the surface to enable the operator to meet his fixed charges. Even in the case of a drift mine it takes a considerable sum of money if all the modern appliances for producing coal in an economical manner are furnished and used. Also, the hazards of the business are great and very costly. It is undoubtedly true that coal has been selling during the past several months, up to the 1st of April and until a recent date, and under existing contracts is still being sold in places, at figures below the cost of production.

I attempted to give to the Senator awhile ago the average market prices of coal. These figures are official, running over a period of eight weeks and showing a somewhat steady increase of price, as the Senator states, but the Senator must consider the question as a sensible, practical man. I know the Senator is entirely patriotic in his efforts, but he, of course, looks at the matter solely from the standpoint of the consuming public in Massachusetts. I know that he does not want to do an injustice to anyone; I have the fullest confidence in his patriotism and in his sense of justice and fairness; but the Senator must know as a practical man that, as in the case of any other marketable commodity, when the quantity of coal above ground decreases and a constant shrinkage appears to be inevitable the price will correspond and will steadily increase.

Mr. WALSH of Massachusetts. Will the Senator permit an interruption?

Mr. SUTHERLAND. I will.

Mr. WALSH of Massachusetts. I understood the Senator to say that the coal operators were for some period of time prior to April 1 mining bituminous coal at a financial loss.

Mr. SUTHERLAND. I did say so, and that is absolutely the fact.

Mr. WALSH of Massachusetts. Will the Senator state whether or not they are still mining coal at a loss?

Mr. SUTHERLAND. The Senator must know that a very large number of mines all over the country and in my State are entirely shut down, that many others are only running a part of the time.

Mr. WALSH of Massachusetts. I am confining my question to those which are now producing bituminous coal and whom I charge with increasing substantially the prices of bituminous coal. Are they still mining coal at a loss?

Mr. SUTHERLAND. I take it that the coal operators who are now mining coal in quantity are not producing at a loss. I hope they are not producing at a loss, for they should not produce at a loss.

Mr. WALSH of Massachusetts. How long previous to April 1 were they producing coal at a loss?

Mr. SUTHERLAND. During the entire year preceding April 1, as the Senator knows, business conditions were such that the mines were not steadily employed. There was a strike on part of the time, and there was disturbance in some fields and business conditions were such that the mines could not be steadily employed; the price of coal was down, and many of them were worked at a loss.

Mr. WALSH of Massachusetts. But the strike in the unionized coal fields has resulted in bringing prosperity and financial gain to all the operators in the nonunion fields.

Mr. SUTHERLAND. I will say, Mr. President, that under ordinary conditions the coal in my State is of such a superior quality that the mines there operate, no matter how many other States may be mining coal, and the mines of West Virginia will get their share of the business if all the other States are mining coal; but they should not, and they do not, mine coal at a loss except when business conditions are paralyzed, as they have been during the past year, but the business is done normally upon a very close margin of profit.

The Senator from Massachusetts referred to an instance of the price of coal being $1.75 a ton. I know the Senator thought that was a fair instance, but that price is not representative at all; in fact, it is an exceptional price, made, no doubt, when the mines were only running on short time, when they were kept going, even at a loss, in order that the miners might be employed and their families might not suffer, and in order that the men might not leave and go to other occupations. However, the coal that was sold at such a price in the various markets would amount to about only 10 per cent of the product. By far the larger quantity of coal is sold in a large way upon yearly contracts; and, because coal is of such character and bulk that it can not be conveniently stored in quantity, it must flow evenly from week to week and month to month in order to keep the boilers going. It is almost impossible for anyone, however wise he may be, to foresee from time to time for several months ahead what the demands of business will be.

It is true that the price of coal has increased somewhat during the 8 or 10 weeks since April 1, but that increase was due to the inevitable law of commerce and trade, as universal in its application as the world is wide, that when the supply of a given commodity is constantly becoming less the price tends to increase. Of course, some of the coal operators who have suffered losses during the past year have naturally been trying, as human beings will do, to recoup their losses and get on the other side of the ledger.

As I said awhile ago, the average price of the best grade of smokeless coal during recent weeks has been $3.99 per ton. Some of the domestic lump coal—and I am referring, of course, to the fancy smokeless variety, which is almost as good as anthracite coal for ordinary purposes—has been selling at from $5 to $6 a ton.

According to the statement of the Secretary of Commerce that there are above ground now only about 32,000,000 tons of coal, if these supplies are being depleted at the rate of about 3,000,000 tons a week it can be seen that in 10 weeks, at about the time when stocks of coal at the head of the Lakes and in New England should be almost at their maximum, we will be faced with an absolute shortage of coal in all the markets of this country. Then we know what will happen. With winter approaching and the time at hand in the fall when the railroads begin to move the crops, inevitably a car shortage will result. If, happily, the coal strike should terminate, as I hope it may, there would then be a scramble for coal; coal would be brought to pit mouths in such quantities that the railroads would be hard pressed to handle it; in fact, they could not handle it; it would be impossible for the railroads of the country at that time to transport sufficient coal to make up for the lack of production and distribution of coal during the summer months.

The Secretary of Commerce has foreseen that at that time there would be a scramble for coal which would cause a skyrocketing of prices and result in injustice to industries and to the private consumers of coal. Therefore he very wisely sought to prevent that situation arising. The coal operators were called in conference with him to devise some way, not to increase their profits, as has been alleged on this floor, but to decrease their profits and to steady their business, and, in order to prevent public criticism, which would be unjustified, they have agreed that the price determined upon would be fair on the average under present conditions, and that price will be adhered to and the consumer of coal in the long run will be the gainer.

Mr. KING. Mr. President, will the Senator permit a question?

Mr. SUTHERLAND. I yield.

Mr. KING. Does not the Senator believe that the policy adopted by Mr. Hoover is going to act to the disadvantage of the retail vendor of coal and to the public? I say the public in order to differentiate them from the industries and from the railroads.

The Senator knows that perhaps from 15 to 20 per cent of the bituminous product is consumed by the public, and that the residue, perhaps 80 or 85 per cent, is consumed by the railroads and the industries. Mr. Hoover seems to have been very much concerned about the prices to be paid by the railroads and the industries, but it occurs to me—and I can not say that I have a matured judgment upon the matter—that he has been too indifferent to the needs of the public and to the results of his policy upon the consuming public. He expects the retailers to meet these increases, and to sell to the public the coal which is allotted to them at the same prices which they would have charged when they were buying the coal under existing contracts for perhaps from $1.75 to $2, or thereabouts, per ton. He expects them to absorb all of these differences. They will have now to pay $3.50 for their coal which they contracted to buy for $2 or thereabouts, or $1.75; and he expects them to sell to the public when they pay $3.50 a ton at the same rate as when they paid $2 or $1.75 a ton. It seems to me that Mr. Hoover has not had sufficient consideration for the public and has been a little too much concerned about the industries and the railroads.

Mr. WALSH of Massachusetts. That is exactly the situation.

Mr. SUTHERLAND. Mr. President, I was not present at the conference, but I have no doubt that the Secretary will take fully into consideration the facts with reference to that phase of the subject. As stated a while ago, many of those wholesalers have continuing contracts which are still in force at the same price. This increase in price affects a margin of 5 or 10 per cent, a very small quantity, which was under contract in such a way that adjustments monthly were made of the price to be paid.

Mr. SMOOT. Mr. President, can the Senator explain why the price of coal on May 22, 1922, was considerably higher than it was on June 5, 1922?

Mr. SUTHERLAND. That shows the effect of this conference.

Mr. SMOOT. For instance, I want to call attention to the fact that the wholesale price of coal f. o. b. the mine at Kanawha, W. Va., on May 22, 1922, was $3.25. On June 5 the same coal was $3. The wholesale price of coal at Logan, W. Va., on May 22, 1922, was $3.25; on June 5 it was $2.85. The wholesale price of coal at Fairmont, W. Va., on May 22, 1922, was $3.50, and on June 5 it was $2.85.

Mr. SUTHERLAND. That shows quite clearly that there has been a very determined effort on the part of the coal operators as well as the Secretary of Commerce, in spite of the opportunity that these conditions afford for taking from the public profits which are very much needed by these men to recoup them for losses sustained in the past year or so, so as to steady this business and to maintain a uniform price. I myself, upon every occasion when I have met coal operators from my State or other States, have told them that I thought they ought to take such action as would prevent a runaway coal market such as we had in 1920, and they have, I think, almost uniformly been of that opinion.

I know, as we all know, that many of these men, like men in other industries, object strongly to governmental interference. Some of these men came to that conference with speeches in their systems, and expected to deliver them, against the proposal of Mr. Hoover; but Mr. Hoover's attitude was so fair and patriotic that these men succumbed, and in the place of hostility he provoked only the most cordial cooperation on the part of these men. I believe that his action was wise, and that the consumer ultimately will be vastly the gainer, and I do not think there is anything that anybody need to fear, Mr. Hoover or anybody else, from the most searching investigation into the facts in this case. In fact, if more of the Senators will inquire carefully into the fundamental conditions surrounding the coal industry, I think that a great deal of the criticism which is heard here and voiced in the public press will disappear.

There are many great difficulties in regard to producing and marketing and distributing coal in a manner that is satisfactory all around. Nobody understands that or appreciates it quite so much as the coal operator does. I have been closely associated geographically with the coal business. I have not any money invested in it. I have not a dollar invested in it, but I do know how the business is conducted. For some years I was in the business myself. I served as a clerk at a coal mine when I first went into West Virginia, and manifested the coal out, and I have been around the mines. For 10 years or more I was directly engaged in the business, and therefore I know something about the conditions that surround it. There are many costs and hazards connected with that business that the people generally do not know, and the men engaged in it are entitled to a fair return to them for the great hazard that there is in the business.

Now and then we hear of some great calamity that occurs at some mine. We read in the morning paper that an explosion has occurred in a mine by reason of the accumulation of

gases. Every device that is possible to detect these things is used. Research departments are carried on by many of these coal operators in an effort to improve all the conditions concerning the workability of these mines; and yet few of us understand, or think, or care, that connected with such an explosion, in addition to the loss of valuable lives—which, of course, is the first consideration—there is a tremendous property loss, involving, perhaps, the total destruction of hundreds of thousands of dollars' worth of property. Somehow or other, those chances of loss must be carried by the industry itself, and these losses that are sustained in the ordinary operation of the business must be carried by the business, just as they are in other businesses.

Mr. KING. Mr. President, the coal situation is one which must be dealt with in a rational and sane manner. It presents rather complex features and involves many factors. Because of the importance of coal to the lives and welfare of the people, the question becomes acute whenever a shortage of coal is threatened. There are so many angles to the matter and so many factors to be considered that a coal-shortage condition presents a most serious situation. It can not be dealt with in an hysterical manner, nor without due regard to all parties involved. There are hazards in the coal business, as stated by the Senator from West Virginia [Mr. SUTHERLAND], and it is probably true that some bituminous operators in the past made no profits. However, that fact would not justify extortionate prices for coal needed by the public. It would be highly improper, if not unmoral, for coal operators to expect within a few months to recoup by charging extortionate prices all their losses over a period of years.

There are, perhaps, 10,000 bituminous coal mines in the United States, 7,000 actively operating when no strikes are in progress. Perhaps five or six thousand of these mines, if operated continuously, would produce sufficient bituminous coal to meet the requirements of the domestic market. Undoubtedly there are too many mines for the needs of the people. If all were operated one-half of the time there would be more bituminous coal produced than the market in the United States demands. Under these conditions many properties have been idle for months in each year, and some mining companies have been unable to meet the competition encountered. Owing to the shutting down of many mines during a part of each year tens of thousands of miners have been without work for like periods each year.

Many persons have engaged in the coal-operating business without experience or knowledge of the trade or the risks and hazards of the enterprise. There have been many conditions which have contributed to confusion and lack of stability and to violent fluctuations and disturbances in all branches of the coal business. This has reacted to the injury and disadvantage of the operators, the employees, and the public. The time has come when there should be greater stability and uniformity in this great industry.

If a considerable part of the employees in the coal business were to seek employment in other activities it would tend to solve the problem.

By that I mean that so long as hundreds of thousands of men are at the coal mines, and are able to obtain work but a few days each week, conditions will be unsatisfactory. It would be much better if those who are employed had constant employment at good wages—living wages—than to have thousands unemployed during much of the time. The situation must be changed, and the coal operators and their employees must enter into some plan to relieve the country from the strikes and lockouts and troubles which so often exist and which so seriously affect the public.

It has been said that many men prefer work in coal mines rather than in other industries, and that results in the overcrowded conditions in coal-mine districts. Be that as it may, there must be some method adopted that will furnish reasonably continuous employment to those who are employed in the digging of coal. During the war the demand for coal increased and, of course, there was profitable employment for a larger number of persons.

It has been difficult to secure readjustments since the war in most industries. That has been especially true of the coal industry. Unfortunately, when the Government had control, under Doctor Garfield, disarrangements of fields of sales resulted. Mines at great expense, for instance, had developed a market in a given State or in a given section of the country. The Government agencies paid no attention to the markets that had been developed at great expense by many of the coal operators, and diverted their coal to other fields. When the Government released control many of these operators found that their markets were gone; the Government had diverted their coal into other avenues and other markets, and they were compelled to seek other markets or to regain their old markets, which in the meantime had been preempted by other coal operators and other vendors. The entire coal business was disarranged, as were all of our industries, as the result of the war. We should approach the consideration of this subject calmly and dispassionately, with a desire to deal justly with the operators, the employees, and the public. We should have all the facts before us before any action is taken. The situation may become so serious as to call for the assertion of Federal authority; therefore we must be fully advised and proceed upon safe and legal and constitutional lines.

I am inclined to think that Mr. Hoover—and yet I do not wish to criticize him—was rather too precipitate in the arrangement which he made.

I think he ought to have called in the public and the retail dealers and conferred with them as well as with the wholesalers and the operators before he fixed the price of $3.50 a ton. The difficulty is that many of the retailers had executory contracts for $1.75 to $2 per ton. Now they are compelled to go out and buy coal at $3.50 a ton.

They had advertised to the public that there would be a reduction in the retail price of coal. Now, they can not fulfill their promises and this will provoke public resentment and prove very injurious to the retail coal dealers. It will not only injure them financially but it will result in a loss of confidence in them by the public. Instead of the public getting coal for the prices named they will be compelled to pay more than they paid before. I have no doubt that Mr. Hoover's purpose was to stabilize and, as the Senator said, to prevent a runaway market, but I believe that he did not fully consider all elements involved.

But, Mr. President, I do not think there is any necessity for the Government seizing the coal mines any more than there is a necessity for the Government to seize the railroads. I believe that the controversies will be adjusted and that the public will soon be relieved from the fear of a coal shortage. Of course, a situation might arise calling for drastic action, but such conditions are not present.

I stated on the floor of the Senate a few days ago that before the war the coal operators sold coal at the mouth of the mine cheaper in the United States than in any other country in the world, unless it was Great Britain. Think of coal at the mines at 95 cents a ton, and from that to $1 and $1.10 a ton. That was the average of pre-war prices, as I recall. I am speaking of the bituminous coal only. The coal operators in the main were men of skill, and they practiced economies that enabled them to produce coal very cheaply. I am advised that many coal operators obtained but small returns upon their investments, and that many never paid dividends upon the capital stock of their companies. Others, because of the large coal measures, the cheapness of operation owing to their geographical situation and their proximity to markets, and because of railroad advantages and other factors which enter into the cost of production, were enabled to produce their coal cheaply, and at the ordinary market prices were enabled to reap handsome rewards. But I think, taking it by and large, the bituminous coal operators of the United States have not made, upon the capital investment, a larger return than has been made in the other industries.

Of course, there are profiteers in the coal business, as there are profiteers in every business. There are profiteering lawyers, profiteering doctors, profiteering merchants, profiteering laborers. Profiteers will exist so long as selfishness and greed and cupidity are attributes and characteristics of the human heart, and we will all possess them to a greater or less degree until the blessed millenial area shall dawn upon us.

When we discuss this whole question, or legislate upon this question, let us address ourselves to it or legislate upon it in a sane and wise manner.

I hope that a speedy adjustment will be made of the controversies now existing that will prove entirely satisfactory to the mine owners and to the employees. We want an intelligent, happy, contented, and patriotic people, and there must exist a spirit of amity and fellowship between the employees and the employers in all lines of business. Labor must be properly rewarded and its contribution to the wealth of the land must be recognized. The dignity of labor must be appreciated, and there must arise a mutual feeling of respect and confidence between all classes—employers and employees—capitalists and those who create wealth with sweat of their brow and the labor of their hands.

A moment ago I interrupted the Senator from Nebraska, and was not able to conclude the sentence which I intended to complete respecting the seizure of the railroads during the war. In

my opinion, we could have avoided that step. I admit it is a moot question. No two men will agree when they argue the pros and cons of the railroad seizure, as to the wisdom of it. In my opinion, which is, of course, very unimportant, if Congress had permitted the railroads to cooperate and collaborate for the period of the war, relieving them from the penalties of the Sherman antitrust law, and had enabled them to provide capital to meet their operating expenses and most imperative improvement and requirements there would have been no occasion for taking over the railroads.

The Government of the United States closed every avenue for procuring money for investment or improvement purposes. It would not permit schoolhouses to be erected. We denied the right of counties and cities to issue bonds for municipal improvements, because the Government was commandeering all available capital for war purposes.

When the railroads were denied opportunity to borrow money in the markets because the Government had made demands for all available capital, of course they were helpless. When we talk about the inefficiency of the railroads and their inability to function during the war and prior to the period of seizure by the Government, we must take into account, in all fairness, the conditions which brought about the situation. The Government was responsible for the inability of the railroads to properly function.

If we had done as I have indicated, in my opinion the railroads would have met the situation, and there would have been no necessity for the Government taking them over. Moreover, under the operations of the War Department and the other departments of the Government, the railroads had but limited control of their own operations. Even before the Government seized them, on account of the priority orders the railroads were unable to meet the demands made upon them by the public. If cars were ordered by a private person for the shipment of his potatoes, of his cattle, or any other products, the railroads might promise to deliver them, but the next day the Government might seize the cars or issue a priority order which would prevent the railroad from furnishing the cars pursuant to contract. Of course under such a situation it was impossible for the railroads to proceed in the ordinary way, and in the end the Government took possession of them and operated them for many months.

During the period of Government operation it increased the wages enormously. It increased the freight and passenger rates and the Pullman rates. Then it superimposed upon the railroads heavy burdens to the extent of hundreds of millions of dollars, which have not yet been liquidated, and when the railroads were turned back to the owners there were burdens upon them, disadvantages and inequalities, which will take many years to straighten out.

So in the consideration of these questions we must endeavor to be fair and to be just and weigh all matters with the purpose of reaching correct conclusions.

Mr. LENROOT. Mr. President, if this strike continues another 30 days, I believe the wisdom of Secretary Hoover will be demonstrated to the country. The operators are but human, and unless there be some agreement upon their part, when this shortage actually does come, we will find coal going to seven, eight, nine, and ten dollars a ton again, as it did in 1920.

But the matter of the price of coal is not the all-important question at this time, and the people of my State, the people of all of the Lake States, and of the States tributary to the Lakes, are in a very different position with respect to this question than the people of the East. We can not wait until the 1st of October to have this strike settled without our people freezing next winter. We can not wait even until the 1st of September to have the strike settled without the people of the great Northwest suffering great hardship not only in the shortage of coal but in other ways. The acute question is the settlement of the strike, and I do not at all agree with the Senator from Utah that we must not think of the Government taking over the mines and operating them if the strike is not settled.

The Senator speaks of our being careful to follow sane and wise legislation in dealing with the subject. The purpose of my questions to the Senator from Massachusetts this morning was to draw out whether it was his opinion, as it was mine, that under the present state of the law there is nothing effectual the Government can do, aside from giving publicity to the matter, in dealing with this question short of operating the mines. For Congress to attempt to do something that the courts will hold Congress has not the power to do is merely making a bad situation worse.

Neither would I have the men who are on strike assume, because of the strictures that have been made upon the operators to-day, that in case it does become necessary for the Government to take over the mines and operate them, the men have thereby won their strike. As the Senator from Massachusetts has indicated, the public is concerned in this question, and it is too true that neither the operator nor the miner is very much concerned about the consumer, so far as this question is concerned. The miner should understand that it is as much his duty to come to a reasonable compromise with the operator as for the operator to understand that it is his duty to come to a reasonable compromise with the miner, and if they shall not do that within the next 30 days I believe it is the duty of this Government to serve notice to all interests that unless they do settle the strike the Government will take possession of a sufficient number of the mines and run them to make up the shortage, not yielding to the demands of the miner, but, after a fair tribunal has been created or appointed by some competent authority to find out what a reasonable wage is, to state that that is the wage that will be paid by the Government, and if the miners are not willing to accept that wage there are enough patriotic Americans who will.

The Senator from Nebraska suggested that if the strike is not settled we ought to take over every coal mine in the United States. If this coal strike is not settled, I hope that will not be done. If this coal strike is not settled, there should be just enough mines taken over to furnish the needs of this country, and both the operator and the miner should understand that if the Government does take over some mines in order to avoid this crisis, neither the operator nor the miner will necessarily profit by that transaction.

One of the operators told me not very long ago that they were indifferent whether the Government took over their mines, that they would get a good price for them, anyway. If the Government took over just enough mines to fill immediate needs and thereafter it became necessary to take over all the mines, the price that would be paid a few years from now would not be nearly as great as it would be to-day.

So, Mr. President, because of the acute situation which does exist and which to my mind fully justifies the discussion this morning, I believe that it ought to be understood by both the operators and the miners that the Government, in the interest of the people, is not going to lie helpless indefinitely, and that it will take such measures as may become necessary in the interest of the people of the United States.

THE TARIFF.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 7456) to provide revenue, to regulate commerce with foreign countries, to encourage the industries of the United States, and for other purposes.

The PRESIDING OFFICER (Mr. McLEAN in the chair). The Secretary will state the pending amendment to the amendment of the committee.

The READING CLERK. The pending amendment is the amendment of the junior Senator from Massachusetts [Mr. WALSH], on page 83, line 21, in the language proposed to be inserted by the committee, to strike out:

> Cash registers and parts thereof, 25 per cent ad valorem.

Mr. UNDERWOOD. Mr. President, before the vote is taken I desire to say a few words in reference to cash registers. I listened with some interest last night to the brief which the chairman of the committee had read into the record in justification of the action of the committee in taking cash registers off the free list, as they are under the existing law and as provided for in the bill as passed by the House and sent to the Senate and taxing them one-fourth of their value, 25 per cent. I shall not read all of the article, but there are some matters of interest to which I will call attention.

The article presented by the chairman of the committee just before we took a recess last night was a brief by Mr. H. A. Savage, representing the St. Louis Cash Register Co. and the American Cash Register Co. He starts out by saying:

> When the existing tariff laws were passed by Congress, there was but one financially strong cash register manufacturer in the United States, namely, the National Cash Register Co., of Dayton, Ohio. That company enjoyed what amounted to almost a complete monopoly of the cash-register industry. That tariff act imposed no import duty upon cash registers, with a view, no doubt, of encouraging foreign competition and thus protecting the merchants of the United States against the very high prices charged by the one manufacturer above referred to.

That is a fair statement of the conditions which existed when the present law was enacted. There was at that time practically but one cash-register company in the United States. It not only had a monopoly of practically all the business of making cash registers in the United States but to a large extent it controlled the foreign market. At that time, if I recollect aright, under the former Republican law cash registers fell under what was known as the basket clause of the machinery paragraph,

and I think were taxed 45 per cent ad valorem. But the committee in 1913, recognizing the fact that this company was a monopoly and a recognized monopoly, that it was so powerful that it not only controlled the business at home but was able to enter the markets of the world and in many lands control the cash-register business of foreign countries, concluded that it would only be a sham to continue a tax on the product at the customhouse and so it was placed on the free list.

In the face of the fact that the cash-register business has about doubled in the eight or nine years during which the present law has been on the statute books, and that many citizens have gone into the business and invested their money under free-trade conditions, it seems to me quite remarkable that the committee should not only want to overthrow existing law but overthrow the action of the House of Representatives, which, I have no doubt, gave careful consideration to the matter.

I have great respect for the chairman of the Ways and Means Committee of the House, under whose guidance the pending bill was primarily written, but I never heard anyone charge Mr. FORDNEY with being a low-tariff man. I served on the Ways and Means Committee with him for many years and I never saw the time when he was not willing to vote for a protective tariff at all times and on all commodities where there was any justification at all. Yet the committee under his guidance in the House refused to put a tax on cash registers.

The only justification the Finance Committee of the Senate seem to have, so far as they have presented their case to the Senate, for changing the bill and putting a tax of 25 per cent on cash registers, is that certain independent manufacturers of cash registers have come to them and asked for the tax. I have seen no testimony to indicate what is the difference in cost of production here and abroad except the loose statement of people that it is very much less in Germany than it is in America, which, of course, means nothing. Men may make statements of that kind in perfect good faith without any ultimate knowledge of the facts, as I have found time and time again. Statements of that kind have been made before me, and I have cross-examined the witness as to what his knowledge of the facts was.

As a rule I have found that the American manufacturer who made statements of that kind is quite well posted on his own business, usually is a man of ability in his own line, thoroughly informed on what he is doing at home in his own factory, and absolutely ignorant of conditions abroad except what he may have read in some trade journal that is favorable to him, and then has misconstrued the result of the trade journal's information to color his own viewpoint.

Mr. President, so far as I can see there is nothing in the testimony which has been presented by the committee to justify our increasing the tax on the American people, the business men of America, except the testimony of one or two interested parties who give us no concrete facts, no labor costs, no cost of assembling the materials, no cost of transportation, no testimony as to the efficiency of machinery in this country and abroad, but merely an ad captandum statement that the cost of production in Germany is less than it is here.

Mr. President, cash registers are made by machinery. There are various kinds of cash registers, particularly the large ones and small ones, varying in the number of drawers they have and in their operation, but they are purely machine made and made in very large quantities. The parts of those machines are made by machinery, made by organized machinery to produce the parts, and are not made by hand labor. The only hand labor involved to any extent is in the assembling of the parts, which is a minor proposition in cost. No one has suggested that the difference in labor cost here and abroad materially affects the result in the price. Everyone knows that the commodities have been sold for enormous profits, and that the profits are very large up to this time.

Now, the argument on which the Senate of the United States is asked to reverse existing law, to reverse the action of the House of Representatives and put this article on the tax list, is this: The independent manufacturer says that his danger comes from the trust; that if we leave this article on the free list the trust will import from its foreign factories into America the products of its foreign factories and destroy the independents in America; and that if we put a tax on so the trust can not import from its foreign factories into America, then the independents will have an opportunity to combat the trust in the smaller makes of the goods. Of course, if the trust had made up its mind to put the independents out of business by importing goods from its foreign factories into America, it could put them out of business by underselling them in this market.

In real truth and fact, the National cash register, where organized, controls the market. It is sold at a very large profit. Cash registers run in certain well-defined lines. Of course, to start a new form of cash register they have to work out the machinery for that particular form, which they had not done in reference to the smaller articles. It left a field for independent manufacturers, with a great profit in that market, to enter the field for certain smaller classes of cash registers, which they have done. I suppose, for reasons of their own, the National Cash Register Co., the monopoly, have not seen fit to manufacture that class of cash registers.

It is not because of a tariff or the lack of a tariff that they exist; it is because the monopoly has not invaded that field. It is not a question of competition from abroad; it is a question of maintaining high prices and great profits which they want for this particular article; and there is no rime or reason for the proposition unless the majority side are merely going to adopt the system in writing this bill that if anyone who is engaged in a manufacturing enterprise comes here and says that he wants so much tariff at the customhouse, they will either give him what he wants or some proportion of it, regardless of existing industrial conditions in the world.

I know that it is somewhat embarrassing to the party in power not to do that. The party in power has been committed to a protective tariff as one of its policies and principles. It naturally takes the position that the more men who are interested in the theory and the principle of a protective tariff the stronger their viewpoint is, and that when an article is put on the free list and taken out of the family of protection, men are encouraged to believe in a different theory as to customs taxes. I realize that, and, therefore, I am not harshly critical of the position of the committee which represents the party in power in trying to make an omnium gatherum bill and to extend the field of so-called protection, whether it protects or not, so far as it can; but, on the other hand, Mr. President, it seems to me that there is one place where even the Finance Committee, representing the principle of protection, believing in the right to make the American people pay taxes to special interests, should draw the line and can draw the line without surrendering their viewpoint, and that is when it is ascertained that the producer of a particular article is not only a monopolist in the United States but a monopolist who controls the world's market; and that is the case in reference to the National Cash Register Co.

Viewing the subject from the standpoint of whether the industry needs protection, I know of no better test as to whether American industry is able to stand alone and to fight its own battles and succeed, regardless of foreign competition, than whether it can export its products to foreign markets and compete in the open markets of the world with its world rivals. It seems to me it is an argument that can not be answered, that if an American industry can carry its goods into those markets of the world and in material quantities combat for the trade of the world against all comers, it is no longer an infant industry at home and can fight its own battles here without governmental protection in the way of a tariff wall. That is the case with reference to this product.

I read from a Tariff Information Survey, relating to paragraph 165 of the tariff act of 1913, Machinery, No. 1. I quote from page 153, where there are given the exports of certain classes of goods that fall under this paragraph. I wish to say that the following figures are for the calendar year and not the fiscal year.

Of adding and calculating machines in 1919 we exported $3,417,958 worth; in 1918 we exported $1,974,250 worth; in 1919 we exported $3,863,217 worth; and in 1920 we exported $6,790,407 worth. That is what we sent into the markets of the world of the product which was manufactured here. We not only sent it out to the markets of the world, but we sent it out successfully, because we sold nearly $7,000,000 worth two years ago. I have no later figures than those, but I have no doubt that same tide kept up in the open markets of the world.

Of course, it may be shown that from time to time there have been sporadic importations; but if an industry such as that of the National Cash Register Co., with its factories located around the world, wanted to alarm the Finance Committee it could import a few of those machines occasionally and sell them in the American market, probably without loss to itself, for the benefit of the example it set and for the sake of the argument. However, Mr. President, without intending to reflect on members of the Finance Committee, from my viewpoint to levy a tax on the American people, or to attempt to levy a tax on the American people, under circumstances of this kind is unconscionable; there is no justification for it whatever. It is merely to please certain special interests that think they ought to receive this tariff and that they can increase their profits by having it.

I say "increase their profits," because it is manifest that the independents who appeared before the committee, according to the statement which I just read, and which the chairman of the

committee put into the RECORD, have built up their business when cash registers were on the free list. They invested their money in this business under free-trade conditions. This was not a war industry, and it was not necessary to develop it for war conditions. It had nothing to do with the war, but they put their money into it under free-trade conditions. They have prospered, for certainly they are still alive; they are still doing business, and they are evidently making money. The only thing they want now is for the Government of the United States to put a tax at the customhouse, which I understood the chairman of the Committee on Finance to say the other day was a protective tax, to enable them to make more money out of the American people.

It may be the new theory of the Republican Party that taxes should be levied to guarantee profit, but it was not the theory of McKinley and Dingley; it was not the theory of the old-time leaders of the Republican Party, who were always content to say, "We do not desire any tariff taxes levied higher than are sufficient to cover the difference in cost between production abroad and protection at home. Here it is demonstrated by our exports that there is no difference in cost of production at home and abroad except the ad captandum statement of these biased witnesses who gave no facts, no direct information, but merely recited the same old story that "wages are down in Germany and up here." That is not sustained by the facts. Aside from that, even if that were true, the manner in which the American factories are organized and equipped with machinery for the production of this class of manufactures overcomes any difference in the way of cost. The very reports of the Tariff Commission, which I hold in my hand, make that statement.

So, Mr. President, as I said last night, not only as to sewing machines and cash registers, but as to practically every article in this list, there is no justification for increased duties where the rates are increased, and there is certainly no justification for taking these articles off the free list and imposing upon them a tax of 25 per cent.

I should like at this point to call attention to one of the anomalies in this bill. When the present law was being considered in the committee of which I was chairman, linotype machines, which were in this paragraph and taxed at that time 45 per cent, were placed on the free list along with sewing machines and cash registers. The House Committee on Ways and Means left the cash registers and sewing machines and linotype machines on the free list. Everybody who is familiar with the linotype is aware that it is a highly complicated composing machine containing a vast deal of machinery difficult to manufacture and far more intricate than a cash register.

A great deal more labor is involved in its manufacture and it is vastly more difficult to produce. If my recollection is correct, when we placed them on the free list there was more competition, though not enough to justify a tax, in linotypes than there was in cash registers; and yet the present Finance Committee puts the tax back on sewing machines and cash registers. They are not afraid to tax the American woman who uses a sewing machine or the American business man who uses a cash register; but they leave linotype machines in the free list. I can not understand why except that possibly the committee which believes in protection for special interests were confronted by one adversary of whom they were afraid. They were not afraid of the women who use sewing machines; they were not afraid of the American business men who utilizd cash registers; but they did not dare challenge opposition of the great American press.

Therefore they left linotype machines properly on the free list and proposed to strike at that class of American citizens who they do not think have the power to strike back.

Mr. President, I hope that the motion of the Senator from Massachusetts [Mr. WALSH] proposing to remove cash registers from the dutiable list will be agreed to and that they will go back to the free list where they properly belong.

Mr. TOWNSEND. Mr. President, I realize how futile it is to talk to the Senate when there are so few in the Chamber. By talking I have not in view the political effect which my words may have, but I do wish to state the reasons for my vote on this particular item.

In the first place, I deny that this will be an additional tax upon the American people. It is a general statement always made by the opponents of protection, that whenever a tariff is levied it is paid by the American people. Of course that depends very largely upon whether or not they buy the foreign article upon which the tariff is levied. It is possible that they might pay for that particular item more than they otherwise would, but even that is not always true.

I contend also, Mr. President, that we have to raise about five billion dollars in taxes in this country; and if a portion of that is raised at the customhouse, as the Senator suggests, so much better for direct taxation upon the people themselves; but Mr. President, I wish to say just a word or two in reference to this particular item.

I think it is a proper protective duty. It is not asked for by the great National Cash Register Trust. It does not care for a duty. It has a monopoly of the market, and has had for some time. The National Cash Register Co. is practically a monopoly; it has been made for many years, and that without protection; so that was a monopoly which certainly could not be charged to the tariff. A number of years back some independent companies saw fit to start the manufacture of cash registers, all of a moderate price. As quickly as they entered into that business the National Cash Register Co. proceeded to employ means which were condemned by the court as improper for the purpose of putting these independents out of business. They succeeded in greatly disturbing them. They caused organizations and reorganizations and bankruptcies in some cases, but finally these companies got established.

The courts intervened and granted an injunction against the National Cash Register Co., prohibiting it from employing the methods which it had employed in the past; but that did not prevent the National Cash Register Co. from carrying out its designs. It established a plant in Berlin, Germany. It established the plant where it could employ the same priced labor that the German manufacturer employed—not American labor, not paying American taxes, not supporting the American Government, but manufacturing its goods under the low prices paid in Germany. We say that by doing that the decisions of the court can be avoided and indirectly the enjoined practices which were found disreputable and unmoral against its competitors in the United States could be continued.

Of course, the National Cash Register Co. can compete with the Germans and Europeans, employing the lowest-priced labor in western Europe; it can do that with its plant over in Germany without any doubt at all. It can also send its product into the United States, if there is no duty imposed on machines of low value, and absolutely destroy the independent competitors in the United States.

Another thing, Mr. President, ought to be borne in mind, if I am correctly informed, and I think I am. The establishment of the independent factories, when they got to doing business, reduced the price of cash registers to the people of the United States. That was the reason why this great trust wanted to put them out of business, and they were doing it until this order of the court.

It is also true that the great Krupp manufacturing concern in Germany, that was employed before the war and during the war in the manufacture of guns, is now employed in the manufacture of other machines, among them cash registers.

It stands to reason that with labor paid less than a quarter of what is paid in the United States it can enter the American market, and so far as these small concerns are considered, it will mean their destruction, and this will be pleasing to the National Cash Register Co. I do not know, I have doubts, about Germany being able to destroy the National Cash Register Co. I would not make a plea for a tariff to protect the National Cash Register Co. It does not ask for a duty. It does not care for one; but these concerns which our country is interested in building up, these legitimate competitive manufacturers, ought to be maintained here unless we are in favor of monopoly. The Senators on the other side and those who are opposed to a tariff generally have stated as one of their favorite arguments that the tariff encourages monopoly; yet here is a monopoly that would, by the establishment of its plant in Germany, make itself immune from the laws of the United States, and at the same time would nullify any tariff which might be placed upon goods abroad if no tariff is imposed.

So, Mr. President, knowing that few are listening to what I may say and that the argument is void, so far as affecting a vote is concerned, nevertheless I felt that it was my duty to say this much, because I understand what the situation is in reference to these independent concerns. You can put them out of business if you like; you can give the entire field to the National Cash Register Co. if you like; but I do not think it will be for the interest of the American people if you do, and I do not think it will be fair to the consumers, the users of cash registers in the United States; for I repeat that the moment these independent concerns became established, the lower-priced cash registers that are used by the merchants and dealers throughout the United States went down, and the price was lower to the people.

Mr. KELLOGG. Mr. President, will the Senator yield?

Mr. TOWNSEND. I yield.

Mr. KELLOGG. How many so-called independent companies are there manufacturing cash registers in this country?

Mr. TOWNSEND. There are three that I know of. There is the American Cash Register Co., at Saginaw; there is a cash register company at St. Louis—I have forgotten the name of it——

Mr. WILLIS. The St. Louis Cash Register Co.

Mr. TOWNSEND. And I think there is one at Detroit, Mich.

Mr. WILLIS. The Michigan Machine Co.

Mr. KELLOGG. What was the order to which the Senator referred in the National Cash Register case?

Mr. TOWNSEND. The court for the southern district of Ohio made an order on a complaint that was made, and it is in the RECORD. I am glad to give this information to the Senator. It is marked "Exhibit A" in the Senate hearings. It shows what the order was, a most sweeping one. I think the Senator from North Dakota placed it in the RECORD last evening.

I do not care to prolong the debate, Mr. President, because, as I said, I think it is futile. Few are listening and few care about the discussion.

Mr. WALSH of Massachusetts. Mr. President, this question was so fully debated last night that it is not necessary to take any more time; but I think perhaps we ought to enumerate the arguments advanced against this tariff duty and see what weight they are entitled to.

We are seriously asked to levy a tariff duty of 25 per cent ad valorem upon cash registers because some wicked trust has squeezed a little independent manufacturer of cash registers in this country; and in order to give relief to the independent company we are going to bestow a tremendous gift upon that trust. The time to have given relief to the independent cash-register company of Michigan was during the years the Republican Party was in control of Congress and was permitting trusts and monopolies, without any restraint or any law, to organize and flourish in this country. The harm has been done; the trust is here; and a 25 per cent ad valorem duty means more profits, means an increase in the prices which the trust and other manufacturers of cash registers will exact from the public.

There is no dispute about the facts here. No cash registers of any amount have been or are being imported into this country. This trust has manufactured in 40 years 2,000,000 cash registers; and because less than 100 cash registers have come in here from Germany we must increase to the hundred million of people in this country, at least as many of them as want to buy cash registers, the price of these cash registers from $100 to $200 apiece. It is preposterous. You can not defend this duty, and you can not blind the American people to the fact that in levying this tariff duty for the benefit of a small independent company—which, if you please, has been squeezed and abused by this monopoly—you are erecting a tariff wall that will keep every cash register out of this country and leave the public unprotected also against this trust.

As a matter of fact, the little independent company competes with the National Cash Register Co. only in one type, and there are five different makes. The only company that could compete with the National Cash Register Co. in the principal makes of cash registers is the German company, and it has only been able to get in here 90 cash registers.

Let me give you some astounding figures about the increase in the price of commodities in Germany. These figures have been given to me by a man who is willing to make an oath, to give an affidavit, as to the increase in the price of commodities in Germany in the last year. He has given me the quoted price of cash registers landed in New York, the price the importer has been expected to pay.

The style or type is what is known as No. 423, so anybody on this floor can inquire for himself as to whether these prices are accurate or not. The quoted import price of that article on July 1, 1921, was 12,000 marks, equivalent to $48 in gold. On August 8, 1921, one month later, it was 16,000 marks, or $64 in gold. On October 1, 1921, two months later, it was 20,000 marks, or $80 in gold. On November 2, 1921, it was 40,000 marks, or $160 in gold, an increase of 100 per cent between the October price and the November price last year. On March 3, 1922, it was 44,000 marks, equivalent to $176 in gold. On April 1, 1922, it was 56,000 marks, equivalent to $224 in gold, and on April 24, 1922, it was 62,000 marks, equivalent to $248 in gold.

The import price of this one type of cash register from Germany has increased from July 1, 1921, to April 24, 1922, only about nine months, from $48 to $248, about 600 per cent, and those figures are typical of every single article contained in this bill and every single commodity we are asked to fix a duty upon. How absurd, how ridiculous it is, to attempt to quote German prices of last August, September, or October, in view of the startling information contained in the figures which I have just given.

I only refer to that for the purpose of calling attention to the fact that Europe is finding itself; that the prices of commodities in Europe to-day, Germany included, are back to pre-war levels; and that we have no business to frame any tariff bill based upon the prices of cash registers or any other commodity last August. Thus we proceed to fool and deceive ourselves and make a bill that will be a laughing stock to the world as well as to this country.

The committee has proposed a rate of 25 per cent ad valorem on cash registers, so that no cash registers can come in here and the big monopoly in Dayton, Ohio, and three little independent fellows can have the field to themselves. How this committee can find a way of helping the little independent company in Michigan with this tariff duty and put out of business this monopoly is beyond my comprehension or conception. Quite a new idea—the way to destroy a trust is to give it a high protection.

Mr. CARAWAY. May I suggest to the Senator that the same argument is used by the proponents of this item that has been used by some of our good friends who say that whisky will make you cold in summer and hot in winter.

Mr. WALSH of Massachusetts. Mr. President, I quite agree with the statement of the Senator from Arkansas.

Mr. President, I urge the Members of this body to hesitate before they adopt this amendment. I want my Republican friends not to be put in the ridiculous position of trying to explain to every merchant, from the time this bill is passed until it is repealed, that their cash registers are, because of this tariff, going to cost about $200 more. I have not forgotten the argument made that the independent companies fear that the National Cash Register Co. is going to build a factory in Germany. Think how absurd that is, to say that they are going to build a factory in Germany and come into America and destroy their own factory and destroy their own investments of many millions of dollars.

If they build a factory in Germany and employ cheap labor and ship into this country the German-made cash registers, they will close up their factory in Dayton and put it out of business. They can not ship one cash register into this country without injuring their factory in Dayton, without depreciating the value of their stock. We have the statement of the manager of the company that they have no such intention.

The Senator from North Carolina stated the situation accurately yesterday when he said that when one rate after another in this bill has been challenged, the Republican majority have found themselves obliged to fly from one excuse to another, and the last one they produced is the statement that there is going to be a flood of American capital to Germany to build manufacturing plants. They told us that about sewing-machine plants.

I knew they would say that about this commodity, and that is why I took the trouble to telegraph the National Cash Register Co. If the committee had really wanted to make a tariff bill that would get the confidence of the people, they would have brought the representatives of the National Cash Register Co. before them and put them under oath and asked them questions to find out what the facts were. But I have talked longer than I had intended.

Mr. KING. I would like to ask the Senator from Massachusetts, before he concludes, how much of an increase there has been in the price of the domestic products of these cash register companies. What is the difference between the pre-war and the present prices?

Mr. WALSH of Massachusetts. I regret I can not give the Senator that information. It is most difficult, for this reason, that there are no two cash registers which are comparable. They are constantly changing the style and character of the machine so as to put new machines with new patents upon the market. I would say to the Senator that the average price of the machine most in use, I am informed, is between four and five hundred dollars, but the National Cash Register Co. sells most of its machines to department stores, to those who buy the highest type of machines and the best machines, and the prices for those machines go up as high as $2,000—from $400 to $2,000.

I think the Senator will bear in mind that in the discussion last night it was brought out that the National Cash Register Co. does not make the same machine in Europe that is made in America. It is a different type of machine, and it looks to me as if that was done so that no comparison could be made between the foreign prices and the American prices. It looks to me as if it was to prevent the argument being used, what

we know to have been the fact in the past under Republican tariffs, that sewing machines and plows, and possibly cash registers made in America, were sold in London and Paris and other European markets cheaper than they were sold to the American people. The Senator knows it.

I have no time further to contribute. I ask for the yeas and nays upon this amendment offered by me.

The yeas and nays were ordered.

Mr. WILLIS. Mr. President, as I was unavoidably absent from the Chamber during most of this discussion, which has involved a great concern in my State, I feel that I ought to say only a word.

I am very familiar with the National Cash Register concern. I think it is only fair to them to say that, so far as I am concerned, at any rate, they have never made any request at all for this duty. I do not want Senators to get the idea that the duty reported by the committee was fixed at the request or suggestion of the National Cash Register Co. At any rate, they have never indicated anything of that kind to me. But I do say that from the general standpoint of the protective principle, in which I most sincerely believe, it seems to me that the rate proposed by the committee is a fair one.

There have been charges of monopoly in this line of business in the country. I shall not now discuss those, but if those charges be well founded, it appears to me to be highly desirable that the independent concerns which are building up the competitive industry should have a chance to live here.

The cash-register business of this country furnishes employment to some twenty-five or thirty thousand people. It is my recollection that Canada and Mexico have a tariff against the importation of cash registers from this country. I know that Germany has a tariff, which she has recently increased materially, and in view of the fact that there are at least three independent concerns manufacturing cash registers in this country, and in view of the further fact that we know that conditions in Germany make possible production at a very much lower labor cost, it seems to me the rate proposed by the committee, 25 per cent, is a very fair one, and I shall support it, although I repeat that no suggestion or request has come to me from the National Cash Register Co., and I do not think they are interested in this rate at all.

Mr. KING. Mr. President, the argument just made by the able Senator from Ohio is a most astounding one, if I correctly interpret his meaning. He takes the position that we should lay a tariff upon cash registers because there is a monopoly, and in order to help strangle the monopoly at home we must impose a heavy tariff duty upon imported products.

That is the acme of Republican illogicalness and absurdity. We build up monopolies in the United States by tariffs, and then must perpetuate the tariffs in order that possible competition may ultimately be developed among the domestic producers.

Mr. WILLIS. Does the Senator contend that the alleged monopoly enjoyed by the National Cash Register was built up because of the tariff?

Mr. KING. I aver, as was stated by an eminent Republican, that the tariff is the mother of trusts. I know that some of our Republican friends smile in derision when that statement is made, and yet we find that the inordinately high tariff, which prevented competition from abroad, resulted in the domestic producers forming trusts or combinations or organizations so powerful and dominating as to control the prices of the domestic products. I think that the history of our industries will demonstrate that many trusts and manufacturing organizations have assumed monopolistic proportions in the domestic market, because they were buttressed behind high-tariff walls. Tariffs are designed to increase prices; to enable the domestic producer to charge more for his products. Republican tariffs are usually dictated by trusts or giant organizations that wish to maintain high prices and make enormous profits.

Take the Steel Trust as an illustration. The evidence conclusively establishes that it can produce its products at from two to five or six dollars a ton cheaper than any independent steel company in the United States. However, it fixes prices agreeable to the steel producers, and all have made enormous profits. And yet this bill carries tariff rates upon steel products. It is designed to prevent any possible competition, so that it may maintain high prices. I repeat, tariff walls aid domestic producers to exploit the people and develop trusts and monopolies.

Adam Smith perceived in his time that whenever competition from abroad was prevented and permission granted for the domestic manufacturers to get together they would get together, and the result would be an enhancement of prices to the consumers. So the Republicans now are driven to defend this iniquitous bill, the particular irrational schedule which we are now discussing, upon the theory that we have built up a monopoly, the cash-register monopoly, and now, to encourage it not to be too oppressive, we will lay a heavy tariff. The theory is that if we keep out foreign products the domestic monopoly will be a little generous with the people, for fear that it may provoke some one to enter the field against it. The idea is to fight monopolies by strengthening them. If there ever was a preposterous, absurd, and illogical argument in favor of the tariff, it has been offered by the distinguished Senator from Ohio.

Mr. WILLIS. Mr. President——

Mr. KING. I yield.

Mr. WILLIS. The Senator is overlooking the fact that under the present law cash registers are on the free list. So his argument falls to the ground.

Mr. KING. I was merely stating the argument the Senator made.

Mr. WILLIS. And I am stating the argument which the Senator from Utah is making.

Mr. KING. The Senator from Ohio has defended a tariff of 25 per cent ad valorem upon the ground that we have a monopoly here.

Mr. WILLIS. I never admitted in the discussion that we have a monopoly. I did not discuss that. I was not taking that as the basis for discussion. I thought we had better not go into that, because it would involve a good deal of discussion. But the Senator alleges that there is a monopoly, and if there be a monopoly, evidently it has not grown up by reason of a protective duty, because the article is not on the protective list but is on the free list.

Mr. KING. I shall not permit my good friend to escape from the dilemma in which he has placed himself. He adverted to the fact that there was a charge of a monopoly upon the part of the National Cash Register, and he offered as an excuse for the tariff that if there were a monopoly it might encourage domestic competition or, to use his expression, the "independents," if we would impose a tariff, and therefore he said he would vote for 25 per cent ad valorem because he conceived that to be fair.

Ah, Mr. President, we are running the gamut from absurdity to ridiculousness in defense of the schedules found in the bill and the tariff rates fixed. When our Republican friends can not point to an industry as being an infant industry, when they are driven from that because it is a monopoly, and when it is shown that there is nothing in the question of the cost of labor, or that the disparity is so little and the disparity in the price is so great that the labor cost does not figure, then they are driven into the realm of speculation and imagination and absurdity for some alleged justification for their tariff rates.

My good friend from Ohio has come to the rescue of the Republican Party now, as he came to the rescue of the Republican Party in the Newberry case by offering the remarkable resolution which will bear his name for all time, and suggests that we must lay tariff duties now because, if there are trusts in the United States and if we impose tariff duties, it may perchance encourage some independent to fight for their lives.

Well, we are learning. When the wise man said there was nothing new under the sun, he did not visualize the able and distinguished Senator from Ohio. He never heard of Republican tariffs. He never heard and never dreamed in his prophetic moods of the ingenuity and skill and the subtlety and illogicalness of the modern Republican, as his brand is found in the Senate of the United States in the year of our Lord 1922.

Ah, Mr. President, the tariff bill is not only iniquitous and exceedingly ugly in its horrible deformities but it is the most illogical and monstrous economic proposition that has ever been given birth in any civilized or uncivilized country. No language can be found properly to characterize the rates which we find in this tariff bill. Why not be honest, Mr. President; why do not our Republican troglodyte friends who are defending the bill come out frankly before the public and say, "The Republican Party was elected by the trusts and the monopolists and the gougers and the profiteers, and the Republican Party is going to pay its debts? The Republican Party is going to be honest for once. It is going to keep one promise that it made, not to the people, it is true, but the promise which it made to the profiteers and the corporations and the trusts which are robbing and plundering the American people."

But when they offer these pretexts, these tenuous, illogical arguments that are submitted in defense of it, all fair-minded men at once will inquire as to the reasons for such a remarkable measure—one which on its face seems to bear the stamp of the trust and the profiteer.

Mr. President, I warn Republicans if they put a tariff on cash registers upon the arguments which have been submitted, they will be compelled, if consistent, to perpetuate these high-tariff rates upon every domestic product, because the domestic manufacturer will threaten, or pretend to threaten, to go across the sea and erect a plant, or threaten to erect a plant for the manufacture of the domestic article upon which he wants a prohibitive tariff. The only excuse needed for prohibitive tariffs is that we have trusts in the United States, and if we do not give them what they want they will go to Europe and engage in business in competition with their own American enterprises.

What a sound and statesmanlike argument that is! And yet it is offered by Republicans in support of this bill.

I called the attention last night of the Senator from North Dakota [Mr. MCCUMBER] to the Carbide Trust. I am going to tell the Senate something about the Carbide Trust before we get through with it, a trust with which Mr. Herrick, a leading Republican, is connected. It is not prosecuted, there is no proposition to proceed against it, although it is a trust. I called attention to the fact that that trust a number of years ago, when it had an agreement with some manufacturers in Europe to divide some of the markets of the world between them, and the agreement did not work out just as desired, erected a plant in Sweden for the purpose of producing carbide, but not a pound was manufactured. It was a bluff, first, with respect to European producers, and, secondly, the American market.

When we come to discuss the carbide schedule in the pending bill I have no doubt that my Republican friends upon the other side, following the illogical argument of the Senator from Ohio, will say, "Oh, well, the Carbide Trust, it is true, has control of the American market, but let us encourage some independent manufacturer by levying a high tariff. Moreover, if we do not do it, the Carbide Trust, which has a plant over in Sweden, will manufacture carbide and introduce it into the United States." That will be the argument used then, as it is used now, in defense of the rates upon cash registers. Everybody knows that Germany, in the production of cash registers, being compelled, as she is compelled, to go abroad for her raw materials, or substantially all of them, that enter into the production or manufacture or fabrication of cash registers, knowing that she is compelled to go abroad for the primary materials, can not compete with this long-established, economically administered plant operating in the United States.

A tariff rate on this product is tantamount to a steal. Let us use proper language and call a spade a spade. It is not a proposition to give a tariff. It is a proposition to rob the public for a trust. It is a proposition to enable the Cash Register Trust and a few other concerns in the United States to further rob and despoil the American people. Let the Republicans defend it if they can here. They can not defend it before the American people and they will be rebuked for their devotion, as shown by this bill, to special interests and unworthy organizations and corporations.

The PRESIDING OFFICER. The question is upon agreeing to the amendment offered by the junior Senator from Massachusetts [Mr. WALSH] to the amendment of the committee, upon which the yeas and nays have been ordered.

The Assistant Secretary proceeded to call the roll.

Mr. UNDERWOOD (when his name was called). I transfer my general pair with the Senator from Massachusetts [Mr. LODGE] to the Senator from Rhode Island [Mr. GERRY] and vote "yea."

The roll call was concluded.

Mr. HALE. I transfer my pair with the senior Senator from Tennessee [Mr. SHIELDS] to the junior Senator from Maryland [Mr. WELLER] and vote "nay."

Mr. OWEN. I transfer my pair with the Senator from New Jersey [Mr. EDGE] to the Senator from Missouri [Mr. REED] and vote "yea."

Mr. JONES of New Mexico. I transfer my general pair with the Senator from Maine [Mr. FERNALD] to the Senator from Nebraska [Mr. HITCHCOCK] and vote "yea."

Mr. CURTIS. I am requested to announce the following pairs:

The Senator from Delaware [Mr. BALL] with the Senator from Florida [Mr. FLETCHER];

The Senator from Vermont [Mr. DILLINGHAM] with the Senator from Virginia [Mr. GLASS];

The Senator from Indiana [Mr. NEW] with the Senator from Tennessee [Mr. MCKELLAR];

The junior Senator from Kentucky [Mr. ERNST] with the senior Senator from Kentucky [Mr. STANLEY];

The Senator from New Jersey [Mr. FRELINGHUYSEN] with the Senator from Montana [Mr. WALSH]; and

The Senator from Rhode Island [Mr. COLT] with the Senator from Florida [Mr. TRAMMELL].

The result was announced—yeas 27, nays 32, as follows:

YEAS—27.

Ashurst	Jones, N. Mex.	Norris	Smith
Capper	Kellogg	Overman	Swanson
Caraway	Kendrick	Owen	Underwood
Culberson	King	Pomerene	Walsh, Mass.
Harris	La Follette	Robinson	Watson, Ga.
Harrison	Lenroot	Sheppard	Williams
Heflin	Myers	Simmons	

NAYS—32.

Brandegee	Jones, Wash.	Newberry	Spencer
Bursum	Keyes	Oddie	Sterling
Cummins	Ladd	Page	Sutherland
Curtis	McCormick	Pepper	Townsend
Elkins	McCumber	Phipps	Wadsworth
France	McKinley	Rawson	Warren
Gooding	McLean	Shortridge	Watson, Ind.
Hale	McNary	Smoot	Willis

NOT VOTING—37.

Ball	Edge	Lodge	Reed
Borah	Ernst	McKellar	Shields
Broussard	Fernald	Moses	Stanfield
Calder	Fletcher	Nelson	Stanley
Cameron	Frelinghuysen	New	Trammell
Colt	Gerry	Nicholson	Walsh, Mont.
Crow	Glass	Norbeck	Weller
Dial	Harreld	Pittman	
Dillingham	Hitchcock	Poindexter	
du Pont	Johnson	Ransdell	

So the amendment of Mr. WALSH of Massachusetts to the amendment of the committee was rejected.

Mr. McCUMBER. Mr. President, I move to amend the committee amendment on page 83, paragraph 372, line 22, after the words "ad valorem," by striking out the words "printing presses, not specially provided for, lawn mowers and."

The VICE PRESIDENT. The question is on the amendment of the Senator from North Dakota to the committee amendment.

Mr. ROBINSON. Mr. President, printing presses, as I understand, are now taxed at the rate of 15 per cent ad valorem. I ask the Senator from North Dakota what is the provision concerning "printing presses not specially provided for" in the House bill?

Mr. McCUMBER. Mr. President, they go into the basket clause.

Mr. ROBINSON. What rate do they bear—35 per cent?

Mr. McCUMBER. Under the Fordney bill they would bear 35 per cent, but under the amendment I have offered they would bear 30 per cent.

Mr. UNDERWOOD. Will the Senator yield for just a moment?

Mr. ROBINSON. I will yield to the Senator in just a moment. Under the House bill, as I understand, the rate would be 35 per cent.

Mr. UNDERWOOD. The latter part of paragraph 393 of the pending bill, as reported by the committee, reads as follows:

if composed wholly or in chief value of iron, steel, lead, copper, brass, nickel, pewter, zinc, aluminum, or other metal, but not plated with platinum, gold, or silver, or colored with gold lacquer, whether partly or wholly manufactured, 35 per cent ad valorem.

The rate of 35 per cent as provided in the Fordney bill has been increased by the Senate committee to 40 per cent ad valorem. The Senator will find what I have quoted on page 91. It seems to me that if the clause is stricken out, paragraph 372, printing presses, will fall in the basket clause, which would involve an increase of the tax on printing presses from 35 per cent ad valorem, as now provided in the bill, to 40 per cent.

Mr. McCUMBER. May I correct the Senator? The basket clause under which the printing presses would fall is found on page 84, line 5, and reads as follows—

all other machines or parts thereof, finished or unfinished, not specially provided for 30 per cent ad valorem.

Mr. ROBINSON. Mr. President, it is apparent that the effect of the amendment proposed by the Senator from North Dakota will be to decrease the rate on printing presses from 35 per cent ad valorem under the pending amendment to 30 per cent ad valorem under the basket clause contained in line 7 on page 84.

Mr. McCUMBER. I can not quite understand the Senator.

Mr. ROBINSON. I say the effect of the amendment now proposed by the Senator from North Dakota will be to decrease the rate on printing presses from 35 per cent ad valorem, as is proposed in the amendment of the committee on page 83, to 30 per cent.

Mr. McCUMBER. Yes; it is a decrease from 35 per cent to 30 per cent, as printing presses would fall under the basket clause.

Mr. ROBINSON. I do not believe that that decrease is adequate. While I appreciate the very small diminution in this

rate which is now proposed to be made by the committee, I shall before taking my seat submit an amendment to the amendment of the Senator from North Dakota which will reduce the rate on printing presses very materially. Under existing law the rate is only 15 per cent ad valorem.

There is very little information respecting this item furnished the Senate in the summary of tariff information provided by the Tariff Commission, but on page 505 I find the following statement:

The production of printing presses in 1914 amounted to $8,396,508, the output of 88 establishments.

On page 506 it appears that the imports of printing presses were $88,301 in 1914 and $3,305 in 1917. Later figures found on page 507 are approximately as follows: Of printing presses for the year 1918 the number imported is not stated, but their value is stated at $22,118, and the revenue collected at 15 per cent was a little over $3,000. In 1919, 171 printing presses were imported, valued at $20,999, and the duty collected was $3,150. In 1920, 58 were imported, valued at $18,994, and the duty collected was $2,849. For nine months of 1921, 63 were imported, valued at $22,126. The amount of the duty is not stated.

With respect to machine tools, which under existing law bear the same rate as printing presses, I find that importations are comparatively small. Imports of machine tools were $306,096 in 1914 and $100,685 in 1915. On page 506 of the book of tariff information is found a summary of information respecting importations of machine tools, substantially as follows: In 1918 the value imported was a little over $300,000; in 1919 a little over $139,000; in 1920 it rose to something more than $432,000, and in nine months of 1921, $178,546.

In view of the very large production and the comparatively small importations I think that a rate of 30 per cent can not be justified. Certainly it is not sustained by any information which has been brought to the attention of the Senate; and the same is true in a larger degree, of course, of the rate proposed in the pending amendment, 35 per cent.

In order to test the opinion of the Senate on this subject, I move to amend the amendment of the Senator from North Dakota, which is a motion to strike out, by making it a motion to strike out and insert, as follows: Strike out the language in the paragraph and insert the same language, with the exception of "15 per cent" in lieu of "35 per cent."

Mr. McCUMBER. Mr. President, while I think that possibly under the rules, as I have made a motion to amend, an amendment would be an amendment in the third degree, I think we can reach the matter in this way——

Mr. ROBINSON. I think that is forceful, although my motion to strike out and insert probably would take precedence of a simple motion to strike out; and the Senator, in order to give me a vote upon my proposed amendment without parliamentary question, will withdraw his amendment for the present?

Mr. McCUMBER. Yes; I was going to suggest that I would withdraw my proposed amendment at the present time, so that the Senate can have a vote upon the amendment offered by the Senator.

Mr. ROBINSON. Very well. I thank the Senator from North Dakota, because if his amendment were agreed to the probability is that there would be no opportunity for testing the opinion of the Senate; and, as I have already stated, I think we ought to have a vote on this proposal. I do not believe there is any ground whatever for justifying any increase in the present rate. I would rather see printing presses placed upon the free list than to impose an unnecessary increase in the existing rate. The present rate is adequate; and therefore I move to strike out "35," in line 24, and insert "15," and on that I shall ask for the yeas and nays.

Mr. McCUMBER. Mr. President, I desire to say, in reply, that I do not anticipate, at least, that there would be any great danger of importation of foreign-made large printing presses that are used in this country. I refer to newspaper presses. We, of course, make a standardized machine in this country. We possibly make it as cheaply as it could be made anywhere else. There are quite a number of little machines of a very much lower price scale that can come into the country, and do come into the country, and while they would not compete to any extent with our machines at the same time they would furnish us a little revenue, possibly; and, as I have stated many times, we are looking for revenue wherever we can get it, even though there may not be any danger of serious competition.

Mr. ROBINSON. Mr. President, will the Senator permit me to make an inquiry in that connection? Have the committee or the Senator from North Dakota investigated the maximum revenue rate with respect to printing presses, and determined what that will be?

Mr. McCUMBER. There is very little coming in; I will admit that, and the revenue would be very small. I will also admit that.

Mr. ROBINSON. So that as the rate now exists—15 per cent—the importations are so small that the revenue is negligible, or comparatively so; and if the rate were increased the probable result would be to tend to prevent importations, or diminish the number of presses brought in.

Mr. McCUMBER. Even if we had the imports of 1923 upon a 30 per cent basis, we would get about from $16,000 to $18,000, and, of course, it takes a great many of those to amount to a million dollars; but this bill covers a wide range, as all tariff bills do, and, taking all of these little matters together, they mount up to quite a sum, and that sum will be needed.

I wanted especially, however, to call the attention of the Senator to this matter so that he may consider it, if he desires to, from the protection standpoint. As I say, in my opinion it is not going to interfere to any extent with those presses which we make here of a standard type and which are rather costly, but I notice by the Reynolds report that we took four invoices of printing presses. They came in from Germany. The average German price was $290.60. The landing charges were $28.64. The selling price of this imported article in the United States was $572.50. The selling price of a comparable domestic article was $606.25. The rate, therefore, required to equalize, allowing a reasonable profit—and the reasonable profit is 25 per cent—would be 57 per cent. The rate we would give here would be 30 per cent, so, of course, it would not be sufficient to cover that; but I am of the opinion that as business revives there will undoubtedly be more imported into the United States. Certainly there will be, in my opinion, if the present high prices in the United States continue; and to what extent they may go down, of course, none of us can say with absolute certainty.

Mr. ROBINSON. Of course the present high prices might be reduced without working any detriment to the public generally. At least I have never understood that when prices become excessive it is consistent with the policy of protection to use tariff rates as a means of maintaining those prices. Protection is justified, if I understand it correctly, on the theory that the industry which it serves is unable to prosper without it if unrestricted competition is permitted, but that principle can not be applied in the case of any commodity or any industry which is already overprosperous.

If the prices being charged for printing presses are to high, that affords a justification for reducing the tariff rather than for increasing it, because upon no theory of protection that I am familiar with should tariff rates be used to permit an industry to receive excessive profits, the object of a protective tariff being to enable an industry to thrive or to live in spite of competition which, but for the protective rate, would destroy it.

Mr. McCUMBER. Mr. President, the Senator's argument would have been exactly in line if we had given a rate of 84 per cent, because, as I state, 84 per cent would measure the difference; but when we give 30 per cent we have made allowance for a very considerable reduction in price, and therefore we are not maintaining the present high price.

Mr. ROBINSON. But may I point out the fact that under the present rate, which is low—15 per cent—there are substantially no importations. Prices in the United States are already excessive; at least, they are high enough.

Mr. KING. More than double, I have been advised by the Tariff Commission.

Mr. ROBINSON. Yes; and therefore this industry can not need protection. There is no justification for it. If you justify the rate at all you must justify it on a revenue basis; and I believe that the effect of this very large increase in the rate would be to shut off the small amount of importations that we are now receiving and to diminish the revenues rather than to increase them.

Therefore I ask for a vote on the amendment to reduce the rate to 15 per cent.

Mr. LENROOT. Mr. President, I voted against the committee on a number of items yesterday and to-day for the same reason that I will vote for the amendment now proposed by the Senator from Arkansas.

Upon the items upon which we have recently voted the figures have shown that our imports were nominal and our exports were very large. Wherever that condition exists I can not justify voting for an increased rate over existing law; and in this particular case, where the imports in 1920 in the case of printing presses were only $18,000 in value and our exports

were over $6,000,000, I can not justify voting for doubling the rate upon printing presses.

The Senator from North Dakota admits that from a protection standpoint the increase is not necessary, but he says the committee is proposing it as a means of securing additional revenue. But, Mr. President, if the imports on a 15 per cent basis amounted to only $18,000 in a year, furnishing a revenue of $2,800, how does the Senator think that doubling the rate will produce a larger revenue? Under these circumstances, doubling the rate will simply mean that there will be no imports at all, and the increased rate will mean a loss of revenue, not an increase.

So, Mr. President, I propose throughout this bill, wherever the figures show that our imports of a commodity are nominal and our exports of that commodity are very large, to vote against the committee on increasing rates over existing law.

Mr. SIMMONS. Mr. President, I am very much delighted to hear the Senator from Wisconsin [Mr. LENROOT] make the statement which he has just made. It is, to my mind, the only sane view of the situation which has confronted the Senate during the last two days, when we have had before the Chamber item after item of which the imports were absolutely negligible while the exports were very large. That situation itself would seem to be abundant answer to the contention of the committee that an increase in present duties is necessary to afford protection to the industry. Heretofore, in the consideration of tariff bills, whenever this situation could be shown to exist with reference to any item in the bill, it was always considered to be a complete negative answer to any claim for an increase in the rate prevailing at the time when the imports vanished and the exports accumulated. But such an answer, truly crushing as it is, has seemed to have very little effect in the discussions of items in the pending bill.

Day after day, on item after item, we have been able to show from the official records the condition which the Senator from Wisconsin now says will impel him to vote against the committee increase. In almost every case the committee has admitted the facts, both with reference to imports and exports, and with reference to the large volume of domestic consumption and production; but, notwithstanding that, on one pretext or another they have brushed away this conclusive argument against their proposition, and, to my amazement, when the votes have been taken, not all, I am glad to say, but a large percentage of the Senators on the other side of the Chamber have voted to sustain the action of the committee. It is a very anomalous situation. It is a condition which has never existed heretofore when we have considered tariff bills, and I have been at a loss to understand it.

And, Mr. President, I do not understand why the majority of the committee, who are assumed to have had these facts before them at the time they wrote these rates into the bill, should have ignored this all-important factor in the framing of these amendments to the bill.

As I have said here before—and I can not repeat it too often—I have been unable to find any reason for this action of the committee except a yielding to the insistent demands of the manufacturers, and I have been unable to understand why the manufacturers made those demands, except upon the theory that, having raised their prices already to the top of the tariff wall, they have felt that it was absolutely necessary to have that wall raised still higher in order to enable them to raise their prices without danger of foreign competition. If there is any other explanation of the reason why the manufacturers, who have been for the past seven or eight years absolutely exempt from foreign competition, under the rates of the present law, should be insisting upon these increases, in the face of the fact that there are no imports, but that there are great exports, it ought to be given. To my mind the committee's action can not be explained on any other theory than that it is for the purpose of giving the manufacturers and profiteers an opportunity to further advance their prices and protect them against foreign competition.

In addition to that, this situation develops a very important fact, a very significant fact, with reference to these rates which has been developed here before. The Senator from North Dakota tells us the price of foreign printing presses when landed here, with profit added, and the profit that is added, we were told yesterday, is 25 per cent, so that the foreign price, plus 25 per cent for overhead and profit, is the price with which the American selling price is compared. That comparison would be justified provided the committee had ascertained that the American selling price does not carry a profit above 25 per cent.

But while arbitrarily fixing that profit for the foreign article, has the committee ascertained that the selling profit of the American jobber and wholesaler is only 25 per cent? Does anyone believe that the American wholesale profit upon the items we have been discussing for the past two days, machines, guns, automobiles, and articles of that character, is only 25 per cent?

The Senator from Utah insists that we should compare the foreign price with the manufacturer's price, and yet he is comparing it with the importer's price, and the importer is the wholesaler. The importer is not the manufacturer of foreign articles; he is the wholesaler of the foreign articles. The manufacturer is not the wholesaler of his articles. He makes a profit. He sells to the wholesaler, who takes the place of the importer with reference to the foreign article, and he adds his profit. I undertake to say that the wholesaler's profits with reference to articles of this character in this country to-day, instead of being 25 per cent, would be more nearly 75 per cent, and to compare the foreign price, with 25 per cent added to it, with the American price, carrying from 50 to 75 per cent profit, is not a fair way of ascertaining the difference between the selling prices of the articles.

Mr. SMOOT. I would agree with the Senator, but the price of the foreign comparable article is compared with the price of the American manufacturer, not with the price of the jobber.

Mr. SIMMONS. Then, why in your calculations are you telling us about the profits?

Mr. SMOOT. The price we compare is the price of the foreign goods coming into this country.

Mr. SIMMONS. Then let us abandon the idea that these things are bought by importers and sold by importers in this market and assume that all the foreign articles are sold with no profit added except the manufacturer's profit, and that the American prices with which you are comparing them are only the manufacturer's prices. Let us take that to be the theory. I do not want to get into any controversy with the Senator about a matter of that sort, because the argument I made applies with as much force to one case as to the other case.

Mr. SMOOT. Mr. President, the Senator had better not say that, because if we had a manufacturer's cost, with 75 per cent added, or 25 per cent added, or any other per cent added, then the difference between the foreign price and the price of the comparable article in the United States would be greater. The Senator knows that.

Mr. SIMMONS. The Senator says I ought not to say that. I do say it. I say that they have taken the foreign manufacturer's price and the American manufacturer's price. We have not been comparing the prices of the industrial countries of Europe with the prices in America; we have been comparing almost exclusively the prices in Germany with American prices, and we have been told that the profits which are being made in Germany are very, very low, that the labor costs but little, and that the manufacturer makes but slight profit. That is the theory upon which they have attempted to sustain the idea that German prices are far below the prices of the other industrial countries of Europe, with cheapness in production and smallness in profits prevailing in those countries.

When we come to compare those with American manufacturers' prices, is there anyone in this body who will stand here and, in the face of the American people, in the face of the well-known fact with reference to prices charged in this country by manufacturers, deny that the manufacturers' prices and profits in this country are not only large but are exorbitant in many lines of industry, and especially in the lines we are now talking about—automobiles, guns, and machines? They are so very large that the people of this country with one voice are crying out against them, and we find the committee with one voice crying out against the low prices of German products.

So you are comparing prices against which the American people are protesting and clamoring as unconscionable, as unjust, as oppressive, with prices these gentlemen are telling us are so low that they enable the country of their production to undersell the world, and to undersell us, who are the cheapest producers of most products that are manufactured in the world, as is shown by the fact that we are rapidly capturing the markets of the world, capturing them even against Germany. We are doing that to-day. We are doing that in South America to-day. We are meeting Germans in competition in South America to-day in the sales of machinery, in the sales of all varieties of products, locomotives, iron, and steel; we are meeting them in South America to-day upon absolutely equal terms, and we are underselling them.

But that does not mean that we are charging the South Americans exorbitant prices. It means that the American manufacturers are charging the domestic consumers in this country extortionate prices, and by reason of the big profits they are making out of the American consumers they are able

to sell their products to the foreigner for a price much lower than they sell the same products to the American people. Yet, in the face of that situation, you come here and say that the great organizations which are carrying on that sort of world trade ought to have further protection in the American market, and ought to be afforded a further opportunity to control prices and be secure from foreign competition.

Mr. McCUMBER. Mr. President, of course I can not argue this case with the Senator from North Carolina because we look at these matters from entirely different standpoints—I as a protectionist, he as a free trader, or the equivalent of a free trader. Therefore we can not meet on any kind of common ground. But I think if the Senator from Wisconsin [Mr. LENROOT] and I, who are both protectionists, understand exactly the same facts upon which any matter is based, there will be very little difference in our conclusion as to what would be a proper protection. I do not, of course, attempt to convince the Senator from Wisconsin that we have not reached a normal condition either in this country or in Europe. I anticipate that he thinks we have reached a condition which is more nearly normal, both in Europe and in this country, than I think we have reached. I do not think we are even beginning to approach a normal condition.

We have to frame the bill upon the assumption that conditions will change, and change in the near future. Of course, if we had reached a normal plane, then I would say that if upon any article which we produce there is almost nothing coming in and we are exporting considerable we certainly do not need any protection. But the first thing I would ask myself, the first thing toward which I would direct my inquiry, would be whether we are both considering the same thing, because we may export a standardized machine that may be worth $3,000, $5,000, or $10,000, and we may not be exporting a single one of the little hand or trade machines for the printing of cards, circulars, and so forth. They may be two entirely different propositions. We may be importing one kind, while we are not importing at all the other kind, and may be exporting the other kind. Now, I think that is exactly the situation in the United States and in Germany.

The only thing that can guide us at all in determining what we may possibly expect is to look over the field, say from 1910 to 1914, a period in which we were as nearly normal as we can expect to get, at least in a good many years to come. The Senator from Wisconsin just made the statement that if we could get only a small revenue from a duty of 15 per cent, therefore we would receive no duty whatever if we raised it to 30 per cent. I invite the attention of the Senator from Wisconsin to that particular point.

In 1910 we had a law which imposed a duty of 30 per cent ad valorem. We imported under that law in 1910, $30,000 worth and received a duty of $9,000. In 1911 we imported $28,343, and in 1912, $31,319. Now notice how they are growing under the 30 per cent ad valorem. In 1913 they jumped up to $54,000 with a 30 per cent ad valorem duty—that is, for the fiscal year ending June 30 of that year. So it would be seen that with an ad valorem duty of 30 per cent, double what it is now, we were receiving a great deal more in imports than I think we are receiving just at the present time, and in addition thereto we were getting about five times the amount of revenue therefrom.

Let us come down to the next year, when we had a 15 per cent ad valorem duty. Our highest importations were $81,000, but we only got $12,256 revenue, while in 1913 we got $16,323 revenue on importations only about two-thirds as great. So I believe that inasmuch as there was a very rapid and steady increase under normal conditions, when those normal conditions return we will continue to get a steady increase under the 30 per cent, the same as we did under the ad valorem rate of 30 per cent during the operation of the Payne-Aldrich law.

So, Mr. President, I believe that we ought to give greater consideration to the fact that our principal competitor is not yet upon her commercial feet. In the first instance, all her ships were taken away from her and she had to depend entirely upon the ships of a foreigner. She is now building light, inexpensive ships for her commerce, and building them at an enormous rate. She is preparing to-day to meet her enemies in the commercial field as she met them at the beginning of the war in overwhelming numbers on the battle field. Without a mighty army to maintain, without the necessity of being at the enormous expense of increasing her navy to meet that of her enemies, with her low wage scale, with every man and woman working 8, 10, and 12 hours a day, she will be in better position to challenge every other country in the world for supremacy in the world's market. I think we ought to give grave weight to these conditions.

If the Senator from Wisconsin and myself disagree upon any matter, it is rather upon the matter of whether or not there is this danger in the near future irrespective of the fact that we are receiving almost no importations to-day.

Mr. LENROOT. The Senator from North Dakota is correct as to where the line of our disagreement lies, except that I do not agree with the Senator from North Dakota that there is danger of Germany becoming more efficient and sending more of her goods to us. But, Mr. President, there are no importations of this article now. A 15 per cent duty will take care of that in part. So far as duties based wholly upon the theory of the future are concerned, as I have said before upon this floor, they are supposed to be the object of the provision in the bill that we will come to later on, which will enable the President under certain circumstances to increase the rates fixed in the bill a maximum of 50 per cent, and in certain cases to apply the American valuation. If that is not the purpose of that provision, then I do not know why it was put in the bill at all. So I am not in favor of trying to translate into figures in the bill at this time all the possibilities which may occur in the future, because that has been taken care of in another part of the bill.

There is another thing which should also be borne in mind when a comparison is made between conditions now and conditions prior to the war. While it is true, I believe, that Germany, because of her lower wage, is producing to-day at a less cost than she did produce prior to the war, it must be remembered too that there is an export tax of 12 per cent on everything that Germany sends out, and when we make a comparison prior to the war with a rate that is being fixed in the bill now it is exactly the same as if the rate under discussion were fixed at 27 per cent if there had been no export tax in Germany.

All of these things must be taken into consideration. I wish to repeat that wherever the figures show that although the imports are small they are increasing, and if they are substantial, I am willing to take that as an indication of what will happen in the future and vote for liberal rates to take care of that situation. But where under a given rate there are practically no importations and very large exportations, and provision is made in the bill to take care of the future, I am not willing to vote for such rates as now proposed on this particular item.

Mr. KING. Mr. President, it is obvious that where tariff rates are laid when there are no importations they can not be justified upon the ground of revenue. They can not be defended upon the theory that infant industries are to be protected, that the difference in labor costs at home and abroad are warrants. If there are no importations then obviously there is no ground for the imposition of a tariff. Why, then, with respect to thousands of items in this bill are there tariff rates? The evidence shows that there are hundreds and thousands of commodities which if imported at all are in quantities so negligible as to be denominated nil.

I called attention the other day to the fact that there are 5,000 items embraced within one schedule, the importations of which were less than $100 each in the year 1914, and yet the schedule fixes rates upon those articles of 50 and 60 per cent ad valorem plus specific rates. What is the reason for this? The reason, of course, is to give domestic manufacturers a complete monopoly, to enable them to increase their prices beyond the limits of fairness and honesty.

If the position of the junior Senator from Wisconsin [Mr. LENROOT] had been the basis of the formulation of this tariff bill, Mr. President, our Republican friends could have gone to the country in a much stronger position and much of the argument which has been made and the criticism in which we have indulged would have fallen upon deaf ears. The Republicans have furnished the Democrats and the opponents of this bill arguments against the bill itself which may not be refuted. If our Republican friends had had the wisdom of the junior Senator from Wisconsin, or had manifested the same sagacity which has been exhibited by the Senator from Nebraska [Mr. NORRIS], or had shown any spirit of progressivism or toleration or sanity in the drafting of this tariff bill, the result in the coming election might be entirely different.

Mr. President, the Senator from North Dakota speaks about conditions being different now from what they were in 1914 and anterior to that time, and because conditions now are different from the conditions then, he justifies these extortionate rates. If the Senator from North Dakota would view the question, according to my conception, in the fair and logical and proper light, he would have seen that the progress toward normal conditions makes these high rates less defensible; in other words, the conditions in September, when the Reynolds report was drawn and which seems to have been taken into consideration in the framing of the tariff bill, are not the conditions

which exist to-day; they are not the conditions which will exist to-morrow or when this bill shall go into operation. Every day as it passes changes the conditions, and changes them to the advantage of the American producer, and under this bill fortifies him against the legitimate demands of the people for reduced prices. This bill seeks to preserve war prices and war profits. It places a weapon in the hands of the domestic manufacturer to wound and hurt the American people.

If the Senator from North Dakota desires to put into application rates that would more nearly be justified by the conditions of 1914 he would have to greatly reduce the rates found in this bill; he would have to take into account the fact that every day the changes in Germany result in increased prices of production; and yet the Senator from North Dakota is carrying into peace times and into the future the conditions of 1915, 1916, 1917, 1918, 1919, and 1920, and of September last, notwithstanding prices in Germany are mounting, that labor costs are rising, and the industrial condition generally shows a complete response to the advancing prices in all avenues of life and business.

Mr. McCUMBER. Will the Senator allow me to interrupt him?

Mr. KING. I yield.

Mr. McCUMBER. I know the Senator desires to be fair.

Mr. KING. If I misrepresented the Senator, it was unintentional.

Mr. McCUMBER. I have stated in each instance that if we had followed the Reynolds report, of course, the rate would have been very much higher—sometimes it would have been two or three times as high to measure the difference—but I have said again and again that in no case have we allowed rates that would measure the difference as shown in the Reynolds report. We have discounted the future in every instance, and in no single instance have we fixed a rate as high as the Reynolds report would indicate it should be to equalize conditions. I know the Senator from Utah does not wish to misquote me upon that matter.

Mr. KING. I certainly do not. I did not intend to do so, and I do not think I did. I say again, however, that the Reynolds report is used as a basis for this bill. I do not mean to say that the Senator from North Dakota has slavishly followed the figures in the Reynolds report, but the Senator in reporting this bill accepted the rates of wages, and so forth, which are stated or reflected in the Reynolds report as then existing, and the difference in the cost abroad and here substantially as indicated in the Reynolds report.

Mr. McCUMBER. In two respects the Senator from Utah is in error, if he will allow me to say so. In the first instance, I desire to say that, of course, there are no wage rates in the Reynolds report, and in guiding ourselves as to the question of wages we had to get the best information which we could as to present wages, and then discount that to a considerable extent. As I have so often stated, unquestionably German wages will go up and wages here will undoubtedly, to some extent, be reduced. The Reynolds report was not taken as a basis; it was simply taken as an evidential fact just so far as it was considered as at all appropriate and not as a basis in any instance.

Mr. KING. I accept the Senator's statement as to the use given to the Reynolds report. It has been referred to repeatedly by the distinguished Senator and by others apparently as justification for the rates which they have urged upon the floor of the Senate; but, Mr. President, I repeat that conditions in Germany are so mutable that each day furnishes an argument for lower rates of duty. With increasing wages and costs of production, the argument for these high rates is destroyed, even for those who are archprotectionists. The Senator from Massachusetts stated a moment ago that last August a given grade of cash register sold at $48 in Germany and the same grade is sold now, or was sold a few weeks ago, at over $250, showing the great advance in cost of materials, of production, and of labor in Germany since August of last year.

It has been stated upon a number of occasions that within the past few months wages have advanced in Germany in the neighborhood of from 40 to 80 per cent; that transportation charges have gone up in the past 60 days more than 40 per cent, and that everything in Germany is responding to the changed financial and economic conditions. Rents will soon materially be advanced, as the cost of transportation has been materially advanced.

Now, Mr. President, with respect to the machines under consideration, we find that the domestic price is more than 100 per cent above the price in 1914. The domestic producers, taking advantage of their monopoly and the lack of competition from abroad, are charging the public substantially what they desire.

I am utterly at a loss to comprehend how the imposition of a duty upon printing presses may be defended in the light of the nominal importations. We will get no revenue from the duty, and the importations constitute no menace by way of competition to the domestic producers, and therefore it looks as if the sole purpose was to license the domestic manufacturers to maintain the present—I shall not say extortionate—high prices, which are double the prices charged before the war. How are we going to bring prices down to normal levels if we frame a tariff law upon the theory that high prices ought to be maintained, and when we enact a law behind which the domestic manufacturer may buttress himself, fearing no foreign competition, and, in most instances, by reason of monopolistic control, fearing no domestic competition?

I called attention yesterday to the fact that already the woolen manufacturers in the United States have advanced the prices of their products, and it was indicated in the same publication that further advances would be made. The American people have been told that these extortionate prices would come down; but our Republican friends are framing this legislation so that present enormous prices may either be maintained or increased. What will be the result when winter comes of the increased prices of woolen goods, clothing, blankets, and a multitude of articles so indispensable to the welfare of the people? Our Republican friends are apparently doing everything they can to resist the movement of the laws of supply and demand. They want to arrest them and to continue this artificial situation—the product of the war and the result of definite combinations in restraint of trade in the United States,

I read in this morning's Baltimore Sun a very illuminating article dealing with the question of antitrust actions which are still languishing. Yesterday I mentioned the fact that many of the corporations of the United States had formed combinations destructive of competition, and that they treated the Sherman antitrust law as a nullity. In the Baltimore Sun of June 8 this statement is made, appearing upon the first page of the paper:

> That antitrust prosecutions have languished in recent times and may be expected to occupy even less attention on the part of the Department of Justice in the future may be indicated by the fact that within the past three years the Federal Trade Commission has sent the records in more than 60 cases of alleged violations of the law to the Attorney General without court action being taken in a single instance.

What is the matter with the Attorney General and the Department of Justice? Why do they not prosecute the corporations which have violated the Sherman antitrust law?

> The commission has gone ahead, within such legal limitations as it may function under, investigating case after case of alleged transgression against the Sherman Act and other enactments in the same direction, but that body is powerless to do more than investigate and make recommendations. It can dissolve no combinations and can send nobody to jail.
>
> ACTION WITH JUSTICE DEPARTMENT.
>
> Prosecution of offenders is the business of the Department of Justice and the trial and conviction of those offenders is the business of the Federal courts. The commission may, of course, issue a complaint against an alleged violator of the law, and may state its charges in behalf of that complaint, as has been done in the case of the Bethlehem-Lackawanna steel merger.
>
> Evidence may be exacted by the commission in its inquisitorial proceedings. Persons and papers may be called for and demanded. And if the commission becomes convinced that a defendant company has violated the law an order to "cease and desist" may be issued.
>
> But if the defendant chooses to ignore such an order the Federal Trade Commission is powerless to compel compliance. All that it may do thereafter is to certify the whole record to the Department of Justice and to urge officially and publicly, if it pleases, that court proceedings be instituted. If the department believes it has a case and is inclined to carry such a case to court prosecution follows. Otherwise the matter ends there so far as the Government is concerned.
>
> SO ENDED IN 60 CASES.
>
> And the matter has ended there in no less than 60 cases which the commission has formally laid before the department, according to the department's records. Nor has Attorney General Daugherty been alone in refusing to go into court on the strength of the commission's recommendations.
>
> Attorneys General Gregory and Palmer were equally reluctant, it seems, many of the cases in question having been submitted and laid away to rest in peace during their respective administrations of the Department of Justice.
>
> In justice to those officials, it has been stated that in their judgment there has been little likelihood of successful prosecution of the cases arising before the Federal Trade Commission. There may have been apparent violations of the law, it is pointed out, and many violations of what seemed to be the law 10 years ago, but few violations of what the courts now interpret as the antitrust law.
>
> Prosecuting officials began to see a weakening in the Federal courts' attitude toward the Sherman law about the time the war began. During the period of the war there was declared a sort of truce in the prosecution of combinations in restraint of trade. Combinations were actually invited by the Government itself, the old War Industries Board being the medium through which the Government acted.
>
> But after the war some effort was made, notably by the commission, to call a halt. Many businesses seemed to be running amuck, assuming the old war-time immunity still prevailed. Also there seemed to be some effort on the part of the Department of Justice to restore the conditions as they existed before 1917.

Mr. President, I want to add that following the war the Department of Justice under Mr. Palmer began making investigations with a view to instituting prosecutions. A number of prosecutions were instituted and records were prepared, as I am advised, for the institution of suits against other combinations in restraint of trade. Undoubtedly many actions would have been commenced if Mr. Palmer had remained in office for a few months longer. The writer from whom I am quoting states that the 60 recommendations made by the Federal Trade Commission languished in the Department of Justice, and the trusts flourished. This bill is in the interest of the trusts. It gives them greater license, greater opportunity for the purpose of continuing their illegal practices and their oppressive conduct toward the people.

The Senator from Wisconsin and the Senator from Arkansas have called attention to some figures relative to the paragraph under consideration. I want to direct attention to further facts relating to this paragraph.

Bear in mind that the production of printing presses in the United States in 1914 was more than $8,396,000. The materials used in the manufacture of printing presses are steel, iron, and hard rubber. Germany can not compete with us, nor England, nor any other country in the world, in the manufacture of printing presses. That has been demonstrated by the fact that the importations have been negligible and our exports have been considerable.

These materials are found in sufficient quantities in the United States, except rubber, which is imported. Shop machinery of the type used in the manufacture of large machinery is the greater part of the equipment used in the manufacture of printing presses. Special machinery, machine tools, and a foundry are also part of the equipment. The American manufacturer is at no disadvantage in procuring equipment.

It is known, Mr. President, that in the manufacture of large machinery—indeed, for that matter, all qualities and kinds of machinery—the United States occupies a dominant, a supreme position in the world.

Automatic and special machinery is used to a great extent. By far the greater part of all printing presses are built to special specifications, but the smaller machines are standardized. The foreign practice is the same in this respect. On account of the size and price of the modern printing press, the efficient conduct of the industry requires a large factory, ample capital, and a highly developed organization. These requirements are found in the United States. The capital invested in the manufacture of printing presses is chiefly in large factories, and printing presses are generally sold direct to the consumer.

It is not a new industry, as the record shows, but one which has grown and developed in the United States, having its origin years ago.

The domestic exports, the record shows, are due mainly to the superior design that American printing presses have, and they have been exported to all the markets of the world, although the American manufacturers have some disadvantage in foreign markets owing to their higher manufacturing costs; but, notwithstanding these disadvantages, we have shipped to all the markets of the world, and have been able to compete with foreign producers, and to find a large market for our surplus products.

The exports in 1910 amounted to more than $2,000,000. There was a marked increase in 1911, and a further increase in 1912, at which time the exports reached the sum of more than $3,000,000. After that year exports decreased to $1,431,000 in 1915 and increased in 1917. In 1918 the exports were $1,349,000. In 1919 the exports amounted to nearly $4,000,000.

The imports were first reported separately in 1910, and they amounted to only $30,000. They decreased to $3,000 in 1917. In 1919 they increased to $19,000. Imports of printing presses have been practically negligible as compared with exports.

Mr. President, in the face of that record, and in view of the fact that Germany is utterly unable to compete with the United States, and that no other country is able to compete, the proposition is to impose a tariff!

Even if I were a protectionist I would want foreign competition. I think it is a dangerous thing to leave the domestic manufacturer an unrestricted market, the absolute control of the market. I do not care how honest a man may be; if he establishes a store in a community and has absolutely no competition, the people will suffer from his cupidity; and if the manufacturers of the United States are not subjected to some competition from abroad there will be not only a tendency for combinations but the fact will be that combinations and organizations will arise which will increase the prices above a fair profit to the producers. If a wholesome condition is desired in the industrial field there must be some competition from abroad. There should be imports of from 10 to 15 or 20 per cent. That leaven would tend to leaven the whole lump and produce reasonable prices. It would strike at domestic monopoly aimed at the increase of the domestic price.

I am afraid the able Senators who have framed this bill have been too much concerned for the manufacturer and have exhibited too little concern for the consumer. They have pleaded for the rich, for the powerful, for the great manufacturers. They have not been the advocates of the consumer. Somebody must lift his voice in defense of the consumer; and if this bill becomes a law in the form in which it came from the committee, then the consumer is bound and gagged and placed at the mercy of the producers of the United States.

The PRESIDING OFFICER (Mr. WILLIS in the chair). The question is on the amendment offered by the Senator from Arkansas [Mr. ROBINSON] to the amendment of the committee.

Mr. ROBINSON. I call for the yeas and nays.

The yeas and nays were ordered, and the reading clerk proceeded to call the roll.

Mr. UNDERWOOD (when his name was called). I transfer my general pair with the senior Senator from Massachusetts [Mr. LODGE] to the junior Senator from Rhode Island [Mr. GERRY], and vote "yea."

The roll call was concluded.

Mr. HALE. Making the same announcement as before, I vote "nay."

Mr. JONES of New Mexico. Making the same announcement as on the previous vote with respect to my pair and its transfer, I vote "yea."

Mr. STANLEY. I transfer my general pair with the junior Senator from Kentucky [Mr. ERNST] to the senior Senator from Texas [Mr. CULBERSON], and vote "yea."

Mr. HARRISON (after having voted in the affirmative). I transfer my pair with the junior Senator from West Virginia [Mr. ELKINS] to the senior Senator from Nevada [Mr. PITTMAN], and allow my vote to stand.

Mr. OWEN. I transfer my pair with the Senator from New Jersey [Mr. EDGE] to the Senator from Missouri [Mr. REED] and vote "yea."

Mr. PHIPPS (after having voted in the negative). I transfer my pair with the Senator from South Carolina [Mr. DIAL] to the junior Senator from Arizona [Mr. CAMERON], and allow my vote to stand.

The result was announced—yeas 28, nays, 27, not voting 41, as follows:

YEAS—28.

Ashurst	Kellogg	Nelson	Simmons
Borah	Kendrick	Norris	Smith
Caraway	King	Overman	Stanley
Harris	Ladd	Owen	Swanson
Harrison	La Follette	Pomerene	Underwood
Heflin	Lenroot	Robinson	Watson, Ga.
Jones, N. Mex.	Myers	Sheppard	Williams

NAYS—27.

Bursum	Keyes	Oddie	Sutherland
Calder	McCumber	Pepper	Townsend
Capper	McKinley	Phipps	Wadsworth
Curtis	McLean	Rawson	Warren
Gooding	McNary	Shortridge	Watson, Ind.
Hale	Newberry	Smoot	Willis
Jones, Wash.	Nicholson	Spencer	

NOT VOTING—41.

Ball	Edge	Johnson	Reed
Brandegee	Elkins	Lodge	Shields
Broussard	Ernst	McCormick	Stanfield
Cameron	Fernald	McKellar	Sterling
Colt	Fletcher	Moses	Trammell
Crow	France	New	Walsh, Mass.
Cummins	Frelinghuysen	Norbeck	Walsh, Mont.
Culberson	Gerry	Page	Weller
Dial	Glass	Pittman	
Dillingham	Harreld	Poindexter	
du Pont	Hitchcock	Ransdell	

So Mr. ROBINSON's amendment to the committee amendment was agreed to.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment as amended.

The amendment as amended was agreed to.

The PRESIDING OFFICER. The Chair is advised that the amendment on page 83, lines 18 to 23, has not been agreed to.

Mr. UNDERWOOD. That is just the assembling of the various changes. Let the Secretary state the amendment.

The READING CLERK. On page 83, line 18, after the words "ad valorem" and the semicolon, insert:

Sewing machines, and parts thereof, not specially provided for, valued at not more than $75 each, 25 per cent ad valorem; valued at more than $75 each, 40 per cent ad valorem; cash registers, and parts thereof, 25 per cent ad valorem; printing presses, not specially provided for, lawn mowers, and.

The PRESIDING OFFICER. The question is on agreeing to the amendment which has just been reported.

Mr. KING. A parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state his inquiry.

Mr. KING. I confess I am a little unable to understand the situation. For my information, what rate of duty is attached to printing presses, not specially provided for, and lawn mowers?

Mr. ROBINSON. Fifteen per cent, the rate I proposed.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the committee.

The amendment was agreed to.

The next amendment was, on page 84, line 2, to strike out the word "and" and to insert the words:

30 per cent ad valorem; knitting, braiding, and insulating machines, and all other textile machinery or parts thereof, finished or unfinished, not specially provided for, 50 per cent ad valorem.

Mr. UNDERWOOD. I think that is practically two amendments, because the first part of it, down to the semicolon, provides for the tax on the things above, and the amendment from that point provides for the machinery named. I ask that it be separated and submitted as two amendments.

Mr. KING. A parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state his inquiry.

Mr. KING. I invite attention to line 24, page 83, providing 35 per cent ad valorem. Was that a Senate committee amendment?

Mr. ROBINSON. That was amended by the amendment which I proposed; the 35 per cent was stricken out and 15 per cent inserted.

Mr. KING. I understood that related to printing presses and lawn mowers. Did it include machine tools?

Mr. ROBINSON. Yes; and parts of machine tools.

The PRESIDING OFFICER. The question is on agreeing to the amendment on page 84. Will the Senator from Alabama repeat his request?

Mr. UNDERWOOD. If we vote merely on the amendment as a whole we will vote on two rates at the same time. The first part of the amendment covers embroidery machines, including shuttles for sewing and embroidery machines, lace-making machines, machines for making lace curtains, nets, and nettings, 30 per cent ad valorem. The 30 per cent rate is really the first part of that amendment. Then the amendment provides for knitting, braiding, and insulating machines, and all other textile machinery or parts thereof, finished or unfinished, not specially provided for, 50 per cent ad valorem. As there are two questions involved, I ask that the amendment be separated.

The PRESIDING OFFICER. The Senator from Alabama asks that the amendment be divided; consequently the vote will be on the first section, the 30 per cent rate, down to the semicolon. The question is on agreeing to the amendment.

Mr. KING. May I inquire of the Senator from North Dakota the reason for fixing the rates at 30 per cent ad valorem. I invite attention to the information contained in the Tariff Commission Survey, and I discover there that the American demand for these particular machines has "not been sufficient to encourage any domestic manufacturer to build so highly specialized a machine in competition with the long-established foreign makers, who have developed the machines during the last century and enjoy the advantage of having the world's largest market at their doors. It is noteworthy that during the war, when there was difficulty in obtaining machines from abroad, there was no attempt made to make them in this country."

On the next page it is stated:

There are in the United States approximately 575 Levers lace machines, 500 lace-curtain machines, about 40 bobbinet machines, and perhaps 300 warp-lace machines. None of these machines are made in the United States. Some braiding machines have been made in this country, both by machine makers and by lace concerns.

Materials: Cast iron, steel, and brass are the materials used in the construction of this class of machinery.

Equipment: Shops must be equipped for the production of large and heavy machines, of great complexity and a high degree of accuracy.

Organization: The industry requires a world market as the total demand is limited; the designs are very complex, and manufacturing skill and experience is required. Consequently the machines are high priced.

History of the industry: So far as is known, no lace machines have ever been made in the United States. During the war, when the importers experienced difficulty in obtaining parts, at least one of them carefully considered the possibility of making parts in this country, but decided that, even in the case of the very heavy frame castings, it would not be a commercial proposition. One domestic textile machinery maker formerly made some braiding machines, but in the opinion of one of the large braid makers these machines were so inferior to the German machines that American manufacturers are practically dependent upon Germany for this type of machine. Some of the lace and braid manufacturers, however, have made a number of machines for their own use which they consider satisfactory.

Domestic production and consumption: There is no domestic production of lace machines. The demand is somewhat limited; there would be considerable expense necessary to design and develop so complicated a machine, and competition would be met from the large and long-established firms of England and France.

I read just a sentence or two further:

Under the acts of 1894 and 1897 lace machines were included as manufactures of metal not specially provided for, dutiable at 35 and 45 per cent ad valorem, respectively. By the act of August 5, 1909, lace machines were admitted free of duty until January 1, 1911. After that date the duty reverted to 45 per cent. The act of 1913 reduced the duty to 20 per cent. The temporary removal of the duty in 1909 resulted in a large importation, which greatly stimulated the lace and embroidery industries in the United States.

COMPETITIVE CONDITIONS.

The lace-curtain industry has been established in this country for over 20 years. Practically all of the machines are of English make; a few are French. The fancy-lace industry was not developed in this country to any extent until 1909, when lace machines were admitted free of duty for a period of 17 months.

It would seem from this report of the Tariff Commission that the less impediments that are offered to bringing into this country these machines the better it is for the industry; that we developed the lace industry to give employment to people by having the machines come into the United States. May I inquire of the Senator whether conditions have so changed since the tariff survey was submitted in 1921 as to lead to the conclusion that the report of the Tariff Commission is inaccurate?

Mr. McCUMBER. I did not hear all of the Tariff Commission's report as read by the Senator, but I assume that it is accurate. First, let us accept the proposition just as it is, that we do not make the machines in the United States at all. Therefore, from a protective standpoint let us suppose that we do not need any protection whatever. I do not know myself just where we are going to get revenues to meet appropriations that are being made from year to year in the United States—and we do not seem to be growing any more economical in the matter as the years go by—unless we get some of them from importations.

This product stood a 45 per cent ad valorem duty prior to 1913, and with a 45 per cent ad valorem duty we imported in 1910 $1,387,000 worth and collected a duty of $40,260. In 1911 we imported $1,792,216 worth, and we collected $42,368 revenue. In 1912, with a 45 per cent ad valorem, we imported $619,000 worth, and we collected a duty of $222,000. In 1913 we imported $327,000, and we collected a duty of $147,396. So it pays us a very good return upon the basis of a 45 per cent ad valorem duty.

In 1921 the imports of embroidery and lace-making machines, including machines for making lace curtains, nets, and so forth, amounted to $633,485, almost as much as they were in 1911; in fact, more than that when we had the others. There were imported in 1921 of jute manufacturing machinery, $148,807, and all others, $4,167,297.

Mr. KING. If the Senator will pardon me, I called his attention only to the machine for lace making and the machine for making lace curtains, nets, and nettings, not jute machines and other classes to which the Senator perhaps has referred.

Mr. McCUMBER. Those which I quoted from the table from the tariff survey were just lace machines, embroidery and lace-making machines. The jute manufacturing machinery is found in the next table.

Mr. KING. Was not the Senator in error in stating that until recently the tariff was 45 per cent? I find on page 73 a statement that the act of 1913 reduced the duty to 20 per cent, and the temporary removal of the duty in 1909 resulted in a large importation which greatly stimulated lace and embroidery industries of the United States. It would appear from that statement of the Tariff Commission that there was a period——

Mr. McCUMBER. The Senator will remember that in the 1909 law, in order to get some of the lace machines in the United States, as we did not produce them, certain classes of them were imported free of duty. Some were on the free list and some went upon the list bearing 45 per cent ad valorem duty, but if he will look at the amount that was imported and the amount of duty he will see that about one-half, I should judge at a glance, were bearing a duty of about 40 per cent, and the others came in free. They came in free for a number of years.

Mr. SMOOT. Until January 1, 1911.

Mr. McCUMBER. Yes. In 1913 we had the 45 per cent duty and the divided duty in part of 1912. In 1912 they were partly free and partly 45 per cent duty, according to this report. We got $222,000 in duties that year.

Mr. KING. If the Senator will pardon me, I think he has answered the question I asked.

Mr. McCUMBER. After the free provision was eliminated, as the Senator will see, the importations continued.

Mr. KING. The Senator, then, justifies this rate upon the ground of revenue?

Mr. McCUMBER. Oh, certainly.

Mr. KING. He has not urged it other than for revenue purposes?

Mr. McCUMBER. This is a duty for revenue purposes only. We do not produce the article in the United States. The duty under the Underwood bill was 25 per cent on part of it and 45 per cent on part of it. The bill now raises it only 5 per cent above the Underwood law. We have an amount of importations, I think, which will justly and easily absorb the extra 5 per cent, and especially as it is for revenue only.

Mr. SIMMONS. Mr. President, I do not wish to enter into any extended discussion about the matter, but the revenue collected from this item in 1920 was $138,000. The imports were a little bit larger in 1921, but I have no statement of what the revenues were. They could not have been much over $150,000.

The proposition is to increase the present rate only 5 points. That is not a very large increase, but I want to ask the Senator from North Dakota if he thinks this is a very good time to increase the rate for purely revenue purposes in view of the fact that this machine is used in the manufacture of articles that have connection with the clothing of the people. It is well understood at this time that the prices of this class of materials which constitute a part of the clothing of the people are exceedingly high. I do not want to enter into any discussion about it, but I doubt very much whether it is a wise public policy to be increasing the price of clothing through the tariff bill for purely revenue purposes. I do not care to say more about it.

The PRESIDING OFFICER (Mr. TOWNSEND in the chair). The question is on the first branch of the amendment offered by the committee.

Mr. ROBINSON. I understand the amendment substantially embraces two propositions and by agreement has been divided, the vote being first taken on lace-making machines, and so forth?

The PRESIDING OFFICER. That is correct.

The amendment was agreed to.

The PRESIDING OFFICER. The question is on the second part of the amendment of the committee, which the Secretary will report.

The READING CLERK. On page 84, beginning in line 3, insert:

Knitting, braiding, and insulating machines, and all other textile machinery or parts thereof, finished or unfinished, not specially provided for, 50 per cent ad valorem.

Mr. ROBINSON. Mr. President, I do not find any definite information respecting this class of machines. There is nothing in the Summary of Tariff Information that has been brought to my attention which justifies this very high rate; but I presume the chairman of the committee will submit a statement in explanation of the action of the committee seeking to impose a rate of 50 per cent ad valorem. It is my intention to offer an amendment reducing that rate of 25 per cent ad valorem. I will offer the amendment now or withhold it for the present. It does seem that there ought to be some explanation given for the imposition of this very high rate. I ask the Senator from North Dakota what is the rate now imposed for "knitting, braiding, and insulating machines, and all other textile machinery or parts thereof, finished or unfinished, not specially provided for"?

Mr. McCUMBER. The report of the Tariff Commission is not very enlightening upon that paragraph. I suppose the main trouble lies in the fact that most of those machines come in under a basket clause, and it is impossible to say just what proportion are of a specific designation. I have testimony here of one of the witnesses in the form of a brief showing the necessity for the rates which we have placed upon these articles; and our examination indicated that they ought to carry a rate of 50 per cent ad valorem.

Mr. ROBINSON. What is the rate now imposed under the basket clause which embraces these items?

Mr. McCUMBER. Under the present law?

Mr. ROBINSON. Yes, sir.

Mr. McCUMBER. I understand that it is 20 per cent.

Mr. ROBINSON. And it is now proposed to multiply that rate by two and a half?

Mr. McCUMBER. The Payne-Aldrich rate was 45 per cent, and the rate proposed is only 5 per cent over the Payne-Aldrich rate.

Mr. ROBINSON. In line 5, page 84, I move to strike out the numerals "50" and to insert in lieu thereof "25."

The PRESIDING OFFICER. The question is on the amendment offered by the Senator from Arkansas to the committee amendment.

The amendment to the amendment was rejected.

The next amendment of the Committee on Finance was, on page 84, line 7, before the words "per centum," to strike out the numerals "35" and to insert the numerals "30," so as to read:

all other machines or parts thereof, finished or unfinished, not specially provided for, 30 per cent ad valorem.

Mr. SIMMONS. Mr. President, I recognize the fact that the proposed Senate committee rate is 5 points below the House rate, but the House rate and the Senate rate are both too high. This is a very sweeping clause. After taxing at certain fixed ad valorem rates various machines, including steam engines, locomotives, printing presses, lawn mowers, machine tools and parts of machines and tools, embroidery machines, lace-making machines, lace-curtain machines, knitting machines, braiding and insulating machines, and all other textile machinery or parts thereof, finished or unfinished, 50 per cent, there is this catch-all provision:

All other machines or parts thereof, finished or unfinished, not specially provided for, 30 per cent ad valorem.

My interpretation of that is that absolutely no machine of any sort that is now imported or may hereafter be imported into the United States shall escape taxation at least at the rate of 30 per cent. If I am correct in that assumption, I should like to be advised to that effect. I do not know that I have read a more sweeping clause than that. The machine is not named; we do not know what its character is; we do not know what the cost of the production of it is here and abroad; but if it is a machine, or the part of a machine, under this all-embracing provision it is to be taxed 30 per cent, if it is not taxed otherwise specifically at a higher or lesser rate. I think we are "going some," Mr. President, in this proposed legislation when, without specifying, we are willing to say that all kinds and characters and conditions of machines that may be made by man or used by man, that are or may be imported into this country, shall pay a tax.

There may be some machines that ought to pay a tax; there may be some machines that can be made for very much less abroad than they can be made here, and therefore ought, under the protective principle on which this bill is written, be required to pay a tax; but there may be other machines that can be made here much more cheaply than they can be made abroad; but without regard to whether they can be made in this country for 25 or 30 or 50 per cent less than they can be made in another country, they must be taxed at the rate of 30 per cent.

Mr. LENROOT. Mr. President, will the Senator yield?

Mr. SIMMONS. Yes. I am merely discussing this item because I can not get any information from the other side.

Mr. LENROOT. If that be a criticism, does it not apply equally to the present Underwood-Simmons law, which levies a tax of 20 per cent on the same commodities under a basket clause.

Mr. SIMMONS. It may be; but that would not deter me from saying that, to my mind, it is a dangerous provision. It never had occurred to me before. It is a very sweeping provision, and when all the facts with reference to the importations of "all other machines and parts of machines" are taken into consideration, it looks to me like a very rank proposition.

Mr. McCUMBER. Mr. President——

The PRESIDING OFFICER. Does the Senator from North Carolina yield to the Senator from North Dakota?

Mr. SIMMONS. I am only trying to develop the real facts about this provision. It seems to me it is rather a dangerous provision and it has just been brought to my attention. Here are the facts with reference to our exports.

Mr. McCUMBER. Mr. President——

Mr. SIMMONS. I will ask the Senator from North Dakota to wait until I read the statement which I was about to read from the Tariff Commission. Under the head of "All other machinery and parts of," the figures as to exports for different years are given. It is shown that in 1918 the exports of the articles embraced in this catch-all clause, or basket clause, or whatever it may be called, were $42,299,866; in 1919, $73,426,726; in 1920, $96,657,650; and in nine months of 1921, $58,503,723.

In this clause, covering "all other machinery and parts of," are included machines of which, according to this record, we exported for the nine months of last year $58,000,000 worth, and for the year previous $96,000,000 worth.

Mr. McCUMBER. Mr. President——

The PRESIDING OFFICER. Does the Senator from North Carolina yield to the Senator from North Dakota?

Mr. SIMMONS. I yield.

Mr. McCUMBER. The Senator just a moment ago stated that his questions were for the purpose of eliciting information, and that he did not receive any information from this side of the Chamber on the subject. I want to remind the Senator, if that was a criticism, that if he will look over his remarks he will find that there was hardly a single comma even in his speech from the time he began to speak on the subject to the present time, and he can hardly accuse me of not being willing to give him the information, unless he is willing to give me a chance to give it. I merely wanted to answer that part of the Senator's statement.

Mr. SIMMONS. I thought I paused long enough, and the Senator did not rise, and then I proceeded with my remarks.

Mr. McCUMBER. I think the Senator will find there is not even a semicolon in his remarks.

Mr. SIMMONS. A pause does not always require a punctuation point.

The PRESIDING OFFICER. Does the Senator from North Carolina yield to the Senator from North Dakota?

Mr. SIMMONS. I yield to the Senator from North Dakota with a great deal of pleasure.

Mr. McCUMBER. I think I can give some reasons for the proposed duty.

Mr. SIMMONS. I will be very glad to have the Senator do so.

Mr. McCUMBER. There is a good reason for the duty proposed, just as the Senator from North Carolina in the Underwood-Simmons law had a good reason for levying a duty of 20 per cent upon the same commodities. It is not for protection, we will admit, but we needed money in 1913, and we need twice as much money in 1921 as we did then. While we may export certain kinds of machinery covered generally in the basket clause, and it may possibly exceed in value many times the imports, yet on a close investigation it will generally be found that the exports consist of one kind of machinery and the imports of an entirely different kind, but all come under the general basket clause.

In 1907 there was a 45 per cent ad valorem duty under this clause covering miscellaneous machinery, and we imported $4,978,000 worth and collected $2,240,000 revenue. The next year, 1908, we imported $3,363,000 worth and collected a revenue of $1,648,000. The imports largely increased until in 1910 we imported under this basket clause $8,466,000 worth and collected $3,809,000 of revenue under a 45 per cent duty. In 1911 we imported $6,792,000 worth and collected $2,811,000 of revenue. The imports continued at something over $6,000,000 until we reached 1913–14, when the 20 per cent ad valorem duty under the present law came into effect, and the imports dropped immediately to $4,000,000, then to $3,000,000, then to $1,000,000, and so on, and we collected about one-third as much revenue as we had collected under the previous tariff law.

We do not propose in this bill the high duty of 45 per cent which prevailed from 1907 to 1913, but we are proposing a duty midway between what the Underwood-Simmons law imposed and what the Payne-Aldrich law imposed, namely, 30 per cent ad valorem.

Leaving out the question of protection entirely, I can not believe that we can afford to throw away the revenue that we ought to receive from these importations; and I have an idea that as they came in under normal conditions in as great an amount as $8,466,000 worth under a 45 per cent duty, they will probably, when normal conditions return, come in even greater volume with a less rate of duty, the rate of 30 per cent, and we will derive considerable revenue therefrom.

Mr. SIMMONS. Mr. President, of course, if the Senator is levying these duties for revenue, that is very, very different. We have here a paragraph that contains many different and clearly segregated articles that are taxed. Some of them, we are told, are taxed for purposes of protection; some of them are taxed for the purpose of revenue. As this is a tariff for protection, we can not tell, until the committee advises us, whether these rates are for protection or for revenue, especially when they are all mixed up together in one paragraph, and rates upon half a dozen or maybe more articles are imposed in the same paragraph, some of which are defended on the ground that they are necessary to protect the American producer.

If you are levying this duty for the purpose of protection, then it does not matter at all what is the difference between the cost of the article here and abroad, and you can therefore with impunity apply your duty so as to embrace all articles in the same general classification, even an all-embracing classification; but if you are imposing that duty for the purpose of protection, then if you make a blanket clause of this sort, embracing all machines of every kind and description, and put the same common duty upon all of these different machines, I submit that you will in some instances radically violate the principle under which you are proceeding, and in other instances you will not impose as much duty as you ought to impose to carry out that principle.

Therefore I made the point which I made a little while ago, that it did not seem to me that it was possible to apply correctly the principle of protection to all the machines that were made in his country without any reference to whether those machines were made at less cost or at greater cost here than in other countries, and I think the point was well taken; but, of course, I have to accept what the committee say, that they impose this duty not for protection but for revenue, and upon that basis, if they think it is a proper subject out of which to raise revenue, nothing can be said.

Mr. McCUMBER. Mr. President, will the Senator allow me just one suggestion?

Mr. SIMMONS. Yes.

Mr. McCUMBER. That is, if this is subject to criticism because of its wide range, is not the Underwood-Simmons bill subject to greater criticism, because it states "all manufactures of metal"?

Mr. SIMMONS. Exactly. I have just said that the Underwood rate was undoubtedly imposed for purely revenue purposes, and if imposed for purely revenue purposes it was perfectly logical.

Mr. McCUMBER. That is the only standpoint from which I have discussed this.

Mr. SIMMONS. But if it is imposed for protective purposes—and that was the purpose for which I supposed it was imposed when I spoke first—I said that you could not justify it, because you thereby threw into one class all machines of every kind and character that are or may be imported into this country, without any reference to whether those machines cost less to produce here than they did abroad, and that you could not properly apply the protective principle in that way, although of course you can apply the principle of levying a duty for revenue purposes; and the Senator now says that that is the purpose of this duty.

Mr. SMOOT. Mr. President, I recognize the fact that the Senator from North Carolina is just talking to kill time, but I want to call his attention to the fact that there is no seventy-eight or forty-six million dollars involved in this catch-all clause that we are discussing now.

Mr. SIMMONS. I can not say whether there is or not.

Mr. SMOOT. I can say it.

Mr. SIMMONS. I simply read the figures, and I told the Senator what I read from.

Mr. SMOOT. The Senator read exports, not imports at all.

Mr. SIMMONS. I was not talking about imports; I was talking about exports. The Senator misunderstood me entirely, and I do not want him to misunderstand me.

Mr. SMOOT. I do not want to misrepresent the Senator.

Mr. SIMMONS. Here is what I read——

Mr. SMOOT. The Senator was objecting here to a catchall clause that took in all sorts of machinery of all kinds, and he said that they did not know anything about what fell under that catchall clause, and then he proceeded to read the figures that he did.

Mr. SIMMONS. I read the figures as to exports, not as to imports, as the Senator seems to think. What I stated was that on page 507 of the Summary of Tariff Information, under the head of "Exports," they give the exports of certain machines and locomotives, and finally they say:

Exports have been as follows.

Then they segregate them, and give the exports as to the various machines and locomotives, and at the conclusion of that it says:

All other machinery and parts of—

Which is the language used in the section we are discussing, and it shows that the exports of all other machinery and parts thereof for 1921, nine months, were $58,503,723. That is all I said. The Senator misunderstood me.

Mr. SMOOT. Then, of course, I misunderstood the Senator, if that is the case; but he was complaining about a catchall clause here and said that nobody could tell what goods fell under it.

Mr. SIMMONS. Oh, well, that is another part of the discussion.

Mr. SMOOT. The Senator knows too much about making a tariff bill to criticize a thing like that. There never has been a tariff bill made, there never will be a tariff bill made, that

does not have a catchall clause in every section of it. There has to be. It is necessary to have one, or else you have to particularize every single item that may come into this country from anywhere in all the world, covering every kind of goods that may be made in the country. This paragraph is written just the same as all of the paragraphs covering machinery are written. The great bulk of them are mentioned, and those that do not fall there, of course, are taken care of by the basket clause.

Mr. SIMMONS. The Senator does not mean to tell the Senate, I imagine, because it is thought for purposes of protection that you should specifically protect half a dozen or a dozen or 50 machines, that it is necessary that you should then provide protection as to all other machines.

Mr. SMOOT. In this section there are thousands and tens of thousands of machines protected—not merely one or two items—and I simply wanted to say that the importations under this catchall clause are as follows:

In 1918	$2,116,000
In 1919	1,311,000
In 1920	3,033,000
In nine months of 1921	3,189,000

And it is impossible to say what they were.

Mr. HEFLIN. Mr. President, I want to say just a word. I want to commend the Senator from Utah for his frankness, for his acknowledgment that this bill is intended to catch all. He has referred two or three times to the catchall clauses in this bill.

Mr. SMOOT. I suppose the Senator has never heard of that before in tariff legislation, has he?

Mr. HEFLIN. I have. I have seen it practiced in every Republican measure brought into Congress.

Mr. SMOOT. Yes; and there never was a Democratic measure brought into this body or into the House but that used the same identical word, and everybody knows what it means.

Mr. HEFLIN. No, Mr. President; not "catchall"—not in any Democratic measures.

Mr. SMOOT. Yes; every one of them.

Mr. HEFLIN. We have measures for revenue only, and thousands of things are not caught at all. They are on the free list.

Mr. SMOOT. Well, they are caught there.

Mr. HEFLIN. But the Senator from Utah has a measure here that he says has these catchall clauses in it.

Mr. SMOOT. Every paragraph—every section.

Mr. HEFLIN. Yes; every paragraph and every section—catch all. I said here in a speech yesterday that nobody escaped the taxgatherers as provided for in this bill——

Mr. SMOOT. And every Democratic bill.

Mr. HEFLIN. And the Senator from Utah comes here and proves by his confession just what I have said, and what others on this side have charged—that you "catch 'em all." [Laughter.]

Yes, Mr. President, we have a hundred millions of people in the United States, and there is nothing truer on this earth than that every one of them has to pay a tariff tax under this bill. There is not a man, woman, or child in the United States that will not have to pay some tax under this bill.

Mr. SMOOT. Or under existing law.

Mr. HEFLIN. Not at all. This bill does catch all, and none escape from its terrible provisions.

I can not think of anything that you have left out of this bill. You have provision after provision to increase the fortunes of certain men, and to take that money away from certain other men who have to buy and consume that thing. You are taking no account of the interest of the man who must buy and consume, but only providing for the fellow who is going to sell.

Mr. President, this Government belongs to producers and consumers alike, men engaged in every kind of legitimate business. It does not belong to any particular class of people. This Government ought to stand on the everlasting principle of equal rights to all and special privileges to none. What is this bill? It is chock full of special privilege. It is a perfect patchwork of governmental favoritism. It singles out 4,000 captains of industry and taxes 100,000,000 of people for their benefit. It is written purely and wholly, singly and solely, for their benefit. What good are the American people going to get out of it? Nothing. Where do they come in? Why, they come in when the taxgatherer arrives. They have the proud privilege of contributing tremendous sums of money under the operation of this law to the tariff barons of this country.

Mr. President, nearly every other man in life, except these tariff barons, must rely upon his own skill and energy. He must rely upon his own physical strength. He must fight his own battles or fall. What happens with one of these tariff barons? He does not have to rely on his skill and energy. He goes into a certain business, and he comes down here to a Republican Congress, and he says to the Finance Committee of the Senate and the Ways and Means Committee of the House, "I want my profits increased upon this product. I want a tariff tax levied against an item that comes from some foreign country."

"Is the foreign producer about to injure you in the American market?" he is asked.

"No."

"Do you sell your goods abroad now in competition with him?"

"Oh, yes."

"To what extent do you sell your goods abroad?"

"Oh, I sell thousands and hundreds of thousands of dollars' worth of stuff abroad."

"How much does he sell in our country?"

"Oh, not much; a few thousand dollars' worth. But I want to increase my profit. I want to make a killing. I want to make a fortune quickly, and I am a good fellow. I contributed to your campaign fund. I support the Republican ticket, and I want protection; high protection."

"Well, what rate do you want?"

"Well, such and such a rate."

"Do you think that will shut this fellow out?"

"Well, I think it will do the job."

"All right; we will give you that rate."

Then, what happens? That foreigner's goods stop coming in; they cease to come into the American market. Then, what happens? The man here still sells his goods abroad, and by reason of the tariff tax put up against the foreigner his goods are shut out entirely. This man increases the price of the stuff to the consumer here at home, and the consumer has no relief from it. You have put the price up on him by the operation of the law; and for whose benefit did you do it? You put it up for the benefit of the American tariff baron, who contributes to your campaign fund.

So, Mr. President, it looks as if it comes down to the simple proposition of some men buying the right, under the flag and under the Constitution, to tax somebody else to benefit their private business.

It is wrong; it is against the spirit and the genius of American institutions. It ought not to be tolerated, and I do not believe it will be tolerated when this monstrosity is made known in all its hideous parts to the American people. I do not believe they will stand for what is going on in this Chamber.

The VICE PRESIDENT. The question is on agreeing to the amendment.

Mr. CURTIS. Let the amendment be stated.

The VICE PRESIDENT. The Secretary will state the amendment.

The READING CLERK. On page 84, line 7, strike out "35" and insert in lieu thereof "30."

Mr. CURTIS. That is a committee amendment?

The VICE PRESIDENT. It is a committee amendment.

The amendment was agreed to.

Mr. SMOOT. In behalf of the committee I move, on page 84, line 5, after the words "ad valorem" and the semicolon, to add the following:

Cream separators and other centrifugal machines for the separation of liquids, or liquids and solids, not specially provided for, 25 per cent ad valorem.

Mr. SIMMONS. Mr. President, this is a new proposition. We have had no notice of it. I would be very glad to have the Senator from Utah tell us something about the facts with reference to the production and the importations and exportations of those machines. I see that of cream separators we exported in the nine months of 1921 $1,515,000 worth. Of cream separators we imported in nine months of 1921, $334,000 worth. So it seems that our exports are something over twenty times our imports. I do not know the domestic production, but I assume it is very large. It may be that the Senator from Utah can give us some information about it.

Mr. SMOOT. I will ask the Senator from Wisconsin to make whatever statement he wishes to present in regard to this matter.

Mr. LENROOT. Mr. President, cream separators were placed upon the free list by the committee. This matter was called to my attention, cream separators being made in New York and Wisconsin, I believe. They were put on the free list, I was informed by members of the committee, on the theory that they are agricultural implements, though I may be mistaken about that.

Mr. CURTIS. I understood also that they were put on the free list because the only kind of cream separator imported, it was claimed, was not made in this country, but is a particular kind of a separator.

Mr. SMOOT. The de Laval machine.

Mr. CURTIS. Yes; the de Laval machine.

Mr. SMOOT. It is made in Sweden.

Mr. LENROOT. Upon the subject being brought to my attention I looked up the matter of the imports, and I found that in 1918 there were 16,884 imported; in 1919 there were 23,641 imported; in 1920 there were 42,904 imported, valued at $1,344,287. It is true that in 1921 the imports dropped down very greatly, but only in proportion, I think, to the general fall of business, because the farmer had no money with which to buy anything.

The Senator from North Carolina said the exports were several times the imports. The fact is that the imports of separators are substantially greater than the exports. A cream separator is a very complicated machine——

Mr. SIMMONS. Let me interrupt the Senator right there. The Senator probably is not quite accurate, but very nearly so. I read a little while ago from the wrong column. I see that in 1920 the exports were $1,106,000, and in the nine months of 1921 they fell off to $374,000.

Mr. LENROOT. At the same time the exports were $1,106,000, the imports were $1,346,000. In addition to that, if the Senator will notice on the top of page 507 of the Tariff Summary he will see that the imports of parts of cream separators during that year were $211,624.

Mr. SIMMONS. I beg the pardon of the Senate. I did read from the wrong line.

Mr. LENROOT. I felt sure that the Senator inadvertently made a mistake.

The VICE PRESIDENT. The question is on agreeing to the amendment.

The amendment was agreed to.

The next amendment was, on page 84, line 11, after the word "scoops," to insert "scythes, sickles, grass hooks, corn knives," and in line 15, before the words "per cent," to strike out "25" and to insert "35," so as to make the paragraph read:

PAR. 373. Shovels, spades, scoops, scythes, sickles, grass hooks, corn knives, and drainage tools, and parts thereof, composed wholly or in chief value of iron, steel, lead, copper, brass, nickel, aluminum, or other metal, whether partly or wholly manufactured, 35 per cent ad valorem.

Mr. SIMMONS. Mr. President, I make the point of no quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The reading clerk called the roll, and the following Senators answered to their names:

Ashurst	Heflin	Newberry	Simmons
Ball	Jones, Wash.	Nicholson	Smith
Brandegee	Kendrick	Norris	Smoot
Bursum	Keyes	Oddie	Spencer
Calder	Ladd	Overman	Sterling
Capper	La Follette	Owen	Sutherland
Curtis	Lenroot	Pepper	Townsend
Dial	McCormick	Phipps	Wadsworth
Gooding	McCumber	Rawson	Walsh, Mass.
Hale	McKinley	Robinson	Warren
Harris	McLean	Sheppard	Willis
Harrison	McNary	Shortridge	

The VICE PRESIDENT. Forty-seven Senators have answered to their names. A quorum is not present. The Secretary will call the roll of absentees.

The reading clerk called the names of the absent Senators, and Mr. KELLOGG and Mr. POMERENE answered to their names when called.

Mr. KING and Mr. JONES of New Mexico entered the Chamber and answered to their names.

The VICE PRESIDENT. Fifty-one Senators have answered to their names. A quorum is present.

PRESIDENTIAL APPROVALS.

A message from the President of the United States, by Mr. Latta, one of his secretaries, announced that the President had approved and signed the following acts:

On June 3, 1922:

S. 2263. An act to amend the Federal reserve act, approved December 23, 1913.

On June 7, 1922:

S. 539. An act to further amend an act entitled "An act to regulate commerce," approved February 4, 1887, as amended.

NAVAL OIL RESERVE LEASES.

The VICE PRESIDENT laid before the Senate the following message from the President of the United States, which was read and, with the accompanying papers and exhibits, referred to the Committee on Public Lands and Surveys:

To the PRESIDENT OF THE SENATE:

On April 29 the Senate adopted a resolution directing the Secretary of the Interior to furnish the Senate with certain documents, correspondence, papers, files, Executive orders, and all contracts for drilling oil wells on naval oil reserves of the United States, with all detailed information relating thereto. I am to-day in receipt of a letter from the Secretary of the Interior in which he advises me of his compliance with the resolution of the Senate, and in which he makes to me a full and comprehensive report, probably not contemplated in the resolution, in which he gives to me the details of the handling of all naval reserve petroleum matters up to the present date, including full explanation of the contracts for the disposition of oil and the necessity for such action as has been taken. The report, with the exhibits thereto attached, I am sending to the Senate herewith, with the hope that they may be referred to the Senate Committee on Public Lands for such ready reference and information as they will afford the committee in making the investigation contemplated by the Senate.

I am sure I am correct in construing the impelling purpose of the Secretary of the Interior in making to me this report. It is not to be construed as a defense of either specific acts or the general policies followed in dealing with the problems incident to the handling of the naval reserves but is designed to afford that explanation to which the Senate is entitled, and which will prove helpful to the country generally in appraising the administration of these matters of great public concern. I think it is only fair to say in this connection that the policy which has been adopted by the Secretary of the Navy and the Secretary of the Interior in dealing with these matters was submitted to me prior to the adoption thereof, and the policy decided upon and the subsequent acts have at all times had my entire approval.

WARREN G. HARDING.

THE WHITE HOUSE, *June 7, 1922.*

ADJUSTED COMPENSATION FOR WORLD WAR VETERANS.

Mr. McCUMBER. I ask unanimous consent to report favorably from the Committee on Finance, with amendments, the bill (H. R. 10874) to provide adjusted compensation for veterans of the World War, and for other purposes, and I submit a report (No. 756) thereon.

The VICE PRESIDENT. Is there objection? The Chair hears none, and the report will be received.

Mr. McCUMBER. I simply report it that it may be printed and go to the calendar.

The VICE PRESIDENT. The bill will be placed on the calendar.

Mr. McNARY. I ask unanimous consent to offer an amendment to the soldiers' compensation bill.

The VICE PRESIDENT. The amendment will be printed and lie on the table.

PETITIONS.

Mr. CAPPER presented a petition of sundry citizens of Kansas City, Kans., praying for the enactment of legislation creating a department of education, which was referred to the Committee on Education and Labor.

Mr. LADD presented a petition numerously signed by officers and members of the Ebenezer Danish Evangelical Lutheran Congregation, of Flaxton, N. Dak., praying for the granting of relief to the suffering peoples of Armenia, which was referred to the Committee on Foreign Relations.

REPORTS OF COMMITTEES.

Mr. WATSON of Georgia, from the Committee on Claims, to which was referred the bill (S. 3419) for the relief of James E. Fitzgerald, reported it with amendments and submitted a report (No. 753) thereon.

Mr. CAPPER, from the Committee on Claims, to which was referred the bill (S. 163) for the relief of Francis L. Flanders, reported it with an amendment, and submitted a report (No. 755) thereon.

Mr. TOWNSEND, from the Committee on Post Offices and Post Roads, to which was referred the bill (H. R. 7544) authorizing the Postmaster General to temporarily reduce the pay of rural carriers for disciplinary purposes instead of suspending them without pay, reported it without amendment and submitted a report (No. 757) thereon.

JESSE C. DENNIS AND WILLIAM RHETT ELEAZER.

Mr. TOWNSEND. I report from the Committee on Post Offices and Post Roads, with an amendment, the bill (S. 2168) for the relief of Jesse C. Dennis and William Rhett Eleazer, and I submit a report (No. 758) thereon.

Mr. SMITH. I ask unanimous consent for the immediate consideration of the bill. It is indorsed by the department and unanimously reported by the committee.

The VICE PRESIDENT. Is there objection to the present consideration of the bill?

There being no objection, the bill was considered as in Committee of the Whole. The amendment was, on page 1, line 7, to strike out "$5,759.48" and to insert "$4,590," so as to make the bill read:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to Jesse C. Dennis and William Rhett Eleazer, of the county of Richland and State of South Carolina, the sum of $4,590 in full compensation for loss and damage suffered by the said Jesse C. Dennis and William Rhett Eleazer under their contract for transporting United States mail at Columbia, S. C., said loss having been brought about by the establishment of Camp Jackson in the vicinity of Columbia subsequent to the execution of said contract.

The amendment was agreed to.

The bill was reported to the Senate as amended and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

PEARL RIVER BRIDGE, MISSISSIPPI.

Mr. CALDER. From the Committee on Commerce, I report back favorably, with amendments, the bill (S. 3620) to authorize the construction of a bridge across Pearl River at Tilton, Lawrence County, Miss., and I submit a report (No. 759) thereon. I ask unanimous consent for its immediate consideration.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

The amendments were, on page 1, line 4, to strike out "connecting its timber holdings"; in line 5, before the word "River," to strike out "Pear" and insert "Pearl"; and in line 6, after the word "at," to insert "or near," so as to make the bill read:

Be it enacted, etc., That the Natchez, Columbia & Mobile Railroad Co. is hereby authorized to construct a bridge across Pearl River, at a point suitable to the interests of navigation, at or near Tilton, Lawrence County, Miss., in accordance with the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906.

SEC. 2. That the right to alter, amend, or repeal this act is hereby expressly reserved.

The amendments were agreed to.

The bill was reported to the Senate as amended and the amendments were concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

The title was amended so as to read: "A bill to authorize the construction of a bridge across Pearl River at or near Tilton, Lawrence County, Miss."

NIAGARA RIVER BRIDGE.

Mr. CALDER. From the Committee on Commerce I report back favorably with amendments the bill (S. 3458) to authorize the Niagara River Bridge Co. to reconstruct its present bridge across the Niagara River between the State of New York and the Dominion of Canada, or to remove its present bridge and construct, maintain, and operate a new bridge across the said river, and I ask for its immediate consideration.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

The amendments were, on page 2, line 2, after the word "river," to insert "at a point suitable to the interests of navigation"; in line 3, after the word "site," to insert "north of and near the site of the present bridge"; and in line 6, after the numerals "1906," to strike out the period and insert a semicolon and the following proviso:

Provided, That before the construction of the said bridge shall be commenced all proper and requisite authority therefor shall be obtained from the Government of the Dominion of Canada.

So as to make the bill read:

Be it enacted, etc., That the Niagara River Bridge Co., a corporation which heretofore, under lawful authority then existing, constructed a cantilever bridge across the Niagara River between the United States and Canada, such bridge having been duly declared by act of Congress to be a lawful structure and an established post route of mail of the United States, is hereby authorized to enlarge, change, and alter its present bridge, or to remove its present bridge and construct, maintain, and operate a new bridge and approaches thereto across the Niagara River, at a point suitable to the interests of navigation, upon the present site or on a new site north of and near the site of the present bridge in lieu thereof, in accordance with the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906: *Provided*, That before the construction of the said bridge shall be commenced all proper and requisite authority therefor shall be obtained from the Government of the Dominion of Canada.

SEC. 2. That for the purpose of carrying into effect the objects of this act the Niagara River Bridge Co. may receive, purchase, and also acquire by lawful appropriation and condemnation in the State of New York, upon making proper compensation, to be ascertained according to the laws of that State, real and personal property and rights of property, and may make any and every use of the same necessary and proper for the construction, maintenance, and operation of said bridge and approaches consistent with the laws of the United States.

SEC. 3. That the right to alter, amend, or repeal this act is hereby expressly reserved.

The amendments were agreed to.

The bill was reported to the Senate as amended and the amendments were concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

CONFIRMATION OF ARKANSAS POSTMASTERS.

Mr. ROBINSON. I ask unanimous consent, as in open executive session, for the consideration of certain post-office nominations in the State of Arkansas, which have been deferred for quite a long while.

The VICE PRESIDENT. Without objection, the Secretary will read the names as in open executive session.

The reading clerk read as follows:

Walter G. Baker to be postmaster at Peach Orchard, Ark.
Alice R. Beard to be postmaster at Gentry, Ark.
James A. Skipper to be postmaster at England, Ark.

The VICE PRESIDENT. Is there objection to the consideration as in open executive session of these nominations? The Chair hears none. Without objection, they will be severally confirmed and the President will be notified. It is so ordered. The Senate resumes its legislative session.

BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. McKINLEY:

A bill (S. 3692) to provide for the control of the floods of the Illinois River and its tributaries, and for other purposes; to the Committee on Commerce.

By Mr. CALDER:

A bill (S. 3693) to incorporate the Siberian Veterans' Association; to the Committee on the Judiciary.

By Mr. KELLOGG:

A bill (S. 3695) to amend section 5219 of the Revised Statutes of the United States; to the Committee on Banking and Currency.

By Mr. McCUMBER:

A bill (S. 3696) for the relief of John H. Fesenmeyer, alias John Wills (with accompanying papers); to the Committee on Military Affairs.

REGULATION OF RADIO COMMUNICATION.

Mr. KELLOGG. I ask unanimous consent to introduce a bill to amend "An act to regulate radio communication," approved August 13, 1912, and for other purposes, and I also ask unanimous consent to print with the bill a memorandum explaining the various sections.

The bill (S. 3694) to amend an act entitled "An act to regulate radio communication," approved August 13, 1912, and for other purposes, was read twice by its title, and the accompanying memorandum was ordered to be printed in the RECORD, as follows:

The radio bill introduced to-day in the Senate by Mr. KELLOGG, of Minnesota, is indorsed in its substance by the recent radio conference called by Secretary Hoover at the instance of the President.

This conference held open sessions during several days. Many persons appeared before it and discussed various phases of the present situation in radio communication. At the conclusion of the open sessions a technical committee and a legal committee were appointed by Secretary Hoover from the members of the conference. The technical committee considered the technical and scientific problems involved in the suggestions made in the open sessions relative to wireless operation, both by telegraphy and telephony, and worked out detailed recommendations, which were submitted to the Secretary to aid him in regulating the transmitting stations of the country to the end that there might be the maximum of public service with the minimum of interference and resulting confusion and inefficiency of operation. The legal committee was charged with the task of framing a law which would permit and facilitate the putting into effect of the general views of the full conference and the specific recommendations of this technical committee.

The first draft of the pending bill, made by Mr. White, was submitted to the conference, which upon consideration approved it generally, but recommended a number of minor changes. These changes have been incorporated into the pending bill so far as the legal committee felt it possible to do so. This legal committee was composed of Mr. White, chairman; Senator KELLOGG; Mr. Tyrer, deputy commissioner of navigation, of the Department of Commerce; and Mr. Terrell, in charge of the radio division of the Department of Commerce.

The bill presented is not a comprehensive radio law. It leaves the act to regulate radio communication approved August 13, 1912, as the basic law upon this subject. It amends that law only so far as is deemed necessary to make possible the carrying out of the approved recommendations of the conference. Since this act of 1912 the use of radio has grown enormously. At the time of the enactment of that act wireless telephony was practically unknown. To-day the transmitting sets for telegraphy and telephony and receiving sets of both kinds number hundreds of thousands, and the manufacturing companies are still

pressed to the limit of their capacity to meet the increasing demands for instruments. Telephone broadcasting and the other uses to which the art has been put and the great numbers of users of transmitting sets have brought about a congestion in the air seriously interfering with the efficient use of the ether by any interest for any character of service. All persons concerned with radio are unanimous in the judgment that drastic action must be taken to bring order from the present chaos. This conference is of the opinion that the bill proposed holds out the promise of the solution of the difficulties which all users of radio now encounter and suffer from.

The radio art changes overnight. It is neither standardized nor stable. There is to-day no like activity attracting the attention of so many technical and scientific men as this. The research departments of the greatest technical companies of the country are engrossed in its study, and every amateur is a potential Marconi. Improvements in old methods and instruments and radical departures from accepted standards come with every passing day. The members of the conference recognized fully that the recommendations so laboriously worked out by its technical committee might be out of date, demanding drastic revision, in a month's time. In these facts is found the compelling reason for drafting the proposed legislation in most general terms. Statute law can not be speedily changed. It is vital that the provisions of the law and of the regulations thereunder be so framed that the regulations may be changed as the art itself changes. Of necessity there is no way of meeting this unprecedented situation except by conferring in general terms broad powers of supervision, of regulation, and of control upon the designated regulatory body. We have conferred upon the Secretary of Commerce, designated by the basic law of 1912 as the agency of the Government for the control of this means of communication, the powers required in the premises.

The bill, in addition to granting enlarged powers of regulation, undertakes to clarify certain ambiguities in the present law and adds to existing law a number of sections of minor consequence.

Sections 1, 2, and 3 of the pending bill are a redraft of sections 1, 2, and 3 of the radio act of 1912. There is no substantial provision in these sections of the 1912 act which is not incorporated in the present bill.

Section 1, A, does not change in any material respect the provisions of existing law. It asserts Federal control over radio communication between the several States and with foreign countries and requires that no such interstate or foreign communication shall be carried on except under and in accordance with a license granted by the Secretary of Commerce.

Section 1, B, is a vital paragraph of the bill.

The technical committee of the conference has recommended to the Secretary some 20 different classes of stations with appropriate wave allocations to each and has specified the nature of the service to which each class of stations should be limited.

This paragraph of the bill as drawn will authorize the establishment of various broadcasting services which are of such great interest to the public and will also permit all the other classes of service recommended by the conference to be established and safeguarded from improper interference. The 20 classes of stations recommended are not exclusive of others. They cover what seemed to the conference the most necessary to be provided for at this time. Others can be recognized if and as conditions warrant. The Secretary by its terms is authorized to classify licensed radio stations, to prescribe the nature of the service to be rendered by each class of stations, to assign bands of wave lengths, to make regulations concerning the location of licensed stations, the kinds of instruments to be used in them with respect to the external effects of the instruments, the time and methods of operating stations, and generally this paragraph gives authority to make any regulations consistent with law deemed necessary to prevent interference.

Many of the powers of regulation conferred in this section are given by the present law, but they are granted inferentially rather than by direct language.

It should be noted that this paragraph relates only to transmitting stations and to those for which a license is required. This is true of all other sections of the bill. The bill seeks to control sending stations only. The receiving set and operators are not affected.

The relation of the many stations owned by the various departments of the Government to private and commercial stations has presented a perplexing question. It must be conceded that if there is to be effective regulation it must be of all transmitting stations. Nothing is to be gained if a part only of the stations of the country are subject to regulation and another part are free to operate when and where and at such wave lengths as they please. If there is to be order at all, then all stations must be fitted into a regulated and ordered system. The military and naval branches of the Government in particular have contended vigorously and with much justification that their stations ought not to be subjected to civilian control. They have urged that considerations of national defense required that the military and naval stations of the Government must be located where military and naval requirements dictated and must at all times and in all respects be within their control. Private operators and commercial organizations engaged in this business have complained that the military and naval departments of the Government have been arbitrary and ruthless in their disregard of civilian rights and that to free such Government stations from any control meant that there could be no effective regulation of this means of communication in the interest of the general public.

Paragraph C of section 1 attempts to deal with these conflicting interests. It provides, in the first instance, that radio stations belonging to and operated by the United States and used exclusively for official business are not subject to either paragraphs A or B of this section. It provides, however, that the wave lengths which such Government stations use shall be allocated to them by the President. This provision is inserted because of the belief that the President is more likely to properly appraise the legitimate needs of military and naval stations than are the military and naval authorities themselves. It was felt that to the President could safely be given the power to say what wave lengths these governmental stations must have for their proper purposes. The conference was of the opinion that all wave lengths not necessary to these governmental stations should be reserved for general public use. The section further provides that such Government stations must observe such regulations aimed to prevent undue interference with others as the Secretary of Commerce may prescribe, with the further provision that the President at any time may suspend such regulations. The conference believed that Government stations used for other than strictly governmental business—that is, stations broadcasting jazz and speeches and other matter not official in character—should be subjected, in the interests of efficient communication for all, to the same regulation and control as private stations.

Paragraph D of section 1 authorizes the President in time of war or of public peril or disaster to cause the closing of any radio station or to authorize the use and control of any such station by any department of the Government. This provision is not new but is in existing law.

Paragraph B of section 2 is designed to make certain that licenses for stations shall not be issued to aliens or to alien interests. The existing law provides that a license shall be granted only to a citizen of the United States, but it does not guard against a license being issued to a citizen who may be the representative of a foreign government or of a foreign company or to a company of foreign ownership or control organized in the United States.

This subparagraph also prohibits the transfer of a license by the holder thereof without the consent of the Secretary of Commerce.

The concluding subparagraph of paragraph C is of general interest. There has been a somewhat prevalent belief, and there was some evidence to justify the opinion offered to the conference that certain large manufacturers of radio apparatus, through the ownership of essential patents, and through contracts with selling agencies and by other means, were unduly restricting the manufacture and sale of desirable apparatus. In view of this situation the committee believed that it was proper and in harmony with the general theory of the bill with respect to the issuance of licenses to specifically authorize the Secretary to refuse a license to any person or corporation which in his judgment was monopolizing or seeking to monopolize radio communication through the control of the manufacture or sale of radio apparatus. This subparagraph gives this power.

Paragraph C of section 2 vests the issuing of licenses, subject to the limitations of the act, in the sound discretion of the Secretary and limits the life of a license.

The existing law leaves it uncertain whether the issuing of a license upon application is mandatory or not. There was complete concurrence in the conference that the issuing of licenses should be discretionary. The existing law is silent as to the term of the licenses therein provided for. The practice is for the Secretary to issue licenses for one year, but there is nothing in the law to prevent him from issuing a license for 50 years or practically in perpetuity.

It is proposed in this paragraph of the bill to limit the life of a license to 10 years, with a privilege of renewal.

Paragraph D authorizes the Secretary to prescribe the form of applications for station licenses.

Paragraph E authorizes the Secretary to prescribe the form of the licenses, but requires that all licenses shall contain, in addition to other provisions approved by the Secretary, a statement of the condition that the ownership or management of the licensed station shall not be transferred in violation of this act, and that there shall be no vested property right in the license or in the bands of wave length authorized to be used. This provision is deemed to be important. In the present state of the art there are a limited number of available wave lengths. It is essential in the general public interest that the use of a particular wave length under a license therefor shall not ripen into a property right in that wave length as against the general public. It is intended by this provision to make certain that any person using a wave length may do so only during the life of his license, and only so long as the general public interest is served by the allocation of that wave length to him.

Paragraph F provides for the revocation by the Secretary of licenses under certain conditions. The existing law does not give in clear terms this power of revocation. It seems proper and altogether desirable that the Secretary should have ample powers in this respect.

Section 3 relates to operators' licenses. It provides for the issuance of such licenses to proper operators and for the suspension and revocation of the licenses in appropriate circumstances. Existing law provides that operators shall be licensed and also authorizes a suspension of the license, but the provisions in the present law do not seem adequate.

Section 4 of the pending bill is new. It provides in substance that the construction of a station for which a license is required shall not be begun until a permit for the building thereof is first obtained. The reason for this provision is in the fact that it would be extremely embarrassing for the Secretary to refuse a license to a company which had gone ahead and made an investment running possibly to $5,000,000 and which then made application for a station license. There might be many reasons why the license should not be issued, but the Secretary would be confronted with the assertion that the refusal to grant the license would entail the loss of the full investment. While the granting of a building permit does not obligate the Secretary to issue a station license, it is felt the requirement of a building permit for a station covered by this act will have a tendency to prevent ill-considered construction.

Section 5 is a new proposal. It authorizes the establishment of an advisory committee to which the Secretary of Commerce may refer for examination and report various matters relating to the administration of radio laws, regulations, and treaties, and to the scientific problems involved in radio communication. The recommendations of this committee are purely advisory. It is felt that such a committee will tend to bring harmony of view between the various departments of the Government interested in radio and between such governmental users of radio and the private interests of the country.

Section 6 is also a new provision. In the interests of safety at sea it requires that radiotelephone stations, the signals of which can interfere with ship communication, shall keep a licensed operator listening in on the wave lengths designated for distress signals during the entire time the transmitter of such telephone station is in operation.

Section 7 amends various regulations embodied in the existing law. One amendment is of general public interest.

Regulation 15 of section 4 of the existing law in effect gives to the amateur of the country a 200-meter wave length. It was insistently urged upon the conference by representatives of the amateurs that the status of the amateur given him by the act of 1912 should be reaffirmed and that the wave lengths allocated to him should be increased. The conference recommended that there should be allocated to the amateur a band of wave lengths between 150 meters and 275 meters. This has been done, and it is believed that amateurs throughout the country will approve the provision.

The other important provision is section 9, which provides a schedule of fees. These fees run from a nominal charge of 50 cents up to a substantial fee amounting to $300 for transoceanic station licenses.

It is not felt that these fees will be objected to by anyone affected thereby, for all users of radio recognize the benefits to this method of communication which will come through proper examinations and in-

spections and through a wise exercise of the licensing power. It is expected that these fees will cover the cost of administration of the law.

Mr. KELLOGG. The bill was prepared by a committee of experts called together at the request of the President by the Secretary of Commerce, men familiar with radio construction and service, some of them representatives of State universities who had been for a long time studying the subject. They drafted the bill. I can not state that it meets with my approval in every respect, neither am I familiar enough with the technical details to express an opinion upon it. I move that the bill with the accompanying memorandum be referred to the Committee on Interstate Commerce.

The motion was agreed to.

AMENDMENT TO HOUSE RIVER AND HARBOR BILL.

Mr. SHEPPARD (for Mr. FLETCHER) submitted an amendment providing for improvement work on the Suwanee River, from Branford, Fla., to Channel No. 4, near Cedar Key., Fla., intended to be proposed by Mr. FLETCHER to House bill 10766, the House river and harbor authorization bill, which was referred to the Committee on Commerce and ordered to be printed.

HOUSE BILL AND CONCURRENT RESOLUTIONS REFERRED.

The bill (H. R. 9409) to amend section 5209, Revised Statutes of the United States, relating to penalty for embezzlement by a Federal reserve officer, agent, or employee, so as to include national bank examiners or assistants, was read twice by its title and referred to the Committee on Banking and Currency.

The following concurrent resolutions were referred to the Committee on Printing:

H. Con. Res. 36. Concurrent resolution providing for printing as a House document 1,500 copies of the Journal of the Fifty-sixth National Encampment of the Grand Army of the Republic; and

H. Con. Res. 59. Concurrent resolution providing for printing 3,000 additional copies of Senate Document No. 181, Sixty-seventh Congress, entitled "A letter of the Alien Property Custodian transmitting a report showing the names of all persons employed by the Alien Property Custodian."

ADDRESS BY SENATOR M'KELLAR.

Mr. SHEPPARD. Mr. President, I ask to have inserted in the RECORD in 8-point type an address by Senator MCKELLAR.

Mr. CURTIS. May I ask the Senator what the address was on? Was it a political address?

Mr. SHEPPARD. I consider it a matter of public interest. It covers his record in the Senate.

Mr. CURTIS. I am not going to object, but I wish to say that I think it is very bad taste for a Senator to print in the CONGRESSIONAL RECORD the record he has made and mail it out to the people. If anyone wants to do it I do not object, but I do not think it is in good taste at all.

There being no objection, the address was ordered to be printed in the RECORD in 8-point type, as follows:

ADDRESS BY SENATOR M'KELLAR.

To the Democrats of Tennessee:

Deeply appreciative and profoundly grateful to you for having elected me to a first term in the United States Senate, I respectfully ask for a renomination for a second term to that office.

During the past five years I have been your representative in the Senate I have made service to the people of Tennessee my watchword. Have assiduously attended the sessions of the Senate. Have taken part in its debates, have been active before the committees and on the floor, have looked after all departmental matters intrusted to me by my constituents, have helped every Tennesseean having official business in Washington whenever applied to, and have at all times endeavored to the utmost of my ability to perform the duties of the office in a way satisfactory to the people of Tennessee.

My positions and votes in the Senate on all important questions arising in that body during the last five years, which years may be termed five of the most eventful ones in our country's history, have been widely published to the people of Tennessee, and I feel I need call attention to only some of the more important measures.

GENERAL LEGISLATION FAVORED.

I voted for and supported the resolution declaring war and every one of the measures passed by the Congress in furtherance of the war and stood by President Wilson and a Democratic administration in all leading policies throughout that great contest, and, indeed, at all times during his two terms of office.

Voted for the vocational training and agricultural extension act.

Voted for and supported the amendment providing for the election of United States Senators by the people and its corollary, the Federal corrupt practices act, by which limitations were placed around the expenditure of money in congressional and senatorial campaigns, primary and regular, and by which other safeguards were thrown around the ballot

Have favored all temperance legislation.

Have favored all farmers' legislation, notably the Federal farm loan act, the extension of the War Finance Corporation act, the farmers' cooperative act, the Bureau of Markets act, of which I was one of the authors, and the Muscle Shoals fertilizer project, and others, numbering in all some 50 measures.

Have supported legislation in the District of Columbia and elsewhere in the Government service regulating the hours of work of working women.

Supported the Federal Trade Commission act.

Voted for the Federal reserve bank system.

Have favored and earnestly worked for legislation granting Federal aid in the building of roads in the various States.

Have aided and worked for legislation granting Federal aid to schools in the various States, but without interference by the Federal Government with State and local control of such schools.

Have favored the vocational training act, the rehabilitation act, and all legislation for the relief of maimed, crippled, and sick ex-service men and all legislation for the benefit of ex-service men generally, numbering in all some 25 or 30 measures.

Voted for the 8-hour act.

Voted for the parcel-post law.

Voted for the extension of rural delivery.

Have favored all reasonable and proper labor legislation. I refer for details to my record in this regard which has been widely published.

Favored, during the war, the legislation authorizing the establishment of the great power plants and water development at Muscle Shoals, with a view of manufacturing nitrates for war purposes in the event of war, and for cheaper fertilizer to the farmers in times of peace.

Voted for and supported the amendment conferring the right of suffrage upon women of the United States.

Voted for suffrage ten times while in both branches of Congress, and afterwards went to Nashville and urged the Tennessee Legislature to ratify the amendment, and it did, thereby making the amendment effective.

Supported all child-labor legislation and believe that never in the history of our country has there been greater freedom from the evil practices of child labor.

Supported the United States ocean shipping act, and all measures for the building up of our ocean shipping.

Voted for and supported the soldiers' readjusted compensation bill.

Supported all river and harbor and levee improvements.

Served on the Postal Commission and many salary readjustments and other reforms and improvements have been made in the Postal Service through the work of this commission.

I voted against the recent Republican revenue act, against the so-called emergency tariff act, and against the Esch-Cummins Act. During all my term I have never dodged a vote nor evaded an issue.

SOME THINGS DONE IN TENNESSEE'S INTEREST.

While I have at all times actively interested myself in the great national questions that have come up during my term of office I have tried not to lose sight of the particular material and business interests of the people of my State, as I believed it my duty to do.

During the war I aided in securing the Park Field Air Service camp at Memphis, the great powder plant at Nashville, temporary additions to Fort Oglethorpe, near Chattanooga, known as Camp Greenleaf and Camp Forrest, a number of great war plants at Kingsport, and a wood alcohol plant in Wayne County. After the war was over aided in securing the retention of nearly all of these plants in Tennessee, where the most of them are now going concerns. Aided in securing a branch Federal reserve bank at Memphis and another one in Nashville, both of which have been great successes and of the greatest value to the commercial and business interests of the State. Aided in originating and in securing the Reserve Officers' Training Corps, now being utilized by so many of the schools and colleges of Tennessee, and to the great benefit of our youth.

Under educational bills, which I have aided in passing, being a member of the Committee on Education, Tennessee received last year and annually receives $271,445 more than hitherto, distributed generally in as many as 49 counties; the University of Tennessee, however, having the largest apportionment. Incidentally aid was given to Castle Heights School at Lebanon,

Branham & Hughes School at Spring Hill, the Military Institute at Columbia, Massey Military School at Pulaski, the Military Institute at Sewanee, the Military Academy at Sweetwater, Milligan College, and the Cookeville Polytechnic.

Under road bills for which I earnestly worked and which I had an active part in writing and in passing, being the ranking member of the Committee on Post Offices and Post Roads at this time, before which committee such bills come, there have been expended in or allotted to Tennessee the sum of $7,875,840.22 as Federal aid to roads throughout the State.

Have actively aided in securing appropriations for river and harbor improvements on the Mississippi, Tennessee, and Cumberland Rivers.

Recently I aided in securing an agreement by the Federal Government to purchase the Methodist Hospital, at Memphis, for the ex-service men of that locality.

While a Member of the House it will be recalled that I introduced the first amendment looking to the development of Muscle Shoals.

Also secured the passage of a bill which resulted in the erection by certain railroad companies of a great free-traffic bridge across the Mississippi River, connecting us with Arkansas, and, as I believe, the only bridge crossing that river which costs the taxpayers nothing. These constitute the leading measures of interest that I have actively, together with other Representatives, aided in securing for Tennessee.

My office during the war was a bureau for the soldiers and since the war has been a bureau for the ex-service men, and all claims of soldiers for compensation and otherwise coming to my office have been promptly and efficiently handled, as literally thousands of letters to me prove.

FUTURE POLICIES.

There are a number of important questions now before the Congress. As to these the Democrats of Tennessee are entitled to my views. I shall take them up in order.

HENRY FORD SHOULD HAVE MUSCLE SHOALS.

I am and have been, ever since the proposition was made last July, unequivocally in favor of the Government accepting the offer of Henry Ford to purchase the Muscle Shoals property. I have spoken for this contention a number of times in the Senate and elsewhere, and I shall leave no stone unturned to secure the passage of a resolution by the Congress accepting Mr. Ford's offer. I believe it will be of the largest benefit to the farmers generally, and that it will be of greater material benefit to the people of my State than almost any other one thing that could happen.

We have splendid phosphate beds in middle Tennessee. If Mr. Ford gets the plant, these phosphates will be used to make a complete and well-balanced fertilizer, to the great benefit of all those engaged in the phosphate industry in my State. With the cheaper power and light, new factories will arise in Memphis, Nashville, Chattanooga, Knoxville, and all near-by towns, and our State will become a great manufacturing State. The dam will make the Tennessee River navigable from Knoxville to its mouth, giving cheap freight rates for all products, especially phosphates and other fertilizers. Our country will no longer be dependent upon far-off Chile for necessary nitrates, and the War Department will no longer, at great expense, have to keep immense amounts of these Chilean nitrates on storage as now. The value to Tennessee and to the country of Mr. Ford's plans, if carried out, will be inestimable. Incidentally work will be furnished to thousands of those at present unemployed.

THE FARMERS FAVORED.

The condition in which the farmers of our State and of the country find themselves at this time is indeed deplorable. Whatever the causes may be the unhappy fact is that they are unable to sell their crops at prices paying them a profit on the cost of production. Indeed, they have frequently been obliged to sell below the cost of production.

I believe the Government should aid them in bringing about more tolerable conditions. Additional banking facilities should be afforded so that the farmers, live-stock raisers, and those engaged in other kindred industries might be better able to obtain loans at low rates of interest. The Federal farm loan act and the recent extension of the War Finance Corporation act, both of which I strongly supported, have been of value in aiding the farmers, but not to the extent which present conditions make necessary. The acts creating these instrumentalities should be amended and liberalized or other instrumentalities should be created by which loans at low rates of interest can be made to the farmers to tide them over the present emergency.

The cooperative marketing bill which has recently passed the Congress should prove of great aid to the farmers. The marketing of crops is vitally important to the farmers, and we must have facilities which will guarantee to them the fruit of their labor.

I favor, also, the establishment of agencies to finance the marketing of surplus food products abroad. There is no reason why our farmers should not find markets for their products abroad, except our lack of perspective and of enterprise in going out to get these markets. The doctrine of American isolation from world affairs may sound well on the hustings or in the Congress, but it is a hard doctrine on the farmers who have surplus crops which they can not sell.

I also favor the Government taking steps to bring about a substantial reduction in freight rates, for the benefit of the farmers, the freight charges on many products being greater than the prices received by the farmers for such products.

In building roads by aid of the Federal Government, farm-to-market roads as well as great through thoroughfares should be built. I was able to put such a provision in the recent road act.

The movement of population from country to city should be checked in some way. It has become a great national question, and the Federal Government should, wherever it is constitutional and proper to do so, use its best efforts to make country life more attractive. We can best accomplish this by making farming profitable. The farmer is intelligent and industrious, and fully capable of handling his own business. All on earth he needs is a square deal.

FAVOR COLLECTION OF INTEREST ON OUR FOREIGN DEBTS.

The nations of Europe owe us in round numbers $11,000,000,000. The Congress has recently passed an act directing the Secretary of the Treasury and four commissioners to secure interest-bearing bonds for this indebtedness. There has been for a long time a propaganda going on about the cancellation of this indebtedness. I am wholly opposed to its cancellation. I believe that bonds should be taken as soon as possible, and that either the interest, amounting to between four hundred millions and five hundred million dollars annually, should be covered into the Treasury and applied to the general or special expenditures of our Government, or that such bonds should be indorsed by our Government and exchanged for Liberty or other bonds of the United States now outstanding, so as to reduce our national indebtedness and thereby reduce taxes upon the people. If all the bonds are thus used, it would cut our national debt nearly in two.

We should give our debtors as long a time as they desire in which to pay the indebtedness. We should not be hard on them. Nearly all of these nations are spending enormous sums for armies and navies, and there is no reason why such expenditures by them may not be lessened and why they may not use a portion of their army and navy money for the payment of the interest on these debts which were contracted for the purpose of saving their countries. It is a false sentiment in America—a sentiment born of propaganda, in my judgment—that urges the cancellation of these debts. We have done enough for our European friends without getting any material return, and we should require them to observe good faith and fair dealing toward us in the payment of their just obligations, in the same way that we have been fair and just and generous to them.

LEGISLATION FOR EX-SERVICE MEN.

As to ex-service men, they received during the war $33 a month, $15 of which were deducted in most cases in allotments to dependent families and $6 in most cases for insurance, leaving the soldiers $12 net. But whether the amount was $12 or $33 all will agree this was exceedingly small pay, and the Government took their services and gave them no voice in fixing their compensation. I voted to draft these boys and I feel like we ought to be exceedingly fair to them. They did a great work. They saved civilization.

During and since the war the Government paid additional compensation to civilian employees amounting now to $1,080 apiece, aggregating perhaps $100,000,000. After the war was over the Government readjusted the pay of the railroads which had been taken over by it during the war, paying them hundreds of millions of dollars. It also readjusted the compensation of war contractors. The War Department alone paid those war contractors the sum of $487,000,000. The soldiers, of course, could not make war wages or war profits during their service, and civilians left behind made the largest profits and largest wages in their history.

Under these circumstances it must be manifest to all fair-minded persons that the soldiers have an equitable claim for a readjustment of their war compensation.

Therefore, considering the question as a matter of fairness and justice, I have long believed and still believe that the ex-service men are entitled to a readjustment of their compensa-

tion, and that the practical and economical way in which they may be paid such additional compensation is by giving to them a portion of the bonds that are now due us from foreign nations. If a provision was placed in the adjusted compensation bill now before the Congress providing that an amount not exceeding $1,500,000,000 of these bonds should be transferred to the soldiers in lieu of the cash provisions of such bill, we could give the soldiers what is justly due them, and at the same time not place additional tax burdens upon the people now suffering so greatly from overtaxation.

Of course I have supported all legislation for the wounded and sick ex-service men, and for the families of those who lost their lives.

FEDERAL TAXATION SHOULD BE REDUCED.

Our country is groaning under heavy burdens of taxation—Federal taxation, State taxation, and county taxation. Instead of finding new subjects of taxation and instead of placing additional burdens on old subjects of taxation, as our Republican friends are constantly suggesting, I believe that the Congress should rather apply its energies and abilities to reducing the expenditures of the Government, conserving its resources, collecting its obligations, and in these ways reducing taxation. Our expenditures are entirely too great. They can be cut down and they should be cut down. The sums that we now spend annually are extravagant and wasteful to a degree. We should collect every dollar that is owing to us, just as other nations do, and we should stop the reckless expenditure of the people's money. I pledge myself to work for a reduction of Federal taxation.

ADVOCATES FEDERAL AID TO ROADS.

Following the teachings of the great founder of our party—Thomas Jefferson—I have heartily favored the Federal Government participating in the building of roads in our country, and in the future I shall heartily support a continuance of this legislation. In his message to the Congress on the 8th of November, 1808, Mr. Jefferson said:

> Or shall it (the Government revenue) not rather be appropriated to the improvement of *roads*, canals, rivers, *education*, and other great foundations of prosperity and union *under powers which Congress may already possess*, or such amendment of the Constitution as may be approved by the States. (Jefferson's Messages, Nov. 8, 1808, Vol. I, p. 436.)

I believe that Mr. Jefferson was right when he urged that it was the best possible plan of building up our common country and of more firmly cementing and uniting the various States one to the other. Twice in messages to Congress while he was President, Mr. Jefferson urged that the Federal Government embark on road building, and this fundamental of democracy thus laid down by him I cordially approve and indorse.

FEDERAL AID TO EDUCATION A JEFFERSONIAN POLICY.

In advocating Federal aid to education, I am again following in the footsteps of Mr. Jefferson. He was virtually the originator of the public-school system and the State-university system. As will be seen in the excerpt of his message quoted above as to roads, he believed that Congress should be given specific authority to establish schools. I do not go as far as Mr. Jefferson in this particular, but I do believe that the Federal Government can and should aid the States in the education of their youth.

Under no circumstances, however, should it control or attempt to control the State authorities or local authorities in the management and control of the schools, and I shall never support any law which gives the Government control of such schools, public or private. Tennessee has, according to the recent census, 103,000 white illiterates. This is a blot upon the fair name of our State that should be removed.

OCEAN SHIPPING AND FOREIGN TRADE.

In the final analysis our prosperity depends upon our ability to sell our surplus products abroad.

As a result of the war, the United States is possessed of a basic merchant marine in the form of ocean tonnage second only to that of Great Britain. It is an asset that any nation may well be proud to possess. To scrap it, to discard it, or to dispose of it to aliens is uneconomic and unpatriotic. Also, as a result of the war, the production capacity of our fields, mines, and factories is largely in excess of our domestic needs, and if labor is to be kept employed and production maintained it is necessary for us to find foreign markets for our surplus products. To do this successfully we must become ocean carriers, as well as producers, and also buy the products we need from foreign countries to whom we would sell, and this exchange of products should be largely handled in American bottoms.

During the war a great fleet of ocean ships was built up. It is now, due to Republican mismanagement and inefficiency, largely idle. The Republican Shipping Board is endeavoring to sell it, and apparently is not making any effort to put it to work or to keep it at work. I think this attitude is a crime against our country.

The administration's latest program for merchant-marine legislation is somewhat complicated and far-reaching, and has not yet been digested. I shall carefully study this proposed legislation in the light of our economic needs and the national good.

Our foreign trade, which is so closely related to our ocean shipping, represents only about 12 per cent of our total commerce, but it is this margin of profit or loss that measures our prosperity or depression, and my energies will be devoted accordingly to its upbuilding.

FREIGHT RATES MUST BE REDUCED.

Railroad freight rates are too high. In many sections of the country and on many commodities rates are higher than the traffic will bear, thereby restricting the distribution of products, both agricultural and manufactured, to markets in near-by territory of consumption, with result that there is an undue accumulation of production on farms and in factories.

Adequate and efficient transportation is essential to commerce and prosperity, but the cost of its production should be lowered by efficiency in operation and administration, and freight rates should be lowered correspondingly, in order that the products of farms, factories, and mines may move more freely to a larger territory of consumption.

In the interest of the railroads, in the interest of the farmers, in the interest of the shippers, in the interest of the general public, I favor an early reduction of freight rates.

MILEAGE BOOKS SHOULD BE RESTORED.

The sale of mileage books interchangeable on all first-class roads at rates less than the regular fare should be restored, thereby accommodating and stimulating the use by commercial travelers of this pre-war form of transportation. The surcharge on Pullman cars is also a hardship that is restricting travel, and this charge should be modified or discontinued as early as practicable. Owing to the high rates, a great number of traveling men have been forced from the road. Now, every traveling man in the land is a traveling man not only for his own house but for the railroads, and nothing would do more to bring about a revival in all business, including the railroad business, than for the railroads to furnish mileage books to traveling men at reduced rates.

NEWBERRY SHOULD BE UNSEATED.

I believe in honesty in elections. As I stated before, I voted for the corrupt practices act. I regretted that our Supreme Court in the Newberry case saw fit to declare, by a majority of five to four, that so much of that act as applied to primary elections was unconstitutional. Mr. NEWBERRY was adjudged by the courts and a jury of his peers to have been in fact guilty as charged. The Senate itself found that he was in fact guilty as charged. I voted to expel him, believing that his primary election was corruptly purchased and that, whether the office cost $200,000, as he claimed, or $800,000, as others claimed, or any intermediate sum, that such sum was too great a price to be spent for a Senatorship. If I am reelected and the case comes up by a motion to reconsider, I shall certainly vote to have the case reconsidered and Mr. NEWBERRY expelled. Senatorships should not be directly or indirectly purchased.

OPPOSES THE DYER ANTILYNCHING BILL.

I shall oppose the Dyer antilynching bill as vigorously as I know how. It is an unconstitutional and vicious invasion of the rights of the States. I am opposed to lynching and favor the strict enforcement of the law in every case, but law enforcement in all such cases must be had by the States.

CONCLUSION.

In conclusion, I have at all times stood for what I conscientiously believed was right, have always stood for the fundamental principles of democracy as I understood them, and, as I have been taught to believe them, have always stood upon my party's platform, have loved and worked for my State and its people, and have given all my time, all my energies, and all my abilities to a strict performance of the duties imposed upon me.

If I have been faithless to my party or to the best interests of my State, if I have been inefficient in my service, if I have lacked in character and ability in the performance of the duties that have been imposed upon me, then I say it is the duty of the Democrats of Tennessee to vote against me and send a representative to Washington who can perform in a satisfactory and faithful way the duties of the great office I now hold.

On the other hand, if my fellow Democrats have found my service in the Senate to be efficient, if they approve my official

acts, if they indorse my record, if they believe that by reason of my experience that I can do good service, if they think that the high places on committees which have been awarded to me and which can not be held by a new man until after years of service will be to their interest, if they feel that my firm allegiance to the Democratic Party and to a great Democratic administration is deserving of their approval, if they believe I have been faithful in the discharge of my duties, I would regard it as the highest honor that has ever been paid me to have an indorsement for a renomination.

KENNETH MCKELLAR.

APPENDIX NO. I.

WHAT SENATOR M'KELLAR HAS AIDED IN DOING FOR FARMERS.

Since I have been a Member of Congress the following are some of the farm measures that I have advocated and aided in passing:

1. To investigate and encourage the adoption of improved methods of farm management and farm practice.
2. For carrying out the provisions of the act establishing a Bureau of Animal Industry and to enable the Secretary of Agriculture to collect and disseminate information concerning live stock, dairy, and other animal products.
3. Providing for investigation and experimentation in the dairy industry.
4. Authorizing the preparation and dissemination of reports on animal industry.
5. For inspection as to contagious diseases of animals and their prevention and quarantine when necessary.
6. For investigating animal tuberculosis and its prevention, independently of or in cooperation with farmers' associations and State and county authorities.
7. For investigation and experimentation in animal feeding and breeding and husbandry, including cooperation with State agricultural experiment stations.
8. Providing for the development of live-stock production in the sugar-cane and cotton districts of the United States.
9. For collecting and distributing, by telegraph or otherwise, information as to supply, demand, commercial disposition, quality, and market prices of dairy and poultry products.
10. Providing for investigating the preparation for marketing, handling, grading, packing, pressing, drying, storing, transportation, and preservation of poultry and eggs.
11. Authorizing bulletins on hogs and cattle raising of the South.
12. For investigating the disease of hog cholera and its control and eradication.
13. For carrying out the provisions of the meat-inspection act.
14. Authorizing the Secretary of Agriculture to secure information as to the number of different classes and grades of marketable live stock.
15. For the investigation of plant diseases.
16. For investigation of insects affecting fruits, orchards, vineyards, and nuts.
17. For collecting and distributing information concerning the market prices and commercial movements of fruits and vegetables.
18. For investigation of insects affecting southern field crops, including insects affecting cotton, tobacco, rice, and sugar cane.
19. Also potato, sugar beet, cabbage, onion, tomatoes, and peas.
20. For the investigation and improvement of cereals and methods of cereal production and study of cereal diseases.
21. To enable the Secretary of Agriculture to carry into effect the provisions of the United States grain standards act.
22. For the investigation and improvement of grades of alfalfa, clover, and other forage crops.
23. To enable the Secretary of Agriculture to investigate the relative utility and economy of agricultural products for food, clothing, and other uses in the home, with special suggestions of plans and methods for the more effective utilization of such products for these purposes.
24. For removing the tariff tax on bagging and ties and agricultural implements.
25. Also aided in drafting the bill to establish the Bureau of Markets, giving valuable assistance and information to both producer and consumer.
26. Investigating and reporting on the utilization of water for farm irrigation.
27. To carry into effect provisions of the act to establish experimental stations in connection with the colleges established in the several States.
28. Authorizing the Secretary of Agriculture to enforce the provisions of the act providing for cooperative extension work between the agricultural colleges of the several States.
29. Authorizing the Secretary of Agriculture to make studies among the farmers of the United States in the matter of rural credits and other forms of cooperation in the various communities and to diffuse among the people useful information growing out of these studies.
30. For exploration and investigation to determine possible sources of supplies of potash, nitrates, and other natural fertilizers.
31. For investigating, demonstrating, and promoting the use of standards of the different grades, qualities, and conditions of cotton, and for investigating the ginning, grading, stapling, baling, marketing, compressing, and tare of cotton.
32. For farmers' cooperative demonstration, and demonstration of the best methods of meeting the ravages of the cotton-boll weevil.
33. Aided in passing the Federal farm loan bank system.
34. Aided in passing the Smith-Lever Agricultural Extension Act.
35. Advocated and aided in passing laws providing for the publication and distribution of Farmers' Bulletins.
36. Aided in passing the cooperative farm marketing act.
37. Aided in passing the extension of the War Finance Corporation act.
38. Aided in establishing the Farm Loan Board, under which loans are made directly to farmers at low rates of interest.
39. Providing that surplus Army trucks and other machinery left over after the war should be placed in the hands of the State and county authorities for the purpose of building roads.
40. Aided in passing the bill building ships by which farmers' products can be shipped in American bottoms all over the world.
41. Aided in putting the amendment on the Federal road act by which farm-to-market roads were provided for.
42. Legislation authorizing the establishment of the great power plants and war development at Muscle Shoals, with a view of manufacturing nitrates for cheaper fertilizers to the farmers in times of peace.
43. For all measures extending the rural free delivery law.
44. Aided in passing the parcel post law.

APPENDIX NO. II.

SENATOR M'KELLAR'S RECORD ON SOLDIERS AND EX-SERVICE MEN.

I have uniformly favored all soldiers' legislation. Among the more important laws in which I have taken part in passing may be stated the following:

First. For additional pay to enlisted men in Regular Army and in the National Guard.

Second. For the creation of family allowances to soldiers during the war.

Third. For legislation building up the National Guard.

Fourth. For legislation authorizing additional pay to holders of medals of honor.

Fifth. For the discharge of those having dependents in certain cases.

Sixth. For the payment of $60 in cash to each soldier of the war honorably discharged.

Seventh. For the increase of travel pay to those discharged after March 11, 1918.

Eighth. For the retention of uniforms and other equipment by the soldiers.

Ninth. For the establishment of entertainment houses at all posts.

Tenth. For the law allowing drafted men to be assigned for special training to educational institutions.

Eleventh. For law making ex-service men eligible for commissions in the Regular Army.

Twelfth. For law making ex-service men eligible to officers' schools.

Thirteenth. For permitting soldiers abroad to mail letters free of postage.

Fourteenth. For permitting soldiers to retain civil-service eligibility until after demobilization.

Fifteenth. Authorizing hospital care for discharged, sick, and disabled patients of War Risk Insurance Bureau.

Sixteenth. For law giving wives of soldiers hitherto disqualified the right to serve as Government employees.

Seventeenth. For law protecting the civil-service rights of soldiers during the war, specifically providing that no attachment and no execution should issue against their property while away. Also providing that mortgages should be suspended and life insurance protected and no taxes paid.

Eighteenth. Providing that honorably discharged soldiers should have preference in clerical appointments in departments and also on work on rural post roads and in national forests.

Nineteenth. For law giving applicants for civil-service positions a preference in examinations.

Twentieth. For law establishing vocational training schools for ex-soldiers.

Twenty-first. For laws creating all necessary hospitals for soldiers.

Twenty-second. For law increasing pay for disabled, sick, and wounded soldiers.

Twenty-third. For law providing for rehabilitation of wounded and maimed soldiers.

Twenty-fourth. For appropriation for medical treatment of war-risk insurance patients.

Twenty-fifth. For medical aid, etc., for discharged and disabled soldiers.

Twenty-sixth. For preference in clerical employment of wives of injured soldiers.

Twenty-seventh. For preferred right for two years of discharged soldiers in the late war to make homestead entries on open public lands.

Twenty-eighth. For law providing that soldiers might go to school in France after the war was over in certain cases.

Twenty-ninth. I voted for the adjusted compensation bill when it was before the Senate.

Thirtieth. I have served on the Committee on Military Affairs during my entire terms in Congress, now about 11 years. I was in the service of the Senate Committee on Military Affairs during the war and have had much to do with the shaping and passing of all legislation for the benefit of soldiers. My office is and has been a bureau for Tennessee soldiers from the beginning of the war until now, where their claims are looked after and their wants attended to.

APPENDIX No. III.

SENATOR M'KELLAR'S RECORD ON WOMAN SUFFRAGE.

Women are permitted to vote in Tennessee and elsewhere solely and alone by reason of the passage of the suffrage amendment to the Constitution by the Congress of the United States. It is true there was a State law passed in Tennessee several years ago granting women the right to vote for municipal officers and for President of the United States, but they had no right under that law to vote for Senators and Congressmen. The point I wish to emphasize is that the women of Tennessee could not vote for United States Senator, but for the amendment to the Constitution of the United States, for which I voted and which I advocated.

I have advocated equal suffrage for more than 20 years.

I first voted for this amendment while a Member of the House on January 12, 1915.

After coming to the Senate, on May 6, 1918, I voted again for the amendment.

On October 1, 1918, I voted indirectly four times for the amendment.

On February 10, 1919, I again voted for the amendment.

On May 26, 1919, I again voted for the amendment.

On June 3, 1919, I again voted for the amendment.

On June 4, 1919, I again voted for the amendment, when it finally passed.

I was a member of the subcommittee of seven which drafted the Democratic platform at San Francisco in June, 1920, and voted for the resolution urging the adoption of the suffrage amendment by the States, and specifically urging that Tennessee adopt it. Thirty-five States had then ratified the amendment, and shortly afterwards the Governor of Tennessee called a meeting of the legislature for the purpose of having Tennessee become the thirty-sixth State. I was urged by President Wilson, Governor Cox, the Democratic nominee for the Presidency, and many others to go to Nashville and aid in urging the Tennessee Legislature to ratify the amendment. I spent about three weeks of my vacation there in thus urging the legislature to ratify. It was ratified by Tennessee, and Tennessee's ratification has been upheld by both the Supreme Court of Tennessee and the United States Supreme Court.

In the meantime, in addition, at invitations of the Legislatures of Delaware and Maryland and of the supporters of suffrage, made addresses before both of those bodies in 1920 favoring suffrage, using my vacations for this purpose.

I simply ask the women of Tennessee to remember that it is this constitutional amendment and no other law under which they are permitted to vote for a United States Senator.

WHITE HOUSE POLICE FORCE.

Mr. WARREN. I ask unanimous consent to report from the Committee on Public Buildings and Grounds favorably, with amendments, the bill (S. 3659) to create the White House police force, and for other purposes, and I submit a report (No. 760) thereon. I ask unanimous consent for the immediate consideration of the bill.

The VICE PRESIDENT. Is there objection to its present consideration?

Mr. CURTIS. I do not like to object, but I think the bill ought to go to the calendar in order that we may see just what it is. I understand that it establishes a separate force——

Mr. PHIPPS. If the Senator will permit me, I should like to have the report read. It is very short.

Mr. CURTIS. I would prefer to study it myself.

The VICE PRESIDENT. Objection being made, the bill will be placed on the calendar.

Mr. WARREN subsequently said: Mr. President, the bill which I reported a few moments ago went over on objection. The Senator from Kansas [Mr. CURTIS], who made the objection, is willing to withdraw it, and I ask unanimous consent for the present consideration of the bill.

Mr. CURTIS. I withdraw my objection to the bill.

Mr. HARRISON. Let the bill be read.

The VICE PRESIDENT. The Secretary will read the bill by title.

The READING CLERK. A bill (S. 3659) to create the White House police force, and for other purposes.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

Mr. WARREN. I ask that the committee report on the bill may be read.

The reading clerk read the report (No. 760) submitted this day by Mr. WARREN, as follows:

The Committee on Public Buildings and Grounds, to which was referred the bill (S. 3659) to create the White House police force, and for other purposes, having considered the measure, reports it to the Senate favorably, with recommendation that it be passed with the following amendments:

Page 2, line 22, after the word "force," insert the words "and he shall be furnished with uniforms and other necessary equipment similar to the uniforms and equipment furnished the United States park police."

Page 5, line 10, after the word "and," insert the words "for the purchase of uniforms and other."

The purpose of this bill is to provide an efficient police force to guard the Executive Mansion and grounds, such force to be under the control of the President and under the direct supervision of an officer designated by him. The force is to be recruited from members of the Metropolitan police and the United States park police, and is to have the same consideration as to pay, retirement, and relief funds as those enjoyed by members of the Metropolitan and United States park police forces.

The committee recommends the adoption of the amendments providing for the furnishing of uniforms and other necessary equipment and providing pay for the cost of same.

The Executive Mansion and grounds have heretofore been policed by a force of 54 Metropolitan policemen, and the effect of this bill will be to reduce that number to 36 policemen, thus effecting a reduction of approximately 40 per cent in cost.

The VICE PRESIDENT. The Secretary will state the amendments to the bill.

The first amendment of the Committee on Public Buildings and Grounds was, on page 2, section 3, line 22, after the words "Metropolitan police force," to insert "and he shall be furnished with uniforms and other necessary equipment similar to the uniforms and equipment furnished United States park police"; so as to make the section read:

SEC. 3. (a) That no person shall be appointed a member of the White House police force at a grade lower than the grade held by him as a member of the Metropolitan police force or of the United States park police force at the time of his appointment.

(b) A member of the White House police force shall receive a salary at the rate provided for the corresponding grade in the Metropolitan police force, and he shall be furnished with uniforms and other necessary equipment similar to the uniforms and equipment furnished United States park police, and he shall be entitled to the same leave allowances as a member of the United States park police force.

(c) The President may transfer a member of the White House police force to the organization of which he was a member at the time of his appointment to such force.

The amendment was agreed to.

The next amendment was, on page 5, section 7, line 10, after the word "equipment" to insert "for the purchase of uniforms and other"; so as to make the section read:

That the amounts necessary for the payment of salaries and for the purchase of uniforms and other equipment of the White House police force shall be disbursed by the officer in charge of public buildings and grounds, and there is hereby authorized to be appropriated, out of any money in the Treasury not otherwise appropriated, such sums as may be necessary to carry out the provisions of this act.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The bill was ordered to be engrossed for a third reading and read the third time.

Mr. WILLIS. Before the bill is finally acted upon I should like to have some Senator explain it. What does it propose?

Mr. PHIPPS. Mr. President, primarily the purpose of the bill, as stated in the report which has been read, is to reduce the number of the police force which has been guarding the Executive Mansion and grounds since the beginning of the war. The proposed change is in accordance with the desire of the Chief Executive, and after due consideration on the part of those with whom he has conferred, presumably his Cabinet officers and others. The bill is designed to establish a force of policemen who will be under the direct control of the President of the United States instead of under the Commissioners of the District of Columbia. The present reduction of the force will be from 54 to 33 employees, but later it is expected that the force will be still further reduced.

Mr. WADSWORTH. I desire to ask the Senator from Colorado a question. As I understand, the policemen who are now assigned to duty in connection with the White House and vicinity are members of the District of Columbia police force?

Mr. PHIPPS. Yes; they are members of the Metropolitan police force.

Mr. WADSWORTH. And now it is proposed that they shall be segregated and taken away from the jurisdiction of the commissioners and put under the direct control of the Chief Executive?

Mr. PHIPPS. That is true.

Mr. WADSWORTH. May I ask the Senator if the number of District policemen are in the meantime being increased?

Mr. PHIPPS. I will say to the Senator from New York that in the expectation of having a separate force provided for the White House the increase in the number of Metropolitan police asked for by the commissioners, and generally recommended, was not granted in full. The pending District of Columbia appropriation bill carries an increase of 25 policemen, although 75 had been recommended and approved by the Budget.

Mr. WADSWORTH. That is the point I wanted to bring out. Then this bill will not result in a net increase in the number of policemen in Washington?

Mr. PHIPPS. Oh, no; it will not.

Mr. McCUMBER. Mr. President, will the Senator from Colorado explain to me why it is necessary or proper to have one class of policemen with one kind of uniform and one kind of badge, and another class of policemen wearing a different uniform and a different kind of badge?

Mr. PHIPPS. The uniform will be practically the same as that of the park policemen. We have Capitol policemen, who are not under the control of the District Commissioners and who wear on their uniforms the insignia, "U. S. Capitol police." It is simply to distinguish them and to indicate under whose control they are operating, as I understand. It takes close inspection to see the difference between the uniforms of the United States Capitol police and the regular Metropolitan police.

Mr. McCUMBER. If the difference in uniform merely consists of the letters that are to be worn upon the collars, that is one thing; but, as I understand, it is proposed to appropriate for an entirely different kind of uniform. I do not know whether it is anywhere nearer the same, and I do not know what is meant by an appropriation for uniforms, when, so far as anything that has been explained is concerned, the same kind of uniform which the policemen are now wearing may be used with a mere change of letters.

Mr. PHIPPS. That may be true; but at the same time the uniforms for the Metropolitan police are furnished by the District.

Mr. WARREN. This bill states that the uniform shall be the same as those of the park policemen.

Mr. PHIPPS. The bill has had very careful consideration during the past year by those who are interested in it. I believe the bill to be a good one, and it has received the approval of the committee.

The VICE PRESIDENT. The question is, Shall the bill pass?

The bill was passed.

THE TARIFF.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 7456) to provide revenue, to regulate commerce with foreign countries, to encourage the industries of the United States, and for other purposes.

The VICE PRESIDENT. The question is on agreeing to the amendment on page 84, line 11.

Mr. McCUMBER. Mr. President, I ask to return now to the amendment on page 72, line 21, paragraph 354.

The VICE PRESIDENT. Without objection, the Senate will return to paragraph 354.

Mr. McLEAN. Mr. President, on behalf of the committee, I move, in line 21, to strike out the numerals "50," between the words "dozen" and "cents," and insert the numerals "40."

The VICE PRESIDENT. The amendment to the amendment will be stated.

The READING CLERK. On page 72, line 21, in the committee amendment it is proposed to strike out "50" and insert "40."

The VICE PRESIDENT. The question is on agreeing to the amendment to the amendment.

The amendment to the amendment was agreed to.

The VICE PRESIDENT. The question is on agreeing to the amendment as amended.

Mr. JONES of New Mexico. Mr. President, this is a rather unusual procedure. No explanation is being offered at all for the duties imposed by the committee. The increases are stupendous, and we are asked to vote without any information whatever. I can not conceive that Senators have any idea of just what these amendments propose. They are enormous increases. I think I shall first direct attention to the increases which are proposed in the first item of pocketknives.

The present duty on the cheaper knives is 35 per cent and ranges up to 55 per cent. Under the Payne-Aldrich law the duty averaged 76 per cent, and under the proposal of the committee on knives costing less than $3 per dozen the average duty is 186 per cent, and on all pocketknives of the different values stated in the paragraph the average duty is 165 per cent. I call attention to the fact that the duties imposed embrace not only ad valorem rates but also specific rates as well, and on knives that are valued at not more than 40 cents per dozen the duty is 2 cents each and 50 per cent ad valorem. On that class of knives there is absolutely no competition with any domestic manufacturer, for such knives are not made in this country. That is a cheap grade of knife costing less than 40 cents a dozen. They are knives that retail at 5 cents apiece, and to impose any such duty as is suggested will exclude such knives from the American market.

Senators may wonder what sort of a knife it is that can be retailed at 5 cents apiece under existing law in this country. I have a couple of samples of them here [exhibiting], and to impose this sort of a duty of 2 cents each, or 24 cents a dozen, and then add 50 per cent ad valorem duty to that, simply means that the American boy can no longer buy a knife of that kind for 5 cents. To Senators who are accustomed to dealing in millions and who have recently become accustomed to dealing in billions of dollars, perhaps this does not amount to anything. We are willing to overlook the boy who counts his pennies, and we are either going to take his pennies from him or deprive him of getting a pocketknife.

For the purposes of the boy of tender years, one of these knives is just as good as a better knife. It answers all the purposes, and there is not a boy of 6 or 7 years or even older who would not be pleased to have a knife of this kind rather than none at all.

That is what this amounts to. You have heard the slang expression about things being as easy as "taking candy from a child." I never before thought that the great United States Government, through the action of its Congress, through legislation, would undertake to deprive a child of candy, to take candy from a child to impose the extra pennies as a tax upon these knives and deprive the child of his few sticks of candy. That is what this bill will do. It will make these knives sell probably for a dime instead of 5 cents. It will take more pennies to buy one of these knives, and that is what we attempt to do in the name, I suppose, of protecting American industry!

As has just been suggested, the boy who uses such knives as this is not yet a voter. Some Senators present, I hope, will live until the present users of these knives become voters. They may remember, if they are properly advised as to the facts, how you deprived them when they were boys of getting a knife. There are a lot of boys in this great country of ours who struggle to get pennies. They sell newspapers on the streets trying to make a fraction of a penny profit on a paper. You find them engaged in doing other chores to get a few pennies, and you find even boys of maturer age doing various chores to get a few pennies, a few nickels, a few dimes.

Here is a product that is not manufactured at all in the United States, and the only result of this legislation will be to deprive the American boys of these cheap knives and have them keep on saving and saving their pennies until they can get together money enough to buy a knife which is produced in this country at a higher price. Of course, it will be a better knife, but this knife will answer the purpose of the boy just as well as the more expensive one.

Mr. President, I want to have a separate vote on these boys' knives, and I may say something regarding the price.

These knives are sold to-day at a higher price than they were prior to the war. A good deal has been said here about

the low prices of these foreign commodities; but in the case of these particular knives that I have shown you, this one knife in 1914 sold at 42 pfennigs a dozen, or 11¼ cents in United States money. That was when the mark was valued at 23.8 cents. By the way, the price list upon these knives which I have here is dated May 17, 1922; and those same knives now are quoted at 45 marks per dozen, or 16½ cents, and you propose to add a duty of 31 cents on these knives that cost 16½ cents, or at the rate of 190 per cent.

Here is another knife that cost in 1914 53 pfennigs, or 13 cents a dozen. The late price on that knife is 50 marks per dozen, or 18 cents per dozen. You are proposing to put upon that knife a duty of 34.8 cents a dozen, or 190 per cent, and no such knives are made in the United States.

Mr. President, on page 72, line 12, I move to strike out "2 cents each and," so that the duty upon these knives will be 60 per cent. I move to strike out the specific duty.

Having made these few rather caustic remarks, I presume now that we will be able to get some information on this subject from the other side of the Chamber.

Mr. McLEAN. Mr. President, I have a suspicion, and I think it is well founded, that Senators on the other side of the Chamber who have studied this schedule have had more information on it than they like, and that is one reason why the distinguished Senator from New Mexico [Mr. JONES] confined his objections to this paragraph to a 5-cent knife or a 2-cent knife. I do not know whether he had one in his possession or not. I will try to get one. I think if he had a sample of that knife he would vote for an embargo against any importations of that particular article.

Mr. JONES of New Mexico. I have a sample.

Mr. McLEAN. Because, if a boy has any knife at all, he wants one that will cut cheese, and I will assure the Senator that that knife will not do it.

Mr. President, before I call attention to the rates fixed by the committee, I want to give the Senate an idea of the condition of this industry.

There are 27 cutlery factories—that is, factories making pocketknives—in the United States. They are located in Connecticut, New York, Pennsylvania, Ohio, New Jersey, and Massachusetts. During the year 1921 they operated on a basis of one-third of production capacity. Of the 27 factories above enumerated, all but two have been engaged in the manufacture of pocketknives for many years, and the competition has been and is exceedingly keen in this industry. The 25 factories have a total investment of something over $7,000,000, and in 1921 they aggregated an operating loss for the year of $664,000. Sales dropped from $11,000,000 in 1920 to $3,800,000 in 1921.

Mr. POMERENE. Mr. President, may I ask what the source of that information is?

Mr. McLEAN. This is given to me by the gentleman who represents these concerns.

I will say to the Senator from Ohio that the figures of the imports of these articles show that this industry is being buried alive. Let us take the recent importations. The importations of pocketknives during the month of March, 1922, were 100,256 dozen, an increase of imports over March, 1921, of 56,000 dozen. For the nine months ending March 31, 1922, the importations of pocketknives were 644,000 dozen, an increase over the corresponding period of the year before of 326,937 dozen, or 103 per cent.

Mr. POMERENE. Can the Senator give the value of those knives?

Mr. McLEAN. I will give the value. I call the attention of the Senator from New Mexico to this, that, figured at the March rate of importations, the annual imports would total 1,203,000 dozen, or more than twice the total sales of American pocketknives during the year 1921. When we come to the more recent importations, we find that in April of this year there were imported 123,000 dozen, an increase of 25 per cent over the March imports.

I do not intend to occupy the time of the Senate a great while in explaining the necessity for these rates. They are not what the manufacturers asked for by any manner of means. Some of these concerns are located in Connecticut, and I was interested in getting them a reasonable protection. I told the committee that I wanted the experts who were familiar with this line of goods to get the prices, foreign and domestic, and equalize as nearly as they could the difference in the production costs. So far as I was concerned, that was all I asked for, and I want the Senate to understand that that is all I want as to any article contained in this tariff bill.

This particular industry, as I have said, is being destroyed, and unless something is done, and done right away, the manufacturers of these articles will be driven out of business, because it is evident that this industry in Germany is united. They have determined to make an onslaught on the penknives, the razors, and the scissors that we make in this country.

Mr. POMERENE. I want to ask the Senator whether he is able to give the amount of the imports for the several foreign countries, as, for instance, Great Britain, Germany, France, and so on; or are they lumped?

Mr. McLEAN. Most of them come from Germany. Of course, as the Senator knows, there are special knives which come from England, but the importations are few.

If the Senator from New Mexico has studied the Reynolds report—if it is reliable, and the arithmetic of the experts is correct—he knows that these rates are more than justified. Take, for instance, the first article in the Reynolds report. The foreign valuation is $4.48 a dozen. The American selling price of the comparable article is $12 a dozen, and so on down the list. I do not want to take the time of the Senate to read this list. The experts have gotten some more recent figures, bringing the averages down to date, and I will read some of those into the record.

Take table No. 1, which was prepared by the experts, and on that item No. 665.

Mr. POMERENE. Are these tables from the report of the Tariff Commission?

Mr. McLEAN. No; the figures were gathered for me by the experts.

Mr. POMERENE. The experts connected with the committee?

Mr. McLEAN. Certainly; the same experts who assisted the Senator from Alabama [Mr. UNDERWOOD] in drafting the rates in the Underwood-Simmons bill, so far as I know. I think they are conscientious men.

Mr. POMERENE. I am not criticizing them. I am simply asking for the information, so that we may know what weight to attach to them.

Mr. McLEAN. In the matter of item No. 665, the domestic landed price was $1.12 a dozen. The selling price of the comparable domestic article was $4.67 a dozen, so the difference would be 317 per cent.

Item No. 6066 is the pair of knives I have in my hand. The landed cost, without duty, according to the Reynolds report—which is the report, as the Senator knows, upon which we based our rates tentatively—was $5.75 a dozen. The landed price of that knife in April was $2.55 a dozen. Three hundred and fifty per cent would not cover the difference.

Mr. CALDER. The Senator referred to a higher figure of landed cost. When was the Reynolds report made? The Senator read two different landed costs.

Mr. McLEAN. The first was August.

Mr. CALDER. August, 1921?

Mr. McLEAN. Yes. The price of the domestic article comparable to this knife to which I have just called the attention of the Senate is $13 a dozen.

Here is another knife, No. 307. The landed cost, as reported in August, was $5.52 a dozen. The landed price of this knife in April was $2.02 a dozen. The price of the comparable domestic knife was $13.50 a dozen.

Mr. KELLOGG. Were those importations from Germany?

Mr. McLEAN. Yes; most of these importations are from Germany, and I do not know but what they all are. I would like to have the Senator from New Mexico look at the knives I have here on my desk, and if he will, I think he will realize that the comment which I made when I took the floor, that the only knife of which there is not a comparable article produced in this country and about which any complaint can be made, is the knife that is imported into this country at 25 cents or less per dozen.

I think it must be clear to the Senator that that cheap trash which comes into this country in the first place ought not to be permitted to come at all, but if it does it should bear the same comparative rate of duty that the other classes bear, and that is all we have asked for.

I could complete this list, Mr. President, and call attention to knife after knife. Here is No. 5611, the landed cost of which is $10.20 a dozen. The American selling price of the comparable article is $24.50. The landed price of the next one is $7.51 a dozen. The comparable domestic price is $17.05 a dozen.

I will say to the Senator that the profit allowed, both on the foreign knife and on the domestic knife, in estimating these rates, was 20 per cent. It has been brought to my attention, and I do not believe it can be disputed, that some of the large importing houses, like Henkel's, who have a large factory in Germany and a large store in this country, import these knives at not more than 5 per cent, just enough to cover the carrying

charges, and that as a result of this competition they have driven the American producer entirely out of the market. The domestic producers' storehouses contain large quantities of goods which they can not sell, and they will have to go out of business entirely unless they can get adequate protection.

Mr. JONES of New Mexico. Mr. President, I would like to argue this paragraph a part at a time. The Senator from Connecticut, in reply to what I had to say about this particular grade of knife, merely made the statement that such cheap knives ought not to be permitted to come into this country at all. That was his only reply, just as I assumed it would be. He wants to deprive the American boy of this cheap knife.

He may think that boys ought to have a more expensive knife, but I want to say that 73 per cent of all the pocket-knives imported into the United States have been valued at 50 cents per dozen or less. Somebody in the United States differs from the distinguished Senator from Connecticut. He has read of the hundreds of thousands of dollars of importations, but 73 per cent in quantity of all the knives that had been brought into the country prior to the war were knives such as I have exhibited at 50 cents a dozen or less.

Mr. McCORMICK. Mr. President, did the Senator say prior to the war?

Mr. JONES of New Mexico. Yes; prior to the war.

Mr. McCORMICK. Is the condition different to-day?

Mr. JONES of New Mexico. I think not, but we assume prior-to-the-war conditions as somewhat normal, and regarding that period the Tariff Commission made its report.

Mr. KELLOGG. I suppose the Senator will admit there is a difference in the rate of exchange as between to-day and prior to the war?

Mr. JONES of New Mexico. The Senator, of course, is quite right about that, and I expect to refer to that a little later. However, I think we might as well understand now as well as later the competition that exists in the cutlery business of the country. The people of the United States do not make any cheap knives—I mean very cheap knives. Therefore there is no competition. The Tariff Commission says so:

> Under the act of 1909 73 per cent of the knives imported were valued at under 50 cents per dozen. These are extremely cheap knives, retailing at 5 or 10 cents apiece.

As to those knives, as I said, there is no competition. Now, it is just a question whether or not we are going to deprive the American boy of that kind of a knife, those knives which retail at 5 and 10 cents apiece. The Senator from Connecticut will tell us that none of them are manufactured in his State or in the United States. He has already told us that the only thing to do is to exclude them from the United States.

Mr. McLEAN. Mr. President——

The PRESIDING OFFICER (Mr. McNARY in the chair). Does the Senator from New Mexico yield to the Senator from Connecticut?

Mr. JONES of New Mexico. I gladly yield.

Mr. McLEAN. The 2-cent knife would cost about 5 cents without the duty. I imagine they would charge about that. With the duty they can sell that knife for 7 cents. So the American boy can buy a 7-cent knife now.

Mr. JONES of New Mexico. Now the Senator is changing his ground. I think the position of the Senator as previously stated is much stronger than his present position. He now says that he is willing for the American boy to have a knife, but he wants to make him pay more for it. That really is taking candy from a child. It is making him pay more for it—for what purpose? Not to build up an infant industry or any other industry, because he knows that knife will not be made in this country if he puts an extra tax of 2 cents apiece on it.

Mr. McLEAN. He can get a good American knife for 10 or 12 cents, something that he can whittle with. He can not whittle with this knife. He can get a good American knife for about 12 cents with which he can whittle.

Mr. JONES of New Mexico. I do not know whether the Senator has examined these knives or not. If he has, I think that he will conclude there are thousands and hundreds of thousands of boys in this country of ours who would rather have one of these knives than none at all.

Mr. LENROOT. Mr. President——

Mr. JONES of New Mexico. I yield to the Senator from Wisconsin.

Mr. LENROOT. How much did the Democrats tax the boys for the knives which the Senator now exhibits?

Mr. JONES of New Mexico. My recollection is it was 35 per cent.

Mr. LENROOT. Was it not more than that?

Mr. JONES of New Mexico. No; 35 per cent.

Mr. LENROOT. Why did the Democratic Party tax this poor boy 35 per cent who can only afford a 5-cent knife?

Mr. JONES of New Mexico. It was done, of course, for the purpose of raising a little revenue.

Mr. LENROOT. Is it the idea of the Democratic Party that they would take the pennies of a boy who could not afford more than a 5-cent knife?

Mr. JONES of New Mexico. We did not take many of them.

Mr. LENROOT. Oh, but the Senator said 73 per cent of the imports were knives of that character.

Mr. JONES of New Mexico. Seventy-three per cent of the imports were knives of a value of 50 cents a dozen or less.

Mr. McLEAN. That was before the war.

Mr. JONES of New Mexico. May I ask the distinguished Senator from Wisconsin if he wants to take from the boy 2 cents on each one of these knives and 60 per cent ad valorem, when the present duty is 35 per cent? Does he want to increase the duty that much?

Mr. LENROOT. Well, if it was a crime, the Democrats approved of it. It is a matter of degree, that is all.

Mr. JONES of New Mexico. No; Mr. President, the distinguished Senator from Connecticut said that his purpose in putting the duty on here is to exclude the knives altogether and force the boy to buy the American knife at a higher price.

Mr. McLEAN. Certainly, I want the boy to have something he can cut with. I have two of those knives here now. I do not know whether they are similar to the pair the Senator has or not.

Mr. JONES of New Mexico. Very likely they are.

Mr. McLEAN. I think perhaps I had better take back what I said about these knives, because a boy could not cut his finger with them, and that certainly would be an advantage.

Mr. JONES of New Mexico. Mr. President, I do not suppose the Senator from Connecticut when he was a boy ever thought of the value of a penny. I do not suppose it was necessary for him to think about it. But I remember as a boy cutting a cord of wood of 4-foot length, cutting each stick in two, in order to get a dime. I remember cutting a whole cord of wood in order to get a dime!

Mr. McLEAN. And when he got the dime, why invite him to throw it away? That is the point. He is nothing but a boy. He does not know any better than to buy this stuff. He takes it home and, as I said before, the one thing that he can not do with it is to cut.

Mr. JONES of New Mexico. Mr. President, the Senator from Connecticut may convince some people, but I do not believe he is going to convince many that these knives are not worth all they sell for. That they are useful and answer a very good purpose is beyond question. The Senator is proposing a tax of 2 cents apiece on knives which were imported prior to the war at 11½ cents a dozen and now at a little over 16 cents a dozen. He would impose a duty of 2 cents each and 60 per cent ad valorem, making a duty of 190 per cent, which would result in taking these knives off the market. That is just what would happen. It would take them out of the 5 and 10 cent stores of the country.

Mr. LENROOT. Mr. President, will the Senator yield?

Mr. JONES of New Mexico. Certainly.

Mr. LENROOT. The Senator has, because I have seen it, one of the knives to which the Senator from Connecticut refers. I want to ask the Senator whether he has tried to sharpen a lead pencil with that knife?

Mr. JONES of New Mexico. No; I have not; and I do not suppose it is ever intended for that purpose.

Mr. LENROOT. Does the Senator think that a boy should be induced to buy a 5-cent knife which will not even sharpen a lead pencil?

Mr. JONES of New Mexico. There is no question that he could sharpen a lead pencil with it if he wanted to do so.

Mr. LENROOT. I suggest that the Senator try it. I have been trying it, and can not do it.

Mr. JONES of New Mexico. The Senator is not an adept at sharpening lead pencils.

Mr. McLEAN. The Senator from New Mexico does not even want the boy to have a lead pencil, because I think he voted for a tariff on graphite, so that if he had his way the boy could not have any lead pencil to sharpen, and the knife would not do him any good.

Mr. JONES of New Mexico. If we take off this 2-cent duty he could have a knife and two pencils for his 7 cents instead of only the knife. The Senator perhaps never had occasion when he was a boy to think of the value of something of this sort. A great many Senators will remember the old Barlow knife. As just remarked by a Senator sitting near me, no matter what

kind of a knife the boy has, he is delighted with it, and there is no mistaking the fact. All the Senator has to do is to return in his memory to his own boyhood days. Any kind of a knife was the wish of the boy. Yet the Senator wants to take these knives out of the 5 and 10 cent stores of the country in order to force the boy to spend a quarter or more for a knife which he can lose just as readily as one of these knives.

Mr. McLEAN. He would not lose the knife the Senator is talking about. He would throw it away as soon as he got home, if not before.

Mr. JONES of New Mexico. The Senator says he would throw it away. Have the boys been throwing them away?

Mr. McLEAN. I have not any doubt of it.

Mr. JONES of New Mexico. Seventy-three per cent of the knives imported are of this quality, and yet the Senator says they are thrown away. That is his guess. Of course he would throw it away. Doubtless he was more fortunate in his boyhood days than hundreds of thousands of other boys, but the boys whom I have known do not throw their knives away. I never knew a boy yet to throw any kind of a knife away.

Mr. McLEAN. No; he would probably swap it "sight unseen" to some other boy and they would both be decidedly cheated in the exchange.

Mr. JONES of New Mexico. That is what is going to be done. You are going to take that knife off the market and deprive the boys of the opportunity to get a 5 or 10 cent knife.

Mr. McLEAN. The Senator insists upon misrepresenting the exact facts regarding that matter; for that 2-cent knife may be sold for less than 7 cents to the boy and still allow a profit under the proposed rate, so that when the boy has a dime he can buy a knife and a pencil also under this bill.

Mr. JONES of New Mexico. If he has 7 cents instead of 5 cents.

Mr. McLEAN. Yes.

Mr. JONES of New Mexico. Mr. President, the argument of the Senator from Connecticut does not appeal to me. At this point I think I might just as well discuss somewhat generally the knife question. The Senator from Connecticut has already done so. The competition in knives is confined almost entirely to two grades.

I think I will read from the Tariff Commission Survey in regard to the matter.

> The most marked difference between the product of the American manufacturers and foreign knives sold upon the American market is the difference in grade. The great bulk of the imported knives are of the cheapest grade—those scheduled below 50 cents per dozen—in which the American manufacturers do not compete. Under the act of 1909, such knives formed 73 per cent of the quantities imported and 34 per cent of their value. This import is thus supplementary. Approximately $515,000 yearly fell under the higher classifications made by this act—about 12½ per cent of the value of production in 1914. Forty-two per cent of the value of the total import was valued at over $1.25 per dozen under that act; 58 per cent at over $1 per dozen under the act of 1913, to June 30, 1918.

As to this particular knife, as I have said, there is no competition, nor is any competition claimed. The great competition comes in the higher grade knives. The medium grade the American manufacturer produces in great quantities, using machinery in a great many ways and turning out a good knife at a reasonable price. I am not going to ask to have these duties removed; I am perfectly willing to have reasonable duties upon cutlery, but we do not want the duties to be excessive.

The Senator from Connecticut has referred to the fact that according to the prices even the proposed rate of duty will not be sufficient to equalize the difference in the prices. He is right about that if the prices remain where they were when those samples were imported into the United States.

Before we discuss that matter, however, I am inclined to take a vote; but it occurs to me that perhaps several Senators are at dinner at this time; and so I think I might as well proceed with the discussion.

The Senator from Minnesota [Mr. KELLOGG] has referred to the difference in exchange. I should like to say a few words about the question of the difference in exchange. The German mark to-day is worth about one-third of a cent. Its par value is about 23.8 cents. It does not follow, however, that that means that goods in Germany are worth one-sixtieth or one-seventieth of the price of goods in the United States. It does not mean that at all. The important question is the purchasing power of the mark in Germany. If wages had gone up as fast as the mark has declined, then it would make no difference whatever whether or not there was a depreciated currency.

Mr. KELLOGG. Will the Senator yield to me?

Mr. JONES of New Mexico. I yield to the Senator.

Mr. KELLOGG. The Senator knows that wages have not gone up there, does he not?

Mr. JONES of New Mexico. Wages have not gone up to that extent, but the wages have gone up and are still going up.

Mr. KELLOGG. But wages in Germany are very small in proportion to the wages paid in this country, are they not?

Mr. JONES of New Mexico. Well, of course, "small" is a relative term and is rather indefinite.

Mr. KELLOGG. Men who receive $3 or $4 a day here would earn in Germany about $3.50 or $4 a week, would they not?

Mr. JONES of New Mexico. I quite agree that there is a vast difference between the cost of production of pocketknives in this country and in Germany.

Mr. KELLOGG. Will the Senator also tell us whether or not it is true that the purchasing power of a mark in Germany, so far as living expenses are concerned, is about three times as great as its purchasing power in buying gold?

Mr. JONES of New Mexico. No.

Mr. KELLOGG. It is not true?

Mr. JONES of New Mexico. If the Senator means in buying the gold metal, he is right about that.

Mr. KELLOGG. So that a mark in Germany can buy in rent and clothing and food a good deal more than it will buy of gold?

Mr. JONES of New Mexico. Yes. And it is that purchasing power of the mark that measures exchange difficulty.

If the prices of goods go up so that you can buy only a proportion that represents absolutely the decline in the mark, you have not accomplished anything, but what we have to consider is the difference in the purchasing power or rather what is called the purchasing power parity of the mark in Germany and in the United States.

Mr. SMOOT. And that only aggravates the situation, I will say to the Senator, because if one mark of German goods comes into this country it represents one-third of a cent in gold—and I could say a hundred marks or a thousand marks and the illustration would be the same—but if the German can get one-third of a cent in gold he can take that one-third of a cent in gold and purchase in Germany three times its American value in labor, three times as much in rent, three times as much in food, three times as much in clothing, and three times as much of any other commodity the price of which is regulated by the Government of Germany. To-day he can purchase a little over three times, I will say to the Senator. Therefore, the German laborer has every advantage in the world over the American laboring man, because not only is the mark depreciated until it is only a third of a cent, but with that third of a cent the German manufacturer can buy three times the value of the mark in gold.

Mr. JONES of New Mexico. The Senator, I am sure, has his reasoning mixed. The scientists who have studied this question and worked it out and expressed themselves on the subject take a different view from that of the Senator from Utah.

Mr. SMOOT. I have a letter from the greatest statistician, I think, in Germany, in which he outlines the whole situation and states exactly what they are doing in Germany and what the conditions there are.

Mr. JONES of New Mexico. I have here a periodical issued by the United States Department of Commerce—and it is the latest report from the department on the subject—and, while it is not prepared by Mr. Klein himself, there is an introduction to it by Mr. Klein, who is the head of the bureau, and here is the reasoning of Mr. Klein on the subject:

> The ability of Germany to underbid competing nations in the world's market has been largely due to the situation of the German mark. The common belief is that the depreciation in the exchange value of the mark below the gold parity is responsible. However, a more detailed study of German prices proves that the advantage which the German manufacturers have enjoyed in export trade is derived not from the fact that the current exchange rates for the mark are low as compared with the gold parity, but that the rates are low with respect to the purchasing power parity.

Mr. SMOOT. That is exactly what I have stated. I approve every word of that statement. It is not the one-third of a cent of gold which the German gets for one-third of a cent of goods exported to the United States; that would not cause so much difference. The difference comes when they get that one-third of a cent in gold and then buy one cent's worth of food, clothing, labor, and rent in Germany. Therefore, the American laboring man does not only have to meet the competition with the one-third of a cent in gold, but he has to meet three times that amount because, under the laws and regulations in Germany, the German laboring man receives three times the gold value, and, therefore, to begin with, the American laborer is at a disadvantage to that extent.

Mr. JONES of New Mexico. I believe now that I understand the position of the Senator. I did not understand him a while ago. What the Senator has now said, if I understand him, is in agreement with my own thoughts on the subject, that the advantage in the export trade by reason of the depreciated mark is not due simply to the difference in exchange but to the difference in the purchasing power.

Mr. SMOOT. Absolutely; and that is against the American laboring man wherever that purchasing power is greater than the gold value of the mark.

Mr. JONES of New Mexico. I did not understand the Senator awhile ago, but I do now, and I agree; our minds are in accord on the subject.

I proceed with this for the benefit of those who have not given some thought to the question. Beginning where I left off—

The latter—

That means the purchasing power parities—

are found by comparison of the internal purchasing power of the mark in Germany with that of other currencies in their respective countries and therefore represent the real exchange value of the mark.

The exchange of the goods purchased by using the mark.

The external value of German currency, determined on international money markets and fixed day by day by the transactions and agreements of buyers and sellers of marks, fluctuates widely in comparatively short periods of time, due to political as well as economic causes. The internal value of the mark in Germany depends largely on the relation between the buying power of the German public as expressed in marks and the amount of goods offered for sale. The manufacturing cost in Germany depends, of course, on this internal value. The external and internal values of the mark do not remain the same. A rapid fall in the external value of the mark is accompanied by a much slower increase in wages and other production costs. There is, therefore, a lag between the external and the internal value. The advantage of the German manufacturer and exporter is derived from this lag, which is accentuated by another very important factor, namely, direct and indirect subsidies to industry—

Such as the maximum rent law and the grain subsidy and low transportation rates on the street railways, and so forth. These subsidies are causing the huge Government deficit.

The essential point to be remembered is that this condition, with its corresponding advantage to the German exporter, is a temporary one. On the one hand, the continued depression of the German mark below the purchasing power parity will bring the country into complete bankruptcy. On the other hand, a reorganization of German finances, necessitated largely by reparations demands, will bring with it stability of German currency. As soon as this occurs an internal readjustment will take place in which the internal and the external value of the mark will tend to be equalized. Then the advantage now held by German manufacturers will largely disappear.

Mr. President, I have referred to that for the purpose of getting before the Senate the fact that this advantage derived from the difference in exchange is necessarily a temporary one. As to a great many commodities in Germany now, the German mark is above parity. The price of the goods measured in marks at the international exchange price has risen above the difference in the exchange; or, in other words, while the mark has depreciated in an international sense to the extent of about one sixty-seventh of its former value, the prices as measured in marks in Germany of a great many of these commodities have increased in a greater proportion than the mark has fallen in the international market, and an equilibrium will be found sooner or later. When the lag stops, then the advantage to the exporter from this difference in exchange ceases, and it is ceasing rapidly.

Mr. SMOOT. The Senator will admit, however, that that never can take place until Germany repeals her laws regulating the amount that shall be paid for rent, for food, for clothing, and for labor.

Mr. JONES of New Mexico. That is quite true; and those subsidies, so called, are being removed right along. Transportation costs are increasing in Germany, and as new houses are being built in Germany they are not rented at the pre-war mark prices.

Mr. SMOOT. They are rented the same under the law, because there has been no change in that law, nor will there be any change in the rent schedule until Germany repeals the law.

Mr. JONES of New Mexico. Of Course, the Senator is right about that.

Mr. SMOOT. So it is with labor; so it is with clothing; so it is with food; and so it is with rent.

Mr. JONES of New Mexico. Oh, the Senator knows that those subsidies are being changed right along. The price of bread has increased.

Mr. SMOOT. That depends upon the price that the Government pays for those articles from abroad. If the Senator has read the law, he will know that; and the only reason that they have changed is because of the fact that the price of the commodity itself, or the article that enters into the commodity, has changed in a foreign country, and it is always based upon the value paid, either for the article—in the case of bread, of course, it would be on flour, because the bread is never imported, but the flour is—it is based upon the value that the Government of Germany had to pay in gold for that product. The basis of the law itself has not been changed, but there is the change that I have stated, and, of course, that change applies to all the world in the case of flour, we will say, or wheat, or commodities of that kind.

Mr. JONES of New Mexico. They are changing those prices right along. The cost of food is increasing right along; the whole index of living is increasing right along, and rapidly, by leaps and bounds; and there are only a few things where the Government absolutely fixes the price to the home purchaser. The cost of living in Germany is increasing, as I say, by leaps and bounds, and I shall be glad to give some figures on the subject.

Mr. SMOOT. If that is the case, it has been very recently, Mr. President, because I have a brother-in-law living in Germany now, and I get a letter from him about every month, and he takes particular pains to let me know just how they are living, and also conditions in Germany generally, and the price of goods; and if that is the case, I will say to the Senator it is since I received the last letter.

Mr. JONES of New Mexico. I will give the dates and the figures. Even this periodical which I have here, from the Department of Commerce, does not undertake to come up later than 1921, but in regard to wages themselves, wage earners in the building industry in 1914 received 65 pfennigs per hour. In July, 1921, they received 700 pfennigs per hour, and in December, 1921, 1,300 pfennigs per hour.

I do not mention that for the purpose of contending that they are receiving high wages, but what I do mention it for is to show the enormous increases in marks, in their home money, which are going on. I am not going to contend that the laborers in Germany are receiving high wages, measured in commodities at home or abroad. I do not intend to make that contention; but what I am contending for is that this situation is merely temporary, that it is moving rapidly toward that equilibrium of prices and purchasing power which existed prior to the war.

Mr. SMOOT. It would have to change very rapidly when we find that draftsmen and helpers, assistant photographers, and laboratory assistants are now receiving $6.19 a month. That is about the same as that class of labor receives in the United States in a day, and this is a statement that I have received from our Department of Commerce; and it is so startling in its nature that I do not want to make it public until I have had it checked up, because I can hardly believe that these figures are correct. Therefore, before I make them public, I want the Department of Commerce to recheck every one of them to see that there is not some mistake in them.

Mr. JONES of New Mexico. There is no question but that the wage laborers over there are receiving small wages measured in money and measured in the necessities of life. There is no question about that; but so far as this difference in exchange and in purchasing power is concerned, what I am contending for is that they are rapidly approaching normal conditions.

Here is just what is occurring as to the cost of living:

If we take 100 as the average index basis for the year 1920 we find that in October, 1921, that index number was increased to 184, nearly 100 per cent; but, now, mark the very rapid increases following October, 1921.

In November it increased to 249; in December to 303; in January, 1922, to 320; in February to 352; in March to 435; in April to 525.

That referred to the wholesale prices. The index of retail prices of common commodities in the budget of a family of five, taking 1904 as 100, shows that in October, 1921, it had increased to 1,146; in November to 1,397; in December to 1,550; in January, 1922, to 1,640; in February to 1,989; in March to 2,300.

Mr. SMOOT. Compared with 1914?

Mr. JONES of New Mexico. Compared with 1914.

Mr. SMOOT. Then, to make it equal, instead of 2,300 we would have perhaps 6,800.

Mr. JONES of New Mexico. About 6,700. But the Senator will observe the rapidity with which it is increasing. For instance, since October, 1921, up to March, 1922, it had doubled in those few short months.

We find that some commodities have gone up more than that. That is, the general index cost of living we have been talking about, the cost of living a good many items of which are within the subsidy, and, of course, have not increased as much as commodities that are not governed by a subsidy or controlled by the Government.

Take hematite iron. The pre-war price was 79.50 marks. January 1, 1919, it was 314.5 marks; May 1, 1920, it was 2,350.5 marks; then in May, 1921, it was 1,816 marks; November 1, 1921, it was 2,700 marks; December, 1921, it was 3,891 marks; March 1, 1922, it was 4,744 marks; April 1, 1922, it was 6,264

marks. That 6,264 marks is over pre-war prices 18 per cent, after allowing for the full difference in international exchange.

As to pig iron No. 1, it is 13 per cent above the pre-war price, after making full allowance for the difference in international exchange.

Pig iron No. 2 is 16 per cent above; and when we come to ingots we find they are 30 per cent above; blooms, 33⅓ per cent above; and sheet bars are 26 per cent above. All of those metal commodities have more than recovered the difference in the exchange and reached prices beyond.

The same thing is true in regard to coal. The price of cotton yarn is more than a hundred times its pre-war price. The same may be said of cretonne.

So, Mr. President, these prices are fast finding their levels. Here is the list of prices of building materials. It would be illuminating to show these very rapid increases, but I will not take the time to read them now, but merely ask that they be inserted in the RECORD as a part of my remarks.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. JONES of New Mexico. My purpose in developing this thought to the extent I have done is to show that it can be demonstrated that the duties levied in this bill do not meet the German situation. The cost of labor over there is very low. The prices of the articles cited by the Senator from Connecticut are very low. The Senator from Connecticut will not contend that even the rates proposed by this bill are sufficient to meet the difference in the cost of production in Germany and in the United States. I ask him if he does so contend?

Mr. McLEAN. I stated that the rates which have been recommended by the committee do not equal the difference in the production costs here and abroad. They approximate it, but they do not equal it.

Mr. JONES of New Mexico. Do they even approximate it?

Mr. McLEAN. Yes; as to some of the numbers of knives, they do. The Senator knows that for some reason the prices of these articles have decreased since last August, and I have a report of the wages paid laborers in Germany who are engaged in making these knives. The Senator knows that in the report of the Tariff Commission they say:

> The structure of these knives is complicated, and they are demanded in almost endless variety. In addition, the industry is one requiring highly skilled hand labor which commands higher wages than are paid in Europe. The nature of the product, which largely resists the use of machine processes, renders inapplicable our characteristic advantages in production.

The report which I have, which is dated last month, May 22, states that in the manufacture of these goods the German cutler gets 960 marks per week. From this must be arbitrarily deducted a Government tax of 10 per cent, and in addition 22 marks for health and accident insurance, a total deduction of 118 marks. This makes the net weekly wages of the best grade of German workmen $2.95. That report was made in May.

Mr. JONES of New Mexico. I am quite convinced that if you put it upon the basis of actual cost of production of some of these lines of goods in Germany, these rates will not make that difference, that there is a much greater difference than indicated in some other lines. The Senator indicated prices varying 300 and 400 per cent. These duties proposed do not amount to 300 and 400 per cent.

Mr. McLEAN. We believe, as the Senator from New Mexico believes, that conditions will change somewhat, and for that reason we have not put these duties as high as conditions would require if we wanted to give complete protection. We hope that the German people will be permitted to earn more, and so consume more, and have more than they have now. We want to help them in every way we can, but as long as they are willing to work for "rag" money, we have to protect ourselves in a degree, and hope that the time will come when they will see the folly of doing that, and that the wages will be comparatively increased.

Mr. JONES of New Mexico. Mr. President, it appears that as to some of the goods imported the difference in prices amounts to 300 and 400 per cent. These duties do not amount to that much. Therefore you do not meet the situation by the imposition of even these very high rates of duty.

Mr. McLEAN. If the Senator will offer an amendment raising them, I think he will get some votes on this side of the Chamber.

Mr. JONES of New Mexico. I expected just some such remark as that. My reply is that that is not the remedy at all. We are importing cutlery from England. We are importing it from France. I ask the Senator if the duties proposed by the bill will not be prohibitive so far as England is concerned?

Mr. McLEAN. The Senator must know that under existing conditions any rate that will give adequate protection against Germany and Austria and those central European countries will operate as an embargo against the cheaper grade of goods from England. Of course, there is cutlery which comes from England which people in this country will have no matter what it costs.

Mr. JONES of New Mexico. I think the Senator has made the correct answer.

Mr. KELLOGG. I did not understand the Senator from Connecticut to say that these would operate as an embargo on England.

Mr. McLEAN. On this class of goods. Of course, we can not get complete protection against German goods.

Mr. KELLOGG. What the Senator intended to say was that a duty operating as a complete protection against the Germans would be an embargo.

Mr. McLEAN. Certainly; that is the answer I intended to give.

Mr. KELLOGG. I did not understand the Senator to say that the duties the bill imposes would act as an embargo.

Mr. McLEAN. This cheap ware does not come from England. They make good stuff, and especially in the middle western part of the country. Anybody who wants a Sheffield knife will have it no matter what it costs, and I presume there are jackknives made in England which people will have no matter what they cost.

Mr. JONES of New Mexico. If I understand the Senator, he means that the duties proposed by the committee are sufficient to amount to an embargo against England and France as to most of these goods, but they are not sufficient to give protection against Germany. I think that is an accurate statement of the situation.

Mr. McLEAN. I call attention to the fact that of course these cheap knives are not made in France or England.

Mr. JONES of New Mexico. The Senator is correct about that. As to these cheap goods, they are made only in Germany.

Mr. McLEAN. I think in some of these lines probably the Englishmen would import some goods here, but what we have to do is to protect our manufacturers against the flood of German goods which is coming.

Mr. JONES of New Mexico. Now, Mr. President, let us see whether such a procedure is necessary. Let us see whether it is advisable or not. If there were no other forces at work, these duties would not do that; they would not prevent the flood from Germany; but there are other forces at work which prevent such floods because the flood is not here. It is now three and one-half years after the war, and if there were not other forces at work, the flood would be here, but it is not here. There are other reasons for it.

Germany is prostrate in many ways, the general impression to the contrary notwithstanding. Germany has not been able to produce as much of commodities since the war as she was producing before the war. She is able to produce only about one-half of what she was producing before the war. Her export trade does not begin to reach the pre-war amount. There are forces there at work to prevent this, which regulate this, besides the mere differences in costs. They can not produce at any price any great flood of goods for export.

Mr. McLEAN. The Senator is not now talking about cutlery?

Mr. JONES of New Mexico. I am talking a good deal about cutlery.

Mr. McLEAN. Does not the Senator think that an importation of 1,203,000 dozen exceeds the importations of any year in the history of the country?

Mr. JONES of New Mexico. As to the amount, the Senator is right. I should not have applied it to cutlery alone. What I contend is that they have to import a lot of things about these knives. They have to import the handles and some of the metals that go into the manufacture of the knives. They can not get the coal, they can not get the steel, which they had before. The large importations of knives which have come in since the war doubtless have come largely because the shelves of this country were depleted and there was a greater demand in the country for them. But the Senator knows that Germany is not flooding this country with goods ordinarily. Her exports to this country are not what they were before the war.

Mr. McLEAN. If we undertake to discuss every schedule in the tariff bill when we are discussing each paragraph as we take it up, if the discussion of each paragraph is to involve a discussion of all the other schedules in the bill at the same time, I can imagine it will be some time before the bill passes. Of course, I realize the Senator's purpose in discussing these other matters. That is very evident. He discusses them very well. But he must not expect that members of the committee or Senators on this side of the Chamber will engage in a discussion of all the items in the bill as we come to each schedule or

each paragraph, and in addition to that discuss all the other public questions which are now involved in our legislation and which interest the American people.

Mr. JONES of New Mexico. I can quite understand how the Senator from Connecticut, as well as others, gets very tired of hearing the truth and having it applied to the industrial conditions of the country. I can quite understand that.

However, while I am upon this subject I want to call attention to a statement with reference to the situation. I have a recent statement here which brings these matters up to the end of the first quarter of 1922. The statement has become current. It says:

The bugaboo of the United States being flooded with cheap imports from Germany is one that is not substantiated by the figures. Our imports from Germany in 1913, the last peace year, were $190,000,000. In 1920 those imports had sunk to $89,000,000 and in 1921 to $80,000,000. Meanwhile exports from Germany have recovered. They amounted to $345,000,000 in 1913. They have rebounded to $311,000,000 in 1920 and $372,000,000 in 1921. The volume of exports to Germany in 1921 was less than in 1913—

That is, the volume—

because the 1921 price level was some 50 per cent higher than before the war. This heavy preponderance of exports continued in the first quarter of 1922, when we imported $26,000,000 from Germany and exported $86,000,000 to her.

The writer of the article makes this comment:

The real problem is to get German imports moving to this country in sufficient volume to pay for more of our exports.

I have referred to these general matters merely for the purpose of laying the foundation for what I now have to say. Germany realizes the unusual situation and is trying to provide for it. These prices are not going to be so low in the future as they have been in the past. These prices are increasing right along and the time is here when there is not going to be that great disparity.

Mr. McLEAN. What schedule is the Senator talking about now?

Mr. JONES of New Mexico. I am talking about the cutlery schedule.

Mr. McLEAN. I gave the Senator importations indicating positively that the prices had been cut in two since last August.

Mr. JONES of New Mexico. Mr. President, I have here a statement, a part of which I gave to the Senator earlier in the evening, when I made the statement that as to these cheap knives the pre-war price in 1914 was 42 pfennigs, equivalent to 11¼ cents. On May 10, 1922, the price of the same thing was 45 marks or 16⅛ cents, considerably above the pre-war price. On another item which sold for 92 pfennigs in 1914 or 23 cents, on the same article on May 17, 1922, the price was 85 marks or 31¼ cents as compared with 23 cents in 1914. On another item in 1914 the price was 53 pfennigs or 13 cents in gold, and on May 10, 1922, the price was 22½ marks or 18 cents.

Mr. McLEAN. Has the Senator the April importation of the articles in this paragraph and the prices?

Mr. JONES of New Mexico. I am speaking of articles imported that are covered in this paragraph, and I have given the prices.

Mr. McLEAN. The report shows that in April the imports were 123,327 dozen at a value of $103,000. That is about 70 cents a dozen or 6 cents apiece. If they could make them cheaper before the war than they do now, we ought to raise the rate, because when they get back to normal conditions I do not know where this industry will be.

Mr. JONES of New Mexico. I am trying to get the statement clearly made that the prices are increasing and as to many of them now they are higher in gold than they were prior to the war. A great many importations were made. That would show a very much less price than the actual price. The importers bought their mark at a given price; when goods were delivered the mark had depreciated; but under the law they had to take the imported price as the price measured in the mark; or, in other words, the selling price was given in marks as of that time. It was so many marks.

But I will take another knife covered by this paragraph. By the way, I have a sample of that knife here. That [exhibiting] is a good knife; that is a real knife. The price of that knife before the war was 18 marks, 50 pfennigs. On January 1, 1922, it was increased to 725 marks and 40 pfennigs and, counting the mark at one thirty-sixth hundredths of a cent, would cost $2.61. On March 15 the same knife had advanced to $4.08, and may 5 it had advanced to $5.54. The foreign price is advancing at that rate, measured in dollars.

Mr. President, I want to read an affidavit as to what is happening in Germany. The affidavit was executed here in the District of Columbia and reads as follows:

AFFIDAVIT.

DISTRICT OF COLUMBIA, *ss:*

I, Edward Grafmueller, being first duly sworn, on oath depose and say that I am the vice president of H. Boker & Co., of 101–103 Duane Street, New York, N. Y., and that I am an American manufacturer of cutlery as well as an importer; that the firm of H. Boker & Co. has received a letter from its factory at Solingen, Germany, dated May 20, 1922, in which it is stated that a governmental regulation has just been issued providing that all cutlery goods ordered in marks prior to May 10, 1922, that were taken at firm prices and which have been registered may be billed in marks up to September 1, 1922, after which time all orders are to be filled in dollars only at the advances stated, and that all new orders placed from May 10 on can only be billed in dollars at the advances stated; and that the said firm of H. Boker & Co. has been notified that all cutlery coming from Germany after June 1, 1922, will be billed in dollars at the following rates: Knives (excepting those with pearl handles) and all razors and scissors at 25 per cent above the pre-war prices; pearl knives and all table cutlery at 40 per cent above the pre-war prices; and I further say that I believe the information contained in the said letter to be true to the best of my knowledge and belief.

EDW. GRAFMUELLER.

Sworn to and subscribed before me this 3d day of June, A. D. 1922.

[SEAL.] T. C. MEIDINGER,
Notary Public, District of Columbia.

Mr. President, by fixing the rates which are proposed here the German situation is not met. There is created an embargo to a great extent against England, France, and, by the way, an embargo against Czechoslovakia, which has recently reformed her currency, and prices have mounted so high that the goods can not be imported. The situation in Germany is not met; but there is created an embargo against these other countries.

Now, I ask in all seriousness, are you dealing with this situation in an intelligent and businesslike way? Why not find some other remedy? It is not for me to suggest the remedy, but that which the committee proposes is not the remedy to meet the situation. They are simply doing a botch job of it. They are not meeting the German situation as it exists to-day. They are doing an unfortunate thing, creating an embargo against Germany and France. If that be true—and I am sure that it is true—Germany herself is dealing with the situation and is going to require the goods to be exported and billed out in dollars and in prices 25 per cent above pre-war prices.

It is not necessary to rely entirely upon what Germany has done and is doing, but the committee may find a remedy if they will. They may meet this situation to regulate these prices if they want to do it.

What I insist upon, however, is that the remedy proposed by Senators on the other side of the Chamber is futile. It not only does not accomplish what it is sought to accomplish but it will be disastrous to trade between this country and England and France. It is admitted that there will be an embargo on these commodities which meet competition in the American market, although some few articles, as has been stated, will come in from England regardless of price.

However, Mr. President, I think we had better take one step at a time, and therefore I should like to have a vote upon my amendment regarding the cheaper knives.

Mr. JONES of New Mexico. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. LADD in the chair). The Secretary will call the roll.

The roll was called, and the following Senators answered to their names:

Ball	Heflin	McKinley	Smith
Brandegee	Jones, N. Mex.	McLean	Smoot
Bursum	Jones, Wash.	McNary	Spencer
Calder	Kellogg	Newberry	Sterling
Capper	Kendrick	Oddie	Sutherland
Curtis	Keyes	Overman	Townsend
Dial	King	Pepper	Underwood
Elkins	Ladd	Phipps	Warren
Gooding	La Follette	Robinson	Watson, Ind.
Hale	Lenroot	Sheppard	Willis
Harris	McCormick	Shortridge	
Harrison	McCumber	Simmons	

Mr. HARRISON. Mr. President, a parliamentary inquiry. What is before the Senate?

The PRESIDING OFFICER. A call for a quorum.

Mr. HARRISON. I call for the regular order.

The PRESIDING OFFICER. Forty-six Senators having answered to their names, there is not a quorum present. The Secretary will call the names of the absentees.

The reading clerk called the names of the absent Senators and Mr. RAWSON answered to his name when called.

Mr. NICHOLSON entered the Chamber and answered to his name.

Mr. KING. Regular order, Mr. President.

The PRESIDING OFFICER. Forty-eight Senators having answered to their names, a quorum is not present.

Mr. McCUMBER. I move that the Sergeant at Arms be directed to procure the presence of absent Senators.

The motion was agreed to.

The PRESIDING OFFICER. The Sergeant at Arms is directed to request the attendance of absent Senators.

Mr. WALSH of Massachusetts and Mr. FRANCE entered the Chamber and answered to their names.

The PRESIDING OFFICER. Fifty Senators having answered to their names, a quorum is present. The question is on the amendment offered by the Senator from New Mexico to the amendment of the committee.

Mr. JONES of New Mexico. Mr. President, I want to say just a word. My motion is to strike out the specific duty of 2 cents each on these boys' knives. If it remains, it will prohibit the importation of these knives. I may add that there are none of such knives produced in this country.

On my amendment I ask for the yeas and nays.

The yeas and nays were ordered.

Mr. CALDER. May the amendment be stated, please?

The PRESIDING OFFICER. The Secretary will state the amendment of the Senator from New Mexico to the amendment of the committee.

The READING CLERK. On page 72, line 12, the Senator from New Mexico proposes to strike out "2 cents each and," so that if amended it will read:

Valued at not more than 40 cents per dozen, 60 per cent ad valorem—

And so forth.

The PRESIDING OFFICER. The Secretary will call the roll.

The reading clerk proceeded to call the roll.

Mr. HALE (when his name was called). Making the same announcement as before, I vote "nay."

Mr. JONES of Washington (when his name was called). The senior Senator from Virginia [Mr. SWANSON] is necessarily absent. I have a pair with him for the evening, but I find that I can transfer my pair to the Senator from Arizona [Mr. CAMERON]; and I do so, and vote. I vote "nay."

Mr. McKINLEY (when his name was called). I transfer my pair with the Senator from Arkansas [Mr. CARAWAY] to the Senator from Minnesota [Mr. NELSON] and will vote. I vote "nay."

Mr. UNDERWOOD (when his name was called). I transfer my general pair with the Senator from Massachusetts [Mr. LODGE] to the Senator from Rhode Island [Mr. GERRY] and will vote. I vote "yea."

The roll call was concluded.

Mr. BALL. I transfer my general pair with the senior Senator from Florida [Mr. FLETCHER] to my colleague [Mr. DU PONT] and will vote. I vote "nay."

Mr. WATSON of Indiana. I transfer my general pair with the senior Senator from Mississippi [Mr. WILLIAMS] to the junior Senator from Oklahoma [Mr. HARRELD] and will vote. I vote "nay."

Mr. STANLEY. I transfer my pair with my colleague [Mr. ERNST] to the Senator from Texas [Mr. CULBERSON] and will vote. I vote "yea."

Mr. McCUMBER (after having voted in the negative). I should like to inquire whether the junior Senator from Utah [Mr. KING] has voted?

The PRESIDING OFFICER. He has not.

Mr. McCUMBER. I have a general pair with that Senator, which I transfer to the senior Senator from New York [Mr. WADSWORTH] and will let my vote stand.

Mr. CURTIS. I have been requested to announce the following pairs:

The Senator from Vermont [Mr. DILLINGHAM] with the Senator from Virginia [Mr. GLASS];

The Senator from Rhode Island [Mr. COLT] with the Senator from Florida [Mr. TRAMMELL];

The Senator from Indiana [Mr. NEW] with the Senator from Tennessee [Mr. McKELLAR];

The Senator from New Jersey [Mr. EDGE] with the Senator from Oklahoma [Mr. OWEN]; and

The Senator from New Jersey [Mr. FRELINGHUYSEN] with the Senator from Montana [Mr. WALSH].

The result was announced—yeas 15, nays 36, as follows:

YEAS—15.

Ashurst	Jones, N. Mex.	Robinson	Stanley
Dial	La Follette	Sheppard	Underwood
Harris	Overman	Simmons	Walsh, Mass.
Harrison	Pomerene	Smith	

NAYS—36.

Ball	Capper	Gooding	Kendrick
Brandegee	Curtis	Hale	Keyes
Bursum	Elkins	Jones, Wash.	Ladd
Calder	France	Kellogg	Lenroot
McCormick	Newberry	Rawson	Sutherland
McCumber	Nicholson	Shortridge	Townsend
McKinley	Oddie	Smoot	Warren
McLean	Pepper	Spencer	Watson, Ind.
McNary	Phipps	Sterling	Willis

NOT VOTING—45.

Borah	Fernald	Moses	Shields
Broussard	Fletcher	Myers	Stanfield
Cameron	Frelinghuysen	Nelson	Swanson
Caraway	Gerry	New	Trammell
Colt	Glass	Norbeck	Wadsworth
Crow	Harreld	Norris	Walsh, Mont.
Culberson	Heflin	Owen	Watson, Ga.
Cummins	Hitchcock	Page	Weller
Dillingham	Johnson	Pittman	Williams
du Pont	King	Poindexter	
Edge	Lodge	Ransdell	
Ernst	McKellar	Reed	

So the amendment of Mr. JONES of New Mexico to the amendment of the committee was rejected.

Mr. JONES of New Mexico. On line 14, page 72, I move to strike out the words "5 cents each and." That relates to knives which cost more than 40 cents a dozen but not more than 50 cents a dozen. The duty proposed to be put upon such knives is 5 cents each, which would be 60 cents a dozen and 60 per cent. Upon this amendment to the amendment I ask for the yeas and nays.

The yeas and nays were ordered, and the reading clerk proceeded to call the roll.

Mr. BALL (when his name was called). Making the same announcement as to the transfer of my pair as before, I vote "nay."

Mr. HALE (when his name was called). Making the same announcement as before, I vote "nay."

Mr. McCUMBER (when his name was called). Making the same announcement as to the transfer of my pair as on the previous vote, I vote "nay."

Mr. McKINLEY (when his name was called). Making the same announcement as before, I vote "nay."

Mr. STANLEY (when his name was called). Making the same announcement as before, I vote "yea."

Mr. WATSON of Indiana (when his name was called). Making the same announcement as before, I vote "nay."

The roll call was concluded.

Mr. CURTIS. I desire to announce the following pairs:

The Senator from Rhode Island [Mr. COLT] with the Senator from Florida [Mr. TRAMMELL];

The Senator from Vermont [Mr. DILLINGHAM] with the Senator from Virginia [Mr. GLASS];

The Senator from New Jersey [Mr. EDGE] with the Senator from Oklahoma [Mr. OWEN];

The Senator from New Jersey [Mr. FRELINGHUYSEN] with the Senator from Montana [Mr. WALSH]; and

The Senator from Indiana [Mr. NEW] with the Senator from Tennessee [Mr. McKELLAR].

Mr. JONES of Washington. Making the same announcement as before with reference to my pair and its transfer, I vote "nay."

Mr. UNDERWOOD. I transfer my pair with the senior Senator from Massachusetts [Mr. LODGE] to the junior Senator from Rhode Island [Mr. GERRY] and vote "yea."

The result was announced—yeas 16, nays 36, as follows:

YEAS—16

Ashurst	Heflin	Pomerene	Smith
Dial	Jones, N. Mex.	Robinson	Stanley
Harris	La Follette	Sheppard	Underwood
Harrison	Overman	Simmons	Walsh, Mass.

NAYS—36.

Ball	Hale	McKinley	Shortridge
Brandegee	Jones, Wash.	McLean	Smoot
Bursum	Kellogg	McNary	Spencer
Calder	Kendrick	Newberry	Sterling
Capper	Keyes	Nicholson	Sutherland
Curtis	Ladd	Oddie	Townsend
Elkins	Lenroot	Pepper	Warren
France	McCormick	Phipps	Watson, Ind.
Gooding	McCumber	Rawson	Willis

NOT VOTING—44.

Borah	Ernst	McKellar	Ransdell
Broussard	Fernald	Moses	Reed
Cameron	Fletcher	Myers	Shields
Caraway	Frelinghuysen	Nelson	Stanfield
Colt	Gerry	New	Swanson
Crow	Glass	Norbeck	Trammell
Culberson	Harreld	Norris	Wadsworth
Cummins	Hitchcock	Owen	Walsh, Mont.
Dillingham	Johnson	Page	Watson, Ga.
du Pont	King	Pittman	Weller
Edge	Lodge	Poindexter	Williams

So the amendment of Mr. JONES of New Mexico to the committee amendment was rejected.

Mr. JONES of New Mexico. On line 16, page 72, I move to strike out the words "12 cents each and." This is the rate fixed on knives valued at more than 50 cents and not more than

$1.25. The committee proposes to fix a duty of 12 cents each and 60 per cent ad valorem. I move to strike out the words "12 cents each and."

The amendment to the amendment was rejected.

Mr. JONES of New Mexico. On lines 17 and 18, beginning with the numeral "20," I move to strike out "20 cents each and," so as to leave the 60 per cent ad valorem duty. That is the rate upon knives valued at more than $1.25 and not more than $3 per dozen.

The amendment to the amendment was rejected.

Mr. JONES of New Mexico. On line 21 I move to strike out "40 cents each and," and I wish to make just this statement: That involves what is known as stockmen's knives. It is one of the best of the imported knives, and at the present price the duty will be absolutely prohibitive. The cost of this knife at the present time, with the present duty, is about $9 a dozen. If you add to that the profit which must be made by the dealers it brings it up above the present American price. It is proposed to make the duty 40 cents each and 60 per cent ad valorem.

I am addressing myself especially to those who are interested in the stockmen of the country when I call attention to this item. It is the regular stockmen's knife, which is used all over the West, and which comes in now at a duty of 55 per cent ad valorem. The committee proposes to put a specific duty of 40 cents each on this article, and to make the ad valorem 60 per cent. I move to strike out "40 cents each and," and upon that I ask for the yeas and nays.

The yeas and nays were ordered, and the reading clerk proceeded to call the roll.

Mr. HALE (when his name was called). Making the same announcement as before, I vote "nay."

Mr. JONES of Washington (when his name was called). Making the same announcement as before with reference to my pair and its transfer, I vote "nay."

Mr. McCUMBER (when his name was called). Making the same announcement as before, I vote "nay."

Mr. McKINLEY (when his name was called). Making the same announcement as before, I vote "nay."

Mr. WATSON of Indiana (when his name was called). Making the same announcement as before, I vote "nay."

The roll call was concluded.

Mr. CURTIS. I desire to announce the following pairs:

The Senator from Rhode Island [Mr. COLT] with the Senator from Florida [Mr. TRAMMELL];

The Senator from Vermont [Mr. DILLINGHAM] with the Senator from Virginia [Mr. GLASS];

The Senator from New Jersey [Mr. EDGE] with the Senator from Oklahoma [Mr. OWEN];

The Senator from New Jersey [Mr. FRELINGHUYSEN] with the Senator from Montana [Mr. WALSH]; and

The Senator from Indiana [Mr. NEW] with the Senator from Tennessee [Mr. McKELLAR].

Mr. UNDERWOOD. I transfer my general pair with the senior Senator from Massachusetts [Mr. LODGE] to the junior Senator from Rhode Island [Mr. GERRY] and vote "yea."

Mr. BALL. Making the same announcement as before as to my pair and its transfer, I vote "nay."

The result was announced—yeas 15, nays 34, as follows:

YEAS—15.

Ashurst	Heflin	Pomerene	Smith
Dial	Jones, N. Mex.	Robinson	Underwood
Harris	La Follette	Sheppard	Walsh, Mass.
Harrison	Overman	Simmons	

NAYS—34.

Ball	Jones, Wash.	McNary	Spencer
Brandegee	Kellogg	Newberry	Sterling
Bursum	Kendrick	Nicholson	Sutherland
Capper	Keyes	Oddie	Townsend
Curtis	Ladd	Pepper	Warren
Elkins	McCormick	Phipps	Watson, Ind.
France	McCumber	Rawson	Willis
Gooding	McKinley	Shortridge	
Hale	McLean	Smoot	

NOT VOTING—47.

Borah	Ernst	McKellar	Reed
Broussard	Fernald	Moses	Shields
Calder	Fletcher	Myers	Stanfield
Cameron	Frelinghuysen	Nelson	Stanley
Caraway	Gerry	New	Swanson
Colt	Glass	Norbeck	Trammell
Crow	Harreld	Norris	Wadsworth
Culberson	Hitchcock	Owen	Walsh, Mont.
Cummins	Johnson	Page	Watson, Ga.
Dillingham	King	Pittman	Weller
du Pont	Lenroot	Poindexter	Williams
Edge	Lodge	Ransdell	

So the amendment of Mr. JONES of New Mexico to the committee amendment was rejected.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment as amended.

The amendment as amended was agreed to.

The PRESIDING OFFICER. The next amendment will be stated.

The READING CLERK. On page 73, line 2, the committee proposes to strike out "40" and insert "60," so as to read:

Cuticle knives, corn knives, nail files, tweezers, hand forceps, and parts thereof, finished or unfinished, by whatever name known, 60 per cent ad valorem.

Mr. JONES of New Mexico. Mr. President, I do not care to discuss the items covered by this amendment any further than to say that it relates to articles used generally—nail files, tweezers, hand forceps, and parts thereof, finished or unfinished. The House proposes a 40 per cent ad valorem rate. I shall simply content myself by voting against the committee amendment.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment.

The amendment was agreed to.

The next amendment of the committee was, on page 73, line 8, to strike out "35" and insert "60," and in line 10, after the word "maker," to insert the words "or purchaser," so as to make the provisos read:

Provided, That any of the foregoing, if imported in the condition of assembled, but not fully finished, shall be dutiable at not less than the rate of duty herein imposed upon fully finished articles of the same material and quality, but not less in any case than 15 cents each and 60 per cent ad valorem: *Provided further*, That all the articles specified in this paragraph, when imported, shall have the name of the maker or purchaser and beneath the same the name of the country of origin die sunk conspicuously and indelibly on the shank or tang of at least one or, if practicable, each and every blade thereof.

The amendment was agreed to.

The next amendment of the committee was, on page 73, line 18, after the word "artists," to strike out the word "shoe" and insert the word "shoe" and a comma.

The amendment was agreed to.

The next amendment was, on the same page, in line 21, to strike out the words "or without," and in line 23 to strike out the numerals "16" and insert in lieu thereof "or without handles of any kind, 20," so as to read:

PAR. 355. Table, butchers', carving, cooks', hunting, kitchen, bread, cake, pie, slicing, cigar, butter, vegetable, fruit, cheese, canning, fish, carpenters' bench, curriers', drawing, farriers', fleshing, hay, sugar-beet, beet-topping, tanners', plumbers', painters', palette, artists', shoe, and similar knives, forks, and steels, and cleavers, all the foregoing, finished or unfinished, not specially provided for, with handles of mother-of-pearl, shell, ivory, deer, or other animal horn, silver, nickel silver, or other metal than iron or steel, or without handles of any kind, 20 cents each.

The amendment was agreed to.

The next amendment was on page 73, line 25, to strike out the numeral "8" and insert in lieu thereof the numeral "10," so as to read:

With handles of hard rubber, solid bone, celluloid, or any pyroxylin, casein, or similar material, 10 cents.

Mr. McLEAN. Before going to that amendment the committee desires to offer an amendment on page 73, in line 24, after the word "each," to insert "and 45 per cent ad valorem." I will say that on this item and the next four or five items the ad valorem is 55 per cent, and the purpose of the amendment is to reduce the ad valorem from 55 per cent to 45 per cent.

The PRESIDING OFFICER. The amendment will be stated.

The READING CLERK. On page 73, line 24, after the word "each" and before the semicolon, insert "and 45 per cent ad valorem," so as to read:

PAR. 355. Table, butchers', carving, cooks', hunting, kitchen, bread, cake, pie, slicing, cigar, butter, vegetable, fruit, cheese canning, fish, carpenters' bench, curriers', drawing, farriers', fleshing, hay, sugar-beet, beet-topping, tanners', plumbers', painters', palette, artists', shoe, and similar knives, forks, and steels, and cleavers, all the foregoing, finished or unfinished, not specially provided for, with handles of mother-of-pearl, shell, ivory, deer or other animal horn, silver, nickel silver, or other metal than iron or steel, or without handles of any kind, 20 cents each and 45 per cent ad valorem.

Mr. JONES of New Mexico. Mr. President, I desire to say just a word about this paragraph.

Mr. McLEAN. Will the Senator permit us to act on this amendment, so that we may know just what the committee has in mind?

Mr. JONES of New Mexico. I simply want to make a statement about this paragraph and what it relates to. I did not understand that the "20 cents each" related to all of these articles, or, rather, I did not understand that it was a committee amendment. I did not understand that the amendment inserting the numerals "20" was a committee amendment and that is the reason why I did not propose an amendment at that point. There is nothing here to indicate that it is a committee amendment. It did not appear so to me.

I want to call attention to the fact that this relates to cutlery of different kinds, to knives such as table, butcher, carving, cooks', hunting, kitchen, bread, cake, pie, slicing, cigar, butter, vegetable, fruit, cheese, canning, fish, carpenters' bench, curriers', drawing, farriers', fleshing, hay, sugar-beet, beet-topping, tanners', plumbers', painters', palette, artists', shoe, and similar

knives, forks, and steels, and cleavers, finished or unfinished, not specially provided for, with handles of mother-of-pearl, shell, ivory, deer, or other animal horn, silver, nickel silver, or other metal than iron or steel, or without handles of any kind. A tariff of 20 cents each is to be imposed upon all of these and now it is proposed to add "and 45 per cent ad valorem."

I supposed the committee had interpreted the paragraph to mean that on the next page the 55 per cent ad valorem would relate back to all of the various items which I have mentioned. I wish to make the statement that this relates to steel table cutlery and kitchen cutlery, the cheap steel cutlery that is used in every household, and with or without any handle, on which they are proposing to place a duty of 20 cents each—on each knife, each fork, a specific duty of 20 cents and an ad valorem duty of 45 per cent.

Mr. SIMMONS. Mr. President, I would like to inquire of the Senator if he can tell the Senate the equivalent ad valorem of this compound duty?

Mr. JONES of New Mexico. It varies, of course.

Mr. SIMMONS. The Senator just spoke of 20 cents specific plus an ad valorem rate of 45 per cent. Can the Senator tell us the ad valorem equivalent of that compound duty?

Mr. JONES of New Mexico. I do not know. It would vary as the prices of the knives vary. Some of them, of course, are very cheap, and the rate must be two or three or four hundred per cent on some of them.

Mr. SIMMONS. If the Senator will pardon me, it is very difficult for Senators to understand and appreciate the extent of this duty when it is expressed partly in a specific rate and partly in an ad valorem rate. If it could be expressed in the ad valorem equivalent, we could have a better conception of the size of the duty.

If the Senator from New Mexico will permit me in his time, I would like to ask whoever on the other side is in charge of this item—I presume the Senator from Connecticut [Mr. McLEAN]—if he can furnish the Senate information as to the ad valorem equivalent of the compound rate which the Senator from New Mexico has just referred to, namely, 20 cents specific plus 45 per cent ad valorem?

Mr. McLEAN. It is about 110 per cent. Of course, that applies to butcher knives. The report shows that on No. 7906 the landed cost was $6.30 a dozen and the domestic selling price of the American article $14.25 a dozen, which would require 126 per cent to equal the difference.

Mr. SIMMONS. But that is not the question I asked the Senator. I asked the ad valorem equivalent of the compound duty imposed upon the foreign product.

Mr. McLEAN. There are a great many products included in the paragraph.

Mr. SIMMONS. But all the products included in the section of the paragraph which the Senator from New Mexico read a little while ago are subject to one rate of duty, namely, 20 cents specific plus 45 per cent ad valorem. That is a matter which might be worked out by the experts very quickly. I presume the Senator has the foreign price. What is the ad valorem equivalent of the two duties combined applied to the foreign price?

Mr. McLEAN. On each article it would differ. To what particular item does the Senator refer?

Mr. SIMMONS. The Senator from New Mexico just read the items. I will ask the Senator from New Mexico to which particular item he referred?

Mr. JONES of New Mexico. Ordinary table steel knives and kitchen knives and forks.

Mr. McLEAN. It depends on the length of the knife and handle and all the items which enter into the value. If the Senator will give me any particular knife, we can figure it out for him.

Mr. JONES of New Mexico. Take just a common steel knife without any handle. The Senator proposes to put a duty on those of 20 cents each and 45 per cent ad valorem.

Mr. McLEAN. I do not think those are covered by this part of the paragraph.

The PRESIDING OFFICER (Mr. GOODING in the chair). The question is on the amendment offered by the Senator from Connecticut [Mr. McLEAN] on behalf of the committee to the committee amendment.

Mr. KING. Mr. President, I hope the Senator from Connecticut will respond to the inquiry of the Senator from North Carolina [Mr. SIMMONS] and tell us the equivalent ad valorem of the compound rate which is provided in the paragraph under consideration. The Senator from New Mexico [Mr. JONES] asked the Senator from Connecticut to give the equivalent of the compound rate upon the ordinary table knife. Take the ordinary table knife that costs in the foreign market 10 cents or 15 cents, what would be the rate on that? Obviously, of course, it would be from 200 to 250 per cent.

Mr. McLEAN. It would depend on the foreign value on which the rate is based. If the Senator from Utah can identify any knife here, and the foreign value, the equivalent ad valorem may very easily be estimated.

Mr. KING. May I say to the Senator that if I properly comprehend this paragraph it embraces not only butcher knives and hunting knives and carving knives but also the ordinary table knife and the ordinary fork, no matter how unimportant and how cheap and how inconsequential they may be. A fork costing 10 cents or 5 cents would have to pay a 20-cent specific duty, which, if it costs 5 cents, would be a 400 per cent duty. Then, in addition to that, it would have to pay 45 per cent ad valorem. Does the Senator mean to justify a rate of that character?

Mr. McLEAN. On an 8-cent knife the rate would be 70 per cent ad valorem.

Mr. KING. On an 8-cent knife a duty of 20 cents would be more than 200 per cent ad valorem. The Senator's adviser is wrong.

If the Senator will pardon me, it is obvious that the knife that sold for 8 cents under a specific duty of 20 cents would carry more than a 200 per cent ad valorem duty.

Mr. McLEAN. I do not think this paragraph includes the kind of a knife about which the Senator from Utah is talking.

Mr. KING. It does not differentiate. It says "knives."

Mr. McLEAN. But it says "with handles of mother-of-pearl, shell, ivory, deer or other animal horn, silver, nickel silver, or other metal than iron or steel."

Mr. KING. It also says "or without handles of any kind."

Mr. McLEAN. Yes.

Mr. KING. The Senator knows that many ordinary table knives and forks would come within the description which he has just read. If the Senator intends to exclude the ordinary table knife and table fork, then certainly it will be necessary to have an amendment, because the language now is sufficiently comprehensive to include them.

Mr. McLEAN. On page 74 the other variety of knife is described definitely and specifically. The clause reads:

With handles of any other material, if less than 4 inches in length, exclusive of handle, 3 cents each; if 4 inches in length or over, exclusive of handle, 10 cents each.

Mr. UNDERWOOD. Mr. President, I have not in mind the details of this particular proposal with reference to knives, but I desire to say that this is the first time I have ever seen a tariff bill come before either branch of Congress where a compound duty was levied and the committee in charge had not worked out the equivalent ad valorem rate. I do not know whether the committee really is ashamed to tell us how high the rate is or whether they do not know; but I think the Senate is entitled to that information. I know it was customary when I assisted in writing tariff bills to have the calculations worked out so as to be able to tell with definiteness the equivalent ad valorem of a compound rate. We have not yet obtained that information in this case, and I think the Senator in charge of the bill should pass this paragraph over until he may obtain the information and advise the Senate so that we may vote intelligently on the subject.

Mr. SMOOT. Mr. President——

The PRESIDING OFFICER. Does the Senator from Alabama yield to the Senator from Utah?

Mr. UNDERWOOD. I yield.

Mr. SMOOT. Mr. President, the Senator from New Mexico [Mr. JONES] is mistaken when he thinks that this clause providing for a specific duty of "20 cents each" refers to common, ordinary table knives. Such knives fall in a succeeding clause, where the duty is "3 cents each," which will be changed to 2 cents.

The bracket now being considered covers knives "not specially provided for, with handles of mother-of-pearl, shell, ivory, deer, or other animal horn, silver, nickel silver, or other metal than iron or steel."

Mr. LA FOLLETTE. "Or without handles of any kind."

Mr. SMITH. "Or without handles of any kind." None of the knives which the Senator has described would be included in the phrase "without handles of any kind."

Mr. SMOOT. The phrase "handles of any kind" means handles of other metal or wood or animal horn. Just preceding the words referred to, the clause reads "or other metal than iron or steel."

The ordinary knife and fork that are being talked about fall within the next item, which reads:

with handles of any other material, if less than 4 inches in length, exclusive of handle, 3 cents each; if 4 inches in length or over, exclusive of handle, 10 cents each; and in addition thereto, on all of the foregoing, 45 per cent ad valorem.

Mr. LA FOLLETTE. The bill says 55 per cent.

Mr. SMOOT. I put it the way the committee intends to amend it. That is the item under which the knives referred to would come.

Mr. JONES of New Mexico. That refers to any kind of steel table knife. It would cover the ordinary camp knife, which can be bought by the dozen.

Mr. SMOOT. What refers to that?

Mr. JONES of New Mexico. This paragraph here.

Mr. SMOOT. Not the clause providing a duty of 20 cents each.

Mr. JONES of New Mexico. Why not?

Mr. SMOOT. Because it says that it does not. It says "or other metal than iron or steel."

Mr. JONES of New Mexico. Those words relate to the handle. I do not see how the Senator can give any other interpretation to them.

Mr. SMOOT. I do not see how the Senator can give the interpretation which he gives.

Mr. JONES of New Mexico. That is what it says.

Mr. SMOOT. Of course, all knives have steel blades, but the clause only applies to steel blades "with handles of mother-of-pearl, steel, ivory, deer, or other animal horn, silver, nickel silver, or other metal than iron or steel."

Mr. JONES of New Mexico. Then the words are added "or without handles of any kind."

The Senator can not get any other interpretation from it. The truth of it is the committee has made a mistake in inserting there the words "or without handles of any kind." That is where the mistake has been made. The Senator from Utah never intended any such result as that, but that is the effect of the provision if it is left in there.

Mr. SMOOT. The provision was put in, I think, on the recommendation of one of the examiners from New York, and if the Senator will wait for just a moment I will look it up and see if the provision should come here or in a succeeding clause.

Mr. McLEAN. Of course, a knife without a handle does not go into domestic use. They are imported in that form, and the handles are put on in this country.

Mr. UNDERWOOD. It seems to me that until the committee can definitely inform the Senate what this paragraph means we ought to take a recess to-night and give them an opportunity to prepare themselves, so that to-morrow morning we may ascertain exactly what is proposed to the Senate. We can not find out what the language means and we can not find out what the equivalent ad valorem rate is, and certainly the Senate is not prepared to vote on this paragraph at this time.

Mr. SMOOT. I thought I had with me a table of the ad valorem rates of each one of the brackets, but, as I had not intended to discuss the paragraph, I find I have it not with me. There are, however, a number of other items which we may consider.

Mr. POMERENE. Mr. President, let me put a question to the Senator from another viewpoint. Here are two or three dozen different articles, including table, butchers', carving, cooks', hunting, kitchen, bread, cake, pie, slicing, cigar, butter, vegetable, fruit, cheese, canning, fish, and other knives. From the standpoint of price, what articles are included? Does the bracket cover knives that are worth 10 cents apiece or $10 apiece? There is a specific duty imposed of 20 cents each and then an ad valorem duty. Twenty cents apiece in the case of $10 knives would not amount to anything, whereas in the case of 10-cent knives 20 cents apiece would amount to a great deal; in fact, it would amount to 200 per cent.

Mr. SMOOT. That is true, but there are no 10-cent knives with the kind of handles which are described.

Mr. POMERENE. I do not know as to that.

Mr. SMOOT. I know.

Mr. POMERENE. I do not know why the Senator should insist on making that statement, when the language of the amendment is "or without handles of any kind." It refers to certain kinds of handles and then says, "other than iron or steel." There might be a corncob handle, for that matter.

Mr. SMOOT. It does not say that at all. The only question——

Mr. POMERENE. The handle could be of corncob so far as this language is concerned.

Mr. SMOOT. A knife with a corncob handle would not fall under this bracket.

Mr. POMERENE. Why does the Senator say that? The language would include such a knife.

Mr. SMOOT. What language, I will ask the Senator?

Mr. POMERENE. The language of the text. I do not know tariff bills, but I know the English language, I think.

Mr. SMOOT. If the Senator will tell me to what he has reference then I will endeavor to tell him whether the language means what he thinks or not.

Mr. POMERENE. This paragraph describes a very large number of articles of various kinds, of knives and forks, and so forth. Then it describes the handles in this language:

> With handles of mother-of-pearl, shell, ivory, deer or other animal horn, silver, nickel silver, or other metal than iron or steel, or without handles of any kind.

And a specific duty of 20 cents each is imposed.

Mr. SMOOT. I will say to the Senator that the only question there may be is as to the amendment to which reference has been made, and I shall ask that that be looked into. I have not paid any especial attention to this paragraph, and it may be that the amendment suggested relates to the cheaper grade of knives. As to those, however, the ad valorem rate would apply, and a duty of 2 cents or 3 cents each would not make so much difference, while a duty of 20 cents each would make a considerable difference.

Mr. POMERENE. I think the discussion demonstrates conclusively that the proponents of this paragraph do not understand what it means.

Mr. SMOOT. The Senator can draw his own conclusion about that.

Mr. POMERENE. I think everybody has drawn that conclusion.

Mr. UNDERWOOD. Mr. President, it seems very clear that this section does not refer to mother-of-pearl knives only. It starts out by saying:

> Table, butchers', carving, cooks', hunting, kitchen—

And then goes on with a whole lot of other knives—

> with handles * * * or without handles, * * * 20 cents each.

And then it adds the ad valorem of 55 per cent.

Mr. SMITH. Mr. President, if the Senator from Alabama will allow me, it says "finished or unfinished" before it gets down to the question of handles.

Mr. SMOOT. That is the same as the existing law.

Mr. SMITH. I am just saying that it includes all kinds of knives, and says "with handles" of a certain kind, or without any handles at all, "finished or unfinished," 20 cents each.

Mr. SMOOT. In that case they would simply leave out about one rivet and it would not be finished, and all they would have to do would be to put a rivet in a handle to finish it. That has always been the case, and the Senator from Alabama would not object to that.

Mr. UNDERWOOD. I am not objecting to the words "finished or unfinished"——

Mr. SMOOT. No; of course the Senator is not.

Mr. UNDERWOOD. But what I am trying to find out is what the section means. I never heard of a kitchen knife without a handle, and yet this provides for taxing kitchen knives without handles 20 cents each.

Mr. SMOOT. I will say that kitchen knives have been shipped over here without handles.

Mr. SIMMONS. Mr. President, the Senator from Alabama overlooks the fact that later in the same paragraph, after these specific rates, 20 cents in some cases and 10 cents in other cases, there is this:

> And in addition thereto, on all of the foregoing, 55 per cent ad valorem.

Mr. SMOOT. Oh, no; he did not overlook that.

Mr. UNDERWOOD. No; I called that to the Senator's attention; but for an ordinary kitchen knife a 20-cent tax is some tax, because you can buy them at a 10-cent store.

Mr. SMOOT. But the ordinary kitchen knife does not fall under this language.

Mr. McCUMBER. Mr. President——

The PRESIDING OFFICER. Does the Senator from Alabama yield to the Senator from North Dakota?

Mr. UNDERWOOD. I yield. I will yield the floor if the Senator desires.

Mr. McCUMBER. No; it is not necessary. The Senator has just stated that he had never heard of a kitchen knife coming in without a handle.

Mr. UNDERWOOD. I said that I had never heard of a kitchen knife without a handle when it was in reality a kitchen knife.

Mr. McCUMBER. They are shipped in without handles.

Mr. UNDERWOOD. I realize that many knives are shipped in without handles.

Mr. McCUMBER. In 1921, in nine months, there were 13,249, of a value of $18,221, that were shipped in without handles.

I am perfectly free to say to the Senator from Alabama that I think he is right in stating that this is not very clearly expressed and that those who have reported this bill did not clearly understand just what this language "or without handles of any kind" might be construed to mean.

Under this head we have the more expensive knives. They are often shipped in, and then the pearl handles or the silver handles are perhaps made in this country and are attached; and the idea was to put the duty upon those which were shipped in which were of a better quality, of course, the expensive knives that are used in this country. They come in quite extensively, too; but there is no question in my mind, after reading the matter over again, that the way it is written it would apply, as suggested by the Senator, to a 3-cent kitchen knife as well as it would to a very expensive one; and for that reason I suggest that we pass over that one particular amendment.

Mr. SMOOT. Why does not the Senator move to disagree to the amendment and ask that the Senate reject it?

Mr. McCUMBER. I want some kind of a duty upon the blades that come in without handles.

Mr. SMOOT. But it says "finished or unfinished."

Mr. McCUMBER. And as we have not taken care of it in the rest of the paragraph I suggest that we allow the matter to go over, and we will place that kind of a paragraph or something that will cover it at the end of the paragraph on the next page.

Mr. SMOOT. I call the Senator's attention to the fact that this says "finished or unfinished"; so that with the striking out of those words, "or without handles of any kind," then the specific duty and the ad valorem are provided, and it would be covered whether it was finished or whether it was unfinished. Of course the Senator from Alabama knows that that language must be used, because if it were not used they could simply, as I say, leave one little rivet out of the handle and it would not be dutiable.

Mr. UNDERWOOD. The Senator from Utah is clearly right. When you use the words "finished or unfinished" of course there is no necessity for putting in this paragraph the language, "or without handles of any kind," because if they are without handles of any kind they are unfinished; but that is not really the main thing that concerns me about this paragraph. I was satisfied that the committee had made a mistake in writing the paragraph, but what I am interested in and what I think the Senate is entitled to information about is what is the average run of the rates of duty that are carried in this paragraph.

Of course I know that there are some high-class knives where the rate of duty will be low, and there are some very common kinds of knives where I guess—I have not the information, but I must assume—that the rate of duty is going to be tremendous; and I think the committee, on an item as important as this is, ought to furnish the Senate with a statement showing the range. We do not ask for every knife, but there must be some high-class knives that come in here, and some very cheap knives; and we certainly are entitled to know what the compound rate of duty amounts to in ad valorem terms on the common knives and what it amounts to on the high-class knives.

Mr. McCUMBER. Mr. President, if the Senator will allow me; first, I will correct the error of both the Senator from Alabama and the Senator from Utah in assuming that if we will strike out the words "or without handles of any kind," we will meet the situation; and then I will give the Senator the information as to some of the equivalent ad valorem duties on the values that we have.

Mr. UNDERWOOD. That is really the important proposition.

Mr. McCUMBER. Let us take the first one, because I wish also to satisfy the Senator from Utah that we do not meet the situation by merely disagreeing with the proposition of the amendment "or without handles," because we are describing these:

All the foregoing, finished or unfinished, not specially provided for, with handles of mother-of-pearl, shell, ivory, deer, or other animal horn, silver, nickel silver, or other metal than iron or steel.

The Senator says that if we strike out "or without handles of any kind," we will meet that situation; but we have dealt heretofore only with those with handles. Therefore, if we are going to have any provision in the paragraph relating to the importation of any kind of blades without handles, we will have to insert it in there somewhere.

Mr. UNDERWOOD. But the Senator, if he will read the language of his own committee, struck out the words "or without handles" above.

Mr. McCUMBER. I know it, and that is the reason why it leaves it "with handles."

Mr. UNDERWOOD. You just changed the place where it was necessary for it to go in.

Mr. McCUMBER. I say you would have to make still another amendment. Now, I will call the Senator's attention to one or two instances in the Reynolds report, and give him the equivalent ad valorem duty as the bill would now stand, with the amendment offered by the Senator from Connecticut.

We will take first the butcher knives from England. That would be equivalent to about 100 per cent. In the case of the kitchen and table knives, the equivalent ad valorem would be 66 per cent.

Mr. UNDERWOOD. What is the value of the table knife when it comes in?

Mr. McCUMBER. $11.97 a dozen.

Mr. UNDERWOOD. Of course, a knife valued at $11.97 a dozen is a very high-class knife, but what I am asking about are these kitchen knives. What is the value of those?

Mr. McCUMBER. I am taking just these that we have here. I have something a little lower down that I think will cover that. The butcher knives I have given the Senator, about 100 per cent. The cook knives from France, that come in at $6.93 a dozen, would amount to about 53 per cent ad valorem under the rates as given here. These are the only ones I have.

Mr. UNDERWOOD. The Senator must be wrong; it can not be 53 per cent, because he provides in this paragraph a 20 per cent specific duty and then 55 per cent ad valorem, and yet the Senator works it out below his ad valorem rate.

Mr. McCUMBER. Oh, no; cook knives are only 3 cents, I think, and as amended only 2 cents—2 cents each and 45 per cent ad valorem.

Mr. UNDERWOOD. The cook knives, as far as the paragraph reads in the bill that is printed before me, are taxed at 20 cents each and 55 per cent ad valorem.

Mr. McCUMBER. Four inches or under—that is, simply the blade—they are 3 cents each, which we amended to 2 cents each, with a 45 per cent ad valorem duty.

Mr. UNDERWOOD. What the Senator is doing on that piece of paper over there may be all right——

Mr. McCUMBER. The piece of paper takes in the actual importations, and just exactly what they are imported for, and just exactly what this compound rate would be equivalent to on an ad valorem basis.

Mr. UNDERWOOD. It is very evident that either the Senator is very wrong or I am very wrong, and I think the Senate is entitled to find out what this paragraph means. Let me read it to you:

PAR. 355. Table, butchers', carving, cooks', hunting, kitchen, bread, cake, pie, slicing, cigar, butter, vegetable, fruit, cheese, canning, fish, carpenters' bench, curriers', drawing, farriers', fleshing, hay, sugar-beet, beet-topping, tanners', plumbers', painters', palette, artists', shoe, and similar knives, forks, and steels, and cleavers, all the foregoing, finished or unfinished, not specially provided for, with handles—

With the words "or without" stricken out of the House text—

of mother-of-pearl, shell, ivory, deer, or other animal horn, silver, nickel silver, or other metal than iron or steel, or without handles of any kind, 20 cents each.

Now, that includes cook knives.

Mr. McCUMBER. No, Mr. President; it does not. That includes the higher-priced table knives. It is the knives that are generally silver-plated, with silver handles, and the more valuable class of table knives. They are not the kitchen knives. Kitchen knives come in the next paragraph after that.

Mr. UNDERWOOD. But if the Senator will just wait a minute; these rates are bad enough in themselves, and if the Senator really has made a mistake in classing kitchen knives among high-class knives, for heaven's sake do not let us make the American people suffer from an undisclosed mistake. I have read the whole paragraph, and there is no other rate above what I have read.

Mr. McCUMBER. No; the Senator has not read what appears on page 74.

Mr. UNDERWOOD. But there is a semicolon after the words "20 cents each."

Mr. McCUMBER. Yes.

Mr. UNDERWOOD. And so all in the language above "20 cents each" is included in the 20-cent tax. It can not be otherwise. You can not put these table knives and butcher knives and cook knives in any other tax than 20 cents each, because you have separated them from any other place in the bill by this semicolon. Then you add the 55 per cent ad valorem, and then you report to the Senate that some of these knives carry a rate of only 53 per cent. Now, evidently the committee has made some mistake in ascertaining what its taxes are, and I think we are entitled to an explanation of it.

Mr. McCUMBER. Possibly the committee may have made some mistake; but I am certain of one thing, and that is that the committee made no mistake in assuming that a pearl-handled knife was not a kitchen knife.

Mr. UNDERWOOD. What did you put the kitchen knife in there for, then? Why did you say "kitchen knives"?

Mr. McCUMBER. There is the whole paragraph, and we are dealing with several kinds of knives in the paragraph. When you come to the description of those things which we generally denominate kitchen knives, you will find that we have given a rate, instead of 20 cents each, of 2 cents each. That is a kitchen knife generally with a wood handle, and certainly not designated as a silver-plated knife or a knife with a pearl handle that can not be put into hot water at all.

Mr. UNDERWOOD. Then the Senator has his bill punctuated entirely wrong.

Mr. McCUMBER. Oh, no; he has not.

Mr. SMITH. May I ask the Senator from North Dakota if there are silver-plated handles on drawing knives which are used to draw shingles with. They are in the same category. Then you have curriers' knives, with which you rake the hair off the hides of animals. Do you silver plate those? Then you have a hay knife here, and you have a fish knife. You have no semicolon there.

Mr. SMOOT. The Senator will see the semicolon after "20 cents each."

Mr. SMITH. I know there is one there, and that ends the whole thing. That includes the whole category. The contention is that drawing knives, the curriers' knives, and all the knives in everyday use, take the 20-cent rate, if they have handles or are without handles.

Mr. SMOOT. Oh, no.

Mr. SMITH. I may not understand your method of drawing a tariff bill; but, as the Senator from Ohio says, I do understand the English language and its punctuation.

Mr. SMOOT. If the Senator understands the English language, he ought to read the bill and see what it provides.

Mr. SMITH. I read it and see what it provides, but I do not accept the interpretation of the Senator from Utah.

Mr. SMOOT. Let us see just what it does provide. There are three classes of knives, and the classes are separated by semicolons.

Mr. SMITH. Let us see.

Mr. SMOOT. It reads, "similar knives, forks, and steels, and cleavers, all of the foregoing, finished or unfinished, not specially provided for." They are certainly provided for otherwise, and I call the Senator's attention to where they are specially provided for, "with handles of mother-of-pearl, shell, ivory," and so forth.

Mr. McCUMBER and Mr. HEFLIN addressed the Chair.

The PRESIDING OFFICER. Does the Senator from Utah yield; and if so, to whom?

Mr. McCUMBER. I ask the Senator from Utah to yield to me.

Mr. SMOOT. I yield to the Senator from North Dakota.

Mr. McCUMBER. In all probability if we are going to close at 10 o'clock to-night, as we usually do, we shall hardly finish this matter, and I ask unanimous consent at this time that when the Senate closes its session to-day it shall recess until to-morrow at 11 o'clock.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. McCUMBER. Now I ask the Senator from Utah if he will not yield for a short executive session, and then let us recess until 11 o'clock to-morrow.

Mr. SMOOT. I have the floor.

Mr. McCUMBER. I know the Senator has, but I ask if he will not yield to me to make a little statement?

Mr. SMOOT. Certainly.

Mr. McCUMBER. We have been holding evening sessions for quite a long time. We have been holding them because it is generally 2 or 3 o'clock, or after 3, sometimes, before we get to the tariff bill at all. It is not agreeable to any of us, I know, to hold these long night sessions and work as hard as we do, and I suggest that if we can have less discussion of extraneous matters in the morning I would like to have at least a gentlemen's agreement that we shall close at 6 or half past 6, and not hold evening sessions, provided we can do something during the day. I am willing to try that a while. If we can not make any better headway, of course we shall have to hold night sessions.

Mr. SMOOT. The Senator does not ask that now?

Mr. McCUMBER. No; I am not asking it now; but I simply want to make the suggestion. I hope that to-morrow we can get along without holding an evening session at all.

Mr. SIMMONS. Mr. President, I would be glad if Senators on this side of the Chamber would hear me just a moment. I am speaking without any understanding whatever with Senators on the other side, but I really believe that we would accomplish more toward expediting the bill if our sessions were confined to daylight and we could commence at 11 and recess at 6, instead of commencing at 11 and closing at 10.

Mr. SMOOT. Why does the Senator make that statement?

Mr. SIMMONS. I really believe we would accomplish more, and I want to join with the Senator from North Dakota in the expression of the hope that as far as possible, though I know we can not do it altogether, we eliminate the discussion of extraneous matters and confine ourselves to the tariff bill. I think it ought to be acted upon as speedily as possible, and I hope that the program outlined by the Senator from North Dakota will be adopted, changing the hours so as to run from 11 to 6, and that on both sides of the Chamber we eliminate, as far as practicable, the discussion and consideration of all matters not pertaining to the pending bill until we get through with it.

Mr. SMOOT. Let it be understood, also, that we will cut out all speeches which are mere repetitions.

Mr. SIMMONS. I am not giving any assurances; I am not attempting to bind anybody at all. I am simply expressing a hope.

Mr. SMOOT. I agree with the Senator.

Mr. HEFLIN. Mr. President, we are not agreeing to anything; we are just having suggestions.

Mr. SIMMONS. That is all I said. I was just expressing a hope.

Mr. SMOOT. I so understood the Senator.

Mr. HEFLIN. The Senator from North Carolina is expressing the hope expressed by the Senator from North Dakota.

Mr. SMOOT. And I join in the hope.

Mr. HEFLIN. The Senator from Utah said: "Let it be agreed that we cut out so and so." We are not agreeing to anything. If you would change the bill, it would save a lot of time.

Mr. SMOOT. That is the Senator's opinion, we know; he has said it a good many times.

Mr. HEFLIN. And I am going to say it a good many more times, too.

Mr. SMOOT. I hope the Senator will allow me to proceed. I do not think there will be a vote on this paragraph to-night, and perhaps it will be discussed again to-morrow.

Mr. SMITH. Very likely.

Mr. SMOOT. In the meantime I want to address the Senators who say that there is no classification, and that the words "unfinished, not specially provided for," do not mean anything in the paragraph.

There are three different descriptions of knives provided for here under these three different rates, and they are separated by semicolons. The kitchen knives and tables knives fall under the second rate of duty which, when the Senate committee amendments are agreed to, which I hope will be done, will be 2 cents each, and 45 per cent ad valorem.

At the same time I want to say that I now have the figures which were worked out on these items, and I can tell Senators just what the equivalent ad valorem is upon each of the different brackets, taking the average rate of knives falling within those brackets. As to the first one, at 20 cents each and 45 per cent ad valorem, the equivalent ad valorem is 136 per cent. As to the second one, 2 cents each and 45 per cent ad valorem, the equivalent would be 77 per cent ad valorem. As to the third, over 4 inches in length, 10 cents each and 45 per cent ad valorem, the equivalent is 67 per cent ad valorem.

BRIDGE OVER PEND OREILLE RIVER, WASH.

Mr. JONES of Washington. Mr. President, I favorably report from the Committee on Commerce without amendment the bill (H. R. 11265) to authorize the maintenance of a bridge constructed across the Pend Oreille River at the town of Usk, in the State of Washington, and I submit a report thereon (No. 761). I ask unanimous consent for the immediate consideration of the bill.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which was read, as follows:

Be it enacted, etc., That the bridge specified in an act approved August 7, 1919, entitled "An act to authorize the construction of a bridge across the Pend Oreille River at the town of Usk, in the State of Washington," having been constructed without approval of the plans by the Chief of Engineers and the Secretary of War, be, and is hereby, declared a lawful structure, to be maintained and operated subject to the provisions of an act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906: *Provided*, That unless plans of the said bridge shall have been submitted to the Chief of Engineers and the Secretary of War for their approval and

shall have been approved by them within six months after the date of the approval of this act, this authority shall then cease and be null and void.

SEC. 2. That the right to alter, amend, or repeal this act is hereby expressly reserved.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

EXECUTIVE SESSION.

Mr. CURTIS. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to; and the Senate proceeded to the consideration of executive business. After 20 minutes spent in executive session the doors were reopened.

PRESIDENT HARDING'S ADDRESS AT THE DEDICATION OF THE LINCOLN MEMORIAL.

Mr. McCORMICK. I ask unanimous consent to have printed in the RECORD in the regular RECORD type President Harding's address at the dedication of the Lincoln Memorial on May 30, 1922.

There being no objection, the address was ordered to be printed in the RECORD in 8-point type, as follows:

PRESIDENT HARDING'S ADDRESS AT THE DEDICATION OF THE LINCOLN MEMORIAL, WASHINGTON, D. C., MAY 30, 1922.

Mr. Chief Justice, it is a supreme satisfaction officially to accept on behalf of the Government this superb monument to the savior of the Republic. No official duty could be more welcome, no official function more pleasing. This memorial edifice is a noble tribute, gratefully bestowed, and in its offering is the reverent heart of America; in its dedication is the consciousness of reverence and gratitude beautifully expressed.

Somehow my emotions incline me to speak simply as a reverent and grateful American rather than one in official responsibility. I am thus inclined because the true measure of Lincoln is in his place to-day in the heart of American citizenship, though more than half a century has passed since his colossal service and his martyrdom. In every moment of peril, in every hour of discouragement, whenever the clouds gather, there is the image of Lincoln to rivet our hopes and to renew our faith. Whenever there is a glow of triumph over national achievement there comes the reminder that but for Lincoln's heroic and unalterable faith in the Union these triumphs could not have been.

No great character in all history has been more eulogized, no towering figure more monumented, no likeness more portrayed. Painters and sculptors portray as they see, and no two see precisely alike. So, too, is there varied emphasis in the portraiture of words; but all are agreed about the rugged greatness, the surpassing tenderness, the unfailing wisdom of this master martyr.

History is concerned with the things accomplished. Biography deals with the methods and the individual attributes which led to accomplishment.

The supreme chapter in history is not emancipation, though that achievement would have exalted Lincoln throughout all the ages. The simple truth is that Lincoln, recognizing an established order, would have compromised with the slavery that existed if he could have halted its extension. Hating human slavery as he did, he doubtless believed in its ultimate abolition through the developing conscience of the American people, but he would have been the last man in the Republic to resort to arms to effect its abolition. Emancipation was a means to the great end—maintained union and nationality. Here was the great purpose, here the towering hope, here the supreme faith. He treasured the inheritance handed down by the founding fathers, the ark of the covenant wrought through their heroic sacrifices and builded in their inspired genius. The Union must be preserved. It was the central thought, the unalterable purpose, the unyielding intent, the foundation of faith. It was worth every sacrifice, justified every cost, steeled the heart to sanction every crimsoned tide of blood. Here was the great experiment—popular government and constitutional union—menaced by greed expressed in human chattels. With the greed restricted and unthreatened, he could temporize. When it challenged Federal authority and threatened the Union, it pronounced its own doom. In the first inaugural he quoted and reiterated his own oft-repeated utterance—"I have no purpose, directly or indirectly, to interfere with the institution of slavery in the States where it exists. I believe I have no lawful right to do so, and I have no inclination to do so." He believed in maintaining inviolate the rights of the States, but he believed no less firmly in the perpetuity of the union of the States. The union, having been contracted, could not be dissolved except by consent of all parties to the contract. He recognized the conflicting viewpoints, differing policies, and controverted questions. But there were constitutional methods of settlement, and these must be employed.

In the first inaugural address he stressed the great general principle that—

"in our constitutional controversies we divide into majorities and minorities. If the minority will not acquiesce the majority must, or the Government must cease. There is no other alternative, for continuing the Government is acquiescence on one side or the other. If the minority in such case will secede rather than acquiesce, they make a precedent which in turn will divide and ruin them. * * * Plainly the central idea of secession is the essence of anarchy. A majority held in restraint by constitutional checks and limitations, and always changing easily with deliberate changes of popular opinions and sentiments, is the only true sovereign of a free people. Whoever rejects it does of necessity fly to anarchy or despotism."

Here spoke the statesman, proclaiming deliberate public opinion as the supreme power of civilization, easily to be written into law when conviction should command. It ought to be tonic to the waning confidence of those of to-day who grow impatient that emphasized minority views are not hurried into the majority expressions of the Republic. Deliberate public opinion never fails.

Later, closing his first inaugural, when anxiety gripped the Nation, there spoke the generous, forgiving, sympathetic man of undaunted faith:

"I am loath to close. We are not enemies, but friends. We must not be enemies. Though passion may have strained, it must not break our bonds of affection. The mystic chords of memory, stretching from every battle field and patriot grave to every living heart and hearthstone all over this broad land, will yet swell the chorus of the union when again touched, as they surely will be, by the better angles of our nature."

But he appealed in vain. Passion was aflame and war was made the arbiter. Americans fought Americans with equal courage and valor. There was an ambiguity in the Constitution which only a baptism in blood could efface. One may only speculate on what another might have done, but Fate seems to have summoned the one great hero best fitted to lead to the Union's salvation.

His faith was inspiring, his resolution commanding, his sympathy reassuring, his simplicity enlisting, his patience unfailing. He was Faith, Patience, and Courage, with his head above the clouds, unmoved by the storms which raged about his feet.

No leader was ever more unsparingly criticized or more bitterly assailed. He was lashed by angry tongues and ridiculed in press and speech until he drank from as bitter a cup as was ever put to human lips, but his faith was unshaken and his patience never exhausted. Some one sent me recently an illumined and framed quotation which fell from his lips when the storm of criticism was at its height:

"If I were trying to read," he said, "much less answer all the attacks made on me, this shop might as well be closed for any other business. I do the best I know how, the very best I can; and I mean to keep on doing it to the end. If the end brings me out all right, what is said against me will not amount to anything. If the end brings me out all wrong, 10 angels swearing I was right would make no difference."

He knew, of course, before the assassin robbed him of fuller realization, that the end was bringing him out all right. He knew when swords were sheathed and guns laid down, that the Union he saved was riveted anew and made forever indissoluble. He knew that in the great crucible of fire and blood the dross had been burned from the misdirected patriotism of seceding States and the pure gold restored to shining stars in dear Old Glory again. He knew he had freed a race of bondmen and had given to the world the costly proof of the perpetuity of the American Union. But I can not restrain the wish that he might somehow know of the monuments to his memory throughout the world, and that we are dedicating to-day, on behalf of a grateful nation, this matchless memorial, whose 48 columns, representing 48 States in the concord of union, testify that the "end brought him out all right."

Reflecting now on the lampooning and heedless attack and unjustifiable abuse which bruised his heart and tested his patience, we may accept its expression as one of the abused privileges under popular government, when passion sways and bitterness inspires, but for which there is compensation in the assurance that when men have their feet firmly planted in the right, and do the very best they can and "keep on doing it," they come out all right in the end, and all the storm does not amount to anything.

He rose to colossal stature in a day of imperiled Union. He first appealed, and then commanded, and left the Union secure and the Nation supreme. His was a leadership for a great crisis made loftier because of the inherent righteousness of his cause and the sublimity of his own faith. Washington inspired belief in the Republic in its heroic beginning, Lincoln proved its quality in the heroic preservation. The Old World had wondered about the New World experiment, and was quite ready to proclaim its futility when the Civil War was threatening, but Lincoln left the Union unchallenged for all succeeding time. Not only was our Nation given a new birth of freedom but democracy was given a new sanction by that hand of divinity itself which has written the rights of humankind and pointed the way to their enjoyment.

Abraham Lincoln was no superman. Like the great Washington, whose monumental shaft towers near by as a fit companion to the memorial we dedicate to-day, the two testifying the grateful love of all Americans to founder and savior—like Washington, Lincoln was a very natural human being, with the frailties mixed with the virtues of humanity. There are neither supermen nor demigods in the government of kingdoms, empires, or republics. It will be better for our conception of government and its institutions if we will understand this fact. It is vastly greater than finding the superman if we justify the confidence that our institutions are capable of bringing into authority in time of stress men big enough and strong enough to meet all demands.

Washington and Lincoln offered outstanding proof that a representative popular government, constitutionally founded, can find its own way to salvation and accomplishment. In the very beginning our American democracy turned to Washington, the aristocrat, for leadership in revolution and the greater task of founding permanent institutions. The wisdom of Washington and Jefferson and Hamilton and Franklin was proven when Lincoln, the child of privation, of hardship, of barren environment and meager opportunity, rose to unquestioned leadership when disunion threatened.

Lincoln came almost as humbly as the Child of Bethlehem. His parents were unlettered, his home was devoid of every element of culture and refinement. He was no infant prodigy, no luxury facilitated or privilege hastened his development, but he had a God-given intellect, a love for work, a willingness to labor, and a purpose to succeed.

Biographies differ about his ambition, but Herndon, who knew him as did no other, says he was greatly ambitious. I can believe that. Ambition is a commendable attribute, without which no man succeeds. Only inconsiderate ambition imperils.

Lincoln was modest, but he was sure of himself, and always greatly simple. Therein was his appeal to the confidence of his country. When he believed he was right a nation believed him to be right and offered all in his support.

His work was so colossal, in the face of such discouragement, that none will dispute that he was incomparably the greatest of our Presidents. He came to authority when the Republic was beset by foes at home and abroad, and reestablished union and security. He made that gesture of his surpassing generosity which began reunion. Let us forget the treachery, corruption, and incompetence with which he had to combat, and recall his wisdom, his unselfishness, his sublime patience. He resented no calumnies upon himself; he held no man his enemy who had the power and will to serve the union, his vision was blinded by no jealousy. He took his advisors from among his rivals, invoked their patriotism and ignored their plottings. He dominated them by the sheer greatness of his intellect, the singleness and honesty of his purpose, and made them responsive to his hand for the accomplishment of the exalted purpose. Amid it all there was a gentleness, a kindness, a sympathetic sorrow, which suggest a divine intent to blend mercy with power in supreme attainment.

This memorial, matchless tribute that it is, is less for Abraham Lincoln than for those of us to-day, and for those who follow after. His surpassing compensation would have been in living, to have his 10,000 sorrows dissipated in the rejoicings of the succeeding half century. He loved "his boys" in the Army, and would have reveled in the great part they played in more than a half century of the pursuit of peace and concord restored. How he would have been exalted by the chorus of the Union after "the mystic chords" were "touched by the better angels of our nature"! How it would comfort his great soul to know that the States in the southland join sincerely in honoring him, and have twice since his day joined, with all the fervor of his own great heart, in defending the flag! How it would soften his anguish to know that the South long since came to realize that a vain assassin robbed it of its most sincere and potent friend when it was prostrate and stricken, when Lincoln's sympathy and understanding would have helped to heal the wounds and hide the scars and speed the restoration! How with his love of freedom and justice this apostle of humanity would have found his sorrows tenfold repaid to see the hundred millions to whom he bequeathed reunion and nationality, giving of their sons and daughters and all their fortunes to halt the armed march of autocracy and preserve civilization, even as he preserved the Union!

More, how his great American heart would be aglow to note how resolutely we are going on, always on, holding to constitutional methods, amending to meet the requirements of a progressive civilization, clinging to majority rule, properly restrained, which is "the only true sovereign of a free people," and working to the fulfillment of the destiny of the world's greatest Republic.

Fifty-seven years ago this people gave from their ranks, sprung from their own fiber, this plain man, holding their common ideals. They gave him first to service of the Nation in the hour of peril, then to their Pantheon of Fame. With them and by them he is enshrined and exalted forever.

To-day American gratitude, love, and appreciation give to Abraham Lincoln this lone white temple, a Pantheon for him alone.

PRESIDENT HARDING'S ADDRESS AT MEMORIAL SERVICES TO CONFEDERATE DEAD.

Mr. McCORMICK. At the request of the junior Senator from Mississippi [Mr. HARRISON] I ask unanimous consent to have printed in the RECORD in the regular RECORD type the address by the President delivered at Arlington, Va., on June 5, 1922, on the occasion of memorial services to the Confederate dead.

There being no objection, the address was ordered to be printed in the RECORD in 8-point type, as follows:

HARDING ADDRESSES VETERANS OF GRAY AT ARLINGTON JUNE 5, 1922.

The President of the United States, himself the son of a Union veteran, joined with the gray-garbed, gray-haired veterans of the Confederacy who stood with bowed heads at the gravesides of their comrades in "The Lost Cause," yesterday in Arlington Cemetery, and paid their annual tribute of love for those who have gone on the last long march.

BENEATH ENTWINED BANNERS.

Standing beneath the stars and bars as they hung close beside the Stars and Stripes, President Harding uttered a prayer of gratitude of a reunited Republic that the Nation weathered successfully the storms of the great civil struggle to be drawn into a more closely riveted Union.

SPECTACLE SELDOM PARALLELED.

It was a spectacle seldom paralleled in the history of the Nation. Coming as it did in the spring of a year which has seen massive memorials dedicated to that great martyr President, Abraham Lincoln, who guided the destinies of the Union, and to that magnanimous leader of a victorious army, Ulysses Simpson Grant, when veterans of the gray stood with veterans of the blue, the annual tribute to the Confederate dead took on a deeper significance.

The act of reunion was completed, for the veterans and the sons of the gray stood with the guardian of the fold from which they sought to flee, and gave an unqualified pledge of loyalty.

President Harding did not hesitate to laud the courage of the men who fought for the Confederacy, although he cautioned, "I did not mean to say that the Confederacy was right, although I am glad to say to you that I believe you thought it was right."

The opening words of the President's informal remarks at the exercises, at which he first planned to be only a spectator, sounded the keynote of the occasion which brought the sons and daughters of friend and foe in the great Civil War to the gravesides of the Confederates. Addressing the gathering as "My countrymen all," the President called attention to himself as the son of a Union soldier.

SPIRIT OF LINCOLN RECALLED.

"Whether I come to-day as the son of a veteran of the Grand Army of the Republic," he said, "to bestow a vocal tribute on those who perished in the cause they believed to be right, or whether I come as President of the United States to speak my gratitude to those who have helped to reestablish peace and concord, it matters little."

The spirit of the martyred Lincoln, whose memory is enshrined forever in the marble temple that stands across the placid Potomac from the great city of the dead, must have looked down with a feeling of unlimited thanksgiving on his successor as he spoke the words which typified the spirit of a united and indivisible Nation. "I know their sentiment," he declared, "and life is better and sweeter for such feeling and such sentiment."

It remained for the present leader of the Union to formulate into articulate speech the tribute higher than which no man can give to a former antagonist. "Those who fought for the Confederacy were as sincere human beings as could be," said Mr. Harding.

TRIBUTE TO SONS AND DAUGHTERS.

To their sons and daughters he added a word of tribute. "Speaking as the son of one who fought in the Union cause, I want to say that I have only gratitude, commendation, and the sincerest tribute a man can utter for their sons and daughters who have lived in the great aftermath and ably assisted in turning disunion into union, turning discored into concord and reclaiming for posterity all those things so essential to the welfare of this Republic.

"It is my privilege to see the manifestations of this reconsecration of the Southland. There come to my mind such names as dear old Joe Wheeler, whom I saw go to the front to defend his country, and Fitzhugh Lee, who headed the first troops that entered Havana in the Spanish-American War. And in that conflict let me say that we of America were brought into complete accord."

HIS TRIBUTE TO THE GRAY.

Tribute to the spirit of the veterans and sons of the gray in turning defeat into rebuilding of the Nation was likewise spoken by the President, who declared he wished to pay "the greatest tribute to you of the gray," and his tribute was one for the man who bore up as a loser. "It is easier to forgive and forget if you are on the triumphant side," said Mr. Harding, "but it takes a bigger heart to forgive and forget if you have gone down to defeat in the lost cause. I would like to see more of this fellowship and comradeship which marks a united America."

Pointing to the frequent evils which grow out of not understanding the other's viewpoint, Mr. Harding applied the lesson to the rift in the Union. The discovering Spaniard who visited our shores and after touching a point, known now to be but a short distance inland, went home and said he had explored the country entire, he indicated as showing the spirit of lack of understanding among peoples.

BOTH VIEWPOINTS LEARNED.

"In that conflict" he told the Confederate gathering, "we learned one another's viewpoint." The President was unable to restrain himself from taking occasion to revert to the sight which moved him to digress from his address at the dedication of the Lincoln Memorial, when he called attention to the veterans of the blue and the gray who joined in honoring the martyr President.

"There I saw flanking the flag these veterans of the gray and abreast of them, flanking the flag on the other side, the veterans of the blue. It was a memorable sight, and it gave a little added glory to the flag," he declared.

There is no more sectionalism, Mr. Harding declared with some emphasis. "Our interests are interdependent in North, South, East, and West," he said. During the time of the war he pointed out that the Southern phase was largely an economic one, and in the North there was but another phase of the same situation.

RECESS.

Mr. CURTIS. I move that the Senate take a recess, the recess being under the order previously entered, until to-morrow at 11 o'clock a. m.

The motion was agreed to; and (at 10 o'clock and 15 minutes p. m.) the Senate, under the order previously entered, took a recess until to-morrow, Friday, June 9, 1922, at 11 o'clock a. m.

NOMINATIONS.

Executive nominations received by the Senate June 8 (legislative day of April 20), 1922.

UNITED STATES ATTORNEY.

Henry M. Holden, of Texas, to be United States attorney, southern district of Texas, vice D. E. Simmons, resigned. To become effective July 1, 1922.

UNITED STATES MARSHAL.

James E. McClure, of Illinois, to be United States marshal, southern district of Illinois, vice Vincent Y. Dallman, resigned. Effective July 1, 1922.

PROMOTIONS IN THE REGULAR ARMY.

To be colonels.

Lieut. Col. William Elliott, Quartermaster Corps, from May 2, 1922.

Lieut. Col. Andrew Jackson Dougherty, Infantry, from May 8, 1922.

Lieut. Col. Oliver Stevens Eskridge, Infantry, from May 10, 1922.

To be lieutenant colonels.

Maj. Charles Keller, Infantry, from May 2, 1922.
Maj. Howard Russell Smalley, Cavalry, from May 3, 1922.
Maj. John Scott, Infantry, from May 8, 1922.
Maj. Smith Aaron Harris, Infantry, from May 10, 1922.
Maj. Noble James Wiley, Infantry, from May 12, 1922.

To be majors.

Capt. Irving Howard Engleman, Infantry, from May 2, 1922.
Capt. William M. Cravens, Coast Artillery Corps, from May 3, 1922.
Capt. Frederick Joseph de Rohan, Infantry, from May 8, 1922.
Capt. Frederick Schoenfeld, Quartermaster Corps, from May 10, 1922.
Capt. Earl Jay Dodge, Infantry, from May 11, 1922, subject to examination required by law.
Capt. Arthur Paul Thayer, Cavalry, from May 12, 1922.

To be captains.

First Lieut. Leonard Louis Davis, Coast Artillery Corps, from November 27, 1921.
First Lieut. Harold Leo Stiebel, Coast Artillery Corps, from November 27, 1921.
First Lieut. Webster Fletcher Putnam, jr., Coast Artillery Corps, from November 29, 1921.
First Lieut. Merle Halsey Davis, Ordnance Department, from December 1, 1921.
First Lieut. George Berry Dobyns, Coast Artillery Corps, from December 4, 1921.
First Lieut. Henry Devries Cassard, Coast Artillery Corps, from December 4, 1921.
First Lieut. Edward Hanson Connor, jr., Infantry, from December 9, 1921.
First Lieut. Neal Creighton, Air Service, from December 10, 1921.
First Lieut. George Peter Toft, Quartermaster Corps, from December 11, 1921.
First Lieut. Alonzo Maning Drake, Air Service, from December 15, 1921.
First Lieut. Charles Raymond Melin, Air Service, from December 16, 1921.
First Lieut. Victor Herbert Strahm, Air Service, from December 16, 1921.
First Lieut. Robert Jesse Whatley, Infantry, from December 16, 1921.
First Lieut. Waldo Sebastian Ickes, Finance Department, from December 18, 1921.
First Lieut. Ira Robert Koenig, Air Service, from December 18, 1921.
First Lieut. Harry Allen Sanford, Philippine Scouts, from December 19, 1921.
First Lieut. Earl Wells, Philippine Scouts, from December 22, 1921.
First Lieut. Raynor Garey, Field Artillery, from December 22, 1921.
First Lieut. Philip Schneeberger, Air Service, from December 22, 1921.
First Lieut. Gouverneur Hoes, Infantry, from December 23, 1921.
First Lieut. Victor Schmidt, Coast Artillery Corps, from December 24, 1921.
First Lieut. George Franklin Parris, Air Service, from December 24, 1921.
First Lieut. Fred Bidwell Lyle, Field Artillery, from December 24, 1921.
First Lieut. Karl Shaffner Axtater, Air Service, from December 25, 1921.
First Lieut. Clinton Bowen Fisk Brill, Quartermaster Corps, from December 26, 1921.
First Lieut. William Joseph Flood, Air Service, from December 28, 1921.
First Lieut. Francis Dundas Ross, jr., Infantry, from December 28, 1921.
First Lieut. Frank Edward Monville, Quartermaster Corps, from December 30, 1921.
First Lieut. George Merrill Palmer, Air Service, from January 1, 1922.
First Lieut. Charles Rawlings Chase, Cavalry, from January 1, 1922.
First Lieut. Loren Francis Parmley, Cavalry, from January 2, 1922.

First Lieut. Erle Fletcher Cress, Cavalry, from January 4, 1922.
First Lieut. Lynn Packard Vane, Coast Artillery Corps, from January 4, 1922.
First Lieut. John Austin Pixley, Coast Artillery Corps, from January 6, 1922.
First Lieut. Otta Marshall, Coast Artillery Corps, from January 7, 1922.
First Lieut. Edwin Cleveland Callicutt, Coast Artillery Corps, from January 8, 1922.
First Lieut. Ray Harrison Green, Quartermaster Corps, from January 9, 1922.
First Lieut. Hugh Williamson Rowan, Chemical Warfare Service, from January 11, 1922.
First Lieut. Russell William Goodyear, Quartermaster Corps, from January 12, 1922.
First Lieut. Lewis Rinehart Pfoutz Reese, Air Service, from January 12, 1922.
First Lieut. Byron Turner Burt, jr., Air Service, from January 15, 1922.
First Lieut. Earle Gene Harper, Air Service, from January 21, 1922.
First Lieut. Philip Gilstrap Bruton, Corps of Engineers, from January 28, 1922.
First Lieut. Eugene Joseph Minarelli FitzGerald, Infantry, from January 29, 1922.
First Lieut. Charles Earl Whitney, Ordnance Department, from January 31, 1922.
First Lieut. Lotha August Smith, Air Service, from February 5, 1922.
First Lieut. Edward Higley Guilford, Air Service, from February 5, 1922.
First Lieut. Junius Augustus Smith, Air Service, from February 11, 1922.
First Lieut. William Henry Carthy, Air Service, from February 22, 1922.
First Lieut. Horace Leland Porter, Corps of Engineers, from February 22, 1922.
First Lieut. Arthur Leo Lavery, Coast Artillery Corps, from February 22, 1922.
First Lieut. Ernest Andrew Thompson, Signal Corps, from February 22, 1922.
First Lieut. William Andrew Gray, Air Service, from February 22, 1922.
First Lieut. Franz Joseph Jonitz, Quartermaster Corps, from February 22, 1922.
First Lieut. William Valery Andrews, Air Service, from February 24, 1922.
First Lieut. George Stetekluh, Quartermaster Corps, from February 24, 1922.
First Lieut. Frank Marion Barrell, Quartermaster Corps, from February 25, 1922.
First Lieut. Stanton Higgins, Cavalry, from February 28, 1922.
First Lieut. Holden Spear, Quartermaster Corps, from February 28, 1922.
First Lieut. Frank Merrill Bartlett, Air Service, from February 28, 1922.
First Lieut. Benson Glenwood Scott, Field Artillery, from March 2, 1922.
First Lieut. Redding Francis Perry, Cavalry, from March 2, 1922.
First Lieut. Walter Arthur Metts, jr., Field Artillery, from March 2, 1922.
First Lieut. Frank Camm, Field Artillery, from March 5, 1922.
First Lieut. Robert Morgan Burrowes, Infantry, from March 6, 1922.
First Lieut. Richard Oscar Bassett, jr., Infantry, from March 7, 1922, subject to examination required by law.
First Lieut. Percy Stuart Lowe, Coast Artillery Corps, from March 9, 1922.
First Lieut. Lewis Alonzo Murray, Corps of Engineers, from March 12, 1922.
First Lieut. Rene Edward deRussy, Coast Artillery Corps, from March 14, 1922.
First Lieut. Marion Gardner Putnam, jr., Air Service, from March 23, 1922.
First Lieut. Clyde Grady, Infantry, from March 27, 1922.
First Lieut. Walter Drake Williams, Air Service, from March 29, 1922.
First Lieut. William Henry Payne, Quartermaster Corps, from March 29, 1922.
First Lieut. Thomas Tilson Conway, Infantry, from April 1, 1922.
First Lieut. Edgar Ambrose Jarman, Infantry, from April 2, 1922.

Masie F. Patterson, Woodbury.

WEST VIRGINIA.

Harvey A. Henderson, Minden.
Edward E. Reyburn, Vivian.

REJECTION.

Executive nomination rejected by the Senate June 8 (legislative day of April 20), 1922.

POSTMASTER.

Benjamin J. Mixson to be postmaster at Orangeburg, S. C.

HOUSE OF REPRESENTATIVES.

THURSDAY, *June 8, 1922.*

The House met at 12 o'clock noon and was called to order by Mr. WALSH, Speaker pro tempore.

The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

Our heavenly Father, Thou art God who dwells in the infinite strength of divine love. We thank Thee that it is Thy nature to come to the help of Thy earthly children. Interpret unto us again Thy ways of righteousness and truth. We bless Thee that Thy mercy is big enough to cover all sin, to heal all wounds, and to comfort all sorrow. The Lord bless our country. May we be a united people—the very right arm of our Government. In this hour, with problems affecting the welfare of all and questions shaping the future of the Republic, O give great wisdom to our President and all associated with him in authority, and bestow calm judgment and broad charity to guide the great work committed to their care. In Thy name. Amen.

The Journal of the proceedings of yesterday was read and approved.

LEAVE OF ABSENCE.

Mr. HENRY, by unanimous consent, was given leave of absence for two days, on account of important business.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Craven, its Chief Clerk, announced that the Senate had passed without amendment bills of the following titles:

H. R. 11646. An act authorizing the construction of a bridge across the Ohio River near Steubenville, Ohio; and

H. R. 11407. An act to amend an act entitled "An act for the retirement of employees in the classified civil service, and for other purposes," approved May 22, 1920.

JOURNAL OF THE FIFTY-SIXTH NATIONAL ENCAMPMENT, GRAND ARMY OF THE REPUBLIC.

Mr. KIESS. Mr. Speaker, I offer a privileged resolution from the Committee on Printing.

The Clerk read as follows:

House Concurrent Resolution 36 (Rept. 1074).

Resolved, etc., That there shall be printed as a House document 1,500 copies of the journal of the Fifty-sixth National Encampment of the Grand Army of the Republic for the year 1922, not to exceed $1,700 in cost, with illustrations, 1,000 copies of which shall be for the use of the House and 500 copies for the use of the Senate.

The SPEAKER pro tempore. The question is on agreeing to the resolution.

The resolution was agreed to.

EMPLOYEES OF THE ALIEN PROPERTY CUSTODIAN.

Mr. KIESS. Mr. Speaker, I present the following privileged resolution.

The Clerk read as follows:

House Concurrent Resolution 59 (Rept. 1075).

Resolved by the House of Representatives (the Senate concurring), That there shall be printed 3,000 additional copies of Senate Document No. 181, Sixty-seventh Congress, entitled "A letter of the Alien Property Custodian Transmitting a Report Showing the Names of All Persons Employed by the Alien Property Custodian," of which 1,000 copies shall be for the use of the Senate document room and 2,000 copies for the House document room.

The SPEAKER pro tempore. The question is on agreeing to the resolution.

The resolution was agreed to.

SUBSTITUTE TELEPHONE OPERATOR.

Mr. A. P. NELSON. Mr. Speaker, by direction of the Committee on Accounts I present the following privileged resolution.

The Clerk read as follows:

House Resolution 359 (Rept. 1076).

Resolved, That there shall be paid out of the contingent fund of the House, from April 22, 1922, and during the remainder of the present fiscal year, compensation not exceeding the rate of $2.50 per diem for the services of a substitute telephone operator.

The SPEAKER pro tempore. The question is on agreeing to the resolution.

Mr. GARRETT of Tennessee. My attention was distracted for the moment, will the gentleman from Wisconsin state what this is?

Mr. A. P. NELSON. There has been appropriated each year $500 for the purpose of hiring extra telephone service. That has been exhausted and it is necessary to provide approximately $175 additional in order to make provision for the payment of the substitute telephone operators to July 1, 1922.

Mr. HICKS. Is this to take care of the vacation period?

Mr. A. P. NELSON. No; it is to put an operator in the place of those who are sick and must have substitutes to take their places. The annual appropriation of $500 is not sufficient to take care of the unusual sick list of this year, and this additional amount of about $175 is necessary to carry us to July 1 of the current year.

Mr. GARNER. Will the gentleman yield?

Mr. A. P. NELSON. Yes. I will yield.

Mr. GARNER. This is the first resolution of this character that has been necessary, because the $500 has been sufficient heretofore to pay the substitutes. I presume if they do not have as much sickness next year this extra amount will not then be necessary.

Mr. A. P. NELSON. That is the understanding of the committee.

Mr. GARNER. Has the chief telephone operator recommended the passage of this bill?

Mr. A. P. NELSON. Yes; and it is the unanimous report of the committee. I wish to say further that the telephone operators are giving most excellent service, endeavoring to make it as far as possible under the conditions a service of real efficiency.

The resolution was agreed to.

LYDIA SHORT.

Mr. A. P. NELSON. Mr. Speaker, by direction of the Committee on Accounts I present the following privileged resolution:

The Clerk read as follows:

House Resolution 362 (Rept. 1077).

Resolved, That there shall be paid, out of the contingent fund of the House, to Lydia Short, widow of Levi E. Short, late an employee of the House of Representatives, a sum equal to six months of his compensation as said employee, and an additional amount, not exceeding $250, to defray the expenses of the funeral of said Levi E. Short.

Mr. A. P. NELSON. Mr. Speaker, this resolution is the customary resolution recommended by the committee on the death of an employee. I yield to the gentleman from New York [Mr. MACGREGOR].

Mr. MACGREGOR. Mr. Speaker, this resolution has reference to the funeral expenses and death of an employee of the House. Perhaps many of you knew Levi Short. He was on the old soldiers' roll and had been upon one of the doors of the House for many years. He served in the Civil War, enlisting prior to the attainment of his majority, going into the service at the age of 16, running away from home for the purpose of enlistment. With the consent of the House, I would like to place in the RECORD a few words with reference to his service to his country.

The SPEAKER pro tempore. The gentleman from New York asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

Mr. MACGREGOR. Mr. Speaker, Levi E. Short, who has been for many years on the soldiers' roll of the House of Representatives, has answered the final roll call and taps have been sounded at the end of a useful and worthy life.

He was one of the fast-thinning ranks of the boys in blue who answered the trumpet call of duty in '61, and his life history was typical of the young men of those days of strife and turmoil.

He was the youngest of the family, a lad of 16, at school. His father and brother were in the Army at the front, and his mother clung to the one remaining man child of the family with all of a mother's devotion, and pleaded with him to stay with her when the restless urge of the day stirred patriotic longings in his boyish breast.

He finally enlisted but, as he was a minor, his mother haled her boy back from the camp and sent him back to school.

He tried to obey, but the "battle cry of freedom" proved stronger than a mother's pleadings and he left school one day at recess, leaving his books on his desk, went down the river and enlisted under an assumed name.

He was but a lad of 16, but in less than a week he had joined his regiment at the front, the old "Fighting One hundredth Infantry of New York," and before two weeks in the Army, with no drill nor camp preparation, he was in battle and served to the end of the war.

After the war he settled down in Buffalo, N. Y., and was prominent in the strenuous political battles of the period right after the Civil War. He came to Washington a score of years ago with Colonel Alexander and has remained here ever since.

He was always active in behalf of his comrades and had become an expert in pension matters, so much so that veterans not only from his home town but from all parts of the country wrote to him for advice, aid, and counsel, and he was ever ready to aid a stricken comrade or a comrade's widow.

So he lived his simple, kindly life. To help a friend, to succor a comrade, was his greatest joy. A devoted husband and a tender, solicitous father, he was a splendid example of that noble type we call an "American citizen."

And now he sleeps the last sleep with the comrades that have gone before. A well-rounded life, full of honor, has ended. The loyal friend of those who knew him, the trusty comrade of his war-time pals, the wise counsellor of a host of younger men, the husband and the father, has gone ahead leaving a memory fragrant with love and full to the brim of all that is noble and pure in humanity. May the soul of Levi Short rest in peace.

The SPEAKER pro tempore. The question is on agreeing to the resolution.

The resolution was agreed to.

LOAN OF COTS, ETC., TO AMERICAN LEGION.

Mr. JAMES. Mr. Speaker, I ask unanimous consent for the present consideration of H. J. Res. 343, authorizing the Secretary of War to loan cots, mattresses, and blankets for the use of the American Legion at the Michigan State encampment to be held at Iron Mountain, Mich, in July, 1922.

The SPEAKER pro tempore. The gentleman from Michigan asks unanimous consent for the present consideration of H. J. Res. 343. The Clerk will report the resolution.

The Clerk read as follows:

Resolved, etc., That the Secretary of War be, and he is hereby, authorized to loan to the executive committee of the American Legion at Iron Mountain, Mich., having in charge the arrangements for the State encampment of said order, to be held in Iron Mountain, Mich., in July, 1922, such blankets, mattresses, and cots as may be required at said meeting: *Provided*, That no expense shall be caused the United States Government by the delivery and return of such property, the same to be delivered to said executive committee at Iron Mountain, Mich., at such time prior to the date of such meeting as may be agreed upon by the Secretary of War and the chairman of said executive committee: *Provided further*, That the Secretary of War shall, before delivering such property, take from the said chairman of said executive committee a good and sufficient bond for the safe return of said property in good order and condition, the whole transaction to be without expense to the Government of the United States of America.

The SPEAKER pro tempore. Is there objection?

Mr. GARNER. Mr. Speaker, reserving the right to object, is this a unanimous report from the committee?

Mr. JAMES. It is.

Mr. GARNER. This is in the established or regular form of resolutions authorizing the use of blankets, and so forth, by the various soldier organizations throughout the country?

Mr. JAMES. Yes.

Mr. GARNER. Then if I understand this, this will probably be the established policy of Congress whenever a State legion has an encampment in any one of the States of the Union. Congress will pass a joint resolution authorizing the Secretary of War to furnish them with cots, blankets, and so forth, under certain limitations such as this resolution provides.

Mr. JAMES. I do not know about the policy in the future, but our committee has reported out quite a few resolutions worded just as this is.

Mr. GARNER. Has the gentleman's committee ever declined to report any resolution where a State legion or the G. A. R. or other regular soldiers' organizations have asked for it?

Mr. JAMES. It has not.

The SPEAKER pro tempore. Is there objection to the present consideration of the resolution?

There was no objection.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the House joint resolution.

The joint resolution was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. JAMES, a motion to reconsider the vote by which the joint resolution was passed was laid on the table.

FIXING STANDARD SIZES FOR FRUIT AND VEGETABLE BASKETS, ETC.

The SPEAKER pro tempore. Under a previous order entered, the bill (H. R. 7102) to fix standards for hampers, round stave baskets, and splint baskets for fruits and vegetables, and for other purposes, is in order to-day, and the Chair will recognize the gentleman from Indiana [Mr. VESTAL] to move that the House resolve itself into the Committee of the Whole House on the state of the Union for the consideration of that bill.

Mr. QUIN. Mr. Speaker, I make the point of order that there is no quorum present.

The SPEAKER pro tempore. The gentleman from Mississippi makes the point of order that there is no quorum present. It is clear that there is no quorum present.

Mr. MONDELL. Mr. Speaker, I move a call of the House.

The motion was agreed to.

The SPEAKER pro tempore. The Doorkeeper will close the doors, and the Sergeant at Arms will bring in absentees. The Clerk will call the roll.

The Clerk called the roll, and the following Members failed to answer to their names:

Anderson	Dunn	Kline, N. Y.	Sabath
Andrew, Mass.	Edmonds	Knight	Sanders, Ind.
Ansorge	Evans	Kreider	Sanders, N. Y.
Arentz	Faust	Kunz	Schall
Bankhead	Fenn	Larson, Minn.	Sears
Beck	Fess	Lineberger	Shreve

Chandler, N. Y.	Gould	Moore, Ill.	Sweet
Clark, Fla.	Graham, Ill.	Morin	Taylor, Ark.
Classon	Griffin	Mudd	Taylor, Colo.
Cockran	Harrison	Nelson, J. M.	Taylor, Tenn.
Codd	Haugen	Nolan	Temple
Cole, Iowa	Hawes	Padgett	Ten Eyck
Connell	Hays	Paige	Tilson
Connolly, Pa.	Henry	Park, Ga.	Treadway
Cooper, Ohio	Hill	Parker, N. J.	Tyson
Cooper, Wis.	Hooker	Parks, Ark.	Upshaw
Copley	Hudspeth	Patterson, N. J.	Vare
Coughlin	Hutchinson	Perkins	Vinson
Crowther	Ireland	Perlman	Voigt
Curry	Jefferis, Nebr.	Porter	Volk
Darrow	Johnson, S. Dak.	Rainey, Ala.	Ward, N. Y.
Davis, Minn.	Kahn	Ransley	Wason
Dempsey	Kelley, Mich.	Rayburn	Weaver
Dickinson	Kennedy	Reber	Winslow
Doughton	Kindred	Rhodes	Wood, Ind.
Drane	Kinkaid	Riordan	Woodyard
Drewry	Kitchin	Robsion	Wurzbach
Driver	Kleczka	Rouse	Yates

Mr. VESTAL. Mr. Speaker, I move to dispense with further proceedings under the call.

The question was taken; and on a division (demanded by Mr. QUIN) there were—ayes 132, noes 13.

Mr. QUIN. Mr. Speaker, I ask for the yeas and nays.

The SPEAKER pro tempore. The gentleman from Mississippi demands the yeas and nays. Those in favor of taking the vote by the yeas and nays will rise and stand until counted. [After counting.] Five Members have risen, not a sufficient number, and the yeas and nays are refused.

Mr. QUIN. Mr. Speaker, I make the point of order that there is no quorum present.

Mr. HICKS. Mr. Speaker, I make the point of order that that is dilatory. The roll has just been called and disclosed the presence of a quorum.

The SPEAKER pro tempore. The Chair will state that it does not require a quorum to dispense with further proceedings under the call.

Mr. QUIN. Mr. Speaker, I appeal from the decision of the Chair.

The SPEAKER pro tempore. The gentleman from Mississippi appeals from the decision of the Chair. The question is, Shall the decision of the Chair stand as the decision of the House.

The question was taken, and there were—ayes 146, noes 1.

So the decision of the Chair stood as the decision of the House.

So the motion to dispense with further proceedings under the call was agreed to.

The doors were opened.

Mr. VESTAL. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 7102, the basket bill.

The question was taken; and on a division (demanded by Mr. QUIN) there were—ayes 116, noes 13.

Mr. QUIN. Mr. Speaker, I make the point of order that there is no quorum present.

The SPEAKER pro tempore. The gentleman from Mississippi makes the point of order that there is no quorum present. The Chair will count. [After counting.] One hundred and eighty-two Members present, not a quorum. The Doorkeeper will close the doors, the Sergeant at Arms will bring in absentees, and the Clerk will call the roll. The question is on the motion of the gentleman from Indiana that the House resolve itself into the Committee of the Whole House on the state of the Union for further consideration of the bill H. R. 7102.

The question was taken; and there were—yeas 197, nays 55, answered "present" 1, not voting 176, as follows:

YEAS—197.

So the motion was agreed to.

The Clerk announced the following pairs:

Until further notice:

Mr. Stiness with Mr. McClintic.

Mr. Kahn with Mr. Cantrill.

Mr. Treadway with Mr. Cockran.

Mr. Miller with Mr. Fisher.

Mr. Paige with Mr. Sullivan.

Mr. Sanders of Indiana with Mr. Driver.

Mr. Kennedy with Mr. Gallivan.

Mr. Larson of Minnesota with Mr. Stevenson.

Mr. Fess with Mr. Rayburn.

Mr. Burtness with Mr. Briggs.

Mr. Funk with Mr. Padgett.

Mr. Michaelson with Mr. Bell.

Mr. Rossdale with Mr. Doughton.

Mr. Burke with Mr. Smithwick.

Mr. Morin with Mr. Vinson.

Mr. Fitzgerald with Mr. Hooker.

Mr. Robsion with Mr. Linthicum.

Mr. Olpp with Mr. Wright.

Mr. Hutchinson with Mr. Swank.

Mr. Glynn with Mr. Drewry.

Mr. Henry with Mr. Bankhead.

Mr. Perkins with Mr. Park of Georgia.

Mr. Dickinson with Mr. Deal.

Mr. Johnson of Washington with Mr. Fields.

Mr. Kline of New York with Mr. Griffin.

Mr. Vare with Mr. Kitchin.

Mr. Strong of Pennsylvania with Mr. Black.

Mr. Ansorge with Mr. Carter.

Mr. Langley with Mr. Clark of Florida.

Mr. Fenn with Mr. Ten Eyck.

Mr. Krieder with Mr. Harrison.

Mr. Yates with Mr. Kunz.

Mr. Lineberger with Mr. Lyon.

Mr. Temple with Mr. Williams of Texas.

Mr. Frear with Mr. Tyson.

Mr. Cooper of Ohio with Mr. Upshaw.

Mr. Fuller with Mr. Drane.

Mr. Coughlin with Mr. Stoll.

Mr. Nolan with Mr. Riordan.

Mr. Knight with Mr. Sears.

Mr. Winslow with Mr. Taylor of Colorado.

Mr. Parker of New Jersey with Mr. Sabath.

Mr. Beck with Mr. Blanton.

Mr. Evans with Mr. Sisson.

Mr. Patterson of New Jersey with Mr. Weaver.

Mr. McPherson with Mr. Taylor of Arkansas.

Mr. Hicks with Mr. Hudspeth.

Mr. Davis of Minnesota with Mr. Kindred.

Mr. Codd with Mr. Rainey of Alabama.

The result of the vote was announced as above recorded.

The SPEAKER pro tempore. A quorum is present; the Doorkeeper will open the doors. The ayes have it, and the House accordingly resolved itself into the Committee of the Whole House on the state of the Union for the consideration of the bill H. R. 7102, and the gentleman from New York [Mr. HICKS] will take the chair.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 7102, with Mr. HICKS in the chair.

The CHAIRMAN. The House is in Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 7102, which the Clerk will report by title.

The Clerk read as follows:

A bill (H. R. 7102) to fix standards for hampers, round-stave baskets, and splint baskets for fruits and vegetables, and for other purposes.

The CHAIRMAN. When the bill was considered some time ago we had finished the reading of a certain portion of the bill. Nothing is pending, and the Clerk will read.

Mr. JONES of Texas. Mr. Chairman, I offer an amendment. Page 6, strike out subsection A of section 3.

The CHAIRMAN. The gentleman from Texas offers an amendment, which the Clerk will report.

The Clerk read as follows:

Page 6, line 24, strike out subsection A of section 3.

Mr. VESTAL. Mr. Chairman, I make the point of order that there was no amendment pending at the time that section 3 was read, and we had finished reading section 3 when we adjourned, but there was no amendment pending.

Mr. JONES of Texas. I desire to say in answer to the gentleman that several of us were trying to secure recognition when the gentleman having the bill in charge was recognized to move that the committee rise. The Clerk had not started to read section 4, and section 3 is pending before the committee, and there were three or four Members on their feet seeking recognition.

The CHAIRMAN. The Chair feels in view of the fact that the committee rose without opportunity having properly been

given to offer an amendment that the amendment is in order and overrules the point of order.

Mr. VESTAL. I think the gentleman is right—that he was on his feet.

Mr. MONDELL. Mr. Chairman, I rise in opposition to the amendment of the gentleman from Texas.

I think there is some ground for argument against the establishment of uniform standards of measures.

There is some ground for argument against the establishment of these standards, but I think there is much more ground for argument in favor of the establishment of standards in the interest of the producer and in the interest of the consumer; and let me suggest to my friend from Texas that if we are to have standards, of course they must be accurate standards, and they must be defined to a subdivision of an inch. You can not get away from that. If we are to have standards at all they must be standards that are defined accurately.

But I did not rise particularly, Mr. Chairman, to discuss the amendment; it was to call to the attention of the Members of the House the fact that it looked for a time this morning as though we were on the verge of a single-handed, personally conducted filibuster.

Mr. JONES of Texas. Mr. Chairman, will the gentleman yield for a question?

Mr. MONDELL. In just a moment. The gentleman from Texas who has just risen is not conducting that filibuster, and has no part in it. He is in good faith discussing the bill and its provisions. But I think, in view of the fact that it looks as though there was a filibuster on the horizon, it is the duty of all those on both sides who are in favor of the establishment of proper standards to remain here and keep a quorum in the committee. There may be differences of opinion as to the provisions of the bill, and I am sure that the Members of the House will give careful consideration to amendments that are offered and proposals of modification. But I am sure that we are all interested in having these questions settled one way or another, and the only way we can do that is by maintaining a quorum, by being here until this measure shall have been disposed of in accordance with the best judgment of the House. I want to appeal to gentlemen to remain, so that should there be a disposition to filibuster, that disposition may be discouraged.

Mr. JONES of Texas. Mr. Chairman, will the gentleman yield?

Mr. MONDELL. If I have the time I will yield.

Mr. JONES of Texas. I thoroughly agree with the gentleman that the standards should be accurately measured. I do not object to measurements of one-hundredth of an inch, but what I object to is that a man is not permitted to sell in any other container than those particular measures.

Mr. MONDELL. I think there is some ground of argument in favor of allowing the producer to sell in a variety of shapes, providing the content be the same. But the difficulty about that is that you leave the door open to fraud by inviting a multiplicity of containers. The purchaser can never be very certain just what he is purchasing unless you have some standards.

The CHAIRMAN. The time of the gentleman from Wyoming has expired.

Mr. VESTAL. Mr. Chairman, I rise to oppose the amendment of the gentleman from Texas [Mr. JONES]. I think the gentleman is mistaken in what this bill purports to do, in the first place. This bill does not purport to do anything except to establish standards by which the people of the country—and he says he talks for the American people—by which the people of the country will not be deceived as they have been deceived for years past. As a matter of fact, in the city of Cincinnati within the last two or three months more than 60 people have been arrested for using deceptive measures in that city.

Now, what we propose to do here is to make a general standard, so that there can be no opportunity for anybody who wants to do an honest business to deceive. Now, the gentleman from Texas says the measurements are brought down within a fraction of an inch. Of course, we make the standard that way, but there are tolerances so that no one who fails to come within half an inch is going to be prosecuted. This bill provides for tolerances.

Mr. JONES of Texas. It provides that there may be tolerances.

Mr. VESTAL. It provides that the Secretary of Agriculture shall fix tolerances. Of course, there will be tolerances. The gentleman knows that. This bill is not supposed to be so framed that a man who violates a measurement within half an inch is going to be prosecuted.

And another thing: This bill puts the burden on the manufacturers of the country. They are all in favor of it. They are anxious to have a standard. They are anxious to do this. If we make it unlawful to manufacture other than the standard sizes set out in the bill, there can be no complaint by the purchaser. He does not have to pay more for the standard basket. There is no royalty on these baskets. Anybody can manufacture these baskets who wants to. If a man is going to sell fruits or vegetables in a market he has to use a standard basket.

Mr. JONES of Texas. You require that he can only use a certain kind of basket.

Mr. VESTAL. If he wants to sell in the market he ought to sell in a standard basket, and I will say to the gentleman that the legislature of his State passed an act similar to this one.

Mr. JONES of Texas. Perhaps it was based on it.

Mr. VESTAL. Yes; and the law of the gentleman's own State will not permit any but a standard basket to come into the State.

Now, why not by Federal statute make a standard whereby the consumer will not be deceived by short-weight baskets? That is the whole proposition. Nobody who wants to do an honest business will be hurt. It is only the fellow who wants to do a dishonest business who will be hurt.

Mr. JONES of Texas. The gentleman says that under the law passed a little while ago—the unfilled basket law—they have been arrested. Why is not that law sufficient?

Mr. VESTAL. You are having different standards in different States probably. Let us have one Federal standard all over the United States, so that the man or the woman who goes down to the market and buys a basket of berries and buys what is supposed to be a quart will know that that measure has not a false bottom in it, but is a full quart.

Mr. JONES of Texas. That is the provision of the other bill.

Mr. VESTAL. No; that is in the standard container act that we passed here. Nobody would go back on that bill now. Now we have started to take it up from the quart measure to the 2-bushel basket. There is nothing in this bill that will hurt anybody who wants to do an honest business anywhere.

Mr. HUSTED. Mr. Chairman, will the gentleman yield?

Mr. VESTAL. Yes.

Mr. HUSTED. As the law now stands, is it not true that if you buy a basket of fruit the quantity of fruit you will receive for your money will depend upon the State in which you buy it?

Mr. VESTAL. Absolutely.

Mr. Chairman, in view of the fact that this bill has been up before and was passed by the Committee of the Whole House once with amendments—in view of the fact that the bill now before the committee is practically the same bill that we passed before as amended, I do not think we ought to take up a lot of time in discussing these sections, and I move that all debate on this amendment and all other amendments to this section be now closed.

The CHAIRMAN. The gentleman from Indiana moves that debate on this amendment and all amendments to this section be now closed.

The question being taken, on a division (demanded by Mr. QUIN) there were—ayes 88, noes 3.

Mr. QUIN. I make the point of order that there is no quorum present.

The CHAIRMAN. The gentleman from Mississippi makes the point of order that there is no quorum present. The Chair will count. [After counting.] One hundred and three Members present, a quorum. The question is on the amendment offered by the gentleman from Texas [Mr. JONES].

The question being taken, the amendment was rejected.

Mr. QUIN. Mr. Chairman, I move to strike out the last word.

Mr. MONDELL. Debate is closed on this section.

The CHAIRMAN. The Chair will say to the gentleman from Mississippi that debate on this section has been closed. The Clerk will read.

The Clerk read as follows:

SEC. 4. That the Secretary of Agriculture shall in his regulations under this act prescribe such tolerance as he may find necessary to allow in the capacities and specifications for hampers, round stave baskets, splint baskets, and parts thereof set forth in sections 1, 2, and 3 of this act, in order to provide for reasonable variations occurring in the course of manufacture and handling. If a cover be used upon any hamper or basket mentioned in this act, it shall be securely fastened or attached in such a manner, subject to the regulations of the Secretary of Agriculture, as not to reduce the capacity of such hamper or basket below that prescribed therefor. Each of the standard hampers, round stave baskets, and splint baskets mentioned in this act shall be truly marked by the manufacturer thereof, as his guaranty within the meaning of, and in accordance with, section 6 of this act, with its standard capacity content in legible letters and figures, to wit, 1 peck, one-half bushel, five-eighths bushel, 1 bushel, 1½ bushels, 2 bushels, 4 quarts, 8 quarts, 12 quarts, 16 quarts, or 24 quarts, as the case may be. The provisions of this act shall apply only to hampers and baskets made of wood or of which wood is the principal material.

Mr. VESTAL. Mr. Chairman, on page 10, line 25, the word "tolerance" should be "tolerances." I offer that amendment.

The CHAIRMAN. The gentleman from Indiana offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. VESTAL: Page 10, line 25, strike out the word "tolerance" and insert in lieu thereof the word "tolerances."

The amendment was agreed to.

Mr. VESTAL. I offer another amendment.

The CHAIRMAN. The gentleman from Indiana offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. VESTAL: Page 11, line 18, strike out the words "The provisions of this act shall apply only to hampers and baskets made of wood, or of which wood is the principal material," and insert in lieu thereof the following:

"The provisions in sections 1, 2, and 3 of this act, covering specifications and dimensions, shall apply only to hampers and baskets made of wood or of which wood is the principal material; but hampers and baskets which are not made of wood or of which wood is not the principal material shall not depart from the respective capacities therein prescribed."

Mr. VESTAL. Mr. Chairman, I do not care to take more than a minute in discussing this amendment. The bill as drawn provides that the act shall apply only to hampers and baskets made of wood or of which wood is the principal material. There might be such a thing as baskets made of other materials being placed upon the market, and my amendment provides that those other baskets shall not depart from the capacity content as set forth in sections 1, 2, and 3 of the act.

Mr. QUIN. Mr. Chairman, I think the gentleman from Indiana [Mr. VESTAL] is right in this amendment. While I am against this hamper provision, cutting out the seven-eighths hamper, I am convinced that the specifications should not prohibit the manufacture of hampers or baskets of other material, just so that the contents are not interfered with.

Under this bill without the amendment offered by the distinguished chairman [Mr. VESTAL] they could not use any other material except that specified herein; but it is absolutely necessary, in fairness to all portions of the country, that the amendment offered by the gentleman from Indiana [Mr. VESTAL] be adopted.

This measure as it comes before this House is a deceptive one. This Congress has passed all of the legislation that is necessary in the container act to insure fair dealing. Here you come up with a bill that does not affect the container which goes to the consumer. The vegetables from the farms in the United States are placed in hampers, baskets, or crates and sent by carload or train lots to the centers of the country for distribution.

Mr. HOCH. Will the gentleman yield?

Mr. QUIN. I have not time. The producer does not sell to the wholesaler by the crate. He sells in carload lots. But when the good housewife goes to buy her vegetables for to-day she does not ask for a bushel hamperful, she does not ask for a seven-eighths hamper, but she asks for so many tomatoes; she asks for 5 cents' or 10 cents' worth of beans.

Who in the world ever heard of a family going up and buying a bushel hamper of tomatoes for one meal or one day. Why, that is for the hotel or big boarding house. So you can see the opportunity for deception that is endeavored to be practiced in this humbuggery that they are putting out here now. You are injuring and hampering the farmers and endeavoring to fool the ultimate consumer. I just call the attention of the majority to some of the effects of the legislation they have enacted that is now reacting against them. Did you hear that howl out yonder in Iowa day before yesterday? There was a man running for the United States Senate in a Republican primary on a Democratic platform. [Laughter.] He stood up on the platforms throughout the State of Iowa, which is 75 per cent Republican, and denounced the Esch-Cummins Act, one of the chief authors of which is a Member of the United States Senate from that very State. He spoke for the American people—the farmers and the plain men and women. He told them that the Republican organization in Congress had taken the excess-profits tax off from the rich and powerful. He told them they were trying to put a sales tax on the poor. He told them the plain people must pay the taxes which this Republican organization and administration had taken off of the big corporations and trusts and combines.

Mr. VESTAL. Mr. Chairman, will the gentleman yield?

Mr. QUIN. I will give you all the time you want before I get through. As a result he told them that the legislation of this Republican administration was a humbug and a fraud upon the American laboring man and farmer. He demonstrated to the fair Republicans in the State of Iowa that the Republican organization in Congress and the administration were passing legislation for the benefit of the rich and powerful.

The CHAIRMAN. The time of the gentleman has expired.

Mr. QUIN. I ask for five minutes more.

The CHAIRMAN. The gentleman from Mississippi asks unanimous consent that his time be extended five minutes. Is there objection?

Mr. LAYTON. I object unless the gentleman will confine himself to the amendment.

Mr. HOCH. I object.

The CHAIRMAN. The gentleman from Kansas objects.

Mr. RAKER. Mr. Chairman, I move to strike out the last word. Mr. Chairman and gentlemen of the committee, there can be no doubt that legislation which makes honest containers and compels people to mark and sell that which they say they are going to sell is right. The purchaser is entitled to get what he asks and pays for. He should not be cheated and deceived. But I am wondering whether or not the committee had given this matter full consideration in two important particulars, provisions of which I want to call attention to.

On page 13 it provides:

Any individual, partnership, association, or corporation that willfully violates this section shall be deemed guilty of a misdemeanor, and upon conviction thereof shall be punished by a fine not exceeding $100, or imprisonment not exceeding 60 days, or both.

Now, I believe this is the first time that any legislature ever attempted to pass a law imprisoning a partnership, association, or corporation, and I wonder why the committee in this bill, where we are trying to get honest containers, has sought to inject this class of legislation that everybody knows can not be enforced, never has been enforced, and never will be enforced, and put an entire association, partnership, or corporation in prison. There is a way to punish the partnership, association, or corporation by fine. The individuals, like others, can be individually prosecuted and punished, but not the partnership, association, or corporation by imprisonment. I think it must have been a mistake on the part of the typewriter or the printer or some one who was engaged in the preparation of the bill. I think the chairman will concede that.

Mr. MORGAN. Will the gentleman yield?

Mr. RAKER. Yes.

Mr. MORGAN. I will state to the gentleman that the purpose of that language was to reach the partnership or corporation, and the imprisonment applies to the individual.

Mr. RAKER. The gentleman does not contend that you can arrest or imprison a partnership or association, does he?

Mr. MORGAN. The members of a partnership.

Mr. RAKER. The gentleman does not claim that you can imprison a corporation?

Mr. MORGAN. The fine relates to the association or corporation, and imprisonment relates to the individual.

Mr. RAKER. Let us not make ourselves ridiculous before the legal profession of the world by saying that you can arrest and imprison a partnership, an association, or a corporation. The statement of it is enough. Now, I am going on to something else. On page 16, beginning on line 3, is this provision. It is one that allows the department to violate every law of personal right and of property in individuals, partnership, association, or corporation. The provision reads as follows:

For said purposes the authorized officers and agents of the Department of Agriculture may visit factories, stock rooms, and other places of business where such hampers, baskets, or parts thereof are manufactured or held for sale or shipment, or offered for sale, may enter cars, vessels, other vehicles, and places under the control of carriers engaged in the transportation of such hampers, baskets, or parts thereof.

Here is a blanket law permitting the Department of Agriculture, without a search warrant, without any offense having been alleged to have been committed, to enter any building, any room, any house, any factory, any vessel, or any car in interstate commerce or otherwise and anywhere.

The CHAIRMAN. The time of the gentleman has expired.

Mr. RAKER. Mr. Chairman, I ask for four minutes more.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. RAKER. The general purpose of the legislation to be sought here compelling the seller to give the buyer what he pays for is all right, but clearly this provision does not intend to lay aside the protection of the individual in all places. There is not a single, solitary door of a room, private or otherwise, that an agent of this department could not walk up to or batter down, if necessary, and go in without any warrant of law.

Mr. WARD of North Carolina. Will the gentleman yield?

Mr. RAKER. Yes.

Mr. WARD of North Carolina. The gentleman is right about it. No bill with such a provision ought to pass any legislative body. But I rise to suggest with reference to the indictment of a corporation.

Mr. RAKER. I was alluding to the imprisonment of a corporation.

Mr. WARD of North Carolina. My judgment is that it is not unusual to pass a provision of that sort with reference to corporations. Of course, you can not imprison a corporation or association, but you can indict a corporation, and the fact that the imprisonment is in the same sentence does not impair it, because the imprisonment relates to the individual and not to the corporation.

Mr. RAKER. You can indict an association or a corporation, I do not question that, but of course it is impossible to imprison a partnership, association, or a corporation.

Mr. WARD of North Carolina. Certainly it is.

Mr. RAKER. And I am calling the attention of the committee to it, so that it may be amended. Now, in reference to the last provision in regard to search and seizure, it does not require an authorization, it just gives them a blanket order to go anywhere in the United States into any building, car, room, any place where they think—they do not have to say they believe—but where they think they can find these unlawful containers. Certainly you do not want to pass a law that gives any department authority to send its agents, for instance, to a train at Pittsburgh going west that has a lot of baskets on board, where they can stop the train, say they want to go in, order them to open the doors, and allow them to inspect them. You do not require any search warrant or anything else. Now, it is such legislation as that that makes the people dissatisfied. You start in with a bill designed to give proper legislation, to give certain relief from unlawful practices, and then in the same bill you sweep away every human right a man has to protect his place of business or the sanctity of his home.

Mr. KING. Mr. Chairman, will the gentleman yield?

Mr. RAKER. Yes.

Mr. KING. Was it not that same condition and activity on the part of the Government along those lines of which the gentleman has spoken that succeeded in ousting the last Democratic administration?

Mr. RAKER. Oh, to answer my friend, I would say that that was the complaint, but it was an unjustifiable complaint. The search and seizure exercised was against those who were trying to destroy the Government, which the gentleman believes in maintaining. We had to have drastic laws, and we had to enforce them, where a man was not patriotic and was attempting to break down our Government and the enforcement of our laws. The cases are comparable. But even in war times you had to have a search warrant. Now, in peace times, you want to violate all right of the person by search and seizure, without proof, order, or warrant. It will not do. This must go out of this bill.

The CHAIRMAN. The time of the gentleman from California has again expired. The question is on the amendment offered by the gentleman from Indiana [Mr. VESTAL].

The amendment was agreed to.

Mr. DUNBAR. Mr. Chairman, I offer the following amendment which I send to the desk.

The Clerk read as follows:

Amendment offered by Mr. DUNBAR: Page 11, line 10, after the word "hampers," strike out the comma and insert "and." After the word "baskets," strike out the comma. On line 11, strike out "and splint baskets."

Mr. DUNBAR. Mr. Chairman and gentlemen of the committee, I have here before me a sample of a splint basket—two of them. I represent the manufacturer who makes these baskets and sells them. He makes something like 60 different types of baskets, hampers, and containers. He does not object to any regulation which may specify the cubic contents of any container or hamper which he manufactures. He does not object to marking the cubic contents of any basket or hamper which he manufactures and which it is possible for him to mark. These baskets I have here are made out of sycamore wood, out of beech wood, or any cheap sort of wood that can be obtained. The splints are very thin. You can almost tear them with your fingers like a piece of paper. When these baskets are manufactured they are so wet that it would be impossible to mark them with any legible letters, and because of their being wet, the sap and the moisture being in the wood, the ink of any mark that you would put upon them would simply run down the side and make the marking illegible. These baskets are so cheap that the manufacturer sells them, one for the sum of 52 cents a dozen and delivers them 350 miles, and the other at 60 cents a dozen delivered 350 miles from the point of manufacture.

When these baskets are first manufactured they are not in condition for shipment. They are stacked up two or three dozen high and put into a drying room, and then by the use of steam the baskets are dried. After they have gone through the drying process they are shipped to the purchaser. What would be necessary in order to mark these baskets? First, you would have to put them into your drying room, and then after they were dried out, take them out of that room, take them apart, and stamp them with whatever stamp was required.

These baskets are made in sizes from 4 quarts up to one-half bushel. Some time ago we passed legislation specifying the dimensions of climax baskets, but, as I understand it, we never required such a basket to be marked for the simple reason that many of them are made out of wood of this sort. I believe that this bill provides that all climax baskets of 4 quarts even now shall be exempted from marking.

This manufacturer makes 100,000 dozen of these baskets a year, and I submit that to put him to the additional labor, trouble, and expense of marking the baskets is altogether unreasonable.

The CHAIRMAN. The time of the gentleman from Indiana has expired.

Mr. DUNBAR. Mr. Chairman, I ask unanimous consent to proceed for one minute more.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. DUNBAR. He does not object to complying with any requirements which we make in respect to the size of the basket, nor does he ask to be exempt from stamping any of the other containers that he manufactures, but to stamp these baskets is a physical impossibility when the basket is made.

Mr. LONDON. Mr. Chairman, will the gentleman yield?

Mr. DUNBAR. Yes.

Mr. LONDON. To what extent do the standards set up by the bill conform to the standards in actual use? I mean in general use.

Mr. DUNBAR. I do not know.

Mr. LONDON. Do the standards set up by the bill differ substantially from the standards now in existence?

Mr. VESTAL. No. They use the same standards that we put in the bill, and we are exempting all of the standards except those mentioned in the bill.

The CHAIRMAN. The time of the gentleman from Indiana has again expired.

Mr. VESTAL. Mr. Chairman, I move to strike out the last word. There are 75 different sizes of hampers used in the United States to-day. This bill proposes to establish 6 instead of 75, to cut out all of the rest of them so that the manufacturer will manufacture only 6 different sizes.

Mr. LONDON. The bill makes it unlawful——

Mr. VESTAL. To manufacture any other except those six, and all of the manufacturers desire it, because they can do away with all of their forms, and they can manufacture much more cheaply. We have in some States this sort of condition. We have the 32-quart basket, which is the bushel, and they manufacture the 32-quart baskets. Somebody conceived the idea that he could make his basket in a certain form to look like the 32-quart and have it contain only 31 quarts. Therefore, they started in on the 31 quarts. Then some other fellow thought that he could beat that a little bit, and he made one that held only 30 quarts, which looked just like the 32-quart basket. They even got down as low as 27½ quarts, and they are selling them in the country for 32-quart baskets. We propose to cut out the 30, the 31, the 29, the 28, and 27, and make the 32-quart container a standard basket, and it will reduce the cost of manufacture and ought to reduce the cost to the consumer.

Mr. LONDON. There is another question I want to ask. To what extent are these baskets employed in interstate commerce?

Mr. VESTAL. Oh, very largely.

Mr. LONDON. The gentleman means that goods are transshipped in those baskets?

Mr. VESTAL. Oh, yes; vegetables and fruits.

As to the amendment offered by my colleague from Indiana, I can state, of course, that there might be in this particular case that he mentions some little hardship upon the manufacturer, but I do not believe it is right to exempt just the splint basket when all manufacturers are desirous, and his own manufacturer is desirous, of stamping every other basket except the splint basket.

Mr. LONDON. Will the gentleman permit——

Mr. VESTAL. It is true it is only an added precaution. Now, I can readily see that if a manufacturer is prohibited

from manufacturing any sort of basket other than a standard basket, it probably does not need to be marked. It is only an added protection to the purchaser and the ultimate consumer. Of course, there is this protection. There is the protection to the consumer from having the basket marked by the manufacturer. If somebody in the retail trade, for instance, would put upon the market a basket that was a short basket, all they would have to do would be to trace that basket to the manufacturer, and the consumer is not held responsible for having put that basket out on the market. We try to help the consumer all the way along the line. We put the burden on the manufacturer, and the manufacturer is willing to bear it. There is not a manufacturer in the United States that I know of that is opposed to this bill except a few manufacturers down in some of the Southern States who would like to have a seven-eighths bushel basket made a standard. That is the only exception we have found in regard to the manufacturers. If I had time—and I do not want to take up time—I had a letter the other day from a manufacturer out in the Middle West, and he wrote me asking about this bill and when I thought the bill would come up. He said that he had an order for a lot of 14-quart baskets, and he said he did not want to manufacture those baskets if they are not standard. I wrote to him that I hoped the bill would be passed in a short time. Before he received my letter he wrote me again, and he said, "Mr. VESTAL, it does not make any difference; this same firm found a manufacturer who would manufacture a 13½-quart basket that looks like a 14-quart basket, and therefore we have lost the business." But if you have standard baskets, hampers, and so forth, the manufacturer will increase the scope of his territory for sales all the while. He can sell in any State in the Union, and it seems to me—I may be wrong about it—but it seems to me that no one could object to a standard basket that would give to the consumer what he purchases, especially when it will serve to reduce the cost to the consumer.

The CHAIRMAN. The time of the gentleman has expired.

Mr. QUIN. Mr. Chairman, I make the point of order that there is no quorum present.

The CHAIRMAN. The gentleman from Mississippi makes the point of order that there is no quorum present. The Chair will count. [After counting.] Eighty-six gentlemen are present, not a quorum. The Clerk will call the roll.

The Clerk called the roll and the following Members failed to answer to their names:

Anderson	Fairfield	Kreider	Rouse
Andrew, Mass.	Faust	Kunz	Rucker
Ansorge	Fenn	Lampert	Ryan
Arentz	Fess	Langley	Sabath

Evans	Knight	Robsion	Zihlman
Fairchild	Kopp	Rosenbloom	

The committee rose; and Mr. WALSH having resumed the chair as Speaker pro tempore, Mr. HICKS, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee, having had under consideration the bill H. R. 7102, finding itself without a quorum, under the rule he caused the roll to be called. Whereupon 228 Members responded to their names, and he presented the list of absentees for entry in the Journal.

The SPEAKER pro tempore. The committee will resume its sitting.

The committee resumed its sitting.

Mr. WINGO. Mr. Chairman, the very able and genial gentleman from Indiana [Mr. DUNBAR] has called attention to just one of the incongruities of this bill. Of course, any intelligent man who knows anything about the manufacture of the baskets that he displayed knows that it is practically a physical impossibility to comply with the requirement in the basket he exhibited, and if you were to comply with that requirement it would add from 25 to 50 per cent to the cost of the basket. You must remember, Mr. Chairman, what the object of the bill is and under what power Congress seeks to enact this kind of law. You must remember that under the Constitution the Congress has the power to fix the standards of weights and measures, and it is under that constitutional authority that the pretense is made of enacting this law. The Constitution nowhere gives the Congress the power to fix the container or the shape or quality——

The CHAIRMAN. The committee will be in order.

Mr. WINGO. Those gentlemen have already gotten their orders from certain organizations and they are going to swallow this, Constitution or no Constitution, and, therefore, I do not care whether they listen or not. Mr. Chairman, I was saying that nowhere in the Constitution is the Congress given the power to fix the composition of the container, the shape of the container, or its color or its texture. The difficulty in discussing a bill of this kind is that those who have little respect for our system of government, or, to be more charitable, are lacking in information as to the character of our dual system of government, do not stop and think about these things. They just see the evil, and they see that local courts and local communities have failed to remedy the evil, so they rush to Washington and to the Congress.

Now, of course, gentlemen, I agree that the frauds complained of ought to be eradicated. And I have in my own way done all I could to bring about prosecutions for such deceptive practices as are referred to by the supporters of this bill. I challenge any lawyer within the sound of my voice to deny that he can prosecute in the State courts of any State in this Union every fraud that you seek to prevent and every evil you seek to eradicate by this bill. All you need is a grand jury with courage, and a prosecuting attorney, or whatever you call your local prosecuting officer, with the courage and intelligence, and a petit jury of backbone, to correct it. That is all you need.

Now, gentlemen, that is not the real object of your bill. I am not deceived about it. You can not drag any herring across my path and say that there are manufacturers opposing it. It is a manufacturers' bill. If I consulted the question of political expediency, I would be for it. The biggest fruit man in the world lives in my district, and he is my personal friend. He does not know any more about the Constitution than I do about growing peaches, and I do not know anything about that. He wants to eradicate this evil, and does not know that he could do it in the State courts if he wished to do so. But, gentlemen, I am trying—I do not know whether I will have the courage to keep it up or not—I am trying to get back to where I wish I had started, and that is to have some respect for the division of powers in our Government, and I can do it in this bill without any charge of selfishness. But, gentlemen, I know the uselessness of crying out against something like this. I beg you lawyers, you men who know something about the philosophy of government, to read the provisions of this bill. I believe if there is any man in this House that will conscientiously read it and forget the pressure that has been brought to bear for it, he can not vote for it unless certain provisions are eliminated. The gentleman practically admitted a while ago that 75 types of baskets will be reduced to 6 by this bill. Does the Constitution give me the right, a citizen of Arkansas, by my vote, to say to a Pennsylvania manufacturer that he shall cease the manufacture of a bona fide, honest article of commerce that is neither deceptive in its construction or in the quantity of its contents? That is what you do by this bill. And I am not going to do it, gentlemen. Oh, I know there are few Members here, and when the roll is called

more will come in and, following the committee, vote for the bill. That is the reason for most of the evil legislation we have here in Congress. This House is conscientious. It is a wonder that it, considering the volume of its business, does not make more errors than it does. But are you going to place an increasing burden on the taxpayer by this bill?

The CHAIRMAN. The time of the gentleman from Arkansas has expired.

Mr. WINGO. Mr. Chairman, I ask unanimous consent for five minutes more.

The CHAIRMAN. The gentleman from Arkansas asks unanimous consent to proceed for five minutes more. Is there objection. [After a pause.] The Chair hears none.

Mr. WINGO. Has the American Congress come to that point where it says that it is willing to give some little agent appointed by the Federal Government the right to enter a vehicle or to enter a warehouse or a freight shed without charging that there are fraudulent baskets in there? He just wants to test it and earn his salary. Possibly nobody has complained, but he will have a right to hold up a shipment when the grower is waiting for baskets in which to ship his fruit or vegetables. You do not have to do it if you pass the other part of the bill. At least save some semblance of respect for that provision of the Constitution which has to do with search and seizure——

Mr. REED of West Virginia. It is claimed that the provision as to search for baskets is even more drastic than our friend VOLSTEAD'S provision as to search for booze.

Mr. WINGO. There is no question about it. It comes in here without any semblance of a claim of basing it on a fraudulent action or any violation of the law. Is it just an ordinary test to see if they comply with the law? No. But to see if they comply with some regulation made hereafter by a bureau down here. You do not have to do that in order to carry out the main purposes of your bill. Do not do that.

I wish it would be possible to standardize everything in this country. I wish it would be possible to standardize shoes. God forbid a government that would say you would have to wear one of six types of shoes. Somebody might say you should standardize ladies' hats. God forbid a government that would fly into such Bolshevism where by law you would restrict a woman in the choice of hats. [Applause.] That would be parallel to what you do in this bill. You make it unlawful for a man to manufacture a basket and stamp it with its honest contents. And if a man happens to buy it, unless he gets a written certificate from the manufacturer, he can be prosecuted.

Mr. CLARKE of New York. Do you not think a part of this is to insure getting a full quart instead of a full bushel basket? [Laughter.]

Mr. WINGO. I do not think it is. As I started to say, you not only pile up the expense of additional cost that the gentleman from Indiana called attention to but you are creating other bolshevistic inspectors, and these inspectors have to break into a place and test and make a showing of earning their salary, have they not? You are going to the limit in this tendency sooner or later, and the American people will wake up after a while to what you are doing.

The people will find out after a while that in the philosophy of English jurisprudence, in the philosophy of the common law, all they need is an honest court, and a courageous grand jury, and a courageous local State judge, and a courageous local prosecuting officer, and a courageous, intelligent petit jury to remedy most of these evils they complain of. What this country needs is not more law. It needs a more honest, intelligent, sincere enforcement of the laws you already have.

Mr. MOORE of Virginia. Having a courageous court and a courageous jury, will not the gentleman explain how you are going to put in jail or the penitentiary a corporation?

Mr. WINGO. Address that to these gentlemen. The provision in this bill as to imprisoning an association or a partnership to a lawyer is not any more ridiculous than other provisions I called attention to.

The CHAIRMAN. The time of the gentleman has again expired.

Mr. HUSTED. Mr. Chairman, I move to strike out the last two words.

Mr. Chairman, this is not the most important bill that has been before the Congress, but it is a bill which I think should be passed. I believe it is in the interest of honesty, of efficiency, and of economy. At one time I happened to be a member of the committee which has reported this bill for the consideration of the Committee of the Whole, and I heard a good deal of the argument at that time. It was quite convincing.

Now, there are baskets which are designed to defraud and do defraud, and there are other baskets which are not designed to defraud but which do deceive the public. And the requirements as to the content of baskets, whether they are bushel or half-bushel baskets or peck baskets or quart baskets, are not the same in the different States throughout the country.

In some States the contents are larger than in others, so that if you are buying a bushel basket of a certain product the actual quantity that you get depends upon the State you buy it from. I remember an illustration was given of a man buying a certain kind of seed grain, and the price quoted in one State was very much less than that quoted in another State, and the seed grain was supposed to be of uniform quality. But when the man got his grain he found that he paid the most in the State which charged the least, because of the difference in the quantity of the grain in the container.

It is also in the interest of efficiency, because you are going to be able to get baskets more quickly delivered of any definite size if you pass this bill than you can at the present time. Under present conditions the manufacturers of baskets are compelled to carry a lot of odd sizes because there are a great many different sizes in common use, and in order to meet the demands of his customers he is compelled to carry at great expense these odd sizes in order to make prompt delivery of orders.

Mr. LONDON. Mr. Chairman, will the gentleman permit a question?

Mr. HUSTED. Yes.

Mr. LONDON. How many States have similar legislation?

Mr. HUSTED. I do not know how many States have. There are States that have. How many I do not know.

There is another matter: It is really in the interest of economy to pass this legislation, because if the manufacturer has to carry a lot of odd sizes it is going to cost him more to make baskets than if you reduce the number to a few common standards. It is not going to cost him as much. He will not have to carry as much raw material in stock and he can make his goods at less cost, with less overhead and less labor, and with less machinery than he is compelled to use at the present time.

Mr. JONES of Texas. Mr. Chairman, will the gentleman yield?

Mr. HUSTED. Yes.

Mr. JONES of Texas. I notice that the original basket act prohibits the manufacture and shipment of these baskets in interstate commerce. Does not the gentleman think that is a better way to get at a proposition of this kind rather than by prohibiting the sale by the individual of every basket of fruit that is sold around in the local communities? This original basket act prohibits the manufacture and shipment of baskets that do not conform to the prescribed measures.

Mr. HUSTED. I think we can within our powers here pass legislation to protect the public from baskets that deceive, whether they are designed to deceive or not. There are many of these baskets that are not designed to deceive, that are innocently used, which do deceive the purchaser.

Mr. JONES of Texas. Would not the better way to get at that be to prohibit the shipment and manufacture of certain sizes of containers rather than the product? What would prevent the fruit grower from using crates and little boxes of different sizes?

Mr. HUSTED. The necessities of the trade control that. The producer has got to use what the public demand, or he can not sell his fruit. No manufacturer can arbitrarily change the customs of the people.

Mr. JONES of Texas. A great deal of fruit is sold in crates.

Mr. HUSTED. That is so; but even when the fruit is sold in crates it is sold in baskets in the crates.

Mr. DUNBAR. Mr. Chairman, will the gentleman yield?

Mr. HUSTED. Yes.

Mr. DUNBAR. Is the gentleman aware that under a provision of this act none of the Climax baskets under a quart need be stamped, and there is no protection offered to the poor man?

Mr. MORGAN. The bill specifically provides the sizes of containers under one section.

Mr. HUSTED. I am not a member of the committee, and have not heard all of the discussion, and I have not read the hearings. It is possible that this bill shall be amended in some respects. But I am contending for the general principle. I believe that the general principle is absolutely right, and I believe that some of the most important work that is being done in this country to-day for the assistance of business is the standardization work which is being carried on now under the direction of the Bureau of Standards. Of course, we do not want to standardize shoes, and we do not want to standardize women's hats, but there are certain limits within which standardization work can be done, and it is in the interest of

the people that it should be done. It means economy, it means efficiency, it means less cost, and it is in the interest in this case of common honesty. [Applause.]

The CHAIRMAN. The time of the gentleman from New York has expired.

Mr. VESTAL. Mr. Chairman, I move that all debate on this section and all amendments thereto be now closed.

The motion was agreed to.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Indiana [Mr. DUNBAR].

The question was taken, and the Chairman announced that the "noes" appeared to have it.

Mr. DUNBAR. A division, Mr. Chairman.

The CHAIRMAN. A division is asked for.

Mr. MORGAN. Mr. Chairman, may we have the amendment read again?

The CHAIRMAN. Without objection, the amendment will again be read.

The Clerk read as follows:

Amendment offered by Mr. DUNBAR: Page 11, line 10, after the word "hampers," strike out the comma and insert "and"; after the word "basket" strike out the comma; on line 11 strike out "and splint baskets."

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Indiana [Mr. DUNBAR].

The committee divided; and there were—ayes 6, noes 37.

So the amendment was rejected.

Mr. QUIN. Mr. Chairman, I make the point of order that there is no quorum present.

The CHAIRMAN. The gentleman from Mississippi makes the point of order that there is no quorum present. The Chair will count. [After counting.] One hundred and nine gentlemen are present, a quorum.

Mr. GARRETT of Tennessee. Mr. Chairman, I move to strike out on page 11, beginning in line 10, all after the word "therefor," down to and including the end of the section.

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Tennessee.

The Clerk read as follows:

Amendment offered by Mr. GARRETT of Tennessee: Page 11, line 10, after the word "therefor," strike out the remainder of the section.

The CHAIRMAN. The question is on agreeing to the amendment.

Mr. GARRETT of Tennessee. Mr. Chairman, is debate closed on this section?

The CHAIRMAN. Debate is closed on this section. The question is on agreeing to the amendment offered by the gentleman from Tennessee.

The question was taken, and the Chairman announced that the "noes" appeared to have it.

Mr. GARRETT of Tennessee. Mr. Chairman, I ask for a division.

The CHAIRMAN. The gentleman from Tennessee asks for a division.

The committte divided; and there were—ayes 24, noes 40.

Mr. GARRETT of Tennessee. Mr. Chairman, I ask for tellers.

Tellers were ordered, and the Chairman appointed Mr. VESTAL and Mr. GARRETT of Tennessee.

The committee again divided, and the tellers reported—ayes 25, noes 53.

Accordingly the amendment was rejected.

Mr. QUIN. I make the point of order that there is no quorum present.

Mr. BEGG. I make the point of order that the point of no quorum made by the gentleman from Mississippi is dilatory, and I refer the Chair to the ruling made by Mr. Speaker GILLETT on July 24, 1919.

Mr. QUIN. The vote just taken discloses that there is no quorum present.

Mr. BEGG. On July 24, 1919, Speaker GILLETT held a motion made by the gentleman from Michigan [Mr. CRAMTON] to be purely a dilatory motion on the ground that the Chair was satisfied that the purpose of the motion was solely to delay proceedings.

Mr. WINGO. Mr. Chairman, I hope the Chair will not permit himself to sustain the point of order. Since the Chair counted there have been some proceedings, and at the time the Chair counted there were only nine more than a quorum. There has been a division, there have been tellers upon an important amendment, and certainly the Chair ought not to hold the point dilatory; but the Chair, I presume, will count for himself, which is his prerogative, if he is not willing to take the count of the tellers.

Mr. BEGG. Mr. Chairman, I will say in reply to the gentleman from Arkansas that on this same precedent which I have cited to the Chair the same condition prevailed—that is, some business had been transacted in the way of counting a quorum and putting a motion.

Mr. WINGO. I think if the gentleman will read the citation——

Mr. BEGG. If the gentleman from Arkansas will just listen, the Chair at that time found that the point was dilatory; that it was evident to the Chair, as well as to the House, that the purpose of the motion was only to delay proceedings. There is no constitutional right involved in the gentleman's point of no quorum in the Committee of the Whole. The only purpose that can be accomplished is to delay the proceedings, and I submit to the Chair that the precedents are numerous when the Chair has held that motions similar to this are dilatory.

Mr. WINGO. Will the gentleman yield for a question now?

Mr. BEGG. Yes.

Mr. WINGO. Will the gentleman tell the Chair what the facts were upon which Speaker GILLETT ruled? Had there been a division in the committee and also a teller count disclosing less than a quorum?

Mr. BEGG. If the Chair wants to hear the facts, I will refer the Chair to the precedent.

The CHAIRMAN. If the gentlemen are willing, the Chair will ascertain whether or not a quorum is present, because in the opinion of the Chair there probably is a quorum present. [Laughter.]

Mr. DUPRÉ. The Chair seems to be anticipating his count. [Laughter.]

The CHAIRMAN. There was no quorum voting on the count by tellers, but the Chair observed that there were about 20 gentlemen who did not pass between the tellers. So the Chair is of the opinion that a quorum is present. The Chair will count.

Mr. BEGG. If the Chair does not rule on this, that point can be made all the afternoon.

Mr. WINGO. I make the point of order that the point made by the gentleman from Ohio is dilatory.

The CHAIRMAN. The Chair will ascertain whether or not a quorum is present. [After counting.] One hundred and eight Members present, a quorum.

The Clerk read as follows:

SEC. 5. That in order to provide for the more economical use of space in packing or transportation, or for the greater conservation of material or labor in manufacture or handling, or of the contents in course of shipment of hampers, round stave baskets, and splint baskets for fruits or vegetables, or parts thereof, the Secretary of Agriculture, whenever he finds it necessary, may, in his regulations, prescribe specifications and tolerances with respect to the strength of the material used, or the dimensions thereof, for such hampers, round stave baskets, splint baskets, or parts thereof, in addition to, differing from, or superseding those set forth in sections 1, 2, and 3 of this act, but not departing from the respective capacities therein prescribed. Such specifications and tolerances shall not be made effective until a period of at least six months shall have elapsed after public notice shall have been given, following an opportunity afforded the interested public for a hearing.

Mr. GARRETT of Tennessee. Mr. Chairman, I move to strike out the last word. I think possibly an opportunity will come at a later stage of the proceedings to have a vote upon the amendment which I offered a few moments ago in good faith, to strike out a certain part of the section which has just been passed.

I am not resisting this bill, but I do not see how I could vote for the bill with the provision in it which I attempted to strike out; that is, the provision requiring these boxes and baskets that come within the provisions of this act to be stamped. That will impose a hardship, not upon the manufacturer, because, of course, he will have to pass the cost along to the consumer of the baskets and ultimately to the consumer of the fruit that is in the basket. It will impose a hardship upon the purchaser of the fruit. There is no way now known by which in the manufacture of these baskets a statement of the contents can be automatically stamped upon them. It will have to be done by hand with a rubber stamp or some other process. In other words, every box or basket that is made will have to be hand touched, and it will probably add half or a quarter of a cent to the cost of every basket that is manufactured, which, of course, has got to be passed along to the ultimate consumer.

Mr. VESTAL. Will the gentleman yield?

Mr. GARRETT of Tennessee. I yield to the gentleman from Indiana.

Mr. VESTAL. I may be mistaken about it, but I understand that in practice every basket-manufacturing concern in the United States puts a stamp on the basket by machinery at the

time the basket is made, and that it will cost nothing extra to stamp these baskets at the time they are made. I may be wrong about it, but that is the information I have.

Mr. GARRETT of Tennessee. I will say to the gentleman that I think he is wrong about it. I hold in my hand a letter from one of the largest manufacturers of this class of articles with whom I am familiar. It is a letter from the firm of B. C. Jarrell & Co., of Humboldt, Tenn., which is one of the greatest fruit and vegetable shipping points in the United States or in the world. This factory is located there. This letter says:

> The marking or stamping of the size of the package on each package can not be done automatically, but will have to be done by hand, at a very considerable added cost of the package, which expense, of course, will have to be borne, if the provision is retained in the bill, by the consumers of the packages.

That is the provision I undertook to have stricken out. The letter continues:

> If it becomes unlawful for any other sizes of packages described other than those covered by the specifications to be manufactured, we see no reason why the size of the container should be marked on it. We believe there should be a provision made in the bill penalizing any manufacturer who after the law becomes effective shall make containers other than the sizes specified in the bill, which are covered by the provisions of the bill, and if that is done no manufacturer in the country would be guilty of making off sizes, regardless of the pressure that might be brought to bear by consumers who would desire to use off-sized or snide packages.

Then he goes on to say that if he has to stamp them it will add to the cost of the containers. Your bill makes it unlawful to manufacture a package of a different size, and then you have a provision here that requires them to stamp the container.

Mr. VESTAL. Will the gentleman yield?

Mr. GARRETT of Tennessee. Yes.

Mr. VESTAL. I think the gentleman was not in the Chamber when the question was up for discussion. I made the statement then that it was simply an added protection. I am not so much concerned about this particular provision in the bill, but having the information that I had from a number of manufacturers that it would cost no more, I thought it would be an added protection to the man who handled the packages, the retailer, to be able to trace the package or basket back to the manufacturer if it contained less than the standard requirement.

Mr. QUIN. Mr. Chairman, I move to strike out the last two words. This question about stamping the baskets which the farmer is using in shipping in carload lots is not at all interesting to the farmers of this country. I want to tell the Republican organization one thing that the farmers are interested in. For six long years they have been begging and knocking at the doors of Congress for you to turn the Muscle Shoals project in Alabama into a fertilizing factory, so that the farmers can get cheap fertilizers for their farms. For six long months the Military Affairs Committee of the House, of which I am a member, has been working away, sitting all day, and has finally brought out a report for you to consider, and now it is time for you to bring forward a rule in the House that the Congressmen, the Representatives of the people of the United States, vote on the question whether or not the proposition shall be turned over in the manner recommended by the minority of our Military Affairs Committee to this great wizard, Mr. Henry Ford, who is desirous of running this great enterprise whereby 500,000 people will be employed and the streams of the Tennessee River and others employed in transporting on its bosom from Alabama, Tennessee, and Georgia coal, iron, steel, lumber, and the fertilizing products of this great nitrate plant—which is standing idle awaiting for the dams which are to be completed—which will be taken into the Ohio and the Mississippi Rivers and the tributaries, down the Mississippi to the Gulf of Mexico, thus to the heart of the United States and to all the markets of the world. I call upon the Republican side, with 230 majority, to bring in a rule and let the Representatives say whether or not you will turn over the development of this great plant to Mr. Ford for the benefit of the American people. Let the farmers know if you will pass that bill, and let Henry Ford take from the air nitrogen and make fertilizer and get it to the farmers at a price of about one-half of what they have to pay now.

Mr. MONDELL. Mr. Chairman, a point of order. Knowing the great interest that the gentleman from Mississippi has in this bill, I must insist that he discuss the bill.

Mr. QUIN. Mr. Chairman, the Republican leader does not want the House to know what my committee, the Committee on Military Affairs, with 15 Republican members and 6 Democrats, have been engaged in since the 7th day of February. [Laughter.] We even went down to Alabama and inspected this great plant and visualized it personally. After all the study and hard work, after coming forward to this House with the report of 12 in favor and 9 against reporting the bill, and 10 of us for including the Gorgas steam plant and transmission line, and 11 against that provision that Ford demands, and I say he should have, he is unwilling that I should state the facts and urge the Republican Rules Committee to bring out a rule for the consideration of the most important measure that has been before Congress within the last 50 years. [Applause.]

The CHAIRMAN. The time of the gentleman from Mississippi has expired.

Mr. QUIN. Mr. Chairman, I ask for five minutes more.

The CHAIRMAN. The gentleman from Mississippi asks for five minutes more. Is there objection?

Mr. VESTAL. I object.

Mr. WINGO. Mr. Chairman, I offer the following amendment. I move to strike out on page 11, lines 21, 22, 23, 24, 25, and on line 1, page 12, down to and including the word "thereof," and in line 3 on page 12 strike out the words "specifications and."

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

> Amendment by Mr. WINGO: Page 11, line 21, strike out all of lines 21, 22, 23, 24, 25, and on page 12, all of line 1 down to and including the word "thereof," and in line 3 on page 12 strike out the words "specifications and."

Mr. VESTAL. Mr. Chairman, I am willing to accept that amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Arkansas.

The question was taken, and the amendment was agreed to.

Mr. VESTAL. Mr. Chairman, I ask unanimous consent that all debate on this section and amendments thereto close in five minutes.

The CHAIRMAN. The gentelman from Indiana asks unanimous consent that all debate on the section and amendments thereto close in five minutes. Is there objection?

There was no objection.

Mr. DUNBAR. Mr. Chairman, I move to strike out the last word. The gentleman from Indiana in charge of the bill was very magnanimous when he admitted that there was virtue in the reasons I gave why the splint baskets which I exhibited should not be stamped. But in the interest of the general good he thought that the bill providing for stamping of all baskets should be insisted upon in order that the bill's principal virtues might be maintained. I want some information from the gentleman from Indiana in reference to what is contained in section 5. Now, you provide for tolerances. In manufacturing a splint basket the tolerance required is very large, more than the tolerance that might be required in other forms of baskets. As was stated by the gentleman from Texas a splint basket made out of sycamore wood will contract or expand with the amount of moisture contained in the splint so as to make a difference in the size of the basket of at least 10 per cent. How would any tolerance be provided for in a basket containing 4 quarts, when by its being wet or dry there would be a difference of 10 per cent in the cubic contents of that basket?

Mr. VESTAL. Oh, I do not think there would be any trouble at all in the Secretary of Agriculture, through the Bureau of Markets or whatever agency he has, providing tolerances that would be perfectly acceptable to the manufacturer of baskets. I do not know what that tolerance would be, but certainly there ought not to be any question about the tolerance.

Mr. DUNBAR. Then would it be the gentleman's idea that the Secretary of Agriculture would provide a tolerance for a basket made out of one substance and a basket made out of another?

Mr. VESTAL. Those things all have to be taken into consideration.

Mr. DUNBAR. And there would be, therefore, a larger tolerance for baskets made from splints than there would be for baskets made of staves?

Mr. VESTAL. Certainly.

The CHAIRMAN. The time of the gentleman from Indiana has expired.

Mr. ROGERS. Mr. Chairman, I move to amend in lines 8 and 9 by striking out the words "specifications and."

The CHAIRMAN. The gentleman from Massachusetts offers an amendment, which the Clerk will report.

The Clerk read as follows:

> Amendment offered by Mr. ROGERS: Page 12, lines 8 and 9, strike out the words "specifications and."

Mr. ROGERS. That is simply the corollary to the amendment of the gentleman from Arkansas.

Mr. VESTAL. I accept the amendment.

The CHAIRMAN. The question is on agreeing to the amendment.

The amendment was agreed to.

MESSAGE FROM THE SENATE.

The committee informally rose; and Mr. WALSH having taken the chair as Speaker pro tempore, a message from the Senate, by Mr. Craven, its Chief Clerk, announced that the Senate had passed with amendments joint resolution of the following title, in which the concurrence of the House of Representatives was requested:

H. J. Res. 127. Joint resolution to reerect the statue of Abraham Lincoln upon its original site.

FIXING STANDARD PRICES FOR FRUIT AND VEGETABLE BASKETS.

The committee resumed its session.

The Clerk read as follows:

SEC. 6. That it shall be unlawful to manufacture for sale or shipment, sell, offer for sale, or ship, or to import or cause to be imported into the continental United States hampers, round stave baskets, or splint baskets for fruits or vegetables, either filled or unfilled, or parts of such hampers, round stave baskets, or splint baskets that do not comply with this act: *Provided*, That this act shall not apply to baskets or other containers having capacities less than 4 quarts which comply with the provisions of the act approved August 31, 1916, entitled "An act to fix standards for Climax baskets for grapes and other fruits and vegetables, and to fix standards for baskets and other containers for small fruits, berries, and vegetables, and for other purposes" (39 U. S. Stat. L. 673), and the regulations thereunder. Any individual, partnership, association, or corporation that willfully violates this section shall be deemed guilty of a misdemeanor, and upon conviction thereof shall be punished by a fine not exceeding $100, or imprisonment not exceeding 60 days, or both: *Provided*, That no person shall be prosecuted under the provisions of this act when he can establish a guaranty signed by the manufacturer, wholesaler, shipper, or other party residing within the United States from whom the hampers, round stave baskets, or splint baskets, as defined in this act, were purchased, to the effect that said hampers, round stave baskets, or splint baskets are correct within the meaning of this act. Said guaranty, to afford protection, shall contain the name and address of the party or parties making the sale of the hampers, round stave baskets, or splint baskets to such person, and in such case such party or parties making such sale shall be amenable to the prosecution, fines, and other penalties which would attach in due course under the provisions of this act to the person who made the purchase.

Mr. VESTAL. Mr. Chairman, I offer to amend, page 12, line 21, after the word "quarts," by inserting the word "or." That was left out by inadvertence.

The CHAIRMAN. The gentleman offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. VESTAL: Page 12, line 21, after the word "quarts," insert the word "or."

The CHAIRMAN. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. OSBORNE. Mr. Chairman, I move to strike out the last word, for the purpose of asking the chairman of the committee a question. On the Pacific coast, particularly in my own State of California, the measurements by which fruits and vegetables are dealt in are different from those treated in this bill. For instance, we have no dealings whatever in bushels or pecks or anything of that sort. Our sales are usually upon the pound basis, or we sell, say, citrus fruits, oranges, and so forth, in boxes containing a certain number of oranges to the square foot. Is there anything in the bill that would interfere with the way in which the business of the Pacific coast in these matters is done?

Mr. VESTAL. In other words, in selling by the pound, as the gentleman says they do in his State.

Mr. OSBORNE. Yes.

Mr. VESTAL. Absolutely not.

Mr. CLOUSE. Mr. Chairman, I move to strike out the last two words. Section 6, now under consideration, is manifestly unconstitutional. Doubtless other provisions of the act are likewise unconstitutional. Congress might have authority to prohibit the transportation of a basket or an article in interstate commerce, but the bill under consideration is not predicated upon the fact of whether or not the article is to be used in interstate commerce. It absolutely prohibits the manufacture of this basket anywhere in the United States and for any purpose. The power of Congress to fix weights and measures does not extend to that point. If some firm is engaged in the manufacture of baskets in New York State, in the apple section, or in Virginia, in the fruit section of that State, or in my own State, so long as its article or commodity is to be used within the confines of the State, Congress has no power, nor should it have any power, to regulate its sale. Otherwise you would absolutely destroy the State's right to control its internal affairs, too much of which has already been done.

I do not think, in the first place, that this bill is needed at all. I think the same thing could be accomplished by enacting a law providing that hereafter it shall be unlawful for any producer or dealer in commodities such as are contemplated by the passage of this bill, and I mean by this only to the extent that it is interstate commerce, to offer for sale or sell those products for a certain quantity when, as a matter of fact, they fall short of such quantity. If you do that you will have obtained the object of the bill, and left to the several States jurisdiction within their own borders.

I happen to know something about the manufacture of containers. In my own county there is a firm engaged exclusively in the manufacture of containers. The chief manufactured product of that concern is egg cases and fillers. They are perhaps the largest manufacturers of those articles in the country. They manufacture many containers of other character and type. They have their machinery installed, already set up, for the purpose of manufacturing these according to specifications which they now have. When this bill is passed, what is the result? They must replace the machinery now installed by other new and additional machinery at great expense, which, of course, would be passed on to the consuming public.

The unconstitutionality of the act in question is so patent as that it should not be necessary to comment thereon, and I do not further than to refer you to the case of DeWitt against the United States (9 Wallace), which has been cited approvingly in many cases since in which similar questions were involved.

Mr. RAKER. Mr. Chairman, I offer the following amendment, which I send to the desk.

The Clerk read as follows:

Amendment by Mr. RAKER: Page 13, line 2, beginning with the word "any," strike out the remainder of line 2, and all of lines 2, 3, 4, 5, and 6 down to and including the word "both."

Mr. RAKER. Mr. Chairman, I imagine the chairman of the committee is perfectly willing to have this matter stricken out.

Mr. VESTAL. Oh, certainly not. The gentleman will be taking out all of the penalty provisions of the bill. This very same language is employed in the pure food and drugs act.

Mr. RAKER. If you have been foolish once, you do not want to be foolish again. The gentleman realizes the fact that you can not imprison a corporation.

Mr. VESTAL. Oh, certainly, we understand that, and the judge trying the case would understand the provisions of the bill and what they mean. He would certainly construe the law as it should be construed and not construe it as being drawn for the purpose of endeavoring to put a corporation in jail.

Mr. RAKER. The gentleman admits that this last provision for imprisonment not exceeding 60 days does not apply to a partnership, an association, or a corporation.

Mr. VESTAL. Certainly I do.

Mr. QUIN. Mr. Chairman, I make the point of order that there is no quorum present. This is a very important section.

The CHAIRMAN. Does the gentleman make the point of no quorum?

Mr. RAKER. I hope the gentleman will not take me off my feet.

The CHAIRMAN. The gentleman from Mississippi makes the point of order that there is no quorum present.

Mr. WILLIAMSON. Mr. Chairman, I make the point of order that that motion is dilatory.

The CHAIRMAN. The Chair will have to overrule the point of order. The Chair will count. [After counting.] One hundred and one Members are present, a quorum.

Mr. RAKER. I had not quite completed what I started to say when the point of no quorum was made, and I would like to proceed for four additional minutes.

The CHAIRMAN. The gentleman from California asks unanimous consent to proceed for four minutes. Is there objection?

Mr. BEGG. Mr. Chairman, I object.

Mr. RAKER. My time is not exhausted, Mr. Chairman, I have a minute left.

The CHAIRMAN. One minute.

Mr. RAKER. I would like to ask the gentleman a question. For instance, in California we are shipping figs in boxes about 15 inches long and a foot wide, depending upon the size of the figs; and pears, plums, peaches in all kinds of containers. Does the gentleman say this would not affect that?

Mr. VESTAL. Absolutely not.

Mr. RAKER. When they ship in boxes?

Mr. VESTAL. Absolutely not.

Mr. RAKER. And in sacks, for instance, where we ship potatoes and such things?

Mr. VESTAL. Absolutely not. If they use the basket or a hamper they must use the standard, but it does not compel them to use the hamper or the basket, splint or round stave.

Mr. RAKER. The gentleman is quite certain of that, because we are very much interested.

Mr. VESTAL. Absolutely.

Mr. RAKER. And it means a great deal to us. So we may be able to tell our people that as long as they use the present methods and do not use the container—hamper or basket—they will not be hampered any?

Mr. VESTAL. The gentleman is correct.

The CHAIRMAN. The time of the gentleman has expired. The question is on the amendment offered by the gentleman from California.

The question was taken, and the amendment was rejected.

Mr. WILLIAMSON. Mr. Chairman, I offer the following amendment.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amendment offered by Mr. WILLIAMSON: Page 13, line 6, strike out all of line 6 and insert in lieu thereof "$500."

Mr. WILLIAMSON. Mr. Chairman, I recognize that the objection which has been raised to this particular provision by the gentleman from California [Mr. RAKER] and others is well taken, and in order to obviate that objection I have offered this amendment which simply makes it possible for the court to impose a fine up to and including $500. It strikes out the provision which seeks to impose imprisonment on partnerships and corporations, to which objection has been raised. It is clear that no such sentence could be enforced by the court in any event. My amendment raises the fine that may be imposed from $100 to $500, which will be sufficiently drastic to accomplish the purposes of the bill.

Mr. VESTAL. Mr. Chairman, we are willing to accept the amendment.

The question was taken; and the amendment was agreed to.

Mr. VESTAL. Mr. Chairman, I move that all debate upon this section and all amendments thereto do now close.

Mr. GARRETT of Tennessee. Does the gentleman propose to insist on that, as I desire to move to strike out the section and to speak for a minute or two?

Mr. VESTAL. Well, say in seven minutes, I will amend my motion.

Mr. JONES of Texas. I would like to have about two minutes of time.

The CHAIRMAN. The gentleman from Indiana moves that all debate upon this section and all amendments thereto close in seven minutes.

The question was taken, and the amendment was agreed to.

Mr. JONES of Texas. Mr. Chairman, I have a perfecting amendment which I desire to offer.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 13, line 2, after the word "any," strike out the word "individual" and insert in lieu thereof the word "dealer."

Mr. RAKER. Mr. Chairman, I offer an amendment, to strike out all of lines 7 to 21, inclusive.

Mr. GARRETT of Tennessee. Mr. Chairman, the gentleman from Texas offered a perfecting amendment, and I suppose it will be voted on.

The CHAIRMAN. Yes; the question is on the amendment offered by the gentleman from Texas.

The question was taken, and the amendment was rejected.

Mr. GARRETT of Tennessee. Mr. Chairman, I move to strike out the section.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 12, beginning on line 13, strike out all of section 6.

Mr. GARRETT of Tennessee. Mr. Chairman, I do not see how the Congress possibly has the authority to prevent the manufacture of a container such as comes within the purview of this bill, and I would like to ask the gentleman from Indiana if there is any legal authority of any sort that he can quote that would sustain that position?

Mr. VESTAL. I have understood, I will say to the gentleman from Tennessee, that within the past 8 or 10 years the question of the constitutionality of measures of this kind has been thoroughly discussed in this body, and that at least other bills have been passed of the same character as this. I will be frank to say that I have no authority that I can give to the gentleman at all upon a question of this kind other than the Constitution itself. I have been given to understand that the question of the constitutionality of the matter has been thoroughly discussed in the House, under probably the standard container act and the standard barrel act. Those bills have never been questioned.

Mr. GARRETT of Tennessee. I do not recall whether those bills provided that they could not manufacture a barrel. I recall the bills went a good long way, but I do not think those bills provided it would be an offense to manufacture a container. It might provide, as the gentleman from Tennessee [Mr. CLOUSE] suggested, although I think it would be going a long way, that they could not be shipped in interstate commerce. When you undertake to say that the manufacturer of baskets, unless he makes them out of certain splints——

Mr. VESTAL. We do not say that.

Mr. GARRETT of Tennessee. I do not mean making them out of certain splints. That is incorrect. However, it may mean that, because here you provide in regard to importation either of filled or unfilled hampers or parts of such hampers. You could not bring in a splint, even, that was to go into the manufacture unless it was to go into the manufacture of a basket that is described in this bill. You could not import a piece of lumber from Canada that was to go into the manufacture of a basket unless it was to be a basket of the size defined in this bill, if this act is constitutional. I think the act is going a long way.

The CHAIRMAN. The time of the gentleman from Tennessee has expired. The question is on the amendment offered by the gentleman from Tennessee.

The question was taken, and the Chair announced that the noes seemed to have it.

Mr. QUIN. I think we ought to have a division.

The CHAIRMAN. The amendment is agreed to.

Mr. QUIN. I asked for a division.

The CHAIRMAN. Division is asked for.

The committee divided, and there were—ayes 10, noes 37.

So the amendment was rejected.

Mr. RAKER. Mr. Chairman, I offer the following amendment: Strike out all of line 7, down to and including the word "purchase" in line 21.

The CHAIRMAN. The gentleman from California offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. RAKER: Page 13, beginning at line 7, strike out the remainder of section 6.

The CHAIRMAN. The question is on agreeing to the amendment.

Mr. RAKER. Mr. Chairman, I ask unanimous consent that I may proceed for two minutes.

Mr. MORGAN. I object, Mr. Chairman.

Mr. RAKER. You ought to give an opportunity to discuss this.

The CHAIRMAN. The question is on agreeing to the amendment.

The question was taken, and the amendment was rejected.

The CHAIRMAN. The Clerk will read.

Mr. QUIN. Mr. Chairman, I make the point of order that there is no quorum present.

The CHAIRMAN. The gentleman from Mississippi makes the point of order there is no quorum present. The Chair will count. [After counting.] Seventy-eight gentlemen are present, not a quorum. The Clerk will call the roll.

The roll was called, and the following Members failed to answer to their names:

Anderson	Copley	Griffin	McFadden
Andrew, Mass.	Coughlin	Hardy, Tex.	McKenzie
Ansorge	Crowther	Haugen	McLaughlin, Nebr.
Arentz	Darrow	Hawes	McPherson
Bankhead	Davis, Minn.	Henry	McSwain
Barkley	Deal	Hill	Maloney
Beck	Dempsey	Hogan	Mann
Bell	Denison	Hooker	Mansfield
Benham	Dickinson	Hudspeth	Martin
Black	Doughton	Hukriede	Merritt
Blakeney	Drane	Hutchinson	Michaelson
Bland, Ind.	Drewry	Ireland	Miller
Blanton	Driver	Jefferis, Nebr.	Mills
Boies	Dunn	Johnson, S. Dak.	Montague
Brand	Echols	Johnson, Wash.	Montoya
Brennan	Edmonds	Jones, Pa.	Moore, Ill.
Briggs	Evans	Kahn	Morin
Britten	Fairchild	Kelley, Mich.	Mott
Brooks, Pa.	Faust	Kennedy	Mudd
Brown, Tenn.	Fenn	Kindred	Nelson, J. M.
Browne, Wis.	Fess	Kinkaid	Newton, Minn.
Burdick	Fields	Kitchin	Nolan
Burke	Fish	Kleczka	Padgett
Burtness	Fisher	Kline, N. Y.	Paige
Butler	Fitzgerald	Knight	Park, Ga.
Cannon	Focht	Knutson	Parker, N. J.
Cantrill	Fordney	Kreider	Parks, Ark.
Chandler, N. Y.	Foster	Kunz	Patterson, Mo.
Chandler, Okla.	Frear	Langley	Patterson, N. J.
Clark, Fla.	Freeman	Larson, Minn.	Perkins
Clarke, N. Y.	Fuller	Layton	Perlman
Classon	Funk	Lehlbach	Porter
Cockran	Gallivan	Lineberger	Pringey
Codd	Garrett, Tex.	Linthicum	Rainey, Ala.
Cole, Iowa	Glynn	Longworth	Ramseyer
Connell	Goodykoontz	Luhring	Ransley
Connolly, Pa.	Gould	Lyon	Rayburn
Cooper, Ohio	Graham, Ill.	McArthur	Reber
Cooper, Wis.	Graham, Pa.	McClintic	Riddick

Riordan	Shaw	Strong, Pa.	Vinson
Robertson	Shreve	Sullivan	Walters
Robsion	Sinclair	Swank	Ward, N. Y.
Rodenberg	Sinnott	Sweet	Wason
Rosenbloom	Sisson	Taylor, Ark.	Weaver
Rouse	Smith, Mich.	Taylor, Colo.	Wheeler
Rucker	Smithwick	Taylor, Tenn.	Williams, Ill.
Ryan	Snell	Temple	Winslow
Sabath	Snyder	Ten Eyck	Wood, Ind.
Sanders, Ind.	Sproul	Tilson	Woodyard
Sanders, N. Y.	Stedman	Treadway	Wright
Sandlin	Stevenson	Tyson	Wurzbach
Schall	Stiness	Upshaw	Yates
Sears	Stoll	Vare	Young

Thereupon the committee rose; and the Speaker pro tempore having resumed the chair, Mr. HICKS, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee, having under consideration the bill H. R. 7102, finding itself without a quorum, he had caused the roll to be called; that 217 Members had answered to their names—a quorum—and that he presented the list of absentees for insertion in the Journal and RECORD.

The committee resumed its session.

Mr. DUNBAR. Mr. Chairman, I move to strike out the word "Provided," in line 19, page 12.

The CHAIRMAN. The gentleman from Indiana offers an amendment which the Clerk will report.

The Clerk read as follows:

Amendment by Mr. DUNBAR: Page 12, line 19, strike out the word "Provided."

Mr. DUNBAR. I wish to ask the gentleman in charge of the bill——

Mr. WILLIAMSON. Mr. Chairman, I make the point of order that debate has been closed.

The CHAIRMAN. Debate has closed.

Mr. VESTAL. I understood there was just an amendment. Debate has been closed on the section and amendments thereto.

Mr. DUNBAR. If there is no vote and no voice, I ask unanimous consent to withdraw my amendment.

The CHAIRMAN. The gentleman from Indiana asks unanimous consent to withdraw his amendment. Is there objection? [After a pause.] The Chair hears none. The Clerk will read.

The Clerk read as follows:

SEC. 7. That any hamper, round stave basket, or splint basket for fruits or vegetables, whether filled or unfilled, or parts of such hampers, round stave baskets, or splint baskets, not complying with this act, which shall be manufactured for sale or shipment, offered for sale, sold, shipped, or imported, may be proceeded against in any district court of the United States within the district where the same shall be found and may be seized for confiscation by a process of libel for condemnation. Upon request, the person entitled shall be permitted to retain or take possession of the contents of such hampers or baskets, but, in the absence of such request or when the perishable nature of such contents makes such action immediately necessary, the same shall be disposed of by destruction or sale, as the court or a judge thereof may direct. If such hampers, round stave baskets, splint baskets, or parts thereof be found in such proceeding to be contrary to this act, the same shall be disposed of by destruction, except that the court may by order direct that such hampers, baskets, or parts thereof be returned to the owner thereof, or sold, upon the payment of the costs of such proceeding and the execution and delivery of a good and sufficient bond to the effect that such hampers, baskets, or parts thereof shall not be sold or otherwise disposed of or used contrary to law. The proceeds of any sale under this section, less legal costs and charges, shall be paid over to the person entitled thereto. The proceedings in such seizure cases shall conform as near as may be to the proceedings in admiralty, except that either party may demand trial by jury of any issue of fact joined in such cases, and all such proceedings shall be at the suit and in the name of the United States.

Mr. VESTAL and Mr. QUIN rose.

The CHAIRMAN. The gentleman from Indiana [Mr. VESTAL] is recognized.

Mr. VESTAL. Mr. Chairman, this section 7 is in the same language exactly as was in the bill when it passed the House at the last session, after quite a good deal of discussion. It is in the exact language of the section used in the pure food and drugs act, and in view of the fact of so much discussion already having been had on this bill and upon this section and in general debate, I move that debate on this section and all amendments thereto be now closed.

Mr. MOORE of Virginia. Mr. Chairman, let me ask the gentleman to reserve his motion so as to enable me to make an inquiry of him in good faith.

Mr. VESTAL. I shall be glad to.

Mr. MOORE of Virginia. It seems to me that this section would impose a real hardship upon a producer hauling to the market in his own vehicle, in his own wagon or his own automobile, his fruits and vegetables packed in hampers that do not correspond with the descriptions and definitions in this bill. If he did that, say, took a load of vegetables or fruits to the city of Chicago in hampers that are at variance in size and construction with the provisions of this bill, then under the plain provisions of section 7 the containers would be subject to condemnation. I do not think my friend can escape that conclusion. Whatever may appear in any other legislation that we have adopted, that is the conclusion from section 7, and if we are going to adopt the language of section 7 there ought to be a proviso that would exempt such a condition as I have illustrated.

Mr. VESTAL. In answer to the gentleman from Virginia, I do not agree with him—I may be wrong about it—except in this case: If a producer produced vegetables and placed them in certain hampers or baskets, round stave baskets or splint baskets—that is, the basket mentioned in this act—and expected to sell those vegetables in the market in those hampers or baskets, then, of course, he would be amenable here. But if he carried his products to market in any sort of a container—a wooden box, or a washtub, or boiler, or anything of that kind—he has a perfect right to do it. It is only when the man uses the baskets and hampers mentioned in this act that they must be of the standard prescribed by the language in this act.

Mr. MOORE of Virginia. I am, of course, talking about hampers exclusively. The farmers who raise fruits and vegetables, and whom I have in mind, would use hampers. The section is so drawn that as soon as the supposed farmer reached the limits of Chicago, or even if waylaid by an inspector outside the limits of Chicago, would be subject to the condemnation of his hampers. Now, in order to justify the construction that you apply to section 7, something must be read into it that is not written in it. You say the intention is—and I have no doubt the intention is—not to impose any burden upon the producer unless he undertakes to sell. But nevertheless the language as it is written in this bill does not express that intention, but gives the right to condemn just so soon as it is found that the hampers are not in accordance with the provisions of this bill.

Mr. VESTAL. Now, let me say this to the gentleman: Supposing that were true, what hardship would it impose upon anyone? Because the producer can only buy standard hampers when this bill goes into effect, and it will not go into effect until November, a year after the passage. He can not buy anything but standard hampers, and if he uses hampers he can not buy anything but standard hampers, and if he uses baskets he can buy only standard baskets.

Mr, MOORE of Virginia. You are now talking about something else, as to how much hardship will be imposed on the producer. There are unnumbered producers throughout the country who have hampers that they have accumulated during a period. They are permitted now to use those hampers, of whatever their character. They will not be allowed to continue to use those hampers to convey their produce to market if section 7 is adopted.

Mr. VESTAL. The gentleman would not contend that they could use those hampers for the next 10 years?

Mr. MOORE of Virginia. They can use them while they are usable. Why should we put a burden upon the people who need the most relief?

Mr. JONES of Texas. Mr. Chairman, I would suggest to the gentleman that he could only buy hampers conforming to the Government standard.

Mr. VESTAL. Mr. Chairman, I renew my motion that all debate on this section and all amendments thereto be now closed.

The CHAIRMAN. The gentleman from Indiana moves that all debate on this section and all amendments thereto be now closed. The question is on agreeing to that motion.

The motion was agreed to.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

SEC. 8. That this act shall not prohibit the manufacture for sale or shipment, offer for sale, sale, or shipment of hampers, round stave baskets, splint baskets, or parts thereof, to any foreign country in accordance with the specifications of a foreign consignee or customer not contrary to the law of such foreign country; nor shall this act prevent the manufacture or use of banana hampers of the shape and character now in commercial use as shipping containers for bananas.

Mr. QUIN. Mr. Chairman, I move to strike out the last two words from this paragraph.

The CHAIRMAN. The gentleman from Mississippi moves to strike out the last two words.

Mr. QUIN. Mr. Chairman and gentlemen, this is at present the shipping season of vegetables from the Southern States. It is no small business. It is an immense business. In the district that I have the honor to represent one town alone, Crystal Springs, is now averaging 75 cars of tomatoes per day. In that same Copiah County there are five or six different towns where from 10 to 25 cars of tomatoes are being shipped, and several other counties in the seventh Mississippi district

are shipping many cars each day; and by the way, they are the best tomatoes in the United States. [Laughter.] These gentlemen who think that the size of a hamper has anything to do with what those farmers are producing or what the consumer is getting are sadly mistaken. The Crystal Springs tomato is advertised in this city. I got off the car the other day and saw some and offered to buy some. The dealer said, "They are 5 cents apiece." They were not in any hamper or basket in which they were shipped. I bought 10 tomatoes for 50 cents. It would have taken a John D. Rockefeller to have bought a bushel of those tomatoes. [Laughter.] The farmers down there receive about one-fourth of 1 cent for each tomato. You Republicans are endeavoring to hamper the farmer by increasing the cost of the baskets in which he ships his products and increasing the price of the fertilizer by which he can produce those products—those tomatoes and beans and butter beans and potatoes—at cheaper prices. You enact an iniquitous Esch-Cummins railroad bill compelling the farmer to pay 182 per cent more for his freight than he paid before the Republican Party, at the behest of organized wealth, put that oppressive burden on the farmer.

And, by the way, under that same iniquitous bill your board created under that bill, by its decision the other day, took away annually from the poor men working, and sweating in the railroad car shops $60,000,000 that they ought to have to go into their home to feed their wives and children and buy shoes and clothes and books for them to use in school and fuel to keep them warm in cold weather. Under that iniquitous legislation which you passed, instead of reducing freight rates your board came along and took away 5 cents an hour from the lowest-paid labor employed by the railway systems of the United States. Do you tell me that the election in Iowa did not mean something? Has that board, under the Esch-Cummins Act, done anything to reduce the high salaries of the presidents and high officials of the railroads or cut out their useless and clumsy expense charges so as to give cheaper freight rates? It meant that the Republican Progressives, joining hands with the masses of the people, marched in solid phalanx with their majestic tread to the ballot box and voted against this Republican organization in Congress, the same as they did in Pennsylvania and Indiana. They voted in protest against the oppressive hand that you have laid upon the people within the last two years. My Republican friends, if you keep on with the class and type of legislation that you are pushing through all the time the people will march against you in November, and again the Democratic hosts will triumph at the polls and come into power and legislate for the people. The time is at hand; the day of judgment is near; and you will find yourselves in a position where you can not any more ride roughshod over the rights of the people. [Applause.]

Mr. VESTAL. Mr. Chairman, I move that all debate on this section and amendments thereto be now closed.

The CHAIRMAN. The gentleman from Indiana moves that all debate on this section and amendments thereto be now closed. The motion was agreed to.

The Clerk read as follows:

SEC. 9. That this act shall not be understood or construed as in any way repealing the act of July 28, 1866 (Rev. Stat. U. S., secs. 3569, 3570), legalizing the use of the weights and measures of the metric system.

Mr. REED of New York. Mr. Chairman, I desire to ask the gentleman from Indiana a question. I come from a district where they raise a very large quantity of grapes, and, of course, they are interested in the grape baskets and containers. Those grape baskets have been standardized. Do I understand that this act in any way interferes with them?

Mr. VESTAL. Not at all. On page 12, line 19, it is provided that this act shall not apply to baskets or other containers holding less than 4 quarts or that comply with the provisions of the act approved August 31, 1916, and that was the Climax grape basket act.

Mr. DUNBAR. Did not the Climax act provide that none of those baskets of that size should be stamped?

Mr. VESTAL. I believe the gentleman is right about that.

Mr. DUNBAR. Then this bill restricts the Climax basket act?

Mr. VESTAL. No; it does not interfere with that at all.

Mr. DUNBAR. Under the Climax basket act could not a container containing more than 4 quarts be exempt from being stamped?

Mr. VESTAL. Yes.

Mr. DUNBAR. What is the reason that a container of less than 4 quarts is not required to be stamped?

Mr. VESTAL. I am not prepared to state that reason.

Mr. DUNBAR. Does not the gentleman believe that the poor man buying 2 quarts should have the same protection under the law as the man buying a bushel?

Mr. VESTAL. I think you will find that all these small baskets are marked, although they are not required to be marked.

Mr. DUNBAR. Will the gentleman tell me why they are marked if they are not required to be marked?

The CHAIRMAN. The time of the gentleman has expired.

Mr. VESTAL. I have an amendment I desire to offer. Some question has been raised by different Members whether or not the metric system might be employed in these different measurements, and in order to be sure about it I move to strike out section 9.

The CHAIRMAN. The gentleman from Indiana offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. VESTAL: Page 15, line 11, strike out all of section 9.

The amendment was agreed to.

Mr. UNDERHILL. Mr. Chairman, I ask unanimous consent to proceed out of order for one minute.

The CHAIRMAN. The gentleman from Massachusetts asks unanimous consent to speak out of order for one minute. Is there objection?

There was no objection.

Mr. UNDERHILL. Mr. Chairman, I thought it might interest Members of the House to know that arrangements have been made whereby the municipal swimming pool, under the shadow of the Monument, will be open mornings at 6.30 o'clock, and that Members of Congress and their families can have the use of the pool from 6.30 until 7. I advise all to try it, as it will fit you for the day's work.

The Clerk read as follows:

SEC. 11. That the Secretary of Agriculture shall prescribe such regulations as he may find necessary for carrying into effect the provisions of this act, and shall cause such examinations and tests to be made as may be necessary in order to determine whether hampers, round stave baskets, and splint baskets, or parts thereof, subject to this act, meet its requirements. For said purposes the authorized officers and agents of the Department of Agriculture may visit factories, stock rooms, and other places of business where such hampers, baskets, or parts thereof are manufactured or held for sale or shipment, or offered for sale, may enter cars, vessels, other vehicles, and places under the control of carriers engaged in the transportation of such hampers, baskets, or parts thereof, and may take samples of such hampers, baskets, or parts thereof, the cost of which samples, upon request, shall be paid to the person entitled.

Mr. VESTAL. Mr. Chairman, I desire to offer an amendment to the section. On page 16, line 3, after the word "requirement," strike out the period and insert a comma, and strike out the balance of line 3, lines 4, 5, 6, 7, 8, 9, and the first two words on line 10.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amendment by Mr. VESTAL: Page 16, line 3, after the word "requirement," strike out the period and insert a comma, and strike out the remainder of line 3, lines 4 to 10, inclusive, and strike out the words "parts thereof" on line 10.

Mr. VESTAL. I offer this amendment to take out the question of search and seizure.

Mr. WINGO. That takes out all with reference to search and seizure?

Mr. VESTAL. Yes.

Mr. WINGO. I commend the gentleman for his amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Indiana.

The amendment was agreed to.

The Clerk read as follows:

SEC. 13. That sections 6 and 7 of this act shall become effective at but not before the expiration of one year following the 1st day of November next succeeding the passage of this act.

Mr. VESTAL. Mr. Chairman, I ask unanimous consent that the Clerk have authority to renumber the sections.

The CHAIRMAN. The gentleman from Indiana asks unanimous consent that the Clerk be authorized to renumber the sections. Is there objection?

There was no objection.

Mr. VESTAL. Mr. Chairman, I move that the committee do now rise and report the bill, with sundry amendments, to the House, with the recommendation that the amendments be agreed to and that the bill as amended do pass.

Mr. WINGO. I suggest to the gentleman that there was an amendment of mine which the gentleman accepted, and it included the word "section" and the figure "5." I suggest that the word "section" and the figure "5" should be retained, and I ask unanimous consent to reinsert the section and figure.

The CHAIRMAN. The Chair is informed that it was retained.

The motion of Mr. VESTAL was agreed to; accordingly the committee rose, and the Speaker pro tempore [Mr. WALSH] having resumed the chair, Mr. HICKS, Chairman of the Committee of the Whole House on the State of the Union, reported that that committee had had under consideration the bill (H. R. 7102) to fix standards for hampers, round-stave baskets, and splint baskets for fruits and vegetables, and for other purposes, and had directed him to report the same back to the House with sundry amendments, with the recommendation that the amendments be agreed to and that the bill as amended do pass.

Mr. VESTAL. Mr. Speaker, I move the previous question on the bill and all amendments to final passage.

The motion was agreed to, and the previous question was ordered.

The SPEAKER pro tempore. Is a separate vote demanded on any amendment? If not, the Chair will put them in gross.

There was no demand for a separate vote.

The amendments were agreed to.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

Mr. GARRETT of Tennessee. Mr. Speaker, I move to recommit the bill with instructions to the committee that it be reported back forthwith, with an amendment striking out all after the word "thereof," in line 10, page 11, down to and including the word "material," at the end of the section.

The SPEAKER pro tempore. The Clerk will report the motion to recommit.

The Clerk read as follows:

Mr. GARRETT of Tennessee moves to recommit the bill to the Committee on Coinage, Weights, and Measures, with instructions to that committee to report the same back forthwith, with an amendment, at page 11, line 10, after the word "thereof," to strike out the remainder of the section.

The SPEAKER pro tempore. The question is on the motion to recommit.

The question was taken; and on a division (demanded by Mr. GARRETT of Tennessee and Mr. LONDON) there were 82 ayes and no noes.

So the motion to recommit was agreed to.

Mr. VESTAL. Mr. Speaker, I report back the bill (H. R. 7102) with the following amendment:

On page 11, line 10, beginning with the word "each," strike out the balance of the section.

The SPEAKER pro tempore. The gentleman from Indiana reports back the bill H. R. 7102, with an amendment, which the Clerk will report.

The Clerk read as follows:

Mr. VESTAL reports the bill back to the House with the following amendment: Page 11, line 10, after the word "thereof," strike out the balance of section 4.

The SPEAKER pro tempore. The question is on agreeing to the amendment.

The amendment was agreed to.

The SPEAKER pro tempore. The question now is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER pro tempore. The question is on the passage of the bill.

The question was taken and the bill was passed.

On motion of Mr. VESTAL, a motion to reconsider the vote whereby the bill was passed was laid on the table.

LEAVES OF ABSENCE.

By unanimous consent, leave of absence was granted to—

Mr. LUCE, on account of illness in his family.

Mr. APPLEBY, for four legislative days, June 9 to 13, inclusive, on account of attending unveiling exercises Princeton Battle Monument and the exercises at Rutgers College commencement.

EXTENSION OF REMARKS.

Mr. JACOWAY. Mr. Speaker, I ask unanimous consent to extend and revise my remarks on the Ward sugar resolution.

The SPEAKER pro tempore. Is there objection?

There was no objection.

Mr. RAKER. Mr. Speaker, I ask unanimous consent to revise my remarks upon this bill.

The SPEAKER pro tempore. The gentleman has the right under the general rules of the House to revise the remarks that he has made. If he desires to extend them——

Mr. RAKER. I do not.

ORDER OF BUSINESS.

The SPEAKER pro tempore. Under the order previously entered into, it is now in order to call the Private Calendar, beginning where the last call terminated on April 21, 1922.

ADJOURNMENT.

Mr. MONDELL. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; and accordingly (at 4 o'clock and 37 minutes p. m.) the House adjourned until to-morrow, Friday, June 9, 1922, at 12 o'clock noon.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII,

Mr. McFADDEN: Committee on Banking and Currency. H. R. 11939. A bill to amend section 5219 of the Revised Statutes of the United States; without amendment (Rept. No. 1078). Referred to the House Calendar.

Mr. SINNOTT: Committee on Public Lands. H. R. 11363. A bill granting a portion of the rents, royalties, and bonuses received from lands within naval petroleum reserves to the States within the boundaries of which said reserves are located; with amendments (Rept. No. 1079). Referred to the Committee of the Whole House on the state of the Union.

Mr. CURRY: Committee on Territories. H. R. 11589. A bill to provide for the transfer of the lands and buildings of the Federal leprosy investigation station at Kalawao, on the island of Molokai, in the Territory of Hawaii, to the Territory of Hawaii, and for other purposes; without amendment (Rept. No. 1081). Referred to the Committee of the Whole House on the state of the Union.

Mr. CURRY: Committee on Territories. H. R. 11590. A bill to amend sections 34 and 40 of the organic act of the Territory of Hawaii; without amendment (Rept. No. 1082). Referred to the House Calendar.

Mr. DENISON: Committee on Interstate and Foreign Commerce. H. R. 11872. A bill to amend sections 7, 8, and 9 of the Panama Canal act; to amend sections 288, 289, 342, 368, and 461 of the Penal Code of the Canal Zone; and section 2 of the Executive order of July 9, 1914, establishing rules and regulations for the opening and navigation of the Panama Canal and approaches thereto, including all water under its jurisdiction; to amend section 6 of an act entitled "An act extending certain privileges of canal employees to other officials on the Canal Zone and authorizing the President to make rules and regulations affecting health, sanitation, quarantine, taxation, public roads, self-propelled vehicles, and police powers on the Canal Zone, and for other purposes, including provision as to certain fees, money orders, and interest deposits," approved August 21, 1916; and to regulate divorces in the Canal Zone, and for other purposes; without amendment (Rept. No. 1083). Referred to the Committee of the Whole House on the state of the Union.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII,

Mr. McCORMICK: Committee on Indian Affairs. S. 2210. An act for the relief of Lucy Paradis; without amendment (Rept. No. 1080). Referred to the Committee of the Whole House.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. ROSSDALE: A bill (H. R. 11954) to reorganize and improve the postal service in the city of New York and consolidate the various separate post offices and postal districts within the territory of the city of New York into one postal district, which shall consist of five subdivisions similar in territory and boundaries to the five boroughs constituting the city of New York; to the Committee on the Post Office and Post Roads.

By Mr. HAYDEN: A bill (H. R. 11955) to authorize the Secretary of the Interior to issue a patent to the University of Arizona for 160 acres of land; to the Committee on the Public Lands.

By Mr. HULL: A bill (H. R. 11956) to create a board of adjustment which shall constitute a wage board and board of appeals for employees of navy yards and arsenals and to define its powers and duties; to the Committee on Labor.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BLAND of Virginia: A bill (H. R. 11957) for the relief of Edna E. Curtis; to the Committee on Claims.

By Mr. FRENCH: A bill (H. R. 11958) granting a pension to Hanna A. Rice; to the Committee on Pensions.

By Mr. McARTHUR: A bill (H. R. 11959) granting a pension to Clara H. Hollmann; to the Committee on Pensions.

By Mr. MOTT: A bill (H. R. 11960) granting a pension to Margaret Newell; to the Committee on Invalid Pensions.

By Mr. PURNELL: A bill (H. R. 11961) granting an increase of pension to Mary C. McCabe; to the Committee on Invalid Pensions.

By Mr. TAYLOR of Colorado: A bill (H. R. 11962) granting an increase of pension to Charlotte S. Norton; to the Committee on Invalid Pensions.

By Mr. VARE: A bill (H. R. 11963) authorizing the President to appoint Anton Lohmiller to the position and rank of captain Quartermaster Corps in the United States Army; to the Committee on Military Affairs.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

5942. By the SPEAKER (by request): Petition of North Indiana Conference of the Methodist Episcopal Church, representing a membership of 91,866, in support of the constitutional amendment to prohibit sectarian appropriations, House Joint Resolution 159; to the Committee on the Judiciary.

5943. Also (by request), petition of Presbytery of Fort Wayne, Ind., of the Presbyterian Church in the United States, representing membership of 6,392, in support of the constitutional amendment to prohibit sectarian appropriations, House Joint Resolution 159; to the Committee on the Judiciary.

5944. Also (by request), resolution of the Berkshire (Mass.) Baptist Association, representing 3,582 members, in support of the constitutional amendment to prohibit sectarian appropriations, House Joint Resolution 159; to the Committee on the Judiciary.

5945. Also (by request), resolution of the Presbytery of Portland, Oreg., of the Presbyterian Church in the United States, representing a membership of 8,096, in support of the constitutional amendment to prohibit sectarian appropriations, House Joint Resolution 159; to the Committee on the Judiciary.

5946. Also (by request), resolution of the Presbytery of Kalispell, Mont., of the Presbyterian Church in the United States, representing a membership of 929, in support of the constitutional amendment to prohibit sectarian appropriations, House Joint Resolution 159; to the Committee on the Judiciary.

5947. Also (by request), resolution of the Presbytery of Laramie, Wyo., of the Presbyterian Church in the United States, representing a membership of 473, in support of the constitutional amendment to prohibit sectarian appropriations, House Joint Resolution 159; to the Committee on the Judiciary.

5948. Also (by request), resolution of the Presbytery of Mankato, Minn., of the Presbyterian Church in the United States, representing a membership of more than 5,000, in support of the constitutional amendment to prohibit sectarian appropriations, House Joint Resolution 159; to the Committee on the Judiciary.

5949. Also (by request), resolution of the Presbytery of Olympia, Wash., of the Presbyterian Church in the United States, representing a membership of 3,801, in support of the constitutional amendment to prohibit sectarian appropriations, House Joint Resolution 159; to the Committee on the Judiciary.

5950. By Mr. FROTHINGHAM: Resolution adopted at the one hundred and twenty-sixth session of the New England Conference of the Methodist Episcopal Church by the pastors expressing to President Harding their appreciation of the sympathy he has expressed for the adequate enforcement of the eighteenth amendment and that he prevent interference with the impartial and strict enforcement of the Volstead Act; to the Committee on the Judiciary.

5951. By Mr. KISSEL: Petition of R. Herandez Usera, Madrid, Spain, regarding Porto Rico; to the Committee on Foreign Affairs.

5952. Also, petition of William Wallace Brauer, Washington, D. C., regarding credit to Europe; to the Committee on Foreign Affairs.

5953. By Mr. LEA of California: Petition signed by 199 citizens of Oakland, Calif., protesting against the enactment of compulsory Sunday observance bills; to the Committee on the District of Columbia.

5954. By Mr. RAKER: Petition of Vermont Square Methodist Episcopal Church, by Charles D. Lewis, pastor, of Los Angeles, Calif., urging relief for the Armenians; to the Committee on Foreign Affairs.

5955. Also, petition of the California Society of the Sons of the American Revolution, of San Francisco, Calif., protesting against the reduction of the Army and Navy below the strength recommended by the War and Navy Departments; to the Committee on Appropriations.

5956. By Mr. RYAN: Resolution relative to the Irish resolution introduced by Senator NORRIS relating to the Republic of Ireland; to the Committee on Foreign Affairs.

5957. Also, resolutions adopted by the Greater Boston Chapter, Military Order of the World War, urging Congress to support the national defense act of 1920; to the Committee on Appropriations.

5958. By Mr. TINKHAM: Resolution passed at a meeting of the Massachusetts Baraca and Philathea Union, pledging its unqualified support to all officers, State and National, who justly and fearlessly are working for the complete abolition of the age-long curse of strong drink; to the Committee on the Judiciary.

5959. Also, resolution adopted by the Methodist Episcopal Church, Boston Area, Malden, Mass., expressing to President Harding the appreciation of its members for the adequate enforcement of the eighteenth amendment and hoping that he will use all the power at his command to prevent interference with the impartial and strict enforcement of the Volstead Act; to the Committee on the Judiciary.

SENATE.

FRIDAY, *June 9, 1922.*

(Legislative day of Thursday, April 20, 1922.)

The Senate met at 11 o'clock a. m., on the expiration of the recess.

Mr. CURTIS. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The reading clerk called the roll, and the following Senators answered to their names:

Ashurst	Glass	McKinley	Simmons
Ball	Gooding	McNary	Smith
Borah	Hale	Myers	Smoot
Brandegee	Harris	Nelson	Spencer
Broussard	Harrison	Newberry	Sterling
Calder	Heflin	Nicholson	Sutherland
Cameron	Johnson	Oddie	Swanson
Capper	Jones, N. Mex.	Overman	Townsend
Culberson	Jones, Wash.	Page	Underwood
Cummins	Kellogg	Phipps	Wadsworth
Curtis	Kendrick	Pittman	Walsh, Mass.
Dial	Keyes	Poindexter	Warren
Dillingham	King	Pomerene	Watson, Ga.
Elkins	La Follette	Rawson	Watson, Ind.
Fernald	McCormick	Robinson	Williams
Gerry	McCumber	Sheppard	Willis

Mr. UNDERWOOD. I desire to state that the Senator from Florida [Mr. FLETCHER] is detained by illness. I ask that this announcement may stand for the day.

The VICE PRESIDENT. Sixty-four Senators have answered to their names. A quorum is present.

PUBLICITY FUND OF FEDERAL RESERVE BOARD.

The VICE PRESIDENT laid before the Senate a communication from the governor of the Federal Reserve Board, transmitting, in response to Senate Resolution 302, agreed to June 7, 1922, certain information relative to publicity funds, etc., which was referred to the Committee on Banking and Currency.

PETITIONS.

The VICE PRESIDENT laid before the Senate resolutions adopted by the Travelers' Protective Association of America, at Atlantic City, N. J., favoring the enactment of legislation amending the transportation act of 1920, so as to reinvest State commissions with power to regulate intrastate transportation systems, which were referred to the Committee on Interstate Commerce.

Mr. WILLIS presented a resolution of the Cincinnati (Ohio) Chamber of Commerce, favoring the passage of House bill 9446, providing for the incorporation of the American Institute of Accountants, which was referred to the Committee on the Judiciary.

He also presented a resolution adopted by the board of directors of the Bankers' Association for Foreign Trade, at Philadelphia, Pa., favoring the enactment of legislation granting a

ship subsidy for the relief of the merchant marine, which was referred to the Committee on Commerce.

WHITE HOUSE POLICE FORCE.

Mr. JONES of Washington. Mr. President, last night the bill (S. 3659) to create the White House police force, and for other purposes, was reported and passed by unanimous consent when I was temporarily absent from the Chamber. I desire to enter a motion to reconsider the vote by which the bill was passed, the motion to be taken up for consideration later on.

The VICE PRESIDENT. The motion to reconsider will be entered.

BILLS AND JOINT RESOLUTIONS INTRODUCED.

Bills and joint resolutions were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. WALSH of Massachusetts:

A bill (S. 3697) granting a pension to Mary E. Rae; to the Committee on Pensions.

A bill (S. 3698) for the relief of the Staples Transportation Co., of Fall River, Mass.; to the Committee on Claims.

By Mr. POINDEXTER:

A bill (S. 3699) granting a pension to Melissa I. Ticknor; to the Committee on Pensions.

By Mr. BALL:

A joint resolution (S. J. Res. 205) authorizing the transfer to the jurisdiction of the Commissioners of the District of Columbia of a certain portion of the Anacostia Park for tree nursery purposes; to the Committee on the District of Columbia.

By Mr. BALL (by request):

A joint resolution (S. J. Res. 206) changing the name of Sixteenth Street NW. to Presidents Avenue; to the Committee on the District of Columbia.

LOAN OF COTS TO CONFEDERATE VETERANS.

Mr. SWANSON. Mr. President, I introduce a joint resolution which is very urgent and which it is important to pass to-day or to-morrow, and I ask for its present consideration. It provides for the loan of cots for the national encampment of United Confederate Veterans.

The joint resolution (S. J. Res. 204) to authorize the loan by the Secretary of War to the commander in chief of the United Confederate Veterans of cots for the use of the members of the United Confederate Veterans during the sessions of the national encampment of the United Confederate Veterans at Richmond, Va., from June 19 to 22, 1922, was read the first time by its title and the second time at length, as follows:

Resolved, etc., That the Secretary of War is authorized to lend 1,000 cots to the commander in chief of the United Confederate Veterans at their national encampment to be held in Richmond, Va., June 19 to June 22, 1922, upon receiving a bond satisfactory to the Secretary of War to indemnify the United States of America from loss or injury to such cots, or any of them, such indemnity bond to be drawn by and approved by the Secretary of War.

Mr. TOWNSEND. Mr. President, I wish to make an inquiry of the chairman of the Committee on Military Affairs. As I understand the joint resolution, it proposes to loan certain Army equipment for an encampment in Richmond, Va. Was the joint resolution reported from the Senator's committee?

Mr. SWANSON. The joint resolution will have to be passed to-day or to-morrow. Last year the same loan was made for the encampment of the Spanish War Veterans.

Mr. WADSWORTH. May I ask the Senator from Virginia if this is for the national encampment?

Mr. SWANSON. It is for the national encampment for the entire South, which meets in Richmond from June 19 to 22.

Mr. WADSWORTH. What does it provide for?

Mr. SWANSON. For the loan of 1,000 cots. It is exactly what has been done heretofore for the national encampments of the Spanish War Veterans, the World War Veterans, and the Civil War Veterans.

Mr. WADSWORTH. I simply desire to remind the Senator and others who may be interested that up to date and for the last two years the Committee on Military Affairs has confined its favorable action upon measures of this sort to those which relate solely to national encampments of the Grand Army of the Republic, the Confederate Veterans, the Spanish War Veterans, and the World War Veterans.

Mr. SWANSON. This is the national encampment for the entire South, which meets at Richmond on the 19th of June. It embraces the Confederate Veterans of the whole United States.

Mr. WADSWORTH. Very well.

Mr. TOWNSEND. I understand that the joint resolution does not come from the Military Affairs Committee, but is introduced on the floor of the Senate?

Mr. WADSWORTH. Such resolutions have always gone to the Committee on Military Affairs.

Mr. TOWNSEND. I am interested in one such joint resolution, as the Senator knows. I have no objection to this one, but I want no discrimination, because I have been turned down on one of them myself. Mine, of course, did not apply to a national encampment.

Mr. SWANSON. There is a law authorizing the loan of Army equipment, but it does not include cots. The War Department can lend tents, but is not authorized to include cots. The Secretary of War stated that he is perfectly willing to loan the cots, but that he would rather have the resolution passed. It is exactly like one which was passed last year.

Mr. WADSWORTH. The Senator is quite correct. The Senate has taken that action for national encampments.

There being no objection, the joint resolution was considered as in Committee of the Whole.

The joint resolution was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. Overhue, its enrolling clerk, announced that the House had passed a bill and joint resolution of the following titles, in which it requested the concurrence of the Senate:

H. R. 7102. An act to fix standards for hampers, round stave baskets, and splint baskets for fruits and vegetables, and for other purposes; and

H. J. Res. 343. Joint resolution authorizing the Secretary of War to loan cots, mattresses, and blankets for the use of the American Legion at the Michigan State encampment, to be held in Iron Mountain, Mich., in July, 1922.

HOUSE BILL AND JOINT RESOLUTION REFERRED.

The following bill and joint resolution were each read twice by title and referred as indicated below:

H. R. 7102. An act to fix standards for hampers, round stave baskets, and splint baskets for fruits and vegetables, and for other purposes; to the Committee on Manufactures.

H. J. Res. 343. A joint resolution authorizing the Secretary of War to loan cots, mattresses, and blankets for the use of the American Legion at the Michigan State encampment to be held in Iron Mountain, Mich., in July, 1922; to the Committee on Military Affairs.

THE TARIFF.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 7456) to provide revenue, to regulate commerce with foreign countries, to encourage the industries of the United States, and for other purposes.

Mr. KELLOGG. Mr. President, I have been listening to this filibustering tariff debate for six weeks. So far I have not taken five minutes of the time of the Senate on this bill. I have tried to inform myself on the various schedules and to vote as intelligently as possible, in the hope that within a reasonable time a tariff bill might be passed and other needed legislation taken up; but it is apparently hopeless, under the rules of the Senate, where business is done by unanimous consent and where any Senator can talk on any subject at any time he sees fit, to accomplish anything; and I am going to ask the indulgence of the Senate for a few moments to discuss the agricultural schedule.

Over and over again it has been asserted on the Democratic side of this Chamber that we are placing the burden upon the farmer, and great solicitude for his welfare has been expressed, which, in view of the record of the Democratic Party, can not be taken seriously. When in power that party never did anything for the farmer. In 1913, in the Underwood bill, it placed practically all of the farm products in the country upon the free list, while affording some protection to the principal manufactured products of the South and the manufactured products generally throughout the country, and during the entire 12 years of Democratic administration, including the war, not a thing was accomplished for the farmers. On the contrary, under the guise of inducing production of wheat during the war, the price was fixed far below the market price in this country or in the world, while the prices of other products, which the farmer had to buy, were allowed to rise to unreasonable heights. It is perfectly evident why the Democratic Congress, controlled by the Southern States, will not and does not desire to protect the farmer. Cotton, except the long-staple cotton raised in Arizona, has no foreign competition, and the Arizona Senators are in favor of the protection of that.

The great staple products of grain and live stock are raised in the Northern States, and if protected, it has always been by a Republican Congress and not by a Democratic one. In fact,

nearly all the important legislation in the interest of agriculture in the last 10 years has been passed since March, 1921, when the present administration came into power. It is not my intention to review all of that legislation—the Senate is perfectly familiar with it—but let me briefly mention that which has been enacted since March, 1921:

The emergency tariff act.

The packers' control act.

The act regulating future trading on grain exchanges.

The act extending the powers of the War Finance Corporation in order to furnish a market for farm products abroad and to relieve the farmers' credit situation.

An act appropriating $35,000,000 to aid the Federal land banks.

An act authorizing the joint-stock land banks to sell bonds at 5½ per cent without an increase in the rate of interest to the farmers.

The farmers' cooperative marketing act.

An act appropriating $350,000 for extermination of barberry to prevent black rust.

An act to add a representative of agriculture to the Federal Reserve Board.

The emergency tariff act passed by the Republican Congress in May, 1921, restored protection to all the leading farm products, which had existed prior to the Democratic measure of 1913, and the present act continues such protection in the interest of the farmer.

I know much has been said in the Senate to the effect that we are always legislating for the farmer. If anyone is entitled to it, he is. If there is any legislation he wants that I believe in any way will aid him, I am going to vote for it. There is no business in the United States which takes as many risks, in which the labor is so great and the return so small, as agriculture—no business so vital to the needs of the Nation. The farmer takes the risks of the weather, the late frosts in the spring and the early frosts in autumn, the excessive rainfall, the drought, the cold, and the intense heat. If he gets by all these difficulties and dangers, he is confronted with the chinch bug, the black rust or blight in the wheat area, with boll weevil in the cotton fields, and with innumerable bugs and diseases which scientists have discovered but have been unable to prevent. If he gets by all these and is ready to market his crop, he is dependent upon the markets of the world, the wholesalers, commission merchants, and a horde of others, who control his markets. I know whereof I speak. I lived on a farm in Minnesota until I was 19 years old, and for many years performed the ordinary daily labors of the farm. I saw all the difficulties and worries and anxieties which confront the farmer, the hope year after year to reduce the mortgage upon the little farm, which increased instead of decreased.

I do not deny that agriculture has made great strides and can do much more, but, after all, it is the business that furnishes the food for the world and is subject to the greatest risks and discouragements and returns the smallest profit. If I can vote for any tariff bill to protect him, any bill to encourage him, to furnish him adequate credits and aid him in his struggle against the forces of nature, the evils of bugs and diseases and adverse markets, I am willing to do it.

Now, Mr. President, a few words about the present tariff on farm products. The facts are that prior to the coming into power of the Democratic Party in 1912 nearly all the farm products produced were protected. I have a list here, which I ask to have placed in the RECORD, covering wheat, flour, corn, cattle, sheep, potatoes, butter, cheese, milk, and cream. I will not stop to read it but will merely say that the duties in the emergency tariff act on some articles are a little higher than the Payne-Aldrich duties while on other articles they are substantially the same.

The VICE PRESIDENT. Without objection, the list will be printed in the RECORD.

The table referred to is as follows:

Comparison of duties between emergency bill and the Payne-Aldrich bill.

	Emergency.	Payne-Aldrich.
Wheat flour	35 cents per bushel or 20 per cent ad valorem	25 cents. 25 per cent.
Corn	15 cents per bushel	15 cents.
Cattle	30 per cent ad valorem	27½ per cent.
Sheep, 1 year old	$2 per head	$1.50.
Sheep, less	$1 per head	75 cents.
Potatoes	25 cents per bushel	25 cents.
Butter	6 cents per pound	6 cents.
Cheese	23 per cent ad valorem	6 cents.
Milk	2 cents per gallon	2 cents.
Cream	5 cents per gallon	5 cents.

Mr. KELLOGG. Immediately the Democratic Party came into power—and there is no use disguising the fact—they obtained control which did not come from the States that produce the great staple products which furnish the food for the American people. They wrote the tariff act of 1913, and the Northern and the Western States, which do produce all these products, had nothing to say about it. All the farmer asks is that if we are going to have protection, his products be protected the same as others; that he be not made the drudge to furnish the food for the American people, without protection, while the rest of the country receives protection.

I ask unanimous consent to insert in the RECORD at the end of my remarks, without reading, a table showing the rates on farm products in the pending bill, under the Underwood Act of 1913, under the Payne-Aldrich Act of 1909, and under the emergency tariff act.

The VICE PRESIDENT. Without objection, it is so ordered.

Mr. KELLOGG. Mr. President, what occurred to the American farmer the moment the Underwood bill was passed placing his products upon the free list? We opened the door of our domestic market to all the products of Canada, raised upon virgin soil and cheap land. In 1912, before the Underwood bill was passed, only 47.47 per cent of our imports from Canada came into the United States free of duty. In 1914, the year after the Underwood bill was passed, 80.97 per cent of the imports from Canada came in free of duty, and in 1919, 88.73 per cent of the imports from that country came in free of duty, and this ratio has substantially continued. What are these imports? Principally agricultural products.

I do not object to free trade in lumber, and iron ore, and coal; I am in favor of it and I shall have something to say about that subject when we reach it. But I do object to the country protecting the other industries and placing on the free list the articles which the farmer produces by his toil and the sweat of his brow. If the people of this country want the cheapest food let them do their share in producing it. It is evident that the rural population of this country is decreasing from year to year in proportion to the total population, and I pause to ask the Senate how many years it will be before the farmer will refuse to produce the food to support the American people unless it is profitable.

I know it is argued by the Democratic Senators that because we produce a surplus of agricultural products which must be sold in foreign markets, therefore there should be no protection because the price is made abroad. That is the same old argument which has always been advanced against any kind of protection to the producer who exports any part of his product. We also produce a surplus of manufactured products which must seek their market in foreign countries, and yet it has been the policy of the Republican Party to give a reasonable protection in the domestic market to American industries, and it is a policy which has brought prosperity to this country, and whenever it has been abandoned it has been followed by disaster.

Beginning in 1920 the prices of farm products declined far below the decline in other products in the country or the price of labor, until what the farmer had to sell was on the average lower than all the other products in the country, and his dollar was deflated a greater per cent than the dollar produced in other industries.

I recollect that in the fall of 1921 an estimate was made that comparing the market price of all standard products with the price of wheat, wheat should sell for at least $1.50 a bushel in order to equal the purchasing power in other products which it formerly had. This was demonstrated by the statistics of the Government. It brought disaster to the country, and if it had not been arrested would have been followed by a financial crash unequaled in our history. The emergency tariff act, the farm legislation, and the economic steps taken by the Government, prevented a further decline, and prices are now coming back near to normal and the conditions, though not satisfactory, are improving in the farming communities. And now the Democratic Party wishes to place all farm products on the free list and subject our farmers to the competition of the flood of imports from Canada, Argentina, and other countries.

I have not the time to go through all of these farm schedules, but the figures show not only decreasing imports but increasing prices under the effect of reasonable protection to farm products. As a matter of fact, during 1920, in the months when Canadian wheat was being shipped into this country in enormous quantities free of duty, the price averaged higher in Winnipeg than in Minneapolis for the same grade of wheat, ranging from 15 to 30 cents a bushel higher. It is fair to say that part of that was probably due to the rate of exchange. In the same months in 1921, under the emergency

tariff, the price ranged from 10 to 25 cents a bushel higher in Minneapolis than in Winnipeg.

I know it will be said that so long as both countries export their surplus to a foreign market the tariff can not benefit the farmer; but it does benefit him, for the reason that the millers of the United States will pay a premium for high-grade spring wheat to mix with winter wheat and lower-grade spring wheat, and what I am saying generally about the effect of importations as to wheat and flour applies to the importations of all other products. The United States is the farmers' biggest market. Let me show you what occurred immediately the war embargo was removed from importations of Canadian wheat on September 1, 1920. From 1909 to 1913 the average importation of wheat from Canada to the United States was 940,000 bushels, and the average importation of flour was 132,000 barrels. Beginning September 1, 1920, there was a perfect flood of importations into the United States. During the last four months of 1920—September, October, November, and December—there were imported into the United States either in wheat or the equivalent of wheat in flour 35,074,676 bushels, and in the first three months of the year 1921 14,267,095 bushels, making substantially forty-nine and a quarter million bushels. If we produce a surplus, as we do, will the Senate tell me what that wheat was sent to the United States for if it did not affect the American price and the American market? Of course it did. That grain was not sent to the United States simply to be shipped through to foreign countries.

In addition to the 49,000,000 bushels imported during that time, 41,000,000 bushels were shipped through the United States over the United States railways and waterways to foreign countries, making in the neighborhood of a little over 90,000,000 bushels of Canadian grain. Of course, it is fair to say that the 41,000,000 bushels were simply shipped through and did not come in competition in the American market with American grain. It was shipped through, the same as a large amount of Canadian grain is always shipped through, in bond, and it always will be, because of the facilities for handling it in the United States; but practically 50,000,000 bushels from September, 1920, to March, 1921, inclusive, came in here for domestic use and consumption in competition with American wheat.

At the end of my remarks I introduce a table, compiled by the external trade branch of the Dominion Bureau of Statistics in Canada, showing the Canadian exports of various articles to the United States before and after the adoption of the emergency tariff, and if Senators are interested in this table they will find a tremendous decrease of agricultural imports from Canada in the 10 months of 1922 as compared with the 10 months of 1921, and comparing January, February, and March of 1921 and 1922, under free trade and under the emergency tariff, a general decrease in imports will be found—not in every product but, in the main, in the large items.

What I have said of wheat and flour applies with equal force to other products of the farm, such as live stock, meats, wool, butter, cheese, and other articles on which a duty was levied in the emergency tariff act and in the present bill. We all remember how unsparingly this emergency tariff was denounced by the Democratic minority in the Senate and in the House of Representatives. Mr. KITCHIN, the minority leader of the House, during the debate on the emergency tariff bill, said:

> The policies and principles advocated by the Democratic Party and inspiring the continued maintenance of its organization for nearly 100 years forbid our approval of the pending bill, and impel us to vigorously protest against its passage. * * * We take this opportunity to reassure the Democracy of the Nation that the Democrats and Congress will take no back track on the tariff. * * * To us, Republican protection is no better now than when the Tilden platform of 1876 denounced it "as a masterpiece of injustice, inequality, and false pretense." It is no better now than when the Cleveland platform of 1892 denounced it as a fraud—a robbery of the great majority of the American people for the benefit of a few.

I might remark that no one expects that party to take the back track on the question of the tariff or to ever learn anything from the experience of the past. To that party it is not an economic issue, it is a moth-eaten tradition, because it has opposed protection for 100 years it should continue to do so. That the country has been prosperous, has grown and developed its industries under a tariff, that agriculture has improved, makes no difference. It is opposed to protection because it always has been opposed to it.

Again and again I have heard the argument upon the floor of the Senate within the last six weeks that the Democratic Party is opposing protection in order to increase imports to this country and build up a foreign trade to furnish a market for the farmer. There is nothing to indicate that his market has suffered under the emergency tariff act, and what is the use of taking away from him the greatest market at home in order to find a less desirable one abroad? Of course we must aid in building up our foreign commerce and in finding a market for the surplus of farm products, but we can not do that by taking down the bars and injuring his market at home. But the tariff act of 1913, which put farm products on the free list and reduced the tariff rates on many other articles did not increase our exports. Nineteen hundred and thirteen was the year in which the Democratic tariff bill was passed. The next year our exports had dropped $100,000,000, and the balance of trade in favor of the United States had dropped from $652,000,000 to $470,000,000.

Commencing with the war our exports tremendously increased. The reason of this every one knows. No tariff cut any figure at that time. Enormous quantities of war material and foodstuffs were purchased in the United States, because they could not be procured in any other place, and the foreign commerce of Germany, England, France, and Italy was very largely interfered with, so that our exports were practically measured by what we could produce and sell. These exports continued to increase from 1914 until 1921. Examination of the exports of farm products after the emergency tariff was passed does not show that the farmers have suffered in their foreign market by reason of the tariff. Take Canada, for instance. Our exports to Canada in 1920 were $971,000,000; our imports from Canada, $611,000,000. In 1921 the exports to Canada were $593,000,000, while the imports from Canada were only $335,000,000, showing that our imports decreased very much more rapidly than our exports. Of course all our imports and exports after the war—some two years after the war—when its effect had died out and the purchasing power of the countries had been rehabilitated to some extent, enormously decreased. We must expect that.

In the Argentine our exports in 1920 were $213,000,000, while our imports were $207,000,000. In 1921 the exports to Argentina were $110,000,000, being nearly double the amount of our imports, which were $59,000,000. Of course all our foreign commerce has fallen off since the change of conditions brought about by the war. I do not say that a tariff on all imports could not be made so high as to injuriously affect our foreign commerce, and I am not in favor of building a tariff wall around the United States. I am speaking now of a tariff on farm products, and I believe that the emergency tariff has been of inestimable value to the farmers of this country. Within the last few months there has been a very great improvement in prices on all of these products. When the emergency tariff was before the Senate I submitted a report of the Bureau of Markets, which I now wish to call to the attention of the Senate. It will be found on page 9 of the report of the House committee on the emergency tariff. Among other things, the bureau reported as follows:

> There is a great surplus supply of meats and meat products in the United States, and prices of live stock have been driven to a decline much more rapid than the decline in cost of production, while imports of meats have further depressed the market. This constitutes a menace to the live-stock industry. Live-stock operations (before the war frequently precarious and unprofitable) did not during the war build up a reserve of profits sufficient to offset the present losses due to the current marketing of war stimulated production at less than its cost.

Then the Bureau of Markets, a Government agency, proceeds to give these statistics, and says:

> On the other hand, following the putting of meat on the free list in 1913, imports began a rapid development, which was cut off only by the war, and in 1919–20 show a marked tendency to resume. These facts need to be considered in conjunction with the fact that the Chicago packers control from 50 to 60 per cent of the meats shipped from South America to world markets. With our exports practically no greater than in 1910 and with a strong potentiality for increase of imports, the American farmers urgently need protection for their cattle and sheep products. Imports of mutton and lamb for the years 1917–1919 averaged about 6,000,000 pounds; in 1920 they were 100,000,000 pounds, and had a far more depressing effect on sheep and lamb prices than on consumers' prices of the products.

That the American farmers urgently need protection for their cattle and sheep products has been borne out by the effect of the emergency tariff.

The Senator from Mississippi [Mr. WILLIAMS] the other day read an editorial, I believe from the New York Tribune, in which it was stated that business throughout the United States was improving, citing manufacturing and commercial business generally. That is true; and why? A year ago business was in bad condition, largely because the purchasing power of the farming communities, including the small towns supported by agriculture, had tremendously decreased. The farmer could not pay the cost of production of his farm products, to say nothing about any profit whatever.

Mr. WATSON of Georgia. Mr. President——

The VICE PRESIDENT. Does the Senator from Minnesota yield to the Senator from Georgia?

Mr. KELLOGG. I yield.

Mr. WATSON of Georgia. In what part of the country does the Senator say that business is improving?

Mr. KELLOGG. I think generally throughout the country business has improved. I was going to say that it has improved very much in the farming communities. That is the point I was coming to.

What is the cause of the improvement, especially in the West and in the manufacturing and business centers of the country? We are apt to look at the great manufacturers and railroads and banks for improvement in business. As a matter of fact, the real fact is that when the farming communities are prosperous the others are prosperous and when the farming communities are not prosperous the others are not prosperous. You can not build from the top down; you have to build from the bottom up.

Mr. McLEAN. Mr. President——

The VICE PRESIDENT. Does the Senator from Minnesota yield to the Senator from Connecticut?

Mr. KELLOGG. I do.

Mr. McLEAN. Does not the Senator think that the prosperity of the manufacturing interests of the country is as important as the prosperity of the agricultural interests?

Mr. KELLOGG. Certainly; and I was going to mention that fact. Of course, it does not do to say that we should have prosperity only among the farmers, although that is the prime necessity, because a nation based upon agriculture with prosperous, independent farming communities who are proprietors is always prosperous. That must go hand in hand with the prosperity of the manufacturing communities, because it is not in the interest of the farmer to buy his products in Europe, simply because he may buy them a little cheaper, because he wishes the great manufacturing centers and the cities for his market; he wishes American labor for his market.

I say, however, that protection of farm products should go along with protection of our manufacturers, protection of our labor, protection of all of our industries, not to the degree of absolute embargo, but to the degree of giving the preference to the American farmer and the American producer, in whatever branch his business may be.

Mr. President, I ask permission to insert at the end of my remarks a table compiled by the external trade branch, Dominion Bureau of Statistics, showing Canadian exports to the United States affected by the emergency tariff during January, February, and March of 1922, and the 10 months ending March, 1922; also a table showing the average price of No. 1 northern spring wheat at Minneapolis and Winnipeg from July 1, 1920, to May 18, 1922.

There being no objection, the tables referred to were ordered to be printed in the RECORD, as follows:

Canadian exports to United States affected by emergency tariff, January, February, and March, 1922, and 10 months ending March, 1922.

[Compiled by the External Trade Branch, Dominion Bureau of Statistics.]

	Tariff number and article.	Unit of quantity.	January.		February.		March.		Ten months ended March—

Mr. SIMMONS. Mr. President, I have listened with much interest to the remarks of the distinguished Senator from Minnesota [Mr. KELLOGG]. I was very glad to have him express himself, because I had heard from time to time that he claimed to be a friend of the farmer, and in observing his votes since this bill has been before the Senate, I have come rather seriously to suspect that I was mistaken in the supposition in this behalf.

The Senator twits the Democrats for disregarding the interests of the farmer. I recognize that there are quite a number of duties carried in this bill which it is claimed will benefit the farmer, some of them pretty high duties upon his products. Some few of the products upon which these duties are carried will probably be enhanced in price as a result of these duties, but I have a strong conviction—and in that conviction I think the country pretty generally agrees with me—that many of the duties on farm products found in this bill would never have gotten there except for a surrender on the part of the friends or self-proclaimed friends of the farmer upon the other side of the Chamber. These duties have not heretofore been in Republican tariff bills. I am going to let the other side of the Chamber thrash that out.

It is said that the farmer obtained what was demanded in his name by reason of their agreeing to the multitudinous duties that were placed upon practically every manufactured product in this country, and which are crushing in their effect upon the already overburdened agricultural population.

Mr. GOODING. Mr. President——

The VICE PRESIDENT. Does the Senator from North Carolina yield to the Senator from Idaho?

Mr. SIMMONS. I yield.

Mr. GOODING. If the Senator is referring to what is sometimes called the tariff bloc here in the Senate, I want to say that he is entirely mistaken if he thinks there has ever been any agreement on the part of any Member of the Senate, so far as I know, or its Members or officers, or those who have been looking after the interests of the farmers in that organization. That charge has been made over and over again on the floor of the Senate, and I have denied it, and I deny it again. I say that there never has been any agreement or any understanding on the part of any member of the tariff bloc with regard to any schedules outside of the agricultural schedule.

Mr. SIMMONS. The Senator has denied that before, and others have denied it before, but a denial does not prove any-

thing. I say that the almost universal impression is that the Senate Finance Committee never would have been able to report this bill out, carrying these high rates of duty on manufactured products, if it had not been for the arrangement made by which certain agricultural interests were supposed to be taken care of. If everybody is mistaken about that, I am not responsible; but there is the impression that but for the arrangement by which the agricultural bloc were given all they asked—and they asked and obtained precious little that will be of any benefit to the farmer—these high tariff rates on manufactured articles could not have been written into the bill; and why? Because they place grievous burdens upon the farmer, and those who profess to stand for the farmer would not have consented that those burdens should be placed upon him except upon the condition that he be given what they accepted as bestowing some benefits upon him.

Mr. GOODING. Mr. President——

The PRESIDING OFFICER (Mr. WILLIS in the chair). Does the Senator from North Carolina yield to the Senator from Idaho?

Mr. SIMMONS. I yield to the Senator.

Mr. GOODING. It may be the Senator's impression that there is a combination, but I want to say again that he is entirely mistaken, and I think the votes we have had here on several occasions on different schedules prove very conclusively that Senators are voting their convictions.

Mr. SIMMONS. Mr. President, I say that but for the placating of the agricultural classes, represented here by these duties which are supposed to confer benefits upon the farmer, it would be absolutely impossible for the Finance Committee to pass this bill through the Senate, carrying these high rates of duty upon things which the farmers of this country have to buy and do not produce.

Mr. KELLOGG. Will the Senator yield for a question?

Mr. SIMMONS. I yield. I did not interrupt the Senator, however, when he was speaking.

Mr. KELLOGG. I will not interrupt the Senator. I beg his pardon.

Mr. SIMMONS. The Senator may ask me a question.

Mr. GOODING. Will the Senator be kind enough to yield once more to me?

Mr. SIMMONS. Yes; I yield.

Mr. GOODING. I want to say to the Senator from North Carolina that the average rates given to agriculture and live stock in the Finance Committee bill are not as high as the rates given by the Underwood-Simmons law to the manufacturers within something like 25 per cent. So that they are not very high after all, yet the Senator says they are extremely high.

Mr. SIMMONS. Is the Senator speaking of the rates on agricultural products?

Mr. GOODING. I am saying that the agricultural rates in the Finance Committee bill are not as high on an average as the rates given by the Underwood-Simmons law to the manufacturers of the country; that the rates on an average are not as high.

Mr. SIMMONS. Mr. President, that is an absurd comparison to make. However, there is no doubt about one thing, that the rates given by this bill to agriculture are higher than the rates given by the Underwood bill; and there is no doubt about another thing, that the rates given in this bill to the manufacturing interests of the country are 100 per cent higher than the rates in the Underwood bill. In view of that fact, may I ask the Senator if he can take any pride in the bargain (?) driven for the farmer in this bill?

Mr. GOODING. I am not questioning the difference as far as the manufacturing rates in the two bills are concerned. If the Senator will figure it up, he will find that the average rates given to agriculture are about 21½ per cent, while the average rates given to manufacturers under the Underwood-Simmons bill were somewhere about 24 per cent on an average.

Mr. CARAWAY. Mr. President, how is it, then, that a man who represents the agricultural West can be so enthusiastic for a bill which gives to agriculture only 21 per cent and to manufacturers 75 or 80 per cent? Are the great farmers of the West going to be sacrificed by their friends?

Mr. GOODING. The Finance Committee bill does not give an average of 75 or 80 per cent to the manufacturers.

Mr. CARAWAY. What does it give?

Mr. GOODING. I do not know what the average is, but some of the rates are only 20 per cent, some 15, and some of them are 70 per cent.

Mr. CARAWAY. And some of them 200 per cent.

Mr. GOODING. I do not think they are high enough on an average to protect American industries——

Mr. CARAWAY. Of course not; they ought to be 2,000 per cent.

Mr. GOODING. And that is going to be proven very conclusively before we get through with the debate.

Mr. CARAWAY. You will not prove anything.

Mr. GOODING. Wait and see.

Mr. SIMMONS. As I understand the Senator now, he is contending that the rates given in this bill to agriculture, where anything is done for agriculture, amount to an average of only about 21½ per cent.

Mr. GOODING. Twenty-one and a half per cent, taking all agricultural interests.

Mr. SIMMONS. Notwithstanding the duties this bill carries in favor of the manufacturing industries of this country on what the farmer must buy amount on an average to over 60 per cent, three times the average rate the Senator says this bill gives to argriculture; the Senator, claiming to represent agriculture, agreed, and is carrying out the agreement, to vote for these 60 per cent duties on the things which the farmer has to buy, while only exacting for the farmer—for he got all he asked—a 21 per cent duty.

Mr. GOODING. The Senator has no right to say that I have made an agreement, or that I am carrying out any agreement, because it is not true, and I hope I shall not have to call the Senator's attention to it again.

Mr. SIMMONS. It is a fact, Mr. President, that the Senator from Idaho spoke for the bloc. It is a fact that he got all that he demanded for the farmer. It is a fact that he got only 21 per cent for the farmer, and it is a fact that he has been voting from day to day up to this time, and declares his purpose to continue to vote from day to day to the end of the consideration of this bill, for 60 per cent duties upon the things the farmer buys and which the manufacturers of this country make.

Mr. CARAWAY. Has anybody ever heard him criticize a rate on this bill as being too high?

Mr. SIMMONS. No; and never will.

Mr. CARAWAY. He just announced that it was not high enough to suit him, and yet he never has offered an amendment I have heard of to increase the rates on agricultural products, so evidently the tears he sheds now are for the manufacturer and monopolist in the country, and not for the farmer.

Mr. SIMMONS. He got all he asked for the farmer, and he got only a third as much for the farmer as he has voted for from day to day for the manufacturing interests.

Mr. CARAWAY. He has not gotten as much for the manufacturers as he wanted.

Mr. SIMMONS. Mr. President, I am drifting away from what I started out to say.

Mr. McCUMBER. Mr. President——

Mr. SIMMONS. I shall finish in a minute or two, if the Senator will pardon me, and then he can take the floor. I am drifting away from what I rose to say. It was not my intention this morning to get into a heated discussion, because my physical condition will not permit me to do it, but I do want to say a word or two to my good friend the Senator from Minnesota [Mr. KELLOGG], who has addressed the Senate, and who has almost shed tears over the farmer of this country and his fate.

The Senator says he is a friend of the farmer. He says that whenever he gets an opportunity to vote for the farmer he is going to do it and do it gladly. I want to tell my friend how he may serve the farmers of this country. Voting for this 21 per cent duty, which will be effective to help upon only about 10 or 15 per cent of the articles upon which it is imposed, will not help the farmer much, I will say to the Senator.

It will only help certain relatively small groups of farmers in certain States and will not compensate even those small groups for the additional burdens that this bill heaps upon them. The American farmer, generally, it will not help, and in many instances it will add to his burden. I will tell the Senator how he can help the farmer. In that connection, let me say that the Senator since the bill was taken up has voted already probably something more than 100 times, and every vote he has cast up to this time has been a vote to shoulder upon the farmers of the country a burden of taxation such as they never have been called on to bear before in the history of the United States or in the history of the legislation of any country upon the face of the earth. The Senator apparently is going to continue to do that. He is going to continue to the end to vote for the duties contained in the bill, and when he shall have finished his work of helping the farmer I want to remind him that the aggregate result will be that he has imposed upon the farmer, who represents 50 per cent of the

consumers of the country, an additional burden of at least $1,500,000,000, and against that burden the general farmer of the country will get no benefit, while a few small groups of farmers will get a benefit of probably a quarter of a million dollars.

If the Senator from Minnesota is a friend of the farmer, he has a mighty poor way of showing that friendship. Certainly the groups of farmers thereby benefited will glady accept a duty that will give them a higher price upon the few of the articles which are produced by them; but the farmers of the country are men of sense; they are men of judgment; and they know that while the Senator may vote for these few effective duties on agricultural products, the Senator has from day to day until now voted and will from day to day until the bill is passed continue to vote to pile up burdens upon their backs until, when he gets through, the farmers of the United States will be loaded down by a burden of taxation which no people upon the face of the earth have ever yet had to bear.

Mr. WATSON of Georgia. Mr. President——

The PRESIDING OFFICER. Does the Senator from North Carolina yield to the Senator from Georgia?

Mr. SIMMONS. I yield.

Mr. WATSON of Georgia. In corroboration of what the Senator is saying, I would state that in the Swainsboro Forest-Blade, the county paper of Emanuel County, one of the very best farming counties in Georgia, there are four pages of advertisements in small print of land for sale by the sheriff for taxes. Our people in a typical farming State have been reduced to desperation by taxation, and they are being sold out of house and home at the rate this paper indicates—four pages of advertisements of lands for sale for taxes in one month.

Mr. SIMMONS. Mr. President, all I desire to say in conclusion to the Senator from Minnesota is that, instead of boasting of what he has done for the farmer, he ought to get on his knees and ask for pardon of the farmer for what he has done to him.

Mr. KELLOGG. Mr. President, I do not think I am in the habit of boasting much to the Senate. The Senator from North Carolina charges that the duties on farm products would not have been placed in the bill but for the agreement of the so-called farm bloc that they would stand by the very high duties. The duties in the bill are not as high as the duties in the emergency tariff law enacted by the same Republican Congress when the same farm representatives or representatives of farming States voted for them, and a few of the Democrats did likewise, and no claim was made at that time that any bargain was made as to any other rates.

Of course, Mr. President, it is absurd. No bargain has been made. I have never agreed to vote for any single item in the bill. I have voted against quite a large number of duties that I thought were too high, and I propose to go on to the end voting on each duty as nearly as I can make up my mind to what I think is right. I think everybody else is going to do the same. I do not know of any combination. If there is any, I have not been taken into it.

From the Senator's attitude one would think that it is his opinion that the sole interest the farmer has is to buy his merchandise, his manufactured products, in the cheapest markets the world furnishes to him, even though he makes this country merely a farming country and not a farming and manufacturing country. Of course, it is to the interest of the farmer to have a market in all of the great cities and manufacturing centers and to have this country produce all the manufactured goods it can, because this is his big market.

I am not going to vote for any tariff rate that I think is unreasonably high. I may be mistaken, as I or anyone is liable to be in some of the two or three thousand items contained in the bill. But the Senator from North Carolina is not going to fool the farmers of the country by any such talk as that of this morning. They understand the tariff and know exactly what they want.

Mr. SMITH. Mr. President, of course theoretically it would be necessary, in order to do justice, to place a duty upon the raw materials and upon the farm products commensurate with the duty upon the thing the farmer buys. Academically everyone would see that that would be but fair. If we are to preserve the home market for home industries all who participate in that market should participate upon a basis of equality. One could not argue, if the elements that enter into it were amenable to human law, that he had a right by any provision of law to lay a duty upon what is to be purchased by one class of individuals out of proportion to the duty upon the articles which that individual sold to get the means for the purchase.

When we speak of there being discrimination in the bill against farm products in the percentage of the duty, I have not given that any great concern, nor have I given it any particular study, because I known, as practically every man on the floor of the Senate knows, that a great fundamental law, basic law, natural law, can not be set aside by the temporary enactment of some human law in contravention to it. There is a fundamental basis in our economics that makes it impossible under present conditions—and these conditions seem to be the outgrowth of natural law—for the farmers of the country, producing the basic products of the farm, ever to be benefited to any appreciable degree, any material degree, by any tariff law that may be passed.

In the first place, when the farmer produces his crop, the size of the farms and the conditions under which a given product is produced are so varied, his financial resources are so notoriously wanting, that it is practically impossible for him as a person and individual in interest to take advantage of any tariff that may be placed upon his product. Let us take the matter of wheat. I invite a study of the export and import prices running from 1910 to 1921. Compare what the farmer received for his wheat in the domestic market with the price that the foreigner gave for the domestic grain in the open markets of the world.

Why is this? The fundamental reason, first, is that the farmer, numbered by the millions, with no organization, with practically every crop that he makes hypothecated before it is harvested and expenses incurred that must be met, having no power to fix the price himself in which he can add up the cost of labor, the cost of land, the overhead charges, and then through the power of his reserve capital and his organization say, "This is the domestic price and the Government has protected me from competition by a tariff wall, and though I sell the domestic wheat at $2 a bushel by virtue of the protection I get and the exported wheat at $1.70 a bushel, I have counted my cost and taken advantage of the protection and fixed my price."

But who fixes the price of the American farmer's wheat? I guarantee the assertion that there is not a farmer in America who influences to one one-hundredth of 1 per cent the market price of his wheat. Who does fix the market price of his wheat? The export buyer and the domestic buyer who compete in the same market for the same product. I guarantee the assertion here to-day that the price of American wheat is fixed by the export price. But we have gone afield. What is the use for us even to consider putting a tariff on agricultural products, except those which are made in such small quantities by the individual with such capital that he can take advantage by virtue of his reserve capital to fix the price? Why do the Republicans stand here and talk about extending to the farmers of the country the blessings of a tariff when it is known that the purchaser of that article is the one who fixes the prices and the producer has no word in it?

Mr. KELLOGG. Mr. President, will the Senator yield?

Mr. SMITH. Certainly.

Mr. KELLOGG. I suppose the Senator is aware of the fact that much of the wheat exported from this country is exported in the form of flour, that the Americans are the greatest millers in the world, and that the American millers pay a premium over foreign prices for wheat at the mill and sell the by-products to the cattle raisers and the dairymen in their own section of the country. So the foreign price, the Liverpool price, less the freight, does not fix the price of American wheat in the domestic market.

Mr. SMITH. I wish to ask the Senator a question right there: There may be some little incidental matter which may enter into the question and vary the price, but the Senator from Minnesota does not pretend to say that the farmers of America fix the price of their wheat or have any voice in doing so at all? I shall be delighted to know that there is in the domain of America somewhere some product of universal use which is produced by American farmers the price of which is fixed by the producers of the article. Does the Senator know, will the Senator pretend to say, that the farmers of this country have any influence at all in fixing the price of their grain?

Mr. KELLOGG. Mr. President, for the reason that I did not think the farmer had voice enough in fixing his prices, I supported the cooperative market bill to give him a chance to do so, and I think he is going to do it.

Mr. SMITH. I agree heartily with the Senator from Minnesota as to that.

Now, Mr. President, I want to say here——

Mr. GOODING. Mr. President——

The VICE PRESIDENT. Does the Senator from South Carolina yield to the Senator from Idaho?

Mr. SMITH. I yield.

Mr. GOODING. The Senator from South Carolina, of course, believes in the great law of supply and demand?

Mr. SMITH. Yes; but that law has been perverted.

Mr. GOODING. If the Senator believes in that law, I want to ask him if the importation of 40,000,000 bushels of wheat from Canada in six months, when the average importation had been only 1,000,000 bushels a year, had anything to do with bringing down the price of wheat in this country? That is the object of a tariff—to control the supply to some extent and to stabilize prices.

Mr. SMITH. I wish to answer the Senator. I think he has his terminology a little wrong. Owing to modern conditions——

Mr. GOODING. I will take the law of supply and demand.

Mr. SMITH. Wait a minute. I will answer the Senator in my own time, as I have the floor. Under modern conditions it is not the law of supply and demand any more; it is the law of supply and the man. That is the law that is operating now. The millions of bushels of wheat to which the Senator from Idaho referred as being imported in this country come in here under bond, to be ground by American millers and then exported. The Senator from Idaho knows that.

I wish to make the further observation that it will not make any material difference, so far as the fixing of the price is concerned, how much wheat is imported into this country so long as the buyer has the privilege and power to fix the price.

Why, Mr. President and Senators, we all know that the logic of events to-day tends in the direction of organization, combinations and trusts. I will guarantee that a Senator can not walk into a store in the city of Washington and purchase any article of common merchandise which is not controlled by a trust or a combination and the price of which is not practically uniform from the Pacific to the Atlantic and from the mountains to the seaboard. That is true from the smallest to the greatest article. Under the tariff policy of protection to American manufacturers, trusts and combinations have the American market and they divide the territory up. They have their retail organizations, their wholesale organizations, and their manufacturers' organizations, and they have an understanding as to prices and profits and the division of territory in which to distribute their goods.

Mr. GOODING. Mr. President——

The VICE PRESIDENT. Does the Senator from South Carolina yield to the Senator from Idaho?

Mr. SMITH. I yield.

Mr. GOODING. I desire to ask the Senator from South Carolina if his party was not in control of the Government for eight years; and if the condition of the country is such as he has stated, what his party did to correct it?

Mr. SMITH. I did not catch the Senator's question.

Mr. GOODING. I stated that the Democratic Party was in control of this Government for eight years, and I asked what did that party do to correct the evil which the Senator from South Carolina is describing of combinations and of trusts, which the Senator says control the prices of everything?

Mr. SMITH. The Democratic Party passed what we thought was, and what fundamentally is, and what, properly administered, will yet prove to be, the beginning of the solution of that problem. I believe that our new banking and currency law, which allows a commodity basis for the issuance of currency, if properly administered, will go largely toward relieving the situation to which I have referred. I believe that the land bank law which we passed giving long-time credit at low rates of interest furnishes some material advantage; but before the farmers of this country can compete with their organized capitalized competitors the Government will have to see to it that there is provided a banking and currency system which is adapted to the peculiar conditions under which the farmer labors and produces and which will put him on a basis of equality with the commercial banking world.

Mr. President, we all know that the banking resources of this country are at the command and for the use of commerce. Senators on this floor will say that we can not put agriculture on the same basis as the ordinary commercial activities in the banking system as we now have it; that it is necessary to have a quick turnover in the capital of a bank; its assets must be liquid to meet the daily and hourly demands of commerce. It takes 12 months for the farmer to produce a commercial asset to meet the liabilities incurred in the production of his crop. If he attempts to store his produce and to hold it by borrowing money, even from the Government, there comes a cry that it is a frozen asset and must be forced upon the market. There are no banking resources in this country by which he can meet the peculiar conditions under which he produces, while every ingenuity known to the brain of man has been invoked to perfect the plan by which the manufacturers of ordinary commercial articles may be adequately financed.

Mr. CARAWAY. Mr. President, may I suggest to the Senator that the man who manufactures is able to stop production or to limit production whenever his business ceases to be profitable; but the farmer, after he commences to work, has no way of quitting his crop in the midst of the season in order to limit his production without ruining himself?

Mr. SMITH. There is no doubt about that.

Mr. GOODING. I might say that while the farmer may not hold his products against the world, if he is ever to have any benefit of a more adequate system of credit or anything of that kind he must have a protective tariff to protect him as against the world, or he will not be able to hold his products, nor will he have his own market.

Mr. SMITH. Mr. President, we have had an illustration of holding against the world. When prices were breaking—and they broke to the point of bankruptcy—the farmers of this country were calmly told that the reason of that condition was that the world markets could not absorb their goods, and therefore the bankrupt and pauperized prices of Europe must obtain here until Europe ceased to be bankrupt and pauperized, while at the very same time here in this Capitol we were told that we should pass a law by which the manufacturers' article sold in this country should be sold at anywhere from 60 to 75 per cent higher than the price for a similar article which could be purchased abroad.

Mr. CARAWAY. Mr. President, if I may interrupt the Senator further, I think about as good an illustration of what the farmer needs may be found in the emergency tariff act. After it was enacted farm products fell every month, but when we passed a bill through Congress to buy $20,000,000 worth of grain for starving Russia—and I voted for it—when the real object was to get rid of a surplus, grain immediately commenced to rise, which shows that it was the market and not the tariff that the farmer needed. When $20,000,000 worth of grain was shipped out of this country grain commenced to rise, when, as a matter of fact, under the emergency tariff law the price fell every month.

Mr. SMITH. Mr. President, what I am trying to emphasize and impress upon my colleagues is the fact that it is a fundamental truth, which can not be controverted, that the man who has something to sell but who has no resources back of him, who has incurred debts in the production of a commodity, which debts are due and which are almost equal to the market value of the commodity produced by him, no tariff law can benefit him. So long as he must depend upon the price of the purchaser for what he gets for the commodity produced by him the tariff will avail him nothing. What good would it do the shoe manufacturers of this country if we were to impose on shoes a tariff of 100 per cent ad valorem or a specific duty of double the price of his shoes, if when he produced his shoes and had them ready for market he had to depend upon the price of those who purchased his shoes for what he would get for them? To add to that illustration, suppose the buyer of the shoes was not only buying for the domestic market but was also buying for the foreign market and knew that the manufacturer of the shoes had no way of holding them, no resources back of him, no organization, and no power to assert his own right in the commodity.

Take the cotton of the South. Up to a few years ago we produced such a quantity of cotton that we shipped 50 per cent of it abroad. What was the price of American cotton on the local market? What is the price this morning of American cotton on the local market? It is the price of Liverpool cabled here. Who dictates the price of American cotton to-day on the market of America? American buyers buying for export. What does the domestic mill give for cotton? The domestic mill gives the foreign price, less the freight from here to Liverpool. I guarantee that that assertion will hold good in reference to the wheat of the West.

Mr. WATSON of Georgia. Mr. President——

Mr. McCUMBER. The Senator says he will guarantee that——

The VICE PRESIDENT. Does the Senator from South Carolina yield; and if so, to whom?

Mr. SMITH. I yield first to the Senator from Georgia, and then I will yield to the Senator from North Dakota.

Mr. WATSON of Georgia. If the Senator should take the trouble to weigh some of the mercerized goods which the manufacturers put on the market in competition with silk, he would find that the pound of cotton for which the farmer receives,

say, 20 cents, is transformed by law into a product for the cotton in which the American people pay at the rate of from $50 to $100 a pound.

Mr. McCUMBER. Mr. President——

Mr. SMITH. I yield to the Senator from North Dakota.

Mr. McCUMBER. The Senator has just stated that he will guarantee that the same rule which he says applies to cotton applies also to wheat. I know that the Senator wants to be fair, and I know how close to his heart are the interests of agriculture generally throughout the country; but I want him to be perfectly fair in the discussion of a matter that affects our farmers, as I shall always try to be with anything which affects the cotton producers. I admit—I think we will all have to admit—that the farmer has been largely at the mercy of the manipulators of grain, cotton, and so forth, but the great law of supply and demand has never entirely been destroyed. The Senator from South Carolina has stated that the 49,000,000 bushels of wheat which the Senator from Minnesota stated came in from Canada were imported into this country for grinding and for export abroad.

I want to correct that statement of the Senator, because I know he wants to be corrected if he is in error. Something over 49,000,000 bushels came in for sale and consumption in the United States, and between 40,000,000 and 45,000,000—I have not the exact number in mind—came in, in addition to that, in bonded warehouses, and, of course, was shipped out. To show the actual effect of the emergency tariff, however, while, of course, as the general world market and supply and demand went up and down our supply went up and down to a certain extent; yet, from November, 1921, when we began to handle the 1921 crop, down to the present time, the average price in the United States for wheat in Minneapolis, compared with Fort William, making allowance for the grade, which is a little better under the requirements of the Canadian laws, was about 30 cents a bushel in favor of the American producer. The table which the Senator from Minnesota [Mr. KELLOGG] put in, and which I put in the other day, which shows the comparative prices between the two markets in 1920 in November, and then in 1921 in November, gives an average of over 30 cents a bushel in favor of the American producer as against the Canadian producer.

The Senator knows that Canada has almost no home market compared with her export market, and she pays exactly the same price to export a bushel of grain from Fort William to Liverpool as the American pays to export a bushel from Duluth to Liverpool. The Canadian price is governed by the Liverpool price, less the cost of transportation, while the American price, as shown right up to date in these tables, averages about 30 cents a bushel higher than the Canadian price, due entirely to the tariff which is placed upon it, because if it were not there, of course, the Canadian product would come in just exactly for the same price as the American product from the same point, and would take the market in preference sometimes even to the American product; so the tariff does not operate the same as it does upon your cotton. It does give us an advantage in the case of our wheat.

Mr. SMITH. Mr. President, I did not know that this discussion was coming up, and I have not armed myself with statistics. The fact of the business is, in the broad statement of the case that I have attempted to make this morning, that while there may be locally some incidental advantage, I am here emphasizing this fact: It would not benefit me as a wheat grower to have a tariff placed upon my wheat if I produced enough wheat to supply the domestic demand and had an appreciable surplus to export, if I had no power by organization or reserve capital to fix the price; the tariff would benefit me nothing, because the purchaser of that wheat is going to buy for domestic use at the same price that he pays for the export article.

Mr. McCUMBER. But suppose there was a demand for every bushel of a certain kind of wheat that you produced in the United States, like the milling demand for our hard northern wheat. We do not export any of it. We export some flour, but we do not export a bushel of that hard northern wheat; and there is where people seem to misunderstand the situation. The milling demand takes every bushel, and then it reaches over into Canada, because we have not quite enough; and that is why the tariff does benefit us on 200,000,000 to 250,000,000 bushels of hard spring wheat.

Mr. SMITH. Yes; but that is a case where the scarcity of the article and the law of supply and demand is operating, and not the tariff. Let me show the Senator, to illustrate the point I am attempting to make——

Mr. McCUMBER. Let me correct the Senator right there. The Senator speaks of the tariff. Without the tariff you can reach right over across the imaginary line and tap a granary which has 250,000,000 bushels of the same kind, and immediately convert your deficit into a surplus of, say, 200,000,000 bushels.

Mr. SMITH. Mr. President, take the steel industry of this country, producing practically 80 per cent of the world's consumption of fabricated iron and steel. Its surplus, its exports, are almost equal to the domestic sale; and on the border between Mexico and the United States this was shown a few years ago: In the case of steel rails for use in the building of an international road, the American rails were anywhere from $16 to $18 a ton higher on the American side than just across the imaginary line in Mexico, the same rails, made by the same company. What was the reason of it? The great Steel Trust, armed as it was with reserve capital and organization, could take advantage of your tariff and put up the price to the American consumer to a point where it measured the difference of the tariff, while just across the border it met the competition of the world and sold its surplus at $16 a ton less than its product was sold to the American.

Were the American farmer organized, and had he back of him the financial resources that characterize the manufacturing interests of this country, the tariff might enable him to keep the manufacturing interests from going into his pocket and taking from him the proceeds of his toil and putting it into their pockets; but I guarantee the assertion here to-day that if it were humanly possible to put the same rate of duty and the same protection on everything in America, from the humblest laborer up to the highest phase of manufacturing, so that each and every American citizen would have the same advantage, we would not have this clamor for a tariff law.

Mr. President, we are rapidly approaching the end of the second century of the existence of this country. We boast of our Government and its achievements. During the World War, on such a stupendous scale, we practically fed, clothed, financed, and fought the battles of the world. We boast of our progress and development, and yet the agriculturists of this country are to-day laboring under the same financial handicap as the first one who ever labored under any organized system of finance. We are told that the plan by which the farmer finances his products to-day is not compatible with the banking laws by which commerce is financed; and yet we have perfected the latter plan to a point where it meets the minutest demands of trade.

Mr. BURSUM. Mr. President, will the Senator yield?

Mr. SMITH. I yield.

Mr. BURSUM. I take it the Senator from South Carolina is speaking in behalf of an extended credit system for the farmer—that is, that he ought to have longer credits, or seasonal credits.

Mr. SMITH. No; I am stating that our legislation for the farmer of this country ought to have gone pari passu with our legislation for commerce, so that to-day, if it were the policy of this Government to pass a protective tariff law, he would automatically be made a beneficiary thereof to as great an extent as the manufacturing and commercial interests of this country; but there is not a man here but knows that that is not true. The farmer has to sell at the behest of the buyer, while the manufacturer sells at his own price. You have provided the farmer with no credit facilities, with no banking facilities, and if he dares attempt to store his stuff in order to distribute 12 months' supply over 12 months he is immediately branded as a profiteer, and you say you have frozen credits, and you can not live while the finances of this country are tied up in the products of the poor fellow who caused them to come into existence. We are told that 30 and 60 and 90 day paper is essential for the progress and development of commerce and that the farmer must sell his stuff.

Mr. BURSUM. Mr. President, as I understand the Senator's statement to the effect that the farmer is obliged to sell his product at a low price, there are no financial arrangements made available for his use, and, therefore, he is unable to bring about an orderly marketing of his product in proportion to the demand——

Mr. SMITH. Just to put it in a word, he has no say in the price of the thing he produces.

Mr. BURSUM. While every man, every producer, every manufacturer can control the sale of his products if he has an arrangement to finance himself so that he can distribute his production in accordance with the demands caused through consumption?

Mr. SMITH. Not only can he distribute it, but he can govern his crop according to his own notions.

Mr. BURSUM. Precisely. Then I take it that the remedy that is sought must be the longer extension of credit—that is, machinery whereby the farmer may obtain, in place of 90-day

loans, 6-month or 9-month loans. How long a period does the Senator believe would meet the situation?

Mr. SMITH. Oh, that is academic. What is needed is a financial system that will meet the peculiar needs of the farmer, giving him as ample credit as the manufacturer, and rating him in his peculiar field along with the manufacturer. In a word, what I am contending is this: You have no right in reason, common sense, or justice, knowing the condition under which the agriculturist of this country produces the wealth of this country, to burden him with a tariff law which can protect and does protect the man who is organized, with the resources and with the power to fix his price commensurate with the protection you give him, while the man who produces the raw material, unorganized, without capital, at the mercy of his creditor, has to pay the bill out of the miserable pittance that the buyer gives him.

That is the plea I am making. In place of attempting to pass a tariff law adding to his burdens this Republican administration ought to address itself to remedying the miserable conditions under which, in 1920, without a word of warning, after he had been plead with to produce to the limit, like a clap of thunder out of a clear sky his paper was discredited in the bank, he was told to sell, credit was denied him, the market tumbled until he found himself bankrupt, having no resources whatever to meet the storm. What was the comparison? I invite Senators here to-day to look at the difference. Agricultural products—cotton, wheat, cattle—went to bankrupt prices, while shoes and clothes and every manufactured article did not decline appreciably from the peak of war prices. Why was that? Because the farmer was without any resources to help himself, while the manufacturer had the cooperation of his organization and the resources of the finances of this country.

Mr. GOODING. Mr. President, I would like to ask the Senator if he knows when the increase in prices of farm commodities commenced? How soon after the passage of the emergency tariff bill was it before every farm product which the emergency tariff bill protected was increased in price?

Mr. SMITH. The market prices began to increase when they had shaken out every poor devil and crucified him, and those few who could hold the balance—and it was a small balance—by mortgaging their places and raking and scraping from private sources, held on to the residuum of wheat and held on to the residuum of cotton until the very competition forced the organization to put the price up a little. That is when it started. They gunned for every man who was holding anything, and when they reached the point where they must fill their orders they gave little premiums in order to get enough to fill their orders. That is when the prices started to rise. I will say to the Senator that there was no emergency tariff on cotton.

Mr. GOODING. Will the Senator yield?

Mr. SMITH. I want to answer the Senator's question. There was no emergency tariff on the cotton of the South, and yet cotton has gone up. And why? Because we made only 7,900,000 bales against a normal production of about 13,000,000 bales.

Mr. GOODING. I ask the Senator if it is not true that the price of cotton has gone up in sympathy with the prosperity the farmers are getting in other lines? Wool has gone up. The two commodities have more or less sympathy, one with the other, and they go up or down together. Then I would like to ask the Senator if it has not been the policy of the Democratic Party for a hundred years to put the raw materials, farm products, on the free list, to give the manufacturers of this country cheap raw material? Is not that the Democratic policy? Has not that been the faith of your fathers for a hundred years? The reason why you put them on the free list was to give the manufacturers cheap raw materials. Your theory is that it is going to give laboring men cheaper clothing, cheaper food, and all that. Is not that correct?

Mr. SMITH. No.

Mr. GOODING. Is not that the policy of the Democratic Party?

Mr. SMITH. I will answer in my own time.

Mr. GOODING. Tell me if, in the light of Democratic wisdom, farm products are not called raw materials? Have they not been called raw materials for a hundred years? Yet you put them on the free list and give the manufacturers the cheap raw materials. That is the issue between the two political parties, and there should not be any feeling about it.

Mr. SMITH. The party to which I belong had sense enough to know that the conditions were such that the surplus of farm products was exported in great quantities, and for revenue, for the sake of helping to support the Government, we did put a tax on certain articles which they did not manufacture here, or, if we did manufacture them, large quantities of which were imported into this country. But the point I want to make, and the point I am making, is that we have made no provision whatever for the real protection of the agriculturist of this country, while we are putting burdens on him, knowing that he can not reimburse himself under any such legislation as is now pending.

I think it would have been of far more interest to the agriculturist of this country if, in place of mocking him with a thing he can take no advantage of, we had addressed ourselves to meeting the conditions under which we know he is now being discriminated against and handicapped, and fearlessly, as honest men, provide that in the produce markets of the world and in the financial markets of the world he should have the same opportunity the manufacturer has.

Mr. GOODING. Mr. President, with about three or four exceptions the Democratic Party has placed a revenue duty, and in some cases a protective duty, on manufactures of every kind and description. They put farming machinery on the free list to give the farmers of the country cheaper farming machinery. The fact is that up to the present time there is no farm machinery made anywhere else in the whole world which the American farmer can use. They put boots and shoes on the free list, and they put barbed wire on the free list, but with those exceptions practically everything the farmer uses upon the farm or in his home is taxed by the Democratic Party. While he is forced to go and sell what he produces in a free-trade market he must buy what he uses upon the farm and in his home in a protected market, and there are only those three exceptions to that rule. That shows the unfairness of the Democratic Party in protecting one industry and forcing the farmers, who make civilization possible, to compete with the cheap labor of all the world.

Mr. McCUMBER. Mr. President, when we closed the session last evening there was a sort of gentlemen's agreement that we would try to-day to hold to the question which was really up for discussion. While all the debate this morning has been on the tariff bill, it has been far afield from the real question under consideration. The great trouble is that when we discuss a schedule days before we reach it we just repeat the same discussion when we do reach it. I appreciate the position of the Senator from Minnesota [Mr. KELLOGG], who has to leave, and wanted to make his address upon the agricultural schedule, but I hope we can now return to paragraph 355.

Mr. SIMMONS. Mr. President, before we do that I want to say to the Senator that I regret very much that we have lost a couple of hours in discussing general matters instead of confining ourselves to the pending paragraph, but the Senator certainly will acquit this side of the Chamber of any blame for it. It was the result of the injection into the debate of a general speech by the Senator from Minnesota.

Mr. McCUMBER. I am not criticizing anyone. I simply want to get down to the paragraph now pending.

Mr. SIMMONS. I want again to appeal to this side of the Chamber, when we return to a discussion of the bill, that we confine our attention to the pending items the balance of the day.

Mr. CARAWAY. Mr. President, before we do that I want about five minutes to discuss a matter, and then I shall be perfectly willing to follow that suggestion.

Mr. McCUMBER. I want to offer an amendment now, and then it will be subject to discussion.

Mr. CARAWAY. Very well.

Mr. McLEAN. Before the Senator from North Dakota submits his amendment I ask leave to withdraw the amendment I offered last night to paragraph 355 on behalf of the committee.

The VICE PRESIDENT. Without objection, leave is granted and the amendment is withdrawn.

Mr. McCUMBER. In the discussion of paragraph 355 we suggested yesterday that there would be the necessity of striking out at least the amendment on line 23, page 73. Striking that out, however, would necessitate quite a number of changes. The committee had already agreed upon making certain of those changes on page 74, but had not yet reported the changes which it proposed.

In a further consideration of the matter this morning it was thought best by the committee, because of quite a number of modifications which it desired to make in that portion of the paragraph which appears on page 74, to rewrite the paragraph entirely, and I am therefore offering as a substitute for paragraph 355, on behalf of the committee, the amendment which I send to the desk.

Mr. KING. Has the Senator any extra copies?

Mr. McCUMBER. Yes. I send the Senator a copy.

The VICE PRESIDENT. The Secretary will read the amendment.

The ASSISTANT SECRETARY. The Senator from North Dakota moves to strike out paragraph 355, beginning at line 14, on page 73, and in lieu to insert:

PAR. 355. Table, butchers', carving, cooks', hunting, kitchen, bread, cake, pie, slicing, cigar, butter, vegetable, fruit, cheese, canning, fish, carpenters' bench, curriers', drawing, farriers', fleshing, hay, sugar-beet, beet-topping, tanners', plumbers', painters', palette, artists', shoe, and similar knives, forks, and steels, and cleavers, all the foregoing, finished or unfinished, not specially provided for, with handles of mother-of-pearl, shell, ivory, deer, or other animal horn, silver, or other metal than aluminum, nickel silver, iron, or steel, 20 cents each; with handles of hard rubber, solid bone, celluloid, or any pyroxylin, casein, or similar material, 10 cents each; with handles of any other material, if less than 4 inches in length, exclusive of handle, 2 cents each; if 4 inches in length or over, exclusive of handle, 10 cents each; and in addition thereto, on all of the foregoing, 45 per cent ad valorem; any of the foregoing without handles, with blades less than 6 inches in length, 2 cents each and 45 per cent ad valorem; with blades 6 inches or more in length, 10 cents each and 45 per cent ad valorem: *Provided*, That all articles specified in this paragraph, when imported, shall have the name of the maker or purchaser and beneath the same the name of the country of origin die sunk legibly and indelibly upon the blade in a place that shall not be covered.

Mr. CARAWAY. Mr. President, I ask that some one page the Hon. Thomas B. Felder. There is an opportunity available for a man of his peculiar talents. In my heart I feel that I may have been unfair to him. I want therefore to give him the advantage of getting in on the ground floor in this case. His partner, the Attorney General, I am sure, can take him in.

I refer to the Brolaski case. A news item under date of June 2, 1922, from the San Francisco Examiner, reads as follows:

BROLASKI PLEA MEETS REBUFF.

Henry Brolaski is finding difficulty in having Federal and former Federal officials approve his petition for parole.

Brolaski, who was styled the "master mind" of the booze ring, is now serving a two-year sentence in the Federal penitentiary at McNeill Island for conspiring to violate the national prohibition law.

He had been in prison but a day before he made application for parole. It was stated yesterday that United States District Judge M. T. Dooling, who presided at the trial, had disapproved the application, as had former United States District Attorney Frank M. Silva, who prosecuted the case, and Samuel F. Rutter, prohibition director, who secured the evidence which convicted Brolaski.

In view of the attitude of those who prosecuted the case, it is not believed that United States District Attorney John T. Williams will approve Brolaski's plea for parole.

He got in jail, it would seem, on the 31st day of May. On the 1st day of June he made his application for parole. On the 2d day of June the officials who had to do with his conviction disapproved his application for parole. On the 6th of June, the local authorities having disapproved his application for a parole, Brolaski applied to be transferred from the penitentiary to a hospital for treatment and examination. If I am not mistaken as to the date—instead of the 6th it may have been the 7th—the Attorney General, Mr. Daugherty, authorized and ordered that he be removed from the penitentiary to some place where he could be observed and treated. It is the same step that was taken to reach a commutation of the sentence of Charles W. Morse. I am unwilling that the Attorney General shall now double-cross his former associate in the Morse case, and therefore I want Felder paged so he may get in on this case.

Incidentally, I want to appeal also to the Republicans to put soap on the free list. They treated Mr. Morse, so Felder said, with soap so as to give him the symptoms of Bright's disease when he did not have it. I understand Brolaski has tuberculosis of the kidney and I presume the treatment is the same. I hope, therefore, the Republicans will not make it an expensive process. Let us put soap on the free list so Brolaski can have the same symptoms that Morse had, and Felder and Daugherty get the same results. I hope that this appeal shall not fall on deaf ears and that we may at once put soap on the free list, especially if soap is to be used for medicinal purposes to give people the symptoms of Bright's disease when it is found necessary that they must develop a disease to get out of jail.

Mr. President, there is a publicity bureau connected with the Attorney General. I do not know who is at the head of it. I have been told that the man who is running it was loaned to the Attorney General's office by a local newspaper. Anyway, he is a man who is entitled to consideration. The Washington Post of Monday last in big headlines carries this:

Daugherty declares war on Alaska fish pirates. Outlaws, long a menace, must be suppressed, he orders United States attorney and marshal at Juneau. Treasury Department to assist with subchasers, and Department of Commerce will stop illegal canning.

I hope no one will make a mistake. It is not the "canning" of employees for being honest that they are going to stop, because that is a legitimate industry under this administration. They "can" them in the Bureau of Engraving and Printing if they are honest; they "can" them in the Department of Justice if they are honest and want to prosecute grafters. So that I do not want anyone to understand that "they" are going to stop this industry of "canning" where it applies to employees. It is only to "canning" fish that the inhibition goes. Nobody may "can" a fish except the Attorney General. Any head of a department, however, is at liberty to "can" any honest employee, especially if he is a Democrat.

Here is another one of these wonderful headlines in the same paper. I read the entire article:

DAUGHERTY WOULDN'T TAKE A MILLION FOR JOB NOW, HE SAYS.

[By the Associated Press.]

Attorney General Daugherty called on President Harding yesterday about a matter of official detail and was asked, when he came out, for his view upon various reports that he would resign office.

"You can say," he told newspaper men, "that there never was a time when I would have given 30 cents to get the office of Attorney General, but that I would not take a million dollars for it now."

Evidently the Attorney General is getting on to the opportunities of the office. Before he had it and knew what he could do with it he would not give 30 cents for it. As soon as he found out how he could work it, and the advantages there are in it, he would not take a million dollars for it. I am not going to be so imprudent as to ask what wonderful resources have been discovered that the office possesses. If the Attorney General had wanted me to know, of course he would have told the Post and it would have published it.

But I do want Mr. Felder paged, Mr. President, if you please.

Mr. JONES of New Mexico. Mr. President, I am glad to observe that the committee has clarified paragraph 355 and has made some rather substantial reductions, but it seems to me that there is not the necessity for such an increase of duties as the present amendment proposes. The items in the paragraph are largely manufactured in the United States. We export considerable quantities of the various items appearing in the paragraph. It is true the statistics on the subject are not very complete or specific, but we are exporters and my information is from manufacturers that we can and do compete with the world in a good many of the classes mentioned in the paragraph. The articles are made, to a great extent, by the use of machinery. I am told that we do not need any increased duty on the commodities at all. There are some imports of different classes of goods, largely by reason of special design or finish of carving knives and some other kinds of knives, but we have a good trade, not only in our own country but in other countries.

Before the war we were exporting a considerable percentage to Chile and Argentina. By the way, that is the only method we have of knowing the extent of our exports of these commodities. As I said, we have no satisfactory statistics, but the Tariff Commission upon examination of the import trade of Chile and Argentina have ascertained some facts which are illuminating regarding these items. For the year 1912–13 Germany sent 49 per cent of the Chilean imports of knives and forks, the United Kingdom 38 per cent, and the United States 7½ per cent.

Mr. McLEAN. Mr. President, with reference to what year is the Senator quoting?

Mr. JONES of New Mexico. Nineteen hundred and twelve and thirteen, prior to the war. For the year 1913–14 Germany sent 45 per cent of knives and cutlery to Chile, France sent 25 per cent, the United Kingdom 17 per cent, and the United States 4.6 per cent. I refer to that for the purpose of showing that prior to the war we were exporting these products in considerable quantities in competition with the world. Since the war our exports have been very much greater than these figures would seem to indicate. In 1920 we exported of table cutlery $3,458,756, and in the first nine months of 1921 we exported over $1,000,000. Of all other cutlery, the general classification, in 1921 we exported nearly $4,000,000, and in the first nine months of 1921 more than $1,000,000. We do not know what the domestic production is definitely.

Mr. McLEAN. Mr. President, has the Senator any record of the exports for the last three or four months?

Mr. JONES of New Mexico. I have not.

Mr. McLEAN. My information is that we are exporting nothing at this time, but that the market has been entirely absorbed by the German makers of these articles.

Mr. SIMMONS. Mr. President——

The PRESIDING OFFICER (Mr. JONES of Washington in the chair). Does the Senator from New Mexico yield to the Senator from North Carolina?

Mr. JONES of New Mexico. I yield.

Mr. SIMMONS. I have here a statement just prepared by the experts assigned to me by the department giving the do-

mestic production for these various classifications of cutlery, the exports for 1921, the imports for 1921, the percentages of wages to production value, and the equivalent ad valorem of the Senate committee rates of to-day. I would like to put that table in the RECORD, if the Senator will permit me to read it.

Mr. JONES of New Mexico. I would be very glad to have it.

Mr. SIMMONS. Cutlery and edge tools:

Table cutlery: Production in 1919, $4,862,906; exports, 1921, $1,168,575; imports, 1921, $249,183; per cent of wages to production value, 45.5; equivalent rate Senate bill proposes, 132 per cent.

Razors: Production in 1919 amounted to $24,554,337; exports in 1921 were $2,300,870; the imports in 1921 were $488,634; per cent of wage to production value, 16.1; equivalent ad valorem rate proposed by the Senate committee, 175 per cent.

Knives, except table knives—the first figures I gave included table knives; I now give figures for knives except table knives: The production in 1919 was $9,691,928; exports in 1921 were $1,249,538; the imports in 1921 were $919,366; per cent of wage to production value, 46 per cent; equivalent ad valorem rate proposed by Senate committee bill, 166 per cent.

All other cutlery: Domestic production in 1919 was $14,771,658. The exports are not given for that year, but the imports were $989,960; per cent of wage to production value, 36.7; equivalent ad valorem rate proposed by Senate committee bill, 134 per cent.

Edge tools: Domestic production in 1919 was $12,748,741; exports were $3,864,675. The imports are not given in this table. Per cent of wage to production value, 32.3; equivalent ad valorem rate proposed by Senate committee bill, 40 per cent cent.

I merely cite those figures so that they may go into the RECORD. I presume they are accurate, as the table has been prepared since our discussion last night. I will not say that, for it may have been prepared previously; but it has been given me by the expert who has been assigned to me this morning at my request.

Mr. McLEAN. If the Senator will pardon me, what does the table include? To what does it refer?

Mr. SIMMONS. It includes, first, table cutlery, and, secondly, all other cutlery except table cutlery. It includes razors, and it also includes items covered in the basket or catch-all clause, and applies to the paragraph under consideration.

Mr. McLEAN. The pending paragraph does not include razors.

Mr. SIMMONS. The figures with reference to wages, of course, do not apply to the pending paragraph, but the figures as to tableware cutlery do apply to the pending paragraph.

Mr. McLEAN. The inclusion of razors in the table makes considerable difference.

Mr. SIMMONS. The table merely included one item that is not covered by the paragraph.

Mr. JONES of New Mexico. Mr. President, the table relates directly to the paragraph which we are now discussing.

Mr. McLEAN. If it includes razors——

Mr. JONES of New Mexico. It includes a number of other items.

Mr. McLEAN. Of course, the inclusion of razors would raise the average rate very much above the average rate on the articles which are included in this paragraph.

Mr. SIMMONS. Did not the Senator from Connecticut hear me read the table? The figures with reference to table cutlery are segregated in the table absolutely from those relating to razors; and the table does not average all the items but gives the specific rate upon cutlery other than table cutlery and the specific rate upon cutlery included in the remainder of the paragraph, and also the specific rate on razors.

Mr. JONES of New Mexico. It shows the separate items, and I will read the figures regarding table cutlery alone:

The domestic production in 1919 was $4,862,906. The reason that that year is given is that was the year of the census of those industries and the figures represent the latest available data regarding the domestic production. We have also the figures for the five-year period from 1914, but the figures in the table are for 1919, and they show a very large production of table cutlery.

The imports of table cutlery for the whole year of 1921 were only $248,183, while the exports for 1921 were $1,168,575. That shows that we are exporting about five times as much as we are importing.

Mr. McLEAN. That report is undoubtedly correct, but the Senator knows that conditions regarding this industry have changed very materially within the last three or four months. Imports now are increasing rapidly. For instance, in January, 1922, the imports were $6,450; in February, $36,528; in March, $23,468; and in April, $35,852. I am unable to give the figures as to the quantity of imports, but only as to the value. It will be seen that there have been over $102,000 of imports in the last three months, and, as I understand, the imports have been much greater than that in May, although I have not been able to obtain the exact figures.

Mr. JONES of New Mexico. There may be some reason for the increase in imports, but they do not amount to much. The percentage of increase over 1921 is not so very great.

Mr. McLEAN. Mr. President, there is some force in the Senator's statement, but, as he knows the potential competition is there, and offers are being made, and, as a result, I will say to the Senator the American manufacturers of these products are working on short time and thousands of men are out of employment. The manufacturers can not sell their goods. It is because of the potential competition. The Reynolds report showed and recent reports have further demonstrated that unless adequate and reasonable protection is afforded the imports will increase rapidly and in a short time the foreign producers will control the American market.

Mr. JONES of New Mexico. Mr. President, I am not sure that the Senator now recalls the statement made by me last night regarding the conditions in Germany and the movement which is on foot there to prevent any export of these goods at low prices.

Mr. McLEAN. If the Senator will pardon me—and I do not like to interrupt him unless he is willing——

Mr. JONES of New Mexico. I am very glad to have the Senator interrupt me.

Mr. McLEAN. But it seems to me it is a better way to secure an intelligent consideration of the paragraph. There are two rather important items in this paragraph—butcher knives and cleavers. According to the Reynolds report, one invoice of 8-inch cleavers was landed without duty at $12.57 per dozen. I take it that is a pretty fair quality of knife. In April last the same knife was landed at $8.20 per dozen, showing a decrease of more than $4 per dozen in the price of a standard cleaver since August last.

The Reynolds report shows further that the landed cost of a butcher knife 10 inches in length at the time the report was prepared was $4.15 per dozen, while the landed cost in April, 1922, was $2.70 per dozen. These figures have been furnished me by the experts and officials, and I have no doubt they are accurate. They militate, it seems to me, very strongly against the position taken by the Senator from New Mexico that in this particular line of goods prices are increasing in Germany.

As I said yesterday, it seems to me that in Germany the knife industry and the razor and the scissors industry have concentrated their energy toward driving the American out of the market in those goods. Whatever may be conditions with regard to other industries, they are apparently not only equipped to manufacture these goods at a cost which requires very large rates to equalize the difference but they are doing it and will continue to do it.

I have not very much confidence in the statement the Senator read last night in regard to what Germany may or may not do as to increasing prices. We have got to give them credit for being fairly clever and shrewd in anticipating the enactment of a new tariff law here, and it is natural that this sort of propaganda should be sent to this country for its effect, whatever it might be, when a tariff bill is under discussion. I should want it pretty well authenticated.

More than that, Mr. President, as the Senator said the other night, the "proof of the pudding is in the eating." I do not believe that we can afford to base these rates upon any such assumption when the latest figures show that prices there are going down instead of upward at the present time.

Mr. JONES of New Mexico. Mr. President, we of course have no specific knowledge as to when the trades were made which resulted in the importations referred to by the Senator from Connecticut. Of course, I do not question the accuracy of what he has given to us, but I desire to read a letter regarding recent prices. The letter is dated May 29, 1922, and reads as follows:

Referring to the consideration of the tariff bill, H. R. 7456, and the rates suggested by the Senate Finance Committee on cutlery in paragraphs Nos. 354, 355, 357, and 358, we beg to call your attention to the actual conditions prevailing to-day in the cutlery industry in Germany. From reliable information and from the invoices received recently prices for cutlery in Germany have changed materially in the past 30 days, so that pocketknives cost to-day from 10 to 30 per cent more than the prevailing war price, namely, 1914.

Scissors range from 5 to 25 per cent higher than pre-war prices.
Razors range from 10 to 25 per cent higher than pre-war prices.
Table cutlery, butcher knives, and kitchen knives range from 15 to 40 per cent higher than pre-war prices.

I will ask to insert the whole letter in my remarks at this point. It bears upon some other questions.

The PRESIDING OFFICER. Without objection, it will be so ordered.

The matter referred to is as follows:

CUTLERY IMPORTER ASSOCIATION,
New York City, May 29, 1922.

Mr. M. R. NICHOLSON,
Washington, D. C.

DEAR SIR: Referring to the consideration of the tariff bill H. R. 7456 and the rates suggested by the Senate Finance Committee on cutlery in paragraphs Nos. 354, 355, 357, and 358, we beg to call your attention to the actual conditions prevailing to-day in the cutlery industry in Germany. From reliable information and from the invoices received recently prices for cutlery in Germany have changed materially in the past 30 days, so that—

Pocketknives cost to-day from 10 per cent to 30 per cent more than the prevailing pre-war price, namely, 1914.

Scissors range from 5 per cent to 25 per cent higher than pre-war prices.

Razors range from 10 per cent to 25 per cent higher than pre-war prices.

Table cutlery, butcher knives, and kitchen knives range from 15 per cent to 40 per cent higher than the pre-war prices.

Pocketknives: Present duty, respectively, 35 per cent and 55 per cent; under Payne-Aldrich bill the duty averaged 76 per cent; under Senate Finance Committee bill under consideration on goods costing in foreign value less than $3 per dozen, 186 per cent; on all pocketknives, duty averages on foreign value 165 per cent.

Scissors: Present duty, 30 per cent; under Payne-Aldrich bill, average duty, 56 per cent; under Senate Finance Committee bill duty averages in foreign value under $1.75 per dozen, 229 per cent; all scissors, average duty 190 per cent.

Razors: Present duty, 35 per cent and 55 per cent; under Payne-Aldrich bill, average duty 88 per cent; under Senate Finance Committee bill, average duty 258 per cent.

In giving the separate average of pocketknives under $3 per dozen, we take under consideration the fact that the large percentage of imports range under $3 per dozen and on scissors under $1.75 per dozen, so that the higher percentage of duties prevails in most cases.

This is an increase on pocketknives over the Underwood bill of over 130 per cent.

This is an increase on pocketknives over the Payne-Aldrich bill of over 110 per cent.

This is an increase on scissors over the Underwood bill of nearly 200 per cent and an increase on scissors over the Payne-Aldrich bill of nearly 135 per cent.

This is an increase on razors over the Underwood bill of over 200 per cent and is an increase on razors over the Payne-Aldrich bill of over 170 per cent.

For your further consideration, as American manufacturers, being fully conversant with the cost of production in American factories, we can state that actual production prices on cutlery in these factories to-day range about 50 per cent over and above pre-war period, and so as to equalize the duty on imported merchandise as against American merchandise, it would only be necessary to add 25 per cent to the duty in the Underwood bill, or to add 10 per cent to the Payne-Aldrich bill so as to cover any differences in the cost of production in Germany as against the cost of production in the United States.

There is also cutlery produced in Czechoslovakia, and the prices to-day in that country are 50 per cent to 100 per cent higher than they were in 1914, so that the present duty would be ample to protect the American industry on goods emanating from that country.

English cutlery, judging from recent quotations, ranges from 50 to 100 per cent higher than pre-war prices and the actual cost in Sheffield, England, of all cutlery is as high without any duty thereon as similar articles of American manufacture are sold in this country.

The enactment of the Senate Finance Committee's rates on cutlery would be prohibitive on almost all classes of imported merchandise, and we hope that the rates will be lowered so as to allow cutlery to be continued to be imported.

Thanking you for giving this your consideration, we are

Very truly yours,

ADOLPH KASTOR,
Of Adolph Kastor & Bros., New York; President Camillus Cutlery Co., Camillus, N. Y.
EDW. GRAFMUELLER,
Vice President H. Boker & Co. (Inc.), New York; Valley Forge Cutlery Co., Newark, N. J.; H. Boker & Co. of New Jersey (Inc.), Hilton, N. J.
HERMANN KIND,
Graef & Schmidt, New York; Newark Cutlery Manufacturing Co., Newark, N. J.

Mr. McLEAN. Mr. President, who signs the letter?

Mr. JONES of New Mexico. I am glad the Senator mentions that. The letter is signed by three large concerns that manufacture cutlery in this country, and also import cutlery.

Mr. McLEAN. I fancy that the importing end is the larger end.

Mr. JONES of New Mexico. They are Adolph Kastor & Bros., of New York; the Valley Forge Cutlery Co., of Newark, N. J.; H. Boker & Co., of Hilton, N. J., and some other names mentioned here.

Mr. McLEAN. Does the letter state the percentage of merchandise handled by these importers that is imported and the percentage that they manufacture in this country?

Mr. JONES of New Mexico. The letter does not state.

Mr. McLEAN. I think it would be interesting.

Mr. JONES of New Mexico. But I have talked with at least two of these gentlemen, and the situation is this, as I gather it from conversation: They manufacture a considerable variety of these articles. They import other varieties, so as to have a complete list of cutlery for the general trade in the United States. I am told that as to most of these importations there is nothing really manufactured in the United States that is comparable. There is a difference in design, or a difference in grade, or something of that sort, which makes them especially desirable. Moreover, there are certain brands which have been manufactured in England and in Germany which have become popular among certain classes of people who happen to know about them, who have used them, and they adhere to the classes to which they have become accustomed.

Mr. McLEAN. Mr. President——

Mr. JONES of New Mexico. I yield to the Senator.

Mr. McLEAN. That is undoubtedly true. The Senator knows that in the case of those high-class knives made by Henckel and Boker and Kastor in Germany, and the Sheffield knives made in England, no reasonable tariff rates make very much difference with the total importations. In the case of that class of goods the people who are in the habit of using them will buy them, and I think there is every reason why we should exact a pretty fair rate of duty and put it into the Treasury of the United States.

If the Senator will permit me, I will call attention to the averages which have been given to me in a statement which has been prepared which includes 12 different items under this schedule.

Take, for instance, No. 214, a 12-inch knife. The domestic selling price was $14.25. The landed cost of the foreign article was $6.30. In the case of No. 3192, the domestic selling price was $17.62 a dozen and the landed cost of the comparable article was $7.97. In the case of an 8-inch knife, No. 12, the domestic selling price was $29 a dozen; the landed cost of the comparable article was $12.57, and so on. The experts who have made these estimates take 12 articles that are fairly comparable with the imported article, and these 12 would require a tariff rate equal to 128 per cent ad valorem to equalize the difference in the cost of production, and the bill gives them but 77 per cent.

So I want the Senator to realize that the committee did take into consideration the fact that conditions in Germany are somewhat abnormal, and we hope and expect that prices may appreciate somewhat; but with the importations of many of these items that are coming in to-day—perhaps not so particularly with regard to some of these knives as with regard to razors and penknives and shears and other things—the competition to-day is so fierce that we must give rates that are somewhat higher; and it seemed to the committee that if our rate is 77 per cent on the average, and the average rate required to equalize the difference in the cost of production is 128 per cent, we are not giving unreasonable protection to this industry.

Mr. JONES of New Mexico. Mr. President, I want to read what these people say about the rate of protection that is required:

For your further consideration, as American manufacturers, being fully conversant with the cost of production in American factories, we can state that actual production prices on cutlery in these factories to-day range about 50 per cent over and above pre-war period, and so as to equalize the duty on imported merchandise as against American merchandise, it would only be necessary to add 25 per cent to the duty in the Underwood bill, or to add 10 per cent to the Payne-Aldrich bill, so as to cover any differences in the cost of production in Germany as against the cost of production in the United States.

There is also cutlery produced in Czechoslovakia, and the prices to-day in that country are 50 per cent to 100 per cent higher than they were in 1914, so that the present duty would be ample to protect the American industry on goods emanating from that country.

English cutlery, judging from recent quotations, ranges from 50 per cent to 100 per cent higher than pre-war prices, and the actual cost in Sheffield, England, of all cutlery is as high without any duty thereon as similar articles of American manufacture are sold in this country.

The enactment of the Senate Finance Committee's rates on cutlery would be prohibitive on almost all classes of imported merchandise, and we hope that the rates will be lowered so as to allow cutlery to continue to be imported.

These people are importers, but they are manufacturers as well, and that is what they have to say. This is under their own signatures. They all join in that, and it is a letter dated May 29, 1922.

As against that, the Senator puts in evidence here some importations; but these statements relate to present prices, and not to importations back in April, which might have been imported pursuant to a contract made some months previous, when exchange had fallen, or something of that sort. We have not the details regarding it, but here are people who are engaged in the business, and they make these statements; and

notwithstanding what the distinguished Senator from Connecticut has said, I think these people are as worthy of belief as any others who have appeared here regarding this matter.

Mr. McLEAN. Mr. President——

The PRESIDING OFFICER. Does the Senator from New Mexico yield to the Senator from Connecticut?

Mr. JONES of New Mexico. I yield.

Mr. McLEAN. The Senator from New Mexico knows that in fixing these rates the Finance Committee have paid very little attention to what the American manufacturers have said or reported. We have relied upon the customhouse reports, and the prices procured by the 60 men who were appointed for that purpose and paid by the United States. Upon those figures we based our rates. They are much less than the trade requires; and every time that a letter is read here from an American manufacturer, its authority is at once questioned on the other side of the Chamber.

I want to say to the Senator from New Mexico that if the men who wrote this letter had given him the proportion of their interest in imported goods as compared with domestic goods, the letter would have very little effect upon the Senate. I will say further that it is my judgment that the American factories in this country owned by these very men are running on short time to-day, and that their importing business has been exceedingly profitable. I know I had a knife shown me the other day, a Boker knife, a very fine knife, that cost something like $1.75 or $2 in Germany, and was sold in this country for $8.50, and the man who bought it had the receipt. They are making enormous profits on these imported articles. They are buying them so cheaply that the American manufacturer has no customer for his goods. The Senator must remember that the American producer must rely upon these jobbers for a purchaser for his goods; but they buy these foreign goods at such prices and they can sell them at such profits that the American manufacturer has no market at all as long as these enormous importations can be made.

Mr. JONES of New Mexico. Mr. President, the Senator is still relying upon ancient history, and history regarding such an industry as this becomes ancient in a very short time. It is wholly out of date now to talk about conditions as they were last August or last January.

Mr. McLEAN. Mr. President, the Senator began his remarks upon this bill with statistics of 1911, 1912, and 1913, and from those statistics he deduced the fact that protection was not needed at this time. Now, he throws it in my face that I am relying upon ancient history when I am quoting figures given to me from customs officials in April last.

Mr. JONES of New Mexico. I did not mean to offend the Senator at all, or to complain against him.

Mr. McLEAN. Consistency is a rare jewel; but the Senator started his remarks upon this schedule by quoting figures 8 and 9 years old.

Mr. JONES of New Mexico. Mr. President, of course that, as all others at least must have realized, was for the purpose of showing the condition of the cutlery industry in normal times, and when we come to show the conditions in the readjustment period we want to get as nearly up to date as we can. The Senator must realize that these conditions are changing rapidly.

I now produce this letter from these men who are engaged in this industry, and they say that the present prices are from 15 to 40 per cent higher than the prices were in 1914, prior to the war. So, if these statements be true, they demonstrate that the importation incidents referred to by the Senator from Connecticut are now ancient; they relate to a different condition, and what we are trying to do is to bring this as nearly as we can up to date. I refer to that upon the statements of these men, and I am convinced that they would not have deliberately made statements of that sort unless those statements were true, and according to them the prices in Germany, in Czechoslovakia, and in England are higher than they were prior to the war; so that such things could not now occur as the Senator from Connecticut has stated did occur a few months ago.

As I said awhile ago, we have no means of knowing when the trades were made which resulted in those importations, but we have the statement now for the future, which I put into the RECORD last night, that henceforth the prices of products from Germany are to be stabilized, as to certain classes of goods, at the pre-war prices plus 25 per cent; as to others, pre-war prices plus 40 per cent. They are not going to be exported except upon those dollar prices, and the prices now, according to this letter, are above the pre-war prices.

Mr. McLEAN. Any prices that are stabilized by the importer, for the purpose of convincing Congress that protection is not necessary, will be "unstabilized" by the same importer as soon as this bill passes, I say to the Senator. They have absolute control of the market.

Mr. JONES of New Mexico. This simply demonstrates, as I have repeatedly pointed out, the lack of wisdom in trying to deal with that German situation in this fashion. Such duties as this will be absolutely prohibitive, so far as England, France, and Czechoslovakia are concerned. It was admitted last night that that would be the result. Let me call attention again to just what increases are made by the bill.

Mr. McLEAN. Before the Senator goes to that, I would like to call his attention to the fact that no matter what rate we put upon these articles, the German price of the comparable article will be so much lower than the English price that the English article can not be sold anywhere in competition with the German article. If we had absolute free trade, Germany would absolutely control the market in these comparable articles. The Senator must see that.

Mr. JONES of New Mexico. I quite agree that as long as conditions in Germany remain as they have been, that will be the result; but, again I say, the statements of the Senator show that this is an improper way, a disastrous way, to deal with the situation.

Mr. McLEAN. The Senator knows that the bill itself anticipates a change of conditions, by giving the President power under a proclamation, after an examination, to cut the rates 50 per cent. I do not know of any better plan. If the Senator has one to suggest, I would like to hear it.

Mr. JONES of New Mexico. I do not care to take up the time of the Senate now in discussing what other plans might have been suggested. Before the Committee on Finance another plan was suggested, and it is a plan which would work, though it would be a little difficult of application. That plan, which was suggested by Mr. Meyer, would apply particularly to Germany, where we have this difference in exchange. The plan was presented before the committee, and a day or two ago I made another suggestion regarding it. If you want to fix prices and protect the existing American prices, why not do that thing? Why not come out boldly and say that whereas, at the present time, the prices of cutlery in the United States are 50 per cent higher than they were prior to the war, and whereas we want to maintain those prices, and whereas Germany is sending in goods at less than those prices, therefore be it enacted, that there shall be levied a duty upon all importations of these goods equal to the difference in the price of the foreign article and the American article?

I do not say that I would favor a provision of that sort, but I say that if it is your purpose to maintain existing prices in this country and to keep out importations which would tend to reduce those prices, why should you not do something specifically toward that end? Why apply a remedy which will not produce the result? Why not get some other means of meeting the situation?

I admire the talent and ability of the members of the majority of the Finance Committee. I have sat with them day after day. They are men of the highest intelligence; they are men of ability, and it is astonishing to me that such men have not at least undertaken to devise some other plan to meet the abnormal situation in regard to Germany.

Mr. McLEAN. The Senator from New Mexico has evidently given as much thought to this subject as any other member of the Finance Committee, and the only alternative which he suggests he frankly admits he would not vote for himself. I hardly think he ought to accuse the committee of laches in this matter, when the best he can do is to suggest a plan which he would not himself support. We did consider carefully a limitation of the depreciation in currency, but the Senator knows very well why that plan was abandoned. I do not care to go into that. But here we have a plan which is operative, which is in harmony with the policy which has been followed by this country since the first tariff law was enacted, with a feature which permits a decrease in the rates at any time of 50 per cent, and I am sure the Senator will admit that a decrease in the rates of 50 per cent would put them so low that no one could object to them.

Mr. JONES of New Mexico. Mr. President, I do not care to discuss the conferring of power upon the President to enact legislation for the Congress of the United States. The Senator may discuss that theory later, but notwithstanding the Senator's party have a great majority in both Houses of Congress my prediction is that no such provision will ever be enacted into law, or ever be effective as a law of the country. The Senator himself says now that these rates are not sufficient to meet the difference in those prices which he has mentioned, and if those are the prices which prevail he is right about it. But according to the information which I have there is no

such situation existing to-day. The prices have been raised. The prices are now away above the pre-war prices.

The Senator does not tell us how much profit the American manufacturers are making. He does not tell us, and would not attempt to tell us, that the depressed condition of the industry to-day is due to low prices or due in any great extent to this competition. The Senator knows that there is depression all over the country, and for vastly different reasons.

Mr. McLEAN. The estimates I read of the comparative prices of the domestic and foreign articles give to the American and to the foreigner a 20 per cent profit.

Mr. JONES of New Mexico. Of course, the estimates may have been based upon a 20 per cent profit, but there is no pretense that they ever ascertained the cost of production and found what was the profit of the American dealer.

Mr. McLEAN. They spent three months at it, and they were disinterested, capable parties. I assume they were selected with care. They bring forward these estimates, and I submit to the Senator that they are more reliable than a letter written by a German importer, himself a maker of Boker knives, who has a shop in this country and a shop in Germany, and who has every incentive to deceive the Congress.

Mr. JONES of New Mexico. The Senator is talking aside from what I stated. As I understand it, there has been no attempt for three months, or any length of time, to ascertain the cost of production in the United States. The commission, under the direction of Mr. Reynolds, did not attempt any such thing. So the Senator has not any data at all, if I am correctly advised, regarding the cost of production in the United States. There has been no attempt to get it.

Mr. McLEAN. What the American manufacturers have sold in the last year have been sold at a loss, and the estimates were based upon those sales. The foreigner has not sold at a loss, and I think it fair to assume that the estimates made by the experts are more generous to the foreign producer than they are to the American producer.

Mr. JONES of New Mexico. The experts did not make any estimates. They simply allowed to the American dealer the same profit which they allowed to the importer; but there was no attempt by the experts to ascertain the cost of production in this country or the profit which was made by the dealers in this country.

Mr. McLEAN. The statement which I read last night, which represented some 27 of these industries, was based upon a 15 per cent profit. Of course, I referred to American producers. I do not suppose the Senator from New Mexico would feel that their statements with regard to that matter are worthy of credence; I suppose he would feel that they should be disregarded and that the Senate must accept without criticism his statement from a German importer.

Mr. JONES of New Mexico. I would accept any statement made by any of the persons with whom the Senator from Connecticut has been communicating. I do not question their statements at all. What I criticize is, that on analysis the statements do not mean anything. There is nothing in the statement of any witness as to the quantity of his production and his costs. There is nothing as to his overhead. The statement may have been based upon a very small business for the time of which he is speaking. There was no examination. There is nothing upon which any expert would be willing to make a statement as to the actual cost of the product or the profit. The statement has not been analyzed. But here are statements which I have presented which are complete. They cover the whole transaction. Here we have statements as to the actual cost, the prices which they are now charging and receiving.

Mr. President, I wish to make a statement of just what the bill does regarding these different commodities. I have not been able, of course, to figure out the percentage of the duty on the various items. Last night when we closed our work for the day the inquiry had been made as to what the duties amounted to. I should like to have some member of the committee give us a statement regarding the ad valorem rate which will result from the paragraph as now presented by the committee.

Mr. McCUMBER. Mr. President, I shall be glad to give the Senator the information. We will have to divide the paragraph into the several classes and show just what the equivalent ad valorem would be upon the different classes.

The first class carries a duty of 20 cents each and 45 per cent ad valorem. That consists of cutlery with handles of mother-of-pearl. I will take the foreign importation value of $7.50 per dozen. That would give a specific rate of $2.40 a dozen and an ad valorem rate of $3.37, making a total of $5.77, and that upon the basis of the foreign valuation of $7.50 would give 77 per cent ad valorem.

Next are those with ivory handles. The greatest quantity of those come in at $5 a dozen. The specific duty, therefore, would be $2.40 and the ad valorem rate would be $2.25, making a total of $4.65, which would be equivalent to 93 per cent ad valorem.

Next are those of animal horn. The average is $5 per dozen. The specific rate is $2.40 and the ad valorem duty $2.25, making a total of $4.65, which would again give us 93 per cent ad valorem.

Next are those of hard-rubber handles, which come in at an average of $3.50. The specific duty would be $1.20, the ad valorem $1.35, the total $2.55, which would give us an equivalent ad valorem of 85 per cent.

Bone handles averaged $2 a dozen import price; specific $1.20 and ad valorem 90 cents, making an equivalent ad valorem of 105 per cent, the highest of any.

Celluloid handles come in at $3.75 a dozen. The specific duty is $1.20, the ad valorem duty $1.69, and the equivalent ad valorem duty of the compound is 77 per cent.

Casein, without going into the several items, come in at $3 a a dozen and at an equivalent ad valorem of 85 per cent.

Wood handles, which bring in the cheaper classes, bear a rate of 2 cents and 45 per cent ad valorem. They come in at 50 cents a dozen. The specific rate would be 24 cents a dozen, the ad valorem rate 22 cents, bringing the rate up to 46 cents a dozen, which would be equivalent to 92 per cent ad valorem.

Wood handles with blades 4 inches and more in length bear 10 cents specific duty and 45 per cent ad valorem. They come in at $3.30 a dozen, $1.20 specific, $1.48 ad valorem, making a total of $2.68, which would give 80 per cent ad valorem.

We have reduced these down also to three classes which cover the entire list in the paragraph. First we have those of the animal-horn handles. They take 20 cents each and 45 per cent ad valorem. The foreign import value averages $2.63 a dozen, landing charges 72 cents, specific duty 60 cents, ad valorem $1.18, landed cost $5.13 plus a 20 per cent profit, which we have allowed in all these cases, $1.03, which would bring the total up to $6.16. The American selling price of the same article is $6.78. So giving that duty lacks considerable of equalizing the difference.

Now we will take the cheap set; that is, the ordinary cheap kitchen knife with a wooden handle and a blade under 4 inches in length.

Mr. POMERENE. Mr. President, before the Senator goes to that branch of his subject, will he state what would be the ad valorem duty, if the specific and ad valorem duties were reduced to an ad valorem basis?

Mr. McCUMBER. One hundred and thirty-six per cent on the whole class.

Now I will take the wood-handle knife with blades under 4 inches in length. They come in at 2 cents each under the bill, with 45 per cent ad valorem. The foreign value is 72 cents a dozen, landing charges 7 cents, specific duty 24 cents, ad valorem duty 32 cents, the landed cost $1.35 plus 27 cents per dozen profit, which would give $1.62. The American selling price is $1.32, so that would bring it a little above the average of that class. The ad valorem duty is 77 per cent on the average of that class.

Wood handles, with blades over 10 inches in length, and that takes in the more valuable knives, carry 10 cents each and 45 per cent. It will be seen that it does not cover the same class at all, because while one comes in at 72 cents a dozen, the third comes in at $5.27 a dozen. The landing cost is 57 cents, the specific duty, at 10 cents apiece, $1.20, the ad valorem $2.25, which would bring the landed cost up to $9.39 a dozen. Then allowing the importer $1.88 profit would bring his total selling price to $11.27 a dozen, while the selling price of the comparable domestic article is $11.75 a dozen.

I think that covers very fully the question asked by the Senator both as to the ad valorem upon the particular items and also the ad valorem, costs, etc., upon the same items taking in the three particular classes.

Mr. SMOOT. Did the Senator give the equivalent ad valorem of the last item?

Mr. McCUMBER. I do not know that I did, but it is 67 per cent ad valorem.

Mr. JONES of New Mexico. Mr. President, it is very clear from that statement that the rates have now been based upon the selling price in the United States. They have tried to put a duty there for the purpose of maintaining the present selling prices in the United States, but without any examination as to whether the present selling prices are high or low. The general

opinion prevails about the country that the prices are too high. The selling prices of cutlery in the United States to-day are too high. But now admittedly here is an attempt to maintain the existing prices as to these articles. We are not being swamped by any large amount of imports.

Mr. McCUMBER. Mr. President, will the Senator yield to me?

Mr. JONES of New Mexico. Certainly.

Mr. McCUMBER. The Senator says the rates are too high. Too high for what purpose? I do not understand what the Senator means by the mere bald statement that they are too high. Does he mean that they are sufficiently high to maintain the present high cost, and that that is too high?

Mr. JONES of New Mexico. I said that was the opinion generally prevailing. I did not make any statement of facts because none of us know the facts.

Mr. McCUMBER. Here is one thing we do know—that while we have taken the Reynolds report for the figures, as a matter of fact cutlery is coming in now. The foreign value, if we would take it of to-day, would be vastly below the amount I have stated, and would require an ad valorem and specific rate combined that would be very much higher than we have given in the bill.

Mr. JONES of New Mexico. Again the Senator, I am afraid, has not been weighing his words. I produced evidence here awhile ago—I think the Senator was in the Chamber at the time—which was to the effect and made in positive form that the foreign prices are not going lower, but that they are going higher notwithstanding the statements made regarding the so-called Reynolds report; and I put into the RECORD the deliberate statement of people that the foreign prices, measured in gold, are higher and that they are going to be kept higher than they were prior to the war.

As to the Senator's statement that a large quantity of these articles is coming in, the term must have been used in a very broad relative sense, because here is what we have now from the last monthly summary of commerce of the United States, including March of 1922, under the head of cutlery. The statement is divided into four parts—pen or pocket knives, razors and parts of, scissors, shears, and all others. Table cutlery will, of course, fall into the "all others" bracket. Here is what we find now about the "all others." In March, 1921, the imports of "all others" was only $39,884; in March, 1922, there was a slight increase to $46,398; but taking the imports for the nine months ending in March, 1921, and the nine months ending in March, 1922, it will be found that there was a slight decrease in the latter period, and that the amount of the imports was small. When it is said that the production here is in millions and that we are exporting articles falling within this very bracket in large quantities, it seems to me that there is undue fear and that there is not substantial reason for such enormous increases in duties as are here proposed.

Mr. President, table cutlery is surrounded by different circumstances, and the United States has a better chance to compete with the remainder of the world in that article than in pocketknives and razors. Inasmuch as we are exporting much table cutlery in competition with the world, and inasmuch as there is little comparability between what is imported and what is produced at home, it seems to me that we ought not to lose our heads and go wild in building up these duties in this way. Such action does not appeal to one's reason. So, Mr. President, I am going to move to strike out all of these specific rates and merely retain an ad valorem rate. That is the situation under existing law. The specific rates are so much apiece for common steel knives and forks, which has a tendency to mislead the public as to what they are. Therefore, after the words "specially provided for" in the amendment proposed this morning by the committee, I move to strike out the words which follow, down to the numeral "45."

The PRESIDING OFFICER (Mr. LENROOT in the chair). The Senator from New Mexico offers an amendment to the committee amendment which will be stated.

The READING CLERK. In paragraph 355, as proposed to be amended by the committee, after the words "specially provided for" it is proposed to strike out the words "with handles of mother-of-pearl, shell, ivory, deer, or other animal horn, silver, or other metal than aluminum, nickel silver, iron, or steel, 20 cents each; with handles of hard rubber, solid bone, celluloid, or any pyroxylin, casein, or similar material, 10 cents each; with handles of any other material, if less than 4 inches in length, exclusive of handle, 2 cents each; if 4 inches in length or over, exclusive of handle, 10 cents each; and in addition thereto, on all of the foregoing."

Mr. JONES of New Mexico. I should like to have the Secretary read the paragraph as it would stand as proposed to be amended.

The PRESIDING OFFICER. The Secretary will read the paragraph as proposed to be amended.

The reading clerk read as follows:

PAR. 355. Table, butchers', carving, cooks', hunting, kitchen, bread, cake, pie, slicing, cigar, butter, vegetable, fruit, cheese, canning, fish, carpenters' bench, curriers', drawing, farriers', fleshing, hay, sugar-beet, beet-topping, tanners', plumbers', painters', palette, artists', shoe, and similar knives, forks, and steels, and cleavers, all the foregoing, finished or unfinished, not specially provided for, 45 per cent ad valorem.

The PRESIDING OFFICER. The question is on the amendment of the Senator from New Mexico to the committee amendment.

Mr. UNDERWOOD. Mr. President, I think the modified paragraph as presented by the committee this morning in place of the original paragraph 355 is an improvement both as to language and as to the proposed rate of taxation. The language is more clear and the ad valorem rate is reduced from 55 per cent to 45 per cent, which is somewhat of a help.

Mr. President, this morning a Senator on this floor in discussing some items of the agricultural schedule stated that one reason why the farmers of his State were entitled to protection was that they raised their crops on high-priced land. It was rather startling to hear the statement made that protection in the future on agricultural products must be based, in part at least, upon the value of the land on which the crop is raised, and, accordingly, that the higher speculators, I might say, in one section of the country boom the price of land the more protection must be accorded against competition in food products. That is a new statement of protection so far as agricultural products are concerned, but in a way it is not a new idea in the writing of tariff bills. It has never been so broadly stated by those who advocate the protective theory in reference to manufactured products, but the manufacturer in estimating his cost takes into consideration his capitalization, especially the interest on any bonded indebtedness which he may have, and the greater the amount of his capitalization or his indebtedness in the way of bonds the greater he figures his cost, and the higher the rate must be to afford protection. Of course if the figures are based on actual costs, if there were no watered stock or no simulated capital in the mills and factories of America, there might be some justification for considering the cost equation; but everybody knows that the great industries of this country have grown and developed and made large profits and then sold their plants to others or recapitalized on the basis of the earning capacity of their good years, and then cried for artificial means to enable them to make profits sufficient to pay interest rates on watered or increased capital stock.

I think to some extent that applies to this industry. According to the statement of the chairman of the committee this morning, the rates of taxation on the knives involved in this paragraph run, if I understood him right, from something like 67 per cent as the minimum to 136 per cent as the maximum—67 per cent tax levied on the right of the American people to buy necessities of life, because the 67 per cent tax was levied on common knives, kitchen knives, and the tax was pyramided when it went to table knives, and so on up and down the scale.

A tax of 67 per cent is some tax. Of course, when that gets to the hands of the retailer it is largely increased. We are talking about taxes at the customhouse; but when the retailer buys from the wholesaler, and the wholesaler from the manufacturer, each one of them pyramids every item of cost, and in that item of cost comes the tax to be levied on the American people. So, while I do not pretend to be able to say with accuracy how much the tax is increased in the hands of the retailer, I do not think I would be far afield from a conservative statement to say that the 67 per cent that this committee proposes to levy on the kitchen knife will ultimately reach at least 100 per cent when the consumer, the purchaser in the retail store, pays the tax. Therefore, as I said awhile ago, this is quite a heavy charge on the consuming public.

Of course, this is an item where I recognize that a fair revenue duty could be levied. In many of its features it is a competitive article. There is an inflow of knives from abroad. I am rather inclined to believe that the tax on the low grades of knives will be a prohibitive tax; but if it is a prohibitive tax it cuts out the competition so that the domestic manufacturer can lay it, and even if it does not cut out the competition from abroad it is put here to enable the domestic manufacturer to lift his price to that extent, and I assume that it means that he is going to lift it to the extent of the difference between the existing tariff law and the increased rates, beyond any doubt, or the committee would be doing a foolish thing—putting a tax on the American people and benefiting no one by it.

So we can assume that the tax on this article is going to be paid by the American people. I do not think there is anything shown here to indicate that the competitive conditions between this country and abroad justify a tax of 67 per cent on the

commonest kind of knife that is imported, and one hundred thirty and odd per cent on higher grades of knives. I do not think it is necessary in the interest of American industry on a fair cost of production, and I do not include in that fair cost of production a charge on capitalization of watered stock.

I do not think this tax is at all necessary. I think it is one of those things that are going into the homes of America to make it that much more difficult for American citizens to live. We complain against the pyramiding cost of living; we cry out against the cost of living whenever the consumer knocks at the door of Congress; but when we have in our hands the one opportunity to be reasonable in the matter of advancing the cost of living on the consumers in the homes of America we take advantage of the occasion to put the taxes higher than they have ever been pyramided to before.

Mr. McCUMBER. Mr. President, I shall confine my remarks to just one phase of this case.

The Senator from New Mexico [Mr. JONES] reiterated over and over again that the cost of the article from the competitive country would without question advance very much beyond that of the article mentioned in the Reynolds report. I stated to him in reply that in many instances the cost of the articles contained in the Reynolds report, which dates back to August 1, 1921, has been enormously reduced on the importing basis; and I want to give a few of these figures and put them into the RECORD to show that I am borne out in that statement.

The Reynolds report, for instance, dealing with cleavers, gives a cost without duty of $12.57 per dozen. That was last August. The landed cost without duty to-day is reduced to $8.20, as against $12.57. That does not look very much as though the cost of the foreign country was going up, but rather intimates that it is going down, and that the importer intends to get that market if he can.

Take butcher knives: The landed cost in the Reynolds report—and that is what we made our rate of duty on—without duty was $4.15 a dozen. The landed cost of the same article in April, 1922, without duty was $2.76 a dozen, a little more than one-half.

Taking pocketknives, the landed cost of a certain class, without duty, in the Reynolds report wass $5.75 a dozen. The landed price in April, 1922, of the same knife was $2.55 a dozen, a decrease of more than 50 per cent. In the case of the pocketknife which is numbered here 307 the landed cost without duty under the Reynolds report was $5.52 a dozen. The same knife was imported in April, 1922, for $2.02 a dozen, without duty.

Take razors: Here is No. 101. The landed price without duty last August was $7.51 a dozen. The landed price of the same razor without duty in April, 1922, was $3.15 a dozen, less than one-half.

Take another class of razors. The landed price without duty last August was $4.74 a dozen. The landed cost of the identical razor in April, 1922, was $3.08 a dozen, without duty.

Let us take scissors. The Reynolds report in August, 1921, showed a landed cost of a certain class of scissors at $5.96 a dozen. In April, 1922, the landed cost of the same article was $3.41. Another class of scissors was landed last August at 68 cents a dozen. The same class of scissors was landed in April, 1922, at 32 cents a dozen, or less than one-half.

So, Mr. President, I could go on enumerating a large number of these. All of this has been taken into consideration by the Finance Committee. We are not making our rates entirely on the basis of the Reynolds report. On the contrary, we are giving a duty that is far less, and under present importation prices these duties are not anywhere near sufficient to cover the difference in the selling price of the commodity imported and the like commodity manufactured in the United States.

The PRESIDING OFFICER. The question is on the amendment offered by the Senator from New Mexico [Mr. JONES] to the amendment of the committee.

Mr. UNDERWOOD. Mr. President, there are less than 10 Members of the Senate present.

Mr. McCUMBER. Can we not have a vote?

Mr. UNDERWOOD. I ask for the yeas and nays on the amendment, then.

The yeas and nays were ordered, and the reading clerk proceeded to call the roll.

Mr. HALE (when his name was called). Making the same announcement as before, I vote "nay."

Mr. JONES of New Mexico (when his name was called). I transfer my general pair with the senior Senator from Maine [Mr. FERNALD] to the senior Senator from Missouri [Mr. REED], and vote "yea." I ask that this announcement may stand for the day.

Mr. McKINLEY (when his name was called). I transfer my pair with the junior Senator from Arkansas [Mr. CARAWAY] to the junior Senator from Oklahoma [Mr. HARRELD], and vote "nay."

Mr. UNDERWOOD (when his name was called). I transfer my general pair with the senior Senator from Massachusetts [Mr. LODGE] to the senior Senator from Nebraska [Mr. HITCHCOCK], and vote "yea."

Mr. WALSH of Montana (when his name was called). I transfer my general pair with the senior Senator from New Jersey [Mr. FRELINGHUYSEN] to the junior Senator from Rhode Island [Mr. GERRY], and vote "yea."

Mr. WATSON of Indiana (when his name was called). I transfer my general pair with the senior Senator from Mississippi [Mr. WILLIAMS] to the junior Senator from Pennsylvania [Mr. PEPPER], and vote "nay."

The roll call was concluded.

Mr. CURTIS. I desire to announce the following pairs:

The Senator from Rhode Island [Mr. COLT] with the Senator from Florida [Mr. TRAMMELL];

The junior Senator from Kentucky [Mr. ERNST] with the senior Senator from Kentucky [Mr. STANLEY];

The Senator from South Dakota [Mr. STERLING] with the Senator from South Carolina [Mr. SMITH];

The Senator from New Jersey [Mr. EDGE] with the Senator from Oklahoma [Mr. OWEN];

The Senator from Indiana [Mr. NEW] with the Senator from Tennessee [Mr. MCKELLAR]; and

The Senator from West Virginia [Mr. ELKINS] with the Senator from Mississippi [Mr. HARRISON].

Mr. BALL. I transfer my pair with the senior Senator from Florida [Mr. FLETCHER] to the junior Senator from Delaware [Mr. DU PONT], and vote "nay."

The result was announced—yeas 22, nays 37, as follows:

YEAS—22.

Ashurst	Jones, N. Mex.	Overman	Underwood
Culberson	Kendrick	Pomerene	Walsh, Mass.
Dial	King	Robinson	Walsh, Mont.
Glass	La Follette	Sheppard	Watson, Ga.
Harris	Myers	Simmons	
Heflin	Norris	Swanson	

NAYS—37.

Ball	Gooding	McLean	Spencer
Borah	Hale	McNary	Sutherland
Brandegee	Johnson	Nelson	Townsend
Calder	Jones, Wash.	Newberry	Wadsworth
Cameron	Kellogg	Oddie	Warren
Capper	Keys	Page	Watson, Ind.
Curtis	Lenroot	Phipps	Willis
Dillingham	McCormick	Poindexter	
Fernald	McCumber	Rawson	
France	McKinley	Smoot	

NOT VOTING—37.

Broussard	Fletcher	New	Smith
Bursum	Frelinghuysen	Nicholson	Stanfield
Caraway	Gerry	Norbeck	Stanley
Colt	Harreld	Owen	Sterling
Crow	Harrison	Pepper	Trammell
Cummins	Hitchcock	Pittman	Weller
du Pont	Ladd	Ransdell	Williams
Edge	Lodge	Reed	
Elkins	McKellar	Shields	
Ernst	Moses	Shortridge	

So the amendment of Mr. JONES of New Mexico to the committee amendment was rejected.

Mr. JONES of New Mexico. I move to amend the committee amendment in another particular. I move to change the second phrase in that paragraph so that it will read:

Any of the foregoing without handles, 35 per cent ad valorem.

The amendment to the amendment was rejected.

The amendment as amended was agreed to.

The next amendment was, on page 74, line 16, before the words "per centum," to strike out "35" and insert "45," so as to make the paragraph read:

PAR. 356. Planing-machine knives, tannery and leather knives, tobacco knives, paper and pulp mill knives, roll bars, bedplates, and all other stock-treating parts for pulp and paper machinery, shear blades, circular cloth cutters, circular cork cutters, circular cigarette cutters, meat-slicing cutters, and all other cutting knives and blades used in power or hand machines, 45 per cent ad valorem.

Mr. McCUMBER. I move to amend the committee amendment by striking out "45," on line 16, and inserting in lieu thereof "20."

Mr. JONES of New Mexico. Mr. President, I want to say a word of approval and appreciation of what the committee now proposes to do in regard to this paragraph, to reduce those duties from 45 per cent to 20 per cent. This is an entirely new paragraph, however. The articles mentioned here have never been specifically placed upon the dutiable list, and I would like

to inquire of the Senator from North Dakota what the present rate of duty is on the articles included within the paragraph?

Mr. McCUMBER. The Senator means under the present law?

Mr. JONES of New Mexico. Under the present law.

Mr. McCUMBER. Under the present law the duty is 20 per cent ad valorem under a general basket clause.

Mr. UNDERWOOD. Mr. President, I join the Senator from New Mexico in congratulating the committee in reducing this rate to a reasonable point. I commend them, both for their courage in taking back what they have done and in the fact that it indicates the committee is now giving consideration to the bill.

As the bill was passed by the House this paragraph on planing knives, tannery knives, and knives of that kind, a very common stock of knives, carried a duty of 35 per cent. The Finance Committee raised it to 45 per cent. After further consideration they have proposed to reduce it to 20 per cent.

I do not say this in adverse criticism of the committee for changing its mind; I think it is only a fool who will not change his mind; but some criticism has been made as to the length of the debate on this bill, the length of its consideration, the talk which has been indulged in. As I said in the beginning, I have always been ready to cooperate with the Senator in charge of the bill to eliminate as far as possible and practicable all unnecessary debate, and especially debate that is not germane to the bill before us; but I think the action of the committee in changing materially the paragraph which has just been passed, and making a most radical change in the one we are now considering, shows the necessity and the advantage of fair and free debate on the items of the bill.

Mr. McCUMBER. Mr. President, I suppose I could also congratulate the framers of the Underwood tariff law, because they levied an ad valorem duty of 20 per cent on the importation of an article which does not come into the country at all, and, so far as a close investigation shows, never has come in. It was put under a general basket clause, and on more careful consideration of the matter we decided that at least we could not be criticized if we made the same mistake the Democratic leader made in formulating his bill, and that at least they would let us pass it without making any long debate. So far we have had just about as much criticism when our rates were approximately those of the Underwood tariff law as we have had when we proposed higher duties. It did not seem to have any effect, so far as the debate was concerned.

Mr. UNDERWOOD. I will say to the Senator I am glad we can agree on this rate. Of course, a great many items in the present law fall in basket clauses, and are taxed there, as a great many items in this bill will fall in basket clauses and be taxed; but I say to the Senator that the man who thinks he can write a tariff bill without making mistakes had better not start to write one, because that kind of a man is such an ass that he could not recognize himself in his own mirror. Of course, there were mistakes made in writing the present law and we included rates which did not reflect what the committee thought they would reflect when they went into operation, but from my point of view the greater number of mistakes made in writing the present law were made in putting the rates too high instead of putting them too low. Of course, the Senator will not agree with me in that point of view, because he believes in excessively high rates. I believe in rates that will always produce some reasonable and fair competition through the customhouse, and that the rates ought to be reduced to that point.

I am free to say that in a number of instances, especially in the iron and steel schedule, where we cut the Payne-Aldrich rates in two, we did not produce competition, and therefore I should say we made mistakes in not cutting them enough. I am perfectly willing to accept the criticism, and I merely say that you can not frame a tariff bill without making mistakes. Therefore it is all the more important that all the light which can be fairly and justly and reasonably thrown on these schedules should be put upon them before it is enacted into law.

Mr. McCUMBER. In reply to that, I will say that I am not criticizing the Underwood tariff law at all. It was based upon the theory that it was to raise revenue only, and the framers of that law had no intention of giving protection. It was quite simple and easy to say that a great many articles should go in under the basket clause at a certain ad valorem rate. Therefore they could make but few mistakes from their standpoint. It is a very much more difficult process to hunt out each item in a basket clause and determine what would be a protective duty. That we have tried to do as nearly as we could. We have found in many instances that we have relied somewhat upon the findings of the House without as close an investigation as we should have made into some of their rates, where there was no contest before the committee, and we are trying to correct any possible errors as we go along.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from North Dakota [Mr. McCUMBER] to the committee amendment.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The PRESIDING OFFICER. The Secretary will state the next amendment.

The ASSISTANT SECRETARY. In paragraph 357, page 74, line 18, the committee proposes to strike out "30" and insert "55," so as to read:

Steel-laid scissors and shears, and blades for the same, finished or unfinished, 10 cents each and 55 per cent ad valorem.

Mr. McCUMBER. Mr. President, the committee has some amendments which it desires to offer. The first is on page 74, to strike out all of the matter beginning with the word "Steel" in line 17 down to and including the word "shears" in line 20 and to insert in lieu thereof:

Nail, barbers', and animal clippers, pruning and sheep shears, and all scissors and other shears.

That will be the first amendment to the committee amendment, and then there will be an amendment changing the rate.

Mr. JONES of New Mexico. May I inquire the purpose of the amendment?

Mr. McCUMBER. It is to get rid of the first portion of the paragraph, "Steel-laid scissors and shears, and blades for the same, finished or unfinished, 10 cents each," and, as we have proposed to amend it, "45 per cent ad valorem," and let it come under the same general duty as other scissors and shears. It is simply to cover a difference in the method of manufacture.

Mr. JONES of New Mexico. Does it accomplish any change in the rate of duty?

Mr. McCUMBER. Then I shall move to change 60 per cent in line 23 to 45 per cent ad valorem, but that will be a separate amendment.

The PRESIDING OFFICER. The Chair desires to call the attention of the Senator from North Dakota to the fact that the word "shears" occurs twice in line 20. To which word does he refer in limiting his amendment?

Mr. McCUMBER. The amendment proposes to strike out down to the last word at the end of line 20.

The PRESIDING OFFICER. The question is on the amendment offered by the Senator from North Dakota to the amendment of the committee.

Mr. JONES of New Mexico. May we have the amendment to the amendment read?

The ASSISTANT SECRETARY. On page 74, line 17, after the paragraph number, 357, strike out:

Steel-laid scissors and shears, and blades for the same, finished or unfinished, 10 cents each and 55 per cent ad valorem; nail, barbers', and animal clippers, pruning and sheep shears, and all other scissors and shears.

And insert:

Nail, barbers', and animal clippers, pruning and sheep shears, and all other scissors and other shears.

Mr. JONES of New Mexico. Am I to understand that the amendment eliminates the specific duty mentioned there?

Mr. McCUMBER. It does.

Mr. JONES of New Mexico. So that these articles, according to the amendment, will bear a duty of 50 per cent.

Mr. McCUMBER. They will bear a duty of 45 per cent.

Mr. JONES of New Mexico. The Senator proposes to strike out "50" and insert "45."

Mr. McCUMBER. Valued at 50 cents per dozen and more they will carry a duty of 4 cents each and 45 per cent ad valorem. I propose to change the 60 per cent in line 23, but that will be a subsequent amendment. I first desire to get the phraseology right. I call the attention of the Senator from New Mexico to the fact that I have not as yet reached the rate, which I shall move separately to reduce.

Mr. JONES of New Mexico. Will the Senator indicate the rate?

Mr. McCUMBER. I have just stated it. It is, in line 23, to strike out "60" and insert in lieu thereof "45"; but that, I say, will be a subsequent amendment. I want to get the phraseology right first.

Mr. JONES of New Mexico. Then, on page 75, will the rate remain the same as printed?

Mr. McCUMBER. No; we will change the 50 per cent in line 7, on page 75, when we get to it, by an amendment reducing it to 45.

Mr. JONES of New Mexico. Mr. President, it seems to me that there should be a division of this paragraph. The industry, as it relates to scissors and shears, is entirely different—at least it was so prior to the war—and there should be some difference or distinction. In this country before the war we did not manufacture any scissors except very cheap cast scissors, I understand. All the good scissors came in from Germany or England. Shears were not only manufactured in this country, but we exported shears to all parts of the world. The United States was able to compete with the world in the manufacture and sale of shears, whereas scissors were not manufactured in this country to any great extent. Now it is proposed to put into the paragraph scissors and shears and impose upon them both the same rate of duty. It strikes me that that is very loose legislation.

Mr. McCUMBER. Will the Senator tell me how he differentiates between shears and scissors?

Mr. JONES of New Mexico. The trade certainly differentiates between the two.

Mr. McCUMBER. But does the Senator understand the basis of the differentiation?

Mr. JONES of New Mexico. Yes.

Mr. McCUMBER. How would the Senator make a duty if we call anything below 7 inches scissors, as they are called in the trade, and if it is above 7 inches in length it is shears. By one one-hundredth of an inch difference it could be converted from shears into scissors or from scissors into shears to meet a trade designation. It does seem to me that inasmuch as the cost of production, and so forth, would be substantially the same in the one case as in the other the duties ought to be the same.

Mr. JONES of New Mexico. No; there is a vast difference in the production. They are made entirely in a different way. The scissors are made of forged steel. The shears have a body of one kind of material and have a plate sheet used for the cutting part of the instrument. They are not only known in the trade by different names, but there is an entirely different method of manufacture.

With regard to shears it seems to me there is no necessity for any duty. At any rate there is no excuse for increasing the present duty. Here is what the Tariff Commission has to say about it:

> The American shears are sent to all countries of the world.

There are no separate statistics regarding scissors and shears. We do not know just what the domestic production is of each, nor do we know the imports or exports of each, but we do have a general history of the industry. Here is what is said about domestic production and consumption:

> Shears and scissors are not specified in the export statistics. A large number of the former are exported and American manufacturers supply the home market. Scissors, on the other hand, have been produced only to a slight extent in the United States, and the market is supplied by importation.

That is the official statement regarding the industry. As to shears, we supply the whole market. There are no importations of shears. Not only do we supply the home demand, but we export shears to every country in the world. That is the statement. Here is proposed a very material increase in the duty on shears.

So far as scissors are concerned the condition has changed somewhat by reason of the war. During the war some concerns in the United States began the manufacture of scissors. They are producing good scissors, and I am advised that they hope to continue the industry, but they do not need the amount of duty specified in the bill, according to their own statements.

The bill prior to its modification imposed a very high duty on scissors and shears, and I am not surprised that the committee is modifying the rate to some extent. I call attention to the fact, however, that the reduction is not in a very large amount.

Here is the tariff history regarding the duties in the paragraph as it was written before the committee proposed this change. The present duty on the items in the paragraph—that is, the items which were dutiable under existing law—was only 30 per cent. Under the Payne-Aldrich law the average duty was 56 per cent. Under the bill as first reported by the committee, on scissors and shears valued under $1.75 per dozen, the rate was increased to 229 per cent and on all scissors the average duty under the paragraph as proposed by the committee in the first instance was 190 per cent.

The committee now modifies its proposal and makes some reduction in the ad valorem rate, reducing it from 60 per cent to 45 per cent; but on cheap scissors and shears, valued at not more than 50 cents per dozen, it retains a specific rate of 4 cents each. That would be 48 cents per dozen, which itself would be equivalent to about 100 per cent on the highest valuation. If the articles were 24 cents a dozen, it would be 200 per cent; at 48 cents a dozen 4 cents each would amount to 100 per cent; but then there is proposed a 45 per cent ad valorem duty in addition. So it seems to me that these rates are excessively high even as the paragraph has now been amended by the committee.

The prices of these scissors have been increased at a very rapid rate. A good pair of scissors was sold before the war for 6 marks and 65 pfennigs. On January that price advanced to 279 marks and 3 pfennigs, and on March 15 it had advanced still further—418 marks and 95 pfennigs. On May 15 there was a still further advance of 25 per cent, showing a very rapid rise in the price of foreign scissors.

Mr. McLEAN. From what report is the Senator from New Mexico reading?

Mr. JONES of New Mexico. From the H. Boker Co.

Mr. McLEAN. That is the same importing firm that gave the Senator the information with regard to knives?

Mr. JONES of New Mexico. It is one of them.

Mr. McLEAN. The actual customs receipts, I will say to the Senator, show a marked decrease in the price of scissors since August 1, 1921. According to the Reynolds report, for scissors 7 inches the landed cost in August, 1921, was $5.96 a dozen, while in April, 1922, the price of the same scissors landed in the United States was $3.41 a dozen. Scissors No. 9300, 5-inch, on August 1, 1921, were landed at a cost of 68 cents per dozen, while on April 1, 1921, the landed cost of the same scissors was 32 cents per dozen.

Mr. JONES of New Mexico. Mr. President, I do not care to repeat the arguments which I have already made on this same subject. It is apparent that the same condition exists in regard to scissors as exists with regard to table cutlery, and so on. Everything that I have said in the discussion of the paragraph covering table cutlery applies here. Certainly what was said with respect to production in Germany and prices in Germany applies. I dissent absolutely from the impression which is sought to be created here that the prices of cutlery coming from Germany are decreasing. The Senator from Connecticut may present figures as to imports and discuss them as much as he pleases, but I have it from direct sources that the prices are increasing and that they are fixed beyond the pre-war prices.

Mr. McLEAN. Let me call the attention of the Senator to the imports of scissors for the four months of January, February, March, and April, 1922. I now read from customs reports. These are not estimates given by importers. In January there were imported 54,000 dozen of them, in round numbers, at a price of $50,000, a little less than $1 a dozen; in February, 1922, we imported 62,000 dozen, in round numbers, of a value of $64,000. That was a slight increase. In March, 1922, we imported 60,000 dozen, in round numbers, at a price of $55,000. In that instance there was quite a decrease in the price. In April, 1922, we imported 59,115 dozen, at a price of $60,813. That shows a very slight increase.

The Senator from New Mexico will observe as to all these importations that the price has varied very little until we come to the later reports, which indicate that in certain lines there has been a marked decrease and no increase of any consequence. The importers who have advised the Senator may give him more accurate information than we get from the invoices that are furnished by the customs officials, but I think he is mistaken.

Mr. JONES of New Mexico. Mr. President, here is a statement that was handed to me, and it gives the number of the scissors. This is the article [exhibiting] that I am talking about, and that article prior to the war cost in Germany 6 marks and 65 pfennigs; on January 1 it advanced in price, as measured in marks, 4,100 per cent, or to 279 marks and 30 pfennigs; on March 15 it advanced 6,200 per cent in marks, to 418 marks 95 pfennigs, and on May 15 there was another advance of 25 per cent.

Mr. McLEAN. Is the Senator giving the cost price?

Mr. JONES of New Mexico. I am giving the cost price in Germany, stated in marks.

Mr. McLEAN. Is it the cost price or the wholesaler's selling price?

Mr. JONES of New Mexico. It is the cost price. I will show just what the landed cost price is. On January 1 the purchase price was 429 marks 30 pfennigs, and with the mark at 0.36 of a cent, which is about one-third of a cent, the foreign cost would be $1.01; the duty was 30 per cent under existing law and the expense of landing was 5 per cent, and the landed cost $1.36. Figured in precisely the same way on March 15 the landed cost, under the existing duty, increased from $1.36 to $2.03, and with the advance on May 15 of 25 per cent the cost would be $2.67.

Mr. McLEAN. Is the Senator giving us figures based on actual importations?

Mr. JONES of New Mexico. I am giving prices which are furnished by this concern.

Mr. McLEAN. Oh, yes.

Mr. JONES of New Mexico. The prices in Germany.

Mr. McLEAN. We do not know whether it includes profit or not.

Mr. JONES of New Mexico. There is nothing added for handling cost at all. The figures merely show the landed cost.

Mr. McLEAN. Of this firm?

Mr. JONES of New Mexico. Of this firm.

Mr. McLEAN. So we do not know whether it is the actual cost of the articles or whether there is a profit or not.

Mr. JONES of New Mexico. There is no profit figured in it at all; it is the landed cost that I have been speaking of, without any cost for handling.

Mr. McLEAN. But the foreign manufacturer does not send them over here at cost; he is supposed to make something, is he not?

Mr. JONES of New Mexico. There is nothing said here as to the profit the foreign manufacturer made.

Mr. McLEAN. As the same concern has a factory in this country, we can assume that it is not doing business at a loss at either end.

Mr. McCUMBER. Mr. President——

The PRESIDING OFFICER. The Senator from North Dakota.

Mr. McCUMBER. If the Senator has the number and the name of the maker of the scissors, undoubtedly we can get the landed cost in the United States in a short time, and I should like to find out what it costs landed in the United States, because there is where the competition must be.

Mr. JONES of New Mexico. I will give the number of the scissors so that the figures may be checked up, if the Senator desires to have it done.

Mr. McCUMBER. I should like to examine into the matter.

Mr. JONES of New Mexico. The number is 4042—6 inches.

Mr. McCUMBER. And the manufacturer's name is on the scissors, is it?

Mr. JONES of New Mexico. It is H. Boker & Co.

Mr. McCUMBER. I think we can, if they are imported, secure information as to the exact landed cost in the United States.

Mr. JONES of New Mexico. Mr. President, as I have said, I am perfectly willing that there shall be a reasonable duty upon the scissors and that there shall be somewhat of an increase over the present rate, because during the war concerns began to manufacture them in this country, but I am advised that the rates proposed by the committee are practically prohibitive.

Mr. McLEAN. What is the length of the scissors to which the Senator has referred?

Mr. JONES of New Mexico. Six inches.

Mr. McLEAN. On the list furnished us by the Reynolds report I find as to 6-inch scissors the landed cost is given at $5.96 a dozen and the domestic selling price at $11.75 of the comparable article. It would require quite a high rate to equalize the difference. That is one of the articles, and I think the only one, that requires as low a rate. There are 14 different numbers of scissors and the average spread—that is, the average rate required—is 204 per cent to equalize the difference in cost. We have not given anywhere near that protection, the average being less than 160 per cent.

Mr. JONES of New Mexico. Now, I will proceed just a little further with the report which has been made to me. The landed cost of that pair of scissors would be $2.67 under the present law, and, of course, nothing is added to that price for overhead and profit. The price under the Payne-Aldrich law would be $3.22. The rate proposed in the Senate bill before it was amended would make the cost $5.37, whereas to-day's American selling price is $5.

Mr. McLEAN. The comparable article?

Mr. JONES of New Mexico. No; it is to-day's American selling price of this article that is $5.

Mr. McLEAN. In the case of the same length of scissors, the American landed cost was $5.96 a dozen in August last. That is very much higher than the price quoted by the importer. We give him a great advantage in fixing the rate on the 6-inch scissors, and I understood the Senator to say that these scissors were coming in now for $3 and something a dozen.

Mr. JONES of New Mexico. They are not the same scissors. The Senator must know that.

Mr. McLEAN. They are as good scissors, I imagine, because the landed cost is $5.96.

Mr. JONES of New Mexico. They are not the same scissors that we are talking about.

Mr. McLEAN. There are no better scissors than the Boker scissors, I think.

Mr. JONES of New Mexico. As I say, the people in this country have commenced manufacturing scissors to some extent, and I am perfectly willing that a fair duty shall be put upon them, and a little above the present rate; but there is no excuse for putting an increased duty upon shears. That is the point I wish to emphasize. We are exporting shears to the four corners of the globe; and to increase the duty upon them can have no effect other than to enable the few manufacturers of shears in this country to raise their prices to the American consumer, and compete in the rest of the world at different prices.

Mr. McLEAN. The Senator knows that if there are no importations of shears, and there is any domestic competition, that competition controls the price, no matter what the tariff is. I think he will admit that.

Mr. JONES of New Mexico. Then I will ask the Senator why he seeks to increase the duty on shears? What does he hope to accomplish by it?

Mr. McLEAN. Because there is reason to think that if we do not put a duty on shears the Germans will make shears. They have all the machinery that is necessary, and if they do make shears and we do not put any duty on them, of course they will drive the American manufacturer out of the business; and if there are no imports the duty does not affect the price to the American consumer, outside of the fact that it is almost impossible to differentiate in putting a tariff on this article. As the Senator from North Dakota said, there is no difference between shears and scissors, except as to the length.

Mr. JONES of New Mexico. Oh, yes, there is, if the Senator will pardon me. There is a difference in the method of manufacture. They are manufactured in entirely different ways.

Mr. McLEAN. They are manufactured in two ways, I know. There are steel-laid shears. I do not know whether there are steel-laid scissors or not, but there may be shears that are not steel laid.

Mr. JONES of New Mexico. I think not, if the Senator will pardon me. I think all shears that are to be classed along with scissors are steel laid. They are all steel laid.

Mr. McCUMBER. Mr. President, I think we can possibly correct some little misunderstanding, and that we will be nearer together if we can get the exact facts.

The Senator understands there are two kinds of scissors and shears—that is, in the method of manufacturing. There are what we call the steel-laid scissors and shears and there is the other kind of scissors and shears. We make in the United States both kinds. We do not export anything but steel-laid scissors and shears, but we do make the other kind and Germany makes the other kind as well, and therefore she could import them as well as she could import the scissors. Bear in mind, the only shears that we are exporting are not the usual kind that have been made, but those which have been made in this country only a few years, namely, what are called the steel-laid shears. The others may come in. I do not see how we can differentiate and say that the other countries may not make these shears exactly in the same way that we do, but the only difference is a difference in length.

Mr. JONES of New Mexico. I am satisfied that the experts will have no difficulty in the world in making a distinction here; but, confessedly, there is no demand here for an increased duty on steel-laid shears. We export them all over the world. There are none coming in in competition that I know anything about.

Mr. President, there have been added to this paragraph some items that have been on the free list. Among them are sheep shears and pruning shears. I wonder if the Senators on the other side of the Chamber who are interested in agriculture so professedly are willing to take sheep shears from the free list and put them on the dutiable list? The trade situation is this: We make sheep shears in this country, and we export them to all the sheep-raising countries of the world; but there are other sheep shears, made in Great Britain, that are in common use in this country, and in my section of the country they all use the British sheep shears. They are going to have them whether we increase these duties or not.

Mr. McLEAN. Mr. President, is the Senator in favor of putting a duty on Australian wool?

Mr. JONES of New Mexico. That is wholly beside this controversy. I certainly feel that this is no time for filibustering. We want to discuss this bill and get it passed. We have heard enough about filibustering and about diversions and about talking on things that do not relate to the bill; and I ask the

Senator if he does not think it advisable that we shall talk about sheep shears instead of wool in Australia?

Mr. McLEAN. They go together, and I did not know but that if the Senator was in favor of putting a duty on wool he would be in favor of giving the men who make the sheep shears a little duty; that is all. I did not expect that the Senator would answer the question.

Mr. JONES of New Mexico. Mr. President, I am interested—I will not say delighted, but I am interested—to have heard the distinguished Senator from Connectocut make the remark which just fell from his lips. He says that inasmuch as we have put a duty upon wool, the woolgrower ought to be willing to give a little of it to the producer of sheep shears. Notwithstanding the producer of sheep shears in the United States is exporting his shears to the four corners of the world, they want to give him something more. Simply because the grower of wool is now given a duty upon wool, they want to give him something; and, Mr. President, that is found in practically every paragraph of this bill. You are taking something from these agricultural producers and giving it to somebody else, and that is the way you dupe and deceive the farmers of this country. When you propose to put a duty upon wheat, when you propose to put a duty upon anything else, you use that as an excuse to take something out of their pockets and give it to somebody else.

Mr. McLEAN. If the Senator will calm down and reassume his usual good-natured style of discussing this question, I think he will admit that if his statement is correct, that we are exporting these shears to all the nations of the earth in competition with other makers, the tariff on shears will not make any difference to the domestic user of shears. If we can compete with Germany in all the markets of the world in manufacturing this article, of course the German, if he gets his shears in here, must meet our price, and if anybody pays the duty, of course the German must pay the duty.

Mr. JONES of New Mexico. No, Mr. President; the Senator certainly can not be familiar with the sheep industry of this country. Here is the situation: The growers of wool and of sheep in this country want the specific shears that are made in Great Britain, and the only effect of a duty so far as the woolgrowers are concerned is simply to make them pay more for their shears. You are levying a tax on them, and you give to the American manufacturers the opportunity to raise the price of his shears that are sold in this country. That is what you do; and when the Senator from Connecticut rises here and says, inasmuch as we have put a tariff on wool, that the woolgrowers ought to be willing to give something to the manufacturer of shears in this country, he discredits the intelligence of the sheep growers of the country, who will be taxed in this fashion and for such an ignoble purpose.

Mr. McCUMBER. Mr. President——

The PRESIDING OFFICER. Does the Senator from New Mexico yield to the Senator from North Dakota?

Mr. JONES of New Mexico. I yield.

Mr. McCUMBER. Did I understand the Senator to say that we were exporting the sheep shears run by hand, the old-style sheep shears?

Mr. JONES of New Mexico. That is what the Tariff Commission reports.

Mr. McCUMBER. I do not so understand. My understanding is that we are simply exporting something which is peculiarly an American make, namely, the power shears, run by power other than hand power, and that the statements as to exports do not apply to these small shears at all. That is my information from the customhouse experts.

Mr. JONES of New Mexico. And that we do not manufacture the hand shears in this country?

Mr. McCUMBER. I say that we are not exporting them.

Mr. JONES of New Mexico. All I know on this branch of the subject is the statement which I read earlier in the discussion, that we are exporting these shears. I can not keep at my hand always the specific references, but I find this statement regarding the sheep shears in the tariff survey, and I do not imagine it would speak of sheep shears in this language if it meant a machine for shearing sheep. We have no definite information as to the exports of these sheep shears, but I do find this, as to the shipments to Chile and the Argentine:

> The United States lead in barbers' clippers, furnishing 62.1 per cent of the Chilean imports, against the United Kingdom's 16 per cent, Germany's 12 per cent; also in sheep shears, furnishing 73.5 per cent of the Argentine imports, against the United Kingdom's 25.9 per cent and Germany's 0.3 per cent.

That is what the Tariff Commission has to say about it, and that is as to sheep shears. It does not mean sheep-shearing machines. There is a vast difference between sheep-shearing machines and sheep shears, and we are exporting to the Argentine 73½ per cent of all the sheep shears used in the Argentine. Then Senators tell me we are not exporting sheep shears, but are exporting sheep-shearing machines. The Senator from North Dakota is misinformed, I am sure.

Mr. McCUMBER. I think not. I think the Senator will find that where this is done on a big scale, as it is down there, we are exporting only the sheep-shearing machines.

Mr. JONES of New Mexico. Then I will ask the Senator what is meant by that language in the tariff survey, where it says that in the imports to the Argentine "the United States leads in barbers' clippers," and gives the percentage, "also in sheep shears, furnishing 73.5 per cent" of the imports. If it does not mean what it says, I should like to have some one tell me what it does mean.

Mr. McCUMBER. The Senator may think it means the little hand shears, but my information is the contrary, that it all.

Mr. JONES of New Mexico. I think the people of the country understand just what "sheep shears" mean, and they do not understand it to mean the sheep-shearing machines.

Sheep shears and pruning shears and animal clippers have been on the free list, as I understand it, as agricultural implements. There is no excuse in the world for taking them off the free list. We are exporting all three of those articles. They are used by the farming industry of this country. They are on the free list, and again I want to appeal to Senators on the other side of the Chamber who profess so much interest in the farmers of this country, are you going to take these shears from the free list and put them on the dutiable list, when we are exporting such shears to the four corners of the earth under existing law?

Mr. McCUMBER. If the Senator will indulge me again, I want to call his attention to the fact that he is in error.

Mr. JONES of New Mexico. I have not the amendment as amended before me, but I wish to strike from it the items which were newly brought into the bill by the Senate Finance Committee. So far as nail scissors, barbers' and animal clippers, pruning and sheep shears are concerned, there is not even a reasonable excuse presented for putting them upon the dutiable list under existing circumstances. I move to strike those words out. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The Chair suggests to the Senator from New Mexico that that is all the committee proposes to insert. A negative vote on the committee amendment will accomplish the object the Senator has in view, will it not?

Mr. JONES of New Mexico. The committee changed the language entirely, as I understand it.

The PRESIDING OFFICER. Let the Secretary report the amendment proposed by the committee.

The ASSISTANT SECRETARY. After the paragraph No. 357, on line 17, the committee proposes to strike out all of lines 17, 18, 19, and 20, and to insert:

> Nail, barbers', and animal clippers, pruning and sheep shears, and all scissors and other shears.

The PRESIDING OFFICER. The Secretary will now state the amendment proposed by the Senator from New Mexico to the amendment.

The ASSISTANT SECRETARY. From the words which the committee proposes to insert the Senator from New Mexico proposes to strike out only the following words:

> Nail, barbers', and animal clippers, pruning and sheep shears and.

Mr. McCUMBER. I will ask the Senator if he will not withhold his call for a quorum and just call for a yea-and-nay vote? That will develop a quorum without calling the roll twice.

Mr. JONES of New Mexico. I do not believe Senators understand just what is involved. There are very few Senators here now, and I suggest the absence of a quorum.

The PRESIDING OFFICER. The Secretary will call the roll.

The Assistant Secretary called the roll, and the following Senators answered to their names:

Brandegee	Harris	McLean	Smoot
Bursum	Harrison	McNary	Spencer
Calder	Heflin	Nelson	Stanley
Cameron	Johnson	Newberry	Sterling
Capper	Jones, N. Mex.	Norris	Sutherland
Caraway	Jones, Wash.	Oddie	Townsend
Cummins	Kellogg	Overman	Wadsworth
Curtis	Kendrick	Page	Walsh, Mont.
Dial	Keyes	Phipps	Warren
Dillingham	La Follette	Poindexter	Watson, Ga.
Elkins	Lenroot	Rawson	Watson, Ind.
Gerry	McCormick	Sheppard	Williams
Glass	McCumber	Shortridge	Willis
Hale	McKinley	Simmons	

The PRESIDING OFFICER. Fifty-five Senators having answered to their names, a quorum is present. The question is on

agreeing to the amendment offered by the Senator from New Mexico [Mr. JONES] to the committee amendment.

Mr. HEFLIN. Mr. President, I wondered as the discussion proceeded upon the schedule about shears and scissors of all kinds, including shears used by the farmers of the country, where the distinguished Senator from Idaho [Mr. GOODING] could be, that Senator who claims to champion the cause of the farmer upon the floor of the Senate, who talks strongly for him and then votes strongly against him when he advocates a small rate of 20 per cent upon some farm product, and straightaway turns and votes to give the tariff barons a 75, 100, and 200 per cent rate. I wondered where the distinguished junior Senator from Idaho could be as the Senator from New Mexico [Mr. JONES] held up before the Senate the various kinds of scissors that will be used by all the farmers' wives of America and millions of women who do not live on the farm. When this high tariff rate was suggested by the Finance Committee of the Republican Party, I wondered why the junior Senator [Mr. GOODING] did not lift up his voice in solemn protest, and I wondered if they had silenced him by promising 5 cents to the farmer in order to take from him by the same taxing process $100.

Mr. STANLEY. Mr. President——

The PRESIDING OFFICER (Mr. MCNARY in the chair). Does the Senator from Alabama yield to the Senator from Kentucky?

Mr. HEFLIN. I am always glad to yield to my friend from Kentucky.

Mr. STANLEY. Does the Senator want an answer? The Senator from Idaho was busy at that time. He was fleecing the farmer with those shears.

Mr. HEFLIN. A very apt reply, Mr. President; fleecing the farmer. I have heard of those who farm the farmer, and the Senator from Kentucky has suggested the man who fleeces the farmer.

Mr. President, I have seen and used the kind of shear that is used upon the sheep. They work somewhat like a pair of scissors. That is a shear that is distinguished from a machine shearer. The kind of shearer that works by machine is the shearer in operation now by the Republican side of the Senate, shearing the consumers of America, just like the shepherd shears his sheep. I will say more about that a little later on.

The distinguished Senator from Connecticut [Mr. MCLEAN] for the first time in months I have seen him really enthused and aroused as he was fighting to lay a heavy tax upon the backs of the consuming mass of American people. Oh, how glibly and enthusiastically he did go to his task. How he could see the coupon being clipped by some of his constituents, a few of them, and forgetting all the while the thousands and hundreds of thousands of his people who must pay the additional price for the kind of scissors and shears that they have to buy for use in the routine work of everyday life.

I heard him say, in reply to the Senator from New Mexico, that a certain rate would put some manufacturer here out of business. That, of course, was a fairy tale. I thought of the consumer and how many of them are being put out of business here by the provisions of the bill. But they do not pay any attention to the consumer. He is only one amongst many. He belongs to the rank and file of the great army of the people who make up the population of the United States. But those few fellows who have already grown fat, pompous, and proud under the protective tariffs of the past are now coming back and demanding their rates. After having contributed to the campaign fund of the Republican Party in 1920 they are coming now and demanding that their profits be increased by law, and here you are doing what they tell you to do. They are adding to the tax upon shears when we are exporting them by the thousands, as the Senator from New Mexico [Mr. JONES] has pointed out, and selling them to all the countries of the earth.

There is no need under the sun for a tariff on shears, and yet the Finance Committee on the Republican side put a tariff upon shears in order to build up a wall shutting them out entirely and leaving the consumer of America, who must buy shears, at the mercy of the shear trust or combine of the United States. That is, in short, the story of what you are doing here. The Senator from Connecticut sheds copious tears when he talks about putting a certain manufacturer here out of business. But my heart goes out to the hard-pressed, struggling consumer, multiplied under the Republican administration by the millions. Little by little you are increasing his burdens each day, and he stands out there as you pelt him with your high tariff schedule, with nobody to defend him, nobody to lift a voice in protest against the outrage except the Democrats in this body and now and then a Republican on the other side of the Chamber who will not go with the majority in robbing outright the whole mass of people in the United States.

Mr. President, I saw the junior Senator from Idaho [Mr. GOODING] sit with folded arms and sealed lips when the debate raged about him last night and they were putting a tax of 20 cents each upon a table knife and 20 cents each upon a fork, the knife and fork the people must use as they eat their meals. I saw them raise the price of those products by law, giving the consumer no say at all about it, but using the taxing power in this body to increase the profit of the man who manufactures the steel knife and the steel fork. As they were doing that I said to myself, "Where is that friend of the farmer?" Then, Mr. President, when I saw scissors scheduled for taxation I said, "He will be here now to protest against this thing," but I was mistaken.

I can see the wife of the farmer out in the rural district in the springtime, in the summer time, and in the early fall, sitting on the front porch with her workbasket and her worktable and two or three or four pairs of scissors, small scissors, medium-sized scissors, a still larger pair of scissors, and a great big pair—that is, Mr. President, they used to have four pairs when the Democrats were in power. They could afford to have four pairs then. But now you are putting a tariff tax upon all these scissors and you make it more difficult for them to buy scissors at all. But through it all the Senator from Idaho [Mr. GOODING] was as silent as the tomb.

Mr. WATSON of Georgia. Mr. President——

Mr. HEFLIN. I yield to my good friend from Georgia.

Mr. WATSON of Georgia. I hope the Senator will comment upon the fact that this tax on shears, especially the larger sizes of shears, will increase expenses in every editorial room in America.

Mr. HEFLIN. Certainly. These large shears are used by the newspaper men of the country, used in every editorial and news room in the land—great, big, long scissors. I have a pair in my office twice as long as those used by the Secretary at the desk. They are used to clip papers and some of those big scissors are used to cut light leather and some of them are used to cut tin.

Mr. NORRIS. Mr. President, has it occurred to the Senator that the fellow who clips coupons also has to buy shears?

Mr. HEFLIN. Now, Mr. President, my good friend from Nebraska, who has struck this obnoxious and oppressive tariff bill some body blows, suggests that those who clip coupons must buy scissors. If this tax rate obtains they will be about the only ones, I will say to my friend from Nebraska, who will be able to buy steel scissors. Of course, they can buy them. God knows they ought to be able to buy them. If they are not able to buy them in Wall Street after having over $10,000,000,000 turned into their hands by the deflation policy of the Republican Party, then I do not know who in all the world would be able to buy them. Yes; those men must have them to clip their coupons.

But, Mr. President, I was going on to say that the newspaper office uses not only one pair but several pair of shears, because one fellow is off clipping some article out of a newspaper that he wants to reproduce in his own, and he is cutting various things and shaping up his paper for the press. A whole lot of scissors will have to be used, and the price of all of them will be increased if the Senator from Connecticut [Mr. MCLEAN] has his way. Oh, how he did glow with enthusiasm when he was going out after money from every person that has to buy scissors and shears.

Scissors; shears! Here is a small farmer with a little vineyard that he has started, and must have these big scissors or shears to shear and prune the vine, to clip them and cut them, and this legislation which is proposed by the Republican leaders will make it difficult for him to get these big scissors. He must pay more for them. Here is a man who uses tin in various ways and he takes these big old scissors or shears—I have seen them—and he cuts his tin with them. But the Republicans will put a tax on them and on every kind of scissors that may be thought of and will increase the price of them. When one of these old fellows comes in, too poor under the Republican Party's rule to have a barber shave him, he has to go to a barber shop to have his whiskers trimmed. The barber uses scissors for that and you make it cost the barber's customer more. Then his hair gets very long; he is unable under the reign of the Republican Party to have his hair cut regularly; and he has to have his hair cut with scissors; but the Republican Party make it more difficult for the barber to get scissors and harder on the average man to pay for hair cuts. You increase the price to the consumer on every hand.

All the while, however, the distinguished Senator from Connecticut [Mr. MCLEAN] is harping on a certain class of manufacturers. What will the manufacturer do? What will we do

to protect him? Can he compete with the foreigner? Yes; he is selling his goods abroad and competing with him over there. I ask Senators what about the American consumer, the men and women of America who are working and striving every day to make something on which to live decently and worthily. The Republicans are huddling them together and holding them up and taxing every one of them for the benefit of men who are already rich. They are using the taxing power of a great Republic for that purpose.

Mr. WATSON of Georgia. Mr. President——

The PRESIDING OFFICER. Does the Senator from Alabama yield to the Senator from Georgia?

Mr. HEFLIN. I am glad to yield to my friend from Georgia.

Mr. WATSON of Georgia. Let me remind the Senator from Alabama that every man who owns a mule and every man who owns a horse has to use shears to roach the mule's neck and roach his feet, and they have to keep the fetlocks of the horse trimmed. Therefore every man or woman who owns a horse or a mule is taxed under this bill.

Mr. HEFLIN. I thank my friend from Georgia for the suggestion, and that reminds me of a story.

Mr. President, the Senator from Georgia reminds me that shears must be used to trim the mane and tail of the mule and to cut off the fetlocks of the horse. That is all true.

Mr. McLEAN. What do they use on the Democratic jackass? [Laughter.]

Mr. HEFLIN. Why, your party in 1920 used gold scissors, studded with diamonds, all furnished by Wall Street. [Laughter.]

It will be recalled that the lowly Nazarene, the Christ of God, the Son of Man, and the Savior of the World, when He was upon earth in the flesh, He chose to ride not upon the elephant but upon the safe and serviceable donkey.

But I was about to tell you what a Republican farmer out in the West said about the Harding administration. As I stated, he was a Republican, and was asked "Are you for Harding?" He replied, "Well, I can truthfully say he put me on my feet." His questioner said: "Then, of course, you are for him?" He replied, "No; I ain't for him. Let me explain. I used to ride in an automobile under the Wilson administration, and now I have to walk. Harding put me on my feet." [Laughter.]

Mr. President, as the Senator from Connecticut was speaking and bemoaning the fate of a certain manufacturer and saying that unless the duty recommended by the committee is allowed he will be put out of business, I thought of the thousands and millions of American consumers which this bill will put out of business. They are to be taxed at every turn of the road. How many of them are being put out of business? Silent, unseen, they fall out of the ranks, with no bugle to sound the note of rescue for them; nobody to give the alarm; nobody to go to the assistance of their failing business. But the Senator from Connecticut demands in all the earnestness of his soul that the profits of this particular manufacturer be increased by an act of Congress. Who is there to plead for the rank and file of the men and women who make up the strength and glory of the Nation when they are put out of business as they are being put out of business every day by this bill of the Republican Party?

The Senator from Georgia [Mr. WATSON] showed me a paper to-day from his State full of deplorable statements. I will tell you what they were in a moment. The governor of the Federal Reserve Board is puppying around and carrying on a propaganda to-day all over the country trying to get himself recommended for reappointment, and hundreds of letters will be written by bankers who are, perhaps, not friendly inclined, but who will recommend him, for although they do not want him yet some of them will write letters for him, because the impression has gone out that he is going to be reappointed. He is trying to create that impression, and they fear that he will be, and he is playing for the appointment. Wall Street, it is said, has decreed that he shall be reappointed, and he is told to say that prosperity is just around the corner. Well, let us see about that. The Senator from Georgia gave the facts of the situation. He has a paper now before him with four pages of notices showing how the consumer has gone down. Those notices show that farmers are having their land sold for taxes. The notices tell us that Bill Jones, a farmer down in Georgia, will be sold out at the courthouse at public outcry next Saturday for nonpayment of taxes. Senators, there are four pages of notices of that kind from one county.

Mr. WATSON of Georgia. Mr. President, in the same county between February and April of this year 400 small landowners were sold out of house and home.

Mr. HEFLIN. Yes; Mr. President, that is the man whose cause I am pleading, the man who can not get aid so as to save his business.

What did Wall Street do? It borrowed money through the Federal reserve banking system, when the people of the South and West were paying interest rates many times larger than Wall Street was paying, and all the gamblers of Wall Street were tided over. What did the farmer of Georgia and Alabama need? After his property values were destroyed he needed somebody to lend him money in order to give him time to get on his feet again, retain his home and his farm and keep his wife and children contented around him and support them in the comfort which he had a right to do and did do under Democratic control, but under Republican control he was not allowed to have the money; credit was withdrawn from him and his land was sold for taxes, and he is gone; he is out of business. I do not intend to sit in the Senate while the agents or mouthpieces of the big manufacturers stand here and call upon Congress to tax the mass of the people of the country, as they are doing, without entering my protest and letting those who read the CONGRESSIONAL RECORD know just what the truth is regarding this tariff measure. It has got to be told here day after day, and it is being told.

The Senator from Connecticut is afraid certain manufacturers will be put out of business. I want to remind him of the farmers of my State who have been put out of business, of the little merchant who has gone down in the struggle, of the little banker who has gone down. When I stood here and made the fight to make the Federal Reserve Board reduce the rediscount rate from 7 per cent to 4½ per cent, the Senator from Connecticut opposed it.

I made a speech here and I introduced a resolution demanding that it be reduced, and it was reduced. I helped to drive the Federal Reserve Board to reduce it. The Senator from Connecticut opposed the reduction of the interest rate. I was seeking to provide money so that those men in Georgia and Alabama and elsewhere, whose homes are being sold for taxes could make loans at a reasonable rate and keep their land. It does good to tell the truth and the whole truth about the records of Senators here.

The Bible says, "Choose ye, this day, whom ye will serve—God or Mammon." Now, on which side are we battling? We are not all on the same side; there are two sides and one of them is the right side and one of them is the wrong side. On which side are you battling over there?

I ask you to look out on that mass of millions of consumers of our country. They have rights in this country.

You have taxed salt and cement and dozens of other things—knives and forks, drinking glasses and window panes, and now you are taxing scissors and shears, and on you go putting a tax on everything on earth that the consumer must have. Why? I am going to tell you why. It is because of the big campaign contributor. In the fall of 1920 Governor Cox said that you had collected the greatest campaign slush fund in history—and you had. William Boyce Thompson, of New York, treasurer of your committee, borrowed on a dummy note $3,000,000 from a Federal reserve member bank. John Skelton Williams has challenged him to deny it and says he will produce the proof, but you have not called on Mr. Williams to produce the proof. Why don't you?

He borrowed that money, of course, with the knowledge of W. P. G. Harding, the governor of the Federal Reserve Board. When your committees were gathering up money for the campaign some of them said: "Well, now, you are asking me to contribute a good deal." They said: "You need not worry about that. You think we are going to win, don't you?" "Why, certainly." "Well, you will get it all back, and many times over, in the tariff." The manufacturer said: "You think they will give me a liberal rate, do you?" They smiled; they were getting in a good humor by that time, and they said: "Oh, yes; they will give you practically what you want. We are going to go to it in a hurry. We are going to have the House overwhelmingly, and the Senate, and the White House, and we are just going to move on, and everything will be lovely, and the goose will honk high." He said: "All right; here is the check"—$250,000, or whatever the amount might be.

Then, when you got in, this man came down. He said: "Now, gentlemen, I suppose you remember me. Perhaps you have forgotten me; but here is a check that I gave, which you gentlemen will recall." They looked at it, and they said: "Why, certainly; how do you do? How do you do?" and shook hands with him twice. "What can we do for you?" He said: "I want that rate that we were talking about. You have not forgotten that?" "Oh, no, no. Well, just write out what you want and we will attend to it"; and he got his rate, and then you tax me to help pay it. You tax these men and women in the gallery to help pay it. You tax every man and woman in the country who has to buy what he pro-

duces to help pay it. You make us pay for the privilege of being plundered. It has gotten now to a point, Mr. President, where you can get a tariff tax levied for a song.

The distinguished senior Senator from Maine [Mr. FERNALD], clever gentleman that he is—I am very fond of him personally—went down there before your Finance Committee when you Republicans were sitting by yourselves, Democrats being excluded then. He went in there and called on you for a certain tariff, and one of the members threw his feet up in another chair and ran his fingers through his long, curly hair, and said: "Sing us a song, and we will give you what you want." He sang a song, and they said: "Give us another one," and he sang two songs, and the press said they gave him the rate he asked for. Now, do you know, Mr. President, that that is the cheapest contribution that I have ever known a Republican to make to obtain a tariff rate at the hands of Congress. I will tell you what the American people are going to make you do after November. They are going to make you take a back seat and sing a very low tune. [Laughter.] That is what is going to happen to you.

Mr. President, when one of these tariff barons contributes $250,000, and is enabled to get, by a tariff rate levied upon the people, a million and a half dollars put back in his pocket, he is ready to contribute to another campaign fund of the Republican Party. Who is it you are talking about here? Not the farmer, not the consumer, but certain manufacturers. What did you do? Why, the Senator from Indiana [Mr. WATSON] tells us that we say each tariff bill is worse than the preceding one. Well, that is true. Every tariff bill that you have presented since you presented the first one has been worse than the one preceding it. The last one was far worse than the first, worse than the one next to it, worse than the one before that, and so on. Now, let us see if you have not gradually gone down in the scale of being with regard to this matter.

In 1908, when Mr. Taft was nominated, the manufacturers got so bold that they would not trust just to telling you what you must do and having you tell them what you were going to do. They said, "You must write it in the bond," and they made you write it in your platform of that year. Now, listen, Senators. They made you write in your platform, "We hereby guarantee a reasonable profit to the manufacturer."

What of the little shopgirl who works long hours to support an old father and mother? What of the boy working in the day and going to school at night trying to get an education? What of the thousands of men and women out yonder in the walks of life doing their best to make an honest living? What of the clerk behind the counter? What of the merchant in the store? What of the farmer in the field? What of the miner with his pick down in the bowels of the earth? What of the doctor, the lawyer, the preacher, the teacher, and all other classes of men and women? You guaranteed nothing to them. You did not guarantee them anything, not one red cent; but you wrote in your platform that you guaranteed to the manufacturer a reasonable profit, and then after that you left him to say what was a reasonable profit, and the sky was the limit.

To show you that you have gone down in the scale of being in this matter you brought in the Payne-Aldrich bill, the worst bill ever written except this one, and this one is ten times over worse than that. What happened when you got that in here? I am not going to quote a Democrat, although the RECORD is full of their denunciations of that bill, from the distinguished leader on our side, my colleague [Mr. UNDERWOOD] and the Senator from North Carolina [Mr. SIMMONS] down among the rank and file of the Democrats in this body and in the other House, but I am going to quote to you a Republican, gone to his reward—peace to his ashes; God bless his memory—I refer to the brave and brilliant Dolliver, able and eloquent Senator from the State of Iowa.

What did he say? A Republican, he stood amongst his brethren on the other side—this great gladiator from the West. What did he say to you? His party—the Republican Party—was in control, and he stood here and looked you in the face, with his hands uplifted—I saw him and heard him—and he said: "Senators, Congress has become a bargain counter."

Can anybody arraign your party in stronger language than that? Can anybody characterize a Congress enacting a robber tariff measure in more scathing terms? That was when the mild-mannered Payne-Aldrich bill was up, and mild it was compared with this bill. Four thousand tariff marauders march in the lines of this bill. Four thousand captains of industry are in command. The Republican side, with the exception of the Senator from Nebraska [Mr. NORRIS] and a few others, are in mass formation, as the Senator from Indiana [Mr. WATSON] said, ready to run over anything that gets in front of them; and here they come, with 4,000 items scheduled, lifting higher and higher the taxes on every man and woman in America.

This is all being accomplished at the bargain counter. The campaign contributor demands his pound of flesh and you have authorized him to cut it out nearest the heart of every consumer in America. He contributes to your campaign fund and he demands that you make the American consumer give him many times the amount that he contributed. Bargain counter? That is what Dolliver said when the Payne-Aldrich bill was here for consideration, and if his spirit could look down from the parapets of the sky to-day, brilliant, conscientious, and eloquent statesman that he was, and see this body, controlled by the party whose banner he carried, making it more of a bargain counter than ever before, he would be unhappy even in the realms of the blest. Here they are, with the Senator from Connecticut [Mr. MCLEAN] chief of the high priests of protection, glorying in the fact that he and those with him can rifle the pockets of the American consumers, all for the benefit of those who grow fat by reason of tariff taxes levied for them upon the every-day necessities of life.

Mr. HARRISON. Mr. President, the papers state that there was a meeting last night in the city of Washington. It was called by Mr. Adams, chairman of the Republican National Committee. At this gathering the object, as stated by the papers, was to procure some campaign contributions; and in this gathering, as revealed by the New York Times, those present were Secretary Weeks, Attorney General Daugherty——

Mr. CARAWAY. Was not Felder there?

Mr. HARRISON. Felder was not there, as the names are printed—William Butler, of Boston; William H. Crocker, of San Francisco; Edward F. Stotesbury, of Philadelphia; Charles D. Hilles, of New York; W. P. Washburn, of St. Paul; William Wrigley, of Chicago; Henry B. Wilcox, of Baltimore; B. H. Kroger, of Cincinnati; Fred B. Patterson, of Dayton; Roy B. Chapin, of Detroit; George S. Stephenson, of Hartford, Conn.; A. V. Davis, of Pittsburgh; Henry B. Scott, of Wilmington, Del.; and W. F. Dillingham, of Hawaii.

Before I conclude I shall have read, if I can obtain unanimous consent, this article, telling what transpired at this conference; but the object of the conference called by the chairman of the Republican National Campaign Committee was to obtain contributions, and those who were invited into this conference in order to make donations for the coming elections for Senators and for Congressmen on the Republican ticket were men representing J. P. Morgan & Co., men representing the great wholesale grocery interests of the country, men representing the chewing-gum interests of the country, on which a tax was laid recently in the revenue bill for the first time, I think, in the history of taxation legislation. One of those present was Mr. Wrigley, who had been generous in the past in the matter of campaign contributions, and donating his electric signs to be transformed from "Wrigley's chewing gum" signs into "Harding and Coolidge for President and Vice President" signs. But the thing that struck me most in the gathering of these men, called by the chairman of the Republican National Campaign Committee to obtain contributions to finance the senatorial and congressional elections in the coming campaign, was the name of the man who to-day controls the policies and is general manager, so to speak, of the interests of a corporation upon whose product we on this side and a few on the other side, including the distinguished Senator from Wisconsin [Mr. LA FOLLETTE] and the two Senators I see before me over there [Mr. JOHNSON and Mr. NORRIS] voted not to place a tax—the cash registers made in this country. They have been permitted heretofore to come in duty free.

The representative of the National Cash Register Co. was at the conference. The rate on cash registers had been considered for two or more days by the Senate of the United States. It is an article which even the chairman of the Ways and Means Committee of the House and his colleagues thought needed no protection, but which received protection upon the recommendation of the Finance Committee of the Senate, an article that all admit is controlled in manufacture, sale, and distribution by a trust. The rate on that article has been for two or three days assailed on this side, and by a few men on the other side, and last night the vote was taken just about the time these men were being corralled by Mr. Adams, chairman of the Republican National Campaign Committee, and the representative of the National Cash Register Co. was in that conference.

The country can place its own interpretation on his presence in Washington during the discussion of the question of whether or not a tariff should be placed upon the importation of cash registers into the United States, and they will form their own

conclusions. But it shows how closely allied is the present Republican administration, through the chairman of the national campaign committee, with the big interests, when we find that he called into a conference Mr. Fred Patterson, one of the largest owners in the National Cash Register Co., from Dayton, Ohio, together with these other leading Republicans from over the country, in order to obtain contributions and raise a fund to fight the coming senatorial and congressional elections.

So I want to incorporate in the RECORD and have read from the desk this very interesting article, which shows what is taking place in Washington while this tariff bill is being considered by the Senate, and the close alliance between the representatives of the special interests, which are out for getting special privileges at the cost of the American people, and the leaders of the Republican Party, just as the votes are being taken in the Senate of the United States. I desire to ask unanimous consent, following the reading of that article, that I may insert, following it, taken from Who's Who in America, the histories of the various gentlemen who are named in connection with this conference called by Mr. Adams last night to raise contributions to reelect a Republican Senate and a Republican House of Representatives.

The PRESIDING OFFICER (Mr. MCNARY in the chair). Is there objection to the request of the Senator from Mississippi?

Mr. WILLIS. I do not object, but I wish to make a brief statement.

Mr. HARRISON. I desire to have the article read first, and then I will yield the floor.

Mr. WILLIS. Let me make a little statement, as I have been called from the Chamber.

Mr. HARRISON. Very well.

Mr. WILLIS. I did not hear all of the statement of the Senator, much to my regret, but I understand that he coupled in some way the name of Mr. Fred Patterson, of Dayton, Ohio, with some conference, about which I know nothing and which I was not privileged to attend. He coupled his name not only with that conference but with tariff legislation, the tariff on cash registers. I thought the Senator would be interested to know what I am about to state.

I chanced to meet Mr. Fred Patterson in the Capitol to-day, and was rather interested to learn, in conformity with what I said on the floor of the Senate yesterday, that not only had he not had any part whatever in the recommendation for a tariff duty upon cash registers—I having said yesterday, as the Senator knows if he was here, that I had heard nothing from that concern upon the subject—but Mr. Fred Patterson is, as a matter of fact, opposed to the tariff on cash registers. I thought that information might relieve the Senator. Mr. Patterson is not interested in the proposed duty at all, and is really opposed to it. He said he would rather there would not be any tariff at all on cash registers.

Mr. HARRISON. May I ask the Senator, since he has injected himself into this discussion, if he did not vote on yesterday to place a very large tariff upon the importation of cash registers?

Mr. WILLIS. Not very large; 25 per cent.

Mr. HARRISON. The Senator, of course, does not think any amount is large, but we thought it was large. He voted for that tariff?

Mr. WILLIS. I did.

Mr. HARRISON. To take cash registers from the free list and put a tariff on them?

Mr. WILLIS. Yes.

Mr. HARRISON. Which is a tax upon everybody who buys a cash register in this country. Of course, the Senator's conversation with Mr. Patterson happened to-day, as I understand?

Mr. WILLIS. It did.

Mr. HARRISON. And the vote was taken yesterday?

Mr. WILLIS. It was.

Mr HARRISON. After the tariff had been placed upon the importation of cash registers the Senator held the conversation?

Mr. WILLIS. Yes.

Mr. HARRISON. Of course, the harm had been done, and it might be natural for Mr. Patterson at this late date to tell the Senator that he was opposed to it. He had never appeared before the committee and expressed those views, however, or said that he was opposed to it. The Senator would not tell the Senate that he had ever told him before the vote was taken that he was opposed to it, but at a later date, to-day, after the vote was taken, after the harm was done, after the tax had been imposed upon the people, he called the Senator out into the cloakroom and whispered into his ear that he was opposed to it.

Mr. WILLIS. Mr. President, the Senator can not describe that about which he does not know. I stated in the debate here yesterday that, so far as I was informed, the National Cash Register Co. have no interest whatever in the tariff.

Mr. HARRISON. Had the Senator ever received an expression from the National Cash Register Co.?

Mr. WILLIS. I had received nothing from them, but I read the tariff hearings, which is more than my friend the Senator from Mississippi does, and I noticed that there were representatives before the committee of other cash-register concerns who made a good argument, but the people from Ohio had said nothing about it one way or the other, and in conformity with what I said yesterday in conversation with Mr. Patterson to-day I learned that not only is he not interested in a tariff on cash registers but that he agrees absolutely with the views expressed by my friend from Mississippi that there ought not to be any tariff on cash registers at all.

Mr. HARRISON. But he agreed with the Senator's vote, did he not?

Mr. WILLIS. I did not ask him whether he did or not.

Mr. HARRISON. The Senator was not interested in that. The thing I am interested in is whether Mr. Fred B. Patterson is the president of the National Cash Register Co. at Dayton, Ohio.

Mr. WILLIS. He is the president of it.

Mr. HARRISON. I thought so.

Mr. WILLIS. And a very good one.

Mr. HARRISON. I ask unanimous consent to have this article read, and also to put into the RECORD the history of these distinguished gentlemen.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Mississippi? The Chair hears none, and it is so ordered. The Secretary will read as requested:

The reading clerk read as follows:

REPUBLICANS FIND YOUNG MEN IN REVOLT—POLITICAL PROTEST WAVE IS LAID PARTLY TO THIS AND PARTLY TO WOMEN—CONGRESS DELAY A FACTOR—BAD BUSINESS ADDS ITS PART TO PRESENT ACTION, CONFEREES IN WASHINGTON SAY.

[Special to the New York Times.]

WASHINGTON, D. C., June 8.—The political conditions which are disturbing Republican leaders, especially the pronounced trend toward radicalism as reflected in recent primaries, were discussed to-night in a confidential way by members of the Republican National Committee, Cabinet members, and financiers at a dinner following informal conferences held to-day at the call of John T. Adams, chairman of the Republican National Committee, ostensibly to discuss financial questions in connection with the coming congressional campaign.

At this dinner the revolts against machine methods in Indiana, Pennsylvania, and Iowa were discussed. One speaker said that three things were causing the trend away from the old political order. These were, in the order of importance:

Bad business and unemployment.

A revolt against conversatism among young men who saw service in the war, and a lack of party allegiance on the part of women who helped to swell the Republican majority in 1920.

Lack of leadership in Congress.

There was nothing the Republican leaders could do, it was admitted, to overcome the movement away from conservatism, except to restore leadership in Congress.

Some speakers said that the differences between the President and Congress over the bonus were having a bad political effect. Most of those present thought, however, that the party had gone too far on the bonus to postpone action in this session of Congress. But several thought that the President would strengthen himself and the party if he vetoed the bonus bill unless it provided the money to pay.

Reports from the West said there was much criticism there over the delays in enacting the tariff bill. Manufacturing centers also were reported to be clamoring for early action so that business could adjust itself to the new rates.

Word was brought here that Maine was feeling the same political uneasiness as has manifested itself in other States. Until a few days ago the Republican leaders thought Senator HALE would get a large majority for renomination in the primaries on June 20. But now it is said that Howard Davies, a labor leader and radical Republican, who is running against him, is getting substantial support in every part of the State.

Among those present at the dinner were Secretary Weeks, Attorney General Daugherty, William Butler, of Boston; William H. Crocker, of San Francisco; Edward F. Stotesbury, of Philadlephia; Charles D. Hilles, of New York; W. P. Washburn, of St. Paul; William Wrigley, of Chicago; Henry B. Wilcox, of Baltimore; B. H. Kroger, of Cincinnati; Fred B. Patterson, of Dayton; Roy B. Chapin, of Detroit; George S. Stephenson, of Hartford, Conn.; A. V. Davis, of Pittsburgh; Henry B. Scott, of Wilmington, Del.; and W. F. Dillingham, from Hawaii.

Mr. HARRISON. I understand that the order has been made to print in the RECORD the extracts from Who's Who in America and other publications, showing the history of these men.

The PRESIDING OFFICER. It has been so ordered.

The matter referred to is as follows:

[From Clayton C. Hall: Baltimore, Its History and Its People, Vol. II, p. 172.]

HENRY BUCKLEY WILCOX.

Henry Buckley Wilcox was born in Baltimore May 23, 1864. His education was acquired in the public schools of his native city and the Baltimore City College, which he left at the age of 15 years in order to accept a clerkship in a grain commission house, where he remained two years. He became a messenger in the First National Bank of Baltimore in 1881, discharged the duties of this position very capably for two years, then became corresponding clerk in the Farmers

& Merchants National Bank, and July 1, 1883, was advanced to the position of general bookkeeper. His next change of position was to become the cashier of the Equitable National Bank, an office he filled with ability until 1900, when the thought of buying this institution and consolidating it with the First National Bank appeared to him to be an excellent idea. This plan was carried out, and proved the wisdom of Mr. Wilcox's judgment and foresight. He was made cashier of the combined interests in 1900, was elected to the double office of vice president and cashier in January, 1906, and in 1909 was elected to the presidency, an office he is holding at the present time.

His business interests are far-reaching and manifold. He is a director and member of the executive committees of the United States Fidelity & Guaranty Co. and of the Maryland Trust Co.; director in the Queenstown Savings Bank; director in the First National Bank of Onancock, Va..; member of the executive committee of the Baltimore Clearing House; ex-president of the Maryland Bankers' Association. He is a member of the Maryland Club, the Baltimore Country, Baltimore Yacht, and Baltimore Athletic Clubs; a member of Mystic Circle Lodge, No. 109, Free and Accepted Masons; St. Johns Chapter, Beauseant Commandry, Ancient Arabic Order Nobles of the Mystic Shrine, and is a thirty-second degree Scottish Rite Mason. His political affiliations are with the Republican Party, and he was a colonel on the staff of Gov. Lloyd Lowndes. His religious belief is that of the Methodist Church. He is a consistent and liberal contributor to the several local charities. His appearance indicates his fondness for outdoor sports—golf, automobiling, yachting, etc.—yet he is extremely fond of reading and study, and is the possessor of a fine library, in which he spends many hours. He commands the respect and confidence of all who know him, and is noted for his quick perception, sound judgment, and force of character.

ARTHUR V. DAVIS.

Aluminum Co. of America: Incorporated in September, 1888, in Pennsylvania, as the Pittsburgh Reduction Co.; present name adopted January 1, 1907.

Capital stock: Authorized, $20,000,000; outstanding, $18,729,600; par, $100. Dividends in recent years have been paid as follows: 1906, 3½ per cent; 1907, 11 per cent; 1908, 1 per cent; 1909, 2 per cent; 1910–1913, 4 per cent yearly; 1914, 6 per cent; 1915, 6½ per cent; 1916 and 1917, 8 per cent each; 1918, 1919, and 1920, 10 per cent each; payments quarterly, F, M, A, and N, 1. In addition, an extra dividend of 2 per cent was paid December, 1916. Arthur V. Davis, president.

—

WILLIAM D. WASHBURN, OF ST. PAUL, MINN.

Washburn, William D., jr., president of the W. D. Washburn, Jr., Farmlands Co., was born April 3, 1863. The family is an old one in this country, the settlement of the first members of the ancestral line in America dating back to earliest colonial days. * * * He was born in St. Paul, but most of his boyhood was passed in Minneapolis, where he attended the public schools. He then continued his educational training in Phillips Academy, at Andover, graduating in 1883. He entered Yale University for his college work, completing his course and graduating with the class of 1888, and since that time has been engaged in journalistic work and in a business career. He entered the employ of the Minneapolis Tribune as a reporter and advanced himself to the position of editorial writer, when he resigned to accept a place on the staff of the Chicago Tribune, but returned to Minneapolis to establish himself in business. Since then his interests have been connected with the flour and lumber industries, and at the present time he is the president and head of the W. D. Washburn, Jr., Farmlands Co., which deals extensively with wild and farm lands and minerals. Mr. Washburn is a Republican in politics and is active in the political work in the State, having been a member of the State legislature during the three terms of 1901, the extra session of 1902, and the regular session of 1905. He is actively interested in the promotion of good government, and is a member of the Civic and Municipal Leagues and was formerly vice president of the Reciprocity League. Mr. Washburn is prominent in the social and club life of the city and is a member of the Minneapolis and Commercial Clubs, the Six O'Clock Club, the Wranglers' Club, the Skylight, and Minikahda Clubs, and the Minnesota and Yale Club, of New York City.

—

WILLIAM P. WASHBURN.

Washburn Undertaking Co. (William P. Washburn, Peter Thorhaug, James A. Donaldson), 19 Northeast Fifth Street, Minneapolis, Minn. No credit rating found in Dun and Bradstreets.

[From Who's Who in America.]

Chapin, Roy Dikeman, manufacturer; born at Lansing, Mich., February 23, 1880; son of Edward C. and Ella (King) C.; student University of Michigan, 1899–1901; married Inez Tiedeman, of Savannah, Ga., November 4, 1914. Identified with automobile business in Detroit since 1901; general sales manager Olds Motor Works, 1904–1906; organizer E. R. Thomas-Detroit Co., 1906, and treasurer and general manager of same, 1906–1908; also treasurer and general manager of its successor, the Chalmers-Detroit Motor Co., 1908–1910; president Hudson Motor Car Co. since 1910; president Eastern Realty Co., Chanlett Corporation of New York; director First and Old Detroit National Banks; vice president Lincoln Highway Association, National Automobile Chamber of Commerce; director Michigan State Good Roads Association; chairman highways transport committee of Council of National Defense, Washington, 1917; member Phi Delta Theta. Clubs: University, Detroit, Detroit Boat, Detroit Athletic, Detroit Country, Bloomfield Hills Country, Lochmoor Golf, Aero of Michigan (treasurer), Aero Club of America, Metropolitan and Chevy Chase (Washington), Oglethorpe and Savannah Golf (Savannah, Ga.). Home: Grosse Pointe Farms, Mich. Office: Hudson Motor Car Co., Detroit, Mich.

Crocker, William Henry, banker; born at Sacramento, Calif., January 13, 1861; son of Charles and Mary Ann (Deming) C.; Ph. B., Sheffield Scientific School (Yale), 1882; married Ethel W. Sperry, of Stockton, Calif., October 6, 1886. Engaged in banking since 1883; president Crocker National Bank, Crocker Estate Co.; vice president Humboldt Savings Bank, Pacific Improvement Co.; director Savings Union Bank & Trust Co., Pacific States Telegraph & Telephone Co. (San Francisco), Equitable Trust Co., Mount Morris Bank (New York); president Crocker Investment Co., Provident Securities Co.; director Pacific Mutual Life Insurance Co., Pacific Gas & Electric Co., Empire Mines & Investment Co., Morris Plan Bank; member Republican National Committee, 1916–1920; first vice president Panama-Pacific International Exposition, 1915; thirty-third degree Mason. Clubs: University and Metropolitan (New York), Pacific Union, University, Bohemian, Olympic, Union League (San Francisco). Home: Burlingame, Calif. Office: Crocker National Bank, San Francisco.

Hilles, Charles Dewey, ex-chairman Republican National Committee; born Belmont County, Ohio, June 23, 1867; son of Samuel and Elizabeth (Lee) H.; graduated Barnesville (Ohio) High School; 1885, student, academy, Oxford, Md., 1885–1887; married Dollie Bell Whiley, of Lancaster, Ohio, 1896. Financial officer and superintendent Boys' Industrial School of Ohio at Lancaster, 1890–1902; superintendent New York Juvenile Asylum, Dobbs Ferry, N. Y., 1902–1909; Assistant Secretary United States Treasury, April 20, 1909, to April 4, 1911; Secretary to the President (Taft), April 4, 1911, to March 4, 1913; chairman Republican National Committee, 1912–1916; member firm Dwight & Hilles, resident managers New York Employers' Liability Assurance Corporation, 1913; director Liberty National Bank, Otis Elevator Co.; treasurer New York child labor commission, New York Juvenile Asylum; president National Republican Club; member Loyal Legion, Ohio Society of New York; Presbyterian. Clubs: Union League, Bankers', Metropolitan, Century, Pilgrims', Lawyers'. Home: 301 West One hundred and Sixth Street. Office: 56 Maiden Lane, New York, N. Y.

Stotesbury, Edward Townsend, capitalist; born at Philadelphia February 26, 1849; educated Friends' Central School, Philadelphia; married, first, Frances Bergman Butcher; second, Mrs. Lucretia Roberts Cromwell, of Washington and New York, January 18, 1912. Began as clerk with firm of Rutter & Patterson, wholesale grocers, Philadelphia, later with Harris & Stotesbury, sugar refiners; connected with Drexel & Co., bankers, Philadelphia, many years, becoming partner 1882; now head of Drexel & Co., Philadelphia, and member firm J. P. Morgan & Co., New York; also chairman board of Philadelphia & Reading Railway Co.; officer or director Metropolitan Opera House Co. (Philadelphia), Central Railroad Co. of New Jersey, Coxe Bros. & Co. (Inc.), Fidelity Trust Co., Girard Trust Co., Highland Coal Co., Lehigh & Hudson River Railway Co., Lehigh & New York Railroad Co., and many other corporations; trustee Penn Mutual Life Insurance Co. Has served as president National Horse Show Association of America (Ltd.). Assisted in financing the international Chinese loan, 1909; assumed indebtedness of Philadelphia Grand Opera Co. and formed syndicate to buy out Hammerstein interests in same. Was treasurer Republican national campaign fund, campaigns of Roosevelt, 1904, and Taft, 1908. Donated $50,000 toward New York State Park on Hudson River and has made many contributions to philanthropic and charitable organizations. Interested for many years in rearing thoroughbred horses on his farm, "Wingo," Chestnut Hill, Pa.; paid $14,000 for "Sweet Marie," the world's champion trotting mare (2.02), 1906; was American representative of the International Horse Show at the Olympic Meet, London, 1908; honorary president Road Drivers' Association. Member Philadelphia Stock Exchange. Patron of arts and owner of extensive collection of paintings, sculptures, tapestries, etc. Address: Drexel & Co., Philadelphia.

Wilcox, Henry Buckley, banker; born at Baltimore May 23, 1864; son of William Littleton and Susannah Helen (Perry) Wilcox; educated Baltimore City College, 1876–1879; married Katharine Elizabeth Wirt, of Phillipsburg, Pa., November 5, 1889. Clerk in office of Riddle & Fisher, grain merchants, Baltimore, 1879–1881; runner with First National Bank, 1881–1883; with Farmers & Merchants' National Bank, 1883–1893; cashier Equitable National Bank, 1893–1900, and of its successor, the First National Bank, 1900–1910; president First National Bank, 1910–1916; vice president Merchants-Mechanics' National Bank, December, 1916– ; director Federal Reserve Bank, Richmond, Va., 1916–1918; vice president Chesapeake Paper Board Co., Holmes Electric Protective Co.; treasurer J. E. Smith Co.; director First National Bank (Onancock, Va.), Baltimore branch Federal Reserve Bank; chairman board of finance commissioners city of Baltimore. Military aid to Gov. Lloyd Lowndes rank of colonel, 1896–1900. Member Sons of American Revolution. Republican. Methodist. Mason (32d degree, Knight Templar). Clubs: Maryland, Baltimore Country, Baltimore Yacht. Home: 52 West Biddle Street. Office: South and Water Streets, Baltimore, Md.

Mr. NORRIS. Mr. President, in view of the disclosures which have just taken place between the Senator from Mississippi [Mr. HARRISON] and the Senator from Ohio [Mr. WILLIS], I think we ought to reconsider the vote by which we put a tariff on cash registers. I suggest that because it develops that the principal manufacturing concern in the United States making cash registers and sending them all over the world seems to be opposed to a tariff on cash registers. The president of that company was in this conference called for the purpose of raising funds. How can we expect to raise funds for the Republican campaign committee if the men who are there in the conference, from whom we expect the contributions, are opposed to our actions? It is suicide, Mr. President. We were moved by good motives, no doubt, but we have learned now that we were wrong and we ought to rectify it.

I have wondered how that information got out to the public. Was there a newspaper correspondent there, and did he violate the trust, the same as the newspaper correspondent did the other day at the White House? That makes me think it was the same Senator, the Senator from Mississippi [Mr. HAR-

RISON], who day before yesterday, I think it was, read a news item about what occurred at the White House, where a newspaper correspondent had gone away and told the truth about something, and the same announcement said that he never could get back into the White House, and that the newspaper fellows were going to expel him from their association.

The Senator from Mississippi offered that as a criticism, I suppose, of the administration. He is evidently not friendly with the administration. Nobody has defended the administration from that attack, and it seems to me I ought to do it myself, if nobody else does.

Think of it, Mr. President, a newspaper correspondent found telling the truth; but the culprit is not going to escape. The same announcement that told about his having disclosed what happened at the conference at the White House said that he was going to be tried by some sort of a newspaper court-martial.

In my mind's eye I can see the poor devil now when, trembling in every limb, he stands before that august tribunal and hears the reading of the complaint wherein it is charged that he told the truth about what happened at a White House conference. I can see him again, Mr. President, when with bowed head he humbly pleads guilty to the charge. I can see him further, it seems to me, when with bitter tears of remorse rolling down his cheeks he listens to the judgment that comes from that drumhead court-martial.

I have an idea that when he comes to that trial and hears the judgment for this serious offense it will be decreed that he shall be branded, not with a scarlet letter, Mr. President, but when the fumes and the odor of the burning flesh have disappeared there will be seen upon his forehead the outlines of a small hatchet, which shall be emblematic that henceforth he shall be a member of that ancient organization, the charter member of which was a noted character in our early history, but whose name and teachings have to a great extent been unfortunately forgotten, who in his early youth had the audacity to stand up in front of his own father and say that he could not tell a lie.

I suppose they will render a further decree, because the crime must be punished severely. Probably this felon in the newspaper world will be banished across the ocean to that island over near Holland, whose name I can not remember and which I could not pronounce if I did, there to become a life companion of the former crown prince of Germany and there, Mr. President, with a little hatchet to hack away his life among the growing forests.

Mr. President, such an offense must be punished severely. The precedent it establishes will be disastrous and disgraceful. If such conduct on the part of newspaper men is not punished, the next thing we hear of some one of these men will be telling what happened on the *Mayflower* or perhaps on a senatorial yacht or houseboat. Notwithstanding the criticism of the Senator from Mississippi [Mr. HARRISON], our President performed a great service for the country when he banished from the White House a newspaper man who told the truth when he ought to have told a lie.

Mr. HARRISON. Mr. President, in view of the statement of the distinguished junior Senator from Ohio [Mr. WILLIS], giving to the Senate information that comes to him from Mr. Patterson, head of the National Cash Register Co., I desire to ask unanimous consent to reconsider the vote by which the amendment was acted upon favorably on yesterday which placed a tariff on cash registers.

The PRESIDING OFFICER. There is a motion pending at this time. So the request of the Senator from Mississippi is not in order.

Mr. HARRISON. As soon as that motion is out of the way I shall ask unanimous consent, and if it is objected to I shall move to reconsider the vote to which I have referred.

The PRESIDING OFFICER. The question is upon agreeing to the amendment offered by the Senator from New Mexico [Mr. JONES] to the amendment of the committee.

Mr. JONES of New Mexico. Mr. President, there are several Senators here now who were not present when this matter was discussed and I desire to state the purpose of the amendment.

These articles have been on the free list and the effect of my amendment would be to have them put back on the free list. They are made in this country and exported and no justification from an economic point of view has been presented for their change from the free list to paragraph 357 regarding scissors and shears generally.

Upon my motion to amend the amendment I asked for the yeas and nays.

The yeas and nays were ordered and the reading clerk proceeded to call the roll.

Mr. UNDERWOOD (when his name was called). I transfer my general pair with the senior Senator from Massachusetts [Mr. LODGE] to the senior Senator from Nebraska [Mr. HITCHCOCK] and vote "yea."

Mr. WATSON of Indiana (when his name was called). Making the same announcement of my pair and its transfer as on the previous vote, I vote "nay."

The roll call was concluded.

Mr. SUTHERLAND. I transfer my pair with the senior Senator from Arkansas [Mr. ROBINSON] to the junior Senator from Oklahoma [Mr. HARRELD] and vote "nay."

Mr. HALE. Making the same announcement as before, I vote "nay."

Mr. DIAL (after having voted in the affirmative). I am paired with the Senator from Colorado [Mr. PHIPPS]. I transfer that pair to the senior Senator from Texas [Mr. CULBERSON] and allow my vote to stand.

Mr. STERLING. I transfer my pair with the Senator from South Carolina [Mr. SMITH] to the Senator from Delaware [Mr. DU PONT] and vote "nay."

Mr. KELLOGG (after having voted in the negative). Has the senior Senator from North Carolina [Mr. SIMMONS] voted?

The PRESIDING OFFICER. That Senator has not voted.

Mr. KELLOGG. I transfer my pair with the Senator from North Carolina [Mr. SIMMONS] to the junior Senator from Oregon [Mr. STANFIELD] and allow my vote to stand.

Mr. McCUMBER (after having voted in the negative). I observe that the junior Senator from Utah [Mr. KING] has not voted. I transfer my pair with that Senator to the senior Senator from Pennsylvania [Mr. CROW] and allow my vote to stand.

Mr. HARRISON (after having voted in the affirmative). I find that my pair, the junior Senator from West Virginia [Mr. ELKINS], has not voted. I transfer that pair to the senior Senator from Nevada [Mr. PITTMAN] and allow my vote to stand.

Mr. CURTIS. I desire to announce the following pairs:

The Senator from Delaware [Mr. BALL] with the Senator from Florida [Mr. FLETCHER];

The Senator from Rhode Island [Mr. COLT] with the Senator from Florida [Mr. TRAMMELL];

The Senator from New Jersey [Mr. EDGE] with the Senator from Oklahoma [Mr. OWEN];

The Senator from New Jersey [Mr. FRELINGHUYSEN] with the Senator from Montana [Mr. WALSH]; and

The Senator from Indiana [Mr. NEW] with the Senator from Tennessee [Mr. McKELLAR].

The result was announced—yeas 18, nays 33, as follows:

YEAS—18.

Ashurst	Glass	La Follette	Swanson
Capper	Harris	Norris	Underwood
Caraway	Harrison	Overman	Watson, Ga.
Dial	Heflin	Pomerene	
Gerry	Jones, N. Mex.	Sheppard	

NAYS—33.

Brandegee	Jones, Wash.	Newberry	Sutherland
Bursum	Kellogg	Nicholson	Townsend
Calder	Keyes	Oddie	Wadsworth
Cameron	Lenroot	Poindexter	Warren
Curtis	McCumber	Rawson	Watson, Ind.
Dillingham	McKinley	Shortridge	Willis
France	McLean	Smoot	
Gooding	McNary	Spencer	
Hale	Nelson	Sterling	

NOT VOTING—45.

Ball	Fletcher	Myers	Simmons
Borah	Frelinghuysen	New	Smith
Broussard	Harreld	Norbeck	Stanfield
Colt	Hitchcock	Owen	Stanley
Crow	Johnson	Page	Trammell
Culberson	Kendrick	Pepper	Walsh, Mass.
Cummins	King	Phipps	Walsh, Mont.
du Pont	Ladd	Pittman	Weller
Edge	Lodge	Ransdell	Williams
Elkins	McCormick	Reed	
Ernst	McKellar	Robinson	
Fernald	Moses	Shields	

So the amendment of Mr. JONES of New Mexico to the committee amendment was rejected.

The PRESIDING OFFICER. The question recurs upon agreeing to the committee amendment.

The amendment was agreed to.

Mr. JONES of New Mexico. I should like to inquire whether the committee amendment includes any of the specific rates provided for later on in the paragraph? I do not so understand, but I should like to be confirmed in that view.

Mr. McCUMBER. I will state to the Senator that it does not.

Mr. JONES of New Mexico. Very well.

Mr. HARRISON. Mr. President, in view of the fact that certain Senators who are now here were not present when a statement was made by the distinguished junior Senator from

Ohio [Mr. WILLIS] a moment ago, I desire now to rehearse the statement merely for their information.

Mr. POINDEXTER. Mr. President——

The PRESIDING OFFICER. Does the Senator from Mississippi yield to the Senator from Washington?

Mr. HARRISON. In a moment I shall yield.

The junior Senator from Ohio stated that Mr. Patterson, who conferred last night with the chairman of the Republican National Campaign Committee, Mr. Adams, touching the raising of contributions to reelect a Republican Senate and a Republican House of Representatives, saw the Senator from Ohio to-day and told him that he did not favor any tariff duty on cash registers; that he opposed it; in other words, that he was for admitting them free. In view of that revelation, I ask unanimous consent that the vote whereby that part of the amendment touching the cash registers, on page 83, paragraph 372, was agreed to may be reconsidered.

The PRESIDING OFFICER. Is there objection to the request for unanimous consent by the Senator from Mississippi?

Mr. TOWNSEND. Mr. President, the statement which was made by the Senator from Ohio [Mr. WILLIS] was not new. I made that statement on the floor yesterday during the discussion of the cash-register amendment. There is no doubt as to that being the attitude of the Ohio company. It can gain its end by free trade better than it can through a tariff duty, because it has erected a plant in Germany and can there manufacture cash registers, evade German tariff, and destroy competitors in the United States.

Mr. HARRISON. I am very glad to know that the Senator is with me in my request for unanimous consent. So I make it, Mr. President.

Mr. TOWNSEND. The Senator from Michigan is not with the Senator from Mississippi in his request.

The PRESIDING OFFICER. Is there objection to the request for unanimous consent preferred by the Senator from Mississippi?

Mr. TOWNSEND. I can see no good reason in reconsidering the vote whereby the amendment was agreed to. I was in favor of the tariff duty particularly because of the attitude of the National Cash Register Co., which was at that time understood, and I can see no reason for now reconsidering the vote whereby the amendment was agreed to. I object.

The PRESIDING OFFICER. Objection is made.

Mr. HARRISON. Then, Mr. President, I move that the vote whereby the first amendment of the Senate committee to paragraph 372, on page 83, was adopted be reconsidered.

Mr. McCUMBER. I raise the point of order that the Senator from Mississippi did not vote upon the prevailing side on the amendment and is not entitled to make the motion.

Mr. HARRISON. I submit that the rule has been without question that where no record vote has been taken upon the adoption of an amendment the question could not be raised as to how a Senator voted. Since there was no vote taken upon the final adoption of the first amendment to paragraph 372, the question as to how a Senator voted can not be raised.

Mr. McCUMBER. But there was a record vote.

Mr. HARRISON. There was a record vote as to a part of the paragraph 372, on page 83, touching cash registers, but there were some other provisions in the committee amendment; and I am asking for a reconsideration of the vote whereby the first amendment was agreed to, there having been no record vote taken on its adoption as a whole. I think I can find precedent after precedent to sustain my motion. I know that the Presiding Officer has ruled against me several times where I have made such a point of order. So I submit that the point of order should be overruled. I can not understand, in view of the revelation of the distinguished Senator from Ohio as to the position of the president of the National Cash Register Co., who is more interested in it than anyone else—because, as I understand, there are only about three small independent concerns in the country which make cash registers—why we should want to protect cash registers.

The PRESIDING OFFICER. It is the opinion of the present occupant of the chair that, there having been no yea-and-nay vote on the amendment as amended, the point of order is not well taken.

Mr. McCUMBER. I move to lay the motion on the table.

Mr. HARRISON. Mr. President, I ask for the yeas and nays.

The yeas and nays were ordered, and the reading clerk proceeded to call the roll.

Mr. DIAL (when his name was called). Making the same announcement as to my pair and its transfer as on the former ballot, I vote "nay."

Mr. HALE (when his name was called). Announcing the same transfer of my pair as before, I vote "yea."

Mr. HARRISON (when his name was called). I transfer my pair with the Senator from West Virginia [Mr. ELKINS] to the senior Senator from Nevada [Mr. PITTMAN], and vote "nay."

Mr. KELLOGG (when his name was called). I transfer my pair with the senior Senator from North Carolina [Mr. SIMMONS] to the junior Senator from Oregon [Mr. STANFIELD], and vote "yea."

Mr. McCUMBER (when his name was called). Transferring my pair as on the previous vote, I vote "yea."

Mr. STERLING (when his name was called). Announcing the same transfer of my pair as on the former vote, I vote "yea."

Mr. SUTHERLAND (when his name was called). Making the same announcement as on the previous vote with reference to my pair and its transfer, I vote "yea."

Mr. UNDERWOOD (when his name was called). I transfer my general pair with the Senator from Massachusetts [Mr. LODGE] to the Senator from Nebraska [Mr. HITCHCOCK], and vote "nay."

Mr. WATSON of Indiana (when his name was called). Making the same announcement as on the last vote with reference to my pair and its transfer, I vote "yea."

The roll call was concluded.

Mr. CURTIS. I desire to announce the following pairs:

The Senator from Indiana [Mr. NEW] with the Senator from Tennessee [Mr. MCKELLAR];

The Senator from New Jersey [Mr. EDGE] with the Senator from Oklahoma [Mr. OWEN];

The junior Senator from Kentucky [Mr. ERNST] with the senior Senator from Kentucky [Mr. STANLEY];

The Senator from Rhode Island [Mr. COLT] with the Senator from Florida [Mr. TRAMMELL]; and

The Senator from New Jersey [Mr. FRELINGHUYSEN] with the Senator from Montana [Mr. WALSH].

The result was announced—yeas 34, nays 20, as follows:

YEAS—34.

Brandegee	Hale	Nelson	Sterling
Bursum	Jones, Wash.	Newberry	Sutherland
Calder	Kellogg	Nicholson	Townsend
Cameron	Keyes	Oddie	Wadsworth
Capper	Lenroot	Poindexter	Warren
Curtis	McCumber	Rawson	Watson, Ind.
Dillingham	McKinley	Shortridge	Willis
France	McLean	Smoot	
Gooding	McNary	Spencer	

NAYS—20.

Ashurst	Harris	La Follette	Sheppard
Caraway	Harrison	Myers	Stanley
Dial	Heflin	Norris	Swanson
Gerry	Jones, N. Mex.	Overman	Underwood
Glass	Kendrick	Pomerene	Watson, Ga.

NOT VOTING—42.

Ball	Fernald	Moses	Shields
Borah	Fletcher	New	Simmons
Broussard	Frelinghuysen	Norbeck	Smith
Colt	Harreld	Owen	Stanfield
Crow	Hitchcock	Page	Trammell
Culberson	Johnson	Pepper	Walsh, Mass.
Cummins	King	Phipps	Walsh, Mont.
du Pont	Ladd	Pittman	Weller
Edge	Lodge	Ransdell	Williams
Elkins	McCormick	Reed	
Ernst	McKellar	Robinson	

So Mr. HARRISON's motion was laid on the table.

The PRESIDING OFFICER. The Secretary will state the next amendment.

The next amendment was, on page 74, line 22, after the word "dozen," to strike out "3 cents each and 35" and insert "4 cents each and 60."

Mr. JONES of New Mexico obtained the floor.

Mr. McCUMBER. Mr. President, will the Senator yield to me for a moment to offer an amendment to the committee amendment?

Mr. JONES of New Mexico. I yield.

Mr. McCUMBER. On behalf of the committee, in line 23 I move to strike out "60" and insert in lieu thereof "45."

The PRESIDING OFFICER. The amendment will be stated.

The READING CLERK. In the committee amendment on line 23, page 74, it is proposed to strike out "60" and insert "45," so as to read:

Four cents each and 45 per cent ad valorem.

The PRESIDING OFFICER. The question is on the amendment proposed by the Senator from North Dakota to the amendment of the committee.

The amendment to the amendment was agreed to.

Mr. JONES of New Mexico. Mr. President, I desire to have amended the specific duty levied upon those scissors. You will recall that those scissors are valued at less than 50 cents per dozen. Necessarily, they are cast-iron scissors. They are

not only made in this country as cheaply as anywhere in the world, but they are exported from this country; and such an enormous duty upon that article can not serve any good purpose.

The committee have reduced the ad valorem duty from 60 per cent to 45 per cent. I wonder if they will not at least reduce the specific duty by one-half, so as to make it 2 cents each instead of 4 cents?

I move that the numeral "4" on line 22 be changed to read "2."

The PRESIDING OFFICER. The amendment to the amendment will be stated.

The READING CLERK. On page 74, line 22, it is proposed to strike out "4" and insert "2," so that, if amended, it will read:

Two cents each and 45 per cent ad valorem.

Mr. MCCUMBER. Mr. President, I simply desire to enter in the RECORD a few figures.

Taking up the first of the items in that paragraph, which is hair clippers, and taking the Reynolds report, we have an importation of a foreign value of 58 cents each. The landing cost is 5 cents. Giving a specific duty of 20 cents and an ad valorem duty of 35 per cent, and allowing a profit to the importer of 20 per cent, which would be 12 cents, that would bring the total landed cost, with profits, up to $1.30. The domestic selling price of the comparable article is $1.66.
